

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

**Usage guidelines**

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

+ *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.

+ *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.

+ *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.

+ *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

**About Google Book Search**

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at `http://books.google.com/`

*** The new portions in the present edition are indicated by a *star* (*), the editorial additions being distinguished by the initials H. and A. Whatever is enclosed in *brackets* is also, with unimportant exceptions, editorial. This remark, however, does not apply to the *cross-references* in brackets, most of which belong to the original work, though a large number have been added to this edition.

---

## ABBREVIATIONS.

| | |
|---|---|
| Ald. | The Aldine edition of the Septuagint, 1518. |
| Alex. | The Codex Alexandrinus (5th cent.), edited by Baber, 1816–28. |
| A. V. | The authorized (common) English version of the Bible. |
| Comp. | The Septuagint as printed in the Complutensian Polyglott, 1514–17, published 1522. |
| FA. | The Codex Friderico-Augustanus (4th cent.), published by Tischendorf 1846. |
| Rom. | The Roman edition of the Septuagint, 1587. The readings of the Septuagint for which no authority is specified are also from this source. |
| Sin. | The Codex Sinaiticus (4th cent.), published by Tischendorf in 1862. This and FA. are parts of the same manuscript. |
| Vat. | The Codex Vaticanus 1209 (4th cent.), according to Mai's edition, published by Vercellone in 1857. "Vat. H." denotes readings of the MS. (differing from Mai), given in Holmes and Parsons's edition of the Septuagint, 1798–1827. "Vat.[1]" distinguishes the primary reading of the MS. from "Vat.[2]" or "2. m.," the alteration of a later reviser. |

# BIBLICAL ANTIQUITIES, BIOGRAPHY, GEOGRAPHY, AND NATURAL HISTORY.

**RE'GEM-ME'LECH** (רֶגֶם מֶלֶךְ) [*friend of the king*]: Ἀρβεσελὲρ ὁ βασιλεύς; Alex. Ἀρβεσελὲρ ὁ β.: *Rogommelech*). The names of Sherezer and Regem-melech occur in an obscure passage of Zechariah (vii. 2). They were sent on behalf of some of the Captivity to make inquiries at the Temple concerning fasting. In the A. V. the subject of the verse appears to be the captive Jews in Babylon, and Bethel, or "the house of God," is regarded as the accusative after the verb of motion. The LXX. take "the king" as the nominative to the verb "sent," considering the last part of the name Regem-melech as an appellative and not as a proper name. Again, in the Vulgate, Sherezer, Regem-melech, and their men, are the persons who sent to the house of God. The Peshito-Syriac has a curious version of the passage: "And he sent to Bethel, to Sharezer and Rahmag; and the king sent and his men to pray for him before the Lord:" Sharezer and Rahmag being associated in Jer. xxxix. 3, 13. On referring to Zech. vii. 5, the expression "the people of the land" seems to indicate that those who sent to the Temple were not the captive Jews in Babylon, but those who had returned to their own country; and this being the case it is probable that in ver. 2 "Bethel" is to be taken as the subject, "and Bethel, *i. e.* the inhabitants of Bethel, sent."

The Hexaplar-Syriac, following the Peshito, has "Rabmag." What reading the LXX. had before them it is difficult to conjecture. From its connection with Sherezer, the name Regem-melech (lit. "king's friend," comp. 1 Chr. xxvii. 33), was probably an Assyrian title of office. W. A. W.

**REGION-ROUND-ABOUT, THE** (ἡ περίχωρος). This term had perhaps originally a more precise and independent meaning than it appears to a reader of the Authorized Version to possess.

In the Old Test. it is used by the LXX. as the equivalent of the singular Hebrew word *kaCcar* (הַכִּכָּר, literally "the round"), a word the topographical application of which is not clear, but which seems in its earliest occurrences to denote the *circle* or oasis of cultivation in which stood Sodom and Gomorrah and the rest of the five "cities of the *Ciccar*" (Gen. xiii. 10, 11, 12, xix. 17, 25, 28, 29; Deut. xxxiv. 3). Elsewhere it has a wider meaning, though still attached to the Jordan (2 Sam. xviii. 23; 1 K. vii. 46: 2 Chr. iv. 17; Neh. iii. 22, xii. 28). It is in this less restricted sense that περίχωρος occurs in the New Test. In Matt. iii. 5 and Luke iii. 3 it denotes the populous and flourishing region which contained the towns of Jericho and its dependencies, in the Jordan Valley, inclosed in the amphitheatre of the hills of *Quarantana* (see Map, vol. ii. p. 664), a densely populated region, and important enough to be reckoned as a distinct section of Palestine — "Jerusalem, Judæa, and all the *arrondissement*[a] of Jordan" (Matt. iii. 5, also Luke vii. 17). [JUD.ÆA, WILDERNESS OF, Amer. ed.] It is also applied to the district of Gennesaret, a region which presents certain similarities to that of Jericho, being inclosed in the amphitheatre of the hills of Hattin and bounded in front by the water of the lake, as the other was by the Jordan, and also resembling it in being very thickly populated (Matt. xiv. 35; Mark vi. 55; Luke vi. 17, vii. 17).

G.

**REHABI'AH** (רְחַבְיָה in 1 Chr. xxiii.; elsewhere רְחַבְיָהוּ [*whom Jehovah enlarges*]: Ῥαβιά, [Vat.] Alex. Ρααβια, in 1 Chr. xxiii.; Ῥαάβιας, 1 Chr. xxiv.; Ῥαβίας, Alex. Ρααβιας, 1 Chr. xxvi.: *Rohobia, Rahabia* in 1 Chr. xxvi.). The only son of Eliezer, the son of Moses, and the father of Isshiah, or Jeshaiah (1 Chr. xxiii. 17, xxiv. 21, xxvi. 25). His descendants were numerous.

**RE'HOB** (רְחֹב [and רְחוֹב], *street, marketplace*]: Ῥαάβ, [Ῥοώβ:] *Rohob*). 1. The father of Hadadezer king of Zobah, whom David smote at the Euphrates (2 Sam. viii. 3, 12). Josephus (*Ant.* vii. 5, § 1) calls him Ἄρδος, and the Old Latin Version *Arachus*, and Blayney (on Zech. ix. 1) thinks this was his real name, and that he was called Rehob, or "charioteer," from the number of chariots in his possession. The name appears to be peculiarly Syrian, for we find a district of Syria called Rehob or Beth-Rehob (2 Sam. x. 6, 8).

[a] Thus Jerome — "regiones in *circuitu* per quas medius Jordanes fluit."

Digitized by Google

2. (Ῥοάβ.) A Levite, or family of Levites, who sealed the covenant with Nehemiah (Neh. x. 11). W. A. W.

**REHOB** (רְחֹב [as above]). The name of more than one place in the extreme north of the Holy Land.

1. ([Rom. Ῥοάβ; Vat.] Ρααβ; Alex. Ροωβ: *Rohob.*)[a] The northern limit of the exploration of the spies (Num. xiii. 21). It is specified as being "as men come unto Hamath," or, as the phrase is elsewhere rendered, "at the entrance of Hamath," *i. e.* at the commencement of the territory of that name, by which in the early books of the Bible the great valley of Lebanon, the *Bika'ah* of the Prophets, and the *Bŭka'a* of the modern Ars'a, seems to be roughly designated. This, and the consideration of the improbability that the spies went farther than the upper end of the Jordan Valley (Rob. *Bibl. Res.* iii. 371), seems to fix the position of Rehob as not far from *Tell el-Kady* and *Banias*. This is confirmed by the statement of Judg. xviii. 28, that Laish or Dan (*Tell el-Kady*) was "in the valley that is by Beth-rehob." No trace of the name of Rehob or Beth-rehob has yet been met with in this direction. Dr. Robinson proposes to identify it with *Hûnîn*, an ancient fortress in the mountains N. W. of the plain of Huleh, the upper district of the Jordan Valley. But this, though plausible, has no certain basis.

To those who are anxious to extend the boundaries of the Holy Land on the north and east it may be satisfactory to know that a place called *Ruhaibeh* exists in the plain of *Jerud*, about 25 miles N. E. of Damascus, and 12 N. of the northernmost of the three lakes (see the *Maps* of Van de Velde and Porter).

There is no reason to doubt that this Rehob or Beth-rehob was identical with the place mentioned under both names in 2 Sam. x. 6, 8,[b] in connection with Maacah, which was also in the upper district of the *Huleh*.

Inasmuch, however, as Beth-rehob is distinctly stated to have been "far from Zidon" (Judg. xviii. 28), it must be a distinct place from

2. (Ῥαάβ: Alex. Ροωβ: *Rohob*), one of the towns allotted to Asher (Josh. xix. 28), and which from the list appears to have been in close proximity to Zidon. It is named between Ebron, or Abdon, and Hammon. The towns of Asher lay in a region which has been but imperfectly examined, and no one has yet succeeded in discovering the position of either of these three.

3. (Ῥααβ, [Ῥαάβ, Ἐρεώ, Ῥοάβ;] Alex. Ραωβ, [Ροωβ:] *Rohob, Rochob.*) Asher contained another Rehob (Josh. xix. 30); but the situation of this, like the former, remains at present unknown. One of the two, it is difficult to say which, was allotted to the Gershonite Levites (Josh. xxi. 31; 1 Chr. vi. 75), and one of its Canaanite inhabitants retained possession (Judg. i. 31). The mention of Aphik in this latter passage may imply that the Rehob referred to was that of Josh. xix. 30. This, Eusebius and Jerome (*Onomasticon*, "Roob") confuse with the Rehob of the spies, and place four Roman miles from Scythopolis. The place they refer to still survives as *Rehab*, 3½ miles S. of *Beisan*, but their identification of a town in that position with one in the territory of Asher is obviously inaccurate. G.

**REHOBO'AM** (רְחַבְעָם, *enlarger of the people* — see Ex. xxxiv. 20, and compare the name Εὐρύδημος: Ῥοβοάμ: *Roboam*), son of Solomon by the Ammonite princess Naamah (1 K. xiv. 21 31), and his successor (1 K. xi. 43). From the earliest period of Jewish history we perceive symptoms that the confederation of the tribes was but imperfectly cemented. The powerful Ephraim could never brook a position of inferiority. Throughout the Book of Judges (viii. 1, xii. 1) the Ephraimites show a spirit of resentful jealousy when any enterprise is undertaken without their concurrence and active participation. From them had sprung Joshua, and afterwards (by his place of birth) Samuel might be considered theirs, and though the tribe of Benjamin gave to Israel its first king, yet it was allied by hereditary ties to the house of Joseph, and by geographical position to the territory of Ephraim, so that up to David's accession the leadership was practically in the hands of the latter tribe. But Judah always threatened to be a formidable rival. During the earlier history, partly from the physical structure and situation of its territory (Stanley, *S. & P.* p. 162), which secluded it from Palestine just as Palestine by its geographical character was secluded from the world, it had stood very much aloof from the nation [JUDAH], and even after Saul's death, apparently without waiting to consult their brethren, "the men of Judah came and anointed David king over the house of Judah" (2 Sam. ii. 4), while the other tribes adhered to Saul's family, thereby anticipating the final disruption which was afterwards to rend the nation permanently into two kingdoms. But after seven years of disaster a reconciliation was forced upon the contending parties; David was acknowledged as king of Israel, and soon after, by fixing his court at Jerusalem and bringing the Tabernacle there, he transferred from Ephraim the greatness which had attached to Shechem as the ancient capital, and to Shiloh as the seat of the national worship. In spite of this he seems to have enjoyed great personal popularity among the Ephraimites, and to have treated many of them with special favor (1 Chr. xii. 30, xxvii. 10, 14), yet this roused the jealousy of Judah, and probably led to the revolt of Absalom. [ABSALOM.] Even after that perilous crisis was past, the old rivalry broke out afresh, and almost led to another insurrection (2 Sam. xx. 1, &c.). Compare Ps. lxxviii. 60, 67, &c. in illustration of these remarks. Solomon's reign, from its severe taxes and other oppressions, aggravated the discontent, and latterly, from its irreligious character, alienated the prophets and provoked the displeasure of God. When Solomon's strong hand was withdrawn the crisis came. Rehoboam selected Shechem as the place of his coronation, probably as an act of concession to the Ephraimites, and perhaps in deference to the suggestions of those old and wise counsellors of his father, whose advice he afterwards unhappily rejected. From the present Hebrew text of 1 K. xii. the exact details of the transactions at Shechem are involved in a little uncertainty. The general facts indeed are clear The people demanded a remission of the severe

---

[a] Targum Pseudojon. פְּלַטְיוֹת, *i. e.* πλατεῖαι, streets; and Samaritan Vers. פרתא.

[b] Here the name is written in the fuller form of רְחֹוב.

Digitized by Google

burdens imposed by Solomon, and Rehoboam promised them an answer in three days, during which time he consulted first his father's counsellors, and then the young men "that were grown up with him, and which stood before him," whose answer shows how greatly during Solomon's later years the character of the Jewish court had degenerated. Rejecting the advice of the elders to conciliate the people at the beginning of his reign, and so make them "his servants forever," he returned as his reply, in the true spirit of an eastern despot, the frantic bravado of his contemporaries: "My little finger shall be thicker than my father's loins. . . . . I will add to your yoke; my father hath chastised you with whips, but I will chastise you with scorpions" (*i. e.* scourges furnished with sharp points[a]). Thereupon arose the formidable song of insurrection, heard once before when the tribes quarreled after David's return from the war with Absalom: —

> What portion have we in David?
> What inheritance in Jesse's son?
> To your tents, O Israel!
> Now see to thy own house, O David!

Rehoboam sent Adoram or Adoniram, who had been chief receiver of the tribute during the reigns of his father and his grandfather (1 K. iv. 6; 2 Sam. xx. 24), to reduce the rebels to reason, but he was stoned to death by them; whereupon the king and his attendants fled in hot haste to Jerusalem. So far all is plain, but there is a doubt as to the part which Jeroboam took in these transactions. According to 1 K. xii. 3 he was summoned by the Ephraimites from Egypt (to which country he had fled from the anger of Solomon) to be their spokesman at Rehoboam's coronation, and actually made the speech in which a remission of burdens was requested. But, in apparent contradiction to this, we read in ver. 20 of the same chapter that after the success of the insurrection and Rehoboam's flight, "when all Israel *heard* that Jeroboam was come again, they sent and called him unto the congregation and made him king." But there is reason to think that ver. 3 has been interpolated. It is not found in the LXX., which makes no mention of Jeroboam in this chapter till ver. 20, substituting in ver. 3 for "Jeroboam and all the congregation of Israel came and spoke unto Rehoboam" the words, *καὶ ἐλάλησεν ὁ λαὸς πρὸς τὸν βασιλέα Ῥοβοάμ*. So too Jeroboam's name is omitted by the LXX. in ver. 12. Moreover we find in the LXX. a long supplement to this 12th chapter, evidently ancient, and at least in parts authentic, containing fuller details of Jeroboam's biography than the Hebrew. [JEROBOAM.] In this we read that after Solomon's death he returned to his native place, Sarira in Ephraim, which he fortified, and lived there quietly, watching the turn of events, till the long-expected rebellion broke out, when the Ephraimites *heard* (doubtless through his own agency) that he had returned, and invited him to Shechem to assume the crown. From the same supplementary narrative of the LXX. it would appear that more than a year must have elapsed between Solomon's death and Rehoboam's visit to Shechem, for, on receiving the news of the former event, Jeroboam requested from the king of Egypt leave to return to his native country. This the king tried to prevent by giving him his sister-in-law in marriage: but on the birth of his child Abijah, Jeroboam renewed his request, which was then granted. It is probable that during this year the discontent of the N. tribes was making itself more and more manifest, and that this led to Rehoboam's visit and intended inauguration.

On Rehoboam's return to Jerusalem he assembled an army of 180,000 men from the two faithful tribes of Judah and Benjamin (the latter transferred from the side of Joseph to that of Judah in consequence of the position of David's capital within its borders), in the hope of reconquering Israel. The expedition, however, was forbidden by the prophet Shemaiah, who assured them that the separation of the kingdoms was in accordance with God's will (1 K. xii. 24): still during Rehoboam's life-time peaceful relations between Israel and Judah were never restored (2 Chr. xii. 15; 1 K. xiv. 30). Rehoboam now occupied himself in strengthening the territories which remained to him, by building a number of fortresses of which the names are given in 2 Chr. xi. 6–10, forming a girdle of "fenced cities" round Jerusalem. The pure worship of God was maintained in Judah, and the Levites and many pious Israelites from the North, vexed at the calf-idolatry introduced by Jeroboam at Dan and Bethel, in imitation of the Egyptian worship of Mnevis, came and settled in the southern kingdom and added to its power. But Rehoboam did not check the introduction of heathen abominations into his capital: the lascivious worship of Ashtoreth was allowed to exist by the side of the true religion (an inheritance of evil doubtless left by Solomon), "images" (of Baal and his fellow divinities) were set up, and the worst immoralities were tolerated (1 K. xiv. 22–24). These evils were punished and put down by the terrible calamity of an Egyptian invasion. Shortly before this time a change in the ruling house had occurred in Egypt. The XXIst dynasty, of Tanites, whose last king, Pisham or Psusennes, had been a close ally of Solomon (1 K. iii. 1, vii. 8, ix. 16, x. 28, 29), was succeeded by the XXIId, of Bubastites, whose first sovereign, Shishak (Sheshonk, Sesonchis, Σουσακίμ) connected himself, as we have seen, with Jeroboam That he was incited by him to attack Judah is very probable: at all events in the 5th year of Rehoboam's reign the country was invaded by a host of Egyptians and other African nations, numbering 1,200 chariots, 60,000 cavalry, and a vast miscellaneous multitude of infantry. The line of fortresses which protected Jerusalem to the W. and S. was forced, Jerusalem itself was taken, and Rehoboam had to purchase an ignominious peace by delivering up all the treasures with which Solomon had adorned the temple and palace, including his golden shields, 200 of the larger, and 300 of the smaller size (1 K. x. 16, 17), which were carried before him when he visited the Temple in state. We are told that after the Egyptians had retired, his vain and foolish successor comforted himself by substituting shields of brass, which were solemnly borne before him in procession by the body-guard, as if nothing had been changed since his father's time (Ewald, *Geschichte des V. I.* iii. 348, 464). Shishak's success is commemorated by sculptures discovered by Champollion on the outside of the great Temple at Karnak, where among a long list of captured towns and provinces occurs the name *Melchi Judah* (kingdom of Judah) It is said

[a] So in Latin, *scorpio*, according to Isidore (*Origg.* v. 27), is "virga nodosa et aculeata, quia aculeato vulnere in corpus infligitur" (*Facciolati*, s. v.).

Digitized by Google

that the features of the captives in these sculptures are unmistakably Jewish (Rawlinson, *Herodotus*, ii. 376, and *Bampton Lectures*, p. 126; Bunsen, *Egypt*, iii. 242). After this great humiliation the moral condition of Judah seems to have improved (2 Chr. xii. 12), and the rest of Reboboam's life to have been unmarked by any events of importance. He died B. C. 958, after a reign of 17 years, having ascended the throne B. C. 975 at the age of 41 (1 K. xiv. 21; 2 Chr. xii. 13). In the addition to the LXX. already mentioned (inserted after 1 K. xii. 24) we read that he was 16 years old at his accession, a misstatement probably founded on a wrong interpretation of 2 Chr. xiii. 7, where he is called "young" (i. e. *new to his work, inexperienced*) and "tender-hearted" (רַךְ־לֵבָב, *wanting in resolution and spirit*). He had 18 wives, 60 concubines, 28 sons, and 60 daughters. The wisest thing recorded of him in Scripture is that he refused to waste away his sons' energies in the wretched existence of an Eastern zenana, in which we may infer, from his helplessness at the age of 41, that he had himself been educated, but dispersed them in command of the new fortresses which he had built about the country. Of his wives, Mahalath, Abihail, and Maachah were all of the royal house of Jesse: Maachah he loved best of all, and to her son Abijah he bequeathed his kingdom. The text of the LXX. followed in this article is Tischendorf's edition of the Vatican MS. [not of the Vat. MS., but reprint of the Roman edition of 1587], Leipsic, 1850. G. E. L. C.

**REHO'BOTH** (רְחֹבוֹת [*streets, wide places*]; Samar. רחיבות: ἐφυχωρία: Veneto-Gk. αἱ Πλατεῖαι: *Latitudo*). The third of the series of wells dug by Isaac (Gen. xxvi. 22). He celebrates his triumph and bestows its name on the well in a fragment of poetry of the same nature as those in which Jacob's wives give names to his successive children: "He called the name of it Rehoboth ('room,') and said, —

> 'Because now Jehovah hath-made-room for us
> And we shall increase in the land.'"

Isaac had left the valley of Gerar and its turbulent inhabitants before he dug the well which he thus commemorated (ver. 22). From it he, in time, "went up" to Beer-sheba (ver. 23), an expression which is always used of motion towards the Land of promise. The position of Gerar has not been definitely ascertained, but it seems to have lain a few miles to the S. of Gaza and nearly due E. of Beer-sheba. In this direction, therefore, if anywhere, the wells Sitnah, Esek, and Rehoboth, should be searched for. A *Wady Ruhaibeh*, containing the ruins of a town of the same name, with a large well,[a] is crossed by the road from *Khan en-Nukhl* to Hebron, by which Palestine is entered on the south. It lies about 20 miles S. W. of *Bir es-Seba*, and more than that distance S. of the most probable situation of Gerar. It therefore seems unsafe, without further proof, to identify it with Rehoboth, as Rowlands (in Williams' *Holy City*, i. 465), Stewart (*Tent and Khan*, p. 202), and Van de Velde[b] (*Memoir*, p. 343) have done. At the same time, as is admitted by Dr. Robinson, the existence of so large a place here, without any apparent mention, is mysterious. All that can be said in favor of the identity of *Ruhaibeh* with Rehoboth is said by Dr. Bonar (*Desert of Sinai*, p. 316), and not without considerable force.

The ancient Jewish tradition confined the events of this part of Isaac's life to a much narrower circle. The wells of the patriarchs were shown near Ashkelon in the time of Origen, Antoninus Martyr, and Eusebius (Reland, *Pal.* p. 589); the Samaritan Version identifies Gerar with Ashkelon; Josephus (*Ant.* i. 12, § 1) calls it "Gerar of *Palestine*," *i. e.* of *Philistia*. G.

**REHO'BOTH, THE CITY** (רְחֹבֹת עִיר, *i. e.* Rechôbôth 'Ir [*streets of the city*]; Samar. רחבות; Sam. vers.[c] סטבן: Ῥωβὼθ πόλις; Alex. Ῥωβωθ; *plateæ civitatis*). One of the four cities built by Asshur, or by Nimrod in Asshur, according as this difficult passage is translated. The four were Nineveh; Rehoboth-Ir; Calah; and Resen, between Nineveh and Calah (Gen. x. 11). Nothing certain is known of its position. The name of *Rahabeh* is still attached to two places in the region of the ancient Mesopotamia. They lie, the one on the western, and the other on the eastern bank of the Euphrates, a few miles below the confluence of the *Khabûr*. Both are said to contain extensive ancient remains. That on the eastern bank bears the affix of *malik* or royal, and this Bunsen (*Bibelwerk*) and Kalisch (*Genesis*, p. 261) propose as the representative of Rehoboth. Its distance from *Kalah-Sherghat* and *Nimrûd* (nearly 200 miles) is perhaps an obstacle to this identification. Sir H. Rawlinson (*Athenæum*, April 15, 1854) suggests *Selemiyah* in the immediate neighborhood of Kalah, "where there are still extensive ruins of the Assyrian period," but no subsequent discoveries appear to have confirmed this suggestion. The Samaritan Version (see above) reads *Sutcan* for Rehoboth; and it is remarkable that the name Sutcan should be found in connection with Calah in an inscription on the breast of a statue of the god Nebo which Sir H. Rawlinson disinterred at *Nimrûd* (*Athenæum*, as above). The *Sutcan* of the Samaritan Version is commonly supposed to denote the Sittacene of the Greek geographers (Winer, *Realwb.* "Rechoboth Ir"). But Sittacene was a district, and not a city as Rehoboth-Ir necessarily was, and, further, being in southern Assyria, would seem to be too distant from the other cities of Nimrod.

St. Jerome, both in the Vulgate and in his *Quæstiones ad Genesim* (probably from Jewish sources), considers Rehoboth-Ir as referring to Nineveh, and as meaning the "streets of the city." The reading of the Targums of Jonathan, Jerusalem, and Rabbi Joseph, on Gen. and 1 Chron., viz., *Platiah, Platiâtha*, are probably only transcriptions of the Greek word πλατεῖαι, which, as found in the well-known ancient city Platæa, is the exact equivalent of Rehoboth. Kaplan, the Jewish geographer (*Erets Kedumim*), identifies

[a] Dr. Robinson could not find the well. Dr. Stewart found it "regularly built, 12 feet in circumference," yet "completely filled up." Mr. Rowlands describes it as "an ancient well of living and good water." Who shall decide on testimony so curiously contradictory?

[b] In his Travels Van de Velde inclines to place it, or at any rate one of Isaac's wells, at *Bir Iseik*, about six miles S. W. of *Beit Jibrin* (*Syr. and Pal.* ii. 146).

[c] The Arabic translation of this version (Kuehnen adheres to the Hebrew text, having *Rahabeh el-Melik*.

Digitized by Google

*Rahabeh-malik* with Rehoboth-by-the-river, in which he is possibly correct, but considers it as distinct from Rehoboth-Ir, which he believes to have disappeared. G.

**REHOBOTH BY THE RIVER** (רְחֹבוֹת הַנָּהָר): Ῥωβὼθ — in Chr. Ῥωβὲθ — ἡ παρὰ ποταμόν; Alex. Ῥωβωθ in each: *de fluvio Rohoboth; Rohoboth quæ juxta amnem sita est*). The city of a certain Saul or Shaul, one of the early kings of the Edomites (Gen. xxxvi. 37; 1 Chr. i. 48). The affix "the river," fixes the situation of Rehoboth as on the Euphrates, emphatically "*the* river" to the inhabitants of Western Asia. [RIVER.] The name still remains attached to two spots on the Euphrates; the one simply *Rahabeh*, on the right bank, eight miles below the junction of the *Khabûr*, and about three miles west of the river (Chesney, *Expkr.*, i. 119, ii. 610, and map iv.), the other four or five miles further down on the left bank. The latter is said to be called *Rahabeh-malik*, *i. e.* "royal" (Kalisch, Kaplan),[a] and is on this ground identified by the Jewish commentators with the city of Saul; but whether this is accurate, and whether that city, or either of the two sites just named, is also identical with Rehoboth-Ir, the city of Nimrod, is not yet known.

There is no reason to suppose that the limits of Edom ever extended to the Euphrates, and therefore the occurrence of the name in the lists of kings of Edom would seem to be a trace of an Assyrian incursion of the same nature as that of Chedorlaomer and Amraphel. G.

• **REHU**, 1 Chron. i. 25 (A. V. ed. 1611). [REU.]

**REHUM** (רְחוּם [*compassionate*]: Ῥεούμ; [Vat. omits;] Alex. Ιερεουμ: *Rehum*). 1. One of the "children of the province" who went up from Babylon with Zerubbabel (Ezr. ii. 2). In Neh. vii. 7 he is called NEHUM, and in 1 Esdr. v. 8 ROIMUS.

2. ([Vat. Ραουλ, Ραουμ:] *Reum.*) "Rehum the chancellor," with Shimshai the scribe, and others, wrote to Artaxerxes to prevail upon him to stop the rebuilding of the walls and temple of Jerusalem (Ezr. iv. 8, 9, 17, 22). He was perhaps a kind of lieutenant-governor of the province under the king of Persia, holding apparently the same office as Tatnai, who is described in Ezr. v. 6 as taking part in a similar transaction, and is there called "the governor on this side the river." The Chaldee title, בְּעֵל־טְעֵם, *bə'él-tə'êm*, lit. "lord of decree," is left untranslated in the LXX. Βαλτάμ, and the Vulgate *Beelteem*; and the rendering "chancellor" in the A. V. appears to have been derived from Kimchi and others, who explain it, in consequence of its connection with "scribe," by the Hebrew word which is usually rendered "recorder." This appears to have been the view taken by the author of 1 Esdr. ii. 25, ὁ γράφων τὰ προσιόντα, and by Josephus (*Ant.* xi. 2, § 1), ὁ πάντα τὰ πραττόμενα γραφων. The former of these seems to be a gloss, for the Chaldee title is also represented by Βεελτέθμος.

3. (Ῥεούμ; [Vat. Βασουθ; FA. Βαασουθ:] *Rehum.*) A Levite of the family of Bani, who assisted in rebuilding the walls of Jerusalem (Neh. iii. 17).

4. (Ῥεούμ; [Vat. Alex. FA. (joined with part of the next word) Ραουμ.]) One of the chief of the people, who signed the covenant with Nehemiah (Neh. x. 25).

5. (Om. in Vat. MS.; [also om. by Rom. Alex. FA.[1]; FA.[2] Ρεουμ:] *Rheum.*) A priestly family or the head of a priestly house, who went up with Zerubbabel (Neh. xii. 3). W. A. W.

**REI** (רֵעִי [*friendly, social*]: [Rom. Ῥησί; Vat. Alex.] Ρησει:[b] *Rei*). A person mentioned (in 1 K. i. 8 only) as having, in company with Zadok, Benaiah, Nathan, Shimei, and the men of David's guard, remained firm to David's cause when Adonijah rebelled. He is not mentioned again, nor do we obtain any clew to his identity. Various conjectures have been made. Jerome (*Quæst. Hebr.* ad loc.) states that he is the same with "Hiram the Zairite," *i. e.* Ira the Jairite, a priest or prince about the person of David. Ewald (*Gesch.* iii. 266 *note*), dwelling on the occurrence of Shimei in the same list with Rei, suggests that the two are David's only surviving brothers, Rei being identical with RADDAI. This is ingenious, but there is nothing to support it, while there is the great objection to it that the names are in the original extremely dissimilar, Rei containing the *Ain*, a letter which is rarely exchanged for any other, but apparently never for *Daleth* (Gesen. *Thes.* pp. 976, 977). G.

**REINS**, *i. e.* kidneys, from the Latin *renes*. 1. The word is used to translate the Hebrew כְּלָיוֹת, except in the Pentateuch and in Is. xxxiv. 6, where "kidneys" is employed. In the ancient system of physiology the kidneys were believed to be the seat of desire and longing, which accounts for their often being coupled with the heart (Ps vii. 9, xxvi. 2; Jer. xi. 20, xvii. 10, etc.).

2. It is once used (Is. xi. 5) as the equivalent of חֲלָצַיִם, elsewhere translated "loins." G.

**REKEM** (רֶקֶם [*variegated garden*]: Ῥοκὼ [Vat. Ροκομ], Ῥοβὸκ; Alex. Ροκομ: *Recem*). 1. One of the five kings or chieftains of Midian slain by the Israelites (Num. xxxi. 8; Josh. xiii. 21) at the time that Balaam fell.

2. (Ῥεκόμ; Alex. Ροκομ.) One of the four sons of Hebron, and father of Shammai (1 Chr. ii. 43, 44). In the last verse the LXX. have "Jorkoam" for "Rekem." In this genealogy it is extremely difficult to separate the names of persons from those of places — Ziph, Mareshah, Tappuah, Hebron, are all names of places, as well as Maon and Beth-zur. In Josh. xviii. 27 Rekem appears as a town of Benjamin, and perhaps this genealogy may be intended to indicate that it was founded by a colony from Hebron.

**REKEM** (רֶקֶם [as above]: perhaps Καφὰν καὶ Ναιάν; Alex. Ρεκεμ: *Recem*). One of the towns of the allotment of Benjamin (Josh. xviii. 27). It occurs between MOZAH (*ham-Motsa*) and IRPEEL. No one, not even Schwarz, has attempted to iden-

[a] The existence of the second rests but on slender foundation. It is shown in the map in Layard's *Nineveh and Babylon*, and is mentioned by the two Jewish authorities named above; but it does not appear in the work of Col. Chesney.

[b] Reading צ for ע.

Digitized by Google

tify it with any existing site. But may there not be a trace of the name in *Ain Karim*, the well-known spring west of Jerusalem? It is within a very short distance of Motsah, provided *Kulonieh* be Motsah, as the writer has already suggested.
G.

**REMALI'AH** (רְמַלְיָהוּ [*whom Jehovah adorns*, Ges.] Ῥομελίας in Kings and Isaiah, Ῥομελίᾶ in Chr.; [Vat. Ρομελια (gen.) in Is. vii. 1:] *Romelia*). The father of Pekah, captain of Pekahiah king of Israel, who slew his master and usurped his throne (2 K. xv. 25–37, xvi. 1, 5; 2 Chr. xxviii. 6; Is. vii. 1–9, viii. 6).

**RE'METH** (רֶמֶת [*height ?*]: Ῥεμμάθ; Alex. Ραμμαθ: *Rameth*). One of the towns of Issachar (Josh. xix. 21), occurring in the list next to Engannim, the modern *Jenin*. It is probably (though not certainly) a distinct place from the RAMOTH of 1 Chr. vi. 73. A place bearing the name of *Rameh* is found on the west of the track from Samaria to *Jenin*, about 6 miles N. of the former and 9 S. W. of the latter (Porter, *Handb.* p. 348 *a*; Van de Velde, *Map*). Its situation, on an isolated rocky *tell* in the middle of a green plain buried in the hills, is quite in accordance with its name, which is probably a mere variation of Ramah, "height." But it appears to be too far south to be within the territory of Issachar, which, as far as the scanty indications of the record can be made out, can hardly have extended below the southern border of the plain of Esdraelon.

For Schwarz's conjecture that *Rameh* is RAMATHAIM-ZOPHIM, see that article (iii. 2672).
G.

**REM'MON** (רִמּוֹן, *i. e.* Rimmon [*pomegranate*]: Ἐρεμμών:[a] Alex. Ρεμμωθ: *Remmon*). A town in the allotment of Simeon, one of a group of four (Josh. xix. 7). It is the same place which is elsewhere accurately given in the A. V. as RIMMON; the inaccuracy both in this case and that of REMMON-METHOAR having no doubt arisen from our translators inadvertently following the Vulgate, which again followed the LXX.
G.

**REM'MON-METH'OAR** (רִמּוֹן הַמְּתֹאָר, *i. e.* Rimmon ham-methôar [*pomegranate*]: Ῥεμμωνὰ Μαθαραζά; Alex. Ρεμμωναμ μαθαριμ: *Remmon, Amthar*). A place which formed one of the landmarks of the eastern boundary of the territory of Zebulun (Josh. xix. 13 only). It occurs between Eth-Katsin and Neah. Methoar does not really form a part of the name; but is the *Pual* of תָּאַר, to stretch, and should be translated accordingly (as in the margin of the A. V.) — "R. which reaches to Neah." This is the judgment of Gesenius, *Thes.* p. 1292 *a*, Rödiger, *ib.* 1491 *a*; Fürst, *Handwb.* ii. 512 *a*, and Bunsen, as well as of the ancient Jewish commentator Rashi, who quotes as his authority the Targum of Jonathan, the text of which has however been subsequently altered, since in its present state it agrees with the A. V. in not translating the word. The latter course is taken by the LXX. and Vulgate as above, and by the Peshito, Junius and Tremellius, and Luther. The A. V. has here further erroneously followed the Vulgate in giving the first part of the name as Remmon instead of Rimmon.

This Rimmon does not appear to have been known to Eusebius and Jerome, but it is mentioned by the early traveller Parchi, who says that it is called Rumaneh, and stands an hour south of Sephoris (Zunz's *Benjamin*, ii. 433). If for south we read north, this is in close agreement with the statements of Dr. Robinson (*Bibl. Res.* iii. 110), and Mr. Van de Velde (*Map; Memoir*, p. 344), who place *Rummaneh* on the S. border of the Plain of *Buttauf*, 3 miles N. N. E. of *Seffurieh*. It is difficult, however, to see how this can have been on the eastern boundary of Zebulun.

Rimmon is not improbably identical with the Levitical city, which in Josh. xxi. 35 appears in the form of Dimnah, and again, in the parallel lists of Chronicles (1 Chr. vi. 77) as Rimmono (A. V. RIMMON).
G.

**REM'PHAN** (Ῥεμφάν, [Lachm. Tisch. Treg.] Ῥαφάν: *Rempham*, Acts vii. 43): and **CHIUN** (כִּיּוּן: Ῥαιφάν, Ῥομφᾶ, *Compl.* Am. v. 26) have been supposed to be names of an idol worshipped by the Israelites in the wilderness, but seem to be the names of two idols. The second occurs in Amos, in the Heb.; the first, in a quotation of that passage in St. Stephen's address, in the Acts: the LXX. of Amos has, however, the same name as in the Acts, though not written in exactly the same manner. Much difficulty has been occasioned by this corresponding occurrence of two names so wholly different in sound. The most reasonable opinion seemed to be that Chiun was a Hebrew or Semitic name, and Remphan an Egyptian equivalent substituted by the LXX. The former, rendered Saturn in the Syr., was compared with the Arab. and Pers. كَيْوَان, "the planet Saturn," and, according to Kircher, the latter was found in Coptic with the same signification; but perhaps he had no authority for this excepting the supposed meaning of the Hebrew Chiun. Egyptology has, however, shown that this is not the true explanation. Among the foreign divinities worshipped in Egypt, two, the god RENPU, perhaps pronounced REMPU, and the goddess KEN, occur together. Before endeavoring to explain the passages in which Chiun and Remphan are mentioned, it will be desirable to speak, on the evidence of the monuments, of the foreign gods worshipped in Egypt, particularly RENPU and KEN, and of the idolatry of the Israelites while in that country.

Besides those divinities represented on the monuments of Egypt which have Egyptian forms or names, or both, others have foreign forms or names, or both. Of the latter, some appear to have been introduced at a very remote age. This is certainly the case with the principal divinity of Memphis, Ptah, the Egyptian Hephæstus. The name Ptah is from a Semitic root, for it signifies "open," and in Heb. we find the root פָּתַח, and its cognates, "he or it opened," whereas there is no word related to it in Coptic. The figure of this divinity is that of a deformed pigmy, or perhaps unborn child, and is unlike the usual representations of divinities on

[a] The LXX. here combine the Ain and Rimmon of the A. V. into one name, and make up the four cities of this group by inserting a Θαλχά, of which there is no trace in the Hebrew, but which is possibly the Tochen of 1 Chr. iv. 32 — in the LXX. of that passage Θαναχά.

Digitized by Google

the monuments. In this case there can be no doubt that the introduction took place at an extremely early date, as the name of Ptah occurs in very old tombs in the necropolis of Memphis, and is found throughout the religious records. It is also to be noticed that this name is not traceable in the mythology of neighboring nations, unless indeed it corresponds to that of the Πάταικοι or Παταῖκοί, whose images, according to Herodotus, were the figure-heads of Phœnician ships (iii. 37). The foreign divinities that seem to be of later introduction are not found throughout the religious records, but only in single tablets, or are otherwise very rarely mentioned, and two out of their four names are immediately recognized to be non-Egyptian. They are RENPU, and the goddesses KEN, ANTA, and ASTARTA. The first and second of these have foreign forms; the third and fourth have Egyptian forms: there would therefore seem to be an especially foreign character about the former two.

RENPU, pronounced REMPU (?),[a] is represented as an Asiatic, with the full beard and apparently the general type of face given on the monuments to most nations east of Egypt, and to the REBU or Libyans. This type is evidently that of the Shemites. His hair is bound with a fillet, which is ornamented in front with the head of an antelope.

KEN is represented perfectly naked, holding in both hands corn, and standing upon a lion. In the last particular the figure of a goddess at Maltheiyeh in Assyria may be compared (Layard, *Nineveh*, ii. 212). From this occurrence of a similar representation, from her being naked and carrying corn, and from her being worshipped with KHEM, we may suppose that KEN corresponded to the Syrian goddess, at least when the latter had the character of Venus. She is also called KETESH, which is the name in hieroglyphics of the great Hittite town on the Orontes. This in the present case is probably a title, קְדֵשָׁה: it can scarcely be the name of a town where she was worshipped, applied to her as personifying it.

ANATA appears to be Anaïtis, and her foreign character seems almost certain from her being jointly worshipped with RENPU and KEN.

ASTARTA is of course the Ashtoreth of Canaan.

On a tablet in the British Museum the principal subject is a group representing KEN, having KHEM on one side and RENPU on the other: beneath is an adoration of ANATA. On the half of another tablet KEN and KHEM occur, and a dedication to RENPU and KETESH.

We have no clew to the exact time of the introduction of these divinities into Egypt, nor except in one case, to any particular places of their worship. Their names occur as early as the period of the XVIIIth and XIXth dynasties, and it is therefore not improbable that they were introduced by the Shepherds. ASTARTA is mentioned in a tablet of Amenoph II., opposite Memphis, which leads to the conjecture that she was the foreign Venus there worshipped, in the quarter of the Phœnicians of Tyre, according to Herodotus (ii. 112). It is observable that the Shepherds worshipped SUTEKH, corresponding to SETH, and also called BAR, that is, Baal, and that, under king APEPEE, he was the sole god of the foreigners. SUTEKH was probably a foreign god, and was certainly identified with Baal. The idea that the Shepherds introduced the foreign gods is therefore partly confirmed As to RENPU and KEN we can only offer a conjecture. They occur together, and KEN is a form of the Syrian goddess, and also bears some relation to the Egyptian god of productiveness, KHEM. Their similarity to Baal and Ashtoreth seems strong, and perhaps it is not unreasonable to suppose that they were the divinities of some tribe from the east, not of Phœnicians or Canaanites, settled in Egypt during the Shepherd-period. The naked goddess KEN would suggest such worship as that of the Babylonian Mylitta, but the thoroughly Shemite appearance of RENPU is rather in favor of an Arab source. Although we have not discovered a Semitic origin of either name, the absence of the names in the mythologies of Canaan and the neighboring countries, as far as they are known to us, inclines us to look to Arabia, of which the early mythology is extremely obscure.

The Israelites in Egypt, after Joseph's rule, appear to have fallen into a general, but doubtless not universal, practice of idolatry. This is only twice distinctly stated and once alluded to (Josh. xxiv. 14; Ez. xx. 7, 8, xxiii. 3), but the indications are perfectly clear. The mention of CHIUN or REMPHAN as worshipped in the desert shows that this idolatry was, in part at least, that of foreigners, and no doubt of those settled in Lower Egypt. The golden calf, at first sight, would appear to be an image of Apis of Memphis, or Mnevis of Heliopolis, or some other sacred bull of Egypt; but it must be remembered that we read in the Apocrypha of "the heifer Baal" (Tob. i. 5), so that it was possibly a Phœnician or Canaanite idol. The best parallel to this idolatry is that of the Phœnician colonies in Europe, as seen in the idols discovered in tombs at Camirus in Rhodes by M. Salzmann, and those found in tombs in the island of Sardinia (of both of which there are specimens in the British Museum), and those represented on the coins of Melita and the island of Ebusus.

We can now endeavor to explain the passages in which Chiun and Remphan occur. The Masoretic text of Amos v. 26 reads thus: "But ye bare the tent [or 'tabernacle'] of your king and Chiun your images, the star of your gods [or 'your god'], which ye made for yourselves." In the LXX. we find remarkable differences: it reads: Καὶ ἀνελάβετε τὴν σκηνὴν τοῦ Μολόχ, καὶ τὸ ἄστρον τοῦ θεοῦ ὑμῶν Ῥαιφάν, τοὺς τύπους αὐτῶν οὓς ἐποιήσατε ἑαυτοῖς. The Vulg. agrees with the Masoretic text in the order of the clauses, though omitting Chiun or Remphan. "Et portastis tabernaculum Moloch vestro, et imaginem idolorum vestrorum, sidus dei vestri, quæ fecistis vobis." The passage is cited in the Acts almost in the words of the LXX.: "Yea, ye took up the tabernacle of Moloch, and the star of your god Remphan, figures which ye made to worship them" (Καὶ ἀνελάβετε τὴν

[a] In illustration of this probable pronunciation, we may cite the occurrence in hieroglyphics of RENPA or RANP, "youth, young, to renew;" and, in Coptic, of the supposed cognate ⲣⲁⲙⲡⲓ, ⲣⲟⲙⲡⲓ, s. ⲣⲉⲙⲡⲉ, "a year;" so MENNUFR, Memphis, ⲙⲉⲛⲛⲉ, ⲙⲉⲛⲛⲟⲩ, also ⲙⲉⲙⲫⲉ, ⲙⲉⲛⲫⲓ, s ⲙⲉⲙⲫⲉ, ⲙⲛⲃⲉ, Μεμφις, and UN-NUFR, Ομφις.

Digitized by Google

σκηνὴν τοῦ Μολόχ, καὶ τὸ ἄστρον τοῦ θεοῦ ὑμῶν Ῥεμφάν, τοὺς τύπους οὓς ἐποιήσατε προσκυνεῖν αὐτοῖς). A slight change in the Hebrew would enable us to read Moloch (Malcam or Milcom) instead of "your king." Beyond this it is extremely difficult to explain the differences. The substitution of Remphan for Chiun cannot be accounted for by verbal criticism. The Hebrew does not seem as distinct in meaning as the LXX., and if we may conjecturally emend it from the latter, the last clause would be, "your images which ye made for yourselves:" and if we further transpose Chiun to the place of "your god Remphan," in the LXX., את סכות מלכם would correspond to את כוכב אלהיכם כיון, but how can we account for such a transposition as would thus be supposed, which, be it remembered, is less likely in the Hebrew than in a translation of a difficult passage? If we compare the Masoretic text and the supposed original, we perceive that in the former כיון צלמיכם corresponds in position to כוכב אלהיכם, and it does not seem an unwarrantable conjecture that כיון having been by mistake written in the place of כוכב by some copyist, צלמיכם was also transposed. It appears to be more reasonable to read "images which ye made," than "gods which ye made," as the former word occurs. Supposing these emendations to be probable, we may now examine the meaning of the passage.

The tent or tabernacle of Moloch is supposed by Gesenius to have been an actual tent, and he compares the σκηνὴ ἱερά of the Carthaginians (Diod. Sic. xx. 65; *Lex.* s. v. סְכוּת). But there is some difficulty in the idea that the Israelites carried about so large an object for the purpose of idolatry, and it seems more likely that it was a small model of a larger tent or shrine. The reading Moloch appears preferable to "your king;" but the mention of the idol of the Ammonites as worshipped in the desert stands quite alone. It is perhaps worthy of note that there is reason for supposing that Moloch was a name of the planet Saturn, and that this planet was evidently supposed by the ancient translators to be intended by Chiun and Remphan. The correspondence of Remphan or Raiphan to Chiun is extremely remarkable, and can, we think, only be accounted for by the supposition that the LXX. translator or translators of the prophet had Egyptian knowledge, and being thus acquainted with the ancient joint worship of Ken and Renpu, substituted the latter for the former, as they may have been unwilling to repeat the name of a foreign Venus. The star of Remphan, if indeed the passage is to be read so as to connect these words, would be especially appropriate if Remphan were a planetary god; but the evidence for this, especially as partly founded upon an Arab. or Pers. word like Chiun, is not sufficiently strong to enable us to lay any stress upon the agreement. In hieroglyphics the sign for a star is one of the two composing the word SEB, "to adore," and is undoubtedly there used in a symbolical as well as a phonetic sense, indicating that the ancient Egyptian religion was partly derived from a system of star-worship; and there are representations on the monuments of mythical creatures or men adoring stars (*Ancient Egyptians* pl. 30 A.). We have, however, no positive indication of any figure of a star being used as an idolatrous object of worship. From the manner in which it is mentioned we may conjecture that the star of Remphan was of the same character as the tabernacle of Moloch, an object connected with false worship rather than an image of a false god. According to the LXX. reading of the last clause it might be thought that these objects were actually images of Moloch and Remphan; but it must be remembered that we cannot suppose an image to have had the form of a tent, and that the version of the passage in the Acts, as well as the Masoretic text, if in the latter case we may change the order of the words, give a clear sense. As to the meaning of the last clause, it need only be remarked that it does not oblige us to infer that the Israelites made the images of the false gods, though they may have done so, as in the case of the golden calf: it may mean no more than that they adopted these gods.

It is to be observed that the whole passage does not indicate that distinct Egyptian idolatry was practiced by the Israelites. It is very remarkable that the only false gods mentioned as worshipped by them in the desert should be probably Moloch, and Chiun, and Remphan, of which the latter two were foreign divinities worshipped in Egypt. From this we may reasonably infer, that while the Israelites sojourned in Egypt there was also a great stranger-population in the Lower Country, and therefore that it is probable that then the shepherds still occupied the land. R. S. P.

* Jablonski (*Pantheon Ægyptiorum*, Prolegomena, L.) makes Remphah the equivalent of *regina Cœli*, that is *Luna*, whose worship was maintained in Egypt at an early day. His attempt, however, to prove that this was an Egyptian divinity, in his learned treatise *Remphah illustratus*, is not borne out by the evidence of the monuments, the Asiatic type of countenance being strongly marked in the delineations of this god. He is represented brandishing a club. A good specimen is to be seen in the Museum of the Louvre at Paris (Salle des Monuments Religieux, Armoire K), where is collected in one view a complete Egyptian Pantheon.

Movers (*Die Religion der Phönisier*) finds no trace of Remphan among the gods of Phœnicia. He makes MOLOCH the Fire-god of the Ammonites, whose worship was extended through Assyria and Chaldæa — the personification of fire as the holy and purifying element.

Count Rougé considers ATESH or KETESH and ANTA or ANATA to be different forms or characters of the same divinity, an *Asiatic* Venus, for though she wears the same head-dress and diadem as the Egyptian goddess HATHOR, the Egyptians never represented their own goddesses by an entirely nude figure. Both forms of this divinity may be seen in the Louvre, as above. As ANTA she appears as the goddess of war, wielding a battle-axe, and holding a shield and lance. Such was also the character of ANAÏTIS, the war-goddess of the Persians and old Assyrians. According to Movers, ASTARTE was a divinity of a universal character, whose worship, under various names, was world-wide. J. P. T.

* **REPETITIONS IN PRAYER.** It is a characteristic of all superstitious devotion to repeat endlessly certain words, especially the names

Digitized by Google

of the deities invoked, a practice which our Lord designates as *βαττολογία* and *πολυλογία*, and severely condemns (Matt. vi. 7).

When the priests of Baa. besought their God for fire to kindle their sacrifice, they cried incessantly for several hours, in endless repetition, *O Baal hear us, O Baal hear us, O Baal hear us*, etc. (1 K. xviii. 26). When the Ephesian mob was excited to madness for the honor of their goddess, for two hours and more they did nothing but screech with utmost tension of voice, *Great the Diana of the Ephesians. Great the Diana of the Ephesians, Great the Diana of the Ephesians*, etc., with the same endless repetition (Acts xix. 28, 39). In the same way, in the devotions of Pagan Rome, the people would cry out more than five hundred times without ceasing, *Audi, Cæsar, Audi, Cæsar, Audi, Cæsar*, etc. Among the Hindoos the sacred syllable *Om, Om, Om*, is repeated as a prayer thousands of times uninterruptedly. So the Roman Catholics repeat their *Pater Nosters* and their *Ave Marius*. These single words, with nothing else, are pronounced over and over and over again; and the object of the rosary is to keep count of the number of repetitions. For each utterance a bead is dropped, and when all the beads are exhausted, there have been so many prayers.

This is the practice which our Saviour condemns. He condemns all needless words, whether repetitions or not. It is folly to employ a succession of synonymous terms, adding to the length of a prayer without increasing its fervor. Such a style of prayer rather shows a want of fervor; it is often the result of thoughtless affectation, sometimes of downright hypocrisy.

Repetitions which really arise from earnestness and agony of spirit are by no means forbidden. We have examples of such kind of repetition in our Saviour's devotions in Gethsemane, and in the wonderful prayer of Daniel (ch. ix., especially ver. 19). C. E. S.

**REPH'AEL** (רְפָאֵל [*whom God heals*]: Ῥαφαήλ: *Raphaël*). Son of Shemaiah, the firstborn of Obed-edom, and one of the gate-keepers of the Tabernacle, "able men for strength for the service" (1 Chr. xxvi. 7).

**RE'PHAH** (רָפָה [*riches*]: Ῥαφή: *Rapha*). A son of Ephraim, and ancestor of Joshua the son of Nun (1 Chr. vii. 25).

**REPHA'IAH** [3 syl.] (רְפָיָה [*healed of Jehovah*]: Ῥαφαλ; Alex. Ραφαια: *Raphaïa*). 1. The sons of Rephaiah appear among the descendants of Zerubbabel in 1 Chr. iii. 21. In the Peshito-Syriac he is made the son of Jesaiah.

2. (Ῥαφαΐα.) One of the chieftains of the tribe of Simeon in the reign of Hezekiah, who headed the expedition of five hundred men against the Amalekites of Mount Seir, and drove them out (1 Chr. iv. 42).

3. [Vat. Ραφαρα.] One of the sons of Tola, the son of Issachar, "heads of their father's house" (1 Chr. vii. 2).

4. [Sin. Ραφαιαν.] Son of Binea, and descendant of Saul and Jonathan (1 Chr. ix. 43). In 1 Chr. viii. 37 he is called RAPHA.

5. The son of Hur, and ruler of a portion of Jerusalem (Neh. iii. 9). He assisted in rebuilding the city wall under Nehemiah.

**REPH'AIM.** [GIANTS, vol. ii. p. 912.]

**REPH'AIM, THE VALLEY OF** (עֵמֶק רְפָאִים: ἡ κοιλὰς τῶν Τιτάνων [Vat. Τει-], and [1 Chr.] τῶν Γιγάντων; κ. Ῥαφαΐν [Vat. -ειμ, Alex. -ειν]; in Isaiah φάραγξ στερεά), 2 Sam. v. 18, 22, xxiii. 13; 1 Chr. xi. 15, xiv. 9; Is. xvii. 5. Also in Josh. xv. 8, and xviii. 16, where it is translated in the A. V. "the valley of the giants" (γῆ Ῥαφαΐν and Ἐμὲκ Ῥαφαΐν [Vat. -ειν, Alex. -ειμ]). A spot which was the scene of some of David's most remarkable adventures. He twice encountered the Philistines there, and inflicted a destruction on them and on their idols so signal that it gave the place a new name, and impressed itself on the popular mind of Israel with such distinctness that the Prophet Isaiah could employ it, centuries after, as a symbol of a tremendous impending judgment of God — nothing less than the desolation and destruction of the whole earth (Is. xxviii. 21, 22). [PERAZIM, MOUNT.]

It was probably during the former of these two contests that the incident of the water of Bethlehem (2 Sam. xxiii. 13, &c.) occurred. The "hold"[a] (ver. 14) in which David found himself, seems (though it is not clear) to have been the cave of Adullam, the scene of the commencement of his freebooting life; but, wherever situated, we need not doubt that it was the same fastness as that mentioned in 2 Sam. v. 17, since, in both cases, the same word (הַמְּצוּדָה, with the def. article), and that not a usual one, is employed. The story shows very clearly the predatory nature of these incursions of the Philistines. It was in "harvest time" (ver. 13). They had come to carry off the ripe crops, for which the valley was proverbial (Is. xvii. 5), just as at Pas-dammim (1 Chr. xi. 13) we find them in the parcel of ground full of barley, at Lehi in the field of lentiles (2 Sam. xxiii. 11), or at Keilah in the threshing-floors (1 Sam. xxiii. 1). Their animals[b] were scattered among the ripe corn receiving their load of plunder. The "garrison," or the officer[c] in charge of the expedition, was on the watch in the village of Bethlehem.

This narrative seems to imply that the valley of Rephaim was near Bethlehem; but unfortunately neither this nor the notice in Josh. xv. 8 and xviii. 16, in connection with the boundary line between Judah and Benjamin, gives any clew to its situation, still less does its connection with the groves of mulberry trees or Baca (2 Sam. v. 23), itself unknown. Josephus (*Ant.* vii. 12, § 4) mentions it as "the valley which extends (from Jerusalem) to the city of Bethlehem."

Since the latter part of the 16th cent.[d] the name has been attached to the upland plain which stretches south of Jerusalem, and is crossed by the

---

[a] There is no warrant for "*down* to the hold" in A. V. Had it been עַל, "down" might have been added with safety.

[b] This is the rendering in the ancient and trustworthy Syriac version of the rare word חֵילוּת (2 Sam. xxiii. 13), rendered in our version "troop."

[c] *Netsîb.* The meaning is uncertain (see vol. ii. 852, note).

[d] According to Tobler (*Topographie*, etc., ii. 494) Onomasticus is the first who records this identification

Digitized by Google

road to Bethlehem — the *el-Bik'ah* of the modern Arabs (Tobler, *Jerusalem*, etc., ii. 401). But this, though appropriate enough as regards its proximity to Bethlehem, does not answer at all to the meaning of the Hebrew word *Emek*, which appears always to designate an inclosed valley, never an open upland plain like that in question,[a] the level of which is as high, or nearly as high, as that of Mount Zion itself. [VALLEY.] Eusebius, (*Onomasticon*, Ῥαφαείν and Ἐμεκραφαείμ) calls it the valley of the Philistines (κοιλὰς ἀλλοφύλων), and places it "on the north of Jerusalem," in the tribe of Benjamin.

A position N. W. of the city is adopted by Fürst (*Handwb.* ii. 383 *b*), apparently on the ground of the terms of Josh. xv. 8 and xviii. 16, which certainly do leave it doubtful whether the valley is on the north of the boundary or the boundary on the north of the valley; and Tobler, in his last investigations (*3te Wanderung*, p. 202), conclusively adopts the *Wady dêr Jasin* (*W. Makhrior*, in Van de Velde's map), one of the side valleys of the great *Wady Beit Hanina*, as the valley of Rephaim. This position is open to the obvious objection of too great distance from both Bethlehem and the cave of Adullam (according to any position assignable to the latter) to meet the requirements of 2 Sam. xxiii. 13.

The valley appears to derive its name from the ancient nation of the Rephaim. It may be a trace of an early settlement of theirs, possibly after they were driven from their original seats east of the Jordan by Chedorlaomer (Gen. xiv. 5), and before they again migrated northward to the more secure wooded districts in which we find them at the date of the partition of the country among the tribes (Josh. xvii. 15; A. V. "giants"). In this case it is a parallel to the "mount of the Amalekites" in the centre of Palestine, and to the towns bearing the name of the Zemaraim, the Avim, the Ophnites, etc., which occur so frequently in Benjamin (vol. i. p. 277, note *b*). G.

**REPHIDIM** (רְפִידִים: Ῥαφιδείν: [*Raphidim*]). Ex. xvii. 1, 8; xix. 2. The name means "rests" or "stays;" the place lies in the march of the Israelites from Egypt to Sinai. The "wilderness of Sin" was succeeded by Rephidim according to these passages, but in Num. xxxiii. 12, 13, Dophkah and Alush are mentioned as occurring between the people's exit from that wilderness and their entry into the latter locality. There is nothing known of these two places which will enable us to fix the site of Rephidim. [ALUSH; DOPHKAH.] Lepsius' view is that Mount *Serbâl* is the true Horeb, and that Rephidim is *Wady Feiran*, the well known valley, richer in water and vegetation than any other in the peninsula (Lepsius' *Tour from Thebes to Sinai*, 1845, pp. 21, 37). This would account for the expectation of finding water here, which, however, from some unexplained cause failed. In Ex. xvii. 6, "the rock in Horeb" is named as the source of the water miraculously supplied. On the other hand, the language used Ex. xix. 1, 2, seems precise, as regards the point that the journey from Rephidim to *Sinai* was a distinct stage. The time from the wilderness of Sin reached on the fifteenth day of the second month of the Exodus (Ex. xvi. 1), to the wilderness of Sinai, reached on the first day of the third month (xix. 1), is from fourteen to sixteen days. This, if we follow Num. xxxiii. 12–15, has to be distributed between the four march-stations Sin, Dophkah, Alush, and Rephidim, and their corresponding stages of journey, which would allow two days' repose to every day's march, as there are four marches, and $4 \times 2 + 4 = 12$, leaving two days over from the fourteen. The first grand object being the arrival at Sinai, the intervening distance may probably have been despatched with all possible speed, considering the weakness of the host by reason of women, etc. The name Horeb is by Robinson taken to mean an extended range or region, some part of which was near to Rephidim, which he places at *Wady esh-Sheikh*,[b] running from N. E. to S. W., on the W. side of *Gebel Fureia*, opposite the northern face of the modern Horeb. [SINAI.] It joins the *Wady Feiran*. The exact spot of Robinson's Rephidim is a defile in the *esh-Sheikh* visited and described by Burckhardt (*Syria*, etc., p. 488) as at about five hours' distance from where it issues from the plain *Er-Raheh*, narrowing between abrupt cliffs of blackened granite to about 40 feet in width. Here is also the traditional "Seat of Moses" (Robinson, i. 121). The opinion of Stanley (*S. & P.* pp. 40–42), on the contrary, with Ritter (xiv. 740, 741), places Rephidim in *Wady Feiran*, where the traces of building and cultivation still attest the importance of this valley to all occupants of the desert. It narrows in one spot to 100 yards, showing high mountains and thick woods, with gardens and date-groves. Here stood a Christian church, city and episcopal residence, under the name of Paran, before the foundation of the convent of Mount St. Catherine by Justinian. It is the finest valley in the whole peninsula (Burckhardt, *Arab.* p. 602; see also Robinson, i. 117, 118). Its fertility and richness account, as Stanley thinks, for the Amalekites' struggle to retain possession against those whom they viewed as intrusive aggressors. This view seems to meet the largest amount of possible conditions for a site of Sinai. Lepsius, too (see above) dwells on the fact that it was of no use for Moses to occupy any other part of the wilderness, if he could not deprive the Amalekites of the only spot (*Feiran*) which was inhabited. Stanley (41) thinks the word describing the ground, rendered the "hill" in Ex. xvii. 9, 10, and said adequately to describe that on which the church of Paran stood, affords an argument in favor of the *Feiran* identity. H. H.

[a] On the other hand it is somewhat singular that the modern name for this upland plain, *Bika'ah*, should be the same with that of the great inclosed valley of Lebanon, which differs from it as widely as it can differ from the signification of *Emek*. There is no connection between *Bik'ah* and Baca; they are essentially distinct.

[b] Also this Lepsius remarks that Robinson would have certainly recognised the true position of Rephidim (*i. e.* at *Wady Feiran*), had he not passed by *Wady Feiran* with its brook, garden, and ruins — the most interesting spot in the peninsula — in order to see *Serbâl el-Chadem* (*ibid.* p. 22). And Stanley admits the objection of bringing the Israelites through the most striking scenery in the desert, that of *Feiran* without any event of importance to mark it.

• Upon the other hand, however, it may be urged with much force, that since *Wady Feiran* is full twelve hours' march from *Jebel Musa*, Rephidim could not have been in that valley if the identity of Sinai with this mountain is maintained

Digitized by Google

or Rephidim was distant from Sinai but one day's march (Ex. xix. 2; Num. xxxiii. 15), and the distance from *Wady Feiran* to *Jebel Musa* could not have been accomplished by so great a multitude on foot, in a single march. Moreover, the want of water spoken of in Ex. xxii. 1, 2, seems to preclude the *Wady Feiran* as the location of Rephidim; for the Wady has an almost perennial supply of water, whereas the deficiency referred to in the narrative seems to have been natural to the sterile and rocky region into which the people had now come, and it was necessary to supply them from a supernatural source.

The location of Rephidim must be determined by that of *Sinai*; and the author of the above article, in his article on SINAI, seems to answer his own arguments for placing Rephidim in the *Wady Feiran* with *Serbâl* as the Sinai, and to accept in the main Dr. Robinson's identification of Sinai and Horeb, which requires that Rephidim be transferred to *Wady es-Sheykh*. The weight of topographical evidence and of learned authority now favors this view. J. P. T.

* **REPROBATE** (מְמָאֵס: ἀδόκιμος), *incapable of enduring trial*, or *when tested, found unworthy* (with special reference, primarily, to the assay of metals, see Jer. vi. 30), hence, in general, *corrupt, worthless*.

The word is employed by St. Paul, apparently for the sake of the antithetic parallelism, 2 Cor. xiii. 6, 7, in the merely negative sense of "unproved," "unattested," with reference to himself as being left, supposably, without that proof of his apostleship which might be furnished by disciplinary chastisements, inflicted upon offenders through his instrumentality. The same word, which is ordinarily in the A. V. translated "reprobate," is rendered 1 Cor ix. 27, "*a castaway*," and Heb. vi. 8, "*rejected*." D. S. T.

**RE'SEN** (רֶסֶן: Ἀσσή; [Alex.] Ἀσσεμ: *Resen*) is mentioned only in Gen. x. 12, where it is said to have been one of the cities built by Asshur, after he went out of the land of Shinar, and to have lain "*between* Nineveh and Calah." Many writers have been inclined to identify it with the Rhesina or Rhesena of the Byzantine authors (Amm. Marc. xxiii. 5; Procop. *Bell. Pers.* ii. 19; Steph. Byz. *sub voce* Ῥέσινα), and of Ptolemy (*Geograph.* v. 18), which was near the true source of the western Khabour, and which is most probably the modern *Ras-el-ain*. (See Winer's *Realwörterbuch*, sub voce "Resen.") There are no grounds, however, for this identification, except the similarity of name (which similarity is perhaps fallacious, since the LXX. evidently read דסן for רסן), while it is a fatal objection to the theory that Resena or Resina was not in Assyria at all, but in Western Mesopotamia, 200 miles to the west of both the cities between which it is said to have lain. A far more probable conjecture was that of Bochart (*Geograph. Sacr.* iv. 23), who found Resen in the Larissa of Xenophon (*Anab.* iii. 4, § 7), which is most certainly the modern *Nimrud*. Resen, or Dasen — whichever may be the true form of the word — must assuredly have been in this neighborhood. As, however, the *Nimrud* ruins seem really to represent CALAH, while those opposite Mosul are the remains of Nineveh, we must look for Resen in the tract lying between these two sites. Assyrian remains of some considerable extent are found in this situation, near the modern village of *Selamiyeh*, and it is perhaps the most probable conjecture that these represent the Resen of Genesis. No doubt it may be said that a "great city," such as Resen is declared to have been (Gen. x. 12), could scarcely have intervened between two other large cities which are not twenty miles apart; and the ruins at *Selamiyeh*, it must be admitted, are not *very* extensive. But perhaps we ought to understand the phrase "a great city" relatively — *i. e.* great, as cities went in early times, or great, considering its proximity to two other larger towns.

If this explanation seem unsatisfactory, we might perhaps conjecture that originally Asshur (*Kileh Sherghat*) was called Calah, and *Nimrud* Resen; but that, when the seat of empire was removed northwards from the former place to the latter, the name Calah was transferred to the new capital. Instances of such transfers of name are not unfrequent.

The later Jews appear to have identified Resen with the *Kileh-Sherghat* ruins. At least the Targums of Jonathan and of Jerusalem explain Resen by Tel-Assar (תלסר or תלאסר), "the mound of Asshur." G. R.

* **RESH**, which means "head," is the name of one of the Hebrew letters (ר). It designates a division of Ps. cxix. and commences each verse of that division. It occurs in some of the other alphabetic compositions. [POETRY, HEBREW; WRITING.] H.

**RE'SHEPH** (רֶשֶׁף: Ἀραφ; Alex. Ρασεφ: *Reseph*). A son of Ephraim and brother of Rephah (1 Chr. vii. 25).

* **RESURRECTION.** The Scripture doctrines of the resurrection and of the future life are closely connected; or, rather, as we shall see in the sequel, are practically identical.

It will be proper, therefore, to begin with the notices and intimations of both, which are contained in the Old Testament.

I. RESURRECTION IN THE OLD TESTAMENT.

1. The passage which presents itself first for consideration is Ex. iii. 6, the address of God to Moses at the burning bush, saying, "I am the God of thy father, the God of Abraham, the God of Isaac, and the God of Jacob." This text takes precedence of all others, inasmuch as it is expressly appealed to by our Lord (Matt. xxii. 31, 32; Mark xii. 26; Luke xx. 37) in proof of a resurrection, and in confutation of the Sadducees, who denied it. Now, our Lord argues that since God is not a God of the dead but of the living, it is implied that Abraham, Isaac, and Jacob were still living. That they were still living is undoubtedly a truth of fact, and expresses, therefore, the truth of the relation of the Divine consciousness (so to speak) to Abraham, Isaac, and Jacob, as indicated in those words. Moreover, this argument from those words was in accordance with the received modes of Jewish thought. It silenced the Sadducees. It probably has a foundation and a force in the structure of the Hebrew language which we cannot easily or fully appreciate. To us it would seem inconclusive as a piece of mere reasoning, especially when we consider that the verb of existence ("am") is not *expressed* in the Hebrew. But it is not a piece

Digitized by Google

of mere reasoning. The recognition in the Divine mind of the then present relation to Abraham, Isaac, and Jacob, as living, is declared on Christ's authority; and the evidence of it contained in the Hebrew text was sufficient for the minds to which that evidence was addressed. A deeper insight into the meaning of this text, and into the character of Jehovah as the ever-living God and loving Father, would probably make clear to our own minds more of the inherent force of this argument of our Blessed Lord in proof of the resurrection of the dead.

2. The story of the translation of Enoch, Gen. v. 22, 24, manifestly implies the recognition of a future, supramundane life, as familiar to Moses and the patriarchs; for, otherwise, how should we find here, as the Apostle to the Hebrews argues, any illustration of the second great article of faith in God, namely, that "He is a rewarder of them that diligently seek Him"?

3. The rapture of Elijah, as related in 2 Kings ii., implies as certainly a recognition of the same truth.

4. The raising of the child by Elijah, 1 K. xvii. 21–24, implies the fact, and the then existing belief in the fact, of the continued existence of the soul after death, *i. e.* after its separation from the body. "O Lord, my God," says the prophet, "I pray Thee, let this child's soul (נֶפֶשׁ, *nephesh*) come into him again."

5. The same truth is implied in the account of the raising of the child by Elisha, 2 K. iv. 20, 32–36.

6. Also, in the case of the dead man resuscitated by the contact of Elisha's bones, 2 K. xiii. 21. — And these three last are illustrations also of the resurrection of the *body*.

7. The popular belief among the Hebrews in the existence and activity of the souls or spirits of the departed is manifest from the strong tendency which existed among them to resort to the practice of necromancy. See the familiar story of the witch of Endor, 1 Sam. xxviii. See also the solemn prohibition of this practice, Deut. xviii. 9–11; where we have expressly דֹרֵשׁ אֶל־הַמֵּתִים, *dorêsh el-hammêthîm*, a seeker of a miraculous response from *the dead*, — a *necromancer*. See also Lev. xix. 31 and xx. 6; where the Israelites are forbidden to have recourse to the אֹבוֹת, *ôbôth*, "such as have familiar spirits," according to the received translation, but according to Gesenius, "soothsayers who evoke the *manes* of the dead, by the power of incantations and magical songs, in order to give answers as to future and doubtful things." Such was the witch of Endor herself, 1 Sam. xxviii. 7. These necromancers are, under this name, very frequently referred to in the O. T.: see Isa. xix. 3 and xxix. 4; Deut. xviii. 11; 2 K. xxi. 6; 2 Chr. xxxiii. 6, &c. In Isa. viii. 19, this word is used in a very significant connection: "And when they shall say unto you, Seek unto *them that have familiar spirits*, the אֹבוֹת, and unto wizards that peep and that mutter; should not a people seek unto their God? *for the living to the dead* (אֶל־הַמֵּתִים)? To the law and to the testimony."

Now, it is of no consequence to our present purpose whether these necromancers really had intercourse with departed spirits or not, — whether the witch of Endor really called up the spirit of Samuel or not; they may all have been mere impostors, jugglers, mountebanks; — it is all the same to us: the practice of consulting them and confiding in them proves incontestably the popular belief in the existence of the spirits they were supposed to evoke.

8. The same belief is shown in the use of the word *Rephâim* (רְפָאִים), sometimes translated "giants," and sometimes "the dead," but more properly meaning *Manes*, or, perhaps, "the dead of long ago:" see Isa. xiv. 9; Ps. lxxxviii. 10; Prov. ii. 18, ix. 18, xxi. 16; and Isa. xxvi. 14, 19. [GIANTS, vol. ii. p. 912.]

9. This belief is shown also, and yet more distinctly, in the popular conceptions attached to *Sheôl*, (שְׁאוֹל, or שְׁאֹל, i. e. *Hades*, the abode of the departed. Our word *grave*, used in a broad and somewhat metaphorical sense, as equivalent to the abode of the dead *in general*, may often be a proper translation of *Sheôl;* but it is to be carefully observed that *Sheôl* is never used for an *individual* grave or sepulchre; — a particular man's grave is never called his *sheôl*. Abraham's burying-place at Mamre, or Jacob's at Shechem, was never confounded with *Sheôl*. However *Sheôl* may be *associated* — and that naturally enough — with the place in which the body is deposited and decays, the Hebrews evidently regarded it as a place where the dead continued in a state of conscious existence. No matter though they regarded the place as one of darkness and gloom; and no matter though they regarded its inhabitants as *shades;* — still they believed that there was such a place, and that the souls of the departed still existed there: see Isa. xiv. 9, 10: "Hell (*Sheôl*) from beneath is moved for thee at thy coming; it stirreth up the dead for thee, even all the chief ones of the earth; it hath raised up from their thrones all the kings of the nations. All they speak and say unto thee, Art thou also become weak as we? Art thou become like unto us?" This may be said to be the language of poetic imagery and personification; but it unquestionably expresses prevailing popular ideas. Jacob goes down to *Sheôl to his son* mourning, Gen. xxxvii. 35. Abraham *goes to his fathers in peace*, Gen. xv. 15. And so in general, the familiar phrase, "being gathered to his fathers," means more than dying as they had died, or being placed in the family tomb; it means, joined to their company and society in *Sheôl:* see Job iii. 11–19, and xiv. 13; Ps. xvi. 10, and xlix. 14, 15. For the further development of the idea, connected with the later conception of "the bosom of Abraham," see Luke xvi. 22. [HELL; ABRAHAM'S BOSOM.]

10. There are many indications, in the Old Testament, of the idea of a resurrection proper, of a reunion of soul and body, and a transition to a higher life than either that of earth or of *Sheôl*.

The vision of the valley of the dry bones in Ezek. xxxvii., though it may be intended merely to symbolize the restoration of the Jewish state, yet shows that the notion of a resurrection of the body, even after its decay and corruption, had distinctly occurred to men's minds in the time of the prophet, and was regarded neither as absurd, nor as beyond the limits of Almighty power. It is even employed for the purpose of *illustrating* another grand idea, another wonderful fact.

In Isa. xxvi. 19, the prophet says: "Thy dead men (Heb. *mêthim*) shall live, together with my

Digitized by Google

dead body shall they arise. Awake and sing, ye that dwell in the dust: for thy dew is as the dew of herbs, and the earth shall cast out the dead" (רְפָאִים). Ps. xvi. 8–11: "My flesh also shall rest in hope; for thou wilt not leave my soul (נַפְשִׁי) in hell (לִשְׁאוֹל); neither wilt thou suffer thy Holy One to see corruption." Ps. xvii. 15: "I shall be satisfied when I awake in thy likeness." Ps. xxiii. 4: "Though I walk through the valley of the shadow of death I will fear no evil." Ps. lxxiii. 24–26: "Thou shalt guide me by thy counsel, and afterward receive me to glory. Whom have I in heaven but thee? and there is none upon earth that I desire besides thee. My flesh and my heart faileth, but God is the strength of my heart, and my portion forever." Job xiv. 13–15: "Oh that thou wouldest hide me me in the grave (*Sheól*), that thou wouldest keep me secret until thy wrath be past, that thou wouldest appoint me a set time and remember me! If a man die shall he live again? All the days of my appointed time will I wait, till my change come. *Thou shalt call, and I will answer thee; thou shalt have a desire to the work of thy hands.*" Job xix. 23–27: "Oh that my words were now written! Oh that they were printed in a book! that they were graven with an iron pen and lead in the rock forever! For I know that my Redeemer (גֹּאֲלִי, *Goél*, — who, Gesenius says, is here God himself) liveth, and that he shall stand in the latter day upon the earth; and after my skin let them destroy this body, yet in my flesh shall I see God." It is true many attempts have been made, by varying translations and special interpretations, to assign to this passage some other reference than to the resurrection of the dead. But if this last is the natural sense of the words, — and of this every candid reader must judge for himself, — it is just as credible as any other, for it is only begging the question to allege that the idea of a resurrection had not occurred at that time. Dan. xii. 2, 3: "And many that sleep in the dust of the earth shall awake, some to everlasting life, and some to shame and everlasting contempt." Here it can hardly with any reason be doubted that a proper resurrection of the body is meant.

11. This idea and hope of a future resurrection was yet more distinctly developed during the period between the close of the Canon of the Old Testament and the Christian era. See 2 Macc. vii. 9, 14, 36; Wisdom, ii. 1, 23, and iii. 1–9.

12. If we compare the definition of faith in the eleventh chapter of the Epistle to the Hebrews, and the statement of the palpable truth that he who cometh to God "must believe that he is, and that he is *a rewarder of them that diligently seek him*," with the illustrations given in the rest of the chapter, drawn from the Old Testament, we shall see that it must be implied in the case of all of them, as well as of Enoch, that they looked for a future resurrection and everlasting life. See particularly vv. 10, 13–16, 19, 26, 35.

13. Remarkable are the predictions in Ez. xxxiv. 23, 24, xxxvii. 24, 25; Jer. xxx. 7; and Hos. iii. 5; — where, in connection with a restoration of the Jews, we are told of "my servant David who shall be their prince," "David their king, whom I will raise up," etc. Also, the prediction in Mal. iv. 5: "I will send you Elijah the prophet," etc., with which compare Luke i. 7, 8, 19. It seems that Herod, — with most other Jews, probably, — expected this last prediction to be fulfilled by a literal resurrection. The question is, Shall we find in such prophecies a resurrection, *metempsychosis*, or metaphor? Probably the last; see Matt. xi. 14, Mark viii. 13; Luke i. 17; John i. 21. Thus John the Baptist was Elias, and he was not Elias: that is to say, he was not Elias literally, but, as the angel said, he came "in the spirit and power of Elias;" and in him the prophecy was properly fulfilled, — he was the "Elias which was for to come."

14. There are in the Classical as well as in the Hebrew writers, indications of the recognition not only of the continued existence of the souls of the departed, but of the idea of a proper resurrection; — showing that the thought does not strike the unsophisticated human mind as manifestly absurd. See Hom. *Il.* xxi. 54, and xxiv. 756 (ἀναστήσονται). See also Æschylus, who uses the same word.

15. It must be admitted, however, that with all the distinct indications that the writers and saints of the Old Testament looked for a future life and a final resurrection, they very often indulge in expressions of gloomy despondency, or of doubt and uncertainty in regard to it; so that it is strictly true, for Jews as well as for Gentiles, that life and immortality *are brought to light through the Gospel*. For some of those gloomy utterances see Isa. xxxviii. 18, 19; Job xiv. 10–13; xvii. 14–16; x. 18–22; vii. 6–9; Ps. xxx. 9; xxxix. 12, 13; xlix. 19, 20; lxxxviii. 4–12; cii. 11, 12, 23–28; ciii. 15–17; civ. 29–31; cxliv. 3–5; cxlvi. 4–6; Eccles. iii. 18–22; ix. 4–6, 10. But, on the other hand, see Eccles. xii. 7, 13, 14: "Then shall the dust return to the earth as it was; and the spirit shall return unto God that gave it." "For God shall bring every work into judgment, with every secret thing, whether it be good, or whether it be evil." So then the soul, or spirit, neither perishes with the body, nor is absorbed into the Deity. It continues in conscious existence, a subject of reward or punishment.

II. Resurrection in the New Testament.

1. There are five cases of the raising of dead persons recorded in the New Testament.

(*a.*) The daughter of Jairus, Luke viii. 49–55;
(*b.*) The widow's son at Nain, Luke vii. 11–15;
(*c.*) Lazarus of Bethany, John xi. 1–44;
(*d.*) Dorcas, or Tabitha, Acts xi. 36–42;
(*e.*) Eutychus, Acts xx. 9–12.

2. Several other references are made, in a more or less general way, to the power and the fact of miraculously raising dead persons: Matt. x. 8 (text disputed); xi. 5; Luke vii. 22; John xii 1, 9, 17; Heb. xi. 19, 35.

It is to be noted that all these cases recorded or alluded to in the New Testament, like the cases of miraculous resurrections in the Old Testament, were resurrections to a natural, mortal life; yet they imply, no less, continued existence after death; they prefigure, or rather, they presuppose a final resurrection.

3. The doctrine of a final general resurrection was the prevailing doctrine of the Jews (the Pharisees) at the time of Christ and his Apostles. See Matt. xxii.; Mark xii.; Luke xx. 33–39; John xi. 23 24; Acts xxiii. 6–8; xxiv. 14, 15, 21; and xxvi. 4–8. If, then, Christ and his Apostles plainly and solemnly assert the same doctrine, we

Digitized by Google

are not at liberty to give their words a strained or metaphorical interpretation. We must suppose them to mean what they knew they would be understood to mean. This is especially clear in the case of St. Paul, who had himself been educated a Pharisee.

The Jews seem to have also believed in *returning spirits:* Acts xii. 13–15; Matt. xiv. 26; Mark vi. 49; Luke xxiv. 37–39; but neither Christ nor his Apostles seem anywhere to have admitted or sanctioned this opinion.

4. The resurrection of Christ is the grand pivot of the Christian doctrine of the resurrection of the dead. Special characters of Christ's resurrection are: (1.) His body rose, which had not seen corruption. (2.) His body rose to immortal life — "to die no more," Rom. vi. 9, 10. (3.) His body rose a spiritual body — the same, and yet not the same, which had been laid in the tomb, John xx. 19, 20; Luke xxiv. 13–32; Mark xvi. 12; 1 Cor. xv.; Phil. iii. 21; 1 Pet. iii. 21, 22. (4.) It is more consonant with the Scripture statements to hold that his body rose *a spiritual body*, than that, rising a natural, corruptible, mortal body, it was either gradually or suddenly *changed* before or at his ascension. (5.) He was the first thus raised to a spiritual, immortal life in the body, 1 Cor. xv. 20, 23; for it is to be observed that, while the rocks were rent and thus the graves were opened *at his crucifixion*, yet the bodies of the saints which slept did not arise and come out of their graves until *after his resurrection*. They, too, seem to have risen, not with natural bodies like Lazarus and others, but with spiritual bodies; for they are said to have "appeared unto many," but they do not seem to have lived again a natural life among men and to have died a second time. Neither were their "appearances" the apparitions of *returning spirits;* their *bodies* rose and came out of *their graves* — not out of "the grave," out of "*Hades*," or "*Sheôl*," but out of "their graves." And, like their risen Lord, they soon disappeared from the scenes of earth.

5. There are several uses and applications, in the New Testament, of the words ἀνάστασις and ἔγερσις, which seem to be substantially synonymous, differing only in the figurative form of the common thought, and which are alike translated "resurrection." The same is true of the verbs from which they are derived: (1.) They seem to import immortal life, in general, in a future world, Matt. xxii. 31, and the parallel passages in Mark and Luke; 1 Cor. xv. 18, 19. (2.) They signify distinctly the resurrection of *the body*, John v. 28, 29; xi. 23, 24; 1 Cor. xv. 35–54; and all the cases where Christ's resurrection is spoken of, as John xx. 26–29; Luke xxiv. 3–7; Matt. xxvii. 52; xxviii. 13, &c., &c.; also 1 Cor. xv. 1–23; and see Luke xvi. 31. (3.) They refer to a spiritual and moral resurrection, Eph. i. 20, comp. ii. 6; Phil. iii. 11 (?); Col. iii. 1; Rom. vi. 4–14; &c.

But here is to be noted, that, according to the use of the New Testament, as will be particularly seen in St. Paul's argument in 1 Cor. xv., the second signification is always implied in and with the first, as a condition or a consequence; and but the third is merely metaphorical.

6. The heathen or philosophic doctrine of immortality is to be carefully distinguished from the Christian doctrine of the resurrection. The abstract immortality of the human soul, its immortality independent of any reunion with the body, was indeed a favorite and lofty speculation of the ancient heathen philosophers. But they could never demonstrate its necessary truth by reasoning, nor establish its practical reality by positive evidence. It remained, and, for all human philosophy could ever do, must have continued, merely a beautiful vision, a noble aspiration, or, at best, a probable presentiment.

The popular view of the Greek mind was developed in the ideas of Hades, Elysium, and Tartarus; and to this view may correspond also the popular Hebrew conception of *Sheôl*; from which the veil of darkness — even for the minds of inspired poets and prophets — was not entirely removed, until the glorious light of the Gospel shined in upon it. The nearest approximation of heathen theories to the Christian doctrine of the resurrection, — a kind of instinctive groping towards it, — is found in the wide-spread philosophical and popular notion of *metempsychosis*. The immortality which the heathen imagined and to which they aspired, even in Elysium, was, for the most part, a sad and sorry immortality, — an immortality to which they would unhesitatingly have preferred this present life in the flesh, if it could have been made permanent and raised above accident and pain. But their notions of metempsychosis could have afforded them at this point but meagre consolation. Instead of Paradise it was only an indefinite Purgatory.

But how has the Gospel brought life and immortality to light? By establishing as an indubitable practical fact the resurrection of the body. Thus the natural repugnance to annihilation, the indefinite longings and aspirations of the human mind, its fond anticipations of a life to come, are fully confirmed and satisfied. Immortality is no longer a dream or a theory, but a practical, tangible fact, a fact both proved and illustrated, and therefore capable of being both confidently believed and distinctly realized.

In the view of the New Testament, the immortality of the soul and the resurrection of the body always involve or imply each other. If the soul is immortal, the body will be raised; if the body will be raised, the soul is immortal. The first is implied in our Lord's refutation of the Sadducees; the second is a matter of course. The Christian doctrine of immortality and resurrection is a convertible enthymeme.

And is not this plain, common-sense view of the Scriptures, after all, nearer the most philosophic truth, than the counter analytical abstractions? All we need care about, it is sometimes thought and said, is the immortality of the soul. Let that be established, and we have before us all the future life that we can desire. Why should we wish for the resurrection of this material incumbrance? But, though it is sufficiently evident that the human soul is somewhat distinct from the body — an immaterial, thinking substance; and though we can easily conceive that it is capable of consciousness and of internal activities, and of spiritual inter-communion, in a state of separation from the body; yet, inasmuch as all we have ever experienced, and all we thus positively know of its action and development, has been in connection with and by means of a bodily organization, — by what sort of philosophy are we to conclude that of course and of a certainty it will have no need of its bodily organization, either for its continued existence or even for its full action, progress, and enjoyment

Digitized by Google

in a future state? How do we know that the human soul is not, in its very nature, so constituted as to need a bodily organization for the complete play and exercise of its powers in every stage of its existence? So that it would, perhaps, be inconsistent with the wisdom of its Creator to preserve it in an imperfect and mutilated state, a mere wreck and relic of itself and its noble functions, to all eternity? And so that, if the soul is to be continued in immortal life, it certainly is to be ultimately reunited to the body? Indeed, it would be quite as philosophical to conclude that the soul could not exist at all, or, at least, could not act, could not even exercise its consciousness, without the body; as to conclude that, without the body, it could continue in the full exercise of its powers.

Both these conclusions are contradicted by the Scripture doctrine of a future life. On the one hand, the soul is not unconscious while separated from the body, but is capable of enjoying the blissful spiritual presence and communion of Christ; for to be absent from the body is to be present with the Lord, and to be thus absent, and present with Christ, is "far better" than to be here at home in the body; and, on the other hand, that the full fruition, the highest expansion, the freest activity, and the complete glorification of the soul, are not attained until the resurrection of the body is evident from the whole tenor of evangelical and apostolical instruction, and especially from the fact that the resurrection of the body — the redemption of the body — is constantly set forth as the highest and ultimate goal of Christian hope. As Christians, therefore, we should not prefer the abstract immortality of heathen philosophy, which, sad and shadowy as it was, could never be proved, to the resurrection-immortality of the Scriptures, which is revealed to us on Divine authority, and established by incontrovertible evidence. Nor should we seek to complete the heathen idea by engrafting upon it what we arbitrarily choose of the Scripture doctrine. If any portion of this doctrine is to be received, the whole is to be received; there is the same evidence for the whole that there is for a part; for, if any part is denied, the *authority* on which the remainder rests is annulled. At all events, our business here is to state, not so much what the true doctrine is, as what the Biblical doctrine is.

In saying, therefore, that if the body be not raised, there is no Scripture hope of a future life or the soul, we do not exalt the flesh above the spirit, or the resurrection of the body above the immortality of the soul. We only designate the condition on which alone the Scriptures assure us of spiritual immortality, the evidence by which alone it is proved. "As in Adam all die, even so in Christ shall all be made alive." *Christ* brought life and immortality to light, not by authoritatively asserting the dogma of the immortality of the soul, but *by his own resurrection from the dead.*

That the resurrection on which St. Paul so earnestly insists (1 Cor. xv.) is conceived of by him as involving the whole question of a future life must be evident beyond dispute. See particularly vv. 12–19, 29–32.

3. The New Testament doctrine of *immortality* is, then, its doctrine of the *resurrection.* And its doctrine of the resurrection we are now prepared to show involves the following points: —

(1) The resurrection of the body;
(2) The resurrection of *this same* body;
(3) The resurrection in *a different* body;
(4) That, a resurrection yet future; and
(5) A resurrection of all men at the last day.

(1.) The New Testament doctrine of the resurrection is the doctrine of the resurrection of *the body.* That in the fifteenth chapter of his epistle to the Corinthians, St. Paul teaches the Christian doctrine of immortality, we have shown above. His doctrine is supposed by some to be too *refined*, as they say, to be consistent with a proper resurrection of the body; and so they would contradistinguish St. Paul's view from other and grosser views, whether in the New Testament or elsewhere. But on the other hand the truth seems to be that St. Paul does not give us any special or peculiarly Pauline view of the Christian doctrine of the resurrection, but only a fuller exposition and defense of it than the New Testament elsewhere contains. The Pauline doctrine we accept as the Christian doctrine. And that the resurrection of which he speaks not only implies the immortality of the soul, but *is*, or necessarily and primarily implies, a resurrection of *the body*, is abundantly evident. That the resurrection of Christ, on which his whole argument is based, was a resurrection of the body, would seem beyond dispute. Otherwise, if Christ's resurrection is to signify only the immortality of his soul, what means his rising on the *third day?* Did his soul become immortal on the third day? Was his soul shut up in Joseph's sepulchre that it should come forth thence? Did his soul have the print of the nails in its hands and feet? Did his soul have flesh and bones, as he was seen to have? Besides, if there is to be any proper sense in the term resurrection, that which has fallen must be that which is raised. The resurrection, therefore, must be a resurrection of the body. "He shall change our vile body that it may be fashioned like unto his glorious body, according to the working whereby he is able even to subdue all things unto himself." The doctrine of the resurrection, as taught by St. Paul, exposed him to the mockery of the Epicureans and Stoics; it must therefore have been a resurrection of the *body*, for the immortality of the soul would have been no theme of *mockery* to any school of Greek philosophers. The immortality of the soul, though, for want of sufficient evidence, it might not be believed, was never rejected as *incredible;* but St. Paul's appeal is, "why should it seem a thing incredible with you that God should raise the dead?"

(2.) Moreover it is the resurrection of this *identical* body, of which the apostle speaks. The resurrection of Christ, which is the type and first fruits of ours, was manifestly the resurrection of his own body, of that very body which had been placed in Joseph's sepulchre. Otherwise, if it were merely the assumption of a body, of *some* body as a fit covering and organ of the soul, why is it said of his body that it saw no corruption? And what signifies his exhibiting to Thomas his hands and his side as means of his identification? When his disciples went to the sepulchre they found not the *body* of the Lord Jesus. What had become of it? That was the question. They felt that question properly and sufficiently answered when they found that he had risen from the dead.

"It is sown in corruption," says the Apostle, "it is raised in incorruption." What is raised

Digitized by Google

if it be not what is sown? and what is sown if it be not the body? "This corruptible," the Apostle plainly adds, "*this corruptible* must put on incorruption, and *this mortal* must put on immortality." So then, it is not the incorruptible soul that shall put on an incorruptible body, nor the immortal soul that shall put on an immortal body; but it is this corruptible and mortal body which is to put on — *i. e.*, to assume, what it has not yet and in its own nature, an incorruptible and immortal constitution and organization, and so be reunited to the incorruptible and immortal soul.

It was suggested by Locke, and is often repeated by others, that "the resurrection of the body," though confessed in the creed, is nowhere spoken of in the Scriptures, but only "the resurrection of the dead"; — a statement which furnishes a remarkable illustration of the fact that a proposition may be verbally true and yet practically false. And, indeed, it can hardly be said to be even *verbally* true; for, besides the resurrection of our Saviour's body, we read in the Scriptures that "many *bodies* of saints which slept arose and came out of their graves after his resurrection"; and, in general, that "our vile *body* shall be changed and fashioned like to his glorious body."

If the resurrection imports merely the assumption of *a* body, of *some* body, and not of *the* body, of this identical body, then why are the dead represented as coming forth, coming forth from their graves, coming forth from the body sown as the plant grows up out of the earth from the seed that has been deposited in it? What have they more to do with their graves, or with the mass of corruption which has been buried in the earth? The souls of the faithful departed are now with Christ; and to what end should they be made to come forth again from their graves at their resurrection upon his final appearing, — if they are then merely to assume *a* body, *some* body, which shall have nothing to do with the body which was laid in the tomb? "We shall all be changed," says the Apostle. He certainly does not mean that we shall be *changelings*. He does not say that our bodies shall be exchanged for others, but "we shall be changed," *i. e.*, our bodies shall undergo a change, a transformation whereby from natural they shall become spiritual bodies, so that this very corruptible itself shall put on incorruption.

Thus, though it is this very mortal body, this identical body, that shall be raised from the dead, it yet remains true that "flesh and blood," as such and unchanged, "cannot inherit the kingdom of God, neither doth corruption inherit incorruption." "It is sown a natural body, it is raised a spiritual body."

(3.) And this brings us to the third point, that the resurrection of this same body is at once a resurrection in a *different* body.

But some will say, what sort of body is a spiritual body? Is not the expression a contradiction in terms? The answer is, that a spiritual body is a body fitted by its constitution to be the eternal habitation of the pure and immortal spirit. *How* a body must be constituted in order to be fitted for such a purpose, we do not know and cannot tell. But that for anything we do know or can urge to the contrary, there *may* be such a body — proper material body — without any contradiction or absurdity, St. Paul labors to demonstrate by a multitude of illustrations showing the vast diversity that exists among the bodies with which we are actually acquainted (1 Cor. xv. 39–44). Among all this variety of bodies, therefore, which Almighty power is able to constitute, there certainly may be, and the Apostle asserts that there certainly is, a spiritual body.

Some, supposing that the term spiritual was intended to describe the internal or essential constitution, rather than to indicate the use and purpose, of this resurrection body, have surmised that it would consist of some most refined and spiritualized kind of matter: and have suggested that it might be of an aerial, ethereal, or gaseous nature. But all such speculations transcend the bounds of our knowledge, and of our necessity; and are apt to end in something gross and grovelling, or sublimated and meaningless. The term *spiritual*, as already said, is here used by the Apostle to indicate, not *how* the resurrection body is constituted, but that it is *so* constituted as to be a fit abode for the spirit in an eternal and spiritual world.

In the contrasted expression "natural body," the term *natural* (ψυχικός) means, in the original, animal or animated, psychical, *ensouled*, — if the word may be allowed; which surely does not imply that this body is composed of soul or of soul-like substance, but that it is fitted to be the abode and organ of the animal or animating part of man, of the sensitive soul. And thus we can understand the pertinence of the Apostle's allusion to Genesis, which otherwise must seem — as it probably does to ordinary readers — quite irrelevant and unmeaning. Having laid down the assertion, "there is a natural body, and there is a spiritual body," he adds: "And *so* it is written, The first man Adam was made a living soul, the last Adam was made a quickening spirit." Now the word which is translated *natural* is directly derived from that translated *soul*, and thus the connection and the argument become plain and obvious; as if the Apostle had said, "There is a soul-body, and there is a spirit-body; and so it is written, The first man Adam was made a living soul, the last Adam was made a quickening spirit."

For it is to be observed that the Scriptures often make a distinction between soul and spirit, as well as between soul and body. Man, according to this Scripture philosophy, is viewed, not as bipartite but as tripartite, not as consisting of soul and body, but of body, soul, and spirit. So viewed, the body is the material organization, the soul is the animal and sensitive part, the spirit is the rational and immortal, the divine and heavenly part. It is true we are now, for the most part, accustomed to use *soul* as synonymous with *spirit*, — and so the Scriptures more frequently do, but they recognize also the distinction just pointed out. In Scripture phrase, the spirit is the highest part of man, the organ of the Divinity within him, that part which alone apprehends divine things and is susceptible of divine influences. Hence the Apostle says, "The natural man receiveth not the things of the Spirit of God, for they are foolishness unto him, neither can he know them because they are spiritually discerned" — where the term *natural* is, in the original, again ψυχικός, *psychic*, i. e. *animal*, pertaining to the *soul*. There are but two other cases in which the word is used in the New Testament, and in both it is translated *sensual*: James iii. 15, "earthly *sensual*, devilish"; and Jude 19, "*sensual*, having not the Spirit." Thus, therefore, as the natural, or sensual, or animal, or psychical body, or the

Digitized by Google

soul-body, is a body, not constituted of soul-substance, but fitted for the use and habitation of the sensitive soul; so we conclude that the spiritual body is a body, not constituted or composed of spiritual substance — which would be a contradiction, — but a true and proper body, a material body, fitted for the use and eternal habitation of the immortal spirit.

The thought is sometimes suggested, in one form or another, that these bodies of ours are vile and worthless, and do not deserve to be raised; and, therefore, that the spiritual body will have nothing to do with them. But it must be remembered that Christianity does not teach us to despise, to abuse, or to hate the body, vile and corruptible as it is. That is a Manichean and heathen notion. It is true, our present body may be viewed both as an organ and as an incumbrance of the soul. So far as it is an organ it is to be restored; so far as it is an incumbrance it is to be changed. This mortal is to put on immortality. That which is sown in corruption is to be raised in incorruption. Christ at his appearing shall "change our vile body, that it may be fashioned like unto his glorious body." That the spiritual body is to be a modification of the natural body, being assumed or clothed upon it as a new and glorious form; that the one is to have a real, proper, and organic connection with the other, growing out of it as it were; so that each person will have, at the resurrection, not only *an* appropriate body, but his own body, seems sufficiently evident from the Apostle's whole argument (1 Cor. xv.), and particularly from his illustration of the various plants which grow up from the seed cast into the ground. Each plant has an organic connection with its seed, and God giveth "to every seed his own body." It is the seed itself which is transformed into the plant which rises from it.

(4.) The resurrection of *the body*, of *this same body*, of this same body transformed into a new and *spiritual body*, is an event yet *future*.

"As in Adam all die, even so in Christ *shall* all be made alive. But," adds the Apostle, "every man in his own order: Christ the first fruits, afterwards they that are Christ's *at his coming*." Many men had died before Christ, men with immortal souls, yet none had been raised from the dead to immortal life before Him; He is the first fruits, the first-born, the first-begotten from the dead. Nor is it said that any shall be raised after Him until his coming. Then the last trumpet shall sound, and the dead shall be raised incorruptible, and we who are alive and remain shall be changed. If the Christian doctrine of the resurrection were only this, that at the moment of death each soul receives a spiritual body fitted to its eternal state, why was not Christ raised till the third day? And why does the Apostle represent the resurrection of which he treats as both future and simultaneous for "them that are Christ's *at his coming*"? Nor can we suppose the Apostle here to teach a merely spiritual resurrection, a resurrection from sin to holiness; for if so, why does he say that it shall take place at the sound of the last trump? And what would become of the distinction made between the dead who are to be raised, and the living who are to be changed?

(5.) This future resurrection of the body is to be a resurrection of *all men* at the last day.

This has partly appeared already under the preceding heads. We have seen that this is true of *all that are Christ's;* but whether, in 1 Cor. xv., the Apostle teaches the final resurrection of all mankind may be a question. He does indeed say, "in Christ *all* shall be made alive," but whether this means absolutely all, or only all who are in Christ, may fairly be doubted. Perhaps the Apostle's meaning here might be thus paraphrased: "For as, by virtue of their connection with Adam, who, by sin, incurred the sentence of death, all men who are in him by nature, being sinners and actually sinning, die: even so, by virtue of their connection with Christ, who, by his righteousness, is the restorer of life, shall all men who are vitally united to Him by faith, be made alive, being raised from the dead in his glorious image." But whatever may be the meaning of those particular words, it is, no doubt, the doctrine of Scripture that *all*, absolutely *all* the dead will be raised. St. Paul himself elsewhere unequivocally declares his belief — and declares it, too, as the common belief not only of the Christians, but of the Jews (the Pharisees) of his time, — that "there shall be a resurrection of the dead, both of the just and unjust" (Acts xxiv. 15).

But it by no means follows that all will rise in the same glorious bodies, or be admitted to the same immortal blessedness. On the contrary, it was expressly predicted of old that "some shall awake to everlasting life, and some to shame and everlasting contempt;" — not to *annihilation* as an everlasting death opposed to the everlasting life, but to *shame* and *everlasting contempt*, which must imply continued conscious existence. And our Lord Himself, having made the declaration: "the hour is coming, and now is, when the dead shall hear the voice of the Son of God, and they that hear shall live;" — which may refer, and probably does chiefly refer, to a moral and spiritual resurrection; — expressly and solemnly adds: "Marvel not at this; for the hour is coming (he does not add, *and now is*), in the which all that are in the graves shall hear his voice, and shall come forth: they that have done good, unto the resurrection of life; and they that have done evil, unto the resurrection of damnation" (John v. 25, 28, 29).

The future bodies of the wicked *may, for aught we know*, be as ignominious, hideous, and loathsome, as perfectly fitted to be instruments and inlets of unending and most exquisite pain and torment, as the bodies of the saints shall be glorious and happy. The Scripture doctrine contains nothing positive on this point. St. Paul having briefly stated that "in Christ all shall be made alive," even if in this he meant to include the wicked, gives no further account of their resurrection; but goes on immediately to speak of those who are Christ's at his coming; and thenceforth confines his attention exclusively to them. This was natural for the Apostle, who nevertheless certainly believed in a resurrection of the unjust as well as of the just; as it is still for Christians, who believe the same. The special Christian doctrine of the resurrection is a doctrine of hope and joy; but as such it is a doctrine in which those who are not Christ's — who have not the Spirit of Christ, — have no share.

This resurrection is to be one general resurrection at the last day.

That such was the received doctrine in the time of our Lord is evident from John xi. 23, 24: "Jesus saith unto her, thy brother shall rise again. Martha saith unto him, I know that he shall rise again in the resurrection at the last day." Our Lord himself seems to recognize this doctrine in

Digitized by Google

his frequent use of the phrase, "I will raise him up at the last day," John vi. 39, 40, 44, 54. The same doctrine is distinctly taught by St. Paul (1 Thess. iv. 14–18). As to the date of the coming of the Lord, of which he speaks, and that it will have a reference to the wicked as well as to the just, see the first ten verses of the next chapter. See also the second epistle; particularly 2 Thess. i. 7–10. And for the date, see again 2 Thess. ii. 1–5. It is evident that the day of the coming of the Lord was, in St. Paul's view, in the uncertain future. In one sense it was always *at hand*, in another sense it was *not at hand*, 2 Thess. ii. 2. That he did not presume that he himself should be alive and remain unto the coming of the Lord, is plain from his solemn protestation (1 Cor. xv. 31) of his standing in such hourly jeopardy that he lived in the immediate prospect of death every day; while, in the very same connection and chapter (1 Cor. xv. 52) he associates himself with those who shall be alive at the sounding of the last trump, as he had also done at 1 Thess. iv. 15–17. But it is not to be forgotten that elsewhere he expressly associates himself with those who will have departed before the coming of the Lord; — 2 Cor. iv. 14: 'Knowing that He which raised up the Lord Jesus shall raise up us also by Jesus, and *shall present us with you*;" note also the whole context in this and in the following chapter. Now this second epistle to the Corinthians was written almost immediately after the first. Nor does he afterwards betray the slightest symptom of disappointment in the prospect of his approaching martyrdom (2 Tim. iv. 6–8). If the Apostle had felt that he had been grossly deluded and deceived in regard to "that day," and "his appearing," and been left, "by the word of the Lord," to lead others into the same delusion and error, would he have retained this triumphant confidence at the last, and expressed it without one word of explanation or retractation of his (alleged) former delusive hopes?

There is one passage in the Apocalypse which seems inconsistent with the doctrine of one general resurrection at the last day (Rev. xx.). Here we have a "first resurrection," either of all the saints or of the martyrs only; and, after a long interval, a general resurrection and judgment. How this representation is to be interpreted is a subject of doubt and dispute. It may be difficult to reconcile it with the other statements of Scripture on the same subject. But, at farthest, it would separate into only *two* great portions or acts, that which is elsewhere regarded in one point of view.

### III. The Christian doctrine of the Resurrection not impossible or incredible.

Before proceeding to defend this doctrine against objections, it may be proper to state distinctly what the doctrine is, and what it is not. It is, (1) that there will be a general resurrection at the last day *of the bodies* of all mankind.

(2.) That the body in which each man will be raised will be the *same* as that in which he had lived, but *changed, transformed* at the resurrection, so as, from a *natural* body, to become a *spiritual* body; it will be at once the *same* and *different*.

Such is the doctrine; but *how far* and in what respects the spiritual bodies will be the *same* as the natural bodies — besides that they will have an organic connection with them; *how far* they will be like them in size, in form, in organization, in limbs, in functions; whether, *e. g.*, they will have the hair, beard, nails, etc.; *how far* they may be subject to the physical laws of material things with which we are conversant; whether they will have the same senses as the natural bodies, or more or less; whether they will have fixed forms, or the power of assuming various forms; what will be their essential constitution, or *how* they may exercise their functions in relation either to the spiritual or the material world — except that they will be real bodies ("flesh and bones"), though not corruptible bodies ("flesh and blood"); the doctrine neither affirms nor denies. These are all matters of mere speculation. To the question, "How are the dead raised up? and with what bodies do they come?" the Scriptures vouchsafe no further answer than "spiritual bodies," "like Christ's glorious body." His body retained the print of the nails, and the rent in the side after his resurrection, but it appeared also in various forms; he ate and drank with his disciples after his resurrection, but so did the angels eat with Abraham; that body at length rose above the clouds, disappeared from the gaze of his disciples, and ascended to the right hand of God; it was seen afterwards by St. Stephen in heavenly glory, and by St. Paul in a manifestation of overwhelming splendor. But after all no decision is furnished in regard to those speculative questions; and the positive doctrine of Scripture is left within the limits already stated.

And now it remains to show that there is nothing impossible or incredible involved in this doctrine.

(1.) It is objected that a material organization cannot possibly be made incorruptible and immortal, and fitted to a spiritual state and spiritual purposes. But how does the objector know this?

(2.) It is said to be impossible that the identical body should be raised, because that body will have gone entirely out of existence, and in order for a resurrection or a restoration to take place, the thing so restored or raised must necessarily be in existence.

This must mean one of two things: either, that, as a definite body, in respect to its form and constitution, it has ceased to exist; or that, in respect to its very substance and the material which composed it, it has been annihilated.

The latter sense cannot be intended by an objector who recognizes the law of nature, that no particle of matter is ever lost. And according to the former sense, the objector would make the restoration, reconstruction, reorganization of any body, under any circumstances, and on any hypothesis, a sheer absurdity; for, in order that a body may be restored, reconstructed, reorganized, he expressly makes it necessary that it should already exist, actually constructed and organized. Is this self-evident? or, perhaps the position of the objector comes to this: if a house, *e. g.*, has fallen to ruin, and you restore it as it was before, it is not the same house; but if you restore it when it is not dilapidated, or reconstruct it without taking it to pieces — however great the changes you may make — it will be the same house. But does restoring mean merely repairing? And do reconstructing and reorganizing mean merely *changing* the existing structure and organization? If so, these words, as well as the word "resurrection," are commonly used in an abusive sense, or rather with no sense at all.

(3.) But it is thought that, even though the

Digitized by Google

body might be restored if it were simply resolved into *dust*, yet, inasmuch as it is resolved into *elementary principles*, into oxygen and other *gases*, which become mixed and confounded with the mass of gases of the same kind, or combined variously with gases of different kinds, it is impossible that the same portions of these gases should be segregated and brought together into the same body again.

This will require careful consideration. We take for granted that the "elementary principles" into which the body is said to be resolved are matter, true and proper matter. This they certainly are unless our metaphysical analysis is prosecuted beyond all our chemical tests. At all events, they are either matter or not matter. If they are not matter, then masses of matter have been annihilated. If they are true and proper matter, then, like all matter, they are, or consist of, material particles. And the definite, identical, material particles of a cubic inch of oxygen are no more annihilated or absolutely lost or confounded by being mixed with another cubic inch, or with ten thousand cubic feet, of oxygen gas, than are the definite identical particles of a cubic inch of *dust* by being mixed with any quantity of homogeneous dust. It is certainly assuming more than is *self-evident* to say that omniscience cannot identify them and trace them through their new combinations, and that omnipotence cannot segregate them and restore them to their former connections. It is not here contended that this could be done by any human power or merely natural process, but it is insisted that the thing involves no contradiction, and therefore is not absolutely impossible. The case just stated involves precisely the pinching point of the objection, if it pinches anywhere. For, as to saying that one simple substance loses its identity by entering into *composition* with another simple substance, that is plainly false even on natural principles. Let us try a few instances.

If a certain number of grains of pure copper be combined with their definite proportion of oxygen, and this oxyde of copper be dissolved in nitric acid, we shall have the nitrate of copper, which may exist in a perfectly liquid form. But by decomposing this nitrate of copper the pure copper may be reproduced — the very same copper and no other — the identical copper with which the process was begun. Now copper is as truly an "elementary principle" as oxygen gas.

But gases themselves may be recovered from their combinations as well as metals. Let a quantity of oxygen and hydrogen be combined in due proportion for forming water. Let the water be decomposed by means of a quantity of potassium, and the hydrogen will be liberated, the very same hydrogen as at first; and the potash being afterwards decomposed, the original, identical oxygen may also be recovered. If, in these processes, some portion of the original, simple substances should escape from us, it would only show the imperfection of our manipulations, but would not in the slightest degree affect the applicability and force of the argument for the present purposes. That is a mere business of *degrees*. No *principle* is involved in the recovery of the whole, which is not involved in the recovery of a part. If, then, with our limited, practical powers, we can recover a part, surely it cannot be said to transcend the powers of omnipotence to recover the whole.

So much for the cases of *inorganic* combinations. Now take cases which involve the *organic* influence of the principle of life.

Let a quantity of calcium and a quantity of phosphorus be respectively combined with a due proportion of oxygen; let the lime be combined with the phosphoric acid; and let this phosphate be mixed with a soil (or, certain ingredients of a soil) which did not before contain a particle of calcium or phosphorus. Let some grains of wheat be planted in that soil; and, by an analysis of the product, we may obtain, in its original simple form, a portion at least of the identical calcium and phosphorus with which we began, mingled, perhaps, in this case, with a small proportion of each of those substances derived from the seed.

One case more: A takes certain crystals of arsenic, and, having pulverized them and combined the metal with the proper proportion of oxygen, mingles the poison with B's food, who swallows it and dies. Some time after, by an analysis of the contents and *coatings* of B's stomach, the arsenic is recovered and recrystallized. It either is or is not the identical arsenic which A gave. If it can be proved to the satisfaction of a jury that it is not the same, then the evidence that A is guilty of the alleged act of poisoning B, is not at all increased by the detection of this arsenic in B's stomach, for it is not the arsenic which A is alleged to have administered, but some other.

If it be said that the arsenic as a mass is indeed the same, but that the individual crystals are not "identical" with those originally pulverized, the answer is, that thus the specific point now in question is yielded, namely, that the alleged impossibility of the resurrection of the "identical" body cannot arise in any degree from the fact that the simple elements, into which it has been resolved, enter into *new combinations*. The whole difficulty is carried back to the point to which we have already referred it, namely, the fact that these simple elements become mingled with other quantities of *homogeneous* elements. We admit, in the case supposed, a very high degree of improbability that the reproduced crystals of arsenic are, each of them, identical, as a matter of fact, with some one of the original crystals. But can any one prove that, as a matter of fact, they certainly are not identical; still more, can he prove that it is absolutely impossible and self contradictory that they should be? As to the supposition of mechanical marks or defects, they could not indeed be reproduced by crystallization; but the identity being in other respects restored, they could easily be reproduced, or very nearly approximated, by mechanical means.

We plant ourselves at one of those original crystals. It consists of certain individual and identical, though homogeneous, particles, arranged according to a certain law in certain definite relative positions. It is dissolved; and its particles are mingled with other homogeneous particles. Now the question is, can it be rationally conceived that those original particles should be segregated from their present mixture, and restored, each and all, to their original relative positions, and the whole to its original form? We freely admit that such a result cannot be *secured* by any skill of man; but we fearlessly assert that the accomplishment of such a result cannot be proved to transcend the power and wisdom of Almighty God, who can identify every particle of matter which he has created, and control its movements from begin-

Digitized by Google

sing to end according to the counsels of his own will. We not only assert that such a result can be conceived to be accomplished by the exercise of *miraculous power*, but we assert that its actual accomplishment would not violate any known positive laws of nature, but would be in perfect accordance with them all; and, indeed, is one of the possible contingencies under those laws. But the most scientific men will confess that there may be exceptions to the *recognized* laws of nature, or perhaps we should rather say, higher laws harmonizing both the rule and the exception; laws which may transcend the scope of their loftiest generalizations.

If, finally, it be insisted that, after all, the crystal so reproduced, *i. e.* with all its original particles in all their original relations, is not "identical" with the original crystal; then the word "identical" must be used in a sort of hyper-metaphysical sense in which it is not applicable to material, visible things at all. For, according to such a view, supposing an ultimate particle of water to consist of a particle of oxygen united to a particle of hydrogen (and the contrary cannot be proved), it would follow that, if this particle of water be decomposed into the two gaseous particles, the reunion of these same gaseous particles would not reproduce the "identical," original particle of water, but a different one. And *à fortiori* it would follow that an ounce of water being decomposed and the same elements reunited, or being converted into steam, and that steam condensed, or even being poured out of one vessel into another, or merely shaken in the same vessel, the water which would result and remain would not be "identical" with the original water, but somewhat different. Hence it would follow that, as all visible material things are in a constant flux, the idea of identity would be absolutely inapplicable to anything in the physical universe, except, perhaps, to the elementary and unchangeable constituent particles. Nay more, it would follow that all such words as reproduction, reorganization, restoration, and even reminiscence itself, not to speak of "resurrection," involve a logical absurdity; and not only so, but the very terms "identical with" are nonsensical; for, inasmuch as, in every proposition which conveys any meaning, the predicate must be conceived, in some respect, diverse from the subject, to assert that the one is "identical with" the other is a downright and palpable self-contradiction.

(4.) The general resurrection of the bodies of all mankind is sometimes said to be impossible, for want of material wherewith to reconstruct them. It has been gravely asserted that after a few generations more shall have passed away, there will not be matter enough in the whole globe of the earth to reconstruct all the bodies of the dead.

To this it is sufficient to say that, even if such a reconstruction as the objector presumes were necessary — which it is not — there is more than weight and mass enough of matter *in the atmosphere* which presses upon the surface of the British Islands, or of the States of New England, New York, and New Jersey (as will be found upon a rigid mathematical computation, allowing the pressure upon each square foot to be 2,000 lbs., and the average weight of the bodies to be 75 lbs. each), than would be necessary to reconstruct all the bodies of mankind which should have existed upon the earth more than 2,000,000 of years from this time; — and that, supposing three generations in a century all the way from Adam onwards, and a continuous population of 1,400,000,000 of inhabitants.

(5.) It is objected that the same particles may have constituted a part of several successive human bodies at the moment of their dissolution; and therefore it is impossible that each of these bodies should be raised identical with that which was dissolved. This brings the idea of the resurrection of the identical body nearer to an apparent *contradiction* than any other form of objection that we know of.

There are at least two ways of answering this objection. (*a.*) However likely the alleged fact may be, unless its absolute certainty can be demonstrated, there is room left for the possibility of the contrary. How can we know but that God so watches over the dust of every human body, and so guides it in all its transmigrations that it shall never be found to constitute a part of any other human body *when that body dies?* Thus the objection is answered by demanding proof of the alleged fact on which it is based. (*b.*) As our bodies are constantly undergoing change while we live without being thereby destroyed or losing their identity, so the "identical" body being raised, it may undergo an instantaneous change to an indefinite extent. It may, therefore, be instantly divested of any particles which may be required for the reconstruction of another body; and this last being reconstructed, any needed particles may be transferred to a third; and so on, to any extent. We have only to suppose, therefore, that the bodies of mankind shall be raised successively, in the order of their dissolution (at intervals however small, infinitely small if you please, so that there shall be a practical simultaneousness); and though a certain particle should have been common to every one, having passed through the whole series in six or eight thousand, or million, of years, yet it may be caused to circulate through the whole number again, as they may be successively raised, in less than the millionth part of the least assignable instant of time; for no limit can be set to the possible rapidity of motion. Thus the objection is answered, admitting the allegation on which it is based.

It may be said that these are violent suppositions. We may admit it; but at the same time we have four things to say with that admission. (*a.*) Neither of those suppositions is, like the creation of matter from nothing, absolutely inconceivable to our minds. (*b.*) If the objection alleged merely a high degree of apparent improbability instead of an absolute impossibility, we should not urge such suppositions in reply to it. (*c.*) Those suppositions are made in answer to the objection taken on its own principles, and entirely *irrespective of what may be the actual doctrine of Scripture* on this question. (*d.*) However violent the suppositions suggested may be, they will answer their present purpose of refutation, and it will be seen in the sequel that *we shall have no need of them.*

(6.) The objector has all along proceeded upon the assumption, that the resurrection of this identical body necessarily involves, (1) that the body raised must be identical with the body as it existed and was constituted *at the moment of death*; and (2) that, in order to be thus identical, it must consist of the *very same particles* inclusively and exclusively, arranged in the *very same positions*, com

Digitized by Google

binations, and relationships. We have above undertaken to refute the objections, even on the admission of both those assumptions; but now we deny them both. And we assert that in order to a resurrection of the body — of this identical body, in a true, proper, scriptural, and "human" sense, — it is neither necessary, in the first place, that the body raised should be identical with *the precise body which expired the last breath*; nor, in the second place, that it should be *identical with* any body whatever, in so strict a sense as that demanded.

The first point can be settled at once. Here is a man at the age of thirty years, in perfect health and soundness of body and mind. Before he dies, he may lose his arms or his legs; he may become blind and deaf, or a maniac; he may die in utter decrepitude. Now, if, at the last day, the body given him should be identical with his present body instead of being identical with that mutilated or decrepit frame with which he will have died, would there be no resurrection of the body, no resurrection of his own proper body? Would it be a "new creation" instead of a resurrection, simply *because* the raised body would not be identical with the body precisely as it existed and was constituted at the moment of death? Does a man's body never become *his own* until he dies — until he loses possession of it? What becomes, then, of all the horror so often expressed at the imagined reappearance of the lame, the blind, the halt, the withered, the crippled, the maniac, the savage? Why not insist also upon the resuscitation of the fevers and ague fits, the cancers and leprosies, the gouts and rheumatisms, and all the mortal diseases and ills the flesh was heir to at the moment of death? In short, why not maintain that, if the body is raised at all, it must be, when raised, *in the very act of dying again*? for the internal states are as essential to identity as the external features!

We turn now to the second point, namely, that, in order to a proper resurrection of the body, it is not necessary that the body raised should be identical with any former body whatever, in such a sense as that it must consist of precisely the same elementary particles, neither more or less, arranged in precisely the same positions, combinations, and relationships.

Now it is a well-known fact, that not only does a great change take place in our bodies between the periods of infancy and old age, but, while we live, they are constantly in a process of change, so that the body which we have at one moment is not perfectly "identical" with that which we had at any preceding moment; and some physiologists have estimated that every particle of our material frame is changed in the course of about seven years. From this fact it follows that no person ever wakes with that identical body with which he went to sleep, yet the waking man does not fail to recognise himself. But according to this strict notion of identity, as often as the body sleeps, it sleeps an eternal sleep, and the body with which a man wakes is always a "new creation," for the body which wakes is never "identical" with that which was lulled to slumber! Surely such absurdities will not be maintained. We will suppose, therefore, the body which rises to differ from the body which lived before *only to the same extent* as the body which wakes differs from the body which fell asleep; would there then be a resurrection of the body in any proper sense? If so then our proposition is established and the opposite assumption is overthrown. And, besides, a principle is thus gained which reaches much farther than is barely necessary to overthrow that assumption; for, if a slight difference is consistent with such a practical and substantial identity as is required for a proper resurrection of the body, will any one tell us precisely the limit of this difference; except that there must be some organic or real historical connection, something continuously in common, between the body which is raised and that which lived before? And so much we shall certainly maintain.

Let us here amuse ourselves a moment in constructing an hypothesis.

A distinguished physiologist, Johannes Müller, has given a well-known theory of the "vital principle." "Life is a principle," says he, "or imponderable matter, which is in action, in the substance of the germ, enters into the composition of the matter of this germ, and imparts to organic combinations properties which cease at death." Now the principle of animal life in man is presumed to be distinct from the intelligent and immortal spirit. On these premises, let us suppose that, in the economy of human nature it is so ordered that, when the spirit leaves the body, the vital principle is neither lost and annihilated on the one hand, nor on the other able to keep up the functions of the animal system, but lies *dormant* in connection with so much of the present, natural body as constituted the seminal principle or essential germ of that body, and is to serve as a germ for the future, spiritual body; and this portion may be truly body, material substance, and yet elude all possible chemical tests and sensible observation, all actual, physical dissolution, and all appropriation to any other human body. On the reunion of the spirit at the appointed hour with this dormant vital principle and its bodily germ, we may suppose an instantaneous development of the spiritual body in whatever glorious form shall seem good to infinite wisdom. Such a body, so produced, would involve a proper resurrection of the present body. The new body would be a continuation of the old, a proper development from it. The germinal essence is the same, the vital or animal principle is the same, the conscious spirit is the same. The organic connection between the two is as real as that between any man's present body and the seminal principle from which it was first developed in the womb; as that between the blade of wheat and the bare grain from which it grew.

We throw out the above not as a *doctrine*, not as a *theory* of the resurrection, but as a mere casual *hypothesis* — one among many possible hypotheses. The part assigned in it to the "vital principle" may be omitted, if any so prefer. And if the hypothesis as a whole is found not to be consistent with a proper resurrection *of the body*, it is by all means to be rejected.

(7.) It is thought quite improbable that the same bodies will rise with all their present parts, members, organs, and appurtenances, not to say their peculiar abnormal developments and defects.

We have already said, the Christian dogma of the resurrection contains nothing definite on these points. We have shown that such a resurrection, in all its details, is not absolutely impossible; but we have shown that such a resurrection is not necessary to the proper idea of the resurrection of the body. We have shown that the body raised would be the same as the present body, if it pos-

Digitized by Google

assed the same matter and form as the present body possesses *at any period whatever of its age*. We now add that the resurrection of the same body does not require that the body raised should have all the matter or the precise form of the present body as it actually existed here at any period of life. It would be a resurrection of the body, and of the same body, if all the bodies of the dead should be raised in the vigor and beauty of youth or early manhood; the infant being instantaneously developed to such a stature, the aged restored to it, and all deformities and defects forthwith removed. And as to organs and members; doubtless whatever characteristics of our present bodies will contribute to the glory and beauty and purposes of the future body of the Christian will be retained in it; and whatever characteristics would mar that glory or beauty or fruition, or interfere with those purposes, will be changed. It may be that the prints of the wounds in our Saviour's hands and feet, or something significantly corresponding to them, may remain forever in his glorified body, as visible mementoes of his dying love, as marks of honor and grace to excite all the redeemed and the holy to still higher strains of love and adoration and praise. Since we are to be comforted for our departed friends by the assurance that "them that sleep in Jesus God will bring with Him," it may well be believed that we shall recognize in the future life those whom we have loved in this; but to this end it is not necessary that the spiritual body should retain all or any of the lineaments of the present body. The beautiful plant that rises from the grain that has been sown and has died, differs widely in all its external form and aspect from the seed, yet by it we can as certainly distinguish its kind as by the seed itself. And this system of correspondences may reach much further than we have yet traced it. The spiritual body may have an intensity and transparency of expression for the character and individuality of the soul, such as the brightest mortal face we ever beheld, the clearest and most soul-expressive eye of mortal mould into whose depths we ever gazed, could not enable us to conceive. Then, there may be means of communicating thought and feeling in the future world, as far transcending all the power of the most perfect human speech as that transcends the inarticulate language of brutes. Thus there may be abundant means of recognition independent of any outward identity of form.

(8.) Finally, the resurrection of the body is thought improbable, because science, in her deepest researches, finds no symptoms or intimations of such an event.

It is alleged that, as far as has been ascertained by chemical or any other physical tests, the human body is subject to the same laws of development, growth, and decay, while it lives; and of dissolution, decomposition, and dispersion, when it dies, as those to which the bodies of the ox and the horse are subject. But what does this prove? Does it prove that therefore God will not reconstruct and reanimate the human body? Is it therefore to be thought a thing incredible that God should raise the dead? We can see no such force of proof in those facts. We are not aware that anybody has undertaken to bring positive evidence of a resurrection of the body from chemistry or natural philosophy; and we cannot conceive what disproof there is in the absence of proof derivable from those matters.

But (it is insisted) after the minutest chemical analysis, after the most patient and thorough testing by all known agents and re-agents, after the most careful examination, and after ages of experience, we have never found any more signs of a tendency to a resurrection in the body of a dead man than in that of a dead dog. And what then? Therefore there is and can be no resurrection of the human body? Most lame and impotent conclusion! As though we already knew everything pertaining to the powers, properties, and possibilities even of material things; as though we were not prying deeper and deeper into the secrets of nature every day; as though there were not evidently dynamics and laws at work in the material world which elude all our chemical tests and physical re-agents; and *as though we could see distinctly around and above the power of Almighty God*, which, with its higher, and perchance forever inscrutable laws, presides over and controls all the laws and functions of nature. All positive evidence for a resurrection of the body must be sought for in the teaching of Revelation; and that evidence, be it more or less, is not in the slightest degree affected by this chemico-physical argument; it is left just as it was and where it was, entire and intact.

### IV. History of the Doctrine.

It remains to give a brief outline of the history of the doctrine of the Resurrection, as it has been held in the Christian Church.

The Chiliarchs and Gnostics, from the first, held extreme views, the former tending to an unscriptural grossness of detail, and the latter to an equally unscriptural refining away of the substantial fact. Justin Martyr, Irenæus and Tertullian, inclining to the Chiliarchs, taught a double resurrection. These and Clemens Romanus, Athenagoras, Theophilus, and Minutius Felix, all believed in a proper resurrection of the body. Origen spiritualized it. (See Teller, *Fides dogm. de Resur. Carnis, per 4 priora Seculo.*) Gregory of Nazianzus, Gregory of Nyssa, and Basil the Great, adopted in part the views of Origen. Jerome went to an extreme against them. Augustine ultimately opposed them, but more moderately. Chrysostom believed in the identity of the body raised and the present body, but followed St. Paul's exposition. Epiphanius and Theophilus of Alexandria agreed with Jerome; but Theophilus ordained Synesius, who could not assent to "the prevailing notions." [Showing two things: (1) that certain views, namely, those of Jerome, were then the prevailing views, and (2) that to accept them was not considered (by Theophilus) essential.] Ruffinus confessed the resurrection *hujus* carnis, and John of Jerusalem distinguished between *flesh* and *body*, but with neither of them was Jerome satisfied. Jerome's became the prevailing doctrine of the Church of Rome, and has so continued substantially to the present day. The reformers generally adopted the same doctrine, adhering, however, more decidedly to the Augustinian and Pauline representations.

The Socinians, and, after them, the Unitarians, have been inclined to deny the proper resurrection of the body. The Swedenborgians also do the same, holding that each soul, immediately upon death, is clothed with its spiritual body. Many persons in all the Protestant communions have, in later years felt compelled by the presumed philosophical difficulties of the case, to give up the doctrine of

Digitized by Google

proper resurrection of the body, and have either remained silent, without any avowed or definite belief upon the subject, or have openly sided with the Socinians or the Swedenborgians.

The creeds and the symbols and confessions of the Reformed Churches, however, have remained unchanged. See, *e. g.* Article IV. of the Church of England, "On the Resurrection of Christ," which, speaking of Christ's ascension "with flesh, bones, and all things appertaining to the perfection of man's nature," covers nearly the whole ground of hesitation and difficulty. See also all the three creeds, especially the Athanasian. That of the Apostles still confesses the *Resurrectio carnis*.

* For the literature of this subject, one may consult the bibliographical appendix to W. R. Alger's *Critical History of the Doctrine of a Future Life*, Nos. 2929–3132, and on the Resurrection of Christ, Nos. 3133–3181. A.

**RE'U** (רְעוּ) [*friend*]: Ῥαγαῦ in Gen.; [Rom.] Ῥαγάν [but Vat. Alex. Ραγαυ] in Chr.: *Reu*, [*Ragau*]). Son of Peleg, in the line of Abraham's ancestors (Gen. xi. 18, 19, 20, 21; 1 Chr. i. 25). He lived two hundred and thirty-nine years according to the genealogy in Genesis. Bunsen (*Bibelwerk*) says *Reu* is *Roha*, the Arabic name for Edessa, an assertion which, borrowed from Knobel, is utterly destitute of foundation, as will be seen at once on comparing the Hebrew and Arabic words. A closer resemblance might be found between Reu and *Rhaga*, a large town of Media, especially if the Greek equivalents of the two names be taken.

* In 1 Chr. i. 25 the A. V. ed. 1611, following the Bishops' Bible and the Genevan Version, reads REHU, representing the *Ain* by H, as in some other cases. A.

**REU'BEN** (רְאוּבֵן) [see below]: Ῥουβήν and Ῥουβήν; Joseph. Ῥούβηλος: Pesh. Syr. *Rûbîl*, and so also in Arab. vers. of Joshua: *Rubes*), Jacob's first-born child (Gen. xxix. 32), the son of Leah, apparently not born till an unusual interval had elapsed after the marriage (31: Joseph. *Ant.* i. 19, § 8). This is perhaps denoted by the name itself, whether we adopt the obvious signification of its present form — *reu ben*, i. e. "behold ye, a son!" (Gesen. *Thes.* p. 1247 *b*) — or (2) the explanation given in the text, which seems to imply that the original form was רְאוֹת בְּנִי, *rᵉʾôt bᵉnyî*, "Jehovah hath *seen my affliction*," or (3) that of Josephus, who uniformly presents it as Roubel, and explains it (*Ant.* i. 19, § 8) as the "pity of God" — ἔλεον τοῦ Θεοῦ, as if from רְאוּת אֵל (Fürst, *Handwb.* ii. 344*a*).[a] The notices of the patriarch Reuben in the book of Genesis and the early Jewish traditional literature are unusually frequent, and on the whole give a favorable view of his disposition. To him, and his alone, the preservation of Joseph's life appears to have been due. His anguish at the disappearance of his brother, and the frustration of his kindly artifice for delivering him (Gen. xxxvii. 22), his recollection of the minute details of the painful scene many years afterwards (xlii. 22), his offer to take the sole responsibility of the safety of the brother who had succeeded to Joseph's place in the family (xlii. 37), all testify to a warm and (for those rough times) a kindly nature. Of the repulsive crime which mars his history, and which turned the blessing of his dying father into a curse — his adulterous connection with Bilhah, — we know from the Scriptures only the fact (Gen. xxxv. 22). In the post-biblical traditions it is treated either as not having actually occurred (as in the *Targum Pseudojonathan*), or else as the result of a sudden temptation acting on a hot and vigorous nature (as in the *Testaments of the Twelve Patriarchs*) — a parallel, in some of its circumstances, to the intrigue of David with Bathsheba. Some severe temptation there must surely have been to impel Reuben to an act which, regarded in its social rather than in its moral aspect, would be peculiarly abhorrent to a patriarchal society, and which is especially and repeatedly reprobated in the Law of Moses. The Rabbinical version of the occurrence (as given in *Targ. Pseudojon.*) is very characteristic, and well illustrates the difference between the spirit of early and of late Jewish history. "Reuben went and disordered the couch of Bilhah, his father's concubine, which was placed right opposite the couch of Leah, and it was counted unto him as if he had lain with her. And when Israel heard it it displeased him, and he said, 'Lo! an unworthy person shall proceed from me, as Ishmael did from Abraham and Esau from my father.' And the Holy Spirit answered him and said, 'All are righteous, and there is not one unworthy among them.'" Reuben's anxiety to save Joseph is represented as arising from a desire to conciliate Jacob, and his absence while Joseph was sold from his sitting alone on the mountains in penitent fasting.

These traits, slight as they are, are those of an ardent, impetuous, unbalanced, but not ungenerous nature; not crafty and cruel, as were Simeon and Levi, but rather, to use the metaphor of the dying patriarch, boiling[b] up like a vessel of water over the rapid wood-fire of the nomad tent, and as quickly subsiding into apathy when the fuel was withdrawn.

At the time of the migration into Egypt[c] Reuben's sons were four (Gen. xlvi. 9; 1 Chr. v. 3). From them sprang the chief families of the tribe (Num. xxvi. 5–11). One of these families — that of Pallu — became notorious as producing Eliab, whose sons or descendants, Dathan and Abiram, perished with their kinsman On in the divine retribution for their conspiracy against Moses (Num.

---

[a] Redslob (*Die Alttestamentl. Namen*, 86) maintains that Reubel is the original form of the name, which was corrupted into Reuben, as Bethel into *Britin*, and Israel into *Serin*. He treats it as signifying the "flock of Bel," a deity whose worship greatly flourished in the neighboring country of Moab, and who under the name of Nebo had a famous sanctuary in the very territory of Reuben. In this case it would be a parallel to the title, "people of Chemosh," which is bestowed on Moab. The alteration of the obnoxious syllable in Reubel would, on this theory, find a parallel in the Meribbaal and Eshbaal of Saul's family, who became Mephibosheth and Ishbosheth.

[b] Such appears to be a more accurate rendering of the word which in the A. V. is rendered "unstable" (Gesen. *Pent. Sam.* p. 88).

[c] According to the ancient tradition preserved by Demetrius (in Euseb. *Prep. Ev.* ix. 21), Reuben was 45 years old at the time of the migration.

xvi. 1, xxvi. 8–11). The census at Mount Sinai (Num. i. 20, 21, ii. 11) shows that at the Exodus the numbers of the tribe were 46,500 men above twenty years of age, and fit for active warlike service. In point of numerical strength, Reuben was then sixth on the list, Gad, with 45,650 men, being next below. On the borders of Canaan, after the plague which punished the idolatry of Baal-Peor, the numbers had fallen slightly, and were 43,730; Gad was 40,500; and the position of the two in the list is lower than before, Ephraim and Simeon being the only two smaller tribes (Num. xxvi. 7, &c.).

During the journey through the wilderness the position of Reuben was on the south side of the Tabernacle. The "camp" which went under his name was formed of his own tribe, that of Simeon [a] (Leah's second son), and Gad (son of Zilpah, Leah's slave). The standard of the camp was a deer [b] with the inscription, "Hear, oh Israel! the Lord thy God is one Lord!" and its place in the march was second (*Targum Pseudojon.* Num. ii. 10–16).

The Reubenites, like their relatives and neighbors on the journey, the Gadites, had maintained through the march to Canaan the ancient calling of their forefathers. The patriarchs were "feeding their flocks" at Shechem when Joseph was sold into Egypt. It was as men whose "trade had been about cattle from their youth" that they were presented to Pharaoh (Gen. xlvi. 32, 34), and in the land of Goshen they settled "with their flocks and herds and all that they had" (xlvi. 32, xlvii. 1). Their cattle accompanied them in their flight from Egypt (Ex. xii. 38), not a hoof was left behind; and there are frequent allusions to them on the journey (Ex. xxxiv. 3; Num. xi. 22; Deut. viii. 13, &c.). But it would appear that the tribes who were destined to settle in the confined territory between the Mediterranean and the Jordan had, during the journey through the wilderness, fortunately relinquished that taste for the possession of cattle which they could not have maintained after their settlement at a distance from the wide pastures of the wilderness. Thus the cattle had come into the hands of Reuben, Gad, and the half of Manasseh (Num. xxxii. 1), and it followed naturally that when the nation arrived on the open downs east of the Jordan, the three tribes just named should prefer a request to their leader to be allowed to remain in a place so perfectly suited to their requirements. The part selected by Reuben had at that date the special name of "the Mishor," with reference possibly to its evenness (Stanley, *S. & P.* App. § 6). Under its modern name of the *Belka* it is still esteemed beyond all others by the Arab sheep-masters. It is well watered, covered with smooth short turf, and losing itself gradually in those illimitable wastes which have always been and always will be the favorite resort of pastoral nomad tribes. The country east of Jordan does not appear to have been included in the original land promised to Abraham. That which the spies examined was comprised, on the east and west, between the "coast of Jordan" and "the sea." But for the pusillanimity of the greater number of the tribes it would have been entered from the south (Num. xiii. 30), and in that case the east of Jordan might never have been peopled by Israel at all.

Accordingly, when the Reubenites and their fellows approach Moses with their request, his main objection is that by what they propose they will discourage the hearts of the children of Israel from going over Jordan into the land which Jehovah had given them (Num. xxxii. 7). It is only on their undertaking to fulfill their part in the conquest of the western country, the land of Canaan proper, and thus satisfying him that their proposal was grounded in no selfish desire to escape a full share of the difficulties of the conquest, that Moses will consent to their proposal.

The "blessing" of Reuben by the departing Lawgiver [Deut. xxxiii. 6] is a passage which has severely exercised translators and commentators. Strictly translated as they stand in the received Hebrew text, the words are as follows: [c] —

"Let Reuben live and not die,
And let his men be a number" (*i. e.* few).

As to the first line there appears to be no doubt, but the second line has been interpreted in two exactly opposite ways. 1. By the LXX.: —

"And let his men [d] be many in number."

This has the disadvantage that מְתָיו is never employed elsewhere for a large number, but always for a small one (*e. g.* 1 Chr. xvi. 19; Job xvi. 22, Is. x. 19; Ez. xii. 16).

2. That of our own Auth. Version: —

"And let *not* his men be few."

Here the negative of the first line is presumed to convey its force to the second, though not there expressed. This is countenanced by the ancient Syriac Version (Peshito) and the translations of Junius and Tremellius, and Schott and Winzer. It also has the important support of Gesenius (*Thes.* p. 968 *a*, and *Pent. Sam.* p. 44).

3. A third and very ingenious interpretation is that adopted by the Veneto-Greek Version, and also by Michaelis (*Bibel für Ungelehrten*, Text), which assumes that the vowel-points of the word מְתָיו, "his men," are altered to מֵתָיו, "his dead" —

"And let his dead be few" —

as if in allusion to some recent mortality in the tribe, such as that in Simeon after the plague of Baal-Peor.

These interpretations, unless the last should prove to be the original reading, originate in the fact that the words in their naked sense convey a curse and not a blessing. Fortunately, though differing widely in detail, they agree in general

---

[a] Reuben and Simeon are named together by Jacob in Gen. xlviii. 5; and there is perhaps a trace of the connection in the interchange of the names in Jud. viii. 1 (Vulg.) and ix. 2.

[b] It is said that this was originally an ox, but changed by Moses, lest it should recall the sin of the golden calf.

[c] A few versions have been bold enough to render the Hebrew as it stands. Thus the Vulgate, Luther De Wette, and Bunsen.

[d] The Alex. LXX. adds the name of Simeon ("and let Symeon be many in number"): but this, though approved of by Michaelis (in the notes to the passage in his *Bibel für Ungelehrten*), on the ground that there is no reason for omitting Simeon, is not supported by any Codex or any other Version.

meaning.[a] The benediction of the great leader goes out over the tribe which was about to separate itself from its brethren, in a fervent aspiration for its welfare through all the risks of that remote and trying situation.

Both in this and the earlier blessing of Jacob, Reuben retains his place at the head of the family, and it must not be overlooked that the tribe, together with the two who associated themselves with it, actually received its inheritance before either Judah or Ephraim, to whom the birthright which Reuben had forfeited was transferred (1 Chr. v. 1).

From this time it seems as if a bar, not only the material one of distance, and of the intervening river and mountain-wall, but also of difference in feeling and habits, gradually grew up more substantially between the eastern and western tribes. The first act of the former after the completion of the conquest, and after they had taken part in the solemn ceremonial in the valley between Ebal and Gerizim, shows how wide a gap already existed between their ideas and those of the western tribes.

The pile of stones which they erected on the western bank of the Jordan to mark their boundary — to testify to after ages that though separated by the rushing river from their brethren and the country in which Jehovah had fixed the place where He would be worshipped, they had still a right to return to it for his worship — was erected in accordance with the unalterable habits of Bedouin tribes both before and since. It was an act identical with that in which Laban and Jacob engaged at parting, with that which is constantly performed by the Bedouins of the present day. But by the Israelites west of Jordan, who were fast relinquishing their nomad habits and feelings for those of more settled permanent life, this act was completely misunderstood, and was construed into an attempt to set up a rival altar to that of the Sacred Tent. The incompatibility of the idea to the mind of the Western Israelites is shown by the fact, that notwithstanding the disclaimer of the 2½ tribes, and notwithstanding that disclaimer having proved satisfactory even to Phinehas, the author of Joshua xxii. retains the name *mizbêach* for the pile, a word which involves the idea of sacrifice — i. e. of *slaughter* (see Gesenius, *Thes.* p. 402) — instead of applying to it the term *gal*, as is done in the case (Gen. xxxi. 46) of the precisely similar "heap of witness."[b] Another Reubenite erection, which for long kept up the memory of the presence of the tribe on the west of Jordan, was the stone of Bohan ben-Reuben which formed a landmark on the boundary between Judah and Benjamin. (Josh. xv. 6.) This was a single stone (*Eben*), not a pile, and it appears to have stood somewhere on the road from Bethany to Jericho, not far from the ruined khan so well known to travellers.

No judge, no prophet, no hero of the tribe of Reuben is handed down to us. In the dire extremity of their brethren in the north under Deborah and Barak, they contented themselves with debating the news amongst the streams[c] of the Mishor: the distant distress of his brethren could not move Reuben, he lingered among his sheepfolds and preferred the shepherd's pipe[d] and the bleating of the flocks, to the clamor of the trumpet and the turmoil of battle. His individuality fades more rapidly than Gad's. The eleven valiant Gadites who swam the Jordan at its highest to join the son of Jesse in his trouble (1 Chr. xii. 8–15), Barzillai, Elijah the Gileadite, the siege of Ramoth-Gilead with its picturesque incidents, all give a substantial reality to the tribe and country of Gad. But no person, no incident, is recorded, to place Reuben before us in any distinct form than as a member of the community (if community it can be called) of "the Reubenites, the Gadites, and the half-tribe of Manasseh" (1 Chr. xii. 37). The very towns of his inheritance — Heshbon, Aroer, Kirjathaim, Dibon, Baal-meon, Sibmah Jazer, — are familiar to us as Moabite, and not as Israelite towns. The city-life so characteristic of Moabite civilization had no hold on the Reubenites. They are most in their element when engaged in continual broils with the children of the desert, the Bedouin tribes of Hagar, Jetur, Nephish, Nodab; driving off their myriads of cattle, asses, camels; dwelling *in their tents*, as if to the manor born (1 Chr. v. 10), gradually spreading over the vast wilderness which extends from Jordan to the Euphrates (ver. 9), and every day receding further and further from any community of feeling or of interest with the western tribes.

Thus remote from the central seat of the national government and of the national religion, it is not to be wondered at that Reuben relinquished the faith of Jehovah. "They went a whoring after the gods of the people of the land whom God destroyed before them," and the last historical notice which we possess of them, while it records this fact, records also as its natural consequence that the Reubenites and Gadites, and the half-tribe of Manasseh, were carried off by Pul and Tiglath-Pileser, and placed in the districts on and about the river *Khabûr* in the upper part of Mesopotamia — "in Halah, and Habor, and Hara, and the river Gozan" (1 Chr. v. 26). G.

* **REU'BENITES** (רְאוּבֵנִי): commonly Ῥουβήν, but Josh. xxii. 1, *oi viol* Ῥουβήν, Alex οἱ Ρουβηνιται; 1 Chr. xxvi. 32, Ῥουβηνί [Vat -νει]: *Ruben, Rubenite*), and once sing., **REU'BENITE** (1 Chr. xi. 42; LXX. omit; Vulg. *Rubenites*). Descendants of **REUBEN** (Num. xxvi. 7; Deut. iii. 12, 16, iv. 43, xxix. 8; Josh. i. 12, xii. 6, xiii. 8, xxii. 1; 2 K. x. 33; 1 Chr. v. 6, 26, xi. 42, xii. 37, xxvi. 32, xxvii. 16). A.

**REU'EL** (רְעוּאֵל [*friend of God*]: Ῥαγουήλ: *Rahuel, Raguel*). The name of several persons mentioned in the Bible.

1. One of the sons of Esau, by his wife Bashe

---

[a] In the *Revised Translation of the Holy Scriptures* by the Rev. C. Wellbeloved and others (London, 1857) the passage is rendered —

"May Reuben live and not die,
Though his men be few."

An excellent evasion of the difficulty, provided it be dismissed as a translation.

[b] The "altar" is actually called Ed, or "witness" (Josh. xxii. 34) by the Bedouin Reubenites, just as the pile of Jacob and Laban was called Gal-ed, the heap of witness.

[c] The word used here, *palag*, seems to refer to artificial streams or ditches for irrigation. [RIVER.]

[d] This is Ewald's rendering (*Dichter des A. B.* i 120), adopted by Bunsen, of the passage rendered in the A. V. "bleating of the flocks"

Digitized by Google

sister of Ishmael. His sons were four — Nahath, Zerah, Shammah, and Mizzah, "dukes" of Edom (Gen. xxxvi. 4, 10, 13, 17; 1 Chr. i. 35, 37).

2. One of the names of Moses' father-in-law (Ex. ii. 18); the same which, through adherence to the LXX. form, is given in another passage of the A. V. RAGUEL. Moses' father-in-law was a Midianite, but the Midianites are in a well-known passage (Gen. xxxvii. 28) called also Ishmaelites, and if this may be taken strictly, it is not impossible that the name of Reuel may be a token of his connection with the Ishmaelite tribe of that name. There is, however, nothing to confirm this suggestion.

3. Father of Eliasaph, the leader of the tribe of Gad, at the time of the census at Sinai (Num. ii. 14). In the parallel passages the name is given DEUEL, which is retained in this instance also by the Vulgate (*Duel*).

4. A Benjamite whose name occurs in the genealogy of a certain Elah, one of the chiefs of the tribe at the date of the settlement of Jerusalem (1 Chr. ix. 8). G.

**REU'MAH** (רְאוּמָה [*raised, high*]: Ῥεύμα; Alex. Ρεημα: *Roma*). The concubine of Nahor, Abraham's brother (Gen. xxii. 24).

**REVELATION OF ST. JOHN** (Ἀποκάλυψις Ἰωάννου: *Apocalypsis Beati Joannis Apostoli*). The following subjects in connection with this book seem to have the chief claim for a place in this article: —

A. CANONICAL AUTHORITY AND AUTHORSHIP.
B. TIME AND PLACE OF WRITING.
C. LANGUAGE.
D. CONTENTS AND STRUCTURE.
E. HISTORY OF INTERPRETATION.

A. CANONICAL AUTHORITY AND AUTHORSHIP. — The question as to the canonical authority of the Revelation resolves itself into a question of authorship. If it can be proved that a book, claiming so distinctly as this does the authority of divine inspiration, was actually written by St. John, then no doubt will be entertained as to its title to a place in the Canon of Scripture.

Was, then, St. John the Apostle and Evangelist the writer of the Revelation? This question was first mooted by Dionysius of Alexandria (Eusebius, *H. E.* vii. 25). The doubt which he modestly suggested has been confidently proclaimed in modern times by Luther (*Vorrede auf die Offenbarung*, 1522 and 1534), and widely diffused through his influence. Lücke (*Einleitung*, p. 802), the most learned and diligent of modern critics of the Revelation, agrees with a majority of the eminent scholars of Germany in denying that St. John was the author.

But the general belief of the mass of Christians in all ages has been in favor of St. John's authorship. The evidence adduced in support of that belief consists of (1) the assertions of the author, and (2) historical tradition.

(1.) The author's description of himself in the 1st and 22d chapters is certainly equivalent to an assertion that he is the Apostle. (*a.*) He names himself simply John, without prefix or addition — name which at that period, and in Asia, must have been taken by every Christian as the designation in the first instance of the great Apostle who dwelt at Ephesus. Doubtless there were other Johns among the Christians at that time, but only arrogance or an intention to deceive could account for the assumption of this simple style by any other writer. He is also described as (*b*) a servant of Christ, (*c*) one who had borne testimony as an eye-witness of the word of God and of the testimony of Christ — terms which were surely designed to identify him with the writer of the verses John xix. 35, i. 14, and 1 John i. 2. He is (*d*) in Patmos for the word of God and the testimony of Jesus Christ: it may be easy to suppose that other Christians of the same name were banished thither, but the Apostle is the only John who is distinctly named in early history as an exile at Patmos. He is also (*e*) a fellow-sufferer with those whom he addresses, and (*f*) the authorized channel of the most direct and important communication that was ever made to the seven churches of Asia, of which churches John the Apostle was at that time the spiritual governor and teacher. Lastly (*g*) the writer was a fellow-servant of angels and a brother of prophets — titles which are far more suitable to one of the chief Apostles, and far more likely to have been assigned to him than to any other man of less distinction. All these marks are found united together in the Apostle John, and in him alone of all historical persons. We must go out of the region of fact into the region of conjecture to find such another person. A candid reader of the Revelation, if previously acquainted with St. John's other writings and life, must inevitably conclude that the writer intended to be identified with St. John. It is strange to see so able a critic as Lücke (*Einleitung*, p. 514) meeting this conclusion with the conjecture that some Asiatic disciple and namesake of the Apostle may have written the book in the course of some missionary labors or some time of sacred retirement in Patmos. Equally unavailing against this conclusion is the objection brought by Ewald, Credner, and others, from the fact that a promise of the future blessedness of the Apostles is implied in xviii. 20 and xxi. 14; as if it were inconsistent with the true modesty and humility of an Apostle to record — as Daniel of old did in much plainer terms (Dan. xii. 13) — a divine promise of salvation to himself personally. Rather those passages may be taken as instances of the writer quietly accepting as his just due such honorable mention as belongs to all the Apostolic company. Unless we are prepared to give up the veracity and divine origin of the whole book, and to treat the writer's account of himself as a mere fiction of a poet trying to cover his own insignificance with an honored name, we must accept that description as a plain statement of fact, equally credible with the rest of the book, and in harmony with the simple, honest, truthful character which is stamped on the face of the whole narrative.

Besides this direct assertion of St. John's authorship, there is also an implication of it running through the book. Generally, the instinct of single-minded, patient, faithful students has led them to discern a connection between the Revelation and St. John, and to recognize not merely the same Spirit as the source of this and other books of Holy Scripture, but also the same peculiarly-formed human instrument employed both in producing this book and the fourth Gospel, and in speaking the characteristic words and performing the characteristic actions recorded of St. John. This evi

Digitized by Google

dence is set forth at great length, and with much force and eloquence, by J. P. Lange, in his Essay on the Connection between the Individuality of the Apostle John and that of the Apocalypse, 1838 (*Vermischte Schriften*, ii. 173–231). After investigating the peculiar features of the Apostle's character and position, and (in reply to Lücke) the personal traits shown by the writer of the Revelation, he concludes that the book is a mysterious but genuine effusion of prophecy under the New Testament, imbued with the spirit of the Gospel, the product of a spiritual gift so peculiar, so great and noble that it can be ascribed to the Apostle John alone. The Revelation requires for its writer St. John, just as his peculiar genius requires for its utterance a revelation.

(2.) To come to the historical testimonies in favor of St. John's authorship: these are singularly distinct and numerous, and there is very little to weigh against them. (*a.*) Justin Martyr, cir. 150 A. D., says: "A man among us whose name was John, one of the Apostles of Christ, in a revelation which was made to him, prophesied that the believers in our Christ shall live a thousand years in Jerusalem" (*Tryph.* § 81, p. 179, ed. Ben.). (*b.*) The author of the Muratorian Fragment, cir. 170 A. D., speaks of St. John as the writer of the Apocalypse, and describes him as a predecessor of St. Paul, *i. e.* as Credner and Lücke candidly interpret it, his predecessor in the office of Apostle. (*c.*) Melito of Sardes, cir. 170 A. D., wrote a treatise on the Revelation of John. Eusebius (*H. E.* iv. 26) mentions this among the books of Melito which had come to his knowledge; and, as he carefully records objections against the Apostle's authorship, it may be fairly presumed, notwithstanding the doubts of Kleuker and Lücke (p. 514), that Eusebius found no doubt as to St. John's authorship in the book of this ancient Asiatic bishop. (*d.*) Theophilus, bishop of Antioch, cir. 180, in a controversy with Hermogenes, quotes passages out of the Revelation of John (Euseb. *H. E.* iv. 24). (*e.*) Irenæus, cir. 195, apparently never having heard a suggestion of any other author than the Apostle, often quotes the Revelation as the work of John. In iv. 20, § 11, he describes John the writer of the Revelation as the same who was leaning on Jesus' bosom at supper, and asked Him who should betray Him. The testimony of Irenæus as to the authorship of Revelation is perhaps more important than that of any other writer: it mounts up into the preceding generation, and is virtually that of a contemporary of the Apostle. For in v. 30, § 1, where he vindicates the true reading (666) of the number of the Beast, he cites in support of it not only the old correct copies of the book, but also the oral testimony of the very persons who themselves had seen St. John face to face. It is obvious that Irenæus's reference for information on such a point to those contemporaries of St. John implies his undoubting belief that they, in common with himself, viewed St. John as the writer of the book. Lücke (p. 574) suggests that this view was possibly groundless, because it was entertained before the learned fathers of Alexandria had set the example of historical criticism; but his suggestion scarcely weakens the force of the fact that such was the belief of Asia, and it appears a strange suggestion when we remember that the critical discernment of the Alexandrians, to whom he refers, led them to coincide with Irenæus in his view. (*f.*) Apollinaris (cir. 200) of Ephesus (?), in controversy with the Montanists of Phrygia, quoted passages out of the Revelation of John, and narrated a miracle wrought by John at Ephesus (Euseb. *H. E.* v. 18). (*g.*) Clement of Alexandria (cir. 200) quotes the book as the Revelation of John (*Stromata*, vi. 13, p. 667), and as the work of an Apostle (*Paed.* ii. 12, p. 207). (*h.*) Tertullian (A. D. 207), in at least one place, quotes by name "the Apostle John in the Apocalypse" (*Adv. Marcion.* iii. 14). (*i.*) Hippolytus (cir. 230) is said, in the inscription on his statue at Rome, to have composed an apology for the Apocalypse and Gospel of St. John the Apostle. He quotes it as the work of St. John (*De Antichristo*, § 36, col. 756, ed. Migne). (*j.*) Origen (cir. 233), in his Commentary on St. John, quoted by Eusebius (*H. E.* vi. 25), says of the Apostle, "he wrote also the Revelation." The testimonies of later writers, in the third and fourth centuries, in favor of St. John's authorship of the Revelation, are equally distinct and far more numerous. They may be seen quoted at length in Lücke, pp. 628–638, or in Dean Alford's *Prolegomena* (*N. T.*, vol. iv. pt. ii.). It may suffice here to say that they include the names of Victorinus, Methodius, Ephrem Syrus, Epiphanius, Basil, Hilary, Athanasius, Gregory [of Nyssa], Didymus, Ambrose, Augustine, and Jerome.

All the foregoing writers, testifying that the book came from an Apostle, believed that it was a part of Holy Scripture. But many whose extant works cannot be quoted for testimony to the authorship of the book refer to it as possessing canonical authority. Thus (*a.*) Papias, who is described by Irenæus as a hearer of St. John and friend of Polycarp, is cited, together with other writers, by Andreas of Cappadocia, in his Commentary on the Revelation, as a guarantee to later ages of the divine inspiration of the book (Routh, *Reliq. Sacr.* i. 15; Cramer's *Catena*, Oxford, 1840, p. 176). The value of this testimony has not been impaired by the controversy to which it has given rise, in which Lücke, Bleek, Hengstenberg, and Rettig have taken different parts. (*b.*) In the Epistle from the Churches of Lyons and Vienne, A. D. 177, inserted in Eusebius, *H. E.* v. 1–3, several passages (*e. g.* i 5, xiv. 4, xxii. 11) are quoted or referred to in the same way as passages of books whose canonical authority is unquestioned. (*c.*) Cyprian (*Epp.* 10, 12, 14, 19, ed. Fell) repeatedly quotes it as a part of canonical Scripture. Chrysostom makes no distinct allusion to it in any extant writing; but we are informed by Suidas that he received it as canonical. Although omitted (perhaps as not adapted for public reading in church) from the list of canonical books in the Council of Laodicea, it was admitted into the list of the Third Council of Carthage, A. D. 397.

Such is the evidence in favor of St. John's authorship and of the canonical authority of this book. The following facts must be weighed on the other side.

Marcion, who regarded all the Apostles except St. Paul as corrupters of the truth, rejected the Apocalypse and all other books of the N. T. which were not written by St. Paul. The Alogi, an obscure sect, circa 180 A. D., in their zeal against Montanism, denied the existence of spiritual gifts in the church, and rejected the Revelation, saying it was the work, not of John, but of Cerinthus (Epiphanius, *Adv. Haer.* li.). The Roman presbyter Caius (circa 196 A. D.), who also wrote against Montanism, is quoted by Eusebius (*H. E.* iii. 28)

Digitized by Google

as ascribing certain Revelations to Cerinthus: but it is doubted (see Routh, *Rel. Sacr.* ii. 138) whether the Revelation of St. John is the book to which Caius refers. But the testimony which is considered the most important of all in ancient times against the Revelation is contained in a fragment of Dionysius of Alexandria, circa 240 A. D., the most influential and perhaps the ablest bishop in that age. The passage, taken from a book *On the Promises*, written in reply to Nepos, a learned Judaizing Chiliast, is quoted by Eusebius (*H. E.* vii. 25). The principal points in it are these: Dionysius testifies that some writers before him altogether repudiated the Revelation as a forgery of Cerinthus; many brethren, however, prized it very highly, and Dionysius would not venture to reject it, but received it in faith as containing things too deep and too sublime for his understanding. [In his Epistle to Hermammon (Euseb. *H. E.* vii. 10) he quotes it as he would quote Holy Scripture.] He accepts as true what is stated in the book itself, that it was written by John, but he argues that the way in which that name is mentioned, and the general character of the language, are unlike what we should expect from John the Evangelist and Apostle; that there were many Johns in that age. He would not say that John Mark was the writer, since it is not known that he was in Asia. He supposes it must be the work of some John who lived in Asia; and he observes there are said to be two tombs in Ephesus, each of which bears the name of John. He then points out at length the superiority of the style of the Gospel and the First Epistle of John to the style of the Apocalypse, and says, in conclusion, that, whatever he may think of the language, he does not deny that the writer of the Apocalypse actually saw what he describes, and was endowed with the divine gifts of knowledge and prophecy. To this extent, and no farther, Dionysius is a witness against St. John's authorship. It is obvious that he felt keenly the difficulty arising from the use made of the contents of this book by certain unsound Christians under his jurisdiction; that he was acquainted with the doubt as to its canonical authority which some of his predecessors entertained as an inference from the nature of its contents; that he deliberately rejected their doubt and accepted the contents of the book as given by the inspiration of God; that, although he did not understand how St. John could write in the style in which the Revelation is written, he yet knew of no authority for attributing it, as he desired to attribute it, to some other of the numerous persons who bore the name of John. A weightier difficulty arises from the fact that the Revelation is one of the books which are absent from the ancient Peshito version; and the only trustworthy evidence in favor of its reception by the ancient Syrian Church is a single quotation which is adduced from the Syriac works (ii. 332 *c*) of Ephrem Syrus. Eusebius is remarkably sparing in his quotations from the 'Revelation of John," and the uncertainty of his opinion about it is best shown by his statement in *H. E.* iii. 39, that "it is likely that the Revelation was seen by the second John (the Ephesian presbyter), if any one is unwilling to believe that it was seen by the Apostle." Jerome states (*Ep. ad Dardanum*, etc.) that the Greek churches felt, with respect to the Revelation, a similar doubt to that of the Latins respecting the Epistle to the Hebrews. Neither he nor his equally influential contemporary Augustine shared such doubts. Cyril of Jerusalem, Chrysostom, Theodore of Mopsuestia, and Theodoret abstained from making use of the book, sharing, it is possible, the doubts to which Jerome refers. But they have not gone so far as to express a distinct opinion against it.[a] The silence of these writers is the latest evidence of any importance that has been adduced against the overwhelming weight of the testimony in favor of the canonical authority and authorship of this book.

B. TIME AND PLACE OF WRITING. — The date of the Revelation is given by the great majority of critics as A. D. 95–97. The weighty testimony of Irenæus is almost sufficient to prevent any other conclusion. He says (*Adv. Hær.* v. 30, § 3): "It (*i. e.* the Revelation) was seen no very long time ago, but almost in our own generation, at the close of Domitian's reign." Eusebius also records as a tradition which he does not question, that in the persecution under Domitian, John the Apostle and Evangelist, being yet alive, was banished to the island Patmos for his testimony of the divine word. Allusions in Clement of Alexandria and Origen point in the same direction. There is no mention in any writer of the first three centuries of any other time or place. Epiphanius (li. 12), obviously by mistake, says that John prophesied in the reign of Claudius. Two or three obscure and later authorities say that John was banished under Nero.

Unsupported by any historical evidence, some commentators have put forth the conjecture that the Revelation was written as early as the time of Nero. This is simply their inference from the style and contents of the book. But it is difficult to see why St. John's old age rendered it, as they allege, impossible for him to write his inspired message with force and vigor, or why his residence in Ephesus must have removed the Hebraistic peculiarities of his Greek. It is difficult to see in the passages i. 7, ii. 9, iii. 9, vi. 12, 16, xi. 1, anything which would lead necessarily to the conclusion, that Jerusalem was in a prosperous condition, and that the predictions of its fall had not been fulfilled when those verses were written. A more weighty argument in favor of an early date might be urged from a modern interpretation of xvii. 10, if that interpretation could be established. Galba is alleged to be the sixth king, the one that "is." In Nero these interpreters see the Beast that was wounded (xiii. 3), the Beast that was and is not, the eighth king (xvii. 11). For some time after Nero's death the Roman populace believed that he was not dead, but had fled into the East, whence he would return and regain his throne: and these interpreters venture to suggest that the writer of the Revelation shared and meant to express the absurd popular delusion. Even the able and learned Reuss (*Théol. Chrét.* i. 443), by way of supporting this interpretation, advances his untenable claim to the first discovery of the name of Nero Cæsar in the number of the beast, 666. The inconsistency of this interpretation with prophetic analogy, with the context of Revelation, and with the fact that the book is of divine origin, is pointed out by Hengstenberg at the end of his Commentary on ch. xiii., and by Elliott, *Horæ Apoc.* iv. 547.

[a] "This cannot properly be said of Cyril of Jerusalem (A. D. 350), who clearly repudiates it as not canonical (*Catech.* iv. 33, al. 22). See Westcott, *Canon of the N. T.* pp. 396, 491 f. A.

Digitized by Google

It has been inferred from i. 2, 9. 10, that the Revelation was written in Ephesus, immediately after the Apostle's return from Patmos. But the text is scarcely sufficient to support this conclusion. The style in which the messages to the Seven Churches are delivered rather suggests the notion that the book was written in Patmos.

C. LANGUAGE. — The doubt first suggested by Harenberg, whether the Revelation was written in Aramaic, has met with little or no reception. The silence of all ancient writers as to any Aramaic original is alone a sufficient answer to the suggestion. Lücke (*Einleit.* 441) has also collected internal evidence to show that the original is the Greek of a Jewish Christian.

Lücke has also (pp. 448–464) examined in minute detail, after the preceding labors of Donker-Curtius, Vogel, Winer, Ewald, Kolthoff, and Hitzig, the peculiarities of language which obviously distinguish the Revelation from every other book of the New Testament. And in subsequent sections (pp. 680-747) he urges with great force, the difference between the Revelation on one side and the fourth Gospel and First Epistle on the other, in respect of their style and composition and the mental character and attainments of the writer of each. Hengstenberg, in a dissertation appended to his Commentary, maintains that they are by one writer. That the anomalies and peculiarities of the Revelation have been greatly exaggerated by some critics, is sufficiently shown by Hitzig's plausible and ingenious, though unsuccessful, attempt to prove the identity of style and diction in the Revelation and the Gospel of St. Mark. It may be admitted that the Revelation has many surprising grammatical peculiarities. But much of this is accounted for by the fact that it was probably written down, as it was seen, "in the Spirit," whilst the ideas, in all their novelty and vastness, filled the Apostle's mind, and rendered him less capable of attending to forms of speech. His Gospel and Epistles, on the other hand, were composed equally under divine influence, but an influence of a gentler, more ordinary kind, with much care, after long deliberation, after frequent recollection and recital of the facts, and deep pondering of the doctrinal truths which they involve.

D. CONTENTS. — The first three verses contain the title of the book, the description of the writer, and the blessing pronounced on the readers, which possibly, like the last two verses of the fourth Gospel, may be an addition by the hand of inspired survivors of the writer. John begins (i. 4) with a salutation of the Seven Churches of Asia. This, coming before the announcement that he was in the Spirit, looks like a dedication not merely of the first vision, but of all the book, to those churches. In the next five verses (i. 5–9) he touches the key-note of the whole following book, the great fundamental ideas on which all our notions of the government of the world and the Church are built; the Person of Christ, the redemption wrought by Him, his second coming to judge mankind, the painful hopeful discipline of Christians in the midst of this present world: thoughts which may well be supposed to have been uppermost in the mind of the persecuted and exiled Apostle even before the Divine Inspiration came on him.

*a.* The first vision (i. 7–iii. 22) shows the Son of Man with his injunction, or Epistles to the Seven Churches. While the Apostle is pondering those great truths and the critical condition of his Church which he had left, a Divine Person resembling those seen by Ezekiel and Daniel, and identified by name and by description as Jesus, appears to John, and with the discriminating authority of a Lord and Judge reviews the state of those churches, pronounces his decision upon their several characters, and takes occasion from them to speak to all Christians who may deserve similar encouragement or similar condemnation. Each of these sentences, spoken by the Son of Man, is described as said by the Spirit. Hitherto the Apostle has been speaking primarily, though not exclusively, to some of his own contemporaries concerning the present events and circumstances. Henceforth he ceases to address them particularly. His words are for the ear of the universal Church in all ages, and show the significance of things which are present in hope or fear, in sorrow or in joy, to Christians everywhere.

*b.* (iv. 1–viii. 1). In the next vision, Patmos and the Divine Person whom he saw are gone. Only the trumpet voice is heard again calling him to a change of place. He is in the highest court of heaven, and sees God sitting on his throne. The seven-sealed book or roll is produced, and the slain Lamb, the Redeemer, receives it amid the sound of universal adoration. As the seals are opened in order, the Apostle sees (1) a conqueror on a white horse, (2) a red horse betokening war, (3) the black horse of famine, (4) the pale horse of death, (5) the eager souls of martyrs under the altar, (6) an earthquake with universal commotion and terror. After this there is a pause, the course of avenging angels is checked while 144,000, the children of Israel, servants of God, are sealed, and an innumerable multitude of the redeemed of all nations are seen worshipping God. Next (7) the seventh seal is opened, and half an hour's silence in heaven ensues.

*c.* Then (viii. 2–xi. 19) seven angels appear with trumpets, the prayers of saints are offered up, the earth is struck with fire from the altar, and the seven trumpets are sounded. (1) The earth and (2) the sea and (3) the springs of water and (4) the heavenly bodies are successively smitten, (5) a plague of locusts afflicts the men who are not sealed (the first woe), (6) the third part of men are slain (the second woe), but the rest are impenitent. Then there is a pause: a mighty angel with a book appears and cries out, seven thunders sound, but their words are not recorded, the approaching completion of the mystery of God is announced, the angel bids the Apostle eat the book, and measure the Temple with its worshippers and the outer court given up to the Gentiles; the two witnesses of God, their martyrdom, resurrection, ascension, are foretold. The approach of the third woe is announced and (7) the seventh trumpet is sounded, the reign of Christ is proclaimed, God has taken his great power, the time has come for judgment and for the destruction of the destroyers of the earth.

The three preceding visions are distinct from one another. Each of the last two, like the longer one which follows, has the appearance of a distinct prophecy, reaching from the prophet's time to the end of the world. The second half of the Revelation (xii.–xxii.) comprises a series of visions which are connected by various links. It may be described generally as a prophecy of the assaults of the devil and his agents (= the dragon, the ten-horned beast, the two-horned beast or false prophet

Digitized by Google

and the harlot) upon the Church, and their final destruction. It appears to begin with a reference to events anterior, not only to those which are predicted in the preceding chapter, but also to the time in which it was written. It seems hard to interpret the birth of the child as a prediction, and not as a retrospective allusion.

*d.* A woman (xii.) clothed with the sun is seen in heaven, and a great red dragon with seven crowned heads stands waiting to devour her offspring; her child is caught up unto God, and the mother flees into the wilderness for 1260 days. The persecution of the woman and her seed on earth by the dragon, is described as the consequence of a war in heaven in which the dragon was overcome and cast out upon the earth.

St. John (xiii.) standing on the sea-shore sees a beast with seven heads, one wounded, with ten crowned horns, rising from the water, the representative of the dragon. All the world wonder at and worship him, and he attacks the saints and prevails. He is followed by another two-horned beast rising out of the earth, who compels men to wear the mark of the beast, whose number is 666.

St. John (xiv.) sees the Lamb with 144,000 standing on Mount Zion learning the song of praise of the heavenly host. Three angels fly forth calling men to worship God, proclaiming the fall of Babylon, denouncing the worshippers of the beast. A blessing is pronounced on the faithful dead, and the judgment of the world is described under the image of a harvest reaped by angels.

St. John (xv., xvi.) sees in heaven the saints who had overcome the beast, singing the song of Moses and the Lamb. Then seven angels come out of the heavenly temple having seven vials of wrath which they pour out upon the earth, sea, rivers, sun, the seat of the beast, Euphrates, and the air, after which there is a great earthquake and a hail-storm.

One (xvii., xviii.) of the last seven angels carries St. John into the wilderness and shows him a harlot, Babylon, sitting on a scarlet beast with seven heads and ten horns. She is explained to be that great city, sitting upon seven mountains, reigning over the kings of the earth. Afterwards St. John sees a vision of the destruction of Babylon, portrayed as the burning of a great city amid the lamentations of worldly men and the rejoicing of saints.

Afterwards (xix.) the worshippers in heaven are heard celebrating Babylon's fall and the approaching marriage-supper of the Lamb. The Word of God is seen going forth to war at the head of the heavenly armies: the beast and his false prophet are taken and cast into the burning lake, and their worshippers are slain.

An angel (xx.–xxii. 5) binds the dragon, i. e. the devil, for 1000 years, whilst the martyred saints who had not worshipped the beast reign with Christ. Then the devil is unloosed, gathers a host against the camp of the saints, but is overcome by fire from heaven, and is cast into the burning lake with the beast and false prophet. St. John then witnesses the process of the final judgment, and sees and describes the new heaven and the new earth, and the new Jerusalem, with its people and their way of life.

In the last sixteen verses (xxii. 6-21) the angel solemnly asseverates the truthfulness and importance of the foregoing sayings, pronounces a blessing on those who keep them exactly, gives warning of his speedy coming to judgment, and of the nearness of the time when these prophecies shall be fulfilled.

E. INTERPRETATION. — A short account of the different directions in which attempts have been made to interpret the Revelation, is all that can be given in this place. The special blessing promised to the reader of this book (i. 3), the assistance to common Christian experience afforded by its precepts and by some of its visions, the striking imagery of others, the tempting field which it supplies for intellectual exercise, will always attract students to this book and secure for it the labors of many commentators. Ebrard reckons that not less than eighty systematic commentaries are worthy of note, and states that the less valuable writings on this inexhaustible subject are unnumbered, if not innumerable. Fanaticism, theological hatred, and vain curiosity, may have largely influenced their composition; but any one who will compare the necessarily inadequate, and sometimes erroneous, exposition of early times with a good modern commentary will see that the pious ingenuity of so many centuries has not been exerted quite in vain.

The interval between the Apostolic age and that of Constantine has been called the Chiliastic period of Apocalyptic interpretation. The visions of St. John were chiefly regarded as representations of general Christian truths, scarcely yet embodied in actual facts, for the most part to be exemplified or fulfilled in the reign of Antichrist, the coming of Christ, the millennium, and the day of judgment. The fresh hopes of the early Christians, and the severe persecution they endured, taught them to live in those future events with intense satisfaction and comfort. They did not entertain the thought of building up a definite consecutive chronological scheme even of those symbols which some moderns regard as then already fulfilled; although from the beginning a connection between Rome and Antichrist was universally allowed, and parts of the Revelation were regarded as the filling-up of the great outline sketched by Daniel and St. Paul.

The only extant systematic interpretations in this period are the interpolated Commentary on the Revelation by the martyr Victorinus, circ. 270 A. D. (*Bibliotheca Patrum Maxima*, iii. 414, and Migne's *Patrologia Latina*, v. 318; the two editions should be compared), and the disputed Treatise on Antichrist by Hippolytus (Migne's *Patrologia Græca*, x. 726). But the prevalent views of that age are to be gathered also from a passage in Justin Martyr (*Trypho*, 80, 81), from the later books, especially the fifth, of Irenæus, and from various scattered passages in Tertullian, Origen, and Methodius. The general anticipation of the last days of the world in Lactantius, vii. 14–25, has little direct reference to the Revelation.

Immediately after the triumph of Constantine, the Christians, emancipated from oppression and persecution, and dominant and prosperous in their turn, began to lose their vivid expectation of our Lord's speedy Advent, and their spiritual conception of his kingdom, and to look upon the temporal supremacy of Christianity as a fulfillment of the promised reign of Christ on earth. The Roman empire become Christian was regarded no longer as the object of prophetic denunciation, but as the scene of a millennial development. This view however, was soon met by the figurative interpretation of the millennium as the reign of Christ in

Digitized by Google

the hearts of all true believers. As the barbarous and heretical invaders of the falling empire appeared, they were regarded by the suffering Christians as fulfilling the woes denounced in the Revelation. The beginning of a regular chronological interpretation is seen in Berengaud (assigned by some critics to the 9th century), who treated the Revelation as a history of the Church from the beginning of the world to its end. And the original Commentary of the Abbot Joachim is remarkable, not only for a further development of that method of interpretation, but for the scarcely disguised identification of Babylon with Papal Rome, and of the second Beast or Antichrist with some Universal Pontiff.

The chief commentaries belonging to this period are that which is ascribed to Tichonius, circ. 390 A. D., printed in the works of St. Augustine; Primasius, of Adrumetum in Africa, A. D. 550, in Migne's *Patrologia Latina*, lxviii. 1406; Andreas of Crete, circ. 650 A. D., Arethas of Cappadocia and Œcumenius of Thessaly in the 10th century, whose commentaries were published together in Cramer's *Catena*, Oxon., 1840; the *Explanatio Apoc.* in the works of Bede, A. D. 735; the *Expositio* of Berengaud, printed in the works of Ambrose; the Commentary of Haymo, A. D. 853, first published at Cologne in 1531; a short Treatise on the Seals by Anselm, bishop of Havilberg, A. D. 1145, printed in D'Achéry's *Spicilegium*, i. 161; the *Expositio* of Abbot Joachim of Calabria, A. D. 1200, printed at Venice in 1527.

In the dawn of the Reformation, the views to which the reputation of Abbot Joachim gave currency, were taken up by the harbingers of the impending change, as by Wickliffe and others; and they became the foundation of that great historical school of interpretation, which up to this time seems the most popular of all. It is impossible to construct an exact classification of modern interpreters of the Revelation. They are generally placed in three great divisions.

*a.* The Historical or Continuous expositors, in whose opinion the Revelation is a progressive history of the fortunes of the Church from the first century to the end of time. The chief supporters of this most interesting interpretation are Mede, Sir I. Newton, Vitringa, Bengel, Woodhouse, Faber, E. B. Elliott, Wordsworth, Hengstenberg, Ebrard, and others. The recent commentary of Dean Alford belongs mainly to this school.

*b.* The Præterist expositors, who are of opinion that the Revelation has been almost, or altogether, fulfilled in the time which has passed since it was written; that it refers principally to the triumph of Christianity over Judaism and Paganism, signalized in the downfall of Jerusalem and of Rome. The most eminent expounders of this view are Alcasar, Grotius, Hammond, Bossuet, Calmet, Wetstein, Eichhorn, Hug, Herder, Ewald, Lücke, De Wette, Düsterdieck, Stuart, Lee, and Maurice. This is the favorite interpretation with the critics of Germany, one of whom goes so far as to state that the writer of the Revelation promised the fulfillment of his visions within the space of three years and a half from the time in which he wrote.

*c.* The Futurist expositors, whose views show a strong reaction against some extravagancies of the two preceding schools. They believe that the whole book, excepting perhaps the first three chapters, refers principally, if not exclusively, to events which are yet to come. This view, which is asserted to be merely a revival of the primitive interpretation, has been advocated in recent times by Dr. J. H. Todd, Dr. S. R. Maitland, B. Newton, C. Maitland, I. Williams, De Burgh, and others.

Each of these three schemes is open to objection. Against the Futurist it is argued, that it is not consistent with the repeated declarations of a speedy fulfillment at the beginning and end of the book itself (see ch. i. 3, xxii. 6, 7, 12, 20). Christians, to whom it was originally addressed, would have derived no special comfort from it, had its fulfillment been altogether deferred for so many centuries. The rigidly literal interpretation of Babylon, the Jewish tribes, and other symbols which generally forms a part of Futurist schemes, presents peculiar difficulties.

Against the Præterist expositors it is urged, that prophecies fulfilled ought to be rendered so perspicuous to the general sense of the Church as to supply an argument against infidelity; that the destruction of Jerusalem, having occurred twenty-five years previously, could not occupy a large space in a prophecy; that the supposed predictions of the downfalls of Jerusalem and of Nero appear from the context to refer to one event, but are by this scheme separated, and, moreover, placed in a wrong order; that the measuring of the temple and the altar, and the death of the two witnesses (ch. xi.), cannot be explained consistently with the context.

Against the Historical scheme it is urged, that its advocates differ very widely among themselves; that they assume without any authority that the 1260 days are so many years; that several of its applications — *e. g.* of the symbol of the ten-horned beast to the Popes, and the sixth seal to the conversion of Constantine — are inconsistent with the context; that attempts by some of this school to predict future events by the help of Revelation have ended in repeated failures.

In conclusion, it may be stated that two methods have been proposed by which the student of the Revelation may escape the incongruities and fallacies of the different interpretations, whilst he may derive edification from whatever truth they contain. It has been suggested that the book may be regarded as a prophetic poem, dealing in general and inexact descriptions, much of which may be set down as poetic imagery, mere embellishment. But such a view would be difficult to reconcile with the belief that the book is an inspired prophecy. A better suggestion is made, or rather is revived, by Dr. Arnold in his Sermons *On the Interpretation of Prophecy:* that we should bear in mind that predictions have a lower historical sense, as well as a higher spiritual sense; that there may be one or more than one typical, imperfect, historical fulfillment of a prophecy, in each of which the higher spiritual fulfillment is shadowed forth more or less distinctly. Mr. Elliott, in his *Horæ Apocalypticæ*, iv. 622, argues against this principle; but perhaps not successfully. The recognition of it would pave the way for the acceptance in a modified sense of many of the interpretations of the Historical school, and would not exclude the most valuable portions of the other schemes. W. T. B.

* *Literature.* The most valuable Introduction to the Apocalypse is Lücke's *Versuch einer vollständigen Einl. in die Offenb. d. Johannes* (1832), 2d ed., greatly enlarged, 2 Abth., Bonn, 1852. Besides the Commentaries (a few of which will be

Digitized by Google

mentioned below), and the general Introductions to the N. T., as those of Hug, Schott, De Wette, Credner, Guericke, Reuss (see also his art. *Johan. Apok.* in Ersch and Gruber's *Allgem. Encyklop.* Sect. II. Bd. xxii. (1842) p. 79 ff.), Bleek, and Davidson, the following are some of the more noticeable essays on the authorship, date, and plan of the book: *A Discourse, Historical and Critical, on the Revelations ascribed to St. John* (by F. Abauzit), Lond. 1730; also, in a different trans., in his *Miscellanies* (Lond. 1774). This was reviewed by L. Twells, in his *Crit. Examination of the Late New Test. and Version of the N. T., in Greek and English* [Mace's], Lond. 1732, trans. in part by Wolf in his *Curæ Philol. et Crit.* v. 387 ff. (Basil. 1741). (G. L. Oeder,) *Freie Unters. üb. die sogen. Offenb. Joh., mit Anm. von Semler*, Halle, 1769. Semler, *Neue Unters. üb. d. Apok.*, Halle, 1776. (F. G. Hartwig,) *Apol. d. Apok. wider falschen Tadel u. falsches Lob*, 4 Thle., Chemn. 1780–83. G. C. Storr, *Neue Apol. d. Offenb. Joh.*, Tüb. 1782. Donker-Curtius, *De Apoc. ab Indole, Doct. et scribendi Genere Joannis Apost. non abhorrente*, Ultraj. 1799. Bleek, *Beiträge zur Krit. u. Deutung d. Offenb. Joh.*, in the *Theol. Zeitschr.* of Schleiermacher, De Wette and Lücke, Heft 2 (Berl. 1820); comp. his *Beiträge zur Evangelien-Kritik* (1846), p. 182 ff., 267 ff., and his review of Lücke in the *Theol. Stud. u. Krit.*, 1854, Heft 4, and 1855, Heft 1. Kolthoff, *Apoc. Joanni Apost. vindicata*, Hafn. 1834. Dannemann, *Wer ist der Verfasser d. Offenb. Johannis?* Hannov. 1841. Hitzig, *Ueber Johannes Marcus u. seine Schriften, oder welcher Johannes hat die Offenb. verfasst?* Zür. 1843. Neander, *Planting and Training of the Christian Church*, p. 365 ff., Robinson's trans., N. Y. 1865. W. F. Rinck, *Apokalypt. Forschungen*, Zür. 1853. E. Boehmer, *Verfasser u. Abfassungszeit d. Joh. Apoc.*, Halle, 1856. G. R. Noyes, *The Apocalypse analyzed and explained*, in the *Christ. Examiner* for May 1860, reprinted in the *Journal of Sac. Lit.* for Oct. 1860. *The Apocalypse*, in the *Westm. Rev.* for Oct. 1861. (S. Davidson,) *The Apocalypse of St. John*, in the *National Rev.* for April 1864; substantially the same as his art. *Revelation* in the 3d ed. of Kitto's *Cyclop. of Bibl. Lit.* R. D. C. Robbins, *The Author of the Apocalypse*, in the *Bibl. Sacra* for April and July, 1864. Alb. Réville, *La lit. apocalyptique chez les juifs et les chrétiens*, in the *Rev. des Deux Mondes* for Oct. 1, 1866. B. Weiss, *Apokalyptische Studien*, in *Theol. Stud. u. Krit.* 1869, pp. 1–59, cf. p. 758 ff.

Of the multitudinous *Commentaries* on this tortured book only a few of the more remarkable can be named here. The history of the interpretation is given in detail by Lücke (p. 951 ff.) and after him by Stuart (i. 450 ff.); comp. the outline in De Wette (*Exeg. Handb.*). Jos. Mede, *Clavis Apocalyptica* and *Comm. in Apoc.* (1627, 1632), in his *Works*, vol. ii. Grotius, *Annot. in N. T.*, Par. 1644, often reprinted. Bossuet, *L'Apoc. avec une explication*, Par. 1690. Vitringa, *Ἀναπρασις Apoc.* (1705), ed. alt., Amst. 1719, 4to. Daubuz, *Perpetual Comm. on the Rev. of St. John*, Lond. 1720, fol. Sir Is. Newton, *Obs. upon the Proph. of Daniel and the Apoc. of St. John*, Lond. 1733, 4to. Lowman, *Paraphrase and Notes on the Rev.*, Lond. 1737, 4to, often reprinted. Bengel, *Erklärte Offenb. Johannis*, Stuttg. 1740, 3e Aufl. 1758; comp. his *Gnomon*. Herder, **ΜΑΡΑΝ ΑΘΑ**. *Das Buch von d. Zukunft des Herrn*, Riga, 1779. Eichhorn, *Comm. in Apoc.*, 2 tom. Gott. 1791; comp. *Christian Disciple* (Bost.) for April, 1822 and *Christ. Examiner*, May, 1830. J. C. Woodhouse, *The Apoc. translated, with Notes*, Lond. 1805; also *Annotations on the Apoc.* (a sequel to Elsley and Slade), Lond. 1828. Heinrichs, *Comm. in Apoc.* 2 pt. Gott. 1818–21 (vol. x. of the *Test. Nov. Edit. Kopp.*). Ewald, *Comm. in Apoc. exegeticus et criticus*, Gott. 1828; *Die Johanneischen Schriften übers. u. erklärt*, Bd. ii. Gött. 1862. (Important.) Züllig, *Die Offenb. Joh. vollständig erklärt*, 2 Thle., Stuttg. 1834–40. Tinius, *Die Offenb. Joh. durch Einl., Uebers. u. Erkl. Allen verständlich gemacht*, Leipz. 1839. E. B. Elliott, *Horæ Apocalypticæ* (1843), 5th ed., 4 vols. Lond. 1862. Moses Stuart, *Comm. on the Apocalypse*, 2 vols. Andover, 1845, also reprinted in England; perhaps his most elaborate work. De Wette, *Kurze Erkl. d. Offenb. Joh.*, Leipz. 1848 (Bd. iii. Th. 2 of his *Exeg. Handb.*), 3e Aufl., bearb. von W. Moeller, 1862. Hengstenberg, *Die Offenb. d. heil. Joh.*, 2 Bde. Berl. 1849, 2e Ausg. 1861–62, trans. by P. Fairbairn, Edin. 1851. Ebrard, *Die Offenb. Joh. erklärt*, Königsb. 1853 (Bd. vii. of Olshausen's *Bibl. Comm.*). Auberlen, *Der Proph. Daniel u. die Offenb. Joh.*, Bas. 1854, 2e Aufl. 1857, Eng. trans. Edin. 1856. Düsterdieck, *Krit. exeg. Handb. üb. d. Offenb. Joh.*, Gött. 1859, 2e Aufl. 1865 (Abth. xvi. of Meyer's *Kommentar*). F. D. Maurice, *Lectures on the Apoc.*, Cambr. 1861. Bleek, *Vorlesungen über die Apok.*, Berl. 1862. Volkmar, *Comm. zum Offenb. Joh.*, Zür. 1862. Desprez, *The Apoc. fulfilled*, new ed., Lond. 1865. We may also name the editions of the Greek Test. by Bloomfield, Webster and Wilkinson, Alford, and Wordsworth, who has also published a separate exposition of the book. See further the literature under ANTICHRIST.

Critical editions of the Greek text, with a new English version and various readings, have been published by Dr. S. P. Tregelles (Lond. 1844) and William Kelly (Lond. 1860), followed by his *Lectures on the Apoc.* (Lond. 1861). *The Second Epistle of Peter, the Epistles of John and Judas, and the Revelation: trans. from the Greek, with Notes*, New York (Amer. Bible Union), 1854, 4to, was prepared by the late Rev. John Lillie, D. D.

On the *theology* of the Apocalypse, one may consult the works on Biblical Theology by Lutterbeck, Reuss, Messner, Lechler, Schmid, Baur, and Beyschlag, referred to under JOHN, GOSPEL of, vol. ii. p. 1439 *a*, and the recent work of B. Weiss, *Bibl. Theol. des N. T.*, Berl. 1868, p. 600 ff.

A.

**RE'ZEPH** (רֶצֶף [*stronghold*, Fürst]: ἡ [Ῥαφίς, Vat.] Ῥαφείς, and Ῥαφέθ;[a] [Comp. Ῥασέφ, Ῥασέμ; Sin. in Is. Ραφες:] *Reseph*). One of the places which Sennacherib mentions, in his taunting message to Hezekiah, as having been destroyed by his predecessor (2 K. xix. 12; Is. xxxvii. 12). He couples it with Haran and other well-known Mesopotamian spots. The name is still a common one, Yakût's Lexicon quoting nine towns so called. Interpreters, however, are at va-

[a] The Alex. MS. exhibits the same forms as the Vat.; but by a curious coincidence interchanged, namely, Ρεφεθ in 2 Kings, Ραφες in Isaiah.

Digitized by Google

rance between the principal two of these. The one is a day's march west of the Euphrates, on the road from *Racca* to *Hâma* (Gesenius, Keil, Thenius, Michaelis, *Suppl.*); the other, again, is east of the Euphrates, near Bagdad (Hitzig). The former is mentioned by Ptolemy (v. 15) under the name of Ῥησάφα, and appears, in the present imperfect state of our Mesopotamian knowledge, to be the more feasible of the two. G.

**RE'ZIA** (רְצִיָא [*delight*]: Ῥασιά; [Vat. Ῥασεια:] *Resi*). An Asherite, of the sons of Ulla (1 Chr. vii. 39).

**RE'ZIN** (רְצִין [perh. *stable, firm*, or *prince*, Ges.]: Ῥασσών, Ῥασίν, [Ῥασίμ, Ῥασσίν; Vat. in Is. Ῥασειν, Ῥασειμ, Ῥασσων; Sin. in Is. Ῥασσων; Alex. Ῥασσασσων, exc. Is. vii. 8, Ῥασειν:] *Rasin*). 1. A king of Damascus, contemporary with Pekah in Israel, and with Jotham and Ahaz in Judæa. The policy of Rezin seems to have been to ally himself closely with the kingdom of Israel, and, thus strengthened, to carry on constant war against the kings of Judah. He attacked Jotham during the latter part of his reign (2 K. xv. 37); but his chief war was with Ahaz, whose territories he invaded, in company with Pekah, soon after Ahaz had mounted the throne (about B. C. 741). The combined army laid siege to Jerusalem, where Ahaz was, but "could not prevail against it" (Is. vii. 1; 2 K. xvi. 5). Rezin, however, "recovered Elath to Syria" (2 K. xvi. 6); that is, he conquered and held possession of the celebrated town of that name at the head of the Gulf of Akabah, which commanded one of the most important lines of trade in the East. Soon after this he was attacked by Tiglath-Pileser II., king of Assyria, to whom Ahaz in his distress had made application; his armies were defeated by the Assyrian hosts; his city besieged and taken; his people carried away captive into Susiana (? KIR); and he himself slain (2 K. xvi. 9; compare Tiglath-Pileser's own inscriptions, where the defeat of Rezin and the destruction of Damascus are distinctly mentioned). This treatment was probably owing to his being regarded as a rebel; since Damascus had been taken and laid under tribute by the Assyrians some time previously (Rawlinson's *Herodotus*, i. 467).

G. R.

2. [Ῥασών; in Neh., Rom. Ῥασσών, FA. Ῥασσων.] One of the families of the Nethinim (Ezr. ii. 48; Neh. vii. 50). It furnishes another example of the occurrence of non-Israelite names amongst them, which is already noticed under MEHUNIM [iii. 1875, note *a*; and see SISERA]. In 1 Esdr. the name appears as Daisan, in which the change from R to D seems to imply that 1 Esdras at one time existed in Syriac or some other Semitic language. G.

**RE'ZON** (רְזוֹן [*prince*]: [Rom. om.; Vat.] Ἐσρών: Alex. Ραζων: *Razon*). The son of Eliadah, a Syrian, who, when David defeated Hadadezer king of Zobah, put himself at the head of a band of freebooters and set up a petty kingdom at Damascus (1 K. xi. 23). Whether he was an officer of Hadadezer, who, foreseeing the destruction which David would inflict, prudently escaped with some followers; or whether he gathered his band of the remnant of those who survived the slaughter, does not appear. The latter is more probable. The settlement of Rezon at Damascus could not have been till some time after the disastrous battle in which the power of Hadadezer was broken, for we are told that David at the same time defeated the army of Damascene Syrians who came to the relief of Hadadezer, and put garrisons in Damascus. From his position at Damascus he harassed the kingdom of Solomon during his whole reign. With regard to the statement of Nicolaus in the 4th book of his History, quoted by Josephus (*Ant.* vii. 5, § 2), there is less difficulty, as there seems to be no reason for attributing to it any historical authority. He says that the name of the king of Damascus, whom David defeated, was Hadad, and that his descendants and successors took the same name for ten generations. If this be true, Rezon was a usurper, but the origin of the story is probably the confused account of the LXX. In the Vatican MS. of the LXX. the account of Rezon is inserted in ver. 14 in close connection with Hadad, and on this Josephus appears to have founded his story that Hadad, on leaving Egypt, endeavored without success to excite Idumea to revolt, and then went to Syria, where he joined himself with Rezon, called by Josephus Raazarus, who at the head of a band of robbers was plundering the country (*Ant.* viii. 7, § 6). It was Hadad and not Rezon, according to the account in Josephus, who established himself king of that part of Syria, and made inroads upon the Israelites. In 1 K. xv. 18, Benhadad, king of Damascus in the reign of Asa, is described as the grandson of Hezion, and from the resemblance between the names Rezon and Hezion, when written in Hebrew characters, it has been suggested that the latter is a corrupt reading for the former. For this suggestion, however, there does not appear to be sufficient ground, though it was adopted both by Sir John Marsham (*Chron. Can.* p. 346) and Sir Isaac Newton (*Chronol.* p. 221). Bunsen (*Bibelwerk*, i. cclxxi.) makes Hezion contemporary with Rehoboam, and probably a grandson of Rezon. The name is Aramaic, and Ewald compares it with Rezin. W. A. W.

**RHE'GIUM** (Ῥήγιον: *Rhegium*). The mention of this Italian town (which was situated on the Bruttian coast, just at the southern entrance of the straits of Messina) occurs quite incidentally (Acts xxviii. 13) in the account of St. Paul's voyage from Syracuse to Puteoli, after the shipwreck at Malta. But, for two reasons, it is worthy of careful attention. By a curious coincidence the figures on its coins are the very "twin-brothers" which gave the name to St. Paul's ship. See (attached to the article CASTOR AND POLLUX) the coin of Bruttii, which doubtless represents the forms that were painted or sculptured on the vessel. And, again, the notice of the intermediate position of Rhegium, the waiting there for a southerly wind to carry the ship through the straits, the run to Puteoli with such a wind within the twenty-four hours, are all points of geographical accuracy which help us to realize the narrative. As to the history of the place, it was originally a Greek colony: it was miserably destroyed by Dionysius of Syracuse: from Augustus it received advantages which combined with its geographical position in making it important throughout the duration of the Roman empire: it was prominently associated, in the Middle Ages, with the varied fortunes of the Greek emperors, the Saracens, and the Romans: and still the modern *Reggio* is a town of 10,000 inhabitants. Its distance across the straits from Messina is only about six miles, and it is well seen

Digitized by Google

from the telegraph station above that Sicilian town.[a] J. S. H.

**RHE'SA** (Ῥησά: *Resa*), son of Zorobabel in the genealogy of Christ (Luke iii. 27). Lord A. Hervey has ingeniously conjectured that Rhesa is no person, but merely the title *Rosh*, i. e. "Prince," originally attached to the name of Zerubbabel, and gradually introduced as an independent name into the genealogy. He thus removes an important obstacle to the reconciliation of the pedigrees in Matthew and Luke (Hervey's *Genealogies*, etc. pp. 111, 114, 356–360). [GENEALOGY OF JESUS CHRIST, i. 886 *a*; ZERUBBABEL.] G.

**RHO'DA** (Ῥόδη [*rose-bush*]: *Rhode*), lit. *Rose*, the name of a maid who announced Peter's arrival at the door of Mary's house after his miraculous release from prison (Acts xii. 13). [PORTER.]

**RHODES** (Ῥόδος [*rose*]: *Rhodus*). The history of this island is so illustrious, that it is interesting to see it connected, even in a small degree, with the life of St. Paul. He touched there on his return-voyage to Syria from the third missionary journey (Acts xxi. 1). It does not appear that he landed from the ship. The day before he had been at Cos, an island to the N. W.; and from Rhodes he proceeded eastwards to PATARA in Lycia. It seems, from all the circumstances of the narrative, that the wind was blowing from the N. W., as it very often does in that part of the Levant. Rhodes is immediately opposite the high Carian and Lycian headlands at the S. W. extremity of the peninsula of Asia Minor. Its position has had much to do with its history. The outline of that history is as follows. Its real eminence began (about 400 B. C.) with the founding of that city at the N. E. extremity of the island, which still continues to be the capital. Though the Dorian race was originally and firmly established here, yet Rhodes was very frequently dependent on others, between the Peloponnesian war and the time of Alexander's campaign. After Alexander's death it entered on a glorious period, its material prosperity being largely developed, and its institutions deserving and obtaining general esteem. As we approach the time of the consolidation of the Roman power in the Levant, we have a notice of Jewish residents in Rhodes (1 Macc. xv. 23). The Romans, after the defeat of Antiochus, assigned, during some time, to Rhodes certain districts on the mainland [CARIA; LYCIA]; and when these were withdrawn, upon more mature provincial arrangements being made, the island still enjoyed (from Augustus to Vespasian) a considerable amount of independence.[b] It is in this interval that St. Paul was there. Its Byzantine history is again eminent. Under Constantine it was the metropolis of the "Province of the Islands." It was the last place where the Christians of the East held out against the advancing Saracens; and subsequently it was once more famous as the home and fortress of the Knights of St. John. The most prominent remains of the city and harbour are memorials of those knights. The best account of Rhodes will be found in Ross, *Reisen auf den Griech. Inseln*, iii. 70–113, and *Reisen nach Kos, Halikarnassos, Rhodos*, etc., pp. 53–80. There is a good view, as well as an accurate delineation of the coast, in the English Admiralty Chart No. 1639. Perhaps the best illustration we can adduce here is one of the early coins of Rhodes, with the conventional rose-flower, which bore the name of the island on one side, and the head of Apollo, radiated like the sun, on the other. It was a proverb that the sun shone every day in Rhodes. J. S. H.

Coin of Rhodes.

**RHOD'OCUS** (Ῥόδοκος: *Rhodocus*). A Jew who betrayed the plans of his countrymen to Antiochus Eupator. His treason was discovered, and he was placed in confinement (2 Macc. xiii. 21). B. F. W.

**RHO'DUS** (Ῥόδος: *Rhodus*), 1 Macc. xv. 23 [RHODES.]

**RI'BAI** [2 syl.] (רִיבַי [*whom Jehovah defends*]: Ῥιβάδ [Vat. Ρειβα] in Sam., Ρεβιέ; Alex. Ρηβαι [FA. Ραβειαι] in Chr.: *Ribai*). The father of Ittai the Benjamite of Gibeah, who was one of David's mighty men (2 Sam. xxiii. 29; 1 Chr. xi. 31).

• **RIBBAND.** [LACE.]

**RIB'LAH**, 1. (הָרִבְלָה, with the definite article [*fertility*]: Βηλάθ[c] in both MSS.: *Rebla*). One of the landmarks on the eastern boundary of the land of Israel, as specified by Moses (Num. xxxiv. 11). Its position is noted in this passage with much precision. It was immediately between Shepham and the sea of Cinnereth, and on the "east side of the spring." Unfortunately Shepham has not yet been identified, and which of the great fountains of northern Palestine is intended by "the spring" is uncertain. It seems hardly possible, without entirely disarranging the specification of the boundary, that the Riblah in question can be the same with the "Riblah in the land of Hamath" which is mentioned at a much later period of the history. For, according to this passage, a great distance must necessarily have intervened between Riblah and Hamath. This will be evident from a mere enumeration of the landmarks.

1. The north boundary: The Mediterranean,

---

a • *Reggio* is in full view from the harbor of Messina. The Apostle passed there in winter, probably in February (as Luke's notations of time indicate), and at that season he must have seen the mountains, both of Sicily and of the mainland, covered with snow. The name is from ῥήγνυμι, *to break* or *burst through*, as if the sea had there torn off Sicily from the continent. See Pape's *Wörterb. der Griech. Eigennamen*, s. v. H.

b Two incidents in the life of Herod the Great connected with Rhodes, are well worthy of mention here. When he went to Italy, about the close of the last Republican struggle, he found that the city had suffered much from Cassius, and gave liberal sums to restore it (Joseph. *Ant.* xiv. 14, § 3). Here, also, after the battle of Actium, he met Augustus and secured his favor (*ibid.* xv. 6, § 6).

c Originally it appears to have stood Αρβηλά; but the Αρ has now attached itself to the preceding name —Ισεφαμαρ. Can this be the ARBELA of 1 Macc ix. 2?

Digitized by Google

Mount Hor, the entrance of Hamath. Zedad, Ziphron, Hazar-enan.

2. The eastern boundary commenced from Hazar-enan, turning south: Shepham, Riblah, passing east of the spring, to east side of Sea of Galilee.

Now it seems impossible that Riblah can be in the land of Hamath,[a] seeing that four landmarks occur between them. Add to this its apparent proximity to the Sea of Galilee.

The early Jewish interpreters have felt the force of this. Confused as is the catalogue of the boundary in the Targum Pseudojonathan of Num. xxxiv., it is plain that the author of that version considers "the spring" as the spring of Jordan at *Banias*, and Riblah, therefore, as a place near it. With this agrees Parchi, the Jewish traveller in the 13th and 14th centuries, who expressly discriminates between the two (see the extracts in Zunz's *Benjamin*. ii. 418), and in our own day J. D. Michaelis (*Bibel für Ungelehrten; Suppl. ad Lexica*, No. 2313), and Bonfrerius, the learned editor of Eusebius's *Onomasticon*.

No place bearing the name of Riblah has been yet discovered in the neighborhood of Banias.

2. Riblah in the land of Hamath (רִבְלָה, once רִבְלָתָה, *i. e.* Riblathah: [b] Δεβλαθᾶ in both MSS.; [Rom. in 2 K. xxiii. 33, Ῥαβλαάμ, xxv. 6, 21, 22. Ῥεβλαθά:] *Reblatha*). A place on the great road between Palestine and Babylonia, at which the kings of Babylonia were accustomed to remain while directing the operations of their armies in Palestine and Phœnicia. Here Nebuchadnezzar waited while the sieges of Jerusalem and of Tyre were being conducted by his lieutenants: hither were brought to him the wretched king of Judæa and his sons, and after a time a selection from all ranks and conditions of the conquered city, who were put to death, doubtless by the horrible death of impaling, which the Assyrians practiced, and the long lines of the victims to which are still to be seen on their monuments (Jer. xxxix. 5, 6, lii. 9, 10, 26, 27; 2 K. xxv. 6, 20, 21). In like manner Pharaoh-Necho, after his successful victory over the Babylonians at Carchemish, returned to Riblah and summoned Jehoahaz from Jerusalem before him (2 K. xxiii. 33).

This Riblah has no doubt been discovered, still retaining its ancient name, on the right (east) bank of the *el-Asy* (Orontes), upon the great road which connects *Baalbek* and *Hums*, about 35 miles N. E. of the former and 20 miles S. W. of the latter place. The advantages of its position for the encampment of vast hosts, such as those of Egypt and Babylon, are enumerated by Dr. Robinson, who visited it in 1852 (*Bibl. Res.* iii. 545). He describes it as "lying on the banks of a mountain stream in the midst of a vast and fertile plain yielding the most abundant supplies of forage. From this point the roads were open by Aleppo and the Euphrates to Nineveh, or by Palmyra to Babylon . . . . by the end of Lebanon and the coast to Palestine and Egypt, or through the Bukâa and the Jordan Valley to the centre of the Holy Land." It appears to have been first alluded to by Buckingham in 1816.

Riblah is probably mentioned by Ezekiel (vi. 14), though in the present Hebrew text and A. V it appears as Diblah or Diblath. The change from R to D is in Hebrew a very easy one. Riblah suits the sense of the passage very well, while on the other hand Diblah is not known.[c] [DIBLATH.]

G.

* RICHES, Rev. xviii. 17, not plural but singular: "In one hour so great riches is come to nought" (so also Wisd. v. 8). The original plural was *richessis* (Fr. *richesse*), as in Wickliffe's version, and was generally obsolete at the time of the translation of the A. V. It stood at first also in Jer. xlviii. 36, but as Trench mentions (*Authorized Version*, p. 60) was tacitly corrected, by changing "is" to "are."

H.

RIDDLE (חִידָה: αἴνιγμα, πρόβλημα: *problema, propositio*). The Hebrew word is derived from an Arabic root meaning "to bend off," "to twist," and is used for artifice (Dan. viii. 23), a proverb (Prov. i. 6), a song (Ps. xlix. 4, lxxviii. 2), an oracle (Num. xii. 8), a parable (Ezr. xvii. 2), and in general any wise or intricate sentence (Ps. xciv. 4; Hab. ii. 6, &c.), as well as a riddle in our sense of the word (Judg. xiv. 12–19). In these senses we may compare the phrases στροφὴ λόγων, στροφαὶ παραβολῶν (Wisd. viii. 8; Ecclus. xxxix. 2), and περιπλοκὴ λόγων (Eur. *Phœn.* 497; Gesen. *s. v.*), and the Latin *scirpus*, which appears to have been similarly used (Aul. Gell. *Noct. Att.* xii. 6). Augustine defines an enigma to be any "obscura allegoria" (*De Trin.* xv. 9), and points out, as an instance, the passage about the daughter of the horse-leech in Prov. xxx. 15, which has been elaborately explained by Bellermann in a monograph on the subject (*Ænigmata Hebraica*, Erf. 1798). Many passages, although not definitely propounded as riddles, may be regarded as such, *e. g.* Prov. xxvi. 10, a verse in the rendering of which every version differs from all others. The riddles which the queen of Sheba came to ask of Solomon (1 K. x. 1, ἦλθε πειράσαι αὐτὸν ἐν αἰνίγμασι; 2 Chr. ix. 1) were rather "hard questions" referring to profound inquiries. Solomon is said, however, to have been very fond of the riddle proper, for Josephus quotes two profane historians (Menander of Ephesus, and Dius) to authenticate a story that Solomon proposed numerous riddles to Hiram, for the non-solution of which Hiram was obliged to pay a large fine, until he summoned to his assistance a Tyrian named Abdemon, who not only solved the riddles, but propounded others which Solomon himself was unable to answer, and consequently in his turn incurred the penalty. The word αἴνιγμα occurs only once in the N. T. (1 Cor. xiii. 12, "darkly," ἐν αἰνίγματι, comp. Num. xii. 8; Wetstein, *N. T.* ii. 158); but, in the wider meaning of the word, many instances of it occur in our Lord's discourses. Thus Erasmus applies the term to Matt. xii. 43–45. The object of such implicated meanings is obvious, and is well explained by St. Augustine:

---

[a] If Mr. Porter's identifications of Zedad and Hatzrenan are adopted, the difficulty is increased tenfold.

[b] The two great MSS. of the LXX. — Vatican (Vat) and Alex. — present the name as follows: —

2 K. xxiii. 33, Ἀβλαά; Δεβλαα.

2 K. xxv. 6, Ἰερεβλαθάν; Δεβλαθα.

2 K. xxv. 20, Δεβλαθᾶ; Δεβλαθα.

2 K. xxv. 21, Ῥεβλαθᾶ; Δεβλαθα.

Jer. lii. 9, 10, 26, 27, Δεβλαθᾶ, in both.

'manifestis pascimur, *obscuris exercemur*" (*De Doct. Christ.* ii. 6).

We know that all ancient nations, and especially Orientals, have been fond of riddles (Rosenmüller, *Morgenl.* iii. 68). We find traces of the custom among the Arabs (Koran, xxv. 35), and indeed several Arabic books of riddles exist — as *Ketâb al Algâz* in 1469, and a book of riddles solved, called *Akd al themin*. But these are rather emblems and devices than what we call riddles, although they are very ingenious. The Persians call them *Algâz* and *Maamma* (D'Herbelot, *s. v.* Algaz). They were also known to the ancient Egyptians (Jablonski, *Pantheon Ægypt.* 48). They were especially used in banquets both by Greeks and Romans (Müller, *Dor.* ii. 392; Athen. x. 457; Pollux, vi. 107; A. Gell. xviii. 2; *Dict. of Ant.* p. 22), and the kind of witticisms adopted may be seen in the literary dinners described by Plato, Xenophon, Athenæus, Plutarch, and Macrobius. Some have groundlessly supposed that the proverbs of Solomon, Lemuel, and Agur, were propounded at feasts, like the parables spoken by our Lord on similar occasions (Luke xiv. 7, etc.).

Riddles were generally proposed in verse, like the celebrated riddle of Samson, which, however, was properly (as Voss points out, *Instt. Oratt.* iv. 11) no riddle at all, because the Philistines did not possess the only clew on which the solution *could* depend. For this reason Samson had carefully concealed the fact even from his parents (Judg. xiv. 14, etc.). Other ancient riddles in verse are that of the Sphinx, and that which is said to have caused the death of Homer by his mortification at being unable to solve it (Plutarch. *Vit. Hom.*).

Franc. Junius distinguishes between the *greater* enigma, where the allegory or obscure intimation is continuous throughout the passage (as in Ez. xvii. 2, and in such poems as the Syrinx attributed to Theocritus); and the *lesser* enigma or *αἴνιγμα*, where the difficulty is concentrated in the peculiar use of some one word. It may be useful to refer to one or two instances of the latter, since they are very frequently to be found in the Bible, and especially in the Prophets. Such is the play on the word שְׁכֶם ("a portion," and "Shechem," the town of Ephraim) in Gen. xlviii. 22; on מָצוֹר (*mâtzôr*, "a fortified city," and מִצְרַיִם, *Mizraim*, Egypt) in Mic. vii. 12; on שָׁקֵד (*Shâkêd*, "an almond-tree"), and שָׁקַד (*shâkad*, "to hasten"), in Jer. i. 11; on דּוּמָה (*Dûmâh*, meaning "Edom" and "the land of death"), in Is. xxi. 11; on שֵׁשַׁךְ,[a] *Sheshach* (meaning "Babylon," and perhaps "arrogance"), in Jer. xxv. 26, li. 41.

It only remains to notice the single instance of a riddle occurring in the N. T., namely, *the number of the beast*. This belongs to a class of riddles very common among Egyptian mystics, the Gnostics, some of the Fathers, and the Jewish Cabbalists. The latter called it *Gematria* (i. e. *γεωμετρία*) of which instances may be found in Carpzov (*App. Crit.* p. 542), Reland (*Ant. Hebr.* i. 25), and some of the commentators on Rev. xiii. 16–18. Thus נָחָשׁ (*nâchâsh*), "serpent," is made by the Jews one of the names of the Messiah, because its numerical value is equivalent to מָשִׁיחַ; and the names Shushan and Esther are connected together because the numerical value of the letters composing them is 661. Thus the Marcosians regarded the number 24 as sacred from its being the sum of numerical values in the names of two quaternions of their Æons, and the Gnostics used the name *Abraxas* as an amulet, because its letters amount numerically to 365. Such idle fancies are not unfrequent in some of the Fathers. We have already mentioned (see CROSS) the mystic explanation by Clem. Alexandrinus of the number 318 in Gen. xiv. 14, and by Tertullian of the number 300 (represented by the letter T or *a cross*) in Judg. vii. 6, and similar instances are supplied by the Testimonia of the Pseudo-Cyprian. The most exact analogies, however, to the enigma on the name of the beast, are to be found in the so-called Sibylline verses. We quote one which is exactly similar to it, the answer being found in the name Ἰησοῦς = 888, thus: ι = 10 + η = 8 + σ = 200 + ο = 70 + υ = 400 + ς = 200 = 888. It is as follows, and is extremely curious:

Ἥξει σαρκοφόρος θνητοῖς ὁμοιούμενος ἐν γῇ
Τέσσερα φωνήεντα φέρει, τὰ δ' ἄφωνα δύ' αὐτῷ
Δίσσων ἀστραγάλων (?), ἀριθμὸν δ' ὅλον ἐξονομάσω·
Ὅκτω γὰρ μονάδας, ὅσσας δεκάδας ἐπὶ τοῦτοις,
Ἠδ' ἑκατοντάδας ὅκτω ἀνιστοτέρους ἀνθρώπους
Οὔνομα δηλώσει.

With examples like this before us, it would be absurd to doubt that St. John (not *greatly* removed in time from the Christian forgers of the Sibylline verses) intended some *name* as an answer to the number 666. The true answer must be settled by the Apocalyptic commentators. Most of the Fathers supposed, even as far back as Irenæus, the name Λάτεινος to be indicated. A list of the other very numerous solutions, proposed in different ages, may be found in Elliott's *Horæ Apocalypticæ*, from which we have quoted several of these instances (*Hor. Apoc.* iii. 222–234).

* **RIE** for RYE, Ex. ix. 32 and Is. xxviii. 25 (marg. *spelt*), in the oldest editions of the A. V.

H.

**RIM'MON** (רִמּוֹן [*pomegranate*]: Ῥεμμών: *Remmon*). Rimmon, a Benjamite of Beeroth, was the father of Rechab and Baanah, the murderers of Ishbosheth (2 Sam. iv. 2, 5, 9).

**RIM'MON** (רִמּוֹן [*pomegranate*]: Ῥεμμών: *Remmon*). A deity, worshipped by the Syrians of Damascus, where there was a temple or house of Rimmon (2 K. v. 18). Traces of the name of this god appear also in the proper names Hadad-rimmon and Tabrimmon, but its signification is doubtful. Serarius, quoted by Selden (*De diis Syris*, ii. 10), refers it to the Heb. *rimmon*, a pomegranate, a fruit sacred to Venus, who is thus the deity worshipped under this title (compare *Pomona*, from *pomum*). Ursinus (*Arboretum Bibl.* cap. 32, 7) explains Rimmon as the pomegranate,

[a] In this passage it is generally thought that Sheshach is put for Babel, by the principle of alphabetical inversion known as the *athbash*. It will be seen that the passages above quoted are chiefly instances of *paronomasia*. On the profound use of this figure by the prophets and other writers see Ewald, *Di. Propheten d. Alt. Bund.* i. 48; Steinthal, *Ursprung d Sprache*, p. 28.

Digitized by Google

the emblem of the fertilizing principle of nature, the personified *natura naturans*, a symbol of frequent occurrence in the old religions (Bähr, *Symbolik*, ii. 122). If this be the true origin of the name, it presents us with a relic of the ancient tree-worship of the East, which we know to have prevailed in Palestine. But Selden rejects this derivation, and proposes instead that Rimmon is from the root רוּם, *rúm*, "to be high," and signifies "most high;" like the Phœnician *Elioun*, and Heb. עֶלְיוֹן. Hesychius gives Ῥαμάς, *ὁ ὕψιστος θεός*. Clericus, Vitringa, Rosenmüller, and Gesenius were of the same opinion.

Movers (*Phön.* i. 196, &c.) regards Rimmon as the abbreviated form of Hadad-Rimmon (as Peor for Baal-Peor), Hadad being the sun-god of the Syrians. Combining this with the pomegranate, which was his symbol, Hadad-Rimmon would then be the sun-god of the late summer, who ripens the pomegranate and other fruits, and, after infusing into them his productive power, dies, and is mourned with the "mourning of Hadadrimmon in the valley of Megiddon" (Zech. xii. 11).

Between these different opinions there is no possibility of deciding. The name occurs but once, and there is no evidence on the point. But the conjecture of Selden, which is approved by Gesenius, has the greater show of probability.

W. A. W.

**RIM'MON** (רִמּוֹנ, *i. e.* Rimmônô [*pomegranate*]: ἡ Ῥεμμών: *Remmono*). A city of Zebulun belonging to the Merarite Levites (1 Chr. vi. 77). There is great discrepancy between the list in which it occurs and the parallel catalogue of Josh. xxi. The former contains two names in place of the four of the latter, and neither of them the same. But it is not impossible that DIMNAH (Josh. xxi. 35) may have been originally Rimmon, as the D and R in Hebrew are notoriously easy to confound. At any rate there is no reason for supposing that Rimmono is not identical with Kiamon of Zebulun (Josh. xix. 13), in the A. V. REMMON-METHOAR. The redundant letter was probably transferred, in copying, from the succeeding word — at an early date, since all the MSS. appear to exhibit it, as does also the Targum of Joseph. [Dr. Robinson inquires whether this Rimmon may not be the present *Rummâneh*, a little north of Nazareth. See *Bibl. Res.* ii. 340 (2d ed.). — H.]

G.

**RIM'MON** (רִמּוֹן [*pomegranate*]: Ἐρεμμάθ, Ῥεμμών; Alex. Ῥεμμων; [in 1 Chr., Rom. Ῥεμνών, Vat. Ῥεμμων:] *Remmon*). A town in the southern portion of Judah (Josh. xv. 32), allotted to Simeon (Josh. xix. 7; 1 Chr. iv. 32: in the former of these two passages it is inaccurately given in the A. V. as REMMON). In each of the above lists the name succeeds that of AIN, also one of the cities of Judah and Simeon. In the catalogue of the places reoccupied by the Jews after the return from Babylon (Neh. xi. 29) the two are joined עֵין רִמּוֹן: LXX. omits: *et in Remmon*), and appear in the A. V. as En-Rimmon. There is nothing to support this single departure of the Hebrew text from its practice in the other lists except the fact that the Vatican LXX (if the edition of Mai may be trusted) has joined the names in each of the lists of Joshua, from which it may be inferred that at the time of the LXX. translation the Hebrew text there also showed them joined. On the other hand there does not appear to be any sign of such a thing in the present Hebrew MSS.

No trace of Rimmon has been yet discovered in the south of Palestine. True, it is mentioned in the *Onomasticon* of Eusebius and Jerome; but they locate it at 15 miles *north* of Jerusalem, obviously confounding it with the Rock Rimmon. That it was in the south would be plain, even though the lists above cited were not extant, from Zech. xiv. 10, where it is stated to be "south of Jerusalem," and where it and Geba (the northern frontier of the southern kingdom) are named as the limits of the change which is to take place in the aspect and formation of the country. In this case Jerome, both in the Vulgate and in his Commentary (*in Zech.* xiv. 9 ff.), joins the two names, and understands them to denote a hill north of Jerusalem, apparently well known (doubtless the ancient GIBEAH), marked by a pomegranate tree — "collis Rimmon (hoc enim Gabaa sonat, ubi arbor malagranati est) usque ad australem plagam Jerusalem."

G.

**RIM'MON PA'REZ** (רִמּוֹן פָּרֶץ [*pomegranate of the breach* or *rent*]: Ῥεμμὼν Φαρές) The name of a march-station in the wilderness (Num. xxxiii. 19, 20). Rimmon is a common name of locality. The latter word is the same as that found in the plural form in Baal-Perazim, "Baal of the breaches." Perhaps some local configuration, such as a "cleft," might account for its being added. It stands between Rithmah and Libnah. No place now known has been identified with it.

H. H.

**RIM'MON, THE ROCK** (סֶלַע[a] הַרִּמּוֹן: ἡ πέτρα τοῦ Ῥεμμών; Joseph. πέτρα Ῥωδ: *petra cujus vocabulum est Remmon; petra Remmon*). A cliff (such seems rather the force of the Hebrew word *sela*) or inaccessible natural fastness, in which the six hundred Benjamites who escaped the slaughter of Gibeah took refuge, and maintained themselves for four months until released by the act of the general body of the tribes (Judg. xx. 45, 47, xxi. 13).

It is described as in the "wilderness" (*midbar*), that is, the wild uncultivated (though not unproductive) country which lies on the east of the central highlands of Benjamin, on which Gibeah was situated — between them and the Jordan Valley. Here the name is still found attached to a village perched on the summit of a conical chalky hill, visible in all directions, and commanding the whole country (Rob. *Bibl. Res.* i. 440).

The hill is steep and naked, the white limestone everywhere protruding, and the houses clinging to its sides and forming as it were huge steps. On the south side it rises to a height of several hundred feet from the great ravine of the *Wady Mutyâh*; while on the west side it is almost equally isolated by a cross valley of great depth (Porter, *Handbk.* p. 217; Mr. Finn, in Van de Velde, *Memoir*, p. 345). In position it is (as the crow flies) 3 miles east of Bethel, and 7 N. E. of Gibeah (*Tuleil el-Fûl*). Thus in every particular of name, character, and situation it agrees with the require-

[a] In two out of its four occurrences, the article is omitted both in the Hebrew and LXX.

Digitized by Google

ments of the Rock Rimmon. It was known in the days of Eusebius and Jerome, who mention it (*Onomasticon*, "Remmon")—though confounding it with Rimmon in Simeon—as 15 Roman miles northwards from Jerusalem. G.

**RING** (טַבַּעַת: δακτύλιος: *annulus*). The ring was regarded as an indispensable article of a Hebrew's attire, inasmuch as it contained his signet, and even owed its name to this circumstance, the term *tibbaath* being derived from a root signifying "to impress a seal." It was hence the symbol of authority, and as such was presented by Pharaoh to Joseph (Gen. xli. 42), by Ahasuerus to Haman (Esth. iii. 10), by Antiochus to Philip (1 Macc. vi. 15), and by the father to the prodigal son in the parable (Luke xv. 22). It was treasured accordingly, and became a proverbial expression for a most valued object (Jer. xxii. 24; Hag. ii. 23; Ecclus. xlix. 11). Such rings were worn not only by men, but by women (Is. iii. 21; Mishn. *Shabb.* p. 6, § 3), and are enumerated among the articles presented by men and women for the service of the Tabernacle (Ex. xxxv. 22). The signet-ring was worn on the right hand (Jer. *l. c.*). We may conclude, from Ex. xxviii. 11, that the rings contained a stone engraven with a device, or with the owner's name. Numerous specimens of Egyptian rings have been discovered, most of them made of gold, very massive, and containing either a scarabæus or an engraved stone (Wilkinson, ii. 337). The number

Egyptian Rings.

of rings worn by the Egyptians was truly remarkable. The same profusion was exhibited also by the Greeks and Romans, particularly by men (*Dict. of Ant.* "Rings"). It appears also to have prevailed among the Jews of the Apostolic age; for in Jam. ii. 2, a rich man is described as χρυσοδακτύλιος, meaning not simply "with a gold ring," as in the A. V., but "golden-ringed" (like the χρυσόχειρ, "golden-handed" of Lucian, *Timon*, c. 20), implying equally well the presence of several gold rings. For the term *gâlîl*, rendered "ring" in Cant. v. 14, see ORNAMENTS. W. L. B.

* **RINGLEADER** (Acts xxiv. 5), applied to Paul by Tertullus in his speech before Felix, where it stands for πρωτοστάτης. It implies, of itself, nothing opprobrious, being properly a military title, namely, of one who stands in front of the ranks as leader. It marks a bad preëminence here, especially from being associated with λοιμός, "plague, pest" (A. V. *pestilent fellow*). Ringleader had a good or neutral sense as well as bad in the older English writers. H.

**RIN'NAH** (רִנָּה) [*a cry of joy, or wailing*]: Ἀνά; Alex. Ραννων: *Rinna*). One of the sons of Shimon in an obscure and fragmentary genealogy of the descendants of Judah (1 Chr. iv. 20). In the LXX. and Vulgate he is made "the son of Ithaan," Ben-hanan being thus translated.

**RI'PHATH** (רִיפַת) [*a breaking in pieces terror*, Sin.]: Ῥιφάθ; Alex. Ριφας in Chr.: *Riphath*), the second son of Gomer, and the brother of Ashkenaz and Togarmah (Gen. x. 3). The Hebrew text in 1 Chr. i. 6 gives the form Diphath,[a] but this arises out of a clerical error similar to that which gives the forms Rodanim and Hadad for Dodanim and Hadar (1 Chr. i. 7, 50; Gen. xxxvi. 39). The name Riphath occurs only in the genealogical table, and hence there is little to guide us to the locality which it indicates. The name itself has been variously identified with that of the Rhipæan mountains (Knobel), the river Rhebas in Bithynia (Bochart), the Rhibii, a people living eastward of the Caspian Sea (Schulthess), and the Rhipeans [Riphathæans?], the ancient name of the Paphlagonians (Joseph. *Ant.* i. 6, § 1). This last view is certainly favored by the contiguity of Ashkenaz and Togarmah. The weight of opinion is, however, in favor of the Rhipæan mountains, which Knobel (*Völkert.* p. 44) identifies etymologically and geographically with the Carpathian range in the N. E. of Dacia. The attempt of that writer to identify Riphath with the Celts or Gauls, is evidently based on the assumption that so important a race ought to be mentioned in the table, and that there is no other name to apply to them: but we have no evidence that the Gauls were for any lengthened period settled in the neighborhood of the Carpathian range. The Rhipæan mountains themselves existed more in the imagination of the Greeks than in reality, and if the received etymology of that name (from ῥιπαί, "blasts") be correct, the coincidence in sound with Riphath is merely accidental, and no connection can be held to exist between the names. The later geographers, Ptolemy (iii. 5, § 15, 19) and others, placed the Rhipæan range where no range really exists, namely, about the elevated ground that separates the basins of the Euxine and Baltic seas. W. L. B.

**RIS'SAH** (רִסָּה) [*a ruin*]: [Rom. Ρεσσάν; Vat. Δεσσα; Alex.] Ρεσσα: *Ressa*). The name, identical with the word which signifies "a worm," is that of a march-station in the wilderness (Num. xxxiii. 21, 22). It lies, as there given, between Libnah and Kekelathah, and has been considered (Winer, *s. v.*) identical with Rasa in the *Peuting. Itiner.*, 32 Roman miles from Ailah (Elah), and 203 miles south of Jerusalem, distinct, however, from the Ῥῆσσα of Josephus (*Ant.* xiv. 15, § 2). No site has been identified with Rissah. H. H.

**RITH'MAH** (רִתְמָה) [see below]: Ῥαθαμά: *Rethma*). The name of a march-station in the wilderness (Num. xxxiii. 18, 19). It stands there next to Hazeroth [HAZEROTH], and probably lay in a N. E. direction from that spot, but no place now known has been identified with it. The name

is probably connected with רֹתֶם, Arab. رَتْم, commonly rendered "juniper," but more correctly "broom." It carries the affirmative ה, common in names of locality, and found especially among many in the catalogue of Num. xxxiii. H. H.

---

[a] דִּיפַת. This reading is preferred by Bochart (*Phaleg*, iii. 10), and is connected by him with the names of the town Tobata and the mountain Tibium in the N. of Asia Minor.

**RIVER.** In the sense in which we employ the word, namely, for a perennial stream of considerable size, a river is a much rarer object in the East than in the West. The majority of the inhabitants of Palestine at the present day have probably never seen one. With the exception of the Jordan and the *Litany*, the streams of the Holy Land are either entirely dried up in the summer months, and converted into hot lanes of glaring stones, or else reduced to very small streamlets deeply sunk in a narrow bed, and concealed from view by a dense growth of shrubs.

The cause of this is twofold: on the one hand the hilly nature of the country — a central mass of highland descending on each side to a lower level, and on the other the extreme heat of the climate during the summer. There is little doubt that in ancient times the country was more wooded than it now is, and that, in consequence, the evaporation was less, and the streams more frequent: yet this cannot have made any very material difference in the permanence of the water in the thousands of valleys which divide the hills of Palestine.

For the various aspects of the streams of the country which such conditions inevitably produced, the ancient Hebrews had very exact terms, which they employed habitually with much precision.

1. For the perennial river, *Nâhâr* (נָהָר). Possibly used of the Jordan in Ps. lxvi. 6, lxxiv. 15; of the great Mesopotamian and Egyptian rivers generally in Gen. ii. 10, Ex. vii. 19; 2 K. xvii. 6; Ex. iii. 15, &c. But with the definite article, *han-Nahar*, "*the* river," it signifies invariably the Euphrates (Gen. xxxi. 21; Ex. xxiii. 31; Num. xxiv. 6; 2 Sam. x. 16, &c., &c.). With a few exceptions (Josh. i. 4, xxiv. 2, 14, 15; Is. lix. 19; Ex. xxxi. 15), *nâhâr* is uniformly rendered "river" in our version, and accurately, since it is never applied to the fleeting fugitive torrents of Palestine.

2. The term for these is *nachal* (נַחַל), for which our translators have used promiscuously, and sometimes almost alternately, "valley," "brook," and "river." Thus the "brook" and the "valley" of Eshcol (Num. xiii 23 and xxxii. 9); the "valley," the "brook," and the "river" Zered (Num. xxi. 12; Deut. ii. 13; Am. vi. 14); the "brook" and the "river" of Jabbok (Gen. xxxii. 23; Deut. ii. 37), of Arnon (Num. xxi. 14; Deut. ii. 24), of Kishon (Judg. iv. 7; 1 K. xviii. 40). Compare also Deut. iii. 16, &c.[a]

Neither of these words expresses the thing intended; but the term "brook" is peculiarly unhappy, since the pastoral idea which it conveys is quite at variance with the general character of the wadies of Palestine. Many of these are deep abrupt chasms or rents in the solid rock of the hills, and have a savage, gloomy aspect, far removed from that of an English brook. For example, the Arnon forces its way through a ravine several hundred feet deep and about two miles wide across the top. The *Wady Zerka*, probably the Jabbok, which Jacob was so anxious to interpose between his family and Esau, is equally unlike the quiet "meadowy brook" with which we are familiar. And those which are not so abrupt and savage are in their width, their irregularity, their forlorn arid look when the torrent has subsided, utterly unlike "brooks." Unfortunately our language does not contain any single word which has both the meanings of the Hebrew *nachal* and its Arabic equivalent *wady*, which can be used at once for a dry valley and for the stream which occasionally flows through it. Ainsworth, in his *Annotations* (on Num. xiii. 23), says that "bourne" has both meanings; but "bourne" is now obsolete in English, though still in use in Scotland, where, owing to the mountainous nature of the country, the "burns" partake of the nature of the wadies of Palestine in the irregularity of their flow. Mr. Burton (*Geog. Journ.* xxiv. 209) adopts the Italian *fiumara*. Others have proposed the Indian term *nullah*. The double application of the Hebrew *nachal* is evident in 1 K. xvii. 3, where Elijah is commanded to hide himself in (not by) the *nachal* Cherith and the brink of the *nachal*.

3. *Yeôr* (יְאוֹר), a word of Egyptian origin (see Gesen. *Thes.* p. 558), applied to the Nile only, and, in the plural, to the canals by which the Nile water was distributed throughout Egypt, or to streams having a connection with that country. It is the word employed for the Nile in Genesis and Exodus, and is rendered by our translators "the river," except in the following passages, Jer. xlvi. 7, 8; Am. viii. 8, ix. 5, where they substitute "a flood" — much to the detriment of the prophet's metaphor. [See NILE, vol. iii. p. 2140 *b*.]

4. *Yûbal* (יוּבָל), from a root signifying tumult or fullness, occurs only six times, in four of which it is rendered "river," namely, Jer. xvii. 8; Dan. viii. 2, 3, 6.

5. *Peleg* (פֶּלֶג), from an uncertain root, probably connected with the idea of the division of the land for irrigation, is translated "river" in Ps. i. 3, lxv. 9; Is. xxx. 25; Job xx. 17. Elsewhere it is rendered "stream" (Ps. xlvi. 4), and in Judg. v. 15, 16, "divisions," where the allusion is probably to the artificial streams with which the pastoral and agricultural country of Reuben was irrigated (Ewald, *Dichter*, i. 129; Gesen. *Thes.* p. 1103 *b*).

6. *Aphîk* (אֲפִיק). This appears to be used without any clearly distinctive meaning. It is probably from a root signifying strength or force, and may signify any rush or body of water. It is translated "river" in a few passages: Cant. v. 12; Ez. vi. 3, xxxi. 12, xxxii. 6, xxxiv. 13, xxxv. 8, xxxvi. 4, 6; Joel i. 20, iii. 18. In Ps. cxxvi. 4 the allusion is to temporary streams in the dry regions of the "south."[b] G.

**RIVER OF EGYPT.** Two Hebrew terms are thus rendered in the A. V.

1. נַהַר מִצְרַיִם: ποταμὸς Αἰγύπτου: *fluvius Ægypti* (Gen. xv. 18), "the river of Egypt," that is, the Nile, and here — as the western border of the Promised Land, of which the eastern border was Euphrates — the Pelusiac or easternmost branch.

---

[a] Jerome, in his *Quæstiones in Genesim*, xxv. 19, draws the following curious distinction between a valley and a torrent: "*Et hic pro valle torrens scriptus est, nunquam enim in valle invenitur puteus aquæ vivæ.*"

[b] It should be "river" (ποταμός) in both instances, Rev. xii. 15, 16, and not "flood" (A. V.). H

2. נַחַל מִצְרַיִם: χειμάρρους Αἰγύπτου, φάραγξ Αἰγύπτου, ποταμὸς Αἰγύπτου, Ῥινοκόρουρα, pl.: *torrens Ægypti, rivus Ægypti* (Num. xxxiv. 5; Josh. xv. 4, 47; 1 K. viii. 65; 2 K. xxiv. 7: Is. xxvii. 12, in the last passage translated "the stream of Egypt"). It is the common opinion that this second term designates a desert stream on the border of Egypt, still occasionally flowing in the valley called *Wâdi-l-'Areesh*. The centre of the valley is occupied by the bed of this torrent, which only flows after rains, as is usual in the desert valleys. The correctness of this opinion can only be decided by an examination of the passages in which the term occurs, for the ancient translations do not aid us. When they were made there must have been great uncertainty on the subject. In the LXX. the term is translated by two literal meanings, or perhaps three, but it is doubtful whether נַחַל can be rendered "river," and is once represented by Rhinocolura (or Rhinocorura), the name of a town on the coast, near the *Wâdi-l-'Areesh*, to which the modern *El-'Areesh* has succeeded.

This stream is first mentioned as the point where the southern border of the Promised Land touched the Mediterranean, which formed its western border (Num. xxxiv. 3–6). Next it is spoken of as in the same position with reference to the prescribed borders of the tribe of Judah (Josh. xv. 4), and as beyond Gaza and its territory, the westernmost of the Philistine cities (47). In the later history we find Solomon's kingdom extending "from the entering in of Hamath unto the river of Egypt" (1 K. viii. 65), and Egypt limited in the same manner where the loss of the eastern provinces is mentioned: "And the king of Egypt came not again any more out of his land: for the king of Babylon had taken from the river of Egypt unto the river Euphrates all that pertained to the king of Egypt" (2 K. xxiv. 7). In Isaiah it seems to be spoken of as forming one boundary of the Israelite territory, Euphrates being the other, "from the channel of the river unto the stream of Egypt" (xxvii. 12), appearing to correspond to the limits promised to Abraham.

In certain parallel passages the Nile is distinctly specified instead of "the Nachal of Egypt." In the promise to Abraham, the Nile, "the river of Egypt," is mentioned with Euphrates as bounding the land in which he then was, and which was promised to his posterity (Gen. xv. 18). Still more unmistakably is Shihor, which is always the Nile, spoken of as a border of the land, in Joshua's description of the territory yet to be conquered: 'This [is] the land that yet remaineth: all the regions of the Philistines, and all Geshuri, from the Sihor, which [is] before Egypt, even unto the borders of Ekron northward, [which] is counted to the Canaanite" (Josh. xiii. 2, 3).

It must be observed that the distinctive character of the name, "Nachal *of Egypt*," as has been well suggested to us, almost forbids our supposing an insignificant stream to be intended, although such a stream might be of importance from position as forming the boundary.

If we infer that the Nachal of Egypt is the Nile, we have to consider the geographical consequences, and to compare the name with known names of the Nile. Of the branches of the Nile, the easternmost, or Pelusiac, would necessarily be the one intended. On looking at the map it seems incredible that the Philistine territory should ever have extended so far; the *Wâdi-l-'Areesh* is distant from Gaza, the most western of the Philistine towns; but Pelusium, at the mouth and most eastern part of the Pelusiac branch, is very remote. It must, however, be remembered, that the tract from Gaza to Pelusium is a desert that could never have been cultivated, or indeed inhabited by a settled population, and was probably only held in the period to which we refer by marauding Arab tribes, which may well have been tributary to the Philistines, for they must have been tributary to them or to the Egyptians, on account of their isolated position and the sterility of the country, though no doubt maintaining a half-independence.[a] All doubt on this point seems to be set at rest by a passage, in a hieroglyphic inscription of Sethee I., head of the XIXth dynasty, B. C. cir. 1340, on the north wall of the great temple of El-Karnak, which mentions "the foreigners of the SHASU from the fort of TARU to the land of KANANA" (SHASU SHA'A EM SHTEM EN TARU ER PA-KAN'-ANA, Brugsch, *Geogr. Inschr.* i. p. 261, No. 1265, pl. xlvii.). The identification of "the fort of TARU" with any place mentioned by the Greek and Latin geographers has not yet been satisfactorily accomplished. It appears, from the bas-relief, representing the return of Sethee I. to Egypt from an eastern expedition, near the inscription just mentioned, to have been between a Leontopolis and a branch of the Nile, or perhaps canal, on the west side of which it was situate, commanding a bridge (*Ibid.* No. 1266, pl. xlviii.). The Leontopolis is either the capital of the Leontopolite Nome, or a town in the Heliopolite Nome mentioned by Josephus (*Ant.* xiii. 3, § 1). In the former case the stream would probably be the Tanitic branch, or perhaps the Pelusiac; in the latter, perhaps the Canal of the Red Sea. We prefer the first Leontopolis, but no identification is necessary to prove that the SHASU at this time extended from Canaan to the east of the Delta (see on the whole subject *Geogr. Inschr.* i. pp. 260–266, iii. pp. 20, 21).

Egypt, therefore, in its most flourishing period, evidently extended no further than the east of the Delta, its eastern boundary being probably the Pelusiac branch, the territory of the SHASU, an Arab nation or tribe, lying between Egypt and

[a] Herodotus, whose account is rather obscure, says that from Phœnicia to the borders of the city Cadytis (probably Gaza) the country belonged to the Palæstine Syrians; from Cadytis to Jenysus to the Arabian king; then to the Syrians again, as far as Lake Serbonis, near Mount Casius. At Lake Serbonis, Egypt began. The eastern extremity of Lake Serbonis is somewhat to the westward of Rhinocolura, and Mount Casius is more than half way from the latter to Pelusium. Herodotus afterwards states, more precisely, that from Jenysus to "Lake Serbonis and Mount Casius" was three days' journey through a desert without water. He evidently makes Mount Casius mark the western boundary of the Syrians; for although the position of Jenysus is uncertain, the whole distance from Gaza (and if Cadytis be not Gaza, we cannot extend the Arabian territory further east) does not greatly exceed three days' journey (iii. 5. See Rawlinson's edit. 398–400). If we adopt Capt. Spratt's identifications of Pelusium and Mount Casius we must place them much nearer together, and the latter far to the west of the usual supposed place (Sin town). But in this case Herodotus would intend the western extremity of Lake Serbonis, which seems very likely.

Digitized by Google

Canaan. It might be supposed that at this time the SHASU had made an inroad into Egypt, but it must be remembered that in the latter period of the kings of Judah, and during the classical period, Pelusium was the key of Egypt on this side. The Philistines, in the time of their greatest power, which appears to have been contemporary with the period of the Judges, may well be supposed to have reduced the Arabs of this neutral territory to the condition of tributaries, as doubtless was also done by the Pharaohs.

It must be remembered that the specification of a certain boundary does not necessarily prove that the actual lands of a state extended so far; the limit of its sway is sometimes rather to be understood. Solomon ruled as tributaries all the kingdoms between the Euphrates and the land of the Philistines and the border of Egypt, when the Land of Promise appears to have been fully occupied (1 K. iv. 21, comp. 24). When, therefore, it is specified that the Philistine territory as far as the Nachal-Mizraim remained to be taken, it need scarcely be inferred that the territory to be inhabited by the Israelites was to extend so far, and this stream's being an actual boundary of a tribe may be explained on the same principle.

If, with the generality of critics, we think that the Nachal-Mizraim is the *Wâdi-l-'Areesh*, we must conclude that the name Shihor is also applied to the latter, although elsewhere designating the Nile,[a] for we have seen that Nachal-Mizraim and Shihor are used interchangeably to designate a stream on the border of the Promised Land. This difficulty seems to overthrow the common opinion. It must, however, be remembered that in Joshua xiii. 3, Shihor has the article, as though actually or originally an appellative, the former seeming to be the more obvious inference from the context. [SHIHOR OF EGYPT; SIHOR.]

The word Nachal may be cited on either side. Certainly in Hebrew it is rather used for a torrent or stream than for a river; but the name Nachal-Mizraim may come from a lost dialect, and the parallel Arabic word *wâdee*, وادي though ordinarily used for valleys and their winter-torrents, as in the case of the *Wâdi-l-'Areesh* itself, has been employed by the Arabs in Spain for true rivers, the Guadalquivir, etc. It may, however, be suggested, that in Nachal-Mizraim we have the ancient form of the *Neel-Misr* of the Arabs, and that Nachal was adopted from its similarity of sound to the original of Νεῖλος. It may, indeed, be objected that Νεῖλος is held to be of Iranian origin. The answer to this is, that we find Javan, we will not say the Ionians, called by the very name, HANEN, used in the Rosetta Stone for "Greek" (SHAEE EN HANEN, ΤΟΙΣ ΤΕ ΕΛΛΗΝΙΚΟΙΣ ΓΡΑΜΜΑΣΙΝ), in the lists of countries and nations, or tribes, conquered by, or subject to, the Pharaohs, as early as the reign of Amenoph III., B. C. cir. 1400.[b] An Iranian and even a Greek connection with Egypt as early as the time of the Exodus, is therefore not to be treated as an impossibility. It is, however, remarkable, that the word Νεῖλος does not occur in the Homeric poems, as though it were not of Sanskrit origin, but derived from the Egyptians or Phœnicians.

Brugsch compares the Egyptian MUAW EN KEM "Water of Egypt," mentioned in the phrase "From the water of Egypt as far as NEHEREEN [Mesopotamia] inclusive," but there is no internal evidence in favor of his conjectural identification with the stream of *Wâdi-l-'Areesh* (*Geog. Inschr.* i. 54, 55, pl. vii. no. 303). R. S. P.

* Dr. J. L. Porter (*Handbook*, and Art. in Kitto's *Cyclop. of Bibl. Lit.*) proposes to solve the difficulty created by the terms *Nahar*-Mizraim and *Nachal*-Mizraim by making "the proper distinction between the country given in covenant promise to Abraham, and that actually allotted to the Israelites." The Nile may have been in contemplation in the original promise, and the term *Nahar*-Mizraim may have been "the designation of the Nile in Abraham's time, before the Egyptian word *yeôr* became known."

*Nachal* is commonly used in the Hebrew Scriptures in its primary meaning of a "torrent" or an intermittent brook — as Job vi. 15, the brook that dries away, Is. xv. 7, and Amos. vi. 14, the brook of the desert, the wady lying between Kerek and Gebal — and it is highly improbable that this term would have been chosen to designate the vast and ceaseless volume of the Nile. Robinson (*Phys. Geog. of the Holy Land*, p. 123) gives his mature opinion in favor of the rendering "*torrent* of Egypt, which of old was the boundary between Palestine and Egypt. At the present day it is called *Wady el-'Arish*; and comes from the passes of *Jebel et-Tih* towards Sinai, draining the great central longitudinal basin of the desert. It reaches the sea without a permanent stream; and is still the boundary between the two countries. Near its mouth is a small village, *el-'Arish*, on the site of the ancient *Rhinocolura*, as is shown by columns and other Roman remains."

Upon the whole the probabilities are in favor of this identification, and the weight of authority is upon its side. J. P. T.

* **RIVERS OF WATER.** [FOOT, WATERING WITH THE.]

**RIZPAH** (רִצְפָּה: Ῥεσφά; [Alex. in 2 Sam. xxi. 8, Ῥεφφαθ;] Joseph. Ῥασφά: *Respha*), concubine to king Saul, and mother of his two sons Armoni and Mephibosheth. Like many others of the prominent female characters of the Old Testament — Ruth, Rahab, Jezebel, etc. — Rizpah would seem to have been a foreigner, a Hivite, descended from one of the ancient worthies of that nation, Ajah or Aiah,[c] son of Zibeon, whose name and

[a] There is a Shihor-libnath in the north of Palestine, mentioned in Joshua (xix. 26), and supposed to correspond to the Belus, if its name signify "the river of glass." But we have no ground for giving Shihor the signification "river;" and when the connection of the Egyptians, and doubtless of the Phœnician and other colonists of northeastern Egypt, with the manufacture of glass is remembered, it seems more likely that Shihor-libnath was named from the Nile.

[b] We agree with Lepsius in this identification (*Ueber Namen der Ionier auf den Ägypt. Denkmälern*, Königl. Akad. Berlin). His views have, however, been combated by Bunsen (*Egypt's Place*, iii. 603–606), Brugsch (*Geogr. Inschr.* ii. 19, pl. xiii. no. 2), and De Rougé (*Tombeau d'Ahmes*, p. 48).

[c] The Syriac-Peshito and Arabic Versions, in 2 Sam iii., read Ana for Aiah — the name of another ancient Hivite, the brother of Ajah, and equally the son of Zibeon. But it is not fair to lay much stress on this, as it may be only the error — easily made — of a co-

fame are preserved in the Ishmaelite record of Gen. xxxvi. If this be the case, Saul was commencing a practice, which seems with subsequent kings to have grown almost into a rule, of choosing non-Israelite women for their inferior wives. David's intrigue with Bathsheba, or Bath-shua, the wife of a Hittite, and possibly herself a Canaanitess,[a] is perhaps not a case in point; but Solomon, Rehoboam, and their successors, seem to have had their harems filled with foreign women.

After the death of Saul and occupation of the country west of the Jordan by the Philistines, Rizpah accompanied the other inmates of the royal family to their new residence at Mahanaim; and it is here that her name is first introduced to us as the subject of an accusation leveled at Abner by Ishbosheth (2 Sam. iii. 7), a piece of spite which led first to Abner's death through Joab's treachery, and ultimately to the murder of Ishbosheth himself. The accusation, whether true or false — and from Abner's vehement denial we should naturally conclude that it was false — involved more than meets the ear of a modern and English reader. For amongst the Israelites it was considered "as a step to the throne to have connection with the widow or the mistress of the deceased king." (See Michaelis, *Laws of Moses*, art. 64.) It therefore amounted to an insinuation that Abner was about to make an attempt on the throne.

We hear nothing more of Rizpah till the tragic story which has made her one of the most familiar objects to young and old in the whole Bible (2 Sam. xxi. 8–11). Every one can appreciate the love and endurance with which the mother watched over the bodies of her two sons and her five relatives, to save them from an indignity peculiarly painful to the whole of the ancient world (see Ps. lxxix. 2; Hom. *Il.* i. 4, 5, &c., &c.). But it is questionable whether the ordinary conception of the scene is accurate. The seven victims were not, as the A. V. implies, "hung;" they were crucified. The seven crosses were planted in the rock on the top of the sacred hill of Gibeah; the hill which, though not Saul's native place,[b] was through his long residence there so identified with him as to retain his name to the latest existence of the Jewish nation (1 Sam. xi. 4, &c., and see Joseph. *B. J.* v. 2, § 1). The whole or part of this hill seems at the time of this occurrence to have been in some special manner[c] dedicated to Jehovah, possibly the spot on which Ahiah the priest had deposited the Ark when he took refuge in Gibeah during the Philistine war (1 Sam. xiv. 18). The victims were sacrificed at the beginning of barley-harvest — the sacred and festal time of the Passover — and in the full blaze of the summer sun they hung till the fall of the periodical rain in October. During the whole of that time Rizpah remained at the foot of the crosses on which the bodies of her sons were exposed: the *Mater dolorosa*, if the expression may be allowed, of the ancient dispensation. She had no tent to shelter her from the scorching sun which beats on that open spot all day, or from the drenching dews at night, but she spread on the rocky floor the thick mourning garment of black sackcloth[d] which as a widow she wore, and crouching there she watched that neither vulture nor jackal should molest the bodies. We may surely be justified in applying to Rizpah the words with which another act of womanly kindness was commended, and may say, that "wheresoever the Bible shall go, there shall also this, that this woman hath done, be told for a memorial of her." G.

**ROAD.** This word occurs but once in the Authorized Version of the Bible, namely, in 1 Sam. xxvii. 10, where it is used in the sense of "raid" or "inroad," the Hebrew word (פָּשְׁטָה) being elsewhere (*e. g.* ver. 8, xxiii. 27, xxx. 1, 14, &c.) rendered "invade" and "invasion."

A road in the sense which we now attach to the term is expressed in the A. V. by "way" and "path." [WAY.] G.

* **ROBBERS.** [CHURCHES, ROBBERS OF; THIEVES.]

**ROBBERY.**[e] Whether in the larger sense of plunder, or the more limited sense of theft, systematically organized, robbery has ever been one of the principal employments of the nomad tribes of the East. From the time of Ishmael to the present day, the Bedouin has been a "wild man," and a robber by trade, and to carry out his objects suc-

less transcriber; or of one so familiar with the ancient names as to have confounded one with the other.

[a] Comp. Gen. xxxviii., where the "daughter of Shua," the Canaanitess, should really be Bath-shua.

[b] Saul was probably born at Zelah, where Kish's sepulchre, and therefore his home, was situated. [ZELAH.]

[c] עֲזֵרָה, 2 Sam. xxi. 6.

[d] שַׂק, *hair-Sak.*

[e] 1. גָּזֵל: ἁρπαγή, ἁρπάγματα: *rapina.*

2. פָּרַק, from פָּרַר, "break:" ἁδικία: *dilacerantio.*

3. שֹׁד, from שָׁדַד, "waste:" ὄλεθρος: *rapina.*

4. שָׁלָל: προνομή: *praeda*: "prey," "spoil." [SCOTT.]

(2.) ROBBER:—

1. בּוֹזֵז, part. from בָּזַז, "rob:" προνομεύων: *astans.*

2. פָּרִיץ, past. of פָּרַץ, "break:" λοιμός: *latro*: Ps. lxxxix. 32, "breaker."

3. צָמִים, Job xviii. 9: διψῶντες: *sitis.* Targum with A. V., has "robbers;" but it is most commonly rendered as LXX., Job v. 5, *sitientes.*

4. שׁוֹדֵד: λῃστής: *latro*: from שָׁדַד, "waste."

5. שׁוֹסֵס: ἁρπάζων: *direptor*: A. V. "spoiler."

6. גַּנָּב: κλέπτης: *fur*: A. V. "thief."

(3.) ROB:—

1. בָּזַז: διαρπάζω: *depopulor.*

2. גָּזַל: ἁφαιρέω: *violenter aufero.*

3. עוּר, "return," "repeat;" hence in Pi. surround, circumvent (Ps. cxix. 61): περιπλακῆναι: *circumplecti*; usually affirm, reiterate assertions (Gen. p. 977).

4. חָבֵץ, "cover," "hide:" περιαρπάζω: *affligo* (Gen. p. 1190).

5. שָׁסַס: διαρπάζω: *diripio.*

6. שָׁסָס (same as last): προνομεύω: *depraedor.*

7. גָּנַב: κλέπτω: *furor.* A. V. "steal."

successfully, so far from being esteemed disgraceful, is regarded as in the highest degree creditable (Gen. xvi 12: Burckhardt, *Notes on Bed.* i. 137, 157). An instance of an enterprise of a truly Bedouin character, but distinguished by the exceptional features belonging to its principal actor, is seen in the night-foray of David (1 Sam. xxvi. 6-12), with which also we may fairly compare Hom. *Il.* K. 204, &c. Predatory inroads on a large scale are seen in the incursions of the Sabæans and Chaldæans on the property of Job (Job i. 15, 17); the revenge coupled with plunder of Simeon and Levi (Gen. xxxiv. 28, 29); the reprisals of the Hebrews upon the Midianites (Num. xxxi. 32–54), and the frequent and often prolonged invasions of "spoilers" upon the Israelites, together with their reprisals, during the period of the Judges and Kings (Judg. ii. 14, vi. 3, 4; 1 Sam. xi., xv.; 2 Sam. viii., x.; 2 K. v. 2; 1 Chr. v. 10, 18–22). Individual instances, indicating an unsettled state of the country during the same period, are seen in the "liers-in-wait" of the men of Shechem (Judg. ix. 25), and the mountain retreats of David in the cave of Adullam, the hill of Hachilah, and the wilderness of Maon, and his abode in Ziklag, invaded and plundered in like manner by the Amalekites (1 Sam. xxii. 1, 2, xxiii. 19–25, xxvi. 1, xxvii. 6–10, xxx. 1).

Similar disorder in the country, complained of more than once by the prophets (Hos. iv. 2, vi. 9; Mic. ii. 8), continued more or less through Maccabæan down to Roman times, favored by the corrupt administration of some of the Roman governors, in accepting money in redemption of punishment, produced those formidable bands of robbers, so easily collected and with so much difficulty subdued, who found shelter in the caves of Palestine and Syria, and who infested the country even in the time of our Lord, almost to the very gates of Jerusalem (Luke x. 30; Acts v. 36, 37, xxi. 38). [JUDAS OF GALILEE; CAVES.] In the later history also of the country the robbers, or sicarii, together with their leader, John of Gischala, played a conspicuous part (Joseph. *B. J.* iv. 2, § 1; 3, § 4; 7, § 2).

The Mosaic law on the subject of theft is contained in Ex. xxii., and consists of the following enactments: —

1. He who stole and killed an ox or a sheep, was to restore five oxen for the ox, and four sheep for the sheep.

2. If the stolen animal was found alive the thief was to restore double.

3. If a man was found stealing in a dwelling-house at night, and was killed in the act, the homicide was not held guilty of murder.

4. If the act was committed during daylight, the thief might not be killed, but was bound to make full restitution or be sold into slavery.

5. If money or goods deposited in a man's house were stolen therefrom, the thief, when detected, was to pay double: but

6. If the thief could not be found, the master of the house was to be examined before the judges.

7. If an animal given in charge to a man to keep were stolen from him, i. e. through his negligence, he was to make restitution to the owner. [OATH.]

There seems no reason to suppose that the law underwent any alteration in Solomon's time, as Michaelis supposes; the expression in Prov. vi. 30, 31, is, that a thief detected in stealing should restore sevenfold, i. e. to the full amount, and for this purpose, even give all the substance of his house, and thus in case of failure be liable to servitude (Michaelis, *Laws of Moses*, § 284). On the other hand, see Bertheau on Prov. vi.; and Keil, *Arch. Hebr* § 154. Man-stealing was punishable with death (Ex. xxi. 16; Deut. xxiv. 7). Invasion of right in land was strictly forbidden (Deut. xxvii. 17; Is v. 8; Mic. ii. 2).

The question of sacrilege does not properly come within the scope of the present article. H. W. P.

* ROBE. [MANTLE.]

ROB'OAM (Ῥοβοάμ: *Roboam*), Ecclus. xlvii 23; Matt. i. 7. [REHOBOAM.]

ROE, ROEBUCK (צְבִי, *tsĕbi* (m.); צְבִיָּה, *tsĕbiyyâh* (f.): δορκάς, δόρκων, δορκάδιον: *caprea, damula*). There seems to be little or no doubt that the Hebrew word, which occurs frequently in the O. T., denotes some species of antelope, probably the *Gazella dorcas*, a native of Egypt and North Africa, or the *G. Arabica* of Syria and Arabia, which appears to be a variety only of the *dorcas*. The gazelle was allowed as food (Deut. xii. 15, 22, etc.); it is mentioned as very fleet of foot (2 Sam. ii. 18; 1 Chr. xii. 8); it was hunted (Is. xiii. 14; Prov. vi. 5); it was celebrated for its loveliness (Cant. ii. 9, 17, viii. 14). The gazelle is found in Egypt, Barbary, and Syria. Stanley, (*S. & P.* p. 207) says that the signification of the word Ajalon, the valley "of stags," is still justified by "the gazelles which the peasants hunt on its mountain slopes." Thomson (*The Land and the Book*, p. 172) says that the mountains of Naphtali "abound in gazelles to this day."

*Gazella Arabica.*

The ariel gazelle (*G. Arabica*), which, if not a different species, is at least a well-marked variety of the *dorcas*, is common in Syria, and is hunted by the Arabs with a falcon and a greyhound; the repeated attacks of the bird upon the head of the animal so bewilder it that it falls an easy prey to the greyhound, which is trained to watch the flight of the falcon. Many of these antelopes are also taken in pitfalls into which they are driven by the shouts of the hunters. The large, full, soft eye of the gazelle has long been the theme of oriental praises. W. H.

ROG'ELIM (רֹגְלִים [*fuller's place*, Ges.]. [Rom. Ῥωγελλίμ; Vat.] Ῥωγελειμ, and so Alex., though once Ῥωγελειμ: *Rogelim*). The residence of Barzillai the Gileadite (2 Sam. xvii. 27, xix. 31) in the highlands east of the Jordan. It is men-

Digitized by Google

tioned on this occasion only. Nothing is said to guide us to its situation, and no name at all resembling it appears to have been hitherto discovered on the spot.

If interpreted as Hebrew the name is derivable from *regel*, the foot, and signifies the "fullers" or "washers," who were in the habit (as they still are in the East) of using their feet to tread the cloth which they are cleansing. But this is extremely uncertain. The same word occurs in the name EN-ROGEL. G.

**ROH'GAH** (רוֹהֻגָה, *Cethib*, רָהֻגָּה, *Keri* [*outcries*]: Ῥοογά; Alex. Ουραογα: *Roiga*). An Asherite, of the sons of Shamer (1 Chr. vii. 34).

**ROIMUS** (Ῥοίμος). REHUM 1 (1 Esdr. v. 8). The name is not traceable in the Vulgate.

**ROLL** (מְגִלָּה: κεφαλίς). A book in ancient times consisted of a single long strip of paper or parchment, which was usually kept rolled up on a stick, and was unrolled when a person wished to read it. Hence arose the term *megillah*, from *gâlal*,[a] "to roll," strictly answering to the Latin *volumen*, whence comes our *volume*; hence also the expressions, "to spread" and "roll together,"[b] instead of "to open" and "to shut" a book. The full expression for a book was "a roll of writing," or "a roll of a book" (Jer. xxxvi. 2; Ps. xl. 7; Ez. ii. 9), but occasionally "roll" stands by itself (Zech. v. 1, 2; Ezr. vi. 2). The κεφαλίς of the LXX. originally referred to the ornamental knob (the *umbilicus* of the Latins) at the top of the stick or cylinder round which the roll was wound. The use of the term *megillah* implies, of course, the existence of a soft and pliant material: what this material was in the Old Testament period, we are not informed; but as a knife was required for its destruction (Jer. xxxvi. 23), we infer that it was parchment. The roll was usually written on one side only (Mishn. *Erub.* 10, § 3), and hence the particular notice of one that was "written within and without" (Ez. ii. 10). The writing was arranged in columns, resembling a door in shape, and hence deriving their Hebrew name,[c] just as "column," from its resemblance to a *columna* or pillar. It has been asserted that the term *megillah* does not occur before the 7th cent. B. C., being first used by Jeremiah (Hitzig, *in Jer.* xxxvi. 2); and the conclusion has been drawn that the use of such materials as parchment was not known until that period (Ewald, *Gesch.* i. 71, *note*; Gesen. *Thes.* p. 289). This is to assume, perhaps too confidently, a late date for the composition of Ps. xl., and to ignore the collateral evidence arising out of the expression "roll together" used by Is. xxxiv. 4, and also out of the probable reference to the Pentateuch in Ps. xl. 7, "the roll of the book," a copy of which was deposited by the side of the Ark (Deut. xxxi. 26). We may here add that the term in Is. viii. 1, rendered in the A. V. "roll," more correctly means *tablet*. W. L. B.

* "Flying roll" (Zech. v. 1, 2) means a book or parchment rolled up, represented in the prophet's vision as seen borne through the air. It was an expressive symbol of Jehovah's judgments written out as it were, and decreed, which at his bidding would descend and sweep away the ungodly. See Keil, *Die Kleinen Propheten*, p. 560 f. (1866). H

* **ROLLER** (רְהִיט, from a verb = "*to bind*") = bandage, so called from its form as a roll, Ezek. xxx. 21. The prophet declares that the arm of Pharaoh should be broken and no art or appliance of surgery could enable it to wield again the sword of the oppressor. H.

**ROMAMTI-E'ZER** (רוֹמַמְתִּי עֶזֶר: Ῥομεθι-έζερ; [Vat. Ῥομει, Ῥομελχεισθ;] Alex. Ῥομεμθι-εζερ in 1 Chr. xxv. 4, but Ῥομεθ-μιέζερ in 1 Chr. xxv. 31: *Romemthiezer*). One of the fourteen sons of Heman, and chief of the 24th division of the singers in the reign of David (1 Chr. xxv. 4, 31). [HOTHIR, Amer. ed.]

* **ROMAN CITIZENSHIP.** [CITIZENSHIP.]

**ROMAN EMPIRE.** The history of the Roman Empire, properly so called, extends over a period of rather more than five hundred years, namely, from the battle of Actium, B. C. 31, when Augustus became sole ruler of the Roman world, to the abdication of Augustulus, A. D. 476. The Empire, however, in the sense of the dominion of Rome over a large number of conquered nations, was in full force and had reached wide limits some time before the monarchy of Augustus was established. The notices of Roman history which occur in the Bible are confined to the last century and a half of the commonwealth and the first century of the imperial monarchy.

The first historic mention of Rome in the Bible is in 1 Macc. i. 10. Though the date of the foundation of Rome coincides nearly with the beginning of the reign of Pekah in Israel, it was not till the beginning of the 2d century B. C. that the Romans had leisure to interfere in the affairs of the East. When, however, the power of Carthage had been effectually broken at Zama, B. C. 202, Roman arms and intrigues soon made themselves felt throughout Macedonia, Greece, and Asia Minor. About the year 161 B. C. Judas Maccabæus heard of the Romans as the conquerors of Philip, Perseus, and Antiochus (1 Macc. viii. 5, 6). "It was told him also how they destroyed and brought under their dominion all other kingdoms and isles that at any time resisted them, but with their friends and such as relied upon them they kept amity" (viii. 11, 12). In order to strengthen himself against Demetrius king of Syria he sent ambassadors to Rome (viii. 17), and concluded a defensive alliance with the senate (viii. 22–32). This was renewed by Jonathan (xii. 1) and by Simon (xv. 17; Joseph. *Ant.* xii. 10, § 6, xiii. 5, § 8; 7, § 3). Notices of the embassy sent by Judas, of a tribute paid to Rome by the Syrian king, and of further intercourse between the Romans and the Jews, occur in 2 Macc. iv. 11, viii. 10, 36, xi. 34. In the

course of the narrative mention is made of the Roman senate (τὸ βουλευτήριον, 1 Macc. xii. 3), of the consul Lucius (ὁ ὕπατος, 1 Macc. xv. 15, 16), and the Roman constitution is described in a somewhat distorted form (1 Macc. viii. 14–16).

The history of the Maccabæan and Idumæan dynasties forms no part of our present subject. [MACCABEES; HEROD.] Here a brief summary of the progress of Roman dominion in Judæa will suffice.

In the year 65 B. C., when Syria was made a Roman province by Pompey, the Jews were still governed by one of the Asmonæan princes. Aristobulus had lately driven his brother Hyrcanus from the chief priesthood, and was now in his turn attacked by Aretas, king of Arabia Petræa, the ally of Hyrcanus. Pompey's lieutenant, M. Æmilius Scaurus, interfered in the contest B. C. 64, and the next year Pompey himself marched an army into Judæa and took Jerusalem (Joseph. *Ant.* xiv. 2, 3, 4; *B. J.* i. 6, 7). From this time the Jews were practically under the government of Rome. Hyrcanus retained the high-priesthood and a titular sovereignty, subject to the watchful control of his minister Antipater, an active partisan of the Roman interests. Finally, Antipater's son, Herod the Great, was made king by Antony's interest, B. C. 40, and confirmed in the kingdom by Augustus, B. C. 30 (Joseph. *Ant.* xiv. 14, xv. 6). The Jews, however, were all this time tributaries of Rome, and their princes in reality were mere Roman procurators. Julius Cæsar is said to have exacted from them a fourth part of their agricultural produce in addition to the tithe paid to Hyrcanus (*Ant.* xiv. 10, § 6). Roman soldiers were quartered at Jerusalem in Herod's time to support him in his authority (*Ant.* xv. 3, § 7). Tribute was paid to Rome, and an oath of allegiance to the emperor as well as to Herod appears to have been taken by the people (*Ant.* xvii. 2, § 2). On the banishment of Archelaus, A. D. 6, Judæa became a mere appendage of the province of Syria, and was governed by a Roman procurator, who resided at Cæsarea. Galilee and the adjoining districts were still left under the government of Herod's sons and other petty princes, whose dominions and titles were changed from time to time by successive emperors: for details see HEROD.

Such were the relations of the Jewish people to the Roman government at the time when the N. T. history begins. An ingenious illustration of this state of things has been drawn from the condition of British India. The Governor General at Calcutta, the subordinate governors at Madras and Bombay, and the native princes, whose dominions have been at one time enlarged, at another incorporated with the British presidencies, find their respective counterparts in the governor of Syria at Antioch, the procurators of Judæa at Cæsarea, and the members of Herod's family, whose dominions were alternately enlarged and suppressed by the Roman emperors (Conybeare and Howson, *Life of St. Paul*, i. 27). These and other characteristics of Roman rule come before us constantly in the N. T. Thus we hear of Cæsar the sole king (John xix. 15) — of Cyrenius, "governor of Syria" (Luke ii. 2) — of Pontius Pilate, Felix, and Festus, the "governors," i. e. procurators, of Judæa — of the "tetrarchs" Herod, Philip, and Lysanias (Luke iii. 1) — of "king Agrippa" (Acts xxv. 13) — of Roman soldiers, legions, centurions, publicans — of the tribute-money (Matt. xxii. 19) — the taxing of "the whole world" (Luke ii. 1) — Italian and Augustan cohorts (Acts x. 1, xxvii. 1) — the appeal to Cæsar (Acts xxv. 11). Three of the Roman emperors are mentioned in the N. T. — Augustus (Luke ii. 1), Tiberius (Luke iii. 1), and Claudius (Acts xi. 28, xviii. 2). Nero is alluded to under various titles, as Augustus (Σεβαστός) and Cæsar (Acts xxv. 10, 11, 21, 25; Phil. iv. 22), as ὁ κύριος, "my lord" (Acts xxv. 26), and apparently in other passages (1 Pet. ii. 17; Rom. xiii. 1). Several notices of the provincial administration of the Romans and the condition of provincial cities occur in the narrative of St. Paul's journeys (Acts xiii. 7, xvi. 12, 35, 38, xviii. 12, xix. 38).

In illustration of the sacred narrative it may be well to give a general account, though necessarily a short and imperfect one, of the position of the emperor, the extent of the empire, and the administration of the provinces in the time of our Lord and his Apostles. Fuller information will be found under special articles.

I. When Augustus became sole ruler of the Roman world he was in theory simply the first citizen of the republic, entrusted with temporary powers to settle the disorders of the State. Tacitus says that he was neither king nor dictator, but "prince" (Tac. *Ann.* i. 9), a title implying no civil authority, but simply the position of chief member of the senate (princeps senatus). The old magistracies were retained, but the various powers and prerogatives of each were conferred upon Augustus, so that while others commonly bore the chief official titles, Augustus had the supreme control of every department of the state. Above all he was the Emperor (Imperator). This word, used originally to designate any one entrusted with the imperium, or full military authority over a Roman army, acquired a new significance when adopted as a permanent title by Julius Cæsar. By his use of it as a constant prefix to his name in the city and in the camp he openly asserted a paramount military authority over the state. Augustus, by resuming it, plainly indicated, in spite of much artful concealment, the real basis on which his power rested, namely, the support of the army (Merivale, *Roman Empire*, vol. iii.). In the N. T. the emperor is commonly designated by the family name "Cæsar," or the dignified and almost sacred title "Augustus" (for its meaning, comp. Ovid, *Fasti*, i. 609). Tiberius is called by implication ἡγεμών in Luke iii. 1, a title applied in the N. T. to Cyrenius, Pilate, and others. Notwithstanding the despotic character of the government, the Romans seem to have shrunk from speaking of their ruler under his military title (see Merivale, *Rom. Empire*, iii. 452, and *note*) or any other avowedly despotic appellation. The use of the word ὁ κύριος, *dominus*, "my lord," in Acts xxv. 26, marks the progress of Roman servility between the time of Augustus and Nero. Augustus and Tiberius refused this title. Caligula first bore it (see Alford's note in *l. c.*: Ovid, *Fast.* ii. 142). The term βασιλεύς, "king," in John xix. 15, 1 Pet. ii. 17, cannot be closely pressed.

The Empire was nominally elective (Tac. *Ann.* xiii. 4); but practically it passed by adoption (see Galba's speech in Tac. *Hist.* i. 15), and till Nero's time a sort of hereditary right seemed to be recognised. The dangers inherent in a military government were, on the whole, successfully averted till the death of Pertinax, A. D. 193 (Gibbon, ch. iii. p. 80) but outbreaks of military violence were not wanting in this earlier period (comp. Wenck's note

Digitized by Google

as Gibbon, *l. c.*). The army was systematically bribed by donatives at the commencement of each reign, and the mob of the capital continually fed and amused at the expense of the provinces. We are reminded of the insolence and avarice of the soldiers in Luke iii. 14. The reigns of Caligula, Nero, and Domitian show that an emperor might shed the noblest blood with impunity, so long as he abstained from offending the soldiery and the populace.

II. *Extent of the Empire.* — Cicero's description of the Greek states and colonies as a "fringe on the skirts of barbarism" (Cic. *De Rep.* ii. 4) has been well applied to the Roman dominions before the conquests of Pompey and Cæsar (Merivale, *Rom. Empire*, iv. 409). The Roman Empire was still confined to a narrow strip encircling the Mediterranean Sea. Pompey added Asia Minor and Syria. Cæsar added Gaul. The generals of Augustus overran the N. W. portion of Spain and the country between the Alps and the Danube. The boundaries of the empire were now the Atlantic on the W., the Euphrates on the E., the deserts of Africa, the cataracts of the Nile, and the Arabian deserts on the S., the British Channel, the Rhine, the Danube, and the Black Sea on the N. The only subsequent conquests of importance were those of Britain by Claudius, and of Dacia by Trajan. The only independent powers of importance were the Parthians on the E. and the Germans on the N.

The population of the empire in the time of Augustus has been calculated at 85,000,000 (Merivale, *Rom. Empire*, iv. 442–450). Gibbon, speaking of the time of Claudius, puts the population at 120,000,000 (*Decline and Fall*, ch. ii.). Count Franz de Champagny adopts the same number for the reign of Nero (*Les Césars*, ii. 428). All these estimates are confessedly somewhat uncertain and conjectural.[a]

This large population was controlled in the time of Tiberius by an army of 25 legions, exclusive of the prætorian guards and other cohorts in the capital. The soldiers who composed the legions may be reckoned in round numbers at 170,000 men. If we add to these an equal number of auxiliaries (Tac. *Ann.* iv. 5) we have a total force of 340,000 men. The prætorian guards may be reckoned at 10,000 (Dion Cass. lv. 24). The other cohorts would swell the garrison at Rome to 15,000 or 16,000 men. For the number and stations of the legions in the time of Tiberius, comp. Tac. *Ann.* iv. 5.

The navy may have contained about 21,000 men (*Les Césars*, ii. 429; comp. Merivale, iii. 534). The legion, as appears from what has been said, must have been "more like a brigade than a regiment," consisting as it did of more than 6,000 infantry with cavalry attached (Conybeare and Howson, ii. 285). For the "Italian and Augustan bands" (Acts x. 1, xxvii. 1) see ARMY, vol. i. p. 164 [and ITALIAN BAND, Amer. ed.].

III. *The Provinces.* — The usual fate of a country conquered by Rome was to become a subject province, governed directly from Rome by officers sent out for that purpose. Sometimes, however, as we have seen, petty sovereigns were left in possession of a nominal independence on the borders, or within the natural limits, of the province. Such a system was useful for rewarding an ally, for employing a busy ruler, for gradually accustoming a stubborn people to the yoke of dependence. There were differences too in the political condition of cities within the provinces. Some were free cities, *i. e.*, were governed by their own magistrates, and were exempted from occupation by a Roman garrison. Such were Tarsus, Antioch in Syria, Athens, Ephesus, Thessalonica. See the notices of the "Politarchs" and "Demos" at Thessalonica, Acts xvii. 5–8, the "town-clerk" and the assembly at Ephesus, Acts xix. 35, 39 (C. and H *Life of St. Paul* i. 357, ii. 79). Occasionally but rarely, free cities were exempted from taxation. Other cities were "Colonies," *i. e.* communities of Roman citizens transplanted, like garrisons of the imperial city, into a foreign land Such was Philippi (Acts xvi. 12). Such, too, were Corinth, Troas, the Pisidian Antioch. The inhabitants were for the most part Romans (Acts xvi. 21), and their magistrates delighted in the Roman title of Prætor (*στρατηγός*), and in the attendance of lictors (*ῥαβδοῦχοι*), Acts xvi. 35. (C. and H. i. 315.)

Augustus divided the provinces into two classes, (1) Imperial, (2) Senatorial; retaining in his own hands, for obvious reasons, those provinces where the presence of a large military force was necessary, and committing the peaceful and unarmed provinces to the Senate. The Imperial provinces at first were — Gaul, Lusitania, Syria, Phœnicia, Cilicia, Cyprus, and Ægypt. The Senatorial provinces were Africa, Numidia, Asia, Achæa and Epirus, Dalmatia, Macedonia, Sicily, Crete and Cyrene, Bithynia and Pontus, Sardinia, Bætica (Dion C. liii. 12). Cyprus and Gallia Narbonensis were subsequently given up by Augustus, who in turn received Dalmatia from the Senate. Many other changes were made afterwards. The N. T. writers invariably designate the governors of Senatorial provinces by the correct title of *ἀνθύπατοι*, proconsuls (Acts xiii. 7, xviii. 12, xix. 38). [CYPRUS.] For the governor of an Imperial province, properly styled "Legatus Cæsaris" (*πρεσβευτής*), the word *ἡγεμών* (Governor) is used in the N. T.

The provinces were heavily taxed for the benefit of Rome and her citizens. "It was as if England were to defray the expenses of her own administration by the proceeds of a tax levied on her Indian empire" (Liddell, *Hist. of Rome*, i. 448). In old times the Roman revenues were raised mainly from three sources: (1.) The domain lands: (2.) A direct tax (tributum) levied upon every citizen; (3.) From customs, tolls, harbor duties, etc. The agrarian law of Julius Cæsar is said to have extinguished the first source of revenue (Cic. *ad Att.* ii. xvi.; Dureau de la Malle, ii. 430). Roman citizens had ceased to pay direct taxes since the conquest of Macedonia, B. C. 167 (Cic. *de Off.* ii. 22; Plut. *Æmil. Paul.* 38), except in extraordinary emergencies. The main part of the Roman revenue was now drawn from the provinces by a direct tax (*κῆνσος*, *φόρος*, Matt. xxii. 17, Luke xx. 22), amounting probably to from 5 to 7 per cent. on the estimated produce of the soil (Dureau de la Malle, ii. 418). The indirect taxes too (*τέλη*, *vectigalia*, Matt. xvii. 25; Dureau de la Malle, ii. 449) appear to have been very heavy (*Ibid.* ii. 438, 448). Augustus on coming to the empire found the regular sources of revenue impaired, while his expenses must have been very great. To say nothing of the

Digitized by Google

say of the army, he is said to have supported no less than 200,000 citizens in idleness by the miserable system of public gratuities. Hence the necessity of a careful valuation of the property of the whole empire, which appears to have been made more than once in his reign. [CENSUS.] For the historical difficulty about the taxing in Luke ii. 1, see CYRENIUS. Augustus appears to have raised both the direct and indirect taxes (Dureau de la Malle, ii. 433, 448).

The provinces are said to have been better governed under the Empire than under the Commonwealth, and those of the emperor better than those of the Senate (Tac. *Ann.* i. 76, iv. 6; Dion, liii. 14). Two important changes were introduced under the Empire. The governors received a fixed pay, and the term of their command was prolonged (Joseph. *Ant.* xviii. 6, § 5). But the old mode of levying the taxes seems to have been continued. The companies who farmed the taxes, consisting generally of knights, paid a certain sum into the Roman treasury, and proceeded to wring what they could from the provincials, often with the connivance and support of the provincial governor. The work was done chiefly by underlings of the lowest class (portitores). These are the publicans of the N. T.

On the whole it seems doubtful whether the wrongs of the provinces can have been materially alleviated under the imperial government. It is not likely that such rulers as Caligula and Nero would be scrupulous about the means used for replenishing their treasury. The stories related even of the reign of Augustus show how slight were the checks on the tyranny of provincial governors. See the story of Licinus in Gaul (*Dict. of Gr. and Rom. Biog.* sub voce), and that of the Dalmatian chief (Dion, lv.). The sufferings of St. Paul, protected as he was to a certain extent by his Roman citizenship, show plainly how little a provincial had to hope from the justice of a Roman governor.

It is impossible here to discuss the difficult question relating to Roman provincial government raised on John xviii. 31. It may be sufficient here to state, that according to strict Roman law the Jews would lose the power of life and death when their country became a province, and there seems no sufficient reason to depart from the literal interpretation of the verse just cited. See Alford, *in l. c.* On the other side see Biscoe, *On the Acts*, p. 113.

The condition of the Roman Empire at the time when Christianity appeared has often been dwelt upon, as affording obvious illustrations of St. Paul's expression that the "fullness of time had come" (Gal. iv. 4). The general peace within the limits of the Empire, the formation of military roads, the suppression of piracy, the march of the legions, the voyages of the corn fleets, the general increase of traffic, the spread of the Latin language in the West as Greek had already spread in the East, the external unity of the Empire, offered facilities hitherto unknown for the spread of a world-wide religion. The tendency, too, of a despotism like that of the Roman Empire to reduce all its subjects to a dead level, was a powerful instrument in breaking down the pride of privileged races and national religions, and familiarizing men with the truth that "God hath made of one blood all nations on the face of the earth" (Acts xvii. 24, 26). But still more striking than this outward preparation for the diffusion of the Gospel was the appearance of a deep and wide-spread corruption which seemed to defy any human remedy. It would be easy to accumulate proofs of the moral and political degradation of the Romans under the Empire. It is needless to do more than allude to the corruption, the cruelty, the sensuality, the monstrous and unnatural wickedness of the period as revealed in the heathen historians and satirists. "Viewed as a national or political history," says the great historian of Rome, "the history of the Roman Empire is sad and discouraging in the last degree. We see that things had come to a point at which no earthly power could afford any help; we now have the development of dead powers instead of that of a vital energy" (Niebuhr, *Lect.* v. 194). Not withstanding the outward appearance of peace, unity, and reviving prosperity, the general condition of the people must have been one of great misery. To say nothing of the fact that probably one-half of the population consisted of slaves, the great inequality of wealth at a time when a whole province could be owned by six landowners, the absence of any middle class, the utter want of any institutions for alleviating distress such as are found in all Christian countries, the inhuman tone of feeling and practice generally prevailing, forbid us to think favorably of the happiness of the world in the famous Augustan age. We must remember that "there were no public hospitals, no institutions for the relief of the infirm and poor, no societies for the improvement of the condition of mankind from motives of charity. Nothing was done to promote the instruction of the lower classes, nothing to mitigate the miseries of domestic slavery. Charity and general philanthropy were so little regarded as duties, that it requires a very extensive acquaintance with the literature of the times to find any allusion to them" (Arnold's *Later Roman Commonwealth*, ii. 398). If we add to this that there was probably not a single religion, except the Jewish, which was felt by the more enlightened part of its professors to be real, we may form some notion of the world which Christianity had to reform and purify. We venture to quote an eloquent description of its "slow, imperceptible, continuous aggression on the heathenism of the Roman Empire."

"Christianity was gradually withdrawing some of all orders, even slaves, out of the vices, the ignorance, the misery of that corrupted social system. It was ever instilling feelings of humanity, yet unknown or coldly commended by an impotent philosophy, among men and women whose infant ears had been habituated to the shrieks of dying gladiators; it was giving dignity to minds prostrated by years, almost centuries, of degrading despotism; it was nurturing purity and modesty of manners in an unspeakable state of depravation; it was enshrining the marriage-bed in a sanctity long almost entirely lost, and rekindling to a steady warmth the domestic affections; it was substituting a simple, calm, and rational faith for the worn-out superstitions of heathenism; gently establishing in the soul of man the sense of immortality, till it became a natural and inextinguishable part of his moral being" (Milman's *Latin Christianity*, i. 24).

The chief prophetic notices of the Roman Empire are found in the Book of Daniel, especially in ch. xi. 30–40, and in ii. 40, vii. 7, 17–19, according to the common interpretation of the "fourth kingdom, comp. 2 Esdr. xi. 1, but see DANIEL. As-

## ROMANS, THE EPISTLE TO THE.

1. The *date* of this epistle is fixed with more absolute certainty and within narrower limits, than that of any other of St. Paul's epistles. The following considerations determine the time of writing. *First.* Certain names in the salutations point to Corinth, as the place from which the letter was sent. (1.) Phœbe, a deaconess of Cenchreæ, one of the port towns of Corinth, is commended to the Romans (xvi. 1, 2). (2.) Gaius, in whose house St. Paul was lodged at the time (xvi. 23), is probably the person mentioned as one of the chief members of the Corinthian Church in 1 Cor. i. 14, though the name was very common. (3.) Erastus, here designated "the treasurer of the city" (*οἰκονόμος*, xvi. 23, E. V. "chamberlain") is elsewhere mentioned in connection with Corinth (2 Tim. iv. 20; see also Acts xix. 22). *Secondly.* Having thus determined the place of writing to be Corinth, we have no hesitation in fixing upon the visit recorded in Acts xx. 3, during the winter and spring following the Apostle's long residence at Ephesus, as the occasion on which the epistle was written. For St. Paul, when he wrote the letter, was on the point of carrying the contributions of Macedonia and Achaia to Jerusalem (xv. 25–27), and a comparison with Acts xx. 22, xxiv. 17, and also 1 Cor. xvi. 4; 2 Cor. viii. 1, 2, ix. 1 ff., shows that he was so engaged at this period of his life. (See Paley's *Horæ Paulinæ*, ch. ii. § 1.) Moreover, in this epistle he declares his intention of visiting the Romans after he has been at Jerusalem (xv. 23–25), and that such was his design at this particular time appears from a casual notice in Acts xix. 21.

The epistle then was written from Corinth during St. Paul's third missionary journey, on the occasion of the second of the two visits recorded in the Acts. On this occasion he remained three months in Greece (Acts xx. 3). When he left, the sea was already navigable, for he was on the point of sailing for Jerusalem when he was obliged to change his plans. On the other hand, it cannot have been late in the spring, because after passing through Macedonia and visiting several places on the coast of Asia Minor, he still hoped to reach Jerusalem by Pentecost (xx. 16). It was therefore in the winter or early spring of the year that the Epistle to the Romans was written. According to the most probable system of chronology, adopted by Anger and Wieseler, this would be the year A. D. 58.

2. The Epistle to the Romans is thus placed in *chronological connection* with the epistles to the Galatians and Corinthians, which appear to have been written within the twelve months preceding. The First Epistle to the Corinthians was written before St. Paul left Ephesus, the Second from Macedonia when he was on his way to Corinth, and the Epistle to the Galatians most probably either in Macedonia or after his arrival at Corinth, *i. e.* after the epistles to the Corinthians, though the date of the Galatian Epistle is not absolutely certain. [GALATIANS, EPISTLE TO THE.] We shall have to notice the relations existing between these contemporaneous epistles hereafter. At present it will be sufficient to say that they present a remarkable resemblance to each other in style and matter — a much greater resemblance than can be traced to any other of St. Paul's epistles. They are at once the most intense and most varied in feeling and expression — if we may so say, the most Pauline of all St. Paul's epistles. When Baur excepts these four epistles alone from his sweeping condemnation of the genuineness of all the letters bearing St. Paul's name (*Paulus, der Apostel*) this is a mere caricature of sober criticism; but underlying this erroneous exaggeration is the fact, that the epistles of this period — St. Paul's third missionary journey — have a character and an intensity peculiarly their own, corresponding to the circumstances of the Apostle's outward and inward life at the time when they were written. For the special characteristics of this group of epistles, see a paper on the Epistle to the Galatians in the *Journal of Class. and Sacr. Phil.*, iii. p. 289.

3. The *occasion* which prompted this epistle, and the *circumstances* attending its writing, were as follows. St. Paul had long purposed visiting Rome, and still retained this purpose, wishing also to extend his journey to Spain (i. 9–13, xv. 23–29); for the time, however, he was prevented from carrying out his design, as he was bound for Jerusalem with the alms of the Gentile Christians, and meanwhile he addressed this letter to the Romans, to supply the lack of his personal teaching. Phœbe, a deaconess of the neighboring church of Cenchreæ, was on the point of starting for Rome (xvi. 1, 2), and probably conveyed the letter. The body of the epistle was written at the Apostle's dictation by Tertius (xvi. 22); but perhaps we may infer from the abruptness of the final doxology, that it was added by the Apostle himself, more especially as we gather from other epistles that it was his practice to conclude with a few striking words in his own handwriting, to vouch for the authorship of the letter, and frequently also to impress some important truth more strongly on his readers.

4. The *origin of the Roman Church* is involved in obscurity. If it had been founded by St. Peter, according to a later tradition, the absence of any allusion to him both in this epistle and in the letters written by St. Paul from Rome would admit of no explanation. It is equally clear that no other Apostle was the founder. In this very epistle, and in close connection with the mention of his proposed visit to Rome, the Apostle declares that it was his rule not to build on another man's foundation (xv. 20), and we cannot suppose that he violated it in this instance. Again, he speaks of the Romans as especially falling to his share as the Apostle of the Gentiles (i. 13) with an evident reference to the partition of the field of labor between himself and St. Peter, mentioned in Gal. ii. 7–9. Moreover, when he declares his wish to impart some spiritual gift (*χάρισμα*) to them, "that they might be established" (i. 11), this implies that they had not yet been visited by an Apostle, and that St. Paul contemplated supplying the defect, as was done by St. Peter and St. John in the analogous case of the churches founded by Philip in Samaria (Acts viii. 14–17).

The statement in the Clementines (*Hom.* i. § 6 that the first tidings of the Gospel reached Rome during the lifetime of our Lord, is evidently a fiction for the purposes of the romance. On the other hand, it is clear that the foundation of this

Digitized by Google

church dates very far back. St. Paul in this epistle salutes certain believers resident in Rome — Andronicus and Junia (or Junianus?) — adding that they were distinguished among the Apostles, and that they were converted to Christ before himself (xvi. 7), for such seems to be the meaning of the passage, rendered somewhat ambiguous by the position of the relative pronouns. It may be that some of those Romans, "both Jews and proselytes," present on the day of Pentecost (*οἱ ἐπιδημοῦντες Ῥωμαῖοι, Ἰουδαῖοί τε καὶ προσήλυτοι*, Acts ii. 10), carried back the earliest tidings of the new doctrine, or the Gospel may have first reached the imperial city through those who were scattered abroad to escape the persecution which followed on the death of Stephen (Acts viii. 4, xi. 19). At all events, a close and constant communication was kept up between the Jewish residents in Rome and their fellow-countrymen in Palestine by the exigencies of commerce, in which they became more and more engrossed, as their national hopes declined, and by the custom of repairing regularly to their sacred festivals at Jerusalem. Again, the imperial edicts alternately banishing and recalling the Jews (compare *e. g.* in the case of Claudius, Joseph. *Ant.* xix. 5, § 3, with Suet. *Claud.* c. 25) must have kept up a constant ebb and flow of migration between Rome and the East, and the case of Aquila and Priscilla (Acts xviii. 2; see Paley, *Hor. Paul.* c. ii. § 2) probably represents a numerous class through whose means the opinions and doctrines promulgated in Palestine might reach the metropolis. At first we may suppose that the Gospel was preached there in a confused and imperfect form, scarcely more than a phase of Judaism, as in the case of Apollos at Corinth (Acts xviii. 25), or the disciples at Ephesus (Acts xix. 1–3). As time advanced and better instructed teachers arrived, the clouds would gradually clear away, till at length the presence of the great Apostle himself at Rome dispersed the mists of Judaism which still hung about the Roman Church. Long after Christianity had taken up a position of direct antagonism to Judaism in Rome, heathen statesmen and writers still persisted in confounding the one with the other. (See Merivale, *Hist. of Rome*, vi. 278, &c.)

5. A question next arises as to the *composition of the Roman Church*, at the time when St. Paul wrote. Did the Apostle address a Jewish or a Gentile community, or, if the two elements were combined, was one or other predominant so as to give a character to the whole Church? Either extreme has been vigorously maintained, Baur for instance asserting that St. Paul was writing to Jewish Christians, Olshausen arguing that the Roman Church consisted almost solely of Gentiles. We are naturally led to seek the truth in some intermediate position. Jowett finds a solution of the difficulty in the supposition that the members of the Roman Church, though Gentiles, had passed through a phase of Jewish proselytism. This will explain some of the phenomena of the epistle, but not all. It is more probable that St. Paul addressed a mixed church of Jews and Gentiles, the latter perhaps being the more numerous.

There are certain passages which imply the presence of a large number of Jewish converts to Christianity. The use of the second person in addressing the Jews (cc. ii. and iii.) is clearly not assumed merely for argumentative purposes, but applies to a portion at least of those into whose hands the letter would fall. The constant appeals to the authority of "the Law" may in many cases be accounted for by the Jewish education of the Gentile believers (so Jowett, vol. ii. p. 23), but sometimes they seem too direct and positive to admit of this explanation (iii. 19, vii. 1). In the 7th chapter St. Paul appears to be addressing Jews, as those who like himself had once been under the dominion of the Law, but had been delivered from it in Christ (see especially verses 4 and 6). And when in xi. 13, he says "I am speaking to you — the Gentiles," this very limiting expression, "the Gentiles," implies that the letter was addressed to not a few to whom the term would not apply.

Again, if we analyze the list of names in the 16th chapter, and assume that this list approximately represents the proportion of Jew and Gentile in the Roman Church (an assumption at least not improbable), we arrive at the same result. It is true that Mary, or rather Mariam (xvi. 6) is the only strictly Jewish name. But this fact is not worth the stress apparently laid on it by Mr. Jowett (ii. p. 27). For Aquila and Priscilla (ver. 3) were Jews (Acts xviii. 2, 26), and the church which met in their house was probably of the same nation. Andronicus and Junia (or Junias? ver. 7) are called St. Paul's kinsmen. The same term is applied to Herodion (ver. 11). These persons then must have been Jews, whether "kinsmen" is taken in the wider or the more restricted sense. The name Apelles (ver. 10), though a heathen name also, was most commonly borne by Jews, as appears from Horace, *Sat.* I. v. 100. If the Aristobulus of ver. 10 was one of the princes of the Herodian house, as seems probable, we have also in "the household of Aristobulus" several Jewish converts. Altogether it appears that a very large fraction of the Christian believers mentioned in these salutations were Jews, even supposing that the others, bearing Greek and Latin names, of whom we know nothing, were heathens.

Nor does the existence of a large Jewish element in the Roman Church present any difficulty. The captives carried to Rome by Pompeius formed the nucleus of the Jewish population in the metropolis [ROME]. Since that time they had largely increased. During the reign of Augustus we hear of above 8,000 resident Jews attaching themselves to a Jewish embassy which appealed to this emperor (Joseph. *Ant.* xvii. 11, § 1). The same emperor gave them a quarter beyond the Tiber, and allowed them the free exercise of their religion (Philo, *Leg. ad Caium*, p. 568 M.). About the time when St. Paul wrote, Seneca, speaking of the influence of Judaism, echoes the famous expression of Horace (*Ep.* ii. 1, 156) respecting the Greeks — "victi victoribus leges dederunt" (Seneca, in Augustin, *de Civ. Dei*, vi. 11). And the bitter satire of Juvenal and indignant complaints of Tacitus of the spread of the infection through Roman society, are well known.

On the other hand, situated in the metropolis of the great empire of heathendom, the Roman Church must necessarily have been in great measure a Gentile Church; and the language of the epistle bears out this supposition. It is professedly as the Apostle of the Gentiles that St. Paul writes to the Romans (i. 5). He hopes to have some fruit among them, as he had among the other Gentiles (i. 13). Later on in the epistle he speaks of the Jews in the third person, as if addressing Gentiles, "I could wish that myself were accursed for my brethren,

Digitized by Google

my kinsmen after the flesh, who are Israelites, etc." (ix. 3, 4). And again, "my heart's desire and prayer to God for *them* is that they might be saved" (x. 1, the right reading is ὑπὲρ αὐτῶν, not ὑπὲρ τοῦ Ἰσραὴλ as in the Received Text) Compare also xi. 23, 25, and especially xi. 30, "For as ye in times past did not believe God, . . . . so did these also (*i. e.* the Jews) now not believe," etc. In all these passages St. Paul clearly addresses himself to Gentile readers.

These Gentile converts, however, were not for the most part native Romans. Strange as the paradox appears, nothing is more certain than that the Church of Rome was at this time a Greek and not a Latin Church. It is clearly established that the early Latin versions of the New Testament were made not for the use of Rome, but of the provinces, especially Africa (Westcott, *Canon*, p. 269). All the literature of the early Roman Church was written in the Greek tongue. The names of the bishops of Rome during the first two centuries are with but few exceptions Greek. (See Milman, *Latin Christ.* i. 27.) And in accordance with these facts we find that a very large proportion of the names in the salutations of this epistle are Greek names; while of the exceptions, Priscilla, Aquila, and Junia (or Junias), were certainly Jews; and the same is true of Rufus, if, as is not improbable, he is the same mentioned Mark xv. 21. Julia was probably a dependent of the imperial household, and derived her name accordingly. The only Roman names remaining are Amplias (*i. e.* Ampliatus) and Urbanus, of whom nothing is known, but their names are of late growth, and certainly do not point to an old Roman stock. It was therefore from the Greek population of Rome, pure or mixed, that the Gentile portion of the Church was almost entirely drawn. And this might be expected. The Greeks formed a very considerable fraction of the whole people of Rome. They were the most busy and adventurous, and also the most intelligent of the middle and lower classes of society. The influence which they were acquiring by their numbers and versatility is a constant theme of reproach in the Roman philosopher and satirist (Juv. iii. 60–80, vi. 184; Tac. *de Orat.* 29). They complain that the national character is undermined, that the whole city has become Greek. Speaking the language of international intercourse, and brought by their restless habits into contact with foreign religions, the Greeks had larger opportunities than others of acquainting themselves with the truths of the Gospel: while at the same time holding more loosely to traditional beliefs, and with minds naturally more inquiring, they would be more ready to welcome these truths when they came in their way. At all events, for whatever reason, the Gentile converts at Rome were Greeks, not Romans: and it was an unfortunate conjecture on the part of the transcriber of the Syriac Peshito, that this letter was written "in the Latin tongue," (רומאירת). Every line in the epistle bespeaks an original.

When we inquire into the probable rank and station of the Roman believers, an analysis of the names in the list of salutations again gives an approximate answer These names belong for the most part to the middle and lower grades of society. Many of them are found in the columbaria of the freedmen and slaves of the early Roman emperors. (See *Journal of Class. and Sacr. Phil.* iv. p. 57.) It would be too much to assume that they were the same persons, but at all events the identity of names points to the same social rank. Among the less wealthy merchants and tradesmen, among the petty officers of the army, among the slaves and freedmen of the imperial palace — whether Jews or Greeks — the Gospel would first find a firm footing. To this last class allusion is made in Phil. iv. 22, "they that are of Cæsar's household." From these it would gradually work upwards and downwards; but we may be sure that in respect of rank the Church of Rome was no exception to the general rule, that "not many wise, not many mighty, not many noble" were called (1 Cor. i. 26).

It seems probable from what has been said above, that the Roman Church at this time was composed of Jews and Gentiles in nearly equal portions This fact finds expression in the account, whether true or false, which represents St. Peter and St. Paul as presiding at the same time over the Church at Rome (Dionys. Cor. *ap.* Euseb. *H. E.* ii. 25; Iren. iii. 3). Possibly also the discrepancies in the lists of the early bishops of Rome may find a solution (Pearson, *Minor Theol. Works*, ii. 449; Bunsen, *Hippolytus*, i. p. 44) in the joint Episcopate of Linus and Cletus, the one ruling over the Jewish, the other over the Gentile congregation of the metropolis. If this conjecture be accepted, it is an important testimony to the view here maintained, though we cannot suppose that in St. Paul's time the two elements of the Roman Church had distinct organizations.

6. The heterogeneous composition of this church explains *the general character of the Epistle to the Romans.* In an assemblage so various, we should expect to find not the exclusive predominance of a single form of error, but the coincidence of different and opposing forms. The Gospel had here to contend not specially with Judaism nor specially with heathenism, but with both together. It was therefore the business of the Christian Teacher to reconcile the opposing difficulties and to hold out a meeting point in the Gospel. This is exactly what St. Paul does in the Epistle to the Romans, and what from the circumstances of the case he was well enabled to do. He was addressing a large and varied community which had not been founded by himself, and with which he had had no direct intercourse. Again, it does not appear that the letter was specially written to answer any doubts or settle any controversies then rife in the Roman Church. There were therefore no disturbing influences, such as arise out of personal relations, or peculiar circumstances, to derange a general and systematic exposition of the nature and working of the Gospel. At the same time the vast importance of the metropolitan Church, which could not have been overlooked even by an uninspired teacher, naturally pointed it out to the Apostle, as the fittest body to whom to address such an exposition. Thus the Epistle to the Romans is more of a treatise than of a letter. If we remove the personal allusions in the opening verses, and the salutations at the close, it seems not more particularly addressed to the Church of Rome, than to any other church of Christendom. In this respect it differs widely from the epistles to the Corinthians and Galatians, with which as being written about the same time it may most fairly be compared, and which are full of personal and direct allusions. In one instance alone we seem to trace a special reference to the church of the metropolis. The injunction of

Digitized by Google

obedience to temporal rulers (xiii. 1) would most fitly be addressed to a congregation brought face to face with the imperial government, and the more so, as Rome had recently been the scene of frequent disturbances, on the part of either Jews or Christians, arising out of a feverish and restless anticipation of Messiah's coming (Suet. *Claud.* 25). Other apparent exceptions admit of a different explanation.

7. This explanation is in fact to be sought in its *relation to the contemporaneous epistles.* The letter to the Romans closes the group of epistles written during the third missionary journey. This group contains besides, as already mentioned, the letters to the Corinthians and Galatians, written probably within the few months preceding. At Corinth, the capital of Achaia, and the stronghold of heathendom, the Gospel would encounter its severest struggle with Gentile vices and prejudices. In Galatia, which either from natural sympathy or from close contact seems to have been more exposed to Jewish influence than any other church within St. Paul's sphere of labor, it had a sharp contest with Judaism. In the epistles to these two churches we study the attitude of the Gospel towards the Gentile and Jewish world respectively. These letters are direct and special. They are evoked by present emergencies, are directed against actual evils, are full of personal applications. The Epistle to the Romans is the summary of what he had written before, the result of his dealing with the two antagonistic forms of error, the gathering together of the fragmentary teaching in the Corinthian and Galatian letters. What is there immediate, irregular, and of partial application, is here arranged and completed, and thrown into a general form. Thus on the one hand his treatment of the Mosaic law points to the difficulties he encountered in dealing with the Galatian Church, while on the other his cautions against antinomian excesses (Rom. vi. 15, &c.), and his precepts against giving offense in the matter of meats and the observance of days (Rom. xiv.), remind us of the errors which he had to correct in his Corinthian converts. (Compare 1 Cor. vi. 12 ff., and 1 Cor. viii. 1 ff.) Those injunctions then which seem at first sight special, appear not to be directed against any actual known failings in the Roman Church, but to be suggested by the possibility of those irregularities occurring in Rome which he had already encountered elsewhere.

8. Viewing this epistle then rather in the light of a treatise than of a letter, we are enabled to explain certain *phenomena in the text.* In the received text a doxology stands at the close of the epistle (xvi. 25–27). The preponderance of evidence is in favor of this position, but there is respectable authority for placing it at the end of ch. xiv. In some texts again it is found in both places, while others omit it entirely. How can we account for this? It has been thought by some to discredit the genuineness of the doxology itself: but there is no sufficient ground for this view. The arguments against its genuineness on the ground of style, advanced by Reiche, are met and refuted by Fritzsche (*Rom.* vol. i. p. xxxv.). Baur goes still further, and rejects the two last chapters; but such an inference falls without the range of sober criticism. The phenomena of the MSS. seem best explained by supposing that the letter was circulated at an early date (whether during the Apostle's lifetime or not it is idle to inquire) in two forms, both with and without the two last chapters. In the shorter form it was divested as far as possible of its epistolary character by abstracting the personal matter addressed especially to the Romans, the doxology being retained at the close. A still further attempt to strip this epistle of any special references is found in MS. G, which omits ἐν Ῥώμῃ (i. 7), and τοῖς ἐν Ῥώμῃ (i. 15), for it is to be observed at the same time that this MS. omits the doxology entirely, and leaves a space after ch. xiv. This view is somewhat confirmed by the parallel case of the opening of the Ephesian Epistle, in which there is very high authority for omitting the words ἐν Ἐφέσῳ, and which bears strong marks of having been intended for a circular letter.

9. In describing the *purport* of this epistle we may start from St. Paul's own words, which, standing at the beginning of the doctrinal portion, may be taken as giving a summary of the contents: "The Gospel is the power of God unto salvation to every one that believeth, to the Jew first and also to the Greek: for therein is the righteousness of God revealed from faith to faith" (i. 16, 17). Accordingly the epistle has been described as comprising "the religious philosophy of the world's history." The world in its religious aspect is divided into Jew and Gentile. The different position of the two as regards their past and present relations to God, and their future prospects, are explained. The atonement of Christ is the centre of religious history. The doctrine of justification by faith is the key which unlocks the hidden mysteries of the divine dispensation.

The epistle, from its general character, lends itself more readily to an *analysis* than is often the case with St. Paul's epistles. The body of the letter consists of four portions, of which the first and last relate to personal matters, the second is argumentative and doctrinal, and the third practical and hortatory. The following is a table of its contents: —

Salutation (i. 1–7). The Apostle at the outset strikes the keynote of the epistles in the expressions "*called* as an apostle," "*called* as saints." Divine grace is everything, human merit nothing.

I. Personal explanations. Purposed visit to Rome (i. 8–15).

II. Doctrinal (i. 16–xi. 36).

The *general proposition.* The Gospel is the salvation of Jew and Gentile alike. This salvation comes by faith (i. 16, 17).

The rest of this section is taken up in establishing this thesis, and drawing deductions from it, or correcting misapprehensions.

(*a.*) All alike were under *condemnation* before the Gospel:

The heathen (i. 18–32).

The Jew (ii. 1–29).

Objections to this statement answered (iii. 1–8).

And the position itself established from Scripture (iii. 9–20).

(*b.*) A *righteousness* (justification) is revealed under the gospel, which being of faith, not of law, is also universal (iii. 21–26).

And boasting is thereby excluded (iii. 27–31).

Of this justification by faith Abraham is an example (iv. 1–25).

Thus then we are justified in Christ, in whom alone we glory (v. 1–11).

And this acceptance in Christ is as uni-

Digitized by Google

vernal as was the condemnation in Adam (v. 12–19).

(*c.*) The *moral consequences* of our deliverance.

The Law was given to multiply sin (v. 20, 21). When we died to the Law we died to sin (vi. 1–14). The abolition of the Law, however, is not a signal for moral license (vi. 15–23). On the contrary, as the Law has passed away, so must sin, for sin and the Law are correlative; at the same time this is no disparagement of the Law, but rather a proof of human weakness (vii. 1–25). So henceforth in Christ we are free from sin, we have the Spirit and look forward in hope, triumphing over our present afflictions (viii. 1–39).

(*d.*) The *rejection of the Jews* is a matter of deep sorrow (ix. 1–5).

Yet we must remember —

(i.) That the promise was not to the whole people, but only to a select seed (ix. 6–13). And the absolute purpose of God in so ordaining is not to be canvassed by man (ix. 14–19).

(ii.) That the Jews did not seek justification aright, and so missed it. This justification was promised by *faith*, and is offered to all alike, the preaching to the Gentiles being implied therein. The character and results of the Gospel dispensation are foreshadowed in Scripture (x. 1–21).

(iii.) That the rejection of the Jews is not final. This rejection has been the means of gathering in the Gentiles, and through the Gentiles they themselves will ultimately be brought to Christ (xi. 1–36).

III. Practical exhortations (xii. 1–xv. 13).

(*a.*) To holiness of life and to charity in general, the duty of obedience to rulers being inculcated by the way (xii. 1–xiii. 14).

(*b.*) And more particularly against giving offense to weaker brethren (xiv. 1–xv. 13).

IV. Personal matters.

(*a.*) The Apostle's motive in writing the letter, and his intention of visiting the Romans (xv. 14–33).

(*b.*) Greetings (xvi. 1–23).

The letter ends with a benediction and doxology (xvi. 24–27).

While this epistle contains the fullest and most systematic exposition of the Apostle's *teaching*, it is at the same time a very striking expression of his *character*. Nowhere do his earnest and affectionate nature, and his tact and delicacy in handling unwelcome topics appear more strongly than when he is dealing with the rejection of his fellow-countrymen the Jews.

The reader may be referred especially to the introductions of Olshausen, Tholuck, and Jowett, for suggestive remarks relating to the scope and purport of the Epistle to the Romans.

10. Internal evidence is so strongly in favor of the *genuineness* of the Epistle to the Romans that it has never been seriously questioned. Even the sweeping criticism of Baur did not go beyond condemning the two last chapters as spurious. But while the epistle bears in itself the strongest proofs of its Pauline authorship, the external testimony in its favor is not inconsiderable.

The reference to Rom ii. 4 in 2 Pet. iii. 15 is indeed more than doubtful. In the Epistle of St. James again (ii. 14), there is an allusion to perversions of St. Paul's language and doctrine which has several points of contact with the Epistle to the Romans, but this may perhaps be explained by the oral rather than the written teaching of the Apostle, as the dates seem to require. It is not the practice of the Apostolic fathers to cite the N. T. writers by name, but marked passages from the Romans are found embedded in the epistles of Clement and Polycarp (Rom. i. 29–32 in Clem. *Cor.* c. xxxv., and Rom. xiv. 10, 12, in Polyc. *Phil.* c. vi.). It seems also to have been directly cited by the elder quoted in Irenæus (iv. 27, 2, "ideo Paulum dixisse;" cf. Rom. xi. 21, 17), and is alluded to by the writer of the Epistle to Diognetus (c. ix., cf. Rom. iii. 21 foll., v. 20), and by Justin Martyr (*Dial.* c. 23, cf. Rom. iv. 10, 11, and in other passages). The title of Melito's treatise, *On the Hearing of Faith*, seems to be an allusion to this epistle (see however Gal. iii. 2, 3). It has a place moreover in the Muratorian Canon and in the Syriac and Old Latin Versions. Nor have we the testimony of orthodox writers alone. The epistle was commonly quoted as an authority by the heretics of the sub-apostolic age, by the Ophites (Hippol. *adv. Hær.* p. 99, cf. Rom. i. 20–26), by Basilides (*ib.* p. 238, cf. Rom. viii. 19, 22, and v. 13, 14), by Valentinus (*ib.* p. 195, cf. Rom. viii. 11), by the Valentinians Heracleon and Ptolemæus (Westcott, *On the Canon*, pp. 335, 340), and perhaps also by Tatian (*Orat.* c. iv., cf. Rom. i. 20), besides being included in Marcion's Canon. In the latter part of the second century the evidence in its favor is still fuller. It is obviously alluded to in the letter of the churches of Vienne and Lyons (Euseb. *H. E.* v. 1, cf. Rom viii. 18), and by Athenagoras (p. 13, cf. Rom. xii. 1; p. 37, cf. Rom. i. 24) and Theophilus of Antioch (*Ad Autol.* p. 79, cf. Rom. ii. 6 foll.; p. 196, cf. Rom. xiii. 7, 8); and is quoted frequently and by name by Irenæus, Tertullian, and Clement of Alexandria (see Kirchhofer, *Quellen*, p. 198, and esp. Westcott, *On the Canon*, passim).

11. The *Commentaries* on this epistle are very numerous, as might be expected from its importance. Of the many patristic expositions only a few are now extant. The work of Origen is preserved entire only in a loose Latin translation of Rufinus (*Orig.* ed. de la Rue, iv. 458), but some fragments of the original are found in the *Philocalia*, and more in Cramer's *Catena*. The commentary on St. Paul's epistles printed among the works of St. Ambrose (ed. Ben. ii. Appx. p. 21), and hence bearing the name Ambrosiaster, is probably to be attributed to Hilary the deacon. Besides these are the expositions of St. Paul's epistles by Chrysostom (ed. Montf. ix. p. 425, edited separately by Field), by Pelagius (printed among Jerome's works, ed. Vallarsi, xi. Pt. 3, p. 135), by Primasius (*Magn. Bibl. Vet. Patr.* vi Pt. 2, p. 30), and by Theodoret (ed. Schulze, iii. p. 1). Augustine commenced a work, but broke off at i. 4: it bears the name *Inchoata Expositio Epistolæ ad Rom.* (ed. Ben. iii. p. 925). Later he wrote *Expositio quarundam Propositionum Epistolæ ad Rom.*, also extant (ed. Ben. iii. p. 903). To these should be added the later *Catena* of Œcumenius (10th cent.) and the notes of Theophylact (11th cent.), the former containing valuable extracts from Photius. Portions of a commentary of Cyril of Alexandria were published by Mai (*Nov. Patr*

Digitized by Google

*Bibl.* iii. p. 1). The *Catena* edited by Cramer (1844) comprises two collections of Variorum notes, the one extending from i. 1 to ix. 1, the other from vii. 7, to the end. Besides passages from extant commentaries, they contain important extracts from Apollinarius, Theodorus of Mopsuestia [ed. Fritzsche, 1847; Migne, *Patrol. Gr.* lxvi.], Severianus, Gennadius, Photius, and others. There are also the Greek *Scholia*, edited by Matthäi, in his large Greek Test. (Riga, 1782), from Moscow MSS. The commentary of Euthymius Zigabenus (Tholuck, *Einl.* § 6) exists in MS., but has never been printed.

Of the later commentaries we can only mention a few of the most important. The dogmatic value of this epistle naturally attracted the early reformers. Melanethon wrote several expositions of it (Walch, *Bibl. Theol.* iv. 679). The Commentary of Calvin on the Romans is considered the ablest part of his able work. Among Roman Catholic writers, the older works of Estius and Corn. a Lapide deserve to be mentioned. Of foreign annotators of a more recent date, besides the general commentaries of Bengel, Olshausen, De Wette, and Meyer (3d ed. 1859 [4th ed. 1865]), which are highly valuable aids to the study of this epistle, we may single out the special works of Rückert (2d ed. 1839), Reiche (1834), Fritzsche (1836–43), and Tholuck (5th ed. 1856). An elaborate commentary has also been published lately by Van Hengel. Among English writers, besides the editions of the whole of the New Testament by Alford (4th ed. 1861) and Wordsworth (new ed. 1861), the most important annotations on the Epistle to the Romans are those of Stuart (6th ed. 1857), Jowett (2d ed. 1859), and Vaughan (2d ed. 1861). Further information on the subject of the literature of the Epistle to the Romans may be found in the introductions of Reiche and Tholuck. J. B. L.

* *Recent Literature.* — On the composition of the Roman Church and the aim of the epistle valuable essays have been lately published by W. Mangold, *Der Römerbrief u. die Anfänge d. röm. Gemeinde*, Marb. 1866, and W. Beyschlag, *Das geschichtliche Problem des Römerbriefs*, in the *Theol. Stud. u. Krit.*, 1867, pp. 627–665; comp. Hilgenfeld, *Die Paulus-Briefe u. ihre neuesten Bearbeitungen*, in his *Zeitschr. f. wiss. Theol.* 1866, ix. 293–316, 337–367. Renan (*Saint Paul*, Paris, 1869, pp. lxiii.–lxxv.) supposes the Epistle to the Romans to have been a circular letter, of which there were four copies with distinct endings (sent to the churches at Rome, Ephesus, Thessalonica, and some unknown church), the body of the letter remaining the same. The details of his theory and the arguments for it cannot be given here. It is fully discussed by Prof. Lightfoot (the author of the preceding article) in the *Journal of Philology*, 1869, vol. ii. pp. 264–295. His own hypothesis is, that the epistle as originally written was without the benediction xvi. 24 (omitted by Lachm., Tisch., and Tregelles as wanting in the best MSS.) and the doxology (xvi. 25–27). "At some later period of his life . . . . it occurred to the Apostle to give to this letter a wider circulation. To this end he made two changes in it: he obliterated all mention of Rome in the opening paragraphs by slight alterations [substituting *ἐν ἁγάπῃ θεοῦ* for *ἐν Ῥώμῃ* in i. 7, and omitting *ἐν Ῥώμῃ* in i. 15 — for the traces of this in MSS., etc., see Tisch.]; and he cut off the two last chapters containing personal matters, adding at the same time a doxology [xvi. 25–27] as a termination to the whole." This it will be perceived is a modification of the view presented in § 8 of the article above.

Among the more recent *Commentaries*, we may notice Umbreit, *Der Brief an die Römer, auf d Grunde des A. T. ausgelegt*, Gotha, 1856; Ewald, *Die Sendschreiben des Ap. Paulus übers. u. erklärt*, Gött 1857; John Brown ("Prof. of Exeget. Theol. to the United Presbyterian Church"), *Analytical Exposition of the Ep. to the Romans*, Edin., also N. Y., 1857; John Forbes, *Analyt. Comm. on the Ep. to the Romans, tracing the train of Thought by the aid of Parallelism*, Edin. 1868; J. P. Lange, *Der Brief Pauli an die Römer*, 2e Aufl. 1868 (Theil vi. of his *Bibelwerk*), greatly enlarged and enriched by Dr. Schaff and the Rev. M. B. Riddle, in the Amer. translation, N. Y. 1869 (vol. v. of Lange's *Comm.*); and J. C. K. von Hofmann, *Der Brief Pauli an die Römer*, Nördlingen, 1868 (Theil iii. of his *Die heil. Schrift d. N. T. zusammenhängend untersucht*). Of the commentaries mentioned by Lightfoot, that of Fritzsche is particularly distinguished for its philological thoroughness.

Of American commentaries, we may further name those of Dr. Charles Hodge (Old School Presbyterian), Philad. 1835, new ed., revised and greatly enlarged, 1864; S. H. Turner (Episcopalian), N. Y. 1853; and the more popular Notes of Albert Barnes (New School Presb.), H. J. Ripley (Baptist), A. A. Livermore (Unitarian), and L. R. Paige (Universalist).

On the theology of this epistle and the doctrine of Paul in general, in addition to the works referred to under the art. PAUL, vol. iii. p. 2397, one may consult the recent volume of Weiss, *Lehrb. d. Bibl. Theol. d. N. T.*, Berl. 1868, pp. 216–507. Rom. v. 12–19 is discussed by Prof. Timothy Dwight in the *New Englander* for July, 1868, with particular reference to the Commentary of Dr. Hodge.

For a fuller view of the very extensive literature relating to the epistle, see the American translation of Lange's *Commentary* as above referred to, p. 48 ff.; comp. p. 27 ff., 37, and for special monographs, the body of the Commentary on the more important passages. The older literature is detailed in the well-known bibliographical works of Walch, Winer, Danz, and Darling. A.

ROME (Ῥώμη, *Ethn.* and *Adj.* Ῥωμαῖος, Ῥωμαικός in the phrase γράμματα Ῥωμαϊκά, Luke xxiii. 38), the famous capital of the ancient world, is situated on the Tiber at a distance of about 15 miles from its mouth. The "seven hills" (Rev. xvii. 9) which formed the nucleus of the ancient city stand on the left bank. On the opposite side of the river rises the far higher ridge of the Janiculum. Here from very early times was a fortress with a suburb beneath it extending to the river. Modern Rome lies to the N. of the ancient city, covering with its principal portion the plain to the N. of the seven hills, once known as the Campus Martius, and on the opposite bank extending over the low ground beneath the Vatican to the N. of the ancient Janiculum. A full account of the history and topography of the city is given elsewhere (*Dict. of Gr. and Rom. Geogr.* ii. 719). Here it will be considered only in its relation to Bible history.

Rome is not mentioned in the Bible except in the books of Maccabees and in three books of the N. T., namely, the Acts, the Epistle to the Romans, and the 2d Epistle to Timothy. For the

Digitized by Google

notices of Rome in the books of Maccabees see ROMAN EMPIRE.

The conquests of Pompey seem to have given rise to the first settlement of Jews at Rome. The Jewish king Aristobulus and his son formed part of Pompey's triumph, and many Jewish captives and emigrants were brought to Rome at that time. A special district was assigned to them, not on the site of the modern "Ghetto," between the Capitol and the island of the Tiber, but across the Tiber (Philo, *Leg. ad Caium*, ii. 568, ed. Mangey). Many of these Jews were made freedmen (Philo, *l. c.*). Julius Cæsar showed them some kindness (Joseph. *Ant.* xiv. 10, § 8; Suet. *Cæsar*, 84). They were favored also by Augustus, and by Tiberius during the latter part of his reign (Philo, *l. c.*). At an earlier period apparently he banished a great number of them to Sardinia (Joseph. *Ant.* xviii. 3, § 5; Suet. *Tib.* 36). Claudius "commanded all Jews to depart from Rome" (Acts xviii. 2), on account of tumults connected, possibly, with the preaching of Christianity at Rome (Suet. *Claud.* 25, "Judæos impulsore Chresto assidue tumultuantes Româ expulit"). This banishment cannot have been of long duration, for we find Jews residing at Rome apparently in considerable numbers at the time of St. Paul's visit (Acts xxviii. 17). It is chiefly in connection with St. Paul's history that Rome comes before us in the Bible.

In illustration of that history it may be useful to give some account of Rome in the time of Nero, the "Cæsar" to whom St. Paul appealed, and in whose reign he suffered martyrdom (Eus. *H. E.* ii. 25).

1. The city at that time must be imagined as a large and irregular mass of buildings unprotected by an outer wall. It had long outgrown the old Servian wall (Dionys. Hal. *Ant. Rom.* iv. 13; ap. Merivale, *Rom. Hist.* iv. 497); but the limits of the suburbs cannot be exactly defined. Neither the nature of the buildings nor the configuration of the ground were such as to give a striking appearance to the city viewed from without. "Ancient Rome had neither cupola nor campanile" (Conybeare and Howson, *Life of St. Paul*, ii. 371; Merivale, *Rom. Emp.* iv. 512), and the hills, never lofty or imposing, would present, when covered with the buildings and streets of a huge city, a confused appearance like the hills of modern London, to which they have sometimes been compared. The visit of St. Paul lies between two famous epochs in the history of the city, namely, its restoration by Augustus and its restoration by Nero (C. and H. i. 13). The boast of Augustus is well known, "that he had found the city of brick and left it of marble" (Suet. *Aug.* 28). For the improvements effected by him, see *Dict. of Gr. and Rom. Geogr.* i. 740, and Niebuhr's *Lectures on Rom. Hist.* ii. 177. Some parts of the city, especially the Forum and Campus Martius, must now have presented a magnificent appearance, but many of the principal buildings which attract the attention of modern travellers in ancient Rome were not yet built. The streets were generally narrow and winding, flanked by densely crowded lodging-houses (insulæ) of enormous height. Augustus found it necessary to limit their height to 70 feet (Strab. v. 235). St. Paul's first visit to Rome took place before the Neronian conflagration, but even after the restoration of the city, which followed upon that event, many of the old evils continued (Tac. *Hist.* iii. 71; Juv. *Sat.* iii. 193, 269). The population of the city has been variously estimated: at half a million (by Dureau de la Malle, i. 403, and Merivale *Rom. Empire*, iv. 525), at two millions and upwards (Hoeck, *Römische Geschichte*, i. ii. 131; C. and H. *Life of St. Paul*, ii. 376; *Dict. of Geogr* ii. 746), even at eight millions (Lipsius, *De Magnitudine Rom.*, quoted in *Dict. of Geogr.*). Probably Gibbon's estimate of one million two hundred thousand is nearest to the truth (Milman's note on Gibbon, ch. xxxi. vol. iii. p. 120). One half of the population consisted, in all probability, of slaves. The larger part of the remainder consisted of pauper citizens supported in idleness by the miserable system of public gratuities. There appears to have been no middle class and no free industrial population. Side by side with the wretched classes just mentioned was the comparatively small body of the wealthy nobility, of whose luxury and profligacy we hear so much in the heathen writers of the time. (See for calculations and proofs the works cited.)

Such was the population which St. Paul would find at Rome at the time of his visit. We learn from the Acts of the Apostles that he was detained at Rome for "two whole years," "dwelling in his own hired house with a soldier that kept him" (Acts xxviii. 16, 30), to whom apparently, according to Roman custom (Senec. *Ep.* v.; Acts xii. 6, quoted by Brotier, *ad Tac. Ann.* iii. 22), he was bound with a chain (Acts xxviii. 20; Eph. vi. 20; Phil. i. 13). Here he preached to all that came to him, no man forbidding him (Acts xxviii. 30, 31). It is generally believed that on his "appeal to Cæsar" he was acquitted, and, after some time spent in freedom, was a second time imprisoned at Rome (for proofs, see C. and H. *Life of St. Paul*, ch. xxvii., and Alford, *Gr. Test.* iii. ch. 7). Five of his epistles, namely, those to the Colossians, Ephesians, Philippians, that to Philemon, and the 2d Epistle to Timothy, were, in all probability, written from Rome, the latter shortly before his death (2 Tim. iv. 6), the others during his first imprisonment. It is universally believed that he suffered martyrdom at Rome.

2. The localities in and about Rome especially connected with the life of St. Paul are — (1.) The Appian Way, by which he approached Rome (Acts xxviii. 15). (See APPII FORUM, and *Dict. of Geogr.* "Via Appia.") (2.) "The palace," or "Cæsar's court" (τὸ πραιτώριον, Phil. i. 13). This may mean either the great camp of the Prætorian guards which Tiberius established outside the walls on the N. E. of the city (Tac. *Ann.* iv. 2; Suet. *Tib.* 37), or, as seems more probable, a barrack attached to the Imperial residence on the Palatine (Wieseler, as quoted by C. and H., *Life of St. Paul*, ii. 423). There is no sufficient proof that the word "Prætorium" was ever used to designate the emperor's palace, though it is used for the official residence of a Roman governor (John xviii. 28; Acts xxiii. 35). The mention of "Cæsar's household" (Phil. iv. 22), confirms the notion that St. Paul's residence was in the immediate neighborhood of the emperor's house on the Palatine. [JUDGMENT-HALL; PRÆTORIUM.]

3. The connection of other localities at Rome with St. Paul's name rests only on traditions of more or less probability. We may mention especially — (1.) The Mamertine prison or Tullianum built by Ancus Martius near the forum (Liv. i. 33

Digitized by Google

described by Sallust (*Cat.* 55). It still exists beneath the church of *S. Giuseppe dei Falegnami*. Here it is said that St. Peter and St. Paul were fellow-prisoners for nine months. This is not the place to discuss the question whether St. Peter was ever at Rome. It may be sufficient to state, that though there is no evidence of such a visit in the N. T., unless Babylon in 1 Pet. v. 13 is a mystical name for Rome, yet early testimony (Dionysius, *ap.* Euseb. ii. 25), and the universal belief of the early Church seem sufficient to establish the fact of his having suffered martyrdom there. [PETER, vol. iii. p. 2454.] The story, however, of the imprisonment in the Mamertine prison seems inconsistent with 2 Tim., especially iv. 11. (2.) The chapel on the Ostian road which marks the spot where the two Apostles are said to have separated on their way to martyrdom. (3.) The supposed scene of St. Paul's martyrdom, namely, the church of *St. Paolo alle tre fontane* on the Ostian road. (See the notice of the Ostian road in Caius, *ap.* Eus. *H. E.* ii. 25.) To these may be added (4.) The supposed scene of St. Peter's martyrdom, namely, the church of *St. Pietro* in Montorio, on the Janiculum. (5.) The chapel "Domine quo Vadis," on the Appian road, the scene of the beautiful legend of our Lord's appearance to St. Peter as he was escaping from martyrdom (Ambrose, *Ep.* 33). (6.) The places where the bodies of the two Apostles, after having been deposited first in the catacombs (*κοιμητήρια*) (Eus. *H. E.* ii. 25), are supposed to have been finally buried — that of St. Paul by the Ostian road; that of St. Peter beneath the dome of the famous Basilica which bears his name (see Caius, *ap.* Eus. *H. E.* ii. 25). All these and many other traditions will be found in the Annals of Baronius, under the last year of Nero. "Valueless as may be the historical testimony of each of these traditions singly, yet collectively they are of some importance as expressing the consciousness of the third and fourth centuries, that there had been an early contest, or at least contrast, between the two Apostles, which in the end was completely reconciled; and it is this feeling which gives a real interest to the outward forms in which it is brought before us, more or less indeed in all the south of Europe, but especially in Rome itself" (Stanley's *Sermons and Essays*, p. 101).

4. We must add, as sites unquestionably connected with the Roman Christians of the Apostolic age — (1.) The gardens of Nero in the Vatican, not far from the spot where St. Peter's now stands. Here Christians wrapped in the skins of beasts were torn to pieces by dogs, or, clothed in inflammable robes, were burnt to serve as torches during the midnight games. Others were crucified (Tac. *Ann.* xv. 44). (2.) The Catacombs. These subterranean galleries, commonly from 8 to 10 feet in height, and from 4 to 6 in width, and extending for miles, especially in the neighborhood of the old Appian and Nomentan ways, were unquestionably used as places of refuge, of worship, and of burial by the early Christians. It is impossible here to enter upon the difficult question of their origin, and their possible connection with the deep sandpits and subterranean works at Rome mentioned by classical writers. See the story of the murder of Asinius (Cic. *pro Cluent.* 13), and the account of the concealment offered to Nero before his death (Suet. *Nero*, 48). A more complete account of the catacombs than any yet given, may be expected in the forthcoming work of the Cavaliere G. B. de Rossi. Some very interesting notices of this work, and descriptions of the Roman catacombs are given in Burgon's *Letters from Rome*, pp. 120–258. "De Rossi finds his earliest dated inscription A. D. 71. From that date to A. D. 300 there are not known to exist so many as thirty Christian inscriptions bearing dates. Of undated inscriptions, however, about 4,000 are referable to the period antecedent to the emperor Constantine" (Burgon, p. 148). [See De Rossi's *Inscriptiones Christ. Urbis Romæ*, Vol. I. Rom. 1861, fol.]

Nothing is known of the first founder of the Christian Church at Rome. Christianity may, perhaps, have been introduced into the city not long after the outpouring of the Holy Spirit on the day of Pentecost, by the "strangers of Rome," who were then at Jerusalem (Acts ii. 10). It is clear that there were many Christians at Rome before St. Paul visited the city (Rom. i. 8, 13, 15, xv. 20). The names of twenty-four Christians at Rome are given in the salutations at the end of the Epistle to the Romans. For the difficult question whether the Roman Church consisted mainly of Jews or Gentiles, see C. and H., *Life of St. Paul*, ii. 157; Alford's *Proleg.*; and especially Prof. Jowett's *Epistles of St. Paul to the Romans, Galatians, and Thessalonians*, ii. 7–26. The view there adopted, that they were a Gentile Church but Jewish converts, seems most in harmony with such passages as ch. i. 5, 13, xi. 13, and with the general tone of the epistle.

Linus (who is mentioned, 2 Tim. iv. 21), and Clement (Phil. iv. 3), are supposed to have succeeded St. Peter as bishops of Rome.

Rome seems to be described under the name of Babylon in Rev. xiv. 8, xvi. 19, xvii. 5, xviii. 2, 21; and again, as the city of the seven hills (Rev. xvii. 9, cf. xii. 3, xiii. 1). See too, for the interpretation of the mystical number 666 in Rev. xiii. 18, Alford's *note*, l. c.

For a good account of Rome at the time of St. Paul's visit, see Conybeare and Howson's *Life of St. Paul*, ch. xxiv., of which free use has been made for the sketch of the city given in this article. J. J. H.

ROOF. [DABERATH, Amer. ed.; HOUSE.]

ROOM. This word is employed in the A. V. of the New Testament as the equivalent of no less than eight distinct Greek[a] terms. The only one of these, however, which need be noticed here is *πρωτοκλισία* (Matt. xxiii. 6; Mark xii. 39; Luke xiv. 7, 8, xx. 46), which signifies, not a "room" in the sense we commonly attach to it of a chamber, but the highest place on the highest couch round the dinner or supper-table — the "uppermost seat," as it is more accurately rendered in Luke xi. 43. [MEALS.] The word "seat" is, however, generally

a 1. Ἀστή (Matt. ii. 22).
2. Χωρίον (Mark ii. 2).
3. Τόπος (Luke ii. 7, xiv. 22; 1 Cor. xiv. 16).
4. Ἠθώ (Luke xii. 17, where the word *room* should be printed in italics).
5. Διάδοχος (i. e. a successor, Acts xxiv. 27).
6. Πρωτοκλισία (chief, highest, uppermost room. See above).
7. Ἀνάγαιον (an upper room, Mark xiv 15; Luke xxii. 12).
8. Τὸ ὑπερῷον (the upper room, Acts i. 13).

Digitized by Google

appropriated by our translators to καθέδρα, which seems to mean some kind of official chair. In Luke xiv. 9, 10, they have rendered τόπος by both "place" and "room."

The UPPER ROOM of the Last Supper is noticed under its own head. [See HOUSE, vol. ii. p. 1105.]

G.

**ROSE** (חֲבַצֶּלֶת, *chabatsteleth*: κρίνον, ἄνθος; Aq. κάλυξ: *flos*, *lilium*) occurs twice only, namely, in Cant. ii. 1, "I am the *Rose* of Sharon," and in Is. xxxv. 1, "the desert shall rejoice and blossom as the *rose*." There is much difference of opinion as to what particular flower is here denoted. Tremellius and Diodati, with some of the Rabbins, believe the rose is intended, but there seems to be no foundation for such a translation. Celsius (*Hierob.* i. 488) has argued in favor of the Narcissus (*Polyanthus narcissus*). This rendering is supported by the Targum on Cant. ii. 1, where *Chabatsteleth* is explained by *narkos* (נַרְקוֹס). This word, says Royle (Kitto's *Cyc.* art. "Chabazzeleth"), is "the same as the Persian *nargus*, the Arabic نرجس, which throughout the East indicates *Narcissus Tazetta*, or the polyanthus narcissus." Gesenius (*Thes.* s. v.) has no doubt that the plant denoted is the "autumn crocus" (*Colchicum autumnale*). It is well worthy of remark that the Syriac translator of Is. xxxv. 1 explains *chabatsteleth* by *chamtsalyotho*,[a] which is evidently the same word, *m* and *b* being interchanged. This Syriac word, according to Michaelis (*Suppl.* p. 659), Gesenius, and Rosenmüller (*Bib. Bot.* p. 142), denotes the *Colchicum autumnale*. The Hebrew word points etymologically to some bulbous plant; it appears to us more probable that the narcissus is intended than the crocus, the former plant being long celebrated for its fragrance, while the other has no odorous qualities to recommend it. Again, as the *chabatsteleth* is associated with the lily in Cant. *l. c.*, it seems probable that Solomon is speaking of two plants which blossomed about the same time. The narcissus and the lily (*Lilium candidum*) would be in blossom together in the early spring, while the *Colchicum* is an autumn plant. Thomson (*Land and Book*, pp. 212, 513) suggests the possibility of the Hebrew name being identical with the Arabic *Khubbaizy* (خبّيزة or خبازي), "the mallow," which plant he saw growing abundantly on Sharon; but this view can hardly be maintained: the Hebrew term is probably a quadriliteral noun, with the harsh aspirate prefixed, and the prominent notion implied in it is *betsel*, "a bulb," and has therefore no connection with the above-named Arabic word. Chateaubriand (*Itinéraire*, ii. 130) mentions the narcissus as growing in the plain of Sharon; and Strand (*Flor. Palæst.* No. 177) names it as a plant of Palestine, on the authority of Rauwolf and Hasselquist; see also Kitto's *Phys. Hist. of Palest.* p. 216. Hiller (*Hierophyt.* ii. 30) thinks the *chabatsteleth* denotes some species of asphodel (*Asphodelus*): but the finger-like roots of this genus of plants do not well accord with the "bulb" root implied in the original word.

Though the rose is apparently not mentioned in the Hebrew Bible, it is referred to in Ecclus. xxiv. 14, where it is said of Wisdom that she is exalted "as a rose-plant (ὡς φυτὰ ῥόδου) in Jericho" (comp. also ch. l. 8; xxxix. 13; Wisd. ii. 8).[b] Roses are greatly prized in the East, more especially for the sake of the rose-water, which is in much request (see Hasselquist, *Trav.* p. 248). Dr Hooker observed the following wild roses in Syria: *Rosa eglanteria* (L.), *R. sempervirens* (L.), *R. Henkeliana*, *R. Phœnicia* (Boiss), *R. seriacea*, *R. angustifolia*, and *R. Libanotica*. Some of these are doubtful species. *R. centifolia* and *damascena* are cultivated everywhere. The so-called "Rose of Jericho" is no rose at all, but the *Anastatica Hierochuntina*, a cruciferous plant, not uncommon on sandy soil in Palestine and Egypt. W. H.

**ROSH** (רֹאשׁ [*head*]: Ῥώς: *Ros*). In the genealogy of Gen. xlvi. 21, Rosh is reckoned among the sons of Benjamin, but the name does not occur elsewhere, and it is extremely probable that "Ehi and Rosh" is a corruption of "Ahiram" (comp. Num. xxvi. 38). See Burrington's *Genealogies*, i. 281.

**ROSH** (רֹאשׁ: Ῥώς, Ez. xxxviii. 2, 3, xxxix. 1: translated by the Vulg. *capitis*, and by the A. V. "chief," as if רֹאשׁ, "head"). The whole sentence thus rendered by the A. V. "Magog the chief prince of Meshech and Tubal," ought to run "Magog the prince of Rosh, Mesech, and Tubal;" the word translated "prince" being נָשִׂיא, the term usually employed for the head of a nomad tribe, as of Abraham (in Gen. xxiii. 6), of the Arabians (Gen. xvii. 20), and of the chiefs of the several Israelite tribes (Num. vii. 11, xxxiv. 18), or in a general sense (1 K. xi. 34; Ez. xii. 10, xlv. 7, xlvi. 2). The meaning is that Magog is the head of the three great Scythian tribes, of which "Rosh" is thus the first. Gesenius considers it beyond doubt that by *Rosh*, or Ῥώς, is intended the tribe on the north of the Taurus, so called from their neighborhood to the *Rha*, or Volga, and that in this name and tribe we have the first trace of the RUSS or RUSSIAN nation. Von Hammer identifies this name with *Rass* in the Koran (xxv. 40; l. 12), "the peoples Aad, Thamud, and the Asshabir (or inhabitants) of Rass or Ross." He considers that Mohammed had actually the passage of Ezekiel in view, and that "Asshabir" corresponds to *Nâsi*, the "prince" of the A. V., and ἄρχοντα of the LXX. (*Sur les Origines Russes*, l'etersburg, 1825, pp. 24–29). The first certain mention of the Russians under this name is in a Latin Chronicle under the year A. D. 839, quoted by Bayer (*Origines Russicæ*, *Comment. Acad. Petropol.* 1726, p. 409). From the junction of *Tiras* with Meshech and Tubal in Gen. x. 2, Von Hammer conjectures the identity of *Tiras* and *Rosh* (p. 26).

The name probably occurs again under the altered form of Rasses, in Judith ii. 23 — this time

---

[a] نصعجنها.

[b] "From the locality of Jericho," says Mr. Tristram, "and the situation by the waters, this rose is most probably the Oleander, the *Rhododendron*, or rose-rose of the Greeks, one of the most beautiful and attractive plants of Palestine, which abounds in all the warmer parts of the country by the side of pools and streams, and flourishes especially at Jericho, where I have not seen our rose" (*Nat. Hist. of the Bible* p. 477). H.

Digitized by Google

in the ancient Latin, and possibly also in the Syriac versions, in connection with Thras or Thars. But the passage is too corrupt to admit of any certain deduction from it. [RASSES.]

This early Biblical notice of so great an empire is doubly interesting from its being a solitary instance. No other name of any modern nation occurs in the Scriptures, and the obliteration of it by the A. V. is one of the many remarkable variations of our version from the meaning of the sacred text of the Old Testament. For all further information see the above-quoted treatises of Von Hammer and Bayer. A. P. S.

**ROSIN.** Properly "naphtha," as it is both in the LXX. and Vulg. (*νάφθα, naphtha*), as well as the Peshito-Syriac. In the Song of the Three Children (23), the servants of the king of Babylon are said to have "ceased not to make the oven hot with *rosin*, pitch, tow, and small wood." Pliny (ii. 101) mentions naphtha as a product of Babylonia, similar in appearance to liquid bitumen, and having a remarkable affinity to fire. To this natural product (known also as Persian naphtha, petroleum, rock oil, Rangoon tar, Burmese naphtha, etc.) reference is made in the passage in question. Sir R. K. Porter thus describes the naphtha springs at Kirkook in Lower Courdistan, mentioned by Strabo (xvii. 738): "They are ten in number. For a considerable distance from them we felt the air sulphurous; but in drawing near it became worse, and we were all instantly struck with excruciating headaches. The springs consist of several pits or wells, seven or eight feet in diameter, and ten or twelve deep. The whole number are within the compass of five hundred yards. A flight of steps has been cut into each pit for the purpose of approaching the fluid, which rises and falls according to the dryness or moisture of the weather. The natives lave it out with ladles into bags made of skins, which are carried on the backs of asses to Kirkook, or to any other mart for its sale. . . . . The Kirkook naphtha is principally consumed by the markets in the southwest of Courdistan, while the pits not far from Kufri supply Bagdad and its environs. The Bagdad naphtha is black" (*Trav.* ii. 440). It is described by Dioscorides (i. 101) as the dregs of the Babylonian asphalt, and white in color. According to Plutarch (*Alex.* p. 35) Alexander first saw it in the city of Ecbatana, where the inhabitants exhibited its marvelous effects by strewing it along the street which led to his headquarters and setting it on fire. He then tried an experiment on a page who attended him, putting him into a bath of naphtha and setting light to it (Strabo, xvii. 743), which nearly resulted in the boy's death. Plutarch suggests that it was naphtha in which Medea steeped the crown and robe which she gave to the daughter of Creon; and Suidas says that the Greeks called it "Medea's oil," but the Medes "naphtha." The Persian name is نفط (*naft*). Posidonius (in Strabo) relates that in Babylonia there were springs of black and white naphtha. The former, says Strabo (xvii. 743), were of liquid bitumen, which they burnt in lamps instead of oil. The latter were of liquid sulphur. W. A. W.

* **ROWERS.** [SHIP (6.)]

* **ROWS,** Cant. i. 10. [ORNAMENTS, PERSONAL, note *s*.]

**RUBIES** (פְּנִינִים, *pĕninyim*; פְּנִינִם, *pĕninim*: λίθοι, λ. πολυτελεῖς: *cuncta opes, cuncta pretiosissima, gemmæ, de ultimis finibus, ebor antiquum*), the invariable rendering of the above-named Hebrew words, concerning the meaning of which there is much difference of opinion and great uncertainty. "The price of wisdom is above *peninim*" (Job xxviii. 18; see also Prov. iii. 15, viii. 11, xxxi. 10). In Lam. iv. 7 it is said, "the Nazarites were purer than snow, they were whiter than milk, they were more ruddy in body than *peninim*." A. Boote (*Animad. Sac.* iv. 3), on account of the ruddiness mentioned in the last passage, supposed "coral" to be intended, for which, however, there appears to be another Hebrew word. [CORAL.] J. D. Michaelis (*Suppl.* p. 2023) is of the same opinion, and compares the Hebrew פְּנִנָּה with the Arab. فَنَن[a], "a branch." Gesenius (*Thes.* s. v.) defends this argument. Bochart (*Hieroz.* iii. 601) contends that the Hebrew term denotes pearls, and explains the "ruddiness" alluded to above, by supposing that the original word (אָדַם) signifies merely "bright in color," or "color of a reddish tinge." This opinion is supported by Rosenmüller (*Schol. in Thren.*), and others, but opposed by Maurer (*Comment.*) and Gesenius. Certainly it would be no compliment to the great people of the land to say that their bodies were as red as coral or rubies, unless we adopt Maurer's explanation, who refers the "ruddiness" to the blood which flowed in their veins. On the whole, considering that the Hebrew word is always used in the plural, we are inclined to adopt Bochart's explanation, and understand pearls to be intended.[a] [PEARLS.] W. H.

* **RUDDER-BANDS,** Acts xxvii. 40 [SHIP (2.)]

**RUE** (*πήγανον*: *ruta*) occurs only in Luke xi 42: "Woe unto you, Pharisees! for ye tithe mint and rue and all manner of herbs." The rue here spoken of is doubtless the common *Ruta graveolens*, a shrubby plant about 2 feet high, of strong medicinal virtues. It is a native of the Mediterranean coasts, and has been found by Hasselquist on Mount Tabor. Dioscorides (iii. 45) describes two kinds of *πήγανον*, namely, *π. ὀρεινὸν* and *π. κηπευτόν*, which denote the *Ruta montana* and *R. graveolens* respectively. Rue was in great repute amongst the ancients, both as a condiment and as a medicine (Pliny, *N. H.* xix. 8; Columell. *R. Rus.* xii. 7. § 5; Dioscorides, *l. c.*). The Talmud enumerates rue amongst kitchen-herbs (*Shebiith*, ch. ix. § 1), and regards it as free of tithe, as being a plant not cultivated in gardens. In our Lord's time, however, rue was doubtless a garden-plant, and therefore tithable, as is evident from our Lord's words, "these things ought ye to have

[a] The Chald. דְּרַר (Esth. i. 6), which the A. V. renders "white," and which seems to be identical with the Arab. دُرّ, *durr*, "pearls;" دُرَّة, *durrah*, "a pearl," is by some understood to mean "mother of pearl," or the kind of alabaster called in German *Perlenmutterstein*. The LXX. has *πίννινος λίθος*. See Gesenius, and Winer (*Bibl. Realw.* i. 71).

Digitized by Google

done." The rue is too well known to need description.[a] W. H.

**RU'FUS** (Ῥοῦφος [*red, reddish*]: *Rufus*) is mentioned in Mark xv. 21, along with Alexander, as a son of Simon the Cyrenæan, whom the Jews compelled to bear the cross of Jesus on the way to Golgotha (Luke xxiii. 26). As the Evangelist informs his readers who Simon was by naming the sons, it is evident that the latter were better known than the father in the circle of Christians where Mark lived. Again, in Rom. xvi. 13, the Apostle Paul salutes a Rufus whom he designates as "elect in the Lord" (ἐκλεκτὸν ἐν Κυρίῳ), and whose mother he gracefully recognizes as having earned a mother's claim upon himself by acts of kindness shown to him. It is generally supposed that this Rufus was identical with the one to whom Mark refers; and in that case, as Mark wrote his gospel in all probability at Rome, it was natural that he should describe to his readers the father (who, since the mother was at Rome while the father apparently was not there, may have died, or have come later to that city) from his relationship to two well-known members of the same community. It is some proof at least of the early existence of this view that, in the *Actis Andreæ et Petri*, both Rufus and Alexander appear as companions of Peter in Rome. Assuming, then, that the same person is meant in the two passages, we have before us an interesting group of believers — a father (for we can hardly doubt that Simon became a Christian, if he was not already such, at the time of the crucifixion), a mother, and two brothers, all in the same family. Yet we are to bear in mind that Rufus was not an uncommon name (Wetstein, *Nov. Test.*, vol. i. p. 634); and possibly, therefore, Mark and Paul may have had in view different individuals. H. B. H.

**RUHA'MAH** (רֻחָמָה [*commiserated*]: ἠλεημένη: *misericordium consecuta*). The margin of our version renders it "having obtained mercy" (Hos. ii. 1). The name, if name it be, is like Lo-ruhamah, symbolical, and as that was given to the daughter of the prophet Hosea, to denote that God's mercy was turned away from Israel, so the name Ruhamah is addressed to the daughters of the people to denote that they were still the objects of his love and tender compassion.

**RU'MAH** (רוּמָה [*high, exalted*]: Ῥουμά: Joseph. Ἀβούμα: *Ruma*). Mentioned, once only (2 K. xxiii. 36), as the native place of a certain Pedaiah, the father of Zebudah, a member of the harem of king Josiah, and mother of Eliakim or Jehoiakim king of Judah.

It has been conjectured to be the same place as Arumah (Judg. ix. 41), which was apparently near Shechem. It is more probable that it is identical with Dumah, one of the towns in the mountains of Judah, near Hebron (Josh. xv. 52), not far distant from Libnah, the native town of another of Josiah's wives. The Hebrew D and R are so similar as often to be confounded together, and Dumah must have at any rate been written Rumah in the Hebrew text from which the LXX. translated, since they give it as Remma and Rouma.

Josephus mentions a Rumah in Galilee (*B. J.* ii. 7, § 21). G.

[a] "We collected," says Tristram, "four species still in Palestine. *Ruta graveolens* is cultivated" (*Nat. Hist. of the Bible*, p. 478). H.

**RUSH.** [REED.]

**RUST** (βρῶσις, *ἰός*: *ærugo*) occurs as the translation of two different Greek words in Matt. vi. 19, 20, and in Jam. v. 3. In the former passage the word βρῶσις, which is joined with σής, "moth," has by some been understood to denote the larva of some moth injurious to corn, as the *Tinea granella* (see Stainton, *Insecta Britan.* iii. 30). The Hebrew עָשׁ (Is. l. 9) is rendered βρῶσις by Aquila: comp. also *Epist. Jerem.* v. 12, ἀπὸ ἰοῦ καὶ βρωμάτων, "from rust and moths" (A. V. Bar. vi. 12). Scultetus (*Exerc. Evang.* ii. 35, *Crit. Sac.* vi.) believes that the words σὴς καὶ βρῶσις are an hendiadys for σὴς βρώσκων. The word can scarcely be taken to signify "rust," for which there is another term, *ἰός*, which is used by St. James to express rather the "tarnish" which overspreads silver than "rust," by which name we now understand "oxide of iron." Βρῶσις is no doubt intended to have reference in a general sense to any corrupting and destroying substance that may attack treasures of any kind which have long been suffered to remain undisturbed. The allusion of St. James is to the corroding nature of *ἰός* on metals. Scultetus correctly observes, "ærugine deformantur quidem, sed non corrumpuntur nummi;" but though this is strictly speaking true, the ancients, just as ourselves in common parlance, spoke of the corroding nature of "rust" (comp. Hammond, *Annotat.* in Matt. vi. 19). W. H.

**RUTH** (רוּת: Ῥούθ: probably for רְעוּת,[b] "a friend," the feminine of Reu). A Moabitish woman, the wife, first, of Mahlon, secondly of Boaz, and by him mother of Obed, the ancestress of David and of Christ, and one of the four women (Thamar, Rahab, and Uriah's wife being the other three) who are named by St. Matthew in the genealogy of Christ. [RAHAB.] The incidents in Ruth's life, as detailed in the beautiful book that bears her name, may be epitomized as follows. A severe famine in the land of Judah, caused perhaps by the occupation of the land by the Moabites under Eglon (as Ussher thinks possible),[c] induced Elimelech, a native of Bethlehem Ephratah, to emigrate into the land of Moab, with his wife Naomi, and his two sons, Mahlon and Chilion. At the end of ten years Naomi, now left a widow and childless, having heard that there was plenty again in Judah, resolved to return to Bethlehem, and her daughter-in-law, Ruth, returned with her. "Whither thou goest, I will go, and where thou lodgest, I will lodge: thy people shall be my people, and thy God my God: where thou diest I will die and there will I be buried: the Lord do so to me, and more also, if aught but death part thee and me:" was the expression of the unalterable attachment of the young Moabitish widow to the mother, to the land, and to the religion of her lost husband. They arrived at Bethlehem just at the beginning of barley harvest, and Ruth, going out to glean for the support of her mother-in-law and herself, chanced to go into the field of Boaz, a wealthy man, the near kinsman of her father-in-law Elimelech. The story of her virtues and her kindness and fidelity to her mother-in-law, and her preference for the land of her husband's birth, had gone before

[b] Some think it is for רְאוּת, "beauty."

[c] Patrick suggests the famine in the days of Gideon (Judg. vi. 3, 4).

Digitized by Google

ner; and immediately upon learning who the strange young woman was, Boaz treated her with the utmost kindness and respect, and sent her home laden with corn which she had gleaned. Encouraged by this incident, Naomi instructed Ruth to claim at the hand of Boaz that he should perform the part of her husband's near kinsman, by purchasing the inheritance of Elimelech, and taking her to be his wife. But there was a nearer kinsman than Boaz, and it was necessary that he should have the option of redeeming the inheritance for himself. He, however, declined, fearing to mar his own inheritance. Upon which, with all due solemnity, Boaz took Ruth to be his wife, amidst the blessings and congratulations of their neighbors. As a singular example of virtue and piety in a rude age and among an idolatrous people; as one of the first-fruits of the Gentile harvest gathered into the Church; as the heroine of a story of exquisite beauty and simplicity; as illustrating in her history the workings of Divine Providence, and the truth of the saying, that "the eyes of the Lord are over the righteous;" and for the many interesting revelations of ancient domestic and social customs which are associated with her story, Ruth has always held a foremost place among the Scripture characters. St. Augustine has a curious speculation on the relative blessedness of Ruth, twice married, and by her second marriage becoming the ancestress of Christ, and Anna remaining constant in her widowhood (*De bono Viduit.*). Jerome observes that we can measure the greatness of Ruth's virtue by the greatness of her reward — "Ex ejus semine Christus oritur" (*Epist.* xxii. *ad Paulam*). As the great-grandmother of King David, Ruth must have flourished in the latter part of Eli's judgeship, or the beginning of that of Samuel. But there seem to be no particular notes of time in the book, by which her age can be more exactly defined. The story was put into its present shape, avowedly, long after her lifetime: see Ruth i. 1, iv. 7, 17. (Bertheau on Ruth, in the *Exeg. Handb.*; Rosenmüll. *Proœm. in Lib Ruth*; Parker's De Wette; Ewald, *Gesch.* i. 205, iii. 760 ff.) A. C. H.

* **RUTH, BOOK OF.** The plan of the *Dictionary* requires that some account should be given of the book of which Ruth is the heroine. The topics which claim remark are — its place in the canon, its age, authorship, object, sources of the history, its archæology and the additional literature.

The position of this book in the English Bible accords with that of the Septuagint, it being very properly inserted between Judges and 1 Samuel as essentially a supplement to the former and an introduction to the latter, for though Eli and Samuel as the immediate precursors of the kings occupy a place in 1 Samuel, the book of Ruth forms a connecting link between the period of the judges and that of the monarchy. If Obed the son of Boaz was the father of Jesse (iv. 17) the events which the book of Ruth relates must have taken place in the last century of the age of the judges. The arrangement in our ordinary Hebrew Bibles at present places this history, without any regard to the chronology, among the *hagiographa* or sacred writings (Psalms, Proverbs, Job, Solomon's Song, Ruth, Lamentations, Ecclesiastes, Esther, Daniel, Ezra, Nehemiah, Chronicles), so classified with reference to their ethical or practical contents. [CANON.] Yet some critics maintain that the original Hebrew order was that of the Septuagint and the other a later transposition. (See against that view Cassel, *Das Buch Ruth*, p. 201 f.)

The date of the composition it is impossible to ascertain with much precision. It must have been written after the birth of David (iv. 17) and probably after his reign; for the genealogy at the close presupposes that he had acquired at the time a historical and theocratic importance which belonged to him only after he had finished his career as warrior, king, and prophet. It is no certain proof of a much later authorship than this that the custom of "plucking off the shoe" as a legal form had become obsolete when the book was written (iv. 7, 8), for many changes in the life of the Hebrews must have taken place rapidly after the establishment of the monarchy, and in addition to this, if Boaz was the immediate ancestor of Obed, and Obed was the father of Jesse (iv. 17) an interval of three generations at least lay between Boaz and the close of David's reign. Some critics point out certain words and grammatical forms in the book which they allege to be proof of a later composition, and would even bring it down to the Chaldee period of Jewish history. Examples of this are תַּדְבָּקִין, תַּעֲבוּרִי (ii. 8, 21), יְקַצְּרוּן (ii. 9), יָדַעְתִּי שָׁמְתִּי (iii. 3), שָׁכַבְתִּי (iii. 4), מָרָא instead of מָרָה (i. 20), לָהֵן instead of לָכֵן, and others, but as these and some other expressions, partly peculiar and partly infrequent only, either do not occur at all in the later books, or occur at the same time in some of the earlier books, they surely cannot be alleged with any confidence as marks of a Chaldee style (see Keil's Einl. *in das A. Test.* p. 415 f., and Wright's *Book of Ruth*, p. xli. ff.). The few uncommon words or phrases are found in fact in the passages of our book where the persons introduced appear as the speakers, and not in the language of the historian, and may be considered as relics of the conversational phraseology of the age of the judges, which happen to be not elsewhere preserved. Bleek decides in like manner that the language of the book settles nothing with regard to the time when the book was written. The earlier origin of the book of Ruth, as De Wette admits (*Einl. in das A. Test.* § 194), is manifest from the entire absence of any repugnance to intermarriage between the Hebrews and foreigners. The extraction of Ruth is not regarded as offensive or requiring so much as a single word of apology. It is impossible on this account that it should belong to the time of Ezra and Nehemiah, when so different a feeling prevailed in regard to such alliances (see Ezr. ix. and x. and Neh. xiii. 23 ff.). The author is unknown. One of the Jewish traditions names Samuel as the writer; but, as has been suggested already, David was comparatively unknown till after the death of Samuel.

With regard to the sources of the history we can only say with Bleek (*Einl. in das A. Test.* p. 355) that we cannot decide whether the writer found and used an extant written document or merely followed some tradition preserved in the family of David which came to his knowledge. Nothing in the significance of the personal Hebrew names casts any doubt on the truthfulness of the narrative. Out of all the names occurring there only two, Mahlon and Chilion, give the least semblance of truth to that allegation. The correspondence between the meaning of these (as usually defined)

Digitized by Google

and the early death of the persons who bear them, may be accidental, or the original names may have been changed after their death. On this point see CHILION and NAMES (Amer. ed.).

The object of the book has been variously stated. That the author merely intended to uphold the authority of the levirate law requiring a brother-in-law to marry the widow of a deceased brother (Gen. xxxviii. 8; Deut. xxv. 5 ff.) is entirely improbable; for the assumption of that relationship appears here only as an incident of the history, and in reality Boaz was not the brother of Mahlon, the husband of Ruth (iv. 10), but only a remote kinsman of the family, and his action in the case was voluntary and not required by any Mosaic statute. To regard also the object as merely that of tracing the genealogy of David's family is certainly too limited a view. We must find the explanation of the purpose in the facts themselves which the history relates, and the narrator's manifest interest in precisely these facts as shown in the tone and coloring which he has given to the history. It is the pious, genuinely theocratic spirit exhibited by the actors in the little book, which confers upon it its higher importance and characteristic unity. This aim and tendency appear most conspicuously in ii. 11, 12. Ruth has left her heathen native land; the God of her mother-in-law is her God (i. 16). She has gone to an unknown people, has taken refuge under the wings of the God of Israel, has looked to Him for help, and has found more than she could expect or conceive of in being permitted to become the mother of the royal house of David. (See Hävernick's *Einl. in das A. Test.* ii. 113.) The fact that Matthew (i. 3–6), who adds however the names of Thamar and Rahab, and Luke (iii. 31–33) insert the genealogy of David as given at the end of the book in the tables of the genealogy of Christ, not only shows that the book of Ruth formed a recognized part of the Hebrew Scriptures, but that God's arrangements in providing a Saviour for all the races of mankind held forth a significant foretoken of this universality in the character of the Saviour's lineage as derived from Gentile ancestors as well as Jewish. David's descent from Ruth is known to us only from this book. The books of Samuel are silent on this point, and Chronicles, though they mention Boaz as one of his ancestors, say nothing of Ruth (1 Chr. ii. 11, 12).

The illustrations of oriental life furnished by modern travellers impart to this book a character of vividness and reality which deserves attention. Naomi and Ruth arrived at Beth-lehem from the land of Moab "in the beginning of barley harvest" (i. 22). It was about the first of April, therefore, for the cereal crops are generally ripe in the south of Palestine at that time. Beth-lehem, which signifies "house of bread" with reference to its fertility, is still famous for its fields of grain, which occur especially on the plains eastward as one approaches from the valley of the Jordan. Such fields now, as was true anciently, are not enclosed by walls or hedges, but separated by single stones set up here and there, or by a footpath only; and hence it is said that it was "the hap" or lot of Ruth to light upon the part of the field which belonged to Boaz (ii. 3). Notice the local precision of the narrator. To reach the grain-fields or threshing-floor from her home in Beth-lehem Ruth "went down" from the city (iii. 3, 6); for Beth-lehem is on higher ground than the adjacent region, and especially on the south and east side is almost precipitously cut off from its environs. The gleaning after the reapers (ii. 3, 7, 16) was allowed to the poor among the Hebrews (a right guaranteed by an express Mosaic statute), and is still practiced in the East. Dr. Thomson being in the vicinity of Beth-lehem at the time of barley-harvest states that he saw women and children gleaning after every company of reapers (*Land and Book*, ii. 509). The "parched corn" which Boaz gave her at their rustic repast was not such in our sense of the expression, but consisted of roasted heads of grain. The mode of preparing the food we learn from the methods still employed. Mr. Tristram describes one of them which he saw in Galilee near Lake *Huleh*. "A few sheaves of wheat were tossed on the fire, and as soon as the straw was consumed the charred heads were dexterously swept from the embers on to a cloak spread on the ground. The women of the party then beat the ears and tossed them into the air until they were thoroughly winnowed, when the wheat was eaten without further preparation. . . . The green ears had become half charred by the roasting, and there was a pleasant mingling of milky wheat and a fresh crust flavor as we chewed the parched corn" (*Land of Israel*, p. 590). According to another method some of the best ears, with the stalks attached, are tied into small parcels, and the corn-heads are held over the fire until the chaff is mostly burned off; and, after being thus roasted, they are rubbed out in the hand and the kernels eaten (Thomson, ii. 510). The Hebrew terms for corn thus roasted are קָלִי and קָלְיָא (Lev. xxiii. 14; Ruth ii. 14; 1 Sam. xvii. 17, xxv. 18; and 2 Sam. xvii. 18).

The *chomets* or vinegar in which the eaters dipped their morsel (ii. 14) was sour wine mingled with oil, still a favorite beverage among the people of the East (see Keil's *Bibl. Archæologie*, ii. 16). At the close of the day Ruth beat out the grain of the ears which she had gathered (ii. 17). "It is a common sight now," says Thomson, "to see a poor woman or maiden sitting by the way-side and beating out with a stick or stone the grain-stocks which she has gleaned" (*Land and Book*, ii. 509). As late as May 21, not far from Gaza, says Robinson, "we found the lazy inhabitants still engaged in treading out the barley harvest, which their neighbors had completed long before. Several women were beating out with a stick handfuls of the grain which they seemed to have gleaned" (*Bibl. Res.* ii. 385). In another field the next day he saw "200 reapers and gleaners at work; a few were taking refreshments and offered us some of their parched corn" (*Bibl. Res.* iii. 394). The winnowing took place by night in accordance with the agricultural habits of the land at present; for the heat being oppressive by day the farmers avoid its power as much as possible, and the wind also is said to be stronger by night than during the day. The Hebrew term (*goren*) describes the threshing-floor as simply a plot of ground in the open air, smoothed off and beaten hard, such as the traveller now sees everywhere as he passes through the country. It might seem strange that a rich proprietor, like Boaz, should be said to have slept at night in such a place; but that is the custom still, rendered necessary by the danger of pillage and the untrustworthiness of the hired laborers. Robinson, speaking of a night spent in the mountains of Hebron

Digitized by Google

says: "Here are needed no guards around the tent; the owners of the crops came every night and slept upon their threshing-floors. We were here in the midst of scenes precisely like those of the book of Ruth (iii. 2–14); where Boaz winnowed barley and laid himself down at night to guard the heap of corn" (*Bibl. Res.* ii. 446). "It is not unusual for the husband, wife, and all the family to encamp at the *baiders* or threshing-floors, until the harvest is over" (Thomson, ii. 511). The "vail" in which Ruth carried home the "six measures of barley" given to her by Boaz, was a mantle as well as veil, "a square piece of cotton cloth" such as eastern women still wear: "and I have often seen it used," says Thomson, "for just such service as that to which Ruth applied hers" (ii. 509). Barley is rarely used for purposes of food in Syria except by the poor; and that Ruth and Naomi are represented as glad to avail themselves of such means of subsistence comports with the condition of poverty which the narrative ascribes to them. [BARLEY.] The scene in the square at the gate (iv. 1–12) is thoroughly oriental. It is hardly necessary to say that the gate in eastern cities is now and has been from time immemorial the place of concourse where the people come together to hear the news, to discuss public affairs, to traffic, dispense justice, or do anything else, that pertains to the common welfare (Gen. xix. 1, xxxiv. 20; Deut. xvi. 18; xxi. 19).

Some of the writers on this book are mentioned in the article on RUTH. The following may be added: Umbreit, *Ueber Geist u. Zweck des Buchs Ruth*, in the *Studien u. Kritiken*, 1834, pp. 305–308. F. Benary, *De Hebræorum Leviratu*, pp. 1–70 (1835). C. L. F. Metzger, *Lib. Ruth ex Hebr. in Lat. vers. perpetuaque interpr. illustr.* (Tub. 1856). Keil, *Bibl. Commentar*, iii. 357–382, and transl. in Clark's *Foreign Theol. Library*, viii. pp. 465–494. Paulus Cassel, *Das Buch der Richter u. Ruth*, in Lange's *Bibelwerk*, pp. 198–242 (1865). C. H. H. Wright, *Book of Ruth in Hebrew and Chaldee* (pp. vii.–xlviii. and 1–76, 1–49), containing a critically revised text to the Chaldee Targum of Ruth and valuable notes, explanatory and philological (1865). Christopher Wordsworth, *Joshua, Judges, Ruth*, in his *Holy Bible, with Introductions and Notes*, ii. pt. i. pp. 158–170 (1865). Bishop Hall, two sermons on *Naomi and Ruth* and *Boaz and Ruth*, in his *Contemplations*, bk. xi. Stanley's *Lectures on the Jewish Church*, i. 336–38. H.

**RYE** (כֻּסֶּמֶת, *cussemeth*: ζεά, ὄλυρα: *faw, vicia*) occurs in Ex. ix. 32; Is. xxviii. 25; in the latter the margin reads "spelt." In Ez. iv. 9 the text has "fitches" and the margin "rie." There are many opinions as to the signification of *cussemeth*; some authorities maintaining that fitches are denoted, others oats, and others rye. Celsius has shown that in all probability "spelt" is intended (*Hierob.* ii. 98), and this opinion is supported by the LXX. and the Vulg. in Ex. ix. 32, and by the Syriac versions. Rye is for the most part a northern plant, and was probably not cultivated in Egypt or Palestine in early times, whereas spelt has been long cultivated in the East, where it is held in high estimation. Herodotus (ii. 36) says the Egyptians "make bread from spelt (ἀπὸ ὀλυρέων), which some call zea." See also Pliny (*H. N.* xviii. 8), and Dioscorides (ii. 111), who speaks of two kinds. The *cussemeth* was cultivated in Egypt; it was not injured by the hail-storm of the seventh plague (Ex. *l. c.*), as it was not grown up. This cereal was also sown in Palestine (Is. *l. c.*), on the margins or "headlands" of the fields (גְּבֻלֹתָו); it was used for mixing with wheat, barley, etc., for making bread (Ez. *l. c.*). The Arabic, *Chirsanat*, "spelt," is regarded by Gesenius as identical with the Hebrew word, *m* and *n* being interchanged and *r* inserted. "Spelt" (*Triticum spelta*) is grown in some parts of the south of Germany; it differs but slightly from our common wheat (*T. vulgare*). There are three kinds of spelt, namely, *T. spelta*, *T. dicoccum* (rice wheat), and *T. monococcum*. [RIE, Amer. ed.] W. H.

## S.

**SAB'AOTH, THE LORD OF** (Κύριος σα βαώθ: *Dominus Sabaoth*). The name is found in the English Bible only twice (Rom. ix. 29; James v. 4). It is probably more familiar through its occurrence in the Sanctus of the Te Deum[a] — "Holy, Holy, Holy, Lord God of Sabaoth." It is too often considered to be a synonym of, or to have some connection with Sabbath, and to express the idea of rest. And this not only popularly, but in some of our most classical writers.[b] Thus Spenser, *Faery Queen*, book vii. canto viii. 2:—

> "But thenceforth all shall rest eternally
> With Him that is the God of Sabaoth hight:
> O that great Sabaoth God, grant me that Sabaoth's sight."

And Bacon, *Advancement of Learning*, ii. 24: — ". . . sacred and inspired Divinity, the Sabaoth and port of all men's labors and peregrinations" And Johnson, in the 1st edition of whose *Dictionary* (1755) Sabaoth and Sabbath are treated as the same word. And Walter Scott, *Ivanhoe*, i. ch. 11 (1st ed.): — "a week, aye the space between two Sabaoths." But this connection is quite fictitious The two words are not only entirely different, but have nothing in common.

Sabaoth is the Greek form of the Hebrew word *tsebâôth*, "armies," and occurs in the oft-repeated formula which is translated in the Authorized Version of the Old Test. by "Lord of hosts," "Lord God of *hosts*." We are apt to take "*hosts*" (probably in connection with the modern expression the "heavenly host") as implying the angels — but this is surely inaccurate. *Tsebâôth* is in constant use in the O. T. for the national army or force of fighting-men,[c] and there can be no doubt that in the mouth and the mind of an ancient Hebrew, *Jehovah-tsebâôth* was the leader and commander of the armies of the nation, who "went forth with them" (Ps. xliv. 9), and led them to certain victory over the worshippers of Baal, Chemosh, Molech, Ashtaroth, and other false gods. In later times it lost this peculiar significance, and became little if anything more than an alternative title for God. The name is not found in the Pentateuch,

[a] Can it be this phrase which determined the use of the Te Deum as a thanksgiving for victories?

[b] For the passages which follow, the writer is indebted to the kindness of a friend.

Digitized by Google

or the books of Joshua, Judges, or Ruth. It is frequent in the books of Samuel, rarer in Kings, is found twice only in the Chronicles, and not at all in Ezekiel; but in the Psalms, in Isaiah, Jeremiah, and the minor Prophets it is of constant occurrence, and in fact is used almost to the exclusion of every other title. [TSEVAOTH, Am. ed.] G.

**SA'BAT** (Σαφάγ; Alex. Σαφατ; [Ald. Σαβάτ:] *Phasphat*). 1. The sons of Sabat are enumerated among the sons of Solomon's servants who returned with Zorobabel (1 Esdr. v. 34). There is no corresponding name in the lists of Ezra and Nehemiah.

2. (Σαβάτ: *Sabath.*) The month SEBAT (1 Macc. xvi. 14).

**SABATE'AS** [A.V. ed. 1611, **SABATE'US**] (Σαβαταῖος; Alex. Σαββαταιας; [Ald. Σαβατvalas:] *Sabbatheus*). SHABBETHAI (1 Esdr. ix. 48; comp. Neh. viii. 7).

**SAB'ATUS** (Σάβαθος: [Ald. Σάβατος:] *Zabdis*). ZABAD (1 Esdr. ix. 28; comp. Ezr. x. 27).

**SAB'BAN** (Σαβάννος: *Banni*). BINNUI 1 (1 Esdr. viii. 63; comp. Ezr. viii. 33).

**SABBATH** (שַׁבָּת, "a day of rest," from שָׁבַת, "to cease to do," "to rest"). This is the obvious and undoubted etymology. The resemblance of the word to שֶׁבַע, "seven," misled Lactantius (*Inst.* iii. 14) and others; but it does not seem more than accidental. Bähr (*Symbolik*, ii. 533–34) does not reject the derivation from שָׁבַת, but traces that to שׁוּב, somewhat needlessly and fancifully, as it appears to us. Plutarch's association of the word with the Bacchanalian cry σαβοῖ may of course be dismissed at once. We have also (Ex. xvi. 23, and Lev. xxiii. 24) שַׁבָּתוֹן, of more intense signification than שַׁבָּת; also שַׁבַּת שַׁבָּתוֹן, "a Sabbath of Sabbaths" (Ex. xxxi. 15, and elsewhere). The name *Sabbath* is thus applied to divers great festivals, but principally and usually to the seventh day of the week, the strict observance of which is enforced not merely in the general Mosaic code, but in the Decalogue itself.

The first Scriptural notice of the weekly Sabbath, though it is not mentioned by name, is to be found in Gen. ii. 3, at the close of the record of the six days' creation. And hence it is frequently argued that the institution is as old as mankind, and is consequently of universal concern and obligation. We cannot, however, approach this question till we have examined the account of its enforcement upon the Israelites. It is in Ex. xvi. 23–29 that we find the first incontrovertible institution of the day, as one given to, and to be kept by, the children of Israel. Shortly afterwards it was reënacted in the Fourth Commandment, which gave it a rank above that of an ordinary law, making it one of the signs of the Covenant. As such it remained together with the Passover, the two forming the most solemn and distinctive features of Hebrew religious life. Its neglect or profanation ranked foremost among national sins; the renewed observance of it was sure to accompany national reformation.

Before, then, dealing with the question whether its original institution comprised mankind at large, or merely stamped on Israel a very marked badge of nationality, it will be well to trace somewhat of its position and history among the chosen people.

Many of the Rabbis date its first institution from the incident[a] recorded in Ex. xv. 25; and believe that the "statute and ordinance" there mentioned as being given by God to the children of Israel was that of the Sabbath, together with the commandment to honor father and mother, their previous law having consisted only of what are called the "seven precepts of Noah." This, however, seems to want foundation of any sort, and the statute and ordinance in question are, we think, sufficiently explained by the words of ver. 26, "If thou wilt diligently hearken," etc. We are not on sure ground till we come to the unmistakable institution in ch. xvi. in connection with the gathering of manna. The words in this latter are not in themselves enough to indicate whether such institution was altogether a novelty, or whether it referred to a day the sanctity of which was already known to those to whom it was given. There is plausibility certainly in the opinion of Grotius, that the day was already known, and in some measure observed as holy, but that the rule of abstinence from work was first given then, and shortly afterwards more explicitly imposed in the Fourth Commandment. There it is distinctly set forth, and extended to the whole of an Israelite's household, his son and his daughter, his slaves, male and female, his ox and his ass, and the stranger within his gates. It would seem that by this last was understood the stranger who while still uncircumcised yet worshipped the true[b] God; for the mere heathen stranger was not considered to be under the law of the Sabbath. In the Fourth Commandment, too, the institution is grounded on the revealed truth of the six days' creation and the Divine rest on the seventh; but in the version of it which we find in Deuteronomy a further reason is added: "And remember that thou wast a stranger in the land of Egypt, and that the Lord thy God brought thee forth with a mighty hand and by a stretched-out arm; therefore the Lord thy God commanded thee to keep the Sabbath day" (Deut. v. 15).

Penalties and provisions in other parts of the Law construed the abstinence from labor prescribed in the commandment. It was forbidden to light a fire, a man was stoned for gathering sticks, on the Sabbath. At a later period we find the Prophet Isaiah uttering solemn warnings against profaning, and promising large blessings on the due observance of the day (Is. lviii. 13, 14). In Jeremiah's time there seems to have been an habitual violation of it, amounting to transacting on it such an extent of business as involved the carrying burdens about (Jer. xvii. 21–27). His denunciations of this seem to have led the Pharisees in their bondage to the letter to condemn the impotent man for carrying his bed on the Sabbath in obedience to Christ who had healed him (John v. 10). We must not suppose that our Lord prescribed a real violation of the Law; and it requires little thought to distinguish between such a natural and almost necessary act as that which He commanded, and the carrying of burdens in connection with business which is denounced by Jeremiah. By Ezekiel (xx. 12–24), a passage to which we must shortly return, the profanation of the Sabbath is made foremost among the national sins of the Jews. From Nehemiah x. 31, we learn that the people entered

[b] Vide Grotius *in loc.*, who refers to Aben-Ezra.

Digitized by Google

into a covenant to renew the observance of the Law, in which they pledged themselves neither to buy nor sell victuals on the Sabbath. The practice was then not infrequent, and Nehemiah tells us (xiii. 15–22) of the successful steps which he took for its stoppage.

Henceforward there is no evidence of the Sabbath being neglected by the Jews except such as (1 Macc. i. 11–15, 39–45) went into open apostasy. The faithful remnant were so scrupulous concerning it, as to forbear fighting in self-defense on that day (1 Macc. ii. 36), and it was only the terrible consequences that ensued which led Mattathias and his friends to decree the lawfulness of self-defense on the Sabbath (1 Macc. ii. 41).

When we come to the N. T. we find the most marked stress laid on the Sabbath. In whatever ways the Jew might err respecting it, he had altogether ceased to neglect it. On the contrary, wherever he went its observance became the most visible badge of his nationality. The passages of Latin literature, such as Ovid, *Art. Amat.*, i. 415; Juvenal, *Sat.* xiv. 96–106, which indicate this, are too well known to require citation. Our Lord's mode of observing the Sabbath was one of the main features of his life, which his Pharisaic adversaries most eagerly watched and criticised. They had by that time invented many of those fantastic prohibitions whereby the letter of the commandment seemed to be honored at the expense of its whole spirit, dignity, and value; and our Lord, coming to vindicate and fulfill the Law in its real scope and intention, must needs come into collision with these.

Before proceeding to any of the more curious questions connected with the Sabbath, such as that of its alleged pre-Mosaic origin and observance, it will be well to consider and determine what were its true idea and purpose in that Law of which beyond doubt it formed a leading feature, and among that people for whom, if for none else, we know that it was designed. And we shall do this with most advantage, as it seems to us, by pursuing the inquiry in the following order: —

I. By considering, with a view to their elimination, the Pharisaic and Rabbinical prohibitions. These we have the highest authority for rejecting, as inconsistent with the true scope of the Law.

II. By taking a survey of the general Sabbatical periods of Hebrew time. The weekly Sabbath stood in the relation of key-note to a scale of Sabbatical observance, mounting to the Sabbatical year and the year of Jubilee.[a] It is but reasonable to suspect that these can in some degree interpret each other.

III. By examining the actual enactments of Scripture respecting the seventh day, and the mode in which such observance was maintained by the best Israelites.

I. Nearly every one is aware that the Pharisaic and Rabbinical schools invented many prohibitions respecting the Sabbath of which we find nothing in the original institution. Of these some may have been legitimate enforcements in detail of that institution, such as the Scribes and Pharisees "sitting in Moses' seat" (Matt. xxiii. 2, 3) had a right to impose. How a general law is to be carried out in particular cases, must often be determined for others by such as have authority to do so. To this class may belong the limitation of a Sabbath-day's journey, a limitation not absolutely at variance with the fundamental canon that the Sabbath was made for man, not man for the Sabbath, although it may have proceeded from mistaking a temporary enactment for a permanent one. Many, however, of these prohibitions were fantastic and arbitrary, in the number of those "heavy burdens and grievous to be borne" which the later expounders of the Law "laid on men's shoulders." We have seen that the impotent man's carrying his bed was considered a violation of the Sabbath — a notion probably derived from Jeremiah's warnings against the commercial traffic carried on at the gates of Jerusalem in his day. The harmless act of the disciples in the corn-field, and the beneficent healing of the man in the synagogue with the withered hand (Matt. xii. 1–13), were alike regarded as breaches of the Law. Our Lord's reply in the former case will come before us under our third head; in the latter He appeals to the practice of the objectors, who would any one of them raise his own sheep out of the pit into which the animal had fallen on the Sabbath-day. From this appeal, we are forced to infer that such practice would have been held lawful at the time and place in which He spoke. It is remarkable, however, that we find it prohibited in other traditions, the law laid down being, that in this case a man might throw some needful nourishment to the animal, but must not pull him out till the next day. (See Heylin, *Hist. of Sabbath*, i. 8, quoting Buxtorf.) This rule possibly came into existence in consequence of our Lord's appeal, and with a view to warding off the necessary inference from it. Still more fantastic prohibitions were issued. It was unlawful to catch a flea on the Sabbath, except the insect were actually hurting his assailant, or to mount into a tree, lest a branch or twig should be broken in the process. The Samaritans were especially rigid in matters like these; and Dositheus, who founded a sect amongst them, went so far as to maintain the obligation of a man's remaining throughout the Sabbath in the posture wherein he chanced to be at its commencement — a rule which most people would find quite destructive of its character as a day of rest. When minds were occupied with such *micrology*, as this has been well called, there was obviously no limit to the number of prohibitions which they might devise, confusing, as they obviously did, abstinence from action of every sort with rest from business and labor.

That this perversion of the Sabbath had become very general in our Saviour's time is apparent both from the recorded objections to acts of his on that day, and from his marked conduct on occasions to which those objections were sure to be urged. There is no reason, however, for thinking that the Pharisees had arrived at a sentence against pleasure of every sort on the sacred day. The duty of hospitality was remembered. It was usual for the rich to give a feast on that day; and our Lord's attendance at such a feast, and making it the occasion of putting forth his rules for the demeanor of guests, and for the right exercise of hospitality, show that the gathering of friends and social enjoyment were

[a] It is obvious from the whole scope of the chapter that the words, "Ye shall keep my sabbaths," in Lev. xxvi. 2, related to all these. In the ensuing threat of judgment in case of neglect or violation of the Law, the Sabbatical year would seem to be mainly referred to (vv. 34, 35).

Digitized by Google

not deemed inconsistent with the true scope and spirit of the Sabbath. It was thought right that the meats, though cold, should be of the best and choicest, nor might the Sabbath be chosen for a fast.

Such are the inferences to which we are brought by our Lord's words concerning, and works on, the sacred day. We have already protested against the notion which has been entertained that they were breaches of the Sabbath intended as harbingers of its abolition. Granting for argument's sake that such abolition was in prospect, still our Lord, "made under the Law," would have violated no part of it so long as it was Law. Nor can anything be inferred on the other side from the Evangelist's language (John v. 18). The phrase "He had broken the Sabbath," obviously denotes not the character of our Saviour's act, but the Jewish estimate of it. He had broken the Pharisaic rules respecting the Sabbath. Similarly his own phrase, "the priests profane the Sabbath and are blameless," can only be understood to assert the lawfulness of certain acts done for certain reasons on that day, which, taken in themselves and without those reasons, would be profanations of it. There remains only his appeal to the eating of the shew-bread by David and his companions, which was no doubt in its matter a breach of the Law. It does not follow, however, that the act in justification of which it is appealed to was such a breach. It is rather, we think, an argument *a fortiori*, to the effect, that if even a positive law might give place on occasion, much more might an arbitrary rule like that of the Rabbis in the case in question.

Finally, the declaration that "the Son of Man is Lord also of the Sabbath," must not be viewed as though our Lord held Himself free from the Law respecting it. It is to be taken in connection with the preceding words, "the Sabbath was made for man," etc., from which it is an inference, as is shown by the adverb *therefore*; and the Son of Man is plainly speaking of Himself as *the* Man, the Representative and Exemplar of all mankind, and teaching us that the human race is lord of the Sabbath, the day being made for man, not man for the day.

If, then, our Lord, coming to fulfill and rightly interpret the Law, did thus protest against the Pharisaical and Rabbinical rules respecting the Sabbath, we are supplied by this protest with a large negative view of that ordinance. The acts condemned by the Pharisees *were not* violations of it. Mere action, as such, was not a violation of it, and far less was a work of healing and beneficence. To this we shall have occasion by and by to return. Meanwhile we must try to gain a positive view of the institution, and proceed in furtherance of this to our second head.

II. The Sabbath, as we have said, was the key-note to a scale of Sabbatical observance — consisting of itself, the seventh month, the seventh year, and the year of Jubilee. As each seventh day was sacred, so was each seventh month, and each seventh year. Of the observances of the seventh month, little needs be said. That month opened with the Feast of Trumpets, and contained the Day of Atonement and Feast of Tabernacles — the last named being the most joyful of Hebrew festivals. It is not apparent, nor likely, that the whole of the month was to be characterized by cessation from labor; but it certainly has a place in the Sabbatical scale. Its great centre was the Feast of Tabernacles or Ingathering, the year and the year's labor having then done their work and yielded their issues. In this last respect its analogy to the weekly Sabbath is obvious. Only at this part of the Sabbatical cycle do we find any notice of humiliation. On the Day of Atonement the people were to afflict their souls (Lev. xxiii. 27–29).

The rules for the Sabbatical year are very precise. As labor was prohibited on the seventh day, so the land was to rest every seventh year. And as each forty-ninth year wound up seven of such weeks of years, so it either was itself, or it ushered in, what was called "the year of Jubilee."

In Exodus xxiii. 10, 11, we find the Sabbatical year placed in close connection with the Sabbath-day, and the words in which the former is prescribed are analogous to those of the Fourth Commandment: "Six years thou shalt sow thy land and gather in the fruits thereof; but the seventh year thou shalt let it rest and lie still; that the poor of thy people may eat; and what they leave the beasts of the field shall eat." This is immediately followed by a renewed proclamation of the law of the Sabbath, "Six days thou shalt do thy work, and on the seventh day thou shalt rest: that thine ox and thine ass may rest, and the son of thy handmaid, and the stranger may be refreshed." It is impossible to avoid perceiving that in these passages the two institutions are put on the same ground, and are represented as quite homogeneous. Their aim, as here exhibited, is eminently a beneficent one. To give rights to classes that would otherwise have been without such, to the bondman and bondmaid, nay, to the beast of the field, is viewed here as their main end. "The stranger," too, is comprehended in the benefit. Many, we suspect, while reading the Fourth Commandment, merely regard him as subjected, together with his host and family, to a prohibition. But if we consider how continually *the stranger* is referred to in the enactments of the Law, and that with a view to his protection, the instances being one-and-twenty in number, we shall be led to regard his inclusion in the Fourth Commandment rather as a benefit conferred than a prohibition imposed on him.

The same beneficent aim is still more apparent in the fuller legislation respecting the Sabbatical year which we find in Lev. xxv. 2–7, "When ye come into the land which I give you, then shall the land keep a sabbath unto the Lord. Six years thou shalt sow thy field, and six years thou shalt prune thy vineyard, and gather in the fruit thereof; but in the seventh year shall be a sabbath of rest unto the land, a sabbath unto the Lord; thou shalt neither sow thy field nor prune thy vineyard. That which groweth of its own accord of thy harvest thou shalt not reap, neither gather the grapes of thy vine undressed: for it is a year of rest unto the land. And the sabbath of the land shall be meat for you; for thee, and for thy slave, and for thy maid, and for thy hired servant, and for thy stranger that sojourneth with thee, and for thy cattle and for the beasts that are in thy land, shall all the increase thereof be meat." One great aim of both institutions, the Sabbath-day and the Sabbatical year, clearly was to debar the Hebrew from the thought of absolute ownership of anything. His time was not his own, as was shown him by each seventh day being the Sabbath of the Lord

Digitized by Google

his God; his land was not his own but God's (Lev. xxv. 23), as was shown by the Sabbath of each seventh year, during which it was to have rest, and all individual right over it was to be suspended. It was also to be the year of release from debt (Deut. xv.). We do not read much of the way in which, or the extent to which, the Hebrews observed the Sabbatical year. The reference to it (2 Chr. xxxvi. 21) leads us to conclude that it had been much neglected previous to the Captivity, but it was certainly not lost sight of afterwards, since Alexander the Great absolved the Jews from paying tribute on it, their religion debarring them from acquiring the means of doing so. [SABBATICAL YEAR.]

The year of Jubilee must be regarded as completing this Sabbatical scale, whether we consider it as really the forty-ninth year, the seventh of a week of Sabbatical years, or the fiftieth, a question on which opinions are divided. [JUBILEE, YEAR OF.] The difficulty in the way of deciding for the latter, that the land could hardly bear enough spontaneously to suffice for two years, seems disposed of by reference to Isaiah xxxvii. 30. Adopting, therefore, that opinion as the most probable, we must consider each week of Sabbatical years to have ended in a double Sabbatical period, to which, moreover, increased emphasis was given by the peculiar enactments respecting the second half of such period, the year of Jubilee.

Those enactments have been already considered in the article just referred to, and throw further light on the beneficent character of the Sabbatical Law.

III. We must consider the actual enactments of Scripture respecting the seventh day. However homogeneous the different Sabbatical periods may be, the weekly Sabbath is, as we have said, the tonic or key-note. It alone is prescribed in the Decalogue, and it alone has in any shape survived the earthly commonwealth of Israel. We must still postpone the question of its observance by the patriarchs, and commence our inquiry with the institution of it in the wilderness, in connection with the gathering of manna (Ex. xvi. 23). The prohibition to gather the manna on the Sabbath is accompanied by one to bake or to seethe on that day. The Fourth Commandment gives us but the generality, "all manner of work," and, seeing that action of one kind or another is a necessary accompaniment of waking life, and cannot therefore in itself be intended, as the later Jews imagined, by the prohibition, we are left to seek elsewhere for the particular application of the general principle. That general principle in itself, however, obviously embraces an abstinence from worldly labor or occupation, and from the enforcing such on servants or dependents, or on the stranger. By him, as we have said, is most probably meant the partial proselyte, who would not have received much consideration from the Hebrews had they been left to themselves, as we must infer from the numerous laws enacted for his protection. Had man been then regarded by him as made for the Sabbath, not the Sabbath for man, that is, had the prohibitions of the commandment been viewed as the putting on of a yoke, not the conferring of a privilege, one of the dominant race would probably have felt no reluctance to placing such a stranger under that yoke. The naming him therefore in the commandment helps to interpret its whole principle, and testifies to its having been a beneficent privilege for all who came within it. It gave rights to the slave, to the despised stranger, even to the ox and the ass.

This beneficent character of the Fourth Commandment is very apparent in the version of it which we find in Deuteronomy: "Keep the Sabbath-day to sanctify it, as the Lord thy God hath commanded thee. Six days thou shalt labor and do all thy work, but the seventh day is the Sabbath of the Lord thy God: in it thou shalt not do any work, thou, nor thy son, nor thy daughter, nor thy bondman, nor thy bondwoman, nor thine ox, nor thine ass, nor thy stranger that is within thy gates: that thy bondman and thy bondwoman may rest as well as thou. And remember that thou wast a slave in the land of Egypt, and that the Lord thy God brought thee out thence through a mighty hand and by a stretched-out arm: therefore the Lord thy God commanded thee to keep the Sabbath-day" (Deut. v. 12–15). But although this be so, and though it be plain that to come within the scope of the commandment was to possess a franchise, to share in a privilege, yet does the original proclamation of it in Exodus place it on a ground which, closely connected no doubt with these others, is yet higher and more comprehensive. The divine method of working and rest is there proposed to man as the model after which he is to work and to rest. Time then presents a perfect whole, is then well rounded and entire, when it is shaped into a week, modeled on the six days of creation and their following Sabbath. Six days' work and the seventh day's rest conform the life of man to the method of his Creator. In distributing his life thus, man may look up to God as his Archetype. We need not suppose that the Hebrew, even in that early stage of spiritual education, was limited by so gross a conception as that of God working and then resting, as if needing rest. The idea awakened by the record of creation and by the Fourth Commandment is that of work that has a consummation, perfect in itself and coming to a perfect end; and man's work is to be like this, not aimless, indefinite, and incessant, but having an issue on which he can repose, and see and rejoice in its fruits. God's rest consists in his seeing that all which He has made is very good; and man's works are in their measure and degree very good when a six days' faithful labor has its issue in a seventh of rest after God's pattern. It is most important to remember that the Fourth Commandment is not limited to a mere enactment respecting one day, but prescribes the due distribution of a week, and enforces the six days' work as much as the seventh day's rest.

This higher ground of observance was felt to invest the Sabbath with a theological character, and rendered it the great witness for faith in a personal and creating God. Hence its supremacy over all the Law, being sometimes taken as the representative of it all (Neh. ix. 14). The Talmud says that "the Sabbath is in importance equal to the whole Law;" that "he who desecrates the Sabbath openly is like him who transgresses the whole Law;" while Maimonides winds up his discussion of the subject thus: "He who breaks the Sabbath openly is like the worshipper of the stars, and both are like heathens in every respect."

In all this, however, we have but an assertion of the general principle of resting on the Sabbath, and must seek elsewhere for information as to the

Digitized by Google

details wherewith that principle was to be brought out. We have already seen that the work forbidden is not to be confounded with action of every sort. To make this confusion was the error of the later Jews, and their prohibitions would go far to render the Sabbath incompatible with waking life. The terms in the commandment show plainly enough the sort of work which is contemplated. They are מלאכה and תעבד, the former denoting *servile work*, and the latter *business* (see Gesenius *sub voc.*; Michaelis, *Laws of Moses*, iv. 195). The Pentateuch presents us with but three applications of the general principle. The lighting a fire in any house on the Sabbath was strictly forbidden (Ex. xxxv. 3), and a man was stoned for gathering sticks on that day (Num. xv. 32–36). The former prohibition is thought by the Jews to be of perpetual force; but some at least of the Rabbis have held that it applies only to lighting a fire for culinary purposes, not to doing so in cold weather for the sake of warmth. The latter case, that of the man gathering sticks, was perhaps one of more *labor* and *business* than we are apt to imagine. The third application of the general principle which we find in the Pentateuch was the prohibition to go out of the camp, the command to every one to abide in his place (Ex. xvi. 29) on the Sabbath-day. This is so obviously connected with the gathering the manna, that it seems most natural to regard it as a mere temporary enactment for the circumstances of the people in the wilderness. It was, however, afterwards considered by the Hebrews a permanent law, and applied, in the absence of the camp, to the city in which a man might reside. To this was appended the *dictum* that a space of two thousand ells on every side of a city belonged to it, and to go that distance beyond the walls was permitted as "a Sabbath-day's journey."

The reference of Isaiah to the Sabbath gives us no details. Those in Jeremiah and Nehemiah show that carrying goods for sale, and buying such, were equally profanations of the day.

There is no ground for supposing that to engage the enemy on the Sabbath was considered unlawful before the Captivity. On the contrary, there is much force in the argument of Michaelis (*Laws of Moses*, iv. 196) to show that it was not. His reasons are as follows: —

1. The prohibited עבדן, *service*, does not even suggest the thought of war.

2. The enemies of the chosen people would have continually selected the Sabbath as a day of attack, had the latter been forbidden to defend themselves then.

3. We read of long-protracted sieges, that of Rabbah (2 Sam. xi., xii.), and that of Jerusalem in the reign of Zedekiah, which latter lasted a year and a half, during which the enemy would certainly have taken advantage of any such abstinence from warfare on the part of the chosen people.

At a subsequent period we know (1 Macc. ii. 34–38) that the scruple existed and was acted on with most calamitous effects. Those effects led (1 Macc. ii. 41) to determining that action in self-defense was lawful on the Sabbath, initiatory attack not. The reservation was, it must be thought, nearly as great a misconception of the institution as the overruled scruple. Certainly warfare has nothing to do with the servile labor or the worldly business contemplated in the Fourth Commandment, and is, as regards religious observance, a law to itself. Yet the scruple, like many other scruples, proved a convenience, and under the Roman Empire the Jews procured exemption from military service by means of it. It was not, however, without its evils. In the siege of Jerusalem by Pompey (Joseph. *Ant.* xiv. 4), as well as in the final one by Titus, the Romans took advantage of it, and, abstaining from attack, prosecuted on the Sabbath, without molestation from the enemy, such works as enabled them to renew the assault with increased resources.

So far therefore as we have yet gone, so far as the negative side of Sabbatical observance is concerned, it would seem that servile labor, whether that of slaves or of hired servants, and all worldly business on the part of masters, was suspended on the Sabbath, and the day was a common right to rest and be refreshed, possessed by all classes in the Hebrew community. It was thus, as we have urged, a beneficent institution.[a] As a sign between God and his chosen people, it was also a monitor of faith, keeping up a constant witness, on the ground taken in Gen. ii. 3, and in the Fourth Commandment, for the one living and personal God whom they worshipped, and for the truth, in opposition to all the cosmogonies of the heathen, that everything was created by Him.

We must now quit the negative for the positive side of the institution.

In the first place, we learn from the Pentateuch that the morning and evening sacrifice were both doubled on the Sabbath-day, and that the fresh shew-bread was then baked, and substituted on the Table for that of the previous week. And this at once leads to the observation that the negative rules, proscribing work, lighting of fires, etc., did not apply to the rites of religion. It became a *dictum* that *there was no Sabbath in holy things*. To this our Saviour appeals when He says that the priests in the Temple profane the Sabbath and are blameless.

Next, it is clear that individual offerings were not breaches of the Sabbath; and from this doubtless came the feasts of the rich on that day, which were sanctioned, as we have seen, by our Saviour's attendance on one such. It was, we may be pretty sure, a feast on a sacrifice, and therefore a religious act. All around the giver, the poor as well as others, were admitted to it. Yet further, in "cases of illness, and in any, even the remotest danger," the prohibitions of work were not held to apply. The general principle was that "the Sabbath is delivered into your hand, not you into the hand of the Sabbath" (comp. Mark ii. 27, 28).

We have no ground for supposing that anything like the didactic institutions of the synagogue formed part of the original observance of the Sabbath. Such institutions do not come into being while the matter to which they relate is itself only in process of formation. Expounding the Law presumes the completed existence of the Law, and the removal of the living lawgiver. The assertion of the Talmud that "Moses ordained to the Israel-

[a] In this light the Sabbath has found a champion in one who would not, we suppose, have paid it much respect in its theological character; we mean no less a person than M. Proudhon (*De la Célébration du Dimanche*).

Digitized by Google

ten that they should read the Law on the Sabbath-days, the feasts, and the new moons," in itself improbable, is utterly unsupported by the Pentateuch. The rise of such custom in after times is explicable enough. [SYNAGOGUE.] But from an early period, if not, as is most probable, from the very institution, occupation with holy themes was regarded as an essential part of the observance of the Sabbath. It would seem to have been an habitual practice to repair to a prophet on that day, in order, it must be presumed, to listen to his teaching (2 K. iv. 23). Certain Psalms too, *e. g.* the 92d, were composed for the Sabbath, and probably used in private as well as in the Tabernacle. At a later period we come upon precepts that on the Sabbath the mind should be uplifted to high and holy themes — to God, his character, his revelations of Himself, his mighty works. Still the thoughts with which the day was invested were ever thoughts, not of restriction, but of freedom and of joy. Such indeed would seem, from Neh. viii. 9–12, to have been essential to the notion of a *holy* day. We have more than once pointed out that pleasure, as such, was never considered by the Jews a breach of the Sabbath; and their practice in this respect is often animadverted on by the early Christian Fathers, who taunt them with abstaining on that day only from what is good and useful, but indulging in dancing and luxury. Some of the heathen, indeed, such as Tacitus, imagined that the Sabbath was kept by them as a fast, a mistake which might have arisen from their abstinence from cookery on that day, and perhaps, as Heylin conjectures, from their postponement of their meals till the more solemn services of religion had been performed. But there can be no doubt that it was kept as a feast, and the phrase *luxus Sabbatarius*, which we find in Sidonius Apollinaris (i. 2), and which has been thought a proverbial one, illustrates the mode in which they celebrated it in the early centuries of our era. The following is Augustine's description of their practice: "Ecce hodiernus dies Sabbati est: hunc in presenti tempore otio quodam corporaliter languido et fluxo et luxurioso celebrant Judæi. Vacant enim ad nugas, et cum Deus præceperit Sabbatum, illi in his quæ Deus prohibet exercent Sabbatum. Vacatio nostra a malis operibus, vacatio illorum a bonis operibus est. Melius est enim arare quam saltare. Illi ab opere bono vacant, ab opere nugatorio non vacant" (Aug. *Enarr. in Psalmos*, Ps. xci.: see, too, Aug. *De decem Chordis*, iii. 3; Chrysost. *Homil.* I., *De Lazaro*; and other references given by Bingham, *Eccl. Ant.* lib. xx. cap. ii.). And if we take what alone is in the Law, we shall find nothing to be counted absolutely obligatory but rest, cessation from labor. Now, as we have more than once had occasion to observe, rest, cessation from labor, cannot in the waking moments mean avoidance of all action. This, therefore, would be the question respecting the scope and purpose of the Sabbath which would always demand to be devoutly considered and intelligently answered — what is truly rest, what is that cessation from labor which is really Sabbatical? And it is plain that, in application and in detail, the answer to this must almost indefinitely vary with men's varying circumstances, habits, education, and familiar associations.

We have seen then, that for whomsoever else the provision was intended, the chosen race were in possession of an ordinance, whereby neither a man's time nor his property could be considered absolutely his own, the seventh of each week being holy to God, and dedicated to rest after the pattern of God's rest, and giving equal rights to all. We have also seen that this provision was the tonic to a chord of Sabbatical observance, through which the same great principles of God's claim and society's, on every man's time and every man's property, were extended and developed. Of the Sabbatical year, indeed, and of the year of Jubilee, it may be questioned whether they were ever persistently observed, the only indications that we possess of Hebrew practice respecting them being the exemption from tribute during the former accorded to the Jews by Alexander, to which we have already referred, and one or two others, all, however, after the Captivity. [SABBATICAL YEAR; YEAR OF JUBILEE.]

But no doubt exists that the weekly Sabbath was always partially, and in the Pharisaic and subsequent times very strictly, however mistakenly, observed.

We have hitherto viewed the Sabbath merely as a Mosaic ordinance. It remains to ask whether, first, there be indications of its having been previously known and observed; and, secondly, whether it have an universal scope and authority over all men.

The former of these questions is usually approached with a feeling of its being connected with the latter, and perhaps therefore with a bias in favor of the view which the questioner thinks will support his opinion on the latter. It seems, however, to us, that we may dismiss any anxiety as to the results we may arrive at concerning it. No doubt, if we see strong reason for thinking that the Sabbath had a pre-Mosaic existence, we see something in it that has more than a Mosaic character and scope. But it might have had such without having an universal authority, unless we are prepared to ascribe that to the prohibition of eating blood or things strangled. And again, it might have originated in the Law of Moses, and yet possess an universally human scope, and an authority over all men and through all time. Whichever way, therefore, the second of our questions is to be determined, we may easily approach the first without anxiety.

The first and chief argument of those who maintain that the Sabbath was known before Moses, is the reference to it in Gen. ii. 2, 3. This is considered to represent it as coeval with man, being instituted at the Creation, or at least, as Lightfoot views the matter, immediately upon the Fall. This latter opinion is so entirely without rational ground of any kind that we may dismiss it at once. But the whole argument is very precarious. We have no materials for ascertaining or even conjecturing, which was put forth first, the record of the Creation, or the Fourth Commandment. If the latter, then the reference to the Sabbath in the former is abundantly natural. Had, indeed, the Hebrew tongue the variety of preterite tenses of the Greek, the words in Genesis might require careful consideration in that regard; but as the case is, no light can be had from grammar; and on the supposition of these being written after the Fourth Commandment, their absence, or that of any equivalent to them, would be really marvelous.

The next indication of a pre Mosaic Sabbath has

Digitized by Google

been found in Gen. iv. 3, where we read that "in process of time it came to pass that Cain brought of the fruit of the ground an offering unto the Lord." The words rendered *in process of time* mean literally "at the end of days," and it is contended that they designate a fixed period of days, probably the end of a week, the seventh or Sabbath-day. Again, the division of time into weeks seems recognized in Jacob's courtship of Rachel (Gen. xxix. 27, 28). Indeed the large recognition of that division from the earliest time is considered a proof that it must have had an origin above and independent of local and accidental circumstances, and been imposed on man at the beginning from above. Its arbitrary and factitious character is appealed to in further confirmation of this. The sacredness of the seventh day among the Egyptians, as recorded by Herodotus, and the well-known words of Hesiod respecting it, have long been cited among those who adopt this view, though neither of them in reality gives it the slightest support. Lastly, the opening of the Fourth Commandment, the injunction to *remember* the Sabbath-day, is appealed to as proof that that day was already known.

It is easy to see that all this is but a precarious foundation on which to build. It is not clear that the words in Gen. iv. 3 denote a fixed division of time of any sort. Those in Gen. xxix. obviously do, but carry us no further than proving that the week was known and recognized by Jacob and Laban; though it must be admitted that, in the case of time so divided, sacred rites would probably be celebrated on a fixed and statedly recurring day. The argument from the prevalence of the weekly division of time would require a greater approach to universality in such practice than the facts exhibit, to make it a cogent one. That division was unknown to the ancient Greeks and Romans, being adopted by the latter people from the Egyptians, as must be inferred from the well-known passage of Dion Cassius (xxxvii. 18, 19), at a period in his own time comparatively recent; while of the Egyptians themselves it is thought improbable that they were acquainted with such division in early times. The sacredness of the seventh day mentioned by Hesiod, is obviously that of the seventh day, not of the week, but of the month. And even after the weekly division was established, no trace can be found of anything resembling the Hebrew Sabbath.

While the injunction in the Fourth Commandment to *remember* the Sabbath-day may refer only to its previous institution in connection with the gathering of manna, or may be but the natural precept to *keep in mind* the rule about to be delivered — a phrase natural and continually recurring in the intercourse of life, as, for example, between parent and child — on the other hand, the perplexity of the Israelites respecting the double supply of manna on the sixth day (Ex. xvi. 22) leads us to infer that the Sabbath for which such extra supply was designed was not then known to them. Moreover the language of Ezekiel (xx.) seems to designate it as an ordinance distinctively Hebrew and Mosaic.

We cannot then, from the uncertain notices which we possess, infer more than that the weekly division of time was known to the Israelites and others before the Law of Moses. [WEEK.] There is probability, though not more, in the opinion of Grotius, that the seventh day was deemed sacred to religious observance; but that the Sabbatical observance of it, the cessation from labor, was superinduced on it in the wilderness.

But to come to our second question, it by no means follows, that even if the Sabbath were no older than Moses, its scope and obligation are limited to Israel, and that itself belongs only to the obsolete enactments of the Levitical Law. That law contains two elements, the code of a particular nation, and commandments of human and universal character. For it must not be forgotten that the Hebrew was called out from the world, not to live on a narrower but a far wider footing than the children of earth; that he was called out to be the true man, bearing witness for the destiny, exhibiting the aspect, and realizing the blessedness, of true manhood. Hence, we can always see, if we have a mind, the difference between such features of his Law as are but local and temporary, and such as are human and universal. To which class belongs the Sabbath, viewed simply in itself, is a question which will soon come before us, and one which does not appear hard to settle. Meanwhile, we must inquire into the case as exhibited by Scripture.

And here we are at once confronted with the fact that the command to keep the Sabbath forms part of the Decalogue. And that the Decalogue had a rank and authority above the other enactments of the Law, is plain to the most cursory readers of the Old Testament, and is indicated by its being written on the two Tables of the Covenant. And though even the Decalogue is *affected* by the New Testament, it is not so in the way of repeal or obliteration. It is raised, transfigured, glorified there, but itself remains in its authority and supremacy. Not to refer just now to our Saviour's teaching (Matt. xix. 17–19), of which it might be alleged that it was delivered when, and to the persons over whom, the Old Law was in force — such passages as Rom. xiii. 8, 9, and Eph. vi. 2, 3, seem decisive of this. In some way, therefore, the Fourth Commandment has an authority over, and is to be obeyed by, Christians, though whether in the letter, or in some large spiritual sense and scope, is a question which still remains.

The phenomena respecting the Sabbath presented by the New Testament are, 1st, the frequent reference to it in the four gospels; and 2dly, the silence of the epistles, with the exception of one place (Col. ii. 16, 17), where its repeal would seem to be asserted, and perhaps one other (Heb iv. 9).

1st. The references to it in the four gospels are, it needs not be said, numerous enough. We have already seen the high position which it took in the minds of the Rabbis, and the strange code of prohibitions which they put forth in connection with it. The consequence of this was, that no part of our Saviour's teaching and practice would seem to have been so eagerly and narrowly watched as that which related to the Sabbath. He seems even to have directed attention to this, thereby intimating surely that on the one hand the misapprehension, and on the other the true fulfillment of the Sabbath were matters of deepest concern. We have already seen the kind of prohibitions against which both his teaching and practice were directed; and his two pregnant declarations, "The Sabbath was made for man, not man for the Sabbath," and "My Father worketh hitherto, and I work," surely

Digitized by Google

exhibit to us the Law of the Sabbath as human and universal. The former sets it forth as a privilege and a blessing, and were we therefore to suppose it absent from the provisions of the covenant of grace, we must suppose that covenant to have stinted man of something that was made for him, something that conduces to his well-being. The latter wonderfully exalts the Sabbath by referring it, even as do the record of creation and the Fourth Commandment, to God as its archetype; and in showing us that the repose of God does not exclude work — inasmuch as God opens his hand daily and filleth all things living with plenteousness — shows us that the rest of the Sabbath does not exclude action, which would be but a death, but only that week day action which requires to be wound up in a rest that shall be after the pattern of his, who, though He has rested from all the work that He hath made, yet "worketh hitherto."

2dly. The epistles, it must be admitted, with the exception of one place, and perhaps another to which we have already referred, are silent on the subject of the Sabbath. No rules for its observance are ever given by the Apostles — its violation is never denounced by them. Sabbath-breakers are never included in any list of offenders. Col. ii. 16, 17, seems a far stronger argument for the abolition of the Sabbath in the Christian dispensation than is furnished by Heb. iv. 9 for its continuance; and while the first day of the week is more than once referred to as one of religious observance, it is never identified with the Sabbath, nor are any *prohibitions* issued in connection with the former, while the omission of the Sabbath from the list of "necessary things" to be observed by the Gentiles (Acts xv. 29) shows that they were regarded by the Apostles as free from obligation in this matter.

When we turn to the monuments which we possess of the early Church, we find ourselves on the whole carried in the same direction. The seventh day of the week continued, indeed, to be observed, being kept as a feast by the greater part of the Church, and as a fast from an early period by that of Rome, and one or two other churches of the West; but not as obligatory on Christians in the same way as on Jews. The Council of Laodicea prohibited all scruple about working on it; and there was a very general admission among the early Fathers that Christians did not *Sabbatize* in the letter.

Again, the observance of the Lord's Day as a Sabbath would have been well-nigh impossible to the majority of Christians in the first ages. The slave of the heathen master, and the child of the heathen father, could neither of them have the control of his own conduct in such a matter; while the Christian in general would have been at once betrayed and dragged into notice if he was found abstaining from labor of every kind, not on the seventh but the first day of the week. And yet it is clear that many were enabled without blame to keep their Christianity long a secret; nor does there seem to have been any obligation to divulge it, until heathen interrogation or the order to sacrifice dragged it into daylight.

When the early Fathers speak of the Lord's Day, they sometimes, perhaps, by comparing, connect it with the Sabbath; but we have never found a passage, previous to the conversion of Constantine, prohibitory of any work or occupation on the former, and any such, did it exist, would have been in a great measure nugatory, for the reasons just alleged. [LORD'S DAY.] After Constantine things become different at once. His celebrated edict prohibitory of judicial proceedings on the Lord's Day was probably dictated by a wish to give the great Christian festival as much honor as was enjoyed by those of the heathen, rather than by any reference to the Sabbath or the Fourth Commandment; but it was followed by several which extended the prohibition to many other occupations, and to many forms of pleasure held innocent on ordinary days. When this became the case, the Christian Church, which ever believed the Decalogue, in some sense, to be of universal obligation, could not but feel that she was enabled to keep the Fourth Commandment in its letter as well as its spirit; that she had not lost the type even in possessing the antitype; that the great law of week-day work and seventh-day rest, a law so generous and so ennobling to humanity at large, was still in operation. True, the name Sabbath was always used to denote the seventh, as that of the Lord's Day to denote the first, day of the week, which latter is nowhere habitually called the Sabbath, so far as we are aware, except in Scotland and by the English Puritans. But it was surely impossible to observe both the Lord's Day, as was done by Christians after Constantine, and to read the Fourth Commandment, without connecting the two; and, seeing that such was to be the practice of the developed Church, we can understand how the silence of the N. T. epistles, and even the strong words of St. Paul (Col. ii. 16, 17), do not impair the human and universal scope of the Fourth Commandment, exhibited so strongly in the very nature of the Law, and in the teaching respecting it of Him who came not to destroy the Law, but to fulfill.

In the East, indeed, where the seventh day of the week was long kept as a festival, that would present itself to men's minds as the Sabbath, and the first day of the week would appear rather in its distinctively Christian character, and as of apostolical and ecclesiastical origin, than in connection with the old Law. But in the West the seventh day was kept for the most part as a fast, and that for a reason merely Christian, namely, in commemoration of our Lord's lying in the sepulchre throughout that day. Its observance therefore would not obscure the aspect of the Lord's Day as that of hebdomadal rest and refreshment, and as consequently the prolongation of the Sabbath in the essential character of that benignant ordinance; and, with some variation, therefore, of verbal statement, a connection between the Fourth Commandment and the first day of the week (together, as should be remembered, with the other festivals of the Church), came to be perceived and proclaimed.

Attention has recently been called, in connection with our subject, to a circumstance which is important, the adoption by the Roman world of the Egyptian week almost contemporaneously with the founding of the Christian Church. Dion Cassius speaks of that adoption as recent, and we are therefore warranted in conjecturing the time of Hadrian as about that wherein it must have established itself. Here, then, would seem a signal Providential preparation for providing the people of God with a literal Sabbatismus; for prolonging in the Christian kingdom that great institution

Digitized by Google

which, whether or not historically older than the Mosaic Law, is yet in its essential character adapted to all mankind, a witness for a personal Creator and Sustainer of the universe, and for his call to men to model their work, their time, and their dives, on his pattern.

Were we prepared to embrace an exposition which has been given of a remarkable passage already referred to (Heb. iv. 8–10), we should find it singularly illustrative of the view just suggested. The argument of the passage is to this effect, that the rest on which Joshua entered, and into which he made Israel to enter, cannot be the true and final rest, inasmuch as the Psalmist long afterwards speaks of the entering into that rest as still future and contingent. In ver. 9 we have the words "there remaineth, therefore, a rest for the people of God." Now it is important that throughout the passage the word for rest is κατάπαυσις, and that in the words just quoted it is changed into σαββατισμός, which certainly means the keeping of rest, the act of sabbatizing rather than the objective rest itself. It has accordingly been suggested that those words are not the author's conclusion — which is to be found in the form of thesis in the declaration "we which have believed do enter into rest" — but a parenthesis to the effect that "to the people of God," the Christian community, there remaineth, *there is left, a sabbatizing*, the great change that has passed upon them and the mighty elevation to which they have been brought as on other matters, so as regards the rest of God revealed to them, still leaving scope for and justifying the practice.[a] This exposition is in keeping with the general scope of the Epistle to the Hebrews; and the passage thus viewed will seem to some minds analogous to xiii. 10. It is given by Owen, and is elaborated with great ingenuity by Dr. Wardlaw in his *Discourses on the Sabbath*. It will not be felt fatal to it that more than 300 years should have passed before the Church at large was in a situation to discover the heritage that had been preserved to her, or to enter on its enjoyment, when we consider how development, in all matters of ritual and ordinance, must needs be the law of any living body, and much more of one which had to struggle from its birth with the impeding forces of a heathen empire, frequent persecution, and an unreclaimed society. In such case was the early Church, and therefore she might well have to wait for a Constantine before she could fully open her eyes to the fact that sabbatizing was still left to her; and her members might well be permitted not to see the truth in any steady or consistent way even then.

The objections, however, to this exposition are many and great, one being, that it has occurred to so few among the great commentators who have labored on the Epistle to the Hebrews. Chrysostom (*in loc.*) denies that there is any reference to hebdomadal sabbatizing. Nor have we found any commentators, besides the two just named, who admit that there is such, with the single exception of Ebrard. Dean Alford notices the interpretation only to condemn it, while Dr. Hessey gives another, and that the usual explanation of the verse, suggesting a sufficient reason for the change of word from κατάπαυσις to σαββατισμός. It would not have been right, however, to have passed it over in this article without notice, as it relates to a passage of Scripture in which Sabbath and Sabbatical ideas are markedly brought forward.

It would be going beyond the scope of this article to trace the history of opinion on the Sabbath in the Christian Church. Dr. Hessey, in his *Bampton Lectures*, has sketched and distinguished every variety of doctrine which has been or still is maintained on the subject.

The sentiments and practice of the Jews subsequent to our Saviour's time have been already referred to. A curious account — taken from Buxtorf, *De Synag.* — of their superstitions, scruples, and prohibitions, will be found at the close of the first part of Heylin's *Hist. of the Sabbath*. Calmet (art. "Sabbath") gives an interesting sketch of their family practices at the beginning and end of the day. And the estimate of the Sabbath, its uses, and its blessings, which is formed by the more spiritually minded Jews of the present day may be inferred from some striking remarks of Dr. Kalisch (*Comm. on Exodus*), p. 273, who winds up with quoting a beautiful passage from the late Mrs. Horatio Montefiore's work, *A Few Words to the Jews*.

Finally, M. Proudhon's striking pamphlet, *De la Célébration du Dimanche considérée sous les rapports de l'Hygiène publique, de la Morale, des relations de Famille et de Cité*, Paris, 1850, may be studied with great advantage. His remarks (p. 67) on the advantages of the precise proportion established, six days of work to one of rest, and the inconvenience of any other that could be arranged, are well worth attention.

The word *Sabbath* seems sometimes to denote *a week* in the N. T. Hence, by the Hebrew usage of reckoning time by cardinal numbers, ἐν τῇ μιᾷ τῶν σαββάτων, means on *the first day of the week*. The Rabbis have the same phraseology, keeping, however, the word *Sabbath* in the singular.

On the phrase of St. Luke, vi. 1, ἐν τῷ σαββάτῳ δευτεροπρώτῳ, see SABBATICAL YEAR.

This article should be read in connection with that on the LORD'S DAY.

## SABBATH-DAY'S JOURNEY (Σαββάτου ὁδός)

σάββατου ὁδός, Acts i. 12). On occasion of a violation of the commandment by certain of the people who went to look for manna on the seventh day, Moses enjoined every man to "abide in his place," and forbade any man to "go out of his place" on that day (Ex. xvi. 29). It seems natural to look on this as a mere enactment *pro re natâ*, and having no bearing on any state of affairs subsequent to the journey through the wilderness and the daily gathering of manna. Whether the earlier Hebrews did or did not regard it thus, it is not easy to say. Nevertheless, the natural inference from 2 K. iv. 23 is against the supposition of such a prohibition being known to the spokesman, Elisha almost certainly living — as may be seen from the whole narrative — much more than a Sabbath-day's journey from Shunem. Heylin infers from the incidents of David's flight from Saul, and Elijah's from Jezebel, that neither felt bound by such a limitation. Their situation, however, being one of extremity, cannot be safely argued from. In after times the precept in Ex. xvi. was undoubtedly viewed as a permanent law. But as some departure from a man's own place was unavoidable, it was thought necessary to determine the allowable amount, which was fixed at 2,000 paces, or about six furlongs, from the wall of the city.

Though such an enactment may have proceeded from an erroneous view of Ex. xvi. 29, it is by no means so superstitious and unworthy on the face of it as are most of the Rabbinical rules and prohibitions respecting the Sabbath-day. In the case of a general law, like that of the Sabbath, some authority must settle the application in details, and such an authority "the Scribes and Pharisees sitting in Moses' seat" were entitled to exercise. It is plain that the limits of the Sabbath-day's journey must have been a great check on the profanation of the day in a country where business was entirely agricultural or pastoral, and must have secured to "the ox and the ass" the rest to which by the Law they were entitled.

Our Saviour seems to refer to this law in warning the disciples to pray that their flight from Jerusalem in the time of its judgment should not be "on the Sabbath-day" (Matt. xxiv. 20). The Christians of Jerusalem would not, as in the case of Gentiles, feel free from the restrictions on journeying on that day; nor would their situation enable them to comply with the forms whereby such journeying when necessary was sanctified; nor would assistance from those around be procurable.

The permitted distance seems to have been grounded on the space to be kept between the Ark and the people (Josh. iii. 4) in the wilderness, which tradition said was that between the Ark and the tents. To repair to the Ark being, of course, a duty on the Sabbath, the walking to it was no violation of the day; and it thus was taken as the measure of a lawful Sabbath-day's journey. We find the same distance given as the circumference outside the walls of the Levitical cities to be counted as their suburbs (Num. xxxv. 5). The *terminus a quo* was thus not a man's own house, but the wall of the city where he dwelt, and thus the amount of lawful Sabbath-day's journeying must therefore have varied greatly; the movements of a Jew in one of the small cities of his own land being restricted indeed when compared with those of a Jew in Alexandria, Antioch, or Rome.

When a man was obliged to go farther than a Sabbath-day's journey, on some good and allowable ground, it was incumbent on him on the evening before to furnish himself with food enough for two meals. He was to sit down and eat at the appointed distance, to bury what he had left, and utter a thanksgiving to God for the appointed boundary. Next morning he was at liberty to make this point his *terminus a quo*.

The Jewish scruple to go more than 2,000 paces from his city on the Sabbath is referred to by Origen, περὶ ἀρχῶν, iv. 2; by Jerome, *ad Algasiam*, quæst. 10; and by Œcumenius — with some apparent difference between them as to the measurement. Jerome gives Akiba, Simeon, and Hillel, as the authorities for the lawful distance

F. G.

**SABBATHE'US** (Σαββαταῖος: *Sabbathæus*). SHABBETHAI the Levite (1 Esdr. ix. 14; comp. Ezr. x. 15).

**SABBATICAL YEAR.** As each seventh day and each seventh month were holy, so was each seventh year, by the Mosaic code. We first encounter this law in Ex. xxiii. 10, 11, given in words corresponding to those of the Fourth Commandment, and followed (ver. 12) by the reënforcement of that commandment. It is impossible to read the passage and not feel that the Sabbath Day and the Sabbatical Year are parts of one general law.

The commandment is, to sow and reap for six years, and to let the land rest on the seventh, "that the poor of thy people may eat; and what they leave the beasts of the field shall eat." It is added, "In like manner shalt thou deal with thy vineyard and thy oliveyard."

We meet next with the enactment in Lev. xxv. 2–7, and finally in Deut. xv., in which last place the new feature presents itself of the seventh year being one of release to debtors.

When we combine these several notices, we find that every seventh year the land was to have rest to *enjoy her Sabbaths*. Neither tillage nor cultivation of any sort was to be practiced. The spontaneous growth of the soil was not to be reaped by the owner, whose rights of property were in abeyance. All were to have their share in the gleanings: the poor, the stranger, and even the cattle.

This singular institution has the aspect, at first sight, of total impracticability. This, however, wears off when we consider that in no year was the owner allowed to reap the whole harvest (Lev. xix. 9, xxiii. 22). Unless, therefore, the remainder was gleaned very carefully, there may easily have been enough left to ensure such spontaneous deposit of seed as in the fertile soil of Syria would produce some amount of crop in the succeeding year, while the vines and olives would of course yield their fruit of themselves. Moreover, it is clear that the owners of land were to lay by corn in previous years for their own and their families' wants. This is the unavoidable inference from Lev. xxv. 20–22. And though the right of property was in abeyance during the Sabbatical year, it has been suggested that this only applied to the fields, and not to the gardens attached to houses.

The claiming of debts was unlawful during this year, as we learn from Deut xv. The exceptions laid down are in the case of a foreigner, and that of there being no poor in the land. This latter, however, it is straightway said, is what will never

Digitized by Google

happen. But though debts might not be claimed, it is not said that they might not be voluntarily paid; and it has been questioned whether the release of the seventh year was final or merely lasted through the year. This law was virtually abrogated in later times by the well-known *prosbol*[a] of the great Hillel, a permission to the judges to allow a creditor to enforce his claim whenever he required to do so. The formula is given in the Mishna (*Shevith*, 10, 4).

The release of debtors during the Sabbatical year must not be confounded with the release of slaves on the seventh year of their service. The two are obviously distinct — the one occurring at one fixed time for all, while the other must have varied with various families, and with various slaves.

The spirit of this law is the same as that of the weekly Sabbath. Both have a beneficent tendency, limiting the rights and checking the sense of property; the one puts in God's claims on time, the other on the land. The land shall "keep a Sabbath unto the Lord." "The land is mine."

There may also have been, as Kalisch conjectures, an eye to the benefit which would accrue to the land from lying fallow every seventh year, in a time when the rotation of crops was unknown.

The Sabbatical year opened in the Sabbatical month, and the whole Law was to be read every such year, during the Feast of Tabernacles, to the assembled people. It was thus, like the weekly Sabbath, no mere negative rest, but was to be marked by high and holy occupation, and connected with sacred reflection and sentiment.

At the completion of a week of Sabbatical years, the Sabbatical scale received its completion in the year of Jubilee. For the question whether that was identical with the seventh Sabbatical year, or was that which succeeded it, *i. e.* whether the year of Jubilee fell every forty-ninth or every fiftieth year, see JUBILEE, YEAR OF.

The next question that presents itself regarding the Sabbatical year relates to the time when its observance became obligatory. It has been inferred from Leviticus xxv. 2, "When ye come into the land which I give you, then shall the land keep a Sabbath unto the Lord," that it was to be held by the people on the first year of their occupation of Canaan; but this mere literalism gives a result in contradiction to the words which immediately follow: "Six years thou shalt sow thy field, and six years thou shalt prune thy vineyard, and gather in the fruit thereof; but in the seventh year shall be a Sabbath of rest unto the land." It is more reasonable to suppose, with the best Jewish authorities, that the law became obligatory fourteen years after the first entrance into the Promised Land, the conquest of which took seven years and the distribution seven more.

A further question arises. At whatever period the obedience to this law ought to have commenced, was it in point of fact obeyed? This is an inquiry which reaches to more of the Mosaic statutes than the one now before us. It is, we apprehend, rare to see the whole of a code in full operation; and the phenomena of Jewish history previous to the Captivity present us with no such spectacle. In the threatenings contained in Lev xxvi., judgments on the violation of the Sabbatical year are particularly contemplated (vv. 33, 34) and that it was greatly if not quite neglected appears from 2 Chr. xxxvi. 20, 21: "Them that escaped from the sword carried he away to Babylon: where they were servants to him and his sons until the reign of the kingdom of Persia: to fulfill the word of the Lord by the mouth of Jeremiah, until the land had enjoyed her Sabbaths: for as long as she lay desolate she kept Sabbath, to fulfill threescore and ten years." Some of the Jewish commentators have inferred from this that their forefathers had neglected exactly seventy Sabbatical years. If such neglect was continuous, the law must have been disobeyed throughout a period of 490 years, *i. e.* through nearly the whole duration of the monarchy; and as there is nothing in the previous history leading to the inference that the people were more scrupulous then, we must look to the return from Captivity for indications of the Sabbatical year being actually observed. Then we know the former neglect was replaced by a punctilious attention to the Law; and as its leading feature, the Sabbath, began to be scrupulously reverenced, so we now find traces of a like observance of the Sabbatical year. We read (1 Macc. vi. 49) that "they came out of the city, because they had no victuals there to endure the siege, it being a year of rest to the land." Alexander the Great is said to have exempted the Jews from tribute during it, since it was unlawful for them to sow seed or reap harvest then; so, too, did Julius Cæsar (Joseph. *Ant.* xiv. 10, § 6). Tacitus (*Hist.* lib. v. 2, § 4), having mentioned the observance of the Sabbath by the Jews, adds: "Dein blandienti inertiâ septimum quoque annum ignaviæ datum." And St. Paul, in reproaching the Galatians with their Jewish tendencies, taxes them with observing *years* as well as days and months and times (Gal. iv. 10), from which we must infer that the teachers who communicated to them those tendencies did more or less the like themselves. Another allusion in the N. T. to the Sabbatical year is perhaps to be found in the phrase, *ἐν σαββάτῳ δευτεροπρώτῳ* (Luke vi. 1). Various explanations have been given of the term, but one of the most probable is that it denotes the first Sabbath of the second year in the cycle (Wieseler, quoted by Alford, vol. i.).

scents of the Cushites in the article ARABIA and elsewhere, Sabtah should be looked for along the southern coast of Arabia. The writer has found no traces in Arab writers; but the statements of Pliny (vi. 32, § 155, xii. 32), Ptolemy (vi. 7, p. 411), and *Anon. Peripl.* (27), respecting Sabbatha, Sabota, or Sobotale, metropolis of the Atramitæ (probably the Chatramotitæ), seem to point to a trace of the tribe which descended from Sabtah, always supposing that this city Sabbatha was not a corruption or dialectic variation of Saba, Seba, or Sheba. This point will be discussed under SHEBA. It is only necessary to remark here that the indications afforded by the Greek and Roman writers of Arabian geography require very cautious handling, presenting, as they do, a mass of contradictions and transparent travellers' tales respecting the unknown regions of Arabia the Happy, Arabia Thurifera, etc. Ptolemy places Sabbatha in 77° long. 16° 30′ lat. It was an important city, containing no less than sixty temples (Pliny, *N. H.* vi. c. xxiii. § 32); it was also situate in the territory of king Elisarus, or Eleazus (comp. *Anon. Peripl.* ap. Müller, *Geog. Min.* pp. 278, 279), supposed by Fresnel to be identical with "Ascharides," or "Alascharissoun," in Arabic (*Journ. Asiat.* Nouv. Série, x. 191). Winer thinks the identification of Sabtah with Sabbatha, etc., to be probable; and it is accepted by Bunsen (*Bibelwerk*, Gen. x. and *Atlas*). It certainly occupies a position in which we should expect to find traces of Sabtah, where are traces of Cushite tribes in very early times, on their way, as we hold, from their earlier colonies in Ethiopia to the Euphrates.

Gesenius, who sees in Cush only Ethiopia, "has no doubt that Sabtah should be compared with Σαβάτ, Σαβά, Σαβαί (see Strab. xvi. p. 770, Casaub.; Ptol. iv. 10), on the shore of the Arabian Gulf, situated just where Arkiko is now, in the neighbourhood of which the Ptolemies hunted elephants. Amongst the ancient translators, Pseudojonathan saw the true meaning, rendering it כַּמְרָאֵי, for which read סַמְרָאֵי, *i. e.* the Sembritæ, whom Strabo (*loc. cit.* p. 786) places in the same region. Josephus (*Ant.* i. 6, § 1) understands it to be the inhabitants of Astabora" (Gesenius, ed. Tregelles, *s. v.*). Here the etymology of Sabtah is compared plausibly with Σαβάτ; but when probability is against his being found in Ethiopia, etymology is of small value, especially when it is remembered that Sabat and its variations (Sabax, Sabai) may be related to *Seba*, which certainly was in Ethiopia. On the Rabbinical authorities which he quotes we place no value. It only remains to add that Michaelis (*Suppl.* p. 1712) removes Sabtah to Cauta opposite Gibraltar, called in Arabic Sebtah, سبتة (comp. Marásid, *s. v.*); and that Bochart (*Phaleg*, i. 114, 115, 252 ff.), while he mentions Sabbatha, prefers to place Sabtah near the western shore of the Persian Gulf, with the Saphtha of Ptolemy, the name also of an island in that gulf.

E. S. P.

**SABTECHA, and SABTECHAH** סַבְתְּכָא [see above]: Σαβασάκ. Σεβεθαχά; [Alex. in Gen., Σαβασαβα; Vat. in 1 Chr., Σεβεσαβα:] *Sabatacha, Sabathacha*, Gen. x. 7, 1 Chr. i. 9). The fifth in order of the sons of Cush, whose settlements would probably be near the Persian Gulf, where are those of Raamah, the next before him in the order of the Cushites. [RAAMAH, DEDAN, SHEBA.] He has not been identified with any Arabic place or district, nor satisfactorily with any name given by classical writers Bochart (who is followed by Bunsen, *Bibelw.*, Gen x. and *Atlas*) argues that he should be placed in Carmania, on the Persian shore of the gulf, comparing Sabtechah with the city of Samydace of Steph. Byz. (Σαμύδακη or Σαμυνδη of Ptol. vi 8, 7). This etymology appears to be very far-fetched. Gesenius merely says that Sabtechah is the proper name of a district of Ethiopia, and adds the reading of the Targ. Pseudojonathan (זַנְגְּיָא, *Zingitani*).

E. S. P.

**SA'CAR** (שָׂכָר [*hire, reward*]: Αχάρ; Alex. Σαχαρ: *Sachar*). 1. A Hararite, father of Ahiam, one of David's mighty men (1 Chr. xi. 35). In 2 Sam. xxiii. 33 he is called SHARAR, but Kennicott regards Sacar as the correct reading.

2. (Σαχάρ; [Vat. Σωχαρ; Alex. Σαχιαρ.]) The fourth son of Obed-edom (1 Chr. xxvi. 4).

**SACKBUT** (סַבְּכָא, Dan. iii. 5; שַׂבְּכָא, Dan. iii. 7, 10, 15: σαμβύκη: *sambuca*). The rendering in the A. V. of the Chaldee *sabbĕca*. If this musical instrument be the same as the Greek σαμβύκη and Latin *sambuca*,[a] the English translation is entirely wrong. The sackbut was a wind-instrument; the *sambuca* was played with strings. Mr. Chappell says (*Pop. Mus.* i. 35), "The sackbut was a bass trumpet with a slide, like the modern trombone." It had a deep note according to Drayton (*Polyolbion*, iv. 365): —

"The hoboy, *saybut deep*, recorder, and the flute."

The *sambuca* was a triangular instrument with four or more strings played with the fingers. According to Athenæus (xiv. 633), Masurius described it as having a shrill tone; and Euphorion, in his book on the Isthmian Games, said that it was used by the Parthians and Troglodytes, and had four strings. Its invention is attributed to one Sambyx, and to Sibylla its first use (Athen. xiv. 637). Juba, in the 4th book of his *Theatrical History*, says it was discovered in Syria, but Neanthes of Cyzicum, in the first book of the *Hours*, assigns it to the poet Ibycus of Rhegium (Athen. iv. 77). This last tradition is followed by Suidas, who describes the *sambuca* as a kind of triangular harp. That it was a foreign instrument is clear from the statement of Strabo (x. 471), who says its name is barbarous. Isidore of Seville (*Orig.* iii. 20) appears to regard it as a wind instrument, for he connects it with the *sambucus*, or elder, a kind of light wood of which pipes were made.

The *sambuca* was early known at Rome, for Plautus (*Stich.* ii. 2, 57) mentions the women who played it (*sambucæ*, or *sambucistriæ*, as they are called in Livy, xxxix. 6). It was a favorite among the Greeks (Polyb. v. 37), and the Rhodian women appear to have been celebrated for their skill in this instrument (Athen. iv. 129).

There was an engine called *sambuca* used in siege operations, which derived its name from the musical instrument, because, according to Athenæus (xiv. 634), when raised it had the form of a ship and a ladder combined in one.

**SACKCLOTH** (שַׂק: σάκκος: *saccus*). A coarse texture, of a dark color, made of goats' hair (Is. l. 3; Rev. vi. 12), and resembling the *cilicium* of the Romans. It was used (1) for making sacks, the same word describing both the material and the article (Gen. xlii. 25; Lev. xi. 32; Josh. ix. 4); and (2) for making the rough garments used by mourners, which were in extreme cases worn next the skin (1 K. xxi. 27; 2 K. vi. 30; Job xvi. 15; Is. xxxii. 11), and this even by females (Joel i. 8; 2 Macc. iii. 19), but at other times were worn over the coat or *cethoneth* (Jon. iii. 6) in lieu of the outer garment. The robe probably resembled a sack in shape, and fitted close to the person, as we may infer from the application of the term *châgar*[a] to the process of putting it on (2 Sam. iii. 31; Ex. vii. 18, &c.). It was confined by a girdle of similar material (Is. iii. 24). Sometimes it was worn throughout the night (1 K. xxi. 27). W. L. B.

**SACRIFICE.** The peculiar features of each kind of sacrifice are referred to under their respective heads; the object of this article will be: —

I. To examine the meaning and derivation of the various words used to denote sacrifice in Scripture.

II. To examine the historical development of sacrifice in the Old Testament.

III. To sketch briefly the theory of sacrifice, as it is set forth both in the Old and New Testaments, with especial reference to the Atonement of Christ.

I. Of all the words used in reference to sacrifice, the most general appear to be —

(*a.*) מִנְחָה, *minchah*, from the obsolete root מָנַח, "to give;" used in Gen. xxxii. 13, 20, 21, of a gift from Jacob to Esau (LXX. δῶρον); in 2 Sam. viii. 2, 6 (ξένια), in 1 K. iv. 21 (δῶρα), in 2 K. xvii. 4 (*mavad*), of a tribute from a vassal king; in Gen. iv. 3, 5, of a sacrifice generally (δῶρον and θυσία, indifferently); and in Lev. ii. 1, 4, 5, 6, joined with the word *korban*, of an unbloody sacrifice, or "meat-offering" (generally δῶρων θυσία). Its derivation and usage point to that idea of sacrifice, which represents it as an eucharistic gift to God our King.

(*b.*) קָרְבָּן, *korban*, derived from the root קָרַב, "to approach," or (in Hiphil) to "make to approach;" used with *minchah* in Lev. ii. 1, 4, 5, 6, (LXX. δῶρον θυσία), generally rendered δῶρον (see Mark vii. 11, κορβᾶν, ὅ ἐστι δῶρον) or προσφόρα. The idea of a gift hardly seems inherent in the root; which rather points to sacrifice, as a symbol of communion or covenant between God and man.

(*c.*) זֶבַח, *zebach*, derived from the root זָבַח, to "slaughter animals," especially to "slay in sacrifice," refers emphatically to a bloody sacrifice, one in which the shedding of blood is the essential idea. Thus it is opposed to *minchah*, in Ps. xl. 6 (θυσίαν καὶ προσφοράν), and to ὁλαὶ (the whole burnt-offering) in Ex. x. 25, xviii. 12, &c. With it the expiatory idea of sacrifice is naturally connected.

Distinct from these general terms, and often appended to them, are the words denoting special kinds of sacrifice: —

(*d.*) עוֹלָה, *ôlah* (generally ὁλοκαύτωμα), the "whole burnt-offering."

(*e.*) שֶׁלֶם, *shelem* (θυσία σ. τηρίον), used frequently with זֶבַח, and sometimes called קׇרְבָּן, the "peace-" or "thank-offering."

(*f.*) חַטָּאת, *chattâth* (generally περὶ ἁμαρτίας), the "sin-offering."

(*g.*) אָשָׁם, *âshâm* (generally πλημμελεία), the "trespass-offering."

For the examination of the derivation and meaning of these, see each under its own head.

II. (A.) ORIGIN OF SACRIFICE.

In tracing the history of sacrifice, from its first beginning to its perfect development in the Mosaic ritual, we are at once met by the long-disputed question, as to the *origin of sacrifice*; whether it arose from a natural instinct of man, sanctioned and guided by God, or whether it was the subject of some distinct primeval revelation.

It is a question, the importance of which has probably been exaggerated. There can be no doubt that sacrifice was sanctioned by God's Law, with a special typical reference to the Atonement of Christ; its universal prevalence, independent of, and often opposed to, man's natural reasonings on his relation to God, shows it to have been primeval, and deeply rooted in the instincts of humanity. Whether it was first enjoined by an external command, or whether it was based on that sense of sin and lost communion with God, which is stamped by his hand on the heart of man — is a historical question, perhaps insoluble, probably one which cannot be treated at all, except in connection with some general theory of the method of primeval revelation, but certainly one which does not affect the authority and the meaning of the rite itself.

The great difficulty in the theory which refers it to a distinct command of God, is the total silence of Holy Scripture — a silence the more remarkable, when contrasted with the distinct reference made in Gen. ii. to the origin of the Sabbath. Sacrifice when first mentioned, in the case of Cain and Abel, is referred to as a thing of course; it is said to have been brought by men; there is no hint of any command given by God. This consideration, the strength of which no ingenuity[b] has been able to impair, although it does not actually disprove the formal revelation of sacrifice, yet

---

[a] חָגַר.

[b] See, for example (as in Faber's *Origin of Sacrifice*), the elaborate reasoning on the translation of חַטָּאת in Gen. iv. 7. Even supposing the version, a "sin-offering coucheth at the door," to be correct, on the grounds of general usage of the word, of the curious version of the LXX., and of the remarkable grammatical construction of the masculine participle, with its feminine noun (as referring to the fact that the sin-offering was actually a male), still it does not settle the matter. The Lord even then speaks of sacrifice as existing, and as known to exist: He does not institute it. The supposition that the "skins of beasts" in Gen. iii. 21 were skins of animals sacrificed by God's command, is a pure assumption. The argument on Heb. xi. 4, that faith can rest only on a distinct Divine command as to the special occasion of its exercise is contradicted by the general definition of it given in v. 1.

Digitized by Google

at least forbids the assertion of it, as of a positive and important doctrine.

Nor is the fact of the mysterious and supernatural character of the doctrine of Atonement, with which the sacrifices of the O. T. are expressly connected, any conclusive argument on this side of the question. All allow that the eucharistic and deprecatory ideas of sacrifice are perfectly natural to man. The higher view of its expiatory character, dependent, as it is, entirely on its typical nature, appears but gradually in Scripture. It is veiled under other ideas in the case of the patriarchal sacrifices. It is first distinctly mentioned in the Law (Lev. xvii. 11, &c.); but even then the theory of the sin offering, and of the classes of sins to which it referred, is allowed to be obscure and difficult; it is only in the N. T. (especially in the Epistle to the Hebrews) that its nature is clearly unfolded. It is as likely that it pleased God gradually to superadd the higher idea to an institution, derived by man from the lower ideas (which must eventually find their justification in the higher), as that He originally commanded the institution when the time for the revelation of its full meaning was not yet come. The rainbow was just as truly the symbol of God's new promise in Gen. ix. 13–17, whether it had or had not existed, as a natural phenomenon before the Flood. What God sets his seal to, He makes a part of his revelation, whatever its origin may be. It is to be noticed (see Warburton's *Div. Leg.* ix. c. 2) that, except in Gen. xv. 9, the method of patriarchal sacrifice is left free, without any direction on the part of God, while in all the Mosaic ritual the limitation and regulation of sacrifice, as to time, place, and material, is a most prominent feature, on which much of its distinction from heathen sacrifice depended. The inference is at least probable that when God sanctioned formally a natural rite, then, and not till then, did He define its method.

The question, therefore, of the origin of sacrifice is best left in the silence with which Scripture surrounds it.

(B.) ANTE-MOSAIC HISTORY OF SACRIFICE.

In examining the various sacrifices, recorded in Scripture before the establishment of the Law, we find that the words specially denoting expiatory sacrifice (חַטָּאת and אָשָׁם) are not applied to them. This fact does not at all show, that they were not actually expiatory, nor even that the offerers had not that idea of expiation, which must have been vaguely felt in all sacrifices; but it justifies the inference, that this idea was not then the prominent one in the doctrine of sacrifice.

The sacrifice of Cain and Abel is called *minchah*, although in the case of the latter it was a bloody sacrifice. (So in Heb. xi. 4 the word θυσία is explained by the τοῖς δώροις below.) In the case of both it would appear to have been eucharistic, and the distinction between the offerers to have lain in their "faith" (Heb. xi. 4). Whether that faith of Abel referred to the promise of the Redeemer, and was connected with any idea of the typical meaning of sacrifice, or whether it was a simple and humble faith in the unseen God, as the giver and promiser of all good, we are not authorised by Scripture to decide.

The sacrifice of Noah after the Flood (Gen. viii. 20) is called burnt-offering (*olah*). This sacrifice is expressly connected with the institution of the *Covenant* which follows in ix. 8–17. The same ratification of a covenant is seen in the burnt offering of Abraham, especially enjoined and defined by God in Gen. xv. 9; and is probably to be traced in the "building of altars" by Abraham on entering Canaan at Bethel (Gen. xii. 7, 8) and Mamre (xiii. 18), by Isaac at Beer-sheba (xxvi. 25), and by Jacob at Shechem (xxxiii. 20), and in Jacob's setting up and anointing of the pillar at Bethel (xxviii. 18, xxxv. 14). The sacrifice (*zebach*) of Jacob at Mizpah also marks a covenant with Laban, to which God is called to be a witness and a party. In all these, therefore, the prominent idea seems to have been what is called the *federative*, the recognition of a bond between the sacrificer and God, and the dedication of himself, as represented by the victim, to the service of the Lord.

The sacrifice of Isaac (Gen. xxii. 1–13) stands by itself, as the sole instance in which the idea of human sacrifice was even for a moment, and as a trial, countenanced by God. Yet in its principle it appears to have been of the same nature as before: the voluntary surrender of an only son on Abraham's part, and the willing dedication of himself on Isaac's, are in the foreground: the expiatory idea, if recognized at all, holds certainly a secondary position.

In the burnt-offerings of Job for his children (Job i. 5) and for his three friends (xlii. 8), we for the first time find the expression of the desire of expiation for sin accompanied by repentance and prayer, and brought prominently forward. The same is the case in the words of Moses to Pharaoh, as to the necessity of sacrifice in the wilderness (Ex. x. 25), where sacrifice (*zebach*) is distinguished from burnt-offering. Here the main idea is at least deprecatory; the object is to appease the wrath, and avert the vengeance of God.

(C.) THE SACRIFICES OF THE MOSAIC PERIOD.

These are inaugurated by the offering of the PASSOVER and the sacrifice of Ex. xxiv. The Passover indeed is unique in its character, and seems to embrace the peculiarities of all the various divisions of sacrifice soon to be established. Its ceremonial, however, most nearly resembles that of the sin-offering in the emphatic use of the blood, which (after the first celebration) was poured at the bottom of the altar (see Lev. iv. 7), and in the care taken that none of the flesh should remain till the morning (see Ex. xii. 10, xxxiv. 25). It was unlike it in that the flesh was to be eaten by all (not burnt, or eaten by the priests alone), in token of their entering into covenant with God, and eating "at his table," as in the case of a peace-offering. Its peculiar position as a historical memorial, and its special reference to the future, naturally mark it out as incapable of being referred to any formal class of sacrifice; but it is clear that the idea of salvation from death by means of sacrifice is brought out in it with a distinctness before unknown.

The sacrifice of Ex. xxiv., offered as a solemn inauguration of the Covenant of Sinai, has a similarly comprehensive character. It is called a "burnt-offering" and "peace-offering" in v. 5; but the solemn use of the blood (comp. Heb. ix 18–22) distinctly marks the idea that expiatory sacrifice was needed for entering into covenant with God, the idea of which the sin- and trespass offerings were afterwards the symbols.

Digitized by Google

The Law of Leviticus now unfolds distinctly the various forms of sacrifice: —

(*a.*) *The burnt-offering.* SELF-DEDICATORY.
(*b.*) *The meat-offering (unbloody)* } EUCHARIS-
*The peace-offering (bloody)* } TIC.
(*c.*) *The sin-offering* } EXPIATORY.
*The trespass-offering* }

To these may be added, —

(*d.*) *The incense* offered after sacrifice in the Holy Place, and (on the Day of Atonement) in the Holy of Holies, the symbol of the intercession of the priest (as a type of the Great High Priest), accompanying and making efficacious the prayer of the people.

In the consecration of Aaron and his sons (Lev. viii.) we find these offered, in what became ever afterwards the appointed order: first came the sin-offering, to prepare access to God; next the burnt-offering, to mark their dedication to his service; and thirdly the meat-offering of thanksgiving. The same sacrifices, in the same order, with the addition of a peace-offering (eaten no doubt by all the people), were offered a week after for all the congregation, and accepted visibly by the descent of fire upon the burnt-offering. Henceforth the sacrificial system was fixed in all its parts, until He should come whom it typified.

It is to be noticed that the Law of Leviticus takes the rite of sacrifice for granted (see Lev. i. 2, ii. 1, &c., "If a man bring an offering, ye shall," etc.), and is directed chiefly to guide and limit its exercise. In every case but that of the peace-offering, the nature of the victim was carefully prescribed, so as to preserve the ideas symbolized, but so as to avoid the notion (so inherent in heathen systems, and finding its logical result in human sacrifice) that the more costly the offering, the more surely must it meet with acceptance. At the same time, probably in order to impress this truth on their minds, and also to guard against corruption by heathenish ceremonial, and against the notion that sacrifice in itself, without obedience, could avail (see 1 Sam. xv. 22, 23), the place of offering was expressly limited, first to the Tabernacle,[a] afterwards to the Temple. This ordinance also necessitated their periodical gathering as one nation before God, and so kept clearly before their minds their relation to Him as their national King. Both limitations brought out the great truth, that God Himself provided the way by which man should approach Him, and that the method of reconciliation was initiated by Him, and not by them.

In consequence of the peculiarity of the Law, it has been argued (as by Outram, Warburton, etc.) that the whole system of sacrifice was only a condescension to the weakness of the people, borrowed, more or less, from the heathen nations, especially from Egypt, in order to guard against worse superstitious and positive idolatry. The argument is mainly based (see Warb. *Div. Leg.* iv., sect. vi. 2) on Ex. xx. 25, and similar references in the O. and N. T. to the nullity of all mere ceremonial. Taken as an explanation of the theory of sacrifice, it is weak and superficial; it labors under two fatal difficulties, the historical fact of the primeval existence of sacrifice, and its typical reference to the one Atonement of Christ, which was foreordained from the very beginning, and had been already typified, as, for example, in the sacrifice of Isaac. But as giving a reason for the minuteness and elaboration of the Mosaic ceremonial, so remarkably contrasted with the freedom of patriarchal sacrifice, and as furnishing an explanation of certain special rites, it may probably have some value. It certainly contains this truth, that the craving for visible tokens of God's presence, and visible rites of worship, from which idolatry proceeds, was provided for and turned into a safe channel, by the whole ritual and typical system, of which sacrifice was the centre. The contact with the gigantic system of idolatry, which prevailed in Egypt, and which had so deeply tainted the spirit of the Israelites, would doubtless render such provision then especially necessary. It was one part of the prophetic office to guard against its degradation into formalism, and to bring out its spiritual meaning with an ever-increasing clearness.

(D.) POST-MOSAIC SACRIFICES.

It will not be necessary to pursue, in detail, the history of Post-Mosaic Sacrifice, for its main principles were now fixed forever. The most remarkable instances of sacrifice on a large scale are by Solomon at the consecration of the Temple (1 K. viii. 63), by Jehoiada after the death of Athaliah (2 Chr. xxiii. 18), and by Hezekiah at his great Passover and restoration of the Temple-worship (2 Chr. xxx. 21–24). In each case, the lavish use of victims was chiefly in the peace-offerings, which were a sacred national feast to the people at the Table of their Great King.

The regular sacrifices in the Temple service were: —

(*a.*) BURNT-OFFERINGS.

1. The daily burnt-offerings (Ex. xxix. 38–42).
2. The double burnt-offerings on the Sabbath (Num. xxviii. 9, 10).
3. The burnt-offerings at the great festivals (Num. xxviii. 11–xxix. 39).

(*b.*) MEAT-OFFERINGS.

1. The daily meat-offerings accompanying the daily burnt-offerings (flour, oil, and wine) (Ex. xxix. 40, 41).
2. The shew-bread (twelve loaves with frankincense), renewed every Sabbath (Lev. xxiv. 5–9).
3. The special meat-offerings at the Sabbath and the great festivals (Num. xxviii., xxix.).
4. The first-fruits at the Passover (Lev. xxiii. 10–14), at Pentecost (xxiii. 17–20), both "wave-offerings;" the first-fruits of the dough and threshing-floor at the harvest-time (Num. xv. 20, 21; Deut. xxvi. 1–11), called "heave-offerings."

(*c.*) SIN-OFFERINGS.

1. Sin-offering (a kid) each new moon (Num. xxviii. 15).
2. Sin-offerings at the Passover, Pentecost, Feast of Trumpets, and Tabernacles (Num. xxviii. 22, 30, xxix. 5, 16, 19, 22, 25, 28, 31, 34, 38).
3. The offering of the two goats (the goat sacrificed and the scape-goat) for the people, and of the bullock for the priest himself, on the Great Day of Atonement (Lev. xvi.).

(*d.*) INCENSE.

1. The morning and evening incense (Ex. xxx 7–8).

[a] For instances of infringement of this rule uncensured, see Judg. ii. 5, vi. 26, xiii. 19; 1 Sam. xi. 15, xv[1] 5; 2 Sam. vi 13; 1 K. iii. 2, 3. Most of these cases are special, some authorised by special command; but the Law probably did not attain to its full strictness till the foundation of the Temple.

Digitized by Google

2. The incense on the Great Day of Atonement (Lev. xvi. 12).

Besides these public sacrifices, there were offerings of the people for themselves individually; at the purification of women (Lev. xii.), the presentation of the first-born, and circumcision of all male children, the cleansing of the leprosy (Lev. xiv.) or any uncleanness (Lev. xv.), at the fulfillment of Nazaritic and other vows (Num. vi. 1–21), on occasions of marriage and of burial, etc., etc., besides the frequent offering of private sin-offerings. These must have kept up a constant succession of sacrifices every day; and brought the rite home to every man's thought, and to every occasion of human life.

(III.) In examining the doctrine of sacrifice, it is necessary to remember, that, in its development, the order of idea is not necessarily the same as the order of time. By the order of sacrifice in its perfect form (as in Lev. viii.) it is clear that the sin-offering occupies the most important place, the burnt-offering comes next, and the meat-offering or peace-offering last of all. The second could only be offered after the first had been accepted; the third was only a subsidiary part of the second. Yet, in actual order of time, it has been seen, that the patriarchal sacrifices partook much more of the nature of the peace-offering and burnt-offering; and that, under the Law, by which was "the knowledge of sin" (Rom. iii. 20), the sin-offering was for the first time explicitly set forth. This is but natural, that the deepest ideas should be the last in order of development.

It is also obvious, that those who believe in the unity of the O. and N. T., and the typical nature of the Mosaic Covenant, must view the type in constant reference to the antitype, and be prepared therefore to find in the former vague and recondite meanings, which are fixed and manifested by the latter. The sacrifices must be considered, not merely as they stand in the Law, or even as they might have appeared to a pious Israelite; but as they were illustrated by the Prophets, and perfectly interpreted in the N. T. (*e. g.* in the Epistle to the Hebrews). It follows from this, that, as belonging to a system which was to embrace all mankind in its influence, they should be also compared and contrasted with the sacrifices and worship of God in other nations, and the ideas which in them were dimly and confusedly expressed.

It is needless to dwell on the universality of heathen sacrifices,[a] and difficult to reduce to any single theory the various ideas involved therein. It is clear, that the sacrifice was often looked upon as a gift or tribute to the gods: an idea which (for example) runs through all Greek literature, from the simple conception in Homer to the caricatures of Aristophanes or Lucian, against the perversion of which St. Paul protested at Athens, when he declared that God *needed* nothing at human hands (Acts xvii. 25). It is also clear that sacrifices were used as prayers, to obtain benefits, or to avert wrath; and that this idea was corrupted into the superstition, denounced by heathen satirists as well as by Hebrew prophets, that by them the gods' favor could be purchased for the wicked, or their "envy" be averted from the prosperous. On the other hand, that they were regarded as thank-offerings, and the feasting on their flesh as a partaking of the "table of the gods" (comp. 1 Cor. x. 20 21), is equally certain. Nor was the higher idea of sacrifice, as a representation of the self-devotion of the offerer, body and soul, to the god, wholly lost, although generally obscured by the grosser and more obvious conceptions of the rite. But, besides all these, there seems always to have been latent the idea of propitiation, that is, the belief in a communion with the gods, natural to man, broken off in some way, and by sacrifice to be restored. The emphatic "shedding of the blood," as the essential part of the sacrifice, while the flesh was often eaten by the priests or the sacrificer, is not capable of any full explanation by any of the ideas above referred to. Whether it represented the death of the sacrificer, or (as in cases of national offering of human victims, and of those self-devoted for their country) an atoning death for him; still, in either case it contained the idea that "without shedding of blood is no remission," and so had a vague and distorted glimpse of the great central truth of Revelation. Such an idea may be (as has been argued) "unnatural," in that it could not be explained by natural reason; but it certainly was not unnatural, if frequency of existence, and accordance with a deep natural instinct, be allowed to preclude that epithet.

Now the essential difference between these heathen views of sacrifice and the Scriptural doctrine of the O. T. is not to be found in its denial of any of these ideas. The very names used in it for sacrifice (as is seen above) involve the conception of the rite as a gift, a form of worship, a thank-offering, a self-devotion, and an atonement. In fact, it brings out, clearly and distinctly, the ideas which in heatheniam were uncertain, vague, and perverted.

But the essential points of distinction are two. First, that whereas the heathen conceived of their gods as alienated in jealousy or anger, to be sought after, and to be appeased by the unaided action of man, Scripture represents God himself as approaching man, as pointing out and sanctioning the way by which the broken covenant should be restored. This was impressed on the Israelites at every step by the minute directions of the Law, as to time, place, victim, and ceremonial, by its utterly discountenancing the "will-worship," which in heatheniam found full scope, and rioted in the invention of costly or monstrous sacrifices. And it is especially to be noted, that this particularity is increased as we approach nearer to the deep propitiatory idea; for that, whereas the patriarchal sacrifices generally seem to have been undefined by God, and even under the Law, the nature of the peace-offerings, and (to some extent) the burnt-offerings, was determined by the sacrificer only, the solemn sacrifice of Abraham in the inauguration of his covenant was prescribed to him, and the sin-offerings under the Law were most accurately and minutely determined. (See, for example, the whole ceremonial of Lev. xvi.) It is needless to remark, how this essential difference purifies all the ideas above noticed from the corruptions, which made them odious or contemptible, and sets on its true basis the relation between God and fallen man.

The second mark of distinction is closely connected with this, inasmuch as it shows sacrifice to

[a] See Magee's *Diss. on Sacr.*, vol. i. diss. v., and Ernst von Lasaulx's Treatise on Greek and Roman Sacrifice, quoted in notes 23, 26, to Thomson's *Bampton Lectures*, 1853.

be a scheme proceeding from God, and, in his foreknowledge, connected with the one central fact of all human history. It is to be found in the typical character of all Jewish sacrifices, on which, as the Epistle to the Hebrews argues, all their efficacy depended. It must be remembered that, like other ordinances of the Law, they had a two-fold effect, depending on the special position of an Israelite, as a member of the natural Theocracy, and on his general position, as a man in relation with God. On the one hand, for example, the sin-offering was an atonement to the national law for moral offenses of negligence, which in "presumptuous," *i. e.* deliberate and willful crime, was rejected (see Num. xv. 27–31; and comp. Heb. x. 26, 27). On the other hand it had, as the prophetic writings show us, a distinct spiritual significance, as a means of expressing repentance and receiving forgiveness, which could have belonged to it only as a type of the Great Atonement. How far that typical meaning was recognized at different periods and by different persons, it is useless to speculate; but it would be impossible to doubt, even if we had no testimony on the subject, that, in the face of the high spiritual teaching of the Law and the Prophets, a pious Israelite must have felt the nullity of material sacrifice in itself, and so believed it to be availing only as an ordinance of God, shadowing out some great spiritual truth, or action of his. Nor is it unlikely that, with more or less distinctness, he connected the evolution of this, as of other truths, with the coming of the promised Messiah. But, however this be, we know that, in God's purpose, the whole system was typical, that all its spiritual efficacy depended on the true sacrifice which it represented, and could be received only on condition of Faith, and that, therefore, it passed away when the Antitype was come.

The nature and meaning of the various kinds of sacrifice is partly gathered from the form of their institution and ceremonial, partly from the teaching of the Prophets, and partly from the N. T., especially the Epistle to the Hebrews. All had relation, under different aspects, to a *Covenant* between God and man.

The SIN-OFFERING represented that Covenant as broken by man, and as knit together again, by God's appointment, through the "shedding of blood." Its characteristic ceremony was the sprinkling of the blood before the veil of the Sanctuary, the putting some of it on the horns of the altar of incense, and the pouring out of all the rest at the foot of the altar of burnt-offering. The flesh was in no case touched by the offerer; either it was consumed by fire without the camp, or it was eaten by the priest alone in the holy place, and everything that touched it was holy (קֹדֶשׁ).[a] This latter point marked the distinction from the peace-offering, and showed that the sacrificer had been rendered unworthy of communion with God. The shedding of the blood, the symbol of life, signified that the death of the offender was deserved for sin, but that the death of the victim was accepted for his death by the ordinance of God's mercy. This is seen most clearly in the ceremonial of the Day of Atonement, when, after the sacrifice of the one goat, the high-priest's hand was laid on the head of the scape-goat — which was the other part of the sin-offering — with confession of the sins of the people, that it might visibly bear them away, and so bring out explicitly, what in other sin-offerings was but implied. Accordingly we find (see quotation from the Mishna in Outr. *De Sacr.* i. c. xv., § 10) that, in all cases, it was the custom for the offerer to lay his hand on the head of the sin-offering, to confess generally or specially his sins, and to say, "Let *this* be my expiation." Beyond all doubt, the sin-offering distinctly witnessed, that sin existed in man, that the "wages of that sin was death," and that God had provided an Atonement by the vicarious suffering of an appointed victim. The reference of the Baptist to a "Lamb of God who taketh away the sins of the world," was one understood and hailed at once by a "true Israelite."

The ceremonial and meaning of the BURNT-OFFERING were very different. The idea of expiation seems not to have been absent from it (for the blood was sprinkled round about the altar of sacrifice);[b] and, before the Levitical ordinance of the sin-offering to precede it, this idea may have been even prominent. But in the system of Leviticus it is evidently only secondary. The main idea is the offering of the whole victim to God, representing (as the laying of the hand on its head shows) the devotion of the sacrificer, body and soul, to Him. The death of the victim was (so to speak) an incidental feature, to signify the completeness of the devotion; and it is to be noticed that, in all solemn sacrifices, no burnt-offering could be made until a previous sin-offering had brought the sacrificer again into covenant with God. The main idea of this sacrifice must have been representative, not vicarious, and the best comment upon it is the exhortation in Rom. xii. 1, "to present our bodies a living sacrifice, holy and acceptable to God."

The MEAT-OFFERINGS, the peace or thank-offering, the first-fruits, etc., were simply offerings to God of his own best gifts, as a sign of thankful homage, and as a means of maintaining his service and his servants. Whether they were regular or voluntary, individual or national, independent or subsidiary to other offerings, this was still the leading idea. The meat-offering, of flour, oil, and wine, seasoned with salt, and hallowed by frankincense, was usually an appendage to the devotion implied in the burnt-offering; and the peace-offerings for the people held the same place in Aaron's first sacrifice (Lev. ix. 22), and in all others of special solemnity. The characteristic ceremony in the peace-offering was the eating of the flesh by the sacrificer (after the fat had been burnt before the Lord, and the breast and shoulder given to the priests). It betokened the enjoyment of communion with God at "the table of the Lord," in the gifts which his mercy had bestowed, of which a choice portion was offered to Him, to his servants, and to his poor (see Deut. xiv. 28, 29). To this

[a] Some render this (like *Sacer*) "accursed;" but the primitive meaning "clean," and the usage of the word, seem decisive against this. LXX. ἁγία (*vid.* Jessen. *s. v.*).

[b] In Lev. i. 4, it is said to "atone" (כִּפֶּר, *i. e.* to "cover," and so to "do away;" LXX. ἐξιλάσασθαι). The same word is used below of the sin-offering; and the later Jews distinguish the burnt-offering as atoning for thoughts and designs, the sin-offering for acts of transgression. (See Jonath. Paraphr. on Lev. vi. 17, etc., quoted by Outram.)

view of sacrifice allusion is made by St. Paul in Phil. iv. 18; Heb. xiii. 15, 16. It follows naturally from the other two.

It is clear from this, that the idea of sacrifice is a complex idea, involving the propitiatory, the dedicatory, and the eucharistic elements. Any one of these, taken by itself, would lead to error and superstition. The propitiatory alone would tend to the idea of atonement by sacrifice for sin, as being effectual without any condition of repentance and faith; the self-dedicatory, taken alone, ignores the barrier of sin between man and God, and undermines the whole idea of atonement; the eucharistic alone leads to the notion that mere gifts can satisfy God's service, and is easily perverted into the heathenish attempt to "bribe" God by vows and offerings. All three probably were more or less implied in each sacrifice, each element predominating in its turn: all must be kept in mind in considering the historical influence, the spiritual meaning, and the typical value of sacrifice.

Now the Israelites, while they seem always to have retained the ideas of propitiation and of eucharistic offering, even when they perverted these by half-heathenish superstition, constantly ignored the self-dedication which is the link between the two, and which the regular burnt-offering should have impressed upon them as their daily thought and duty. It is therefore to this point that the teaching of the Prophets is mainly directed; its key-note is contained in the words of Samuel: "Behold, to obey is better than sacrifice, and to hearken than the fat of rams" (1 Sam. xv. 22). So Isaiah declares (as in i. 10–20) that "the Lord delights not in the blood of bullocks, or lambs, or goats;" that to those who "cease to do evil and learn to do well, . . . . though their sins be as scarlet, they shall be white as snow." Jeremiah reminds them (vii. 22, 23) that the Lord did not "command burnt-offerings or sacrifices" under Moses, but said, "Obey my voice, and I will be your God." Ezekiel is full of indignant protests (see xx. 39–44) against the pollution of God's name by offerings of those whose hearts were with their idols. Hosea sets forth God's requirements (vi. 6) in words which our Lord himself sanctioned: "I desired mercy and not sacrifice, and the knowledge of God more than burnt-offerings." Amos (v. 21–27) puts it even more strongly, that God "hates" their sacrifices, unless "judgment run down like water, and righteousness like a mighty stream." And Micah (vi. 6–8) answers the question which lies at the root of sacrifice, "Wherewith shall I come before the Lord?" by the words, "What doth the Lord require of thee, but to do justly, and love mercy, and walk humbly with thy God?" All these passages, and many others, are directed to one object — not to discourage sacrifice, but to purify and spiritualize the feelings of the offerers.

The same truth, here enunciated from without, is recognized from within by the Psalmist. Thus he says, in Ps. xl. 6–11, "Sacrifice and meat-offering, burnt-offering and sin-offering, Thou hast not required;" and contrasts with them the homage of the heart — "mine ears hast Thou bored," and the active service of life — "Lo! I come to do Thy will, O God." In Ps. l. 13, 14, sacrifice is contrasted with prayer and adoration (comp. Ps. xxii. 2): "Thinkest thou that I will eat bulls' flesh, and drink the blood of goats? Offer unto God thanksgiving, pay thy vows to the Most Highest, and call upon me in time of trouble." In Ps. li. 16, 17, it is similarly contrasted with true repentance of the heart: "The sacrifice of God is a troubled spirit, a broken and a contrite heart." Yet here also the next verse shows that sacrifice was not superseded, but purified: "*Then* shalt thou be pleased with burnt-offerings and oblations; then shall they offer young bullocks upon thine altar." These passages are correlative to the others, expressing the feelings, which those others in God's name require. It is not to be argued from them, that this idea of self-dedication is the main one of sacrifice. The idea of propitiation lies below it, taken for granted by the Prophets as by the whole people, but still enveloped in mystery until the Antitype should come to make all clear. For the evolution of this doctrine we must look to the N. T.; the preparation for it by the Prophets was (so to speak) negative, the pointing out the nullity of all other propitiations in themselves, and then leaving the warnings of the conscience and the cravings of the heart to fix men's hearts on the better Atonement to come.

Without entering directly on the great subject of the Atonement (which would be foreign to the scope of this article), it will be sufficient to refer to the connection, established in the N. T., between it and the sacrifices of the Mosaic system. To do this, we need do little more than analyze the Epistle to the Hebrews, which contains the key of the whole sacrificial doctrine.

In the first place, it follows the prophetic books by stating, in the most emphatic terms, the intrinsic nullity of all mere material sacrifices. The "gifts and sacrifices" of the first Tabernacle could "never make the sacrificers perfect in conscience" (*κατὰ συνείδησιν*); they were but "carnal ordinances, imposed on them till the time of reformation" (*διορθώσεως*) (Heb. ix. 9, 10). The very fact of their constant repetition is said to prove this imperfection, which depends on the fundamental principle, "that it is impossible that the blood of bulls and goats should take away sin" (x. 4). But it does not lead us to infer, that they actually had no spiritual efficacy, if offered in repentance and faith. On the contrary, the object of the whole epistle is to show their typical and probationary character, and to assert that in virtue of it alone they had a spiritual meaning. Our Lord is declared (see 1 Pet. i. 20) "to have been foreordained" as a sacrifice "before the foundation of the world;" or (as it is more strikingly expressed in Rev. xiii. 8) "slain from the foundation of the world." The material sacrifices represented this Great Atonement, as already made and accepted in God's foreknowledge; and to those who grasped the ideas of sin, pardon, and self-dedication, symbolized in them, they were means of entering into the blessings which the One True Sacrifice alone procured. Otherwise the whole sacrificial system could have been only a superstition and a snare. The sins provided for by the sin-offering were certainly in some cases moral. [See SIN-OFFERING.] The whole of the Mosaic description of sacrifices clearly implies some real spiritual benefit to be derived from them, besides the temporal privileges belonging to the national theocracy. Just as St. Paul argues (Gal. iii. 15–29) that the Promise and Covenant to Abraham were of primary, the Law only of secondary, importance, so that men had *under* the Law more than they had *by* the Law; so it must be said of the Levitical

Digitized by Google

sacrifices. They could convey nothing in themselves; yet, as types, they might, if accepted by a true, though necessarily imperfect, faith, be means of conveying in some degree the blessings of the Antitype.

This typical character of all sacrifice being thus set forth, the next point dwelt upon is the union in our Lord's person of the priest, the offerer, and the sacrifice. [PRIEST.] The imperfection of all sacrifices, which made them, in themselves, liable to superstition, and even inexplicable, lies in this, that, on the one hand, the victim seems arbitrarily chosen to be the substitute for, or the representative of, the sacrificer;[a] and that, on the other, if there be a barrier of sin between man and God, he has no right of approach, or security that his sacrifice will be accepted; that there needs, therefore, to be a Mediator, *i. e.* (according to the definition of Heb. v. 1–4), a true Priest, who shall, as being One with man, offer the sacrifice, and accept it, as being One with God. It is shown that this imperfection, which necessarily existed in all types, without which indeed they would have been substitutes, not preparations for the Antitype, was altogether done away in Him; that in the first place He, as the representative of the whole human race, offered no arbitrarily-chosen victim, but the willing sacrifice of his own blood; that, in the second, He was ordained by God, by a solemn oath, to be a high-priest forever, "after the order of Melchizedek," one "in all points tempted like as we are, yet without sin," united to our human nature, susceptible to its infirmities and trials, yet, at the same time, the True Son of God, exalted far above all created things, and ever living to make intercession in heaven, now that his sacrifice is over; and that, in the last place, the barrier between man and God is by his mediation done away forever, and the Most Holy Place once for all opened to man. All the points, in the doctrine of sacrifice, which had before been unintelligible, were thus made clear.

This being the case, it next follows that all the various kinds of sacrifices were, each in its measure, representatives and types of the various aspects of the Atonement. It is clear that the Atonement, in this epistle, as in the N. T. generally, is viewed in a twofold light.

On the one hand, it is set forth distinctly as a vicarious sacrifice, which was rendered necessary by the sin of man, and in which the Lord "bare the sins of many." It is its essential characteristic, that in it He stands absolutely alone, offering his sacrifice without any reference to the faith or the conversion of men — offering it indeed for those who "were still sinners" and at enmity with God. Moreover it is called a "propitiation" (ἱλασμός or ἱλαστήριον, Rom. iii. 25; 1 John ii. 2); a "ransom" (ἀπολύτρωσις, Rom. iii. 24; 1 Cor. i. 30, &c.); which, if words mean anything, must imply that it makes a change in the relation between God and man, from separation to union, from wrath to love, and a change in man's state from bondage to freedom. In it, then, He stands out alone as the Mediator between God and man; and his sacrifice is offered once for all, never to be imitated or repeated.

Now this view of the Atonement is set forth in the Epistle to the Hebrews, as typified by the sin-offering; especially by that particular sin-offering with which the high-priest entered the Most Holy Place on the Great Day of Atonement (ix. 7–12), and by that which hallowed the inauguration of the Mosaic covenant, and cleansed the vessels of its ministration (ix. 18–23). In the same way, Christ is called "our Passover, sacrificed for us" (1 Cor. v. 7); and is said, in even more startling language, to have been "made sin for us," though He "knew no sin" (2 Cor. v. 21). This typical relation is pursued even into details, and our Lord's suffering without the city is compared to the burning of the public or priestly sin-offerings without the camp (Heb. xiii. 10–13). The altar of sacrifice (θυσιαστήριον) is said to have its antitype in his Passion (xiii. 10). All the expiatory and propitiatory sacrifices of the Law are now for the first time brought into full light. And though the principle of vicarious sacrifice still remains, and must remain, a mystery, yet the fact of its existence in Him is illustrated by a thousand types. As the sin-offering, though not the earliest, is the most fundamental of all sacrifices, so the aspect of the Atonement, which it symbolizes, is the one on which all others rest.

On the other hand, the sacrifice of Christ is set forth to us as the completion of that perfect obedience to the will of the Father, which is the natural duty of sinless man, in which He is the representative of all men, and in which He calls upon us, when reconciled to God, to "take up the Cross and follow Him." "In the days of his flesh He offered up prayers and supplications . . . and was heard, in that He feared; though He were a Son, yet learned He obedience by the things which he suffered: and being made perfect" (by that suffering; see ii. 10), "He became the author of salvation to all them that obey Him" (v. 7, 8, 9). In this view his death is not the principal object; we dwell rather on his lowly incarnation, and his life of humility, temptation, and suffering, to which that death was but a fitting close. In the passage above referred to the allusion is not to the Cross of Calvary, but to the agony in Gethsemane, which bowed his human will to the will of his Father. The main idea of this view of the Atonement is representative, rather than vicarious. In the first view the "second Adam" undid by his atoning blood the work of evil which the first Adam did; in the second He, by his perfect obedience, did that which the first Adam left undone, and, by his grace making us like Himself, calls upon us to follow Him in the same path. This latter view is typified by the burnt-offering: in respect of which the N. T. merely quotes and enforces the language already cited from the O. T., and especially (see Heb. x. 6–9) the words of Ps. xl. 6, &c., which contrast with material sacrifice the "doing the will of God." It is one, which cannot be dwelt upon at all without a previous implication of the other; as both were embraced in one act, so are they inseparably connected in idea. Thus it is put forth in Rom. xii. 1, where the "mercies of God" (*i. e.* the free salvation, through the sin-offering of Christ's blood, dwelt upon in all the preceding part of the epistle) are made the ground for calling on us "to present our bodies, *a living*

[a] It may be remembered that devices, sometimes malicious, sometimes horrible, were adopted to make the victim appear willing; and that voluntary sacrifice, such as that of the Decii, was held to be the noblest of all.

Digitized by Google

*sacrifice*, holy and acceptable to God," inasmuch as we are all (see v. 5) one with Christ and members of his body. In this sense it is that we are said to be "crucified with Christ" (Gal. ii. 20; Rom. vi. 6); to have "the sufferings of Christ abound in us" (2 Cor. i. 5); even to "fill up that which is behind" (τὰ ὑστερήματα) thereof (Col. i. 24); and to "be offered" (σπένδεσθαι) "upon the sacrifice of the faith" of others (Phil. ii. 17; comp. 2 Tim. iv. 6; 1 John iii. 16). As without the sin-offering of the Cross, this, our burnt-offering, would be impossible, so also without the burnt-offering the sin-offering will to us be unavailing.

With these views of our Lord's sacrifice on earth, as typified in the Levitical sacrifices on the outer altar, is also to be connected the offering of his intercession for us in heaven, which was represented by the incense. In the Epistle to the Hebrews, this part of his priestly office is dwelt upon, with particular reference to the offering of incense in the Most Holy Place by the high-priest on the Great Day of Atonement (Heb. ix. 24–28; comp. iv. 14–16, vi. 19, 20, vii. 25). It implies that the sin-offering has been made once for all, to rend asunder the veil (of sin) between man and God; and that the continual burnt-offering is now accepted by Him for the sake of the Great Interceding High-priest. That intercession is the strength of our prayers, and "with the smoke of its incense" they rise up to heaven (Rev. viii. 4). [PRAYER.]

The typical sense of the meat-offering, or peace-offering, is less connected with the sacrifice of Christ himself, than with those sacrifices of praise, thanksgiving, charity, and devotion, which we, as Christians, offer to God, and "with which he is well pleased" (Heb. xiii. 15, 16) as with "an odor of sweet smell, a sacrifice acceptable to God" (Phil. iv. 18). They betoken that, through the peace won by the sin-offering, we have already been enabled to dedicate ourselves to God, and they are, as it were, the ornaments and accessories of that self-dedication.

Such is a brief sketch of the doctrine of Sacrifice. It is seen to have been deeply rooted in men's hearts; and to have been, from the beginning, accepted and sanctioned by God, and made by Him one channel of his Revelation. In virtue of that sanction it had a value, partly symbolical, partly actual, but in all respects derived from the one True Sacrifice, of which it was the type. It involved the expiatory, the self-dedicatory, and the eucharistic ideas, each gradually developed and explained, but all capable of full explanation only by the light reflected back from the Antitype.

On the antiquarian part of the subject valuable information may be found in Spencer, *De Legibus Hebræorum*, and Outram, *De Sacrificiis*. The question of the origin of sacrifice is treated clearly on either side by Faber, *On the (Divine) Origin of Sacrifice*, and by Davidson, *Inquiry into the Origin of Sacrifice*; and Warburton, *Div. Leg* (b. ix. s 2). On the general subject, see Magee's *Dissertation on Atonement*; the Appendix to Tholuck's *Treatise on the Hebrews*; Kurtz, *Der Alttestamentliche Opfercultus*, Mitau, 1862 [Eng. translation by James Martin, Edinb. 1863, in Clark's *Foreign Theol. Libr.*; comp. *Bibl. Sacra*, ix. 27–51]; and the catalogue of authorities in Winer's *Realwörterb.*, "Opfer." But it needs for its consideration little but the careful study of Scripture itself. A. B.

Noyes, *The Scripture Doctrine of Sacrifice*, in the *Christian Examiner* (Boston) for Sept. 1855, and the learned and elaborate discussion of the subject in Kalisch's *Leviticus*, part i. (Lond. 1867), pp. 1–416. A.

**SADAMI'AS** (*Sadanias*). The name of SHALLUM, one of the ancestors of EZRA, is so written in 2 Esdr. i. 1.

**SA'DAS** ('Αργαί; Alex. Ασταα; [Ald. Σαδδί:] *Archad*). AZGAD (1 Esdr. v. 13; comp. Ezr. ii. 12). The form Sadas is retained from the Geneva version. [This form, it will be observed, is the reading of the Aldine edition. — A.]

**SADDE'US** (Λοδδαῖος; [Vat. Λοδαιος;] Alex. Δολδαιος; [Ald. Δαδδαῖος:] *Loddeus*). "IDDO, the chief at the place Casiphia," is called in 1 Esdr. viii. 45, "Saddeus the captain, who was in the place of the treasury." In 1 Esdr. viii. 46 the name is written "Daddeus" in the A. V., as in the Geneva Version of both passages.

* **SADDLE.** [CAMEL; FURNITURE; HORSE; MULE.]

**SAD'DUC** (Σαδδοῦκος; [Vat. Σαδδουλουκος, Mai, *Errata*:] *Saduc*). ZADOK the high-priest, ancestor of Ezra (1 Esdr. viii. 2).

**SAD'DUCEES** (Σαδδουκαῖοι: *Sadducæi*: Matt. iii. 7, xvi. 1, 6, 11, 12, xxii. 23, 34; Mark xii. 18; Luke xx. 27; Acts iv. 1, v. 17, xxiii. 6, 7, 8). A religious party or school among the Jews at the time of Christ, who denied that the oral law was a revelation of God to the Israelites, and who deemed the written law alone to be obligatory on the nation, as of Divine authority. Although frequently mentioned in the New Testament in conjunction with the Pharisees, they do not throw such vivid light as their great antagonists on the real significance of Christianity. Except on one occasion, when they united with the Pharisees in insidiously asking for a sign from heaven (Matt. xvi. 1, 4, 6), Christ never assailed the Sadducees with the same bitter denunciations which he utters against the Pharisees; and they do not, like the Pharisees, seem to have taken active measures for causing him to be put to death. In this respect, and in many others, they have not been so influential as the Pharisees in the world's history; but still they deserve attention, as representing Jewish ideas before the Pharisees became triumphant, and as illustrating one phase of Jewish thought at the time when the new religion of Christianity, destined to produce such a momentous revolution in the opinions of mankind, issued from Judæa.

*Authorities.* — The sources of information respecting the Sadducees are much the same as for the Pharisees. [PHARISEES, vol. iii. p. 2472.] There are, however, some exceptions negatively. Thus, the Sadducees are not spoken of at all in the fourth Gospel, where the Pharisees are frequently mentioned, John vii. 32, 45, xi. 47, 57, xviii. 3, viii. 3, 13–19, ix. 13; an omission which, as Geiger suggests, is not unimportant in reference to the criticism of the Gospels (*Urschrift und Uebersetzungen der Bibel*, p. 107). Moreover, while St Paul had been a Pharisee and was the son of a Pharisee; while Josephus was a Pharisee, and the Mishna was a Pharisaical digest of Pharisaical

Digitized by Google

opinions and practices, not a single undoubted writing of an acknowledged Sadducee has come down to us, so that for an acquaintance with their opinions we are mainly dependent on their antagonists. This point should be always borne in mind in judging their opinions, and forming an estimate of their character, and its full bearing will be duly appreciated by those who reflect that even at the present day, with all the checks against misrepresentation arising from publicity and the invention of printing, probably no religious or political party in England would be content to accept the statements of an opponent as giving a correct view of its opinions.

*Origin of the name.* — Like etymologies of words, the origin of the name of a sect is, in some cases, almost wholly immaterial, while in other cases it is of extreme importance towards understanding opinions which it is proposed to investigate. The origin of the name Sadducees is of the latter description; and a reasonable certainty on this point would go far towards ensuring correct ideas respecting the position of the Sadducees in the Jewish state. The subject, however, is involved in great difficulties. The Hebrew word by which they are called in the Mishna is *Tsedúkim*, the plural of *Tsâdôk*, which undoubtedly means "just," or "righteous," but which is never used in the Bible except as a proper name, and in the Anglican Version is always translated "Zadok" (2 K. xv. 33; 2 Sam. viii. 17; 1 Chr. vi. 8, 12, &c.; Neh. iii. 4, 29, xi. 11). The most obvious translation of the word, therefore, is to call them Zadoks or Zadokites; and a question would then arise as to why they were so called. The ordinary Jewish statement is that they are named from a certain Zadok, a disciple of the Antigonus of Socho, who is mentioned in the Mishna (*Avôth* i.) as having received the oral law from Simon the Just, the last of the men of the Great Synagogue. It is recorded of this Antigonus that he used to say: "Be not like servants who serve their master for the sake of receiving a reward, but be like servants who serve their master without a view of receiving a reward;" and the current statement has been that Zadok, who gave his name to the Zadokites or Sadducees, misinterpreted this saying so far, as not only to maintain the great truth that virtue should be the rule of conduct without reference to the rewards of the individual agent, but likewise to proclaim the doctrine that there was no future state of rewards and punishments. (See Buxtorf, *s. v.* צָדוֹק; Lightfoot's *Horæ Hebraicæ on Matth.* i. 8, and the Note of Maimonides in Surenhusius's *Mishna*, iv. 411.) If, however, the statement is traced up to its original source, it is found that there is no mention of it either in the Mishna, or in any other part of the Talmud (Geiger's *Urschrift*, etc., p. 105), and that the first mention of something of the kind is in a small work by a certain Rabbi Nathan, which he wrote on the Treatise of the Mishna called the *Avôth*, or "Fathers." But the age in which this Rabbi Nathan lived is uncertain (Bartolocci, *Bibliotheca Magna Rabbinica*, vol. iii. p. 770), and the earliest mention of him is in a well-known Rabbinical dictionary called the *Aruch*,[a] which was completed about the year 1105, A. D. The following are the words of the above-mentioned Rabbi Nathan of the *Avôth*. Adverting to the passage in the Mishna, already quoted, respecting Antigonus's saying, he observes: "Antigonus of Socho had two disciples who taught the saying to their disciples, and these disciples again taught it to their disciples. At last these began to scrutinize it narrowly, and said, 'What did our Fathers mean in teaching this saying? Is it possible that a laborer is to perform his work all the day, and not receive his wages in the evening? Truly, if our Fathers had known that there is another world and a resurrection of the dead, they would not have spoken thus.' They then began to separate themselves from the Law; and so there arose two sects, the Zadokites and Baithusians, the former from Zadok, and the latter from Baithos." Now it is to be observed on this passage that it does not justify the once current belief that Zadok himself misinterpreted Antigonus's saying; and it suggests no reason why the followers of the supposed new doctrines should have taken their name from Zadok rather than Antigonus. Bearing this in mind, in connection with several other points of the same nature, such as, for example, the total silence respecting any such story in the works of Josephus or in the Talmud; the absence of any other special information respecting even the existence of the supposed Zadok; the improbable and childishly illogical reasons assigned for the departure of Zadok's disciples from the Law; the circumstances that Rabbi Nathan held the tenets of the Pharisees, that the statements of a Pharisee respecting the Sadducees must always be received with a certain reserve, that Rabbi Nathan of the *Avôth*, for aught that has ever been proved to the contrary, may have lived as long as 1000 years after the first ap-

[a] *Aruch*, or *'Arûc* (הָעֲרוּךְ), means "arranged," or "set in order." The author of this work was another Rabbi Nathan Ben Jechiel, president of the Jewish Academy at Rome, who died in 1106. A. D. (See Bartolocci, *Bibl. Rabb.* iv. 261.) The reference to Rabbi Nathan, author of the treatise on the *Avôth*, is made in the *Aruch* under the word בִּיתוֹסִין. The treatise itself was published in a Latin translation by F. Taylor, at London, 1657. The original passage respecting Zadok's disciples is printed by Geiger in Hebrew, and translated by him, *Urschrift*, etc., p. 105.

[b] Dr. Ginsburg, in his valuable article *Sadducees*, in the 3d edition of Kitto's *Cyclop. of Bibl. Lit.* iii. 781, note, corrects Mr. Twistleton's statements respecting "the earliest mention of Rabbi Nathan, and the time when he lived. He says: "This Rabbi Nathan is *Nathan ha-Babli*, as he is called in the Talmud, because he was a native of Meshan in Babylon (*Baba Bathra*, 73 d), was one of the most distinguished Mishnaic doctors. In consequence of his high birth, as his father was Prince of the Captivity in Babylon, and his marvellous knowledge of the law, both divine and human, . . he was created vicar of the patriarch Simon II. b. Gamaliel II., A. D. 140–163, or president of the tribunal (אַב בֵּית דִּין). He is frequently quoted in the Talmud as a profound scholar of the law (*Horayoth*, 13 b; *Baba Kama*, 23 a; *Baba Mezia*, 117 b), and has materially contributed to the compilation of the *Mishna*, as he himself compiled a *Mishna*, which is quoted by the name of *Mishnath de Rabbi Nathan*, and which Rabbi Jehudah the holy used for the redaction of the present *Mishna*." But after all, Dr. Ginsburg is disposed to regard the passage about the Sadducees in the *Avôth of Rabbi Nathan* as by a later hand, "like many other pieces in the same work," and thinks that its author most probably flourished towards the end of the 7th century (p. 783). He himself adopts the view of Geiger respecting the origin of the Sadducees. A.

assurance of the Sadducees as a party in Jewish history, and that he quotes no authority of any kind for his account of their origin, it seems reasonable to reject this Rabbi Nathan's narration as unworthy of credit. Another ancient suggestion concerning the origin of the name "Sadducees" is in Epiphanius (*Adversus Hæreses*, xiv.), who states that the Sadducees called themselves by that name from "righteousness," the interpretation of the Hebrew word Zedek; "and that there was likewise anciently a Zadok among the priests, but that they did not continue in the doctrines of their chief." But this statement is unsatisfactory in two respects: 1st. It does not explain why, if the suggested etymology was correct, the name of the Sadducees was not Tsaddikim or Zaddikites, which would have been the regular Hebrew adjective for the "Just," or "Righteous"; and 2dly. While it evidently implies that they once held the doctrines of an ancient priest, Zadok, who is even called their chief or master (ἀκιστάτης), it does not directly assert that there was any connection between his name and theirs; nor yet does it say that the coincidence between the two names was accidental. Moreover, it does not give information as to when Zadok lived, nor what were those doctrines of his which the Sadducees once held, but subsequently departed from. The unsatisfactoriness of Epiphanius's statement is increased by its being coupled with an assertion that the Sadducees were a branch broken off from Dositheus: or in other words Schismatics from Dositheus (ἀπόσπασμα ὄντες ἀπὸ Δοσιθέου); for Dositheus was a heretic who lived about the time of Christ (Origen, *contra Celsum*, lib. i. c. 17; Clemens, *Recognit.* ii. 8; Photius, *Biblioth.* c. xxx.), and thus, if Epiphanius was correct, the opinions characteristic of the Sadducees were productions of the Christian era; a supposition contrary to the express declaration of the Pharisee Josephus, and to a notorious fact of history, the connection of Hyrcanus with the Sadducees more than 100 years before Christ. (See Josephus, *Ant.* xiii. 9, § 6, and xviii. 1, § 2, where observe the phrase ἐκ τοῦ πάνυ ἀρχαίου . . .) Hence Epiphanius's explanation of the origin of the word Sadducees must be rejected with that of Rabbi Nathan of the *Aṭôth*. In these circumstances, if recourse is had to conjecture, the first point to be considered is whether the word is likely to have arisen from the meaning of "righteousness," or from the name of an individual. This must be decided in favor of the latter alternative, inasmuch as the word Zadok never occurs in the Bible, except as a proper name; and then we are led to inquire as to who the Zadok of the Sadducees is likely to have been. Now, according to the existing records of Jewish history, there was one Zadok of transcendent importance, and only one; namely, the priest who acted such a prominent part at the time of David, and who declared in favor of Solomon, when Abiathar took the part of Adonijah as successor to the throne (1 K. i. 32–45). This Zadok was tenth in descent, according to the genealogies, from the high-priest Aaron; and whatever may be the correct explanation of the statement in the 1st Book of Kings, ii. 35, that Solomon put him in the room of Abiathar, although on previous occasions he had, when named with him, been always mentioned first (2 Sam. xv. 35, xix. 11; cf. viii. 17), his line of priests appears to have had decided preëminence in subsequent history. Thus, when in 2 Chr xxxi. 10, Hezekiah is represented as putting a question to the priests and Levites generally, the answer is attributed to Azariah, "the chief priest of the house of Zadok:" and in Ezekiel's prophetic vision of the future Temple, "the sons of Zadok" and "the priests the Levites of the seed of Zadok" are spoken of with peculiar honor, as those who kept the charge of the sanctuary of Jehovah, when the children of Israel went astray (Ezek. xl. 46, xliii. 19, xliv. 15, xlviii. 11). Now, as the transition from the expression "sons of Zadok" and "priests of the seed of Zadok" to Zadokites is easy and obvious, and as in the Acts of the Apostles v. 17, it is said, "*Then the high-priest rose, and all they that were with him, which is the sect of the Sadducees*, and were filled with indignation," it has been conjectured by Geiger that the Sadducees or Zadokites were originally identical with the sons of Zadok, and constituted what may be termed a kind of sacerdotal aristocracy (*Urschrift*, etc., p. 104). To these were afterwards attached all who for any reason reckoned themselves as belonging to the aristocracy; such, for example, as the families of the high-priest; who had obtained consideration under the dynasty of Herod. These were for the most part judges,[a] and individuals of the official and governing class. Now, although this view of the Sadducees is only inferential, and mainly conjectural, it certainly explains the name better than any other, and elucidates at once in the Acts of the Apostles the otherwise obscure statement that the high-priest, and those who were with him, were the sect of the Sadducees. Accepting, therefore, this view till a more probable conjecture is suggested, some of the principal peculiarities or supposed peculiarities of the Sadducees will now be noticed in detail, although in such notice some points must be touched upon, which have been already partly discussed in speaking of the Pharisees.

I. The leading tenet of the Sadducees was the negation of the leading tenet of their opponents. As the Pharisees asserted, so the Sadducees denied that the Israelites were in possession of an Oral Law transmitted to them by Moses. The manner in which the Pharisees may have gained acceptance for their own view is noticed elsewhere in this work [vol. iii. p. 2474]; but, for an equitable estimate of the Sadducees, it is proper to bear in mind emphatically how destitute of historical evidence the doctrine was which they denied. That doctrine is at the present day rejected, probably by almost all, if not by all, Christians; and it is indeed so foreign to their ideas, that the greater number of Christians have never even heard of it, though it is older than Christianity, and has been the support and consolation of the Jews under a series of the most cruel and wicked persecutions to which any nation has ever been exposed during an equal number of centuries. It is likewise now maintained, all over the world, by those who are called the orthodox Jews. It is therefore desirable, to know the kind of arguments by which at the present day, in an historical and critical age, the

[a] According to the Mishna, *Sanhed.* 2, no one was "wise," in the Levitical sense, to act as a judge in capital trials, except priests, Levites, and Israelites whose daughters might marry priests. This again tallies with the explanation offered in the text, of the Sadducees, as a sacerdotal aristocracy, being "with the high-priest."

doctrine is defended. For this an opportunity has been given during the last three years by a learned French Jew, Grand-Rabbi of the circumscription of Colmar (Klein, *Le Judaisme, ou la Vérité sur le Talmud*, Mulhouse, 1859), who still asserts as a fact, the existence of a Mosaic Oral Law. To do full justice to his views, the original work should be perused. But it is doing no injustice to his learning and ability, to point out that not one of his arguments has a positive historical value. Thus he relies mainly on the inconceivability (as will be again noticed in this article) that a Divine revelation should not have explicitly proclaimed the doctrine of a future state of rewards and punishments, or that it should have promulgated laws, left in such an incomplete form, and requiring so much explanation, and so many additions, as the laws in the Pentateuch. Now, arguments of this kind may be sound or unsound; based on reason, or illogical; and for many they may have a philosophical or theological value; but they have no pretense to be regarded as historical, inasmuch as the assumed premises, which involve a knowledge of the attributes of the Supreme Being, and the manner in which He would be likely to deal with man, are far beyond the limits of historical verification. The nearest approach to an historical argument is the following (p. 10): "In the first place, nothing proves better the fact of the existence of the tradition than the belief itself in the tradition. An entire nation does not suddenly forget its religious code, its principles, its laws, the daily ceremonies of its worship, to such a point, that it could easily be persuaded that a new doctrine presented by some impostors is the true and only explanation of its law, and has always determined and ruled its application. Holy Writ often represents the Israelites as a stiff-necked people, impatient of the religious yoke, and would it not be attributing to them rather an excess of docility, a too great condescension, a blind obedience, to suppose that they suddenly consented to troublesome and rigorous innovations which some persons might have wished to impose on them some fine morning? Such a supposition destroys itself, and we are obliged to acknowledge that the tradition is not a new invention, but that its birth goes back to the origin of the religion; and that transmitted from father to son as the word of God, it lived in the heart of the people, identified itself with the blood, and was always considered as an inviolable authority." But if this passage is carefully examined, it will be seen that it does not supply a single fact worthy of being regarded as a proof of a Mosaic Oral Law. Independent testimony of persons contemporary with Moses that he had transmitted such a law to the Israelites would be historical evidence; the testimony of persons in the next generation as to the existence of such an Oral Law which their fathers told them came from Moses, would have been secondary historical evidence; but the belief of the Israelites on the point 1,200 years after Moses, cannot, in the absence of any intermediate testimony, be deemed evidence of an historical fact. Moreover, it is a mistake to assume, that they who deny a Mosaic Oral Law, imagine that this Oral Law was at some one time, as one great system, introduced suddenly amongst the Israelites. The real mode of conceiving what occurred is far different. After the return from the Captivity, there existed probably amongst the Jews a large body of customs and decisions not contained in the Pentateuch; and these had practical authority over the people long before they were attributed to Moses. The only phenomenon of importance requiring explanation is not the existence of the customs sanctioned by the Oral Law, but the belief accepted by a certain portion of the Jews that Moses had divinely revealed those customs as laws to the Israelites. To explain this historically from written records is impossible, from the silence on the subject of the very scanty historical Jewish writings purporting to be written between the return from the Captivity in 538 before Christ and that uncertain period when the canon was closed, which at the earliest could not have been long before the death of Antiochus Epiphanes, B. C. 164. For all this space of time, a period of about 374 years, a period as long as from the accession of Henry VII. to the present year (1862) we have no Hebrew account, nor in fact any contemporary account, of the history of the Jews in Palestine, except what may be contained in the short works entitled Ezra and Nehemiah. And the last named of these works does not carry the history much later than one hundred years after the return from the Captivity: so that there is a long and extremely important period of more than two centuries and a half before the heroic rising of the Maccabees, during which there is a total absence of contemporary Jewish history. In this dearth of historical materials, it is idle to attempt a positive narration of the circumstances under which the Oral Law became assigned to Moses as its author. It is amply sufficient if a satisfactory suggestion is made as to how it *might* have been attributed to Moses, and in this there is not much difficulty for any one who bears in mind how notoriously in ancient times laws of a much later date were attributed to Minos, Lycurgus, Solon, and Numa. The unreasonableness of supposing that the belief in the oral traditions being from Moses must have coincided in point of time with the acceptance of the oral tradition, may be illustrated by what occurred in England during the present century. During a period when the fitness of maintaining the clergy by tithes was contested, the theory was put forth that the origin of tithes was to be assigned to "an unrecorded revelation made to Adam." [a] Now, let us suppose that England was a country as small as Judæa; that the English were as few in number as the Jews of Judæa must have been in the time of Nehemiah, that a temple in London was the centre of the English religion, and that the population of London hardly ever reached 50,000. [JERUSALEM, ii. 1320.] Let us further suppose that printing was not invented, that manuscripts were dear, and that few of the population could read. Under such circumstances it is not impossible that

[a] See p. 32 of *Essay on the Revenues of the Church of England*, by the Rev. Morgan Cove, Prebendary of Hereford, and Rector of Eaton Bishop. 578 pp. London, Rivington, 1816. Third edition. "Thus do we return again to the original difficulty [the origin of tithes], to the solution of which the strength of human reason is unequal. Nor does there remain any other method of solving it, but by assigning the origin of the custom, and the peculiar observance of it, to some unrecorded revelation made to Adam, and by him and his descendants delivered down to posterity."

Digitized by Google

the assertion of an unrecorded revelation made to Adam, might have been gradually accepted by a large religious party in England as a divine authority for tithes. If this belief had continued in the same party during a period of more than 2,000 years, if that party had become dominant in the English Church, if for the first 250 years every contemporary record of English history became lost to mankind, and if all previous English writings merely condemned the belief by their silence, so that the precise date of the origin of the belief could not be ascertained, we should have a parallel to the way in which a belief in a Mosaic Oral Law may possibly have arisen. Yet it would have been very illogical for an English reasoner in the year 4000 A. D. to have argued from the burden and annoyance of paying tithes to the correctness of the theory that the institution of tithes was owing to this unrecorded revelation to Adam. It is not meant by this illustration to suggest that reasons as specious could be advanced for such a divine origin of tithes as even for a Mosaic Oral Law. The main object of the illustration is to show that the existence of a practice, and the belief as to the origin of a practice, are two wholly distinct points; and that there is no necessary connection in time between the introduction of a practice, and the introduction of the prevalent belief in its origin.

Under this head we may add that it must not be assumed that the Sadducees, because they rejected a Mosaic Oral Law, rejected likewise all traditions and all decisions in explanation of passages in the Pentateuch. Although they protested against the assertion that such points had been divinely settled by Moses, they probably, in numerous instances, followed practically the same traditions as the Pharisees. This will explain why in the Mishna specific points of difference between the Pharisees and Sadducees are mentioned, which are so unimportant; such, *e. g.* as whether touching the Holy Scriptures made the hands technically "unclean," in the Levitical sense, and whether the stream which flows when water is poured from a clean vessel into an unclean one is itself technically "clean" or "unclean" (*Yadaim*, iv. 6, 7). If the Pharisees and Sadducees had differed on all matters not directly contained in the Pentateuch, it would scarcely have been necessary to particularize points of difference such as these, which to Christians imbued with the genuine spirit of Christ's teaching (Matt. xv. 11; Luke xi. 37–40), must appear so trifling, as almost to resemble the products of a diseased imagination.[a]

II. The second distinguishing doctrine of the Sadducees, the denial of man's resurrection after death, followed in their conceptions as a logical conclusion from their denial that Moses had revealed to the Israelites the Oral Law. For on a point so momentous as a second life beyond the grave, no religious party among the Jews would have deemed themselves bound to accept any doctrine as an article of faith, unless it had been proclaimed by Moses, their great legislator; and it is certain that in the written Law of the Pentateuch there is a total absence of any assertion by Moses of the resurrection of the dead. The absence of this doctrine, so far as it involves a future state of rewards and punishments, is emphatically manifest from the numerous occasions for its introduction in the Pentateuch, among the promises and threats, the blessings and curses, with which a portion of that great work abounds. In the Law Moses is represented as promising to those who are obedient to the commands of Jehovah the most alluring temporal rewards, such as success in business, the acquisition of wealth, fruitful seasons, victory over their enemies, long life, and freedom from sickness (Deut. vii. 12–15, xxviii. 1–12; Ex. xx. 12, xxiii. 25, 26); and he likewise menaces the disobedient with the most dreadful evils which can afflict humanity, with poverty, fell diseases, disastrous and disgraceful defeats, subjugation, dispersion, oppression, and overpowering anguish of heart (Deut. xxviii. 15–68): but in not a single instance does he call to his aid the consolations and terrors of rewards and punishments hereafter. Moreover, even in a more restricted indefinite sense, such as might be involved in the transmigration of souls, or in the immortality of the soul as believed in by Plato, and apparently by Cicero,[b] there is a similar absence of any assertion by Moses of a resurrection of the dead. This fact is presented to Christians in a striking manner by the well-known words of the Pentateuch which are quoted by Christ in argument with the Sadducees on this subject (Ex. iii. 6, 16; Mark xii. 26, 27; Matt. xxii. 31, 32; Luke xx. 37). It cannot be doubted that in such a case Christ would quote to his powerful adversaries the most cogent text in the Law; and yet the text actually quoted does not do more than suggest an *inference* on this great doctrine. Indeed it must be deemed probable that the Sadducees, as they did not acknowledge the divine authority of Christ, denied even the logical validity of the inference, and argued that the expression that Jehovah was the God of Abraham the God of Isaac, and the God of Jacob, did not necessarily mean more than that Jehovah had been the God of those patriarchs while they lived on earth, without conveying a suggestion, one way or another, as to whether they were or were not still living elsewhere. It is true that in other parts of the Old Testament there are individual passages which express a belief in a resurrection, such as in Is. xxvi. 19; Dan. xii. 2; Job xix. 26, and in some of the Psalms; and it may at first sight be a subject of surprise that the Sadducees were not convinced by the authority of those passages. But although the Sadducees regarded the books which contained these passages as sacred, it is more than doubtful whether any of the Jews regarded them as sacred in precisely the same sense as the written Law. There is a danger here of confounding the ideas which are now common amongst Christians, who regard the whole ceremonial law as abrogated, with the ideas of Jews after the time of Ezra,

[a] Many other points of difference, ritual and juridical, are mentioned in the Gemaras. See Graetz 3d. 514–518). But it seems unsafe to admit the Gemaras as an authority for statements respecting the Pharisees and Sadducees. See, as to the date of those works, the article PHARISEES.

[b] See *De Senectute*, xxiii. This treatise was composed within two years before Cicero's death, and although a dialogue, may perhaps be accepted as expressing his philosophical opinions respecting the immortality of the soul. He had held, however, very different language in his oration *pro Cluentio*, cap. lxi., in a passage which is a striking proof of the popular belief at Rome in his time. See also Sallust *Catilin.* ii.; Juvenal, ii. 149; and Pliny the Elder vii. 56.

Digitized by Google

while the Temple was still standing, or even with the ideas of orthodox modern Jews. To the Jews Moses was and is a colossal Form, preëminent in authority above all subsequent prophets. Not only did his series of signs and wonders in Egypt and at the Red Sea transcend in magnitude and brilliancy those of any other holy men in the Old Testament, not only was he the centre in Mount Sinai of the whole legislation of the Israelites, but even the mode by which divine communications were made to him from Jehovah was peculiar to him alone. While others were addressed in visions or in dreams, the Supreme Being communicated with him alone mouth to mouth and face to face (Num. xii. 6, 7, 8; Ex. xxxiii. 11; Deut. v. 4, xxxiv. 10–12). Hence scarcely any Jew would have deemed himself bound to believe in man's resurrection, unless the doctrine had been proclaimed by Moses; and as the Sadducees disbelieved the transmission of any oral law by Moses, the striking absence of that doctrine from the written Law freed them from the necessity of accepting the doctrine as divine. It is not meant by this to deny that Jewish believers in the resurrection had their faith strengthened and confirmed by allusions to a resurrection in scattered passages of the other sacred writings; but then these passages were read and interpreted by means of the central light which streamed from the Oral Law. The Sadducees, however, not making use of that light, would have deemed all such passages inconclusive, as being, indeed, the utterances of holy men, yet opposed to other texts which had equal claims to be pronounced sacred, but which could scarcely be supposed to have been written by men who believed in a resurrection (Is. xxxviii. 18, 19; Ps. vi. 5, xxx. 9, lxxxviii. 10, 11, 12; Eccl. ix. 4–10). The real truth seems to be that, as in Christianity the doctrine of the resurrection of man rests on belief in the resurrection of Jesus, with subsidiary arguments drawn from texts in the Old Testament, and from man's instincts, aspirations, and moral nature; so, admitting fully the same subsidiary arguments, the doctrine of the resurrection among Pharisees, and the successive generations of orthodox Jews, and the orthodox Jews now living, has rested, and rests, on a belief in the supposed Oral Law of Moses. On this point the statement of the learned Grand-Rabbi to whom allusion has been already made deserves particular attention. "What causes most surprise in perusing the Pentateuch is the silence which it seems to keep respecting the most fundamental and the most consoling truths. The doctrines of the immortality of the soul, and of retribution beyond the tomb, are able powerfully to fortify man against the violence of the passions and the seductive attractions of vice, and to strengthen his steps in the rugged path of virtue: of themselves they smooth all the difficulties which are raised, all the objections which are made, against the government of a Divine Providence, and account for the good fortune of the wicked and the bad fortune of the just. But man searches in vain for these truths, which he desires so ardently; he in vain devours with avidity each page of Holy Writ; he does not find either them, or the simple doctrine of the resurrection of the dead, explicitly announced. Nevertheless truths so consoling and of such an elevated order cannot have been passed over in silence, and certainly God has not relied on the mere sagacity of the human mind in order to announce them only implicitly. *He has transmitted them verbally, with the means of finding them in the text. A supplementary tradition was necessary, indispensable: this tradition exists Moses received the Law from Sinai, transmitted it to Joshua, Joshua to the elders, the elders transmitted it to the prophets, and the prophets to the men of the great synagogue*" (Klein, *Le Judaisme ou la Vérité sur le Talmud*, p. 15).

In connection with the disbelief of a resurrection by the Sadducees, it is proper to notice the statement (Acts xxiii. 8) that they likewise denied there was "angel or spirit." A perplexity arises as to the precise sense in which this denial is to be understood. Angels are so distinctly mentioned in the Pentateuch and other books of the Old Testament, that it is hard to understand how those who acknowledged the Old Testament to have divine authority could deny the existence of angels (see Gen. xvi. 7, xix. 1, xxii. 11, xxviii. 12; Ex. xxiii. 20; Num. xxii. 23; Judg. xiii. 18; 2 Sam. xxiv. 16, and other passages). The difficulty is increased by the fact that no such denial of angels is recorded of the Sadducees either by Josephus, or in the Mishna, or, it is said, in any part of the Talmudical writings. The two principal explanations which have been suggested are, either that the Sadducees regarded the angels of the Old Testament as transitory unsubstantial representations of Jehovah, or that they disbelieved, not the angels of the Old Testament, but merely the angelical system which had become developed in the popular belief of the Jews after their return from the Babylonian Captivity (Herzfeld, *Geschichte des Volkes Jisrael*, iii. 364). Either of these explanations may possibly be correct; and the first, although there are numerous texts to which it did not apply, would have received some countenance from passages wherein the same divine appearance which at one time is called the "angel of Jehovah" is afterwards called simply "Jehovah" (see the instances pointed out by Gesenius, *s. v.* מַלְאָךְ, Gen. xvi. 7, 13, xxii. 11, 12, xxxi. 11, 16; Ex. iii. 2, 4; Judg. vi. 14, 22, xiii. 18, 22). Perhaps, however, another suggestion is admissible. It appears from Acts xxiii. 9, that some of the scribes on the side of the Pharisees suggested the possibility of a spirit or an angel having spoken to St. Paul, on the very occasion when it is asserted that the Sadducees denied the existence of angel or spirit. Now the Sadducees may have disbelieved in the occurrence of any such phenomena in their own time, although they accepted all the statements respecting angels in the Old Testament; and thus the key to the assertion in the 8th verse that the Sadducees denied "angel or spirit" would be found exclusively in the 9th verse. This view of the Sadducees may be illustrated by the present state of opinion among Christians, the great majority of whom do not in any way deny the existence of angels as recorded in the Bible, and yet they certainly disbelieve that angels speak, at the present day, even to the most virtuous and pious of mankind.

III. The opinions of the Sadducees respecting the freedom of the will, and the way in which those opinions are treated by Josephus (*Ant.* xiii. 5, § 9), have been noticed elsewhere [PHARISEES, iii. 2478], and an explanation has been there suggested of the prominence given to a difference in this respect between the Sadducees and the Pharisees. It may be here added that possibly the great stress laid by the Sadducees on the freedom of the

Digitized by Google

will may have had some connection with their forming such a large portion of that class from which criminal judges were selected. Jewish philosophers in their study, although they knew that punishments as an instrument of good were unavoidable, might indulge in reflections that man seemed to be the creature of .ircumstances, and might regard with compassion the punishments inflicted on individuals whom a wiser moral training and a more happily balanced nature might have made useful members of society. Those Jews who were almost exclusively religious teachers would naturally insist on the inability of man to do anything good if God's Holy Spirit were taken away from him (Ps. li. 11, 12), and would enlarge on the perils which surrounded man from the temptations of Satan and evil angels or spirits (1 Chr. xxi. 1; Tob. iii. 17). But it is likely that the tendencies of the judicial class would be more practical and direct, and more strictly in accordance with the ideas of the Levitical prophet Ezekiel (xxxiii. 11–19) in a well-known passage in which he gives the responsibility of bad actions, and seems to attribute the power of performing good actions, exclusively to the individual agent. Hence the sentiment of the lines —

> "Our acts our Angels are, or good or ill,
> Our fatal shadows that walk by us still,"

would express that portion of truth on which the Sadducees, in inflicting punishments, would dwell with most emphasis: and as, in some sense, they disbelieved in angels, these lines have a peculiar claim to be regarded as a correct exponent of Sadducean thought.[a] And yet perhaps, if writings were extant in which the Sadducees explained their own ideas, we might find that they reconciled these principles, as we may be certain that Ezekiel did, with other passages apparently of a different import in the Old Testament, and that the line of demarcation between them and the Pharisees was not, in theory, so very sharply marked as the account of Josephus would lead us to suppose.

IV. Some of the early Christian writers, such as [Hippol. *Philosophum.* ix. 29, and the spurious addition to Tertull. *De Præscr. Hæret.* c. 1 (or 45),] Epiphanius (*Hæres.* xiv.), Origen and Jerome (in their respective Commentaries on Matt. xxii. 31, 32, 33) attribute to the Sadducees the rejection of all the Sacred Scriptures except the Pentateuch. Such rejection, if true, would undoubtedly constitute a most important additional difference between the Sadducees and Pharisees. The statement of these Christian writers is, however, now generally admitted to have been founded on a misconception of the truth, and probably to have arisen from a confusion of the Sadducees with the Samaritans. See Lightfoot's *Horæ Hebraicæ* on Matt. iii. 7; Hersfeld's *Geschichte des Volkes Jisrael*, ii. 363. Josephus is wholly silent as to an antagonism on this point between the Sadducees and Pharisees; and it is absolutely inconceivable that on the three several occasions when he introduces an account of the opinions of the two sects, he should have been silent respecting such an antagonism if it had really existed (*Ant.* xiii. 5, § 9, xviii. 1, § 3; *B. J.* ii. 8, 14). Again, the existence of such a monstrous antagonism would be incompatible with the manner in which Josephus speaks of John Hyrcanus, who was high-priest and king of Judæa thirty-one years, and who nevertheless, having been previously a Pharisee, became a Sadducee towards the close of his life. This Hyrcanus, who died about 106 B. C., had been so inveterately hostile to the Samaritans, that when about three years before his death he took their city Samaria, he razed it to the ground; and he is represented to have dug caverns in various parts of the soil in order to sink the surface to a level or slope, and then to have diverted streams of water over it, in order to efface marks of such a city having ever existed. If the Sadducees had come so near to the Samaritans as to reject the divine authority of all the books of the Old Testament except the Pentateuch, it is very unlikely that Josephus, after mentioning the death of Hyrcanus, should have spoken of him as he does in the following manner: "He was esteemed by God worthy of three of the greatest privileges, the government of the nation, the dignity of the high-priesthood, and prophecy. For God was with him and enabled him to know future events." Indeed, it may be inferred from this passage that Josephus did not even deem it a matter of vital importance whether a high-priest was a Sadducee or a Pharisee — a latitude of toleration which we may be confident he would not have indulged in, if the divine authority of all the books of the Old Testament except the Pentateuch, had been at stake. What probably had more influence than anything else in occasioning this misconception respecting the Sadducees, was the circumstance that in arguing with them on the doctrine of a future life, Christ quoted from the Pentateuch only, although there are stronger texts in favor of the doctrine in some other books of the Old Testament. But probable reasons have been already assigned why Christ, in arguing on this subject with the Sadducees, referred only to the supposed opinions of Moses rather than to isolated passages extracted from the productions of any other sacred writer.

V. In conclusion, it may be proper to notice a fact, which, while it accounts for misconceptions of early Christian writers respecting the Sadducees, is on other grounds well worthy to arrest the attention. This fact is the rapid disappearance of the Sadducees from history after the first century, and the subsequent predominance among the Jews of the opinions of the Pharisees. Two circumstances, indirectly, but powerfully, contributed to produce this result: 1st. The state of the Jews after the capture of Jerusalem by Titus: and 2dly. The growth of the Christian religion. As to the first point it is difficult to over-estimate the consternation and dismay which the destruction of Jerusalem occasioned in the minds of sincerely religious Jews Their holy city was in ruins; their holy and beautiful Temple, the centre of their worship and their love, had been ruthlessly burnt to the ground, and not one stone of it was left upon another: their magnificent hopes either of an ideal king who was to restore the empire of David, or of a Son of Man who was to appear to them in the clouds of heaven,

[a] The preceding lines would be equally applicable, if, as is not improbable, the Sadducees likewise rejected the Chaldæan belief in astrology, so common among the Jews and Christians of the Middle Ages: —

> "Man is his own Star; and the soul that can
> Render an honest and a perfect man,
> Commands a... ight, all influence, all fate;
> Nothing to him falls early, or too late."
> FLETCHER'S Lines "*Upon an Honest Man · Fortune.*

Digitized by Google

seemed to them for a while like empty dreams; and the whole visible world was, to their imagination, black with desolation and despair. In this their hour of darkness and anguish, they naturally turned to the consolations and hopes of a future state, and the doctrine of the Sadducees that there was nothing beyond the present life would have appeared to them cold, heartless, and hateful. Again, while they were sunk in the lowest depths of depression, a new religion which they despised as a heresy and a superstition, of which one of their own nation was the object, and another the unrivaled missionary to the heathen, was gradually making its way among the subjects of their detested conquerors, the Romans. One of the causes of its success was undoubtedly the vivid belief in the resurrection of Jesus, and a consequent resurrection of all mankind, which was accepted by its heathen converts with a passionate earnestness, of which those who at the present day are familiar from infancy with the doctrine of the resurrection of the dead can form only a faint idea. To attempt to check the progress of this new religion among the Jews by an appeal to the temporary rewards and punishments of the Pentateuch, would have been as idle as an endeavor to check an explosive power by ordinary mechanical restraints. Consciously, therefore, or unconsciously, many circumstances combined to induce the Jews, who were not Pharisees, but who resisted the new heresy, to rally round the standard of the Oral Law, and to assert that their holy legislator, Moses, had transmitted to his faithful people by word of mouth, although not in writing, the revelation of a future state of rewards and punishments. A great belief was thus built up on a great fiction; early teaching and custom supplied the place of evidence; faith in an imaginary fact produced results as striking as could have flowed from the fact itself; and the doctrine of a Mosaic Oral Law, enshrining convictions and hopes deeply rooted in the human heart, has triumphed for nearly 1800 years in the ideas of the Jewish people. This doctrine, the pledge of eternal life to them, as the resurrection of Jesus to Christians, is still maintained by the majority of our Jewish contemporaries; and it will probably continue to be the creed of millions long after the present generation of mankind has passed away from the earth.[a]

E. T.

* *Literature.*—It should be noted, perhaps, that the Jewish sects are treated of in the lately discovered *Philosophumena* or *Refutatio omnium Hæresium*, now generally ascribed to Hippolytus, lib. ix. cc. 18–30. The Sadducees are not named by Philo, but Grossmann, *De Philos. Sadducæorum*, 4 partt. Lips. 1838–38, 4to, has collected from this author a large number of passages which he supposes to relate to them. His conjectures, however, have not been generally adopted by scholars (see Winer, *Bibl. Realwörterb.* and Reuss in Herzog' *Real-Encykl.*, art. *Sadducäer*). The more recent writers respecting the Sadducees are mentioned under the art. PHARISEES, vol. iii. p. 2479 Among these, Keim, Derenbourg and Hausrath may be specially referred to for a view of the latest researches and opinions. See also Fürst's *Geschichte des Karäerthums*, 2 vols. Leipz. 1862–65, and J. R. Hanne, *Die Pharisäer u. Sadducäer als polit. Parteien*, in Hilgenfeld's *Zeitschr. f. wiss. Theol.*, 1867, x. 131–179, 239–283. A.

SA'DOC (*Sadoch*). 1. ZADOK the ancestor of Ezra (2 Esdr. i. 1; comp. Ezr. vii. 2).

2. (Σαδώκ: *Sadoc.*) A descendant of Zerubbabel in the genealogy of Jesus Christ (Matt. i. 14).

SAFFRON (כַּרְכֹּם, *carcŏm*: κρόκος: *crocus*) is mentioned only in Cant. iv. 14 with other odorous substances, such as spikenard, calamus, cinnamon, etc.; there is not the slightest doubt that "saffron" is the correct rendering of the Hebrew word; the Arabic *Kurkum* is similar to the Hebrew, and denotes the *Crocus sativus*, or "saffron crocus." Saffron has from the earliest times been in high esteem as a perfume: "it is used," says Rosenmüller (*Bib. Bot.* p. 138), "for the same purposes as the modern pot-pourri." Saffron was also used in seasoning dishes (Apicius, p. 270); it entered into the composition of many spirituous extracts which retained the scent (see Beckmann's *Hist. of Invent.* i. 175, where the whole subject is very fully discussed). The part of the plant which was used was the stigma, which was pulled out of the flower and then dried. Dr. Royle says, that "sometimes the stigmas are prepared by being submitted to pressure, and thus made into cake saffron, a form in which it is still imported from Persia into India." Hasselquist (*Trav.* p. 36) states that in certain places, as around Magnesia, large quantities of saffron are gathered and exported to different places in Asia and Europe. Kitto (*Phys. Hist. of Palest.* p. 321) says that the safflower (*Carthamus tinctorius*), a very different plant from the crocus, is cultivated in Syria for the sake of the flowers which are used in dyeing, but the *Karkóm* no doubt denotes the *Crocus sativus*. The word saffron is derived from the Arabic *Zafran*, "yellow." This plant gives its name to Saffron-Walden, in Essex, where it is largely cultivated. It belongs to the Natural Order *Iridaceæ*. W. H.

* SAINTS (derived, through the French, from the Latin *sanctus*) occurs in the O. T. sixteen times as the translation of קָדוֹשׁ or its cognates, and nineteen times as the translation of חָסִיד, which Hebrew words are with a few exceptions represented in the LXX. by ἅγιος and ὅσιος respectively.[b] In some instances when applied to men

[a] In Germany and elsewhere, some of the most learned Jews disbelieve in a Mosaic Oral Law; and Judaism seems ripe to enter on a new phase. Based on the Old Testament, but avoiding the mistakes of the Karaites, it might still have a great future; but whether it could last another 1800 years with the belief in a future life, as a revealed doctrine, depending not on a supposed revelation by Moses, but solely on scattered texts, in the Hebrew Scriptures, is an interesting subject for speculation.

[b] The primary meaning of קָדוֹשׁ, according to Gesenius and Dietrich, is "pure;" according to Fürst "pure," "fresh;" according to Meier (*Hebr. Wurzelw.*, p. 396) "separated." Hupfeld ascribes to חָסִיד (*Comm.* on Ps. iv. 4) a passive force, "favored." Ἅγιος (from ἄζω, ἄζομαι, *venerate*, akin to ἁγνίζω, Buttmann's *Lexilogus*, i. 286; F. trans. p. 47, seems by derivation to signify "very pure," then "holy." The derivation of ὅσιος, "hallowed," is less certain (see Benfey, *Griech. Wurzellex.* i. 434 f.; Ὅσιος, common in the classics, in Biblical Greek recedes from use. As a personal epithet it is applied to Christians but once in the N. T., and then in describing the official character of a bishop (Tit. i 8). Ἅγιος

Digitized by Google

describes their inherent personal character (Ps. xxx. 4, xxxi. 23, xxxiv. 9, xxxvii. 28, etc.). But in the majority of cases it seems to be used in a theocratic rather than a moral sense; so that, while having often a secondary reference, more or less marked, to holiness as the prescribed and appropriate character of those who bear it, it is applied indiscriminately (especially in the later books) to the Israelites, as a nation consecrated to God (Ps. l. 5, lxxxii. 9; Dan. vii. 18, 21, 22, 25, 27; cf. viii. 24, xii. 7; Exod. xix. 6; Num. xvi. 3; 1 Esdr. viii. 70).

In the N. T., where it is found 61 times, it uniformly corresponds to the Greek ἅγιος, and in its application to Christians it is not used to designate them distinctively as respects either their nationality or their locality, nor does it denote outward separation, nor does it refer — at least primarily — to their moral characteristics, whether they be viewed as pardoned sinners, or as the possessors of an imputed holiness, or of some degree of actual holiness, or as predestined to perfect holiness, or as constituting a community the greater or more important number of whom are holy; but it is an appellation of all Christians as Christians. On becoming Christians they become also "saints" (cf. the use of the singular in Phil. iv. 21). Yet as in the O. T. the inherent sense of the word often gleams through the theocratic, so in the N. T., agreeably to the spiritual nature of the Christian dispensation, the theocratic sense is regarded as "fulfilled" in the spiritual, the consecration is viewed more as internal and personal, the ἅγιοι are also truly ἡγιασμένοι (cf. 1 Cor. i. 2; Eph. i. 1, 4; 1 Pet. ii. 9.) (Note the fluctuation in the meaning of ἁγιάζω in John xvii. 17, 19; and see Heb. ii. 11.) This sense, however, is one which does not so much lie in the word itself, as result from the nature of the "people of God," which "the saints" constitute; accordingly it comes to view with different degrees of distinctness in different passages. The value of the term for moral uses is greatly augmented by this very flexibility and possible comprehensiveness of signification.

The term is also applied in the O. T. several times (Deut. xxxiii. 2; Job v. 1, xv. 15; Ps. lxxxix. 5, 7; Zech. xiv. 5) to the angels as preëminently "holy"; and in one obscure passage, Hos. xi. 12 (xii. 1, LXX. γαὸς ἅγιος), to God himself (*plur. majest.* cf. Josh. xxiv. 19; Prov. ix. 10, xxx. 3.) In the N. T., also, it is thought by many expositors to be used of holy *angels* in 1 Thess. iii. 13 (so Jude, ver. 14); in Rev. xv. 3 the reading "saints" is unsustained by the MSS.

Although the term is used in some passages which refer chiefly, if not exclusively, to the consummation of the Messiah's kingdom in the world to come (Eph. i. 18; Col. i. 12; cf. Acts xx. 32, xxvi. 18), yet it is nowhere used to designate the people of God in heaven, as distinguished from those on earth. Nor is it ever restricted to the *eminently* pious in distinction from the mass of believers.[a]

In the saints Christ will be glorified at his coming (2 Thess. i. 10), and they will be in some sense participants in the judgment (1 Cor. vi. 2, 3; cf. Matt. xix. 28; Luke xxii. 30). Nowhere in the Scriptures are they represented as objects of worship, nor is their agency invoked.

The resurrection of saints, mentioned Matt. xxvii. 52, 53, has raised many questions, very few of which can be answered confidently. That the saints spoken of were brought to life from the dead, and that they went into Jerusalem after Christ's resurrection and were seen by many, the language leaves no doubt. That their tombs were in the vicinity of Calvary and were opened contemporaneously with the earthquake, appears to be implied (cf. ver. 54). That they were not, or at least were not solely, departed disciples of Christ seems probable; for as yet "many" of *them* could hardly have died. Further, the term "saints" applied thus in a Christian document to deceased Jews who at the same time are spoken of as κεκοιμημένων,[b] still more the congruities of the case, make it probable that the word has here a distinctive force and denotes Jewish *worthies* (cf. 1 Pet. iii. 5). The arrangement of the words favors the interpretation that "they came forth from their sepulchres after the Lord's resurrection;" accordingly ἠγέρθησαν has been regarded by some expositors as anticipatory, by others more naturally as signifying merely "raised to *life*," and so distinguishing the vivification from the quitting the tombs. The majority, however, have considered the reanimation and the resurrection as simultaneous: some holding that both took place at Christ's death, and that the risen saints first "came into the holy city after his resurrection;" while others, and by far the greater number, have preferred to make the assumption that both were postponed until after Christ had risen. Possibly we may find in σώματα support for the supposition that they had died recently (and so were recognized by those to whom they appeared). Certainly there is nothing either in the use of this word or of ἐνεφανίσθησαν,[c] nor in the context of historic realities in which the incident lies imbedded, to favor the theory that their appearance was by dream or vision, and confined to the mind of the "many" who saw them. These last we may, in accordance with Acts x. 41, plausibly infer to have been followers of Jesus or in sympathy with him. Whether the risen saints were clothed with immortal bodies and ascended with their Lord (as the commentators have been commonly pleased to assume), or rose to die again;

---

on the other hand, though found as early as Herod., is rare in profane Greek, but very common in the Bible — selected by the sacred writers apparently because it presents holiness under the aspect of awe towards a person. Its correlate (קָדוֹשׁ) first occurs on occasion of the appearance of God to Moses (Ex. iii. 5). See G. v. Zezschwitz, *Profangräcität*, etc., p. 16 f.; Tittmann, *de Syn. in Nov. Test.* i. 22 f.; Cremer, *Bibl.-theol. Wörterb. der N. T. Gräcität*, pp. 27 f., 417 f.; Trench, *Syn. of N. T.*, § lxxxviii. p. 312 ff., and ii. § lii. p. 182 ff. (Amer ed.).

[a] The unrestricted application of the term seems to have continued down to the times of Irenæus and Tertullian (Herzog, *Real-Encyk.* v. 670). The clause in the Apostles' Creed relative to "the communion of saints" is not found in the more ancient forms of that Confession.

[b] This word, while it does not seem to warrant any doctrinal inferences respecting the nature of the intermediate state, does appear to be used in the New Test. specifically of the righteous dead.

[c] Ἐμφανίζω would be appropriately used, indeed, of a spectral appearance (cf. Wisd. of Sol. xvii. 4), but may designate no less appropriately an appearance in the body. See John xiv. 22

Digitized by Google

whether they were the only ones among the departed whose condition was affected immediately by the death of Christ, or were but specimens of an effect experienced by all the righteous, or the ante-Christian, dead[a] — we have no means of knowing.

But however perplexing our ignorance may be respecting details, the substantial facts stated above must be accepted by all who accept the inspired record. To discard that record as an interpolation, as a few critics have done, is a procedure in direct violation of all diplomatic evidence in the case, corroborated as that evidence is by one or two internal characteristics (particularly τὴν ἁγίαν πόλιν, cf. iv. 5). Nor is there any pretext for regarding it as a mythical amplification of the fact that graves were opened by the earthquake. Matthew, to be sure, is the only evangelist who mentions the incident; but Mark and Luke concur with him in stating that the vail of the Temple was rent. Why, then, should we not here as in other cases consider particulars not manifestly false, rather as confirmed by the *concurrence* of the other testimonies in reference to a *part* of the story, than as discredited by their *silence* respecting the *remainder*? And why should the existence of apocryphal appendages[b] bring suspicion upon this any more than upon other portions of the sacred narrative upon which such excrescences were formed? Nor can the hypothesis of Strauss lay claim to plausibility. He conceives that the story was fabricated to answer a twofold Messianic expectation of the times which had not been fulfilled by Jesus during his ministry, namely, that the Messiah would effect a *general* resurrection of the pious dead, and that, too, a resurrection to *immortal* life. Yet the narrative is made to meet the first requirement only by exaggerating improbably the numerical force of πολλά: and concerning a resurrection to *immortal* life it gives, as has been already intimated, no hint. Obviously the incident ought not to be contemplated as an isolated fact, but as one of the accompaniments of the crowning event in the history of a being whose entire earthly career was attended by miracles. Viewed thus, its blended strangeness and appropriateness, its "probability of improbability," affords a presumption of its truth.

For a list of the treatises which the passage has called forth, the reader may see Hase's *Leben Jesu*, 1865, § 119 (5th ed.). An idea of the speculations in which writers have indulged here may be gathered from Calmet's dissertation, translated in the *Journal of Sacred Lit.* for Jan. 1848, pp. 112–125.

J. H. T.

SA'LA (Σαλά: *Sale*). SALAH, or SHELAH, the father of Eber (Luke iii. 35).

SA'LAH (שֶׁלַח [a *missile, weapon*; also *sprout*]: Σαλά: *Sale*). The son of Arphaxad and father of Eber (Gen. x. 24, xi. 12 14; Luke iii. 35). The name is significant of *extension*, the cognate verb being applied to the spreading out of the roots and branches of trees (Jer. xvii. 8; Ez. xvii. 6). It thus seems to imply the historical fact of the gradual extension of a branch of the Semitic race from its original seat in Northern Assyria towards the river Euphrates. A place with a similar name in Northern Mesopotamia is noticed by Syrian writers (Knobel, *in Gen.* xi.); but we can hardly assume its identity with the Salah of the Bible. Ewald (*Gesch.* i. 354) and Von Bohlen (*Introd. to Gen.* ii. 205) regard the name as purely fictitious, the former explaining it as a *son* or *offspring*, the latter as the *father of a race*. That the name is significant does not prove it fictitious, and the conclusions drawn by these writers are unwarranted. [The proper form of this name is SHELAH, which see. — A.] W. L. B.

SAL'AMIS (Σαλαμίς [prob. fr. ἅλς, *sea*, as being near the shore]: *Salamis*), a city at the east end of the island of Cyprus, and the first place visited by Paul and Barnabas, on the first missionary journey, after leaving the mainland at Seleucia. Two reasons why they took this course obviously suggest themselves, namely, the fact that Cyprus (and probably Salamis) was the native place of Barnabas, and the geographical proximity of this end of the island to Antioch. But a further reason is indicated by a circumstance in the narrative (Acts xiii. 5). Here alone, among all the Greek cities visited by St. Paul, we read expressly of "synagogues" in the plural. Hence we conclude that there were many Jews in Cyprus. And this is in harmony with what we read elsewhere. To say nothing of possible mercantile relations in very early times [CHITTIM; CYPRUS], Jewish residents in the island are mentioned during the period when the Seleucidæ reigned at Antioch (1 Macc. xv. 23). In the reign of Augustus the Cyprian copper-mines were farmed to Herod the Great (Joseph. *Ant.* xvi. 4, § 5), and this would probably attract many Hebrew families: to which we may add evidence to the same effect from Philo (*Legat. ad Caium*) at the very time of St. Paul's journey. And again at a later period, in the reigns of Trajan and Hadrian, we are informed of dreadful tumults here, caused by a vast multitude of Jews, in the course of which "the whole populous city of Salamis became a desert" (Milman's *Hist. of the Jews*, iii. 111, 112). We may well believe that from the Jews of Salamis came some of those early Cypriote Christians, who are so prominently mentioned in the account of the first spreading of the Gospel beyond Palestine (Acts xi. 19, 20), even before the first missionary expedition. Mnason (xxi. 16) might be one of them. Nor ought Mark to be forgotten here. He was at Salamis with Paul, and his own kinsman Barnabas; and again he was there with the same kinsman after

---

[a] There is no propriety in associating, as many commentators do, this incident in Matt. with the statement relative to "the spirits in prison" (1 Pet. iii. 19). Although Peter's language is generally rendered in the versions and commentaries, "who were sometime disobedient," and so Christ's preaching represented as having taken place after his death, yet such a translation is given in disregard of the fact that ἀπειθήσασι, agreeing as it does with a noun which has the article πoτέ itself wanting it, is properly a predicative, not an attributive participle. Says Donaldson (*Greek Gram.* 3d ed., p. 582): "The participle *without* the article can never be rightly rendered by the relative sentence with a definite antecedent, which is equivalent to the participle *with* an article" (cf. *The New Cratylus*, § 304 f.). Green in his *N. T. Grammar* (p. 54, ed. 1862 renders the passage, "He went and preached to the imprisoned spirits on their being once on a time disobedient, when," etc.

[b] On this point see *Evang. Nicod.* (2d Part) c. 17 f. Thilo, *Cod. Apocr. N. T.*, pp. 790 f., 810 f.; Tisch *Evang. Apocr.* p. 301 f.

as misunderstanding with St. Paul and the separation (xv. 39).

Salamis was not far from the modern *Famagousta*. It was situated near a river called the Pediæus, on low ground, which is in fact a continuation of the plain running up into the interior toward the place where *Nicosia*, the present capital of Cyprus, stands. We must notice in regard to Salamis that its harbor is spoken of by Greek writers as very good; and that one of the ancient tables lays down a road between this city and PAPHOS, the next place which Paul and Barnabas visited on their journey. Salamis again has rather an eminent position in subsequent Christian history. Constantine or his successor rebuilt it, and called it Constantia ("Salamis, quæ nunc Constantia dicitur," Hieronym. *Philem.*), and, while it had this name, Epiphanius was one of its bishops.

Of the travellers who have visited and described Salamis, we must particularly mention Pococke (*Descr. of the East*, ii. 214) and Ross (*Reisen nach Kos, Halikarnassos, Rhodus, und Cypern*, pp. 118–125). These travellers notice, in the neighborhood of Salamis, a village named *St. Sergius*, which is doubtless a reminiscence of Sergius Paulus, and a large Byzantine church bearing the name of *St. Barnabas*, and associated with a legend concerning the discovery of his relics. The legend will be found in Cedrenus (i. 618, ed. Bonn). [BARNABAS; SERGIUS PAULUS.] J. S. H.

**SALAS'ADAI** [4 syl.] ([Alex.] Σαλασσαδαι; [Vat. Rom.] Σαρασαβαι; [Sin. Σαρισαδαι, MS. 19] Σουρισαδέ), a variation for *Surishaddai* (Σουρισαδδαι, Num. i. 6) in Jud. viii. 1. [ZURISHADDAI] B. F. W.

**SALA'THIEL** (שְׁאַלְתִּיאֵל, [שַׁלְתִּיאֵל]: Σαλαθιήλ: *Salathiel*: "I have asked God" [a]), son of Jechonias king of Judah, and father of Zorobabel, according to Matt. i. 12; but son of Neri, and father of Zorobabel, according to Luke iii. 27; while the genealogy in 1 Chr. iii. 17–19, leaves it doubtful whether he is the son of Assir or Jechonias, and makes Zorobabel his nephew. (ZERUBBABEL.] Upon the incontrovertible principle that no genealogy would assign to the true son and heir of a king any inferior and private parentage, whereas, on the contrary, the son of a private person would naturally be placed in the royal pedigree on his becoming the rightful heir to the throne; we may assert, with the utmost confidence, that St. Luke gives us the true state of the case, when he informs us that Salathiel was the son of Neri, and a descendant of Nathan the son of David.[b] And from his insertion in the royal pedigree, both in 1 Chr. and St. Matthew's Gospel, after the childless Jechonias,[c] we infer, with no less confidence, that, on the failure of Solomon's line, he was the next heir to the throne of David. The appearance of Salathiel in the two pedigrees, though one deduces the descent from Solomon and the other from Nathan, is thus perfectly simple, and, indeed, necessary; whereas the notion of Salathiel being called Neri's son, as Yardley and others have thought, because he married Neri's daughter, is palpably absurd on the supposition of his being the son of Jechonias. On this last principle, you *might* have not two but about *a million* different pedigrees between Jechonias and Christ;[d] and yet you have no rational account, why there should actually be more than one. It may therefore be considered as certain, that Salathiel was the son of Neri, and the heir of Jechoniah. The question whether he was the father of Zerubbabel will be considered under that article.[e] Besides the passages already cited, Salathiel occurs in 1 Esdr. v. 5, 48, 56, vi. 2; 2 Esdr. v. 16.

As regards the orthography of the name, it has, as noted above, two forms in Hebrew. The contracted form [Shaltiel] is peculiar to Haggai, who uses it three times out of five; while in the first and last verse of his prophecy he uses the full form, which is also found in Ezr. iii. 2; Neh. xii. 1 The LXX. everywhere have Σαλαθιήλ, while the A. V. has (probably with an eye to correspondence with Matt. and Luke) Salathiel in 1 Chr. iii. 17, but everywhere else in the O. T. SHEALTIEL. [GENEALOGY OF JESUS CHRIST; JEHOIACHIN.] A. C. H.

**SAL'CAH**[f] (סַלְכָה [*wandering, migration*, Fürst]: Σελχαί, Ἀχάδ, Σελάδ [Vat. Ελχα]; Alex. Ασελχαι, Ελχα, Σελχα: *Salecha, Selcha*). A city named in the early records of Israel as the extreme limit of Bashan (Deut. iii. 10; Josh. xiii. 11) and of the tribe of Gad (1 Chr. v. 11). On another occasion the name seems to denote a district rather than a town (Josh. xii. 5). By Eusebius and Jerome it is merely mentioned, apparently without their having had any real knowledge of it.

It is doubtless identical with the town of *Sălkhad*, which stands at the southern extremity of the Jebel Hauran, twenty miles S. of *Kunawat* (the ancient Kenath), which was the southern outpost of the *Leja*, the Argob of the Bible. *Sălkhad* is named by both the Christian and Mohammedan historians of the middle ages (Will. of Tyre, xvi. 8, "Selcath;" Abulfeda, in Schultens' *Index geogr.* "Sarchad"). It was visited by Burckhardt (*Syria*, Nov. 22, 1810), Seetzen and others, and more recently by Porter, who describes it at some

---

[a] Possibly with an allusion to 1 Sam. i. 20, 27, 28. See Broughton's *Our Lord's Family*.

[b] It is worth noting that Josephus speaks of Zorobabel as "the son of Salathiel, of the posterity of David, and of the tribe of Judah" (*A. J.* xi. 3, § 10). Had he believed him to be the son of Jeconiah, of whom he had spoken (x. 11, § 2), he could hardly have failed to say so. Comp. x. 7, § 1.

[c] "Of Jechonias God sware that he should die leaving no child behind him; wherefore it were flat atheism to prate that he naturally became father to Salathiel. Though St. Luke had never left us Salathiel's family up to Nathan, whole brother to Solomon, to shew that Salathiel was of another family, God's oath would make us believe that, *without any further recal*" (Broughton, *ut supra*).

[d] See a curious calculation in Blackstone's *Comment.* ii. 208, that in the 20th degree of ancestry every man has above a million of ancestors, and in the 40th upwards of a million millions.

[e] The theory of two Salathiels, of whom each had a son called Zerubbabel, though adopted by Hottinger and J. G. Vossius, is scarcely worth mentioning, except as a curiosity.

[f] One of the few instances of our translators having represented the Hebrew Caph by *c*. Their common practice is to use *ch* for it — as indeed they have done on one occurrence of this very name. [SALCHAH; and compare CALEB CAPHTOR; CARMEL; COSAM CUSH, etc.]

Digitized by Google

length (*Five Years*, ii. 176–116). Its identification with Salcah appears to be due to Gesenius (Burckhardt's *Reisen*, p. 507).

Immediately below *Sălkhad* commences the plain of the great Euphrates desert, which appears to stretch with hardly an undulation from here to *Busra* on the Persian Gulf. The town is of considerable size, two to three miles in circumference, surrounding a castle on a lofty isolated hill, which rises 300 or 400 feet above the rest of the place (Porter, pp. 178, 179). One of the gateways of the castle bears an inscription containing the date of A. D. 246 (180). A still earlier date, namely, A. D. 196 (Septimius Severus), is found on a grave-stone (185). Other scanty particulars of its later history will be found in Porter. The hill on which the castle stands was probably at one time a crater, and its sides are still covered with volcanic cinder and blocks of lava. G.

* Mr. Porter describes the present condition of this city in his *Giant Cities of Bashan*, p. 76 f. Though long deserted, "five hundred of its houses are still standing, and from 300 to 400 families might settle in it at any moment without laying a stone, or expending an hour's labor on repairs. The circumference of the town and castle together is about three miles. The open doors, the empty houses, the rank grass and weeds, the long, straggling brambles in the doorways and windows, formed a strange, impressive picture which can never leave my memory. Street after street we traversed, the tread of our horses awakening mournful echoes and startling the foxes from their dens in the palaces of Salcah. The *castle* rises to the height of 300 feet, the southern point of the mountain range of Bashan. The view from the top embraces the plain of Bashan stretching out on the west to Hermon; the plain of Moab on the south, to the horizon; and the plain of Arabia on the east beyond the range of vision. . . . From this one spot I saw upwards of 30 towns, all of them, so far as I could see with my telescope, habitable like Salcah, but entirely deserted." See the prophet's remarkable prediction of this desolation, Jer. xlviii. 15–29. H.

**SAL'CHAH** (סַלְכָה: Ἐλχᾶ: *Selcha*). The form in which the name, elsewhere more accurately given SALCAH, appears in Deut. iii. 10 only. The *Targum Pseudojon.* gives it סלוקיא, *i. e.* Seleucia; though which Seleucia they can have supposed was here intended it is difficult to imagine. G.

**SA'LEM** (שָׁלֵם, *i. e.* Shalem [*whole, perfect*]: Σαλήμ: *Salem*). 1. The place of which Melchizedek was king (Gen. xiv. 18; Heb. vii. 1, 2). No satisfactory identification of it is perhaps possible. The indications of the narrative are not sufficient to give any clew to its position. It is not safe even to infer, as some have done,[a] that it lay between Damascus and Sodom; for though it is said that the king of Sodom — who had probably regained his own city after the retreat of the Assyrians — went out to meet (לִקְרָאתוֹ)[b] Abram, yet it is also distinctly stated that this was *after Abram had returned* (אַחֲרֵי שׁוּבוֹ) from the slaughter of the kings. Indeed, it is not certain that there is any connection of time or place between Abram's encounter with the king of Sodom and the appearance of Melchizedek. Nor, supposing this last doubt to be dispelled, is any clew afforded by the mention of the Valley of Shaveh, since the situation even of that is more than uncertain.

Dr. Wolff — no mean authority on oriental questions — in a striking passage in his last work, implies that Salem was — what the author of the Epistle to the Hebrews understood it to be — a title, not the name of a place. "Melchizedek of old . . . had a royal title; he was 'King of Righteousness,' in Hebrew *Melchi-zedek*. And he was also 'King of Peace,' *Melek-Salem*. And when Abraham came to his tent he came forth with bread and wine, and was called 'the Priest of the Highest,' and Abraham gave him a portion of his spoil. And just so Wolff's friend in the desert of Meru in the kingdom of Khiva . . . whose name is Abd-er-Rahman, which means 'Slave of the merciful God' . . . has also a royal title. He is called Shahe-Adaalat, 'King of Righteousness' — the same as *Melchizedek* in Hebrew. And when he makes peace between kings he bears the title, Shahe Soolkh, 'King of Peace' — in Hebrew *Melek-Salem*."

To revert, however, to the topographical question; two main opinions have been current from the earliest ages of interpretation. 1. That of the Jewish commentators, who — from Onkelos (*Targum*) and Josephus (*B. J.* vi. 10; *Ant.* i. 10, § 2, vii. 3, § 2) to Kalisch (*Comm. on Gen.* p. 360) — with one voice affirm that Salem is Jerusalem, on the ground that Jerusalem is so called in Ps. lxxvi. 2, the Psalmist, after the manner of poets, or from some exigency of his poem, making use of the archaic name in preference to that in common use. This is quite feasible; but it is no argument for the identity of Jerusalem with the Salem of Melchizedek. See this well put by Reland (*Pal.* p. 833). The Christians of the 4th century held the same belief with the Jews, as is evident from an expression of Jerome ("nostri omnes," *Ep. ad Evangelum*, § 7).

2. Jerome himself, however, is not of the same opinion. He states (*Ep. ad Evang.* § 7) without hesitation, though apparently (as just observed) alone in his belief, that the Salem of Melchizedek was not Jerusalem, but a town near Scythopolis, which in his day was still called Salem, and where the vast ruins of the palace of Melchizedek were still to be seen. Elsewhere (*Onom.* "Salem") he locates it more precisely at eight Roman miles from Scythopolis, and gives its then name as Salumias. Further, he identifies this Salem with the Salim (Σαλείμ) of St. John the Baptist. That a Salem existed where St. Jerome thus places it there need be no doubt. Indeed, the name has been recovered at the identical distance below *Beisán* by Mr. Van de Velde, at a spot otherwise suitable for Ænon. But that this Salem, Salim, or Salumias was the Salem of Melchizedek, is as uncertain as that Jerusalem was so. The ruins were probably as much the ruins of Melchizedek's palace as the remains at *Ramet el-Khalil*, three miles north of Hebron, are those of "Abraham's house." Nor is the decision assisted by a consideration of Abram's homeward route. He probably brought back his party by

[a] For instance, Bochart, *Phaleg*, ii. 4; Ewald, *Gesch.* 410

[b] The force of this word is *occurrere in obviam* (Gesenius, *Thes.* p. 1233 *b*).

Digitized by Google

he read along the Ghor as far as Jericho, and then turning to the right ascended to the upper level of the country in the direction of Mamre; but whether he crossed the Jordan at the *Jisr Benat Yakub* above the Lake of Gennesaret, or at the *Jisr Mejamia* below it, he would equally pass by both Scythopolis and Jerusalem. At the same time it must be confessed that the distance of Salem (at least eighty miles from the probable position of Sodom) makes it difficult to suppose that the king of Sodom can have advanced so far to meet Abram, adds its weight to the statement that the meeting took place after Abram had returned, — not during his return, — and is thus so far in favor of Salem being Jerusalem.

3. Professor Ewald (*Geschichte*, i. 410, *note*) pronounces that Salem is a town on the further side of Jordan, on the road from Damascus to Sodom, quoting at the same time John iii. 23, but the writer has in vain endeavored to discover any authority for this, or any notice of the existence of the name in that direction either in former or recent times.

4. A tradition given by Eupolemus, a writer known only through fragments preserved in the *Praparatio Evangelica* of Eusebius (ix. 17), differs in some important points from the Biblical account. According to this the meeting took place in the sanctuary of the city Argarizin, which is interpreted by Eupolemus to mean "the Mountain of the Most [a] High." Argarizin [b] is of course *har Gerizzim*, Mount Gerizim. The source of the tradition is, therefore, probably Samaritan, since the encounter of Abram and Melchizedek is one of the events to which the Samaritans lay claim for Mount Gerizim. But it may also proceed from the identification of Salem with Shechem, which lying at the foot of Gerizim would easily be confounded with the mountain itself. [See SHALEM.]

5. A Salem is mentioned in Judith iv. 4, among the places which were seized and fortified by the Jews on the approach of Holofernes. "The valley of Salem," as it appears in the A. V. (τὸν αὐλῶνα Σαλήμ), is possibly, as Reland has ingeniously suggested (*Pal.* "Salem," p. 977), a corruption of εἰς αὐλῶνα εἰς Σαλήμ — "into the plain to Salem." If Αὐλών is here, according to frequent usage, the Jordan [c] Valley, then the Salem referred to must surely be that mentioned by Jerome, and already noticed. But in this passage it may be with equal probability the broad plain of the *Mukhna* which stretches from Ebal and Gerizim on the one hand, to the hills on which *Salim* stands on the other, which is said to be still called the "plain of Salim" [d] (Porter, *Handbook*, p. 340 *a*), and through which runs the central north road of the country. Or, as is perhaps still more likely, it refers to another *Salim* near *Zerin* (Jezreel), and to the plain which runs up between those two places, as far as *Jenin*, and which lay directly in the route of the Assyrian army. There is nothing to show that the invaders reached as far into the interior of the country as the plain of the *Mukhna*. And the other places enumerated in the verse seem, as far as they can be recognized, to be points which guarded the main approaches to the interior (one of the chief of which was by Jezreel and En-gannim), not towns in the interior itself, like Shechem or the Salem near it.

2. (שָׁלֵם: ἐν εἰρήνῃ: *in pace* [e]), Ps. lxvi. 2. It seems to be agreed on all hands that Salem is here employed for Jerusalem, but whether as a mere abbreviation to suit some exigency of the poetry, and point the allusion to the peace (*salem*) which the city enjoyed through the protection of God, or whether, after a well-known habit of poets, [f] it is an antique name preferred to the more modern and familiar one, is a question not yet decided. The latter is the opinion of the Jewish commentators, but it is grounded on their belief that the Salem of Melchizedek was the city which afterwards became Jerusalem. This is to beg the question. See a remarkable passage in Geiger's *Urschrift*, etc., pp. 74–76.

The antithesis in verse 1 between "Judah" and "Israel" would seem to imply that some sacred place in the northern kingdom is being contrasted with Zion, the sanctuary of the south. And if there were in the Bible any sanction to the identification of Salem with Shechem (noticed above), the passage might be taken as referring to the continued relation of God to the kingdom of Israel. But there are no materials even for a conjecture on the point. Zion the sanctuary, however, being named in the one member of the verse, it is tolerably certain that Salem, if Jerusalem, must denote the secular part of the city — a distinction which has been already noticed [vol. ii. p. 1321] as frequently occurring and implied in the Psalms and Prophecies. G.

* In the passage quoted above, "In Judah is God known, his name is great in Israel," we recognize not "antithesis" but the *synonymous parallelism* of Hebrew poetry — each term being generic and designating the whole nation, as in Ps. cxiv. 2 — "Judah was his sanctuary, and Israel his dominion" — where the words will bear no other construction. In the next verse — "In Salem also is his tabernacle, and his dwelling-place in Zion" — we understand the names as also *cognate*, not "contrasted," each indicating the Holy City as the special seat of divine worship. We are not able to trace in the sacred writings, referred to above, any clear distinction between the secular Jerusalem

---

[a] Professor Stanley seems to have been the first to call attention to this (*S. & P.* p. 249). See *Eupolemi Fragmenta*, auctore G. A. Kuhlmey (Berlin, 1840); one of those excellent monographs which we owe to the German academical custom of demanding a treatise at each step in honors.

[b] Pliny uses nearly the same form — Argaris (*H. N.* v. 14).

[c] Αὐλών is commonly employed in Palestine topography for the great valley of the Jordan (see Eusebius and Jerome, *Onomasticon*, "Aulon"). But in the Book of Judith it is used with much less precision in the general sense of a valley or plain.

[d] The writer could not succeed (in 1861) in eliciting this name for any part of the plain. The name, given in answer to repeated questions, for the eastern branch or leg of the *Mukhna* was always *Wady Sajba*.

[e] The above is the reading of the Vulgate and of the "Gallican Psalter." But in the *Liber Psalmorum juxta Hebraicam veritatem*, in the *Divina Bibliotheca* included in the Benedictine edition of Jerome's works, the reading is *Salem*.

[f] The Arab poets are said to use the same abbreviation (Gesenius, *Thes.* p. 1422 *b*). The preference of an archaic to a modern name will surprise no student of poetry. Few things are of more constant occurrence.

Digitized by Google

and the sacred Zion, but find the phrases used interchangeably, each sometimes with a secular reference, and each sometimes in a spiritual relation.
S. W.

**SA'LIM** (Σαλείμ; Alex. Σαλλειμ: *Salim*). A place named (John iii. 23) to denote the situation of Ænon, the scene of St. John's last baptisms — Salim being the well-known town or spot, and Ænon a place of fountains, or other water, near it. There is no statement in the narrative itself fixing the situation of Salim, and the only direct testimony we possess is that of Eusebius and Jerome, who both affirm unhesitatingly (*Onom.* "Ænon") that it existed in their day near the Jordan, eight Roman miles south of Scythopolis. Jerome adds (under "Salem") that its name was then Salumias. Elsewhere (*Ep. ad Evangelum*, §§ 7, 8) he states that it was identical with the Salem of Melchizedek.

Various attempts have been more recently made to determine the locality of this interesting spot.

1. Some (as Alford, *Greek Test.* ad loc.) propose SHILHIM and AIN, in the arid country far in the south of Judæa, entirely out of the circle of associations of St. John or our Lord. Others identify it with the SHALIM of 1 Sam. ix. 4, but this latter place is itself unknown, and the name in Hebrew contains ש, to correspond with which the name in St. John should be Σεγαλείμ or Σααλείμ.

2. Dr. Robinson suggests the modern village of *Salim*, three miles E. of *Nablûs* (*Bibl. Res.* iii. 333), but this is no less out of the circle of St. John's ministrations, and is too near the Samaritans; and although there is some reason to believe that the village contains "two sources of living water" (*ibid.* 298), yet this is hardly sufficient for the abundance of deep water implied in the narrative. A writer in the *Colonial Ch. Chron.*, No. cxxvi. 464, who concurs in this opinion of Dr. Robinson, was told of a village an hour east (?) of *Salim* "named *Ain-ún*, with a copious stream of water." The district east of Salim is a blank in the maps. *Yamun* lies about 1½ hour S. E. of Salim, but this can hardly be the place intended; and in the description of Van de Velde, who visited it (ii. 303), no stream or spring is mentioned.

3. Dr. Barclay (*City*, etc., p. 564) is filled with an "assured conviction" that Salim is to be found in *Wady Seleim*, and Ænon in the copious springs of *Ain Farah* (*ibid.* p. 559), among the deep and intricate ravines some five miles N. E. of Jerusalem. This certainly has the name in its favor, and, if the glowing description and pictorial wood-cut of Dr. Barclay may be trusted — has water enough, and of sufficient depth for the purpose.

4. The name of *Salim* has been lately discovered by Mr. Van de Velde (*Syr. & Pal.* ii. 345, 346) in a position exactly in accordance with the notice of Eusebius, namely, six English miles south of *Beisán*, and two miles west of the Jordan. On the northern base of *Tell Redghah* is a site of ruins, and near it a Mussulman tomb, which is called by the Arabs *Sheykh Salim* (see also *Memoir*, p. 345). Dr. Robinson (iii. 333) complains that the name is attached only to a Mussulman sanctuary, and also that no ruins of any extent are to be found on the spot: but with regard to the first objection, even Dr. Robinson does not dispute that the name is there, and that the locality is in the closest agreement with the notice of Eusebius. As to the second it is only necessary to point to *Kefr-Saba*, where a town (Antipatris), which as late as the time of the destruction of Jerusalem was of great size and extensively fortified, has absolutely disappeared. The career of St. John has been examined in a former part of this work, and it has been shown with great probability that his progress was from south to north, and that the scene of his last baptisms was not far distant from the spot indicated by Eusebius, and now recovered by Mr. Van de Velde. [JORDAN, vol. ii. p. 1457.] *Salim* fulfills also the conditions implied in the name of Ænon (springs), and the direct statement of the text, that the place contained abundance of water. "The brook of *Wady Chuneh* runs close to it, a splendid fountain gushes out beside the *Wely*, and rivulets wind about in all directions. . . . . Of few places in Palestine could it so truly be said, 'Here is much water'" (*Syr. & Pal.* ii. 346). [ÆNON, Amer. ed.]

A tradition is mentioned by Reland (*Palæstina*, p. 978) that Salim was the native place of Simon Zelotes. This in itself seems to imply that its position was, at the date of the tradition, believed to be nearer to Galilee than to Judæa. G.

**SAL'LAI** [2 syl.] (שַׁלַּי, in pause שַׁלָּי [perh. *basket-maker*, Ges.]: Σηλί; [Vat. FA., though not properly separated from preceding word,] Alex. Σηλει: *Sellaï*). 1. A Benjamite, who with 928 of his tribe settled in Jerusalem after the Captivity (Neh. xi. 8).

2. (Σαλαΐ; [Vat. Alex. FA.[1] omit; FA.[3] Σαλλαΐ.]) The head of one of the courses of priests who went up from Babylon with Zerubbabel (Neh. xii. 20). In Neh. xii. 7 he is called SALLU.

**SAL'LU** (שַׁלּוּ [*weighed*]: Σαλώμ, Σηλώ; Alex. Σαλω in 1 Chr.: *Salo*, *Sellum*). 1. The son of Meshullam, a Benjamite who returned and settled in Jerusalem after the Captivity (1 Chr. ix. 7; Neh. xi. 7).

2. (Om. in Vat. MS.; [also in Rom., Alex., FA.[1]; FA.[3]] Σαλουαΐ; [Comp. Σαλού:] *Sellum.*) The head of one of the courses of priests who returned with Zerubbabel (Neh. xii. 7). Called also SALLAI.

**SALLU'MUS** (Σαλοῦμος; [Vat. Ald.] Alex. Σαλλοῦμος: *Salumus*). SHALLUM (1 Esdr. ix. 25; comp. Ezr. x. 24).

**SAL'MA, or SAL'MON** (שַׂלְמָא, שַׂלְמוֹן [*clothed, a garment*, Ges.]: [in Ruth] Σαλμών [Vat. Σαλμαν]; [in 1 Chr. ii. 11,] Alex. Σαλμάν, but Σαλομών both MSS. in Ruth iv. [rather 1 Chr. ii. 51, 54; in N. T., Σαλμών] *Salmon* [in Ruth and N. T., *Salma* in 1 Chr.]). Son of Nahshon, the prince of the children of Judah, and father of Boaz, the husband of Ruth. Salmon's age is distinctly marked by that of his father Nahshon, and with this agrees the statement in 1 Chr. ii. 51, 54, that he was of the sons of Caleb, and the father, or head man of Bethlehem-Ephratah, a town which seems to have been within the territory of Caleb (1 Chr. ii. 50, 51). [EPHRATAH; BETHLEHEM.] On the entrance of the Israelites into Canaan, Salmon took Rahab of Jericho to be his wife, and from this union sprang the Christ. [RAHAB.] From the circumstance of Salmon having lived at the time of the conquest of Canaan, as well as from his being the first pro

Digitized by Google

prætor of Bethlehem, where his family continued so many centuries, perhaps till the reign of Domician (Euseb. *Eccles. Hist.* ii. 20), he may be called the founder of the house of David. Besides Bethlehem, the Netophathites, the house of Joab, the Zorites, and several other families, looked to Salmon as their head (1 Chr. ii. 54, 55).

Two circumstances connected with Salmon have caused some perplexity: one, the variation in the orthography of his name, the other, an apparent variation in his genealogy.

As regards the first, the variation in proper names (whether caused by the fluctuations of copyists, or whether they existed in practice, and were favored by the significance of the names), is so extremely common, that such slight differences as those in the three forms of this name are scarcely worth noticing. Compare *e. g.* the different forms of the name *Shimea*, the son of Jesse, in 1 Sam. xvi. 9; 2 Sam. xiii. 3; 1 Chr. ii. 13: or of *Simon* Peter, in Luke v. 4, &c.; Acts xv. 14. See other examples in Hervey's *Geneal. of our Lord*, cc. vi. and x. Moreover, in this case, the variation from *Salma* to *Salmon* takes place in two consecutive verses, namely, Ruth iv. 20, 21, where the notion of two different persons being meant, though in some degree sanctioned by the authority of Dr. Kennicott (*Dissert.* i. 184, 543), is not worth refuting.[a] As regards the Salma of 1 Chr. ii. 51, 54, his connection with Bethlehem identifies him with the son of Nahshon, and the change of the final ה into א belongs doubtless to the late date of the book of Chronicles. The name is so written also in 1 Chr. ii. 11. But the truth is that the sole reason for endeavoring to make two persons out of Salma and Salmon, is the wish to lengthen the line between Salma and David, in order to meet the false chronology of those times.

The variation in Salma's genealogy, which has induced some to think that the Salma of 1 Chr. ii. 51, 54 is a different person from the Salma of 1 Chr. ii. 11, is more apparent than real. It arises from the circumstance that Bethlehem Ephratah, which was Salmon's inheritance, was part of the territory of Caleb, the grandson of Ephratah; and this caused him to be reckoned among the sons of Caleb. But it is a complete misunderstanding of the language of such topographical genealogies to suppose that it is meant to be asserted that Salma was the literal son of Caleb. Mention is made of Salma only in Ruth iv. 20, 21; 1 Chr. ii. 11, 51, 54; Matt. i. 4, 5; Luke iii. 32. The questions of his age and identity are discussed in the *Geneal. of our Lord*, cc. iv. and ix.; Jackson, *Chron. Antiq.* i. 171; Hales, *Analysis*, iii. 44; Burrington, *Geneal.* i. 189; Dr. Mill, *Vindic. of our Lord's Geneal.* p. 123, &c. A. C. H.

**SALMANA'SAR** (*Salmanasar*). SHALMANEZER, king of Assyria (2 Esdr. xiii. 40).

**SALMON** (צַלְמוֹן [*shady*, Ges.; perh. *terrace-like*, Fürst]: Σάλμων; [Vat. Alex. Σομων:] *Salmon*, Judg. ix. 48). The name of a hill near Shechem, on which Abimelech and his followers cut down the boughs with which they set the tower of Shechem on fire. Its exact position is not known.

It is usually supposed that this hill is mentioned in a verse of perhaps the most difficult of all the Psalms[b] (Ps. lxviii. 14); and this is probable, though the passage is peculiarly difficult, and the precise allusion intended by the poet seems hopelessly lost. Commentators differ from each other; and Fürst, within 176 pages of his *Handwörterbuch*, differs from himself (see שָׁלַג and צַלְמוֹן). Indeed, of six distinguished modern commentators — De Wette, Hitzig, Ewald, Hengstenberg, Delitzsch, and Hupfeld — no two give distinctly the same meaning; and Mr. Keble, in his admirable Version of the Psalms, gives a translation which, though poetical, as was to be expected, differs from any one of those suggested by these six scholars. This is not the place for an exhaustive examination of the passage. It may be mentioned, however, that the literal translation of the words תַּשְׁלֵג בְּצַלְמוֹן is "Thou makest it snow," or "It snows," with liberty to use the word either in the past or in the future tense. As notwithstanding ingenious attempts, this supplies no satisfactory meaning, recourse is had to a translation of doubtful validity, "Thou makest it white as snow," or "It is white as snow" — words to which various metaphorical meanings have been attributed. The allusion which, through the Lexicon of Gesenius, is most generally received, is that the words refer to the ground being snow-white with bones after a defeat of the Canaanite kings; and this may be accepted by those who will admit the scarcely permissible meaning, "white as snow," and who cannot rest satisfied without attaching some definite signification to the passage. At the same time it is to be remembered that the figure is a very harsh one; and that it is not really justified by passages quoted in illustration of it from Latin classical writers, such as, "campique ingentes ossibus albent" (Virg. *Æn.* xii. 36), and "humanis ossibus albet humus" (Ovid, *Fast.* i. 558), for in these cases the word "bones" is actually used in the text, and is not left to be supplied by the imagination. Granted, however, that an allusion is made to bones of the slain, there is a divergence of opinion as to whether Salmon was mentioned simply because it had been the battle-ground in some great defeat of the Canaanitish kings, or whether it is only introduced as an image of snowy whiteness. And of these two explanations, the first would be on the whole most probable; for Salmon cannot have been a very high mountain, as the highest mountains near Shechem are Ebal and Gerizim, and of these Ebal, the highest of the two, is only 1,028 feet higher than the city (see

[a] Eusebius (*Chron. Canon.* lib. i. 22) has no misgiving as to the identity of Salma.

[b] See a work by Reuss, *Der acht und sechzigste Psalm, ein Denkmal exegetischer Noth und Kunst, zu Ehren unser ganzen Zunft*, Jena, 1851. Independently of its many obscure allusions, the 68th Psalm contains thirteen ἅπαξ λεγομενα, including תַּשְׁלֵג. It may be observed that this word is scarcely, as Gesenius suggests analogous to הִלְבִּין, הִצְהִירִים, Hiphils of color; for these words have a signification of color in Kal. The really analogous word is הִמְטִיר, "he makes it rain," which bears the same relation to מָטָר, "rain," which הִשְׁלִיג bears to שֶׁלֶג, "snow." Owing, probably, to Hebrew religious conceptions of natural phenomena, no instance occurs of הִמְטִיר used as a neuter in the sense of "it rains;" though this would be grammatically admissible.

EBAL, vol. i. p. 640; and Robinson's *Gesenius*, p. 895 *a*). If the poet had desired to use the image of a snowy mountain, it would have been more natural to select Hermon, which is visible from the eastern brow of Gerizim, is about 10,000 feet high, and is covered with perpetual snow. Still it is not meant that this circumstance by itself would be conclusive; for there may have been particular associations in the mind of the poet, unknown to us, which led him to prefer Salmon.

In despair of understanding the allusion to Salmon, some suppose that Salmôn, i. e. *Tsalmón*, is not a proper name in this passage, but merely signifies "darkness;" and this interpretation, supported by the Targum, though opposed to the Septuagint, has been adopted by Ewald, and in the first statement in his Lexicon is admitted by Fürst. Since *tselem* signifies "shade," this is a bare etymological possibility. But no such word as *tsalmón* occurs elsewhere in the Hebrew language; while there are several other words for darkness, in different degrees of meaning, such as the ordinary word *choshek*, *ophel*, *aphêlah*, and *'arephel*.

Unless the passage is given up as corrupt, it seems more in accordance with reason to admit that there was some allusion present to the poet's mind, the key to which is now lost; and this ought not to surprise any scholar who reflects how many allusions there are in Greek poets — in Pindar, for example, and in Aristophanes — which would be wholly unintelligible to us now, were it not for the notes of Greek scholiasts. To these notes there is nothing exactly analogous in Hebrew literature; and in the absence of some such assistance, it is unavoidable that there should be several passages in the O. T. respecting the meaning of which we must be content to remain ignorant. E. T.

**SAL'MON** the father of Boaz (Ruth iv. 20, 21; Matt. i. 4, 5; Luke iii. 32). [SALMA.]

**SALMO'NE** (Σαλμώνη: *Salmone*). The East point of the island of CRETE. In the account of St. Paul's voyage to Rome this promontory is mentioned in such a way (Acts xxvii. 7) as to afford a curious illustration both of the navigation of the ancients and of the minute accuracy of St. Luke's narrative. We gather from other circumstances of the voyage that the wind was blowing from the N. W. (ἐναντίους, ver. 4; βραδυπλοοῦντες, ver. 7). [See MYRA.] We are then told that the ship, on making CNIDUS, could not, by reason of the wind, hold on her course, which was past the south point of Greece, W. by S. She did, however, just fetch Cape Salmone, which bears S. W. by S. from Cnidus. Now we may take it for granted that she could have made good a course of less than seven points from the wind [SHIP]: and, starting from this assumption, we are at once brought to the conclusion that the wind must have been between N. N. W. and W. N. W. Thus what Paley would have called an "undesigned coincidence" is elicited by a cross-examination of the narrative. This ingenious argument is due to Mr. Smith of Jordanhill (*Voy. and Shipwreck of St. Paul*, pp. 73, 74, 2d ed.), and from him it is quoted by Conybeare and Howson (*Life and Epp. of St. Paul*, ii. 393, 2d ed.). To these books we must refer for fuller details. We may just add that the ship had had the advantages of a weather shore, smooth water, and a favoring current, before reaching Cnidus, and that by running down to Cape Salmone the sailors obtained similar advantages under the lee of Crete, as far as FAIR HAVENS, near LASEA. J. S. H.

* The northeast point of Crete is the present Cape Sidero, and has generally been supposed (as above) to be Luke's Salmone. Captain Spratt, R. N., dissents from this opinion (*Travels and Researches in Crete*, Lond. 1865). He admits that the ancient writers, generally at least, applied the name to that Cape, but thinks that Luke refers to the promontory — jutting out toward the east some miles to the south of Cape Sidero, and called *Plaka*. His reasons for this conclusion in the case of Luke are, *first*, "that Cape Sidero is, in truth, not the headland or point his ship would keep nearest to in coming from Cnidus; and, *secondly*, that this promontory south of Grandes Bay, called *Plaka* by the natives, is indeed now by some Levantine navigators called Cape Salmone, to distinguish it from Cape Sidero." Purdy (*New Sailing Directions*, etc., p. 69, Lond. 1834) writes the name *Salomon*, but must refer, of course, to the same place. H.

**SALOM** (Σαλώμ: *Salom*). The Greek form 1. of Shallum, the father of Hilkiah (Bar. i. 7). [SHALLUM.] 2. (*Salomus*) of Salu the father of Zimri (1 Macc. ii. 26). [SALU.]

**SALO'ME** (Σαλώμη [Heb. *peaceful*]: *Salome*). 1. The wife of Zebedee, as appears from comparing Matt. xxvii. 56 with Mark xv. 40. It is further the opinion of many modern critics that she was the sister of Mary, the mother of Jesus, to whom reference is made in John xix. 25. The words admit, however, of another and hitherto generally received explanation, according to which they refer to the "Mary the wife of Cleophas" immediately afterwards mentioned. In behalf of the former view, it may be urged that it gets rid of the difficulty arising out of two sisters having the same name — that it harmonizes John's narrative with those of Matthew and Mark — that this circuitous manner of describing his own mother is in character with St. John's manner of describing himself — that the absence of any connecting link between the second and third designations may be accounted for on the ground that the four are arranged in two distinct couplets — and, lastly that the Peshito, the Persian, and the Æthiopic versions mark the distinction between the second and third by interpolating a conjunction. On the other hand, it may be urged that the difficulty arising out of the name may be disposed of by assuming a double marriage on the part of the father — that there is no necessity to harmonize John with Matthew and Mark, for that the time and the place in which the groups are noticed differ materially — that the language addressed to John, "Behold thy mother!" favors the idea of the absence rather than of the presence of his natural mother — and that the varying traditions[a] current in the early Church as to Salome's parents, worthless as they are in themselves, yet bear a negative testimony against the idea of her being related to the mother of Jesus. Altogether we can hardly regard the point as settled, though the

[a] According to one account she was the daughter of Joseph by a former marriage (Epiphan. *Har.* lxxviii 8): according to another, the wife of Joseph (Niceph. *H. E.* ii. 3).

Digitized by Google

weight of modern criticism is decidedly in favor of the former view (see Wieseler, *Stud. u. Krit.* 1840, p. 648). The only events recorded of Salome are that she preferred a request on behalf of her two sons for seats of honor in the kingdom of heaven (Matt. xx. 20), that she attended at the crucifixion of Jesus (Mark xv. 40), and that she visited his sepulchre (Mark xvi. 1). She is mentioned by name only on the two latter occasions.

2. The daughter of Herodias by her first husband, Herod Philip (Joseph. *Ant.* xviii. 5, § 4). She is the "daughter of Herodias" noticed in Matt. xiv. 6 as dancing before Herod Antipas, and as procuring at her mother's instigation the death of John the Baptist. She married in the first place Philip the tetrarch of Trachonitis, her paternal uncle, and secondly Aristobulus, the king of Chalcis. W. L. B.

**SALT** (מֶלַח: ἅλς: *sal*). Indispensable as salt is to ourselves, it was even more so to the Hebrews, being to them not only an appetizing condiment in the food both of man (Job vi. 6) and beast (Is. xxx. 24, see margin), and a most valuable antidote to the effects of the heat of the climate on animal food, but also entering largely into their religious services as an accompaniment to the various offerings presented on the altar (Lev. ii. 13). They possessed an inexhaustible and ready supply of it on the southern shores of the Dead Sea. Here may have been situated the Valley of Salt (2 Sam. viii. 13), in proximity to the mountain of fossil salt which Robinson (*Researches*, ii. 106) describes as five miles in length, and as the chief source of the salt in the sea itself. Here were the saltpits (Zeph. ii. 9), probably formed in the marshes at the southern end of the lake, which are completely coated with salt, deposited periodically by the rising of the waters; and here also were the successive pillars of salt which tradition has from time to time identified with Lot's wife (Wisd. x. 7; Joseph. *Ant.* i. 11, § 4). [SEA, THE SALT.] Salt might also be procured from the Mediterranean Sea, and from this source the Phœnicians would naturally obtain the supply necessary for salting fish (Neh. xiii. 16) and for other purposes. The Jews appear to have distinguished between rock-salt and that which was gained by evaporation, as the Talmudists particularize one species (probably the latter) as the "salt of Sodom" (Carpzov, *Appar.* p. 718). The notion that this expression means bitumen rests on no foundation. The saltpits formed an important source of revenue to the rulers of the country (Joseph. *Ant.* xiii. 4, § 9), and Antiochus conferred a valuable boon on Jerusalem by presenting the city with 375 bushels of salt for the Temple service (*Ant.* xii. 3, § 3). In addition to the uses of salt already specified, the inferior sorts were applied as a manure to the soil, or to hasten the decomposition of dung (Matt. v. 13; Luke xiv. 35). Too large an admixture, however, was held to produce sterility, as exemplified on the shores of the Dead Sea (Deut. xxix. 23; Zeph. ii. 9): hence a "salt" land was synonymous with barrenness (Job xxxix. 6, see margin; Jer. xvii. 6; comp. Joseph. *B. J.* iv. 8, § 2, ἀλμυρόδης καὶ ἄγονος); and hence also arose the custom of sowing with salt the foundations of a destroyed city (Judg. ix. 45), as a token of its irretrievable ruin. It was the belief of the Jews that salt would, by exposure to the air, lose its virtue (μωρανθῇ, Matt. v. 13) and become saltless (ἄναλον, Mark x. 50). The same fact is implied in the expressions of Pliny, *sal iners* (xxxi. 39), *sal tabescere* (xxxi. 44); and Maundrell (*Early Travels*, p. 512, Bohn) asserts that he found the surface of a salt rock in this condition. The associations connected with salt in eastern countries are important. As one of the most essential articles of diet, it symbolized hospitality; as an antiseptic, durability, fidelity, and purity. Hence the expression, "covenant of salt" (Lev. ii. 13; Num. xviii. 19; 2 Chr. xiii. 5), as betokening an indissoluble alliance between friends; and again the expression, "salted with the salt of the palace" (Ezr. iv. 14), not necessarily meaning that they had "maintenance from the palace," as the A. V. has it, but that they were bound by sacred obligations of fidelity to the king. So in the present day, "to eat bread and salt together" is an expression for a league of mutual amity (Russell, *Aleppo*, i. 232); and, on the other hand, the Persian term for traitor is *nemekhheram*, "faithless to salt" (Gesen. *Thes.* p. 790). It was probably with a view to keep this idea prominently before the minds of the Jews that the use of salt was enjoined on the Israelites in their offerings to God; for in the first instance it was specifically ordered for the meat-offering (Lev. ii. 13), which consisted mainly of flour, and therefore was not liable to corruption. The extension of its use to burnt sacrifices was a later addition (Ez. xliii. 24; Joseph. *Ant.* iii. 9, § 1), in the spirit of the general injunction at the close of Lev. ii. 13. Similarly the heathens accompanied their sacrifices with salted barley-meal, the Greeks with their οὐλοχύται (Hom. *Il.* i. 449), the Romans with their *mola salsa* (Hor. *Sat.* ii. 3, 200) or their *salsa fruges* (Virg. *Æn.* ii. 133). It may of course be assumed that in all of these cases salt was added as a condiment; but the strictness with which the rule was adhered to — no sacrifice being offered without salt (Plin. xxxi. 41), and still more the probable, though perhaps doubtful, admixture of it in incense (Ex. xxx. 35, where the word rendered "tempered together" is by some understood as "salted") — leads to the conclusion that there was a symbolical force attached to its use. Our Lord refers to the sacrificial use of salt in Mark ix. 49, 50, though some of the other associations may also be implied. The purifying property of salt, as opposed to corruption, led to its selection as the outward sign in Elisha's miracle (2 K. ii. 20, 21), and is also developed in the N. T. (Matt. v. 13; Col. iv. 6). The custom of rubbing infants with salt (Ez. xvi. 4) originated in sanitary considerations, but received also a symbolical meaning. W. L. B.

**SALT, CITY OF** (עִיר־הַמֶּלַח: *al πόλεις Ἁλῶν*; Alex. *αι πολις αλων*: *civitas salis*). The fifth of the six cities of Judah which lay in the "wilderness" (Josh. xv. 62). Its proximity to En-gedi, and the name itself seem to point to its being situated close to or at any rate in the neighborhood of the Salt Sea. Dr. Robinson (*Bibl. Res.* ii. 109) expresses his belief that it lay somewhere near the plain at the south end of that lake, which he would identify with the Valley of Salt. This, though possibly supported by the reading of the Vatican LXX., "the cities of Sodom," is at present a mere conjecture, since no trace of the name or the city has yet been discovered in that position. On the other hand, Mr. Van de Velde (*Syr. & Pal.* ii.

Digitized by Google

99; *Memoir*, p. 111, and *Map*) mentions a *Nahr Maieh* which he passed in his route from *Wady er-Rmail* to *Sebbeh*, the name of which (though the orthography is not certain) may be found to contain a trace of the Hebrew. It is one of four ravines which unite to form the *Wady el-Bedieh*. Another of the four, *W. 'Amreh* (*Syr. & P.* ii. 99; *Memoir*, p. 111, *Map*), recalls the name of Gomorrah, to the Hebrew of which it is very similar. G.

* SALT SEA. [SEA, THE SALT.]

**SALT, VALLEY OF** (גֵּיא מֶלַח, but twice with the article, גֵּי הַמֶּלַח: Γεβελέμ, Γεμελέθ, κοιλάς, and φάραγξ, τῶν ἁλῶν; Alex. Γημαλα, Γαιμελα: *Vallis Salinarum*). A certain valley, or perhaps more accurately a "ravine," — the Hebrew word *Ge* appearing to bear that signification, — in which occurred two memorable victories of the Israelite arms.

1. That of David over the Edomites (2 Sam. viii. 13; 1 Chr. xviii. 12). It appears to have immediately followed his Syrian campaign, and was itself one of the incidents of the great Edomite war of extermination.[a] The battle in the Valley of Salt appears to have been conducted by Abishai (1 Chr. xviii. 12), but David and Joab were both present in person at the battle and in the pursuit and campaign which followed; and Joab was left behind for six months to consummate the doom of the conquered country (1 K. xi. 15, 16; Ps. lx. title). The number of Edomites slain in the battle is uncertain: the narratives of Samuel and Chronicles both give it at 18,000, but this figure is lowered in the title of Ps. lx. to 12,000.

2. That of Amaziah (2 K. xiv. 7; 2 Chr. xxv. 11), who is related to have slain ten thousand Edomites in this valley, and then to have proceeded, with 10,000 prisoners, to the stronghold of the nation at *has-Sela*, the Cliff, *i. e.* Petra, and, after taking it, to have massacred them by hurling them down the precipice which gave its ancient name to the city.

Neither of these notices affords any clew to the situation of the Valley of Salt, nor does the cursory mention of the name ("Gemela" and "Mela") in the *Onomasticon*. By Josephus it is not named on either occasion. Seetzen (*Reisen*, ii. 356) was probably the first to suggest that it was the broad open plain which lies at the lower end of the Dead Sea, and intervenes between the lake itself and the range of heights which crosses the valley at six or eight miles to the south. The same view is taken (more decisively) by Dr. Robinson (*Bibl. Res.* ii. 109). The plain is in fact the termination of the *Ghôr* or valley through which the Jordan flows from the Lake of Tiberias to the Dead Sea. Its N. W. corner is occupied by the *Khashm Usdûm*, a mountain of rock salt, between which and the lake is an extensive salt marsh, while salt streams and brackish springs pervade, more or less, the entire western half of the plain. Without presuming to contradict this suggestion, which yet can hardly be affirmed with safety in the very imperfect condition of our knowledge of the inaccessible regions S. and S. E. of the Dead Sea, it may be well to call attention to some considerations which seem to stand in the way of the implicit reception which most writers have given it since the publication of Dr. R.'s *Researches*.

(*a.*) The word *Ge* (גיא), employed for the place in question, is not, to the writer's knowledge, elsewhere applied to a broad valley or sunk plain of the nature of the lower *Ghôr*. Such tracts are denoted in the Scripture by the words *Emek* or *Bika'ah*, while *Ge* appears to be reserved for clefts or ravines of a deeper and narrower character. [VALLEY.]

(*b.*) *A priori*, one would expect the tract in question to be called in Scripture by the peculiar name uniformly applied to the more northern parts of the same valley — *ha-Arâbah* — in the same manner that the Arabs now call it *el-Ghôr* — *Ghôr* being their equivalent for the Hebrew *Arâbah*.

(*c.*) The name "Salt," though at first sight conclusive, becomes less so on reflection. It does not follow, because the Hebrew word *melach* signifies salt, that therefore the valley *was* salt. A case exactly parallel exists at *el-Milh*, the representative of the ancient MOLADAH, some sixteen miles south of Hebron. Like *melach*, *milh* signifies salt; but there is no reason to believe that there is any salt present there, and Dr. Robinson (*Bibl. Res.* ii. 201, *note*) himself justly adduces it as "an instance of the usual tendency of popular pronunciation to reduce foreign proper names to a significant form." Just as *el-Milh* is the Arabic representative of the Hebrew Moladah, so possibly was *ge-melach* the Hebrew representative of some archaic Edomite name.

(*d.*) What little can be inferred from the narrative as to the situation of the Ge-Melach is in favor of its being nearer to Petra. Assuming Selah to be Petra (the chain of evidence for which is tolerably connected), it seems difficult to believe that a large body of prisoners should have been dragged for upwards of fifty miles through the heart of a hostile and most difficult country, merely for massacre. G.

**SA'LU** (סַלּוּא [*weighed*]: Σαλμών; Alex. [Comp. Ald.] Σαλώ: *Salu*). The father of Zimri the prince of the Simeonites, who was slain by Phinehas (Num. xxv. 14). Called also SALOM.

**SA'LUM** (Σαλούμ; [Vat. corrupt:] *Esmenus*). 1. SHALLUM, the head of a family of gatekeepers (A. V. "porters") of the Temple (1 Esdr. v. 28; comp. Ezr. ii. 42).

2. (Σαλῆμος; [Ald. Σαλοῦμος:] *Solome.*]

[a] The Received Text of 2 Sam. viii. 13 omits the mention of Edomites; but from a comparison of the parallel passages in 1 Chr. and in the title of Ps. lx. there is good ground for believing that the verse originally stood thus: "And David made himself a name [when he returned from smiting the Aramites] [and when he returned he smote the Edomites] in the Valley of Salt — eighteen thousand;" the two clauses within brackets having been omitted by the Greek and Hebrew scribes respectively, owing to the very close resemblance of the words with which each clause finishes — ארמים and אדמים. This is the conjecture of Thenius (*Exeg. Handbuch*), and is adopted by Bunsen (*Bibelwerk*, note to the passage). Ewald has shown (*Gesch.* iii. 201, 202) that the whole passage is very much disordered. וַיַּעַשׂ שֵׁם should probably be rendered "and set up a monument," instead of "and got a name" Gesen. (*Thes.* p. 1431 *b*); Michaelis (*Suppl.* No. 2501, and note to *Bibel für Ungel.*); De Wette (*Bibel*); LXX. Coisl., καὶ ἔθηκεν ἐστηλωμένην Jerome (*Quæst. Hebr.*), erexit fornicem triumphalem Rashi interprets it "reputation," and makes the reputation to have arisen from David's good act in burying the dead even of his enemies.

SHALLUM, the father of Hilkiah and ancestor of Ezra (1 Esdr. viii. 1; Comp. Ezr. vii. 2). Called also SADAMIAS and SADOM.

**SALUTATION.** Salutations may be classed under the two heads of conversational and epistolary. The salutation at meeting consisted in early times of various expressions of blessing, such as "God be gracious unto thee" (Gen. xliii. 29); "Blessed be thou of the Lord" (Ruth iii. 10; 1 Sam. xv. 13); "The Lord be with you," "The Lord bless thee" (Ruth ii. 4); "The blessing of the Lord be upon you; we bless you in the name of the Lord" (Ps. cxxix. 8). Hence the term "bless" received the secondary sense of "salute," and is occasionally so rendered in the A. V. (1 Sam. xiii. 10, xxv. 14; 2 K. iv. 29, x. 15), though not so frequently as it might have been (*e. g.* Gen. xxvii. 23, xlvii. 7, 10; 1 K. viii. 66). The blessing was sometimes accompanied with inquiries as to the health either of the person addressed or his relations. The Hebrew term used in these instances (*shâlôm*[a]) has no special reference to "peace," as stated in the marginal translation, but to general well-being, and strictly answers to our "welfare," as given in the text (Gen. xliii. 27; Ex. xviii. 7). It is used not only in the case of salutation (in which sense it is frequently rendered "to salute," *e. g.* Judg. xviii. 15; 1 Sam. x. 4; 2 K. x. 13); but also in other cases where it is designed to soothe or to encourage a person (Gen. xliii. 23; Judg. vi. 23, xix. 20; 1 Chr. xii. 18; Dan. x. 19; compare 1 Sam. xx. 21, where it is opposed to "hurt;" 2 Sam. xviii. 28, "all is well;" and 2 Sam. xi. 7, where it is applied to the progress of the war). The salutation at parting consisted originally of a simple blessing (Gen. xxiv. 60, xxviii. 1, xlvii. 10; Josh. xxii. 6), but in later times the term *shâlôm* was introduced here also in the form "Go in peace," or rather "Farewell" (1 Sam. i. 17, xx. 42; 2 Sam. xv. 9). This[b] was current at the time of our Saviour's ministry (Mark v. 34; Luke vii. 50; Acts xvi. 36), and is adopted by Him in his parting address to his disciples (John xiv. 27). It had even passed into a salutation on meeting, in such forms as "Peace be to this house" (Luke x. 5), "Peace be unto you" (Luke xxiv. 36; John xx. 19). The more common salutation, however, at this period was borrowed from the Greeks, their word χαίρειν being used both at meeting (Matt. xxvi. 49, xxviii. 9; Luke i. 28), and probably also at departure. In modern times the ordinary mode of address current in the East resembles the Hebrew: *Es-selâm aleykum*, "Peace be on you" (Lane's *Mod. Eg.* ii. 7), and the term "salam" has been introduced into our own language to describe the Oriental salutation.

The forms of greeting that we have noticed were freely exchanged among persons of different ranks on the occasion of a casual meeting, and this even when they were strangers. Thus Boaz exchanged greeting with his reapers (Ruth ii. 4), the traveller on the road saluted the worker in the field (Ps. cxxix. 8), and members of the same family interchanged greetings on rising in the morning (Prov. xxvii. 14). The only restriction appears to have been in regard to religion, the Jew of old, as the Mohammedan of the present day, paying the compliment only to those whom he considered "brethren," i. e. members of the same religious community (Matt. v. 47; Lane, ii. 8; Niebuhr, *Descript.* p. 43). Even the Apostle St John forbids an interchange of greeting where it implied a wish for the success of a bad cause (2 John 11). In modern times the Orientals are famed for the elaborate formality of their greetings, which occupy a very considerable time; the instances given in the Bible do not bear such a character, and therefore the prohibition addressed to persons engaged in urgent business, "Salute no man by the way" (2 K. iv. 29; Luke x. 4), may best be referred to the delay likely to ensue from subsequent conversation. Among the Persians the monarch was never approached without the salutation "O king! live for ever" (Dan. ii. 4, &c.). There is no evidence that this ever became current among the Jews: the expression in 1 K. i. 31 was elicited by the previous allusion on the part of David to his own decease. In lieu of it we meet with the Greek χαῖρε, "hail!" (Matt. xxvii. 29). The act of salutation was accompanied with a variety of gestures expressive of different degrees of humiliation, and sometimes with a kiss. [ADORATION; KISS.] These acts involved the necessity of dismounting in case a person were riding or driving (Gen. xxiv. 64; 1 Sam. xxv. 23; 2 K. v. 21). The same custom still prevails in the East (Niebuhr's *Descript.* p. 39).

The epistolary salutations in the period subsequent to the O. T. were framed on the model of the Latin style: the addition of the term "peace" may, however, be regarded as a vestige of the old Hebrew form (2 Macc. i. 1). The writer placed his own name first, and then that of the person whom he saluted; it was only in special cases that this order was reversed (2 Macc. i. 1, ix. 19; 1 Esdr. vi. 7). A combination of the first and third persons in the terms of the salutation was not unfrequent (Gal. i. 1, 2; Philem. 1; 2 Pet. i. 1). The term used (either expressed or understood) in the introductory salutation was the Greek χαίρειν in an elliptical construction (1 Macc. x. 18; 2 Macc. ix. 19; 1 Esdr. viii. 9; Acts xxiii. 26); this, however, was more frequently omitted, and the only Apostolic passages in which it occurs are Acts xv. 23 and James i. 1, a coincidence which renders it probable that St. James composed the letter in the former passage. A form of prayer for spiritual mercies was also used, consisting generally of the terms "grace and peace," but in the three Pastoral Epistles and in 2 John "grace, mercy, and peace," and in Jude "mercy, peace, and love." The concluding salutation consisted occasionally of a translation of the Latin *valete* (Acts xv. 29, xxiii. 30), but more generally of the term ἀσπάζομαι, "I salute," or the cognate substantive, accompanied by a prayer for peace or grace. St. Paul, who availed himself of an amanuensis (Rom. xvi. 22), added the salutation with his own hand (1 Cor. xvi. 21; Col. iv. 18; 2 Thes. iii. 17). The omission of the introductory salutation in the Epistle to the Hebrews is very noticeable.

**SAM'AEL** (Σαλαμιήλ; [Sin. Σαμαμιηλ; Ald Σαμαήλ:] *Salathiel*), a variation for (margin)

---

[a] שָׁלוֹם.

[b] The Greek expression is evidently borrowed from the Hebrew, the preposition εἰς not betokening the state *into* which, but answering to the Hebrew לְ, *in* which the person departs.

Salamiel [SHELUMIEL] in Jud. viii. 1 (comp. Num. i. 6). The form in A. V. is given by Aldus.

B. F. W.

**SAMAI'AS** [3 syl.] (Σαμαίας: *Semeias*). 1. SHEMAIAH the Levite in the reign of Josiah (1 Esdr. i. 9; comp. 2 Chr. xxxv. 9).

2. SHEMAIAH of the sons of Adonikam (1 Esdr. viii. 39; comp. Ezr. viii. 13).

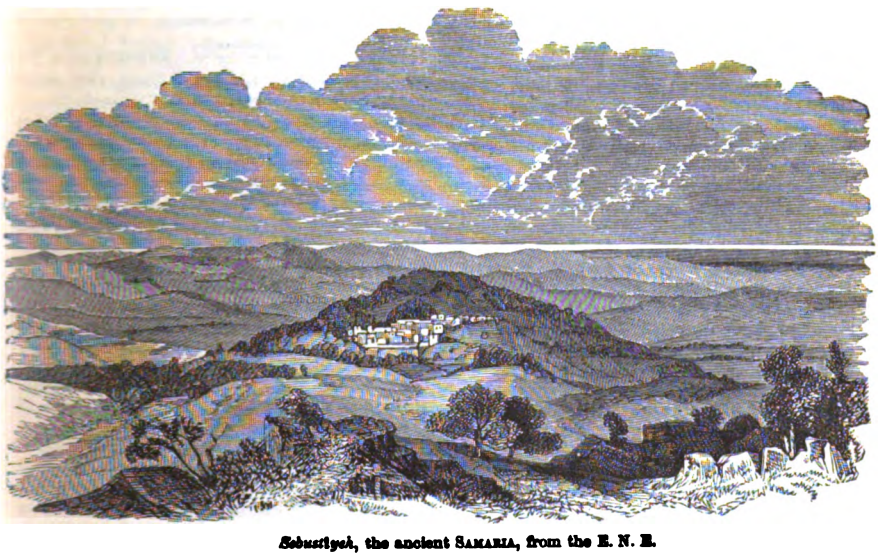
3. (Σεμεΐ; [Vat. Σεμεας; Sin. Σεμελιας; Ald. Σαμαίας;] Alex. Σεμειας: om. in Vulg.) The "great Samaias," father of Ananias and Jonathas (Tob. v. 13).

**SAMA'RIA** (שֹׁמְרוֹן, *i. e.* Shomerôn [see below]; Chald. שֹׁמְרַיִן: Σαμάρεια, Σεμηρών, Σομόρων;[a] [Alex. very often Σαμαρια, and so Sin. or FA. in Is., Jer., Obad.; Sin. -ρεια in Jud. i. 9, iv. 4;] Joseph. Σαμάρεια, but *Ant.* viii. 12, § 5, Σεμαρεών: *Samaria*). 1. A city of Palestine,

The word *Shomerôn* means, etymologically, "pertaining to a watch," or "a watch-mountain:" and we should almost be inclined to think that the peculiarity of the situation of Samaria gave occasion to its name. In the territory originally belonging to the tribe of Joseph, about six miles to the northwest of Shechem, there is a wide basin-shaped valley, encircled with high hills, almost on the edge of the great plain which borders upon the Mediterranean. In the centre of this basin, which is on a lower level than the valley of Shechem, rises a less elevated oblong hill, with steep yet accessible sides, and a long flat top. This hill was chosen by Omri, as the site of the capital of the kingdom of Israel. The first capital after the secession of the ten tribes had been Shechem itself, whither all Israel had come to make Rehoboam king. On the separation being fully accomplished, Jeroboam rebuilt that city (1 K. xii. 25), which had been razed to the ground by Abimelech (Judg. ix. 45). But he soon moved to Tirzah, a place, as Dr. Stanley observes, of great and proverbial beauty (Cant. vi. 4); which continued to be the royal residence until Zimri burnt the palace and perished in its ruins (1 K. xiv. 17, xv. 21, 33, xvi. 6–18). Omri, who prevailed in the contest for the kingdom that ensued, after "reigning six years" there, "bought the hill of Samaria (הַהַר שֹׁמְרוֹן: τὸ ὄρος τὸ Σεμηρών) of Shemer (שֶׁמֶר: Σεμήρ, Joseph. Σέμαρος) for two talents of silver, and built on the hill, and called the name of the city which he built, after the name of the owner of the hill, Samaria" (1 K. xvi. 23, 24). [OMRI, Amer. ed.] This statement of course dispenses with the etymology above alluded to; but the central position of the hill, as Herod sagaciously observed long afterwards, made it admirably adapted for a place of *observation*, and a fortress to awe the neighboring country. And the singular beauty of the spot, upon which, to this hour, travellers dwell with admiration, may have struck Omri, as it afterwards struck the tasteful Idumean (*B. J.* i. 21, § 2; *Ant.* xv. 8, § 5).

From the date of Omri's purchase, B. C. 925, Samaria retained its dignity as the capital of the ten tribes. Ahab built a temple to Baal there (1 K. xvi. 32, 33); and from this circumstance portion of the city, possibly fortified by a separate wall, was called "the city of the house of Baal" (2 K. x. 25). Samaria must have been a place of great strength. It was twice besieged by the Syrians, in B. C. 901 (1 K. xx. 1), and in B. C. 892 (2 K. vi. 24–vii. 20); but on both occasions the siege was ineffectual. On the latter, indeed, it was relieved miraculously, but not until the inhabitants had suffered almost incredible horrors from famine during their protracted resistance. The possessor of Samaria was considered to be *de facto* king of Israel (2 K. xv. 13, 14); and woes denounced against the nation were directed against it by name (Is. vii. 9, &c.). In B. C. 721, Samaria was taken, after a siege of three years, by Shalmaneser, king of Assyria (2 K. xviii. 9, 10), and the kingdom of the ten tribes was put an end to [See below, No. 3.] Some years afterwards the district of which Samaria was the centre was repeopled by Esarhaddon; but we do not hear especially of the city until the days of Alexander the Great. That conqueror took the city, which seems to have somewhat recovered itself (Euseb. *Chron.* ad ann. Abr. 1684), killed a large portion of the inhabitants, and suffered the remainder to settle at Shechem. [SHECHEM; SYCHAR.] He replaced them by a colony of Syro-Macedonians, and gave the adjacent territory (Σαμαρείτις χώρα) to the Jews to inhabit (Joseph. *c. Ap.* ii. 4). These Syro-Macedonians occupied the city until the time of John Hyrcanus. It was then a place of considerable importance, for Josephus describes it (*Ant.* xiii. 10, § 2) as a very strong city (πόλις ὀχυρωτάτη). John Hyrcanus took it after a year's siege, and did his best to demolish it entirely. He intersected the hill on which it lay with trenches: into these he conducted the natural brooks, and thus undermined its foundations. "In fact," says the Jewish historian, "he took away all evidence of the very existence of the city." This story at first sight seems rather exaggerated, and inconsistent with the hilly site of Samaria. It may have referred only to the suburbs lying at its foot. "But," says Prideaux (*Conn.* B. C. 109, note), "Benjamin of Tudela, who was in the place, tells us in his Itinerary[b] that there were upon the top of this hill many fountains of water, and from these water enough may have been derived to fill these trenches." It should also be recollected that the hill of Samaria was lower than the hills in its neighborhood. This may account for the existence of these springs. Josephus describes the extremities to which the inhabitants were reduced during this siege, much in the same way that the author of the Book of Kings does during that of Benhadad (comp. *Ant.* xiii. 10, § 2, with 2 K. vi. 25). John Hyrcanus' reasons for attacking Samaria were the injuries which its inhabitants had done to the people of Marissa, colonists and allies of the Jews. This confirms what was said above, of the cession of the Samaritan neighborhood to the Jews by Alexander the Great.

After this disaster (which occurred in B. C. 109) the Jews inhabited what remained of the city; a



[a] The prevailing LXX. form in the O. T. is Σαμάρεια, with the following remarkable exceptions: 1 K. xvi. 24, Σεμερών . . . Σεμηρών (Mal, Σαμηρών); Alex Εσερων . . . Σαμηρων;] Ezr. iv. 10, Σομόρων (Mal, Σαμαίρων); Neh. iv. 2; Is. vii. 9, Σαμάρων.

[b] No such passage, however, now exists in Benjamin of Tudela. See the editions of Asher and Adler.

Digitized by Google

must we find it in their possession in the time of Alexander Jannæus (*Ant.* xiii. 15, § 4), and until Pompey gave it back to the descendants of its original inhabitants (τοῖς οἰκήτορσιν). These οἰκήτορες may possibly have been the Syro-Macedonians, but it is more probable that they were Samaritans proper, whose ancestors had been dispossessed by the colonists of Alexander the Great. By directions of Gabinius, Samaria and other demolished cities were rebuilt (*Ant.* xiv. 5, § 3). But its more effectual rebuilding was undertaken by Herod the Great, to whom it had been granted by Augustus, on the death of Antony and Cleopatra (*Ant.* xiii. 10, § 3, xv. 8, § 5; *B. J.* i. 20, § 3). He called it *Sebaste*, Σεβαστή = *Augusta*, after the name of his patron (*Ant.* xv. 7, § 7). Josephus gives an elaborate description of Herod's improvements. The wall surrounding it was 20 stadia in length. In the middle of it was a close, of a stadium and a half square, containing a magnificent temple, dedicated to the Cæsar. It was colonized by 6,000 veterans and others, for whose support a most beautiful and rich district surrounding the city was appropriated. Herod's motives in these arrangements were probably, first, the occupation of a commanding position, and then the desire of distinguishing himself for taste by the embellishment of a spot already so adorned by nature (*Ant.* xv. 8, § 5; *B. J.* i. 20, § 3; 21, § 2).

How long Samaria maintained its splendor after Herod's improvements we are not informed. In the N. T. the city itself does not appear to be mentioned, but rather a portion of *the district* to which, even in older times, it had extended its name. Our Version, indeed, of Acts viii. 5 says that Philip the deacon "went down to *the* city of Samaria;" but the Greek of the passage is simply εἰς πόλιν τῆς Σαμαρείας. And we may fairly argue, both from the absence of the definite article,

*Sebustiyeh*, the ancient SAMARIA, from the E. N. E.

Behind the city are the mountains of Ephraim, verging on the Plain of Sharon. The Mediterranean Sea is in the furthest distance.[a] The original sketch from which this view is taken was made by William Tipping Esq., in 1862, and is engraved by his kind permission.

and from the probability that, had the city Samaria been intended, the term employed would have been *Sebaste*, that some one city of the district, the name of which is not specified, was in the mind of the writer. In verse 9 of the same chapter "the people of Samaria" represents τὸ ἔθνος τῆς Σαμαρείας; and the phrase in verse 25, "many villages of the Samaritans," shows that the operations of evangelizing were not confined to the city of Samaria itself, if they were ever carried on there. Comp. Matt. x. 5, "Into any city of the Samaritans enter ye not;" and John iv. 4, 5, where, after it has been said, "And He must needs go through Samaria," obviously the district, it is subjoined, "Then cometh He to *a* city of Samaria called Sychar." Henceforth its history is very unconnected. Septimius Severus planted a Roman colony there in the beginning of the third century (Ulpian, *Leg. I. de Censibus*, quoted by Dr. Robinson). Various specimens of coins struck on the spot have been preserved, extending from Nero to Geta, the brother of Caracalla (Vaillant, in *Numism. Imper.*, and Noris, quoted by Reland). But, though the seat of a Roman colony, it could not have been a place of much political importance. We find in the *Codex* of Theodosius, that by A. D. 409 the Holy Land had been divided into Palæstina Prima, Secunda, and Tertia. Palæstina Prima included the country of the Philistines, Samaria (the district), and the northern part of Judæa; but its capital was not Sebaste, but Cæsarea. In an ecclesiastical point of view it stood rather higher. It was an episcopal see probably as early as the third century. At any rate its bishop was present amongst those of Palestine at the Council of Nicæa, A. D. 325, and subscribed its acts as "Maximus (al. Marinus) Sebastenus." The names of some of his successors have been preserved — the latest of them mentioned is Pelagius, who attended the

Synod at Jerusalem, A. D. 536. The title of the see occurs in the earlier Greek *Notitiæ*, and in the later Latin ones (Reland, *Pal.* pp. 214–229). Sebaste fell into the hands of the Mohammedans during the siege of Jerusalem. In the course of the Crusades a Latin bishopric was established there the title of which was recognized by the Roman Church until the fourteenth century. At this day the city of Omri and of Herod is represented by a small village retaining few vestiges of the past except its name, *Sebâstieh*, an Arabic corruption of Sebaste. Some architectural remains it has, partly of Christian construction or adaptation, as the ruined church of St. John the Baptist, partly, perhaps, traces of Idumæan magnificence. "A long avenue of broken pillars (says Dr. Stanley), apparently the main street of Herod's city, here, as at Palmyra and Damascus, adorned by a colonnade on each side, still lines the topmost terrace of the hill." But the fragmentary aspect of the whole place exhibits a present fulfillment of the prophecy of Micah (i. 6), though it may have been fulfilled more than once previously by the ravages of Shalmaneser or of John Hyrcanus. "I will make Samaria as an heap of the field, and as plantings of a vineyard: and I will pour down the stones thereof into the valley, and I will discover the foundations thereof" (Mic. i. 6; comp. Hos. xiii. 16).

St. Jerome, whose acquaintance with Palestine imparts a sort of probability to the tradition which prevailed so strongly in later days, asserts that Sebaste, which he invariably identifies with Samaria, was the place in which St. John the Baptist was imprisoned and suffered death. He also makes it the burial-place of the prophets Elisha and Obadiah (see various passages cited by Reland, pp. 980, 981). Epiphanius is at great pains, in his work *Adv. Hæreses* (lib. i.), in which he treats of the heresies of the Samaritans with singular minuteness, to account for the origin of their name. He interprets it as שֹׁמְרִים, *φύλακες*, or "keepers." The hill on which the city was built was, he says, designated Somer or Someron (Σωμήρ, Σωμέρων), from a certain Somoron the son of Somer, whom he considers to have been of the stock of the ancient Perizzites or Girgashites, themselves descendants of Canaan and Ham. But he adds, the inhabitants may have been called Samaritans from their guarding the land, or (coming down much later in their history) from their guarding the Law, as distinguished from the later writings of the Jewish Canon, which they refused to allow. [See SAMARITANS.]

For modern descriptions of the condition of Samaria and its neighborhood, see Dr. Robinson's *Biblical Researches*, ii. 127–133; Reland's *Palæstina*, pp. 344, 979–982; Raumer's *Palästina*, pp. 144–148, notes; Van de Velde's *Syria and Palestine*, i. 363–388, and ii. 295, 296, *Map*, and *Memoir*; Dr. Stanley's *Sinai and Palestine*, pp. 242–246: and a short article by Mr. G. Williams in the *Dict. of Geog.* Dr. Kitto, in his *Physical History of Palestine*, pp. cxvii., cxviii., has an interesting reference to and extract from Sandys, illustrative of its topography and general aspect at the commencement of the seventeenth century.

2. The Samaria named in the present text of 1 Macc. v. 66 (*τὴν Σαμάρειαν*; [Sin. Alex. *-ρειαν*:] *Samariam*) is evidently an error. At any rate the well-known Samaria of the Old and New Testaments cannot be intended, for it is obvious that Judas, in passing from Hebron to the land of the Philistines (Azotus), could not make so immense a *détour*. The true correction is doubtless supplied by Josephus (*Ant.* xii. 8, § 6), who has Marissa (*i. e.* MARESHA), a place which lay in the road from Hebron to the Philistine Plain. One of the ancient Latin Versions exhibits the same reading; which is accepted by Ewald (*Gesch.* iv. 361) and a host of commentators (see Grimm, *Kurzg. Exeg. Handb.*, on the passage). Drusius proposed Shaaraim; but this is hardly so feasible as Maresha and has no external support.

3. SAMA'RIA ([Σαμαρεία; Alex. very often Σεμαρια, and so Sin. in 1 Macc. and N. T., followed by Tisch. in his 8th ed. of the N. T.; — "the country of Samaria," 1 Macc. x. 30, xi. 28, 34, ἡ Σαμαρεῖτις, Alex. *-ρειτις*, and so Sin. except 1 Macc. xi. 28; — (woman) "of Samaria," John iv. 9, Σαμαρεῖτις, but Tisch. in his 8th ed. of the N T., Σαμαρίτις; —] Joseph. *χώρα Σαμαρέων*; Ptol. Σαμαρίς, Σαμάρεια: *Samaria*).

SAMAR'ITANS (שֹׁמְרוֹנִים: Σαμαρεῖται; [Alex. Σαμαρῖται, and so Sin. and Tisch. (8th ed.) in the N. T.;] Joseph. Σαμαρεῖς: [*Samaritæ*]).

There are few questions in Biblical philology upon which, in recent times, scholars have come to such opposite conclusions as the extent of the territory to which the former of these words is applicable, and the origin of the people to which the latter is applied in the N. T. But a probable solution of them may be gained by careful attention to the historical statements of Holy Scripture and of Josephus, and by a consideration of the geographical features of Palestine.

In the strictest sense of the term, a SAMARITAN would be an inhabitant of the *city* of Samaria. But it is not found at all in this sense, exclusively at any rate, in the O. T. In fact, it only occurs there once, and then in a wider signification, in 2 K. xvii. 29. There it is employed to designate those whom the king of Assyria had "placed in (what are called) the *cities* of Samaria (whatever these may be) instead of the children of Israel."

Were the word Samaritan found elsewhere in the O. T., it would have designated those who belonged to the kingdom of the ten tribes, which in a large sense was called Samaria. And as the extent of that kingdom varied, which it did very much, gradually diminishing to the time of Shalmaneser, so the extent of the word Samaritan would have varied.

SAMARIA at first included all the tribes over which Jeroboam made himself king, whether east or west of the river Jordan. Hence, even before the *city* of Samaria existed, we find the "old prophet who dwelt at Bethel" describing the predictions of "the man of God who came from Judah," in reference to the altar at Bethel, as directed not merely against that altar, but "against all the houses of the high-places which are in *the cities of Samaria*" (1 K. xiii. 32), *i. e.* of course, the cities of which Samaria was, or was to be, the head or capital. In other places in the historical books of the O. T. (with the exception of 2 K. xvii. 24, 26, 28, 29) Samaria seems to denote the *city* exclusively. But the prophets use the word, much as did the old prophet of Bethel in a greatly extended sense. Thus the "calf of Bethel" is called by Hosea (viii. 5, 6) the "calf of Samaria"; in Amos (iii. 9) the "mountains o

Digitized by Google

Samaria" are spoken of; and the "captivity of Samaria and her daughters" is a phrase found in Ezekiel (xvi. 53). Hence the word Samaritan must have denoted every one subject to the king of the northern capital.

But, whatever extent the word might have acquired, it necessarily became contracted as the limits of the kingdom of Israel became contracted. In all probability the territory of Simeon and that of Dan were very early absorbed in the kingdom of Judah. This would be one limitation. Next, in B. C. 771 and 740 respectively, "Pul, king of Assyria, and Tilgath-Pilneser, king of Assyria, carried away the Reubenites and the Gadites, and the half-tribe of Manasseh, and brought them unto Halah, and Habor, and Hara, and to the river Gozan" (1 Chr. v. 26). This would be a second limitation. But the latter of these kings went further: "He took Ijon, and Abel-beth-maachah, and Janoah, and Kedesh, and Hazor, and Gilead, and Galilee, all the land of Naphtali, and carried them captive to Assyria" (2 K. xv. 29). This would be a third limitation. Nearly a century before, B. C. 860, "the Lord had begun to cut Israel short;" for "Hazael, king of Syria, smote them in all the coasts of Israel; from Jordan eastward, all the land of Gilead, the Gadites, and the Reubenites, and the Manassites, from Aroer, which is by the river Arnon, even Gilead and Bashan" (2 K. x. 32, 33). This, however, as we may conjecture from the diversity of expression, had been merely a passing inroad, and had involved no permanent subjection of the country or deportation of its inhabitants. The invasions of Pul and of Tilgath-pilneser were utter clearances of the population. The territory thus desolated by them was probably occupied by degrees by the pushing forward of the neighboring heathen, or by straggling families of the Israelites themselves. In reference to the northern part of Galilee we know that a heathen population prevailed. Hence the phrase "Galilee of the Nations," or "Gentiles" (Is. ix. 1; 1 Macc. v. 15). And no doubt this was the case also beyond Jordan.

But we have yet to arrive at a fourth limitation of the kingdom of Samaria, and by consequence, of the word Samaritan. It is evident from an occurrence in Hezekiah's reign, that just before the deposition and death of Hoshea, the last king of Israel, the authority of the king of Judah, or, at least, his influence, was recognized by portions of Asher, Issachar, and Zebulun, and even of Ephraim and Manasseh (2 Chr. xxx. 1-26). Men came from all those tribes to the Passover at Jerusalem. This was about B. C. 726. In fact, to such miserable limits had the kingdom of Samaria been reduced, that when, two or three years afterwards, we are told that "Shalmaneser came up throughout the land," and after a siege of three years "took Samaria, and carried Israel away into Assyria, and placed them in Halah, and in Habor by the river Gozan, and in the cities of the Medes" (2 K. xvii. 5, 6), and when again we are told that "Israel was carried away out of their own land into Assyria" (2 K. xvii. 23), we must suppose a very small field of operations. Samaria (the city), and a few adjacent cities or villages only, represented that dominion which had once extended from Bethel to Dan northwards, and from the Mediterranean to the borders of Syria and Ammon eastwards. This is further confirmed by what we read of Josiah's progress, in B. C. 641, through "the cities of Manasseh, and Ephraim, and Simeon, even unto Naphtali" (2 Chr. xxxiv. 6). Such a progress would have been impracticable had the number of cities and villages occupied by the persons then called Samaritans been at all large.

This, however, brings us more closely to the second point of our discussion, the origin of those who are in 2 K. xvii. 29, and in the N. T., called Samaritans. Shalmaneser, as we have seen (2 K. xvii. 5, 6, 26), carried Israel, *i. e.* the remnant of the ten tribes which still acknowledged Hoshea's authority, into Assyria. This remnant consisted, as has been shown, of Samaria (the city) and a few adjacent cities and villages. Now, 1. Did he carry away all their inhabitants or no? 2. Whether they were wholly or only partially desolated, who replaced the deported population? On the answer to these inquiries will depend our determination of the questions, were the Samaritans a mixed race, composed partly of Jews, partly of new settlers, or were they purely of foreign extraction?

In reference to the former of these inquiries, it may be observed that the language of Scripture admits of scarcely a doubt. "Israel was carried away" (2 K. xvii. 6, 23), and other nations were placed "in the cities of Samaria *instead* of the children of Israel" (2 K. xvii. 24). There is no mention whatever, as in the case of the somewhat parallel destruction of the kingdom of Judah, of "the poor of the land being left to be vine-dressers and husbandmen" (2 K. xxv. 12). We add, that, had any been left, it would have been impossible for the new inhabitants to have been so utterly unable to acquaint themselves with "the manner of the God of the land," as to require to be taught by some priest of the Captivity sent from the king of Assyria. Besides, it was not an unusual thing with oriental conquerors actually to exhaust a land of its inhabitants. Comp. Herod. iii. 149, "The Persians dragged (*σαγηνεύσαντες*) Samos, and delivered it up to Syloson stript of all its men;" and, again, Herod. vi. 31, for the application of the same treatment to other islands, where the process called *σαγηνεύειν* is described, and is compared to a hunting out of the population (*ἀνθηρεύειν*). Such a capture is presently contrasted with the capture of other territories to which *σαγηνεύειν* was not applied. Josephus's phrase in reference to the cities of Samaria is that Shalmaneser "transplanted all the people" (*Ant.* ix. 14, § 1). A threat against Jerusalem, which was indeed only partially carried out, shows how complete and summary the desolation of the last relics of the sister kingdom must have been: "I will stretch over Jerusalem the line of Samaria, and the plummet of the house of Ahab: and I will wipe Jerusalem as a man wipeth a dish: he wipeth and turneth it upon the face thereof" (2 K. xxi. 13). This was uttered within forty years after B. C. 721, during the reign of Manasseh. It must have derived much strength from the recentness and proximity of the calamity.

We may then conclude that the cities of Samaria were not merely partially, but wholly evacuated of their inhabitants in B. C. 721, and that they remained in this desolated state until, in the words of 2 K. xvii. 24, "the king of Assyria brought men from Babylon, and from Cuthah, and from Ava, and from Hamath, and from Sepharvaim, and placed them in the cities of

Digitized by Google

Samaria instead of the children of Israel: and they possessed Samaria, and dwelt in the cities thereof." Thus the new Samaritans — for such we must now call them — were Assyrians by birth or subjugation, were utterly strangers in the cities of Samaria, and were exclusively the inhabitants of those cities. An incidental question, however, arises, Who was the king of Assyria that effected this colonization? At first sight, one would suppose Shalmaneser; for the narrative is scarcely broken, and the repeopling seems to be a natural sequence of the depopulation. Such would appear to have been Josephus' view, for he says of Shalmaneser, "When he had removed the people out of their land, he brought other nations out of Cuthah, a place so called (for there is still in Persia a river of that name), into Samaria and the country of the Israelites" (*Ant.* ix. 14, §§ 1, 3; x. 9, § 7); but he must have been led to this interpretation simply by the juxtaposition of the two transactions in the Hebrew text. The Samaritans themselves, in Ezr. iv. 2, 10, attributed their colonization not to Shalmaneser, but to "Esar-haddon, king of Assur," or to "the great and noble Asnapper," either the king himself or one of his generals. It was probably on his invasion of Judah, in the reign of Manasseh, about B. C. 677, that Esarhaddon discovered the impolicy of leaving a tract upon the very frontiers of that kingdom thus desolate, and determined to garrison it with foreigners. The fact, too, that some of these foreigners came from Babylon would seem to direct us to Esarhaddon, rather than to his grandfather, Shalmaneser. It was only recently that Babylon had come into the hands of the Assyrian king. And there is another reason why this date should be preferred. It coincides with the termination of the sixty-five years of Isaiah's prophecy, delivered B. C. 742, within which "Ephraim should be broken that it should not be a people" (Is. vii. 8). This was not effectually accomplished until the very land itself was occupied by strangers. So long as this had not taken place, there might be hope of return: after it had taken place, no hope. Josephus (*Ant.* x. 9, § 7) expressly notices this difference in the cases of the ten and of the two tribes. The land of the former became the possession of foreigners, the land of the latter, not so.

These strangers, whom we will now assume to have been placed in "the cities of Samaria" by Esarhaddon, were of course idolaters, and worshipped a strange medley of divinities. Each of the five nations, says Josephus, who is confirmed by the words of Scripture, had its own god. No place was found for the worship of Him who had once called the land his own, and whose it was still. God's displeasure was kindled, and they were infested by beasts of prey, which had probably increased to a great extent before their entrance upon it. "The Lord sent lions among them, which slew some of them." On their explaining their miserable condition to the king of Assyria, he despatched one of the captive priests to teach them "how they should fear the Lord." The priest came accordingly, and henceforth, in the language of the sacred historian, they "feared the Lord, and served their graven images, both their children and their children's children: as did their fathers, so do they unto this day" (2 K. xvii. 41). This last sentence was probably inserted by Ezra. It serves two purposes: 1st, to qualify the pretensions of the Samaritans of Ezra's time to be pure worshippers of God — they were no more exclusively his servants, than was the Roman emperor who desired to place a statue of Christ in the Pantheon entitled to be called a Christian; and, 2dly, to show how entirely the Samaritans of later days differed from their ancestors in respect to idolatry. Josephus's account of the distress of the Samaritans, and of the remedy for it, is very similar, with the exception that with him they are afflicted with pestilence.

Such was the origin of the post-captivity or new Samaritans — men not of Jewish extraction, but from the further East: "the Cuthæans had formerly belonged to the inner parts of Persia and Media, but were then called 'Samaritans,' taking the name of the country to which they were removed," says Josephus (*Ant.* x. 9, § 7). And again he says (*Ant.* ix. 14, § 3) they are called "in Hebrew 'Cuthæans,' but in Greek 'Samaritans.'" Our Lord expressly terms them ἀλλογενεῖς (Luke xvii. 18); and Josephus' whole account of them shows that he believed them to have been *μέτοικοι* ἀλλοεθνεῖς, though, as he tells us in two places (*Ant.* ix. 14, § 3, and xi. 8, § 6), they sometimes gave a different account of their origin. But of this by-and-by. A gap occurs in their history until Judah has returned from captivity. They then desire to be allowed to participate in the rebuilding of the Temple at Jerusalem. It is curious, and perhaps indicative of the treacherous character of their designs, to find them even then called, by anticipation, "the adversaries of Judah and Benjamin" (Ezr. iv. 1), a title which they afterwards fully justified. But, so far as professions go, they are not enemies; they are most anxious to be friends. Their religion, they assert, is the same as that of the two tribes, therefore they have a right to share in that great religious undertaking. But they do not call it a *national* undertaking. They advance no pretensions to Jewish blood. They confess their Assyrian descent, and even put it forward ostentatiously, perhaps to enhance the merit of their partial conversion to God. That it was but partial they give no hint. It may have become purer already, but we have no information that it had. Be this, however, as it may, the Jews do not listen favorably to their overtures. Ezra, no doubt, from whose pen we have a record of the transaction, saw them through and through. On this the Samaritans threw off the mask, and become open enemies, frustrate the operations of the Jews through the reigns of two Persian kings, and are only effectually silenced in the reign of Darius Hystaspis, B. C. 519.

The feud, thus unhappily begun, grew year by year more inveterate. It is probable, too, that the more the Samaritans detached themselves from idols, and became devoted exclusively to a sort of worship of Jehovah, the more they resented the contempt with which the Jews treated their offers of fraternization. Matters at length came to a climax. About B. C. 409, a certain Manasseh, a man of priestly lineage, on being expelled from Jerusalem by Nehemiah for an unlawful marriage, obtained permission from the Persian king of his day, Darius Nothus, to build a temple on Mount Gerizim, for the Samaritans, with whom he had found refuge. The only thing wanted to crystallize the opposition between the two races, namely, a rallying point for schismatical worship, being now obtained, their animosity became more intense than ever. The Samaritans are said to have done

Digitized by Google

everything in their power to annoy the Jews. They would refuse hospitality to pilgrims on their road to Jerusalem, as in our Lord's case. They would even waylay them in their journey (Joseph. *Ant.* xx. 6, § 1); and many were compelled through fear to take the longer route by the east of Jordan. Certain Samaritans were said to have once penetrated into the Temple of Jerusalem, and to have defiled it by scattering dead men's bones on the sacred pavement (*Ant.* xviii. 2, § 2). We are told too of a strange piece of mockery which must have been especially resented. It was the custom of the Jews to communicate to their brethren still in Babylon the exact day and hour of the rising of the paschal moon, by beacon-fires commencing from Mount Olivet, and flashing forward from hill to hill until they were mirrored in the Euphrates. So the Greek poet represents Agamemnon as conveying the news of Troy's capture to the anxious watchers at Mycenæ. Those who "sat by the waters of Babylon" looked for this signal with much interest. It enabled them to share in the devotions of those who were in their father-land, and it proved to them that they were not forgotten. The Samaritans thought scorn of these feelings, and would not unfrequently deceive and disappoint them, by kindling a rival flame and perplexing the watchers on the mountains.[a] Their own temple on Gerizim they considered to be much superior to that at Jerusalem. There they sacrificed a passover. Towards the mountain, even after the temple on it had fallen, wherever they were, they directed their worship. To their copy of the Law they arrogated an antiquity and authority greater than attached to any copy in the possession of the Jews. The Law (i. *e.* the five books of Moses) was their sole code; for they rejected every other book in the Jewish canon. And they professed to observe it better than did the Jews themselves, employing the expression not unfrequently, "The Jews indeed do so and so; but we, observing the letter of the Law, do otherwise."

The Jews, on the other hand, were not more conciliatory in their treatment of the Samaritans. The copy of the Law possessed by that people they declared to be the legacy of an apostate (Manasseh), and cast grave suspicions upon its genuineness. Certain other Jewish renegades had from time to time taken refuge with the Samaritans. Hence, by degrees, the Samaritans claimed to partake of Jewish blood, especially if doing so happened to suit their interest (Joseph. *Ant.* xi. 8, § 6; ix. 14, § 3). A remarkable instance of this is exhibited in a request which they made to Alexander the Great, about B. C. 332. They desired to be excused payment of tribute in the sabbatical year, on the plea that as true Israelites, descendants of Ephraim and Manasseh, sons of Joseph, they refrained from cultivating their land in that year. Alexander, on cross-questioning them, discovered the hollowness of their pretensions. (They were greatly disconcerted at their failure, and their dissatisfaction probably led to the conduct which induced Alexander to besiege and destroy the city of Samaria. Shechem was indeed their metropolis, but the destruction of Samaria seems to have satisfied Alexander.) Another instance of claim to Jewish descent appears in the words of the woman of Samaria to our Lord (John iv. 12), "Art Thou greater than our father Jacob, who gave us the well?" A question which she puts without recollecting that she had just before strongly contrasted the Jews and the Samaritans. Very far were the Jews from admitting this claim to consanguinity on the part of these people. They were ever reminding them that they were after all mere Cuthæans, mere strangers from Assyria. They accused them of worshipping the idol-gods buried long ago under the oak of Shechem (Gen. xxxv. 4). They would have no dealings with them that they could possibly avoid.[b] "Thou art a Samaritan and hast a devil," was the mode in which they expressed themselves when at a loss for a bitter reproach. Everything that a Samaritan had touched was as swine's flesh to them. The Samaritan was publicly cursed in their synagogues — could not be adduced as a witness in the Jewish courts — could not be admitted to any sort of proselytism — and was thus, so far as the Jew could affect his position, excluded from hope of eternal life. The traditional hatred in which the Jew held him is expressed in Ecclus. l. 25, 26, "There be two manner of nations which my heart abhorreth, and the third is no nation: they that sit on the mountain of Samaria; and they that dwell among the Philistines; and that foolish people that dwell in Sichem." And so long was it before such a temper could be banished from the Jewish mind, that we find even the Apostles believing that an inhospitable slight shown by a Samaritan village to Christ would be not unduly avenged by calling down fire from heaven.

"Ye know not what spirit ye are of," said the large-hearted Son of Man, and we find Him on no one occasion uttering anything to the disparagement of the Samaritans. His words, however, and the records of his ministrations confirm most thoroughly the view which has been taken above, that the Samaritans were not Jews. At the first sending forth of the Twelve (Matt. x. 5, 6) He charges them, "Go not into the way of the Gentiles, and into any city of the Samaritans enter ye not, but go rather to the lost sheep of the house of Israel." So again, in his final address to them on Mount Olivet, "Ye shall be witnesses to Me in Jerusalem and in all Judæa, and in Samaria, and unto the uttermost part of the earth" (Acts i. 8). So the nine unthankful lepers, Jews, were contrasted by Him with the tenth leper, the thankful stranger (ἀλλογενής), who was a Samaritan. So, in his well-known parable, a merciful Samaritan is contrasted with the unmerciful priest and Levite. And the very worship of the two races is described by Him as different in character. "Ye worship ye

---

[a] "This fact," says Dr. Trench, "is mentioned by Makrizi (see De Sacy's *Chrest. Arabe*, ii. 159), who affirms that it was this which put the Jews on making accurate calculations to determine the moment of the new moon's appearance (comp. Schoettgen's *Hor. Heb.* 244)."

[b] This prejudice had, of course, sometimes to give way to necessity, for the disciples had gone to Sychar [illegible] food, while our Lord was talking with the woman of Samaria by the well in its suburb (John iv. 8). And from Luke ix. 52, we learn that the disciples went before our Lord at his command into a certain village of the Samaritans "to make ready" for Him. Unless, indeed (though, as we see on both occasions, our Lord's influence over them was not yet complete), we are to attribute this partial abandonment of their ordinary scruples to the change which his example had already wrought in them.

Digitized by Google

know not what," this is said of the Samaritans: "We know what we worship, for salvation is of the Jews" (John iv. 22).

Such were the Samaritans of our Lord's Day: a people distinct from the Jews, though lying in the very midst of the Jews; a people preserving their identity, though seven centuries had rolled away since they had been brought from Assyria by Esarhaddon, and though they had abandoned their polytheism for a sort of ultra Mosaicism: a people, who — though their limits had been gradually contracted, and the rallying place of their religion on Mount Gerizim had been destroyed one hundred and sixty years before by John Hyrcanus (B. C. 130), and though Samaria (the city) had been again and again destroyed, and though their territory had been the battle-field of Syria and Egypt — still preserved their nationality, still worshipped from Shechem and their other impoverished settlements towards their sacred hill; still retained their nationality, and could not coalesce with the Jews: —

> Ὅξος τ' ἀλαιφά τ' ἐγχέας ταὐτῷ κύτει,
> Δίχοστασοῦντ' ἂν οὐ φίλως προσεννέπους.

Not indeed that we must suppose that the whole of the country called in our Lord's time Samaria was in the possession of the Cuthæan Samaritans, or that it had ever been so. "Samaria," says Josephus (*B. J.* iii. 3, § 4), "lies between Judæa and Galilee. It commences from a village called Ginæa (*Jenîn*), on the great plain (that of Esdraelon), and extends to the toparchy of Acrabatta," in the lower part of the territory of Ephraim. These points, indicating the extreme northern and the extreme southern parallels of latitude between which Samaria was situated, enable us to fix its boundaries with tolerably certainty. It was bounded northward by the range of hills which commences at Mount Carmel on the west, and, after making a bend to the southwest, runs almost due east to the valley of the Jordan, forming the southern border of the plain of Esdraelon. It touched towards the south, as nearly as possible, the northern limits of Benjamin. Thus it comprehended the ancient territory of Ephraim, and of those Manassites who were west of Jordan. "Its character," Josephus continues, "is in no respect different from that of Judæa. Both abound in mountains and plains, and are suited for agriculture, and productive, wooded, and full of fruits both wild and cultivated. They are not abundantly watered; but much rain falls there. The springs are of an exceedingly sweet taste; and, on account of the quantity of good grass, the cattle there produce more milk than elsewhere. But the best proof of their richness and fertility is that both are thickly populated." The accounts of modern travellers confirm this description by the Jewish historian of the "good land" which was allotted to that powerful portion of the house of Joseph which crossed the Jordan, on the first division of the territory. The Cuthæan Samaritans, however, possessed only a few towns and villages of this large area, and these lay almost together in the centre of the district. Shechem or Sychar (as it was contemptuously designated) was their chief settlement, even before Alexander the Great destroyed Samaria, probably because it lay almost close to Mount Gerizim. Afterwards it became more prominently so, and there, on the destruction of the temple on Gerizim, by John Hyrcanus (Joseph. *Ant.* xiii. 9, § 1), they built themselves a temple. The modern representative of Shechem is *Nâblus*, a corruption of Neapolis, or the "New Town," built by Vespasian a little to the west of the older town which was then ruined. At *Nâblus* the Samaritans have still a settlement, consisting of about 200 persons. Yet they observe the Law, and celebrate the Passover on a sacred spot on Mount Gerizim, with an exactness of minute ceremonial which the Jews themselves have long intermitted:

> "Quanquam diruta, servat
> Ignem Trojanum, et Vestam colit Alba minorem."

The Samaritans were very troublesome both to their Jewish neighbors and to their Roman masters, in the first century, A. D. Pilate chastised them with a severity which led to his own downfall (Joseph. *Ant.* xviii. 4, § 1), and a slaughter of 10,600 of them took place under Vespasian (*B. J.* iii. 7, § 32). In spite of these reverses they increased greatly in numbers towards its termination, and appear to have grown into importance under Dositheus, who was probably an apostate Jew. Epiphanius (*adv. Hæreses*, lib. i.), in the fourth century, considers them to be the chief and most dangerous adversaries of Christianity, and he enumerates the several sects into which they had by that time divided themselves. They were popularly, and even by some of the Fathers, confounded with the Jews, insomuch that a legal interpretation of the Gospel was described as a tendency to Σαμαρειτισμός or Ἰουδαϊσμός. This confusion, however, did not extend to an identification of the two races. It was simply an assertion that their extreme opinions were identical. And previously to an outrage which they committed on the Christians at Neapolis in the reign of Zeno, towards the end of the fifth century, the distinction between them and the Jews was sufficiently known, and even recognized in the Theodosian Code. This was so severely punished, that they sank into an obscurity, which, though they are just noticed by travellers of the twelfth and fourteenth centuries, was scarcely broken until the sixteenth century In the latter half of that century a correspondence with them was commenced by Joseph Scaliger. (De Sacy has edited two of their letters to that eminent scholar.) Job Ludolf received a letter from them, in the latter half of the next century These three letters are to be found in Eichhorn's *Repertorium für Biblische und Morgenländische Litteratur*, vol. xiii. They are of great archæological interest, and enter very minutely into the observances of the Samaritan ritual. Among other points worthy of notice in them is the inconsistency displayed by the writers in valuing themselves on not being Jews, and yet claiming to be descendants of Joseph. See also De Sacy's *Correspondance des Samaritains*, etc., in *Notices et Extr. des MSS. de la Biblioth. du Roi*, etc., vol. xii. And, for more modern accounts of the people themselves, Robinson's *Biblical Researches*, ii. 280–311, iii. 129–30; Wilson's *Lands of the Bible*, ii. 46–78; Van de Velde's *Syria and Palestine*, ii. 296 seq.; Stanley's *Sinai and Palestine*, p. 240; Rogers's *Notices of the Modern Samaritans*, p. 25; Grove's account of their Day of Atonement in *Vacation Tourists* for 1861; and Dr. Stanley's, of their Passover, in his *Lectures on the Jewish Church*, App. iii. [PASSOVER, vol. iii. p. 2357 f., Amer ed.]

The view maintained in the above remarks, as

to the purely Assyrian origin of the New Samaritans, is that of Suicer, Reland, Hammond, Drusius in the *Critici Sacri*, Maldonatus, Hengstenberg, Hävernick, Robinson, and Dean Trench. The reader is referred to the very clear but too brief discussion of the subject by the last-mentioned learned writer, in his *Parables*, pp. 310, 311, and to the authorities, especially De Sacy, which are there quoted. There is no doubt in the world that it was the ancient view. We have seen what Josephus said, and Origen, Eusebius, Epiphanius, Chrysostom, and Theodoret, say the same thing. Socrates, it must be admitted, calls the Samaritans ἀνάσχισμα Ἰουδαίων, but he stands almost alone among the ancients in making this assertion. Origen and Cyril indeed both mention their claim to descent from Joseph, as evidenced in the statement of the woman at the well, but mention it only to declare it unfounded. Others, as Winer, Döllinger, and Dr. Davidson, have held a different view, which may be expressed thus in Döllinger's own words: "In the northern part of the Promised Land (as opposed to Judæa proper) there grew up a mingled race which drew its origin from the remnant of the Israelites who were left behind in the country on the removal of the Ten Tribes, and also from the heathen colonists who were transplanted into the cities of Israel. Their religion was as hybrid as their extraction; they worshipped Jehovah, but, in addition to Him, also the heathen idols of Phœnician origin which they had brought from their native land" (*Heidenthum und Judenthum*, p. 739, § 7). If the words of Scripture are to be taken alone, it does not appear how this view is to be maintained. At any rate, as Drusius observes, the only mixture was that of Jewish apostate fugitives, long after Esarhaddon's colonization, not at the time of the colonization. But modern as this view is, it has for some years been the popular one, and even Dr. Stanley seems, though quite incidentally, to have admitted it (*S. & P.* p. 240). He does not, however, enter upon its defense. Mr. Grove is also in favor of it. See his notice already mentioned.

The authority due to the copy of the Law possessed by the Samaritans, and the determination whether the Samaritan reading of Deut. xxvii. 4, *Gerizim*, or that of the Hebrew, *Ebal*, is to be preferred, are discussed in the next article. [See SAMARITAN PENTATEUCH; EBAL; GERIZIM; SHECHEM; SICHEM; SYCHAR.] J. A. H.

* On Samaria and the Samaritans see the elaborate article of J. H. Petermann in Herzog's *Real-Encykl.* xiii. 359–391 (comp. his *Reisen im Orient*, Leipz. 1860–61, i. 269–292). * SAMARITAN. [SAMARIA, 3.]

**SAMARITAN PENTATEUCH**, a Recension of the commonly received Hebrew Text of the Mosaic Law, in use with the Samaritans, and written in the ancient Hebrew (*Ibri*), or so-called Samaritan character.[a] This recension is found vaguely quoted by some of the early Fathers of the Church, under the name of "Παλαιότατον Ἑβραϊκὸν τὸ παρὰ Σαμαρείταις," in contradistinction to the "Ἑβραϊκὸν τὸ παρὰ Ἰουδαίοις;" further, as "Samaritanorum Volumina," etc. Thus Origen on Num. xiii. 1, . . . . "ἃ καὶ αὐτὰ ἐκ τούτων Σαμαρειτῶν Ἑβραϊκοῦ μετεβάλομεν;" and on Num. xxi. 13, . . . "ἃ ἐν μόνοις τῶν Σαμαρειτῶν εὕρομεν," etc. Jerome, Prol. to Kings: "Samaritani etiam Pentateuchum Moysis *totidem* (? 22, like the "Hebrews, Syrians and Chaldæans") litteris habent, figuris tantum et apicibus discrepantes." Also on Gal. iii. 10, "quam ob causam" — (viz. Ἐπικατάρατος πᾶς ὃς οὐκ ἐμμένει ἐν πᾶσι τοῖς γεγραμμένοις, being quoted there from Deut. xxvii. 26, where the Masoretic text has only ארור אשר לא יקים את דברי התורה הזאת — "cursed be he that confirmeth not[b] the words of this Law to do them;" while the LXX. reads πᾶς ἄνθρωπος . . πᾶσι τοῖς λόγοις) — "quam ob causam Samaritanorum Hebræa volumina relegens inveni כל scriptum esse;" and he forthwith charges the Jews with having deliberately taken out the כל, because they did not wish to be bound *individually* to *all* the ordinances: forgetting at the same time that this same כל occurs in the very next chapter of the Masoretic text (Deut. xxviii. 15) — "*All* his commandments and his statutes." Eusebius of Cæsarea observes that the LXX. and the Sam. Pent. agree against the Received Text in the number of years from the Deluge to Abraham. Cyril of Alexandria speaks of certain words (Gen. iv. 8), wanting in the Hebrew, but found in the Samaritan. The same remark is made by Procopius of Gaza with respect to Deut. i. 6; Num. x. 10, x. 9, &c. Other passages are noticed by Diodorus, the Greek Scholiast, etc. The Talmud, on the other hand, mentions the Sam. Pent. distinctly and contemptuously as a clumsily forged record: "*You have falsified*[c] *your Pentateuch*," said R. Eliezer b. Shimon to the Samaritan scribes, with reference to a passage in Deut. xi. 30, where the well-understood word Shechem was gratuitously inserted after "the plains of Moreh," — "and you have not profited aught by it" (comp. *Jer. Sotah* 21 b, cf. 17; *Babli* 33 b). On another occasion they are ridiculed on account of their ignorance of one of the simplest rules of Hebrew Grammar, displayed in their Pentateuch; namely, the use of the ה *locale* (unknown, however, according to *Jer. Meg.* 6, 2, also to the people of Jerusalem). "*Who has caused you to blunder?*" said R. Shimon b. Eliezer to them; referring to their abolition of the Mosaic ordinance of marrying the deceased brother's wife (Deut. xxv. 5 ff.), — through a misinterpretation of the passage in question, which enjoins that the wife of the dead man shall not be "without" to a stranger, but that the brother should marry her: they, however, taking החוצה (=לחוץ) to be an epithet of אשת, "wife,"

translated "the *outer wife*," i. e. the *betrothed* only (*Jer. Jebam.* 8, 2, *Ber. R.*, etc.).

Down to within the last two hundred and fifty years, however, no copy of this divergent Code of Laws had reached Europe, and it began to be pronounced a fiction, and the plain words of the Church Fathers — the better known authorities — who quoted it, were subjected to subtle interpretations. Suddenly, in 1616, Pietro della Valle, one of the first discoverers also of the Cuneiform inscriptions, acquired a complete Codex from the Samaritans in Damascus. In 1623 it was presented by Achille Harley de Sancy to the Library of the Oratory in Paris, and in 1628 there appeared a brief description of it by J. Morinus in his preface to the Roman text of the LXX. Three years later, shortly before it was published in the Paris Polyglott, — whence it was copied, with few emendations from other codices, by Walton, — Morinus, the first editor, wrote his *Exercitationes Ecclesiasticæ in utrumque Samaritanorum Pentateuchum*, in which he pronounced the newly found Codex, with all its innumerable Variants from the Masoretic text, to be infinitely superior to the latter: in fact, the unconditional and speedy emendation of the Received Text thereby was urged most authoritatively. And now the impulse was given to one of the fiercest and most barren literary and theological controversies: of which more anon. Between 1620 and 1630 six additional copies, partly complete, partly incomplete, were acquired by Ussher: five of which he deposited in English libraries, while one was sent to De Dieu, and has disappeared mysteriously. Another Codex, now in the Ambrosian Library at Milan, was brought to Italy in 1621. Peiresc procured two more, one of which was placed in the Royal Library of Paris, and one in the Barberini at Rome. Thus the number of MSS. in Europe gradually grew to sixteen During the present century another, but very fragmentary copy, was acquired by the Gotha Library A copy of the entire (?) Pentateuch, with Targum (? Sam. Version), in parallel columns, 4to, on parchment, was brought from *Nâblus* by Mr. Grove in 1861 for the Count of Paris, in whose library it is. Single portions of the Sam. Pent., in a more or less defective state, are now of no rare occurrence in Europe.

Respecting the external condition of these MSS., it may be observed that their sizes vary from 12mo to folio, and that no scroll, such as the Jews and the Samaritans use in their synagogues, is to be found among them. The letters, which are of a size corresponding to that of the book, exhibit none of those varieties of shape so frequent in the Masor. Text; such as majuscules, minuscules, suspended, inverted letters, etc. Their material is vellum or cotton-paper; the ink used is black in all cases save the scroll used by the Samaritans at *Nâblus*, the letters of which are in gold. There are neither vowels, accents, nor diacritical points The individual words are separated from each other by a dot. Greater or smaller divisions of the text are marked by two dots placed one above the other and by an asterisk. A small line above a consonant indicates a peculiar meaning of the word, a unusual form, a passive, and the like: it is, in fact a contrivance to bespeak attention.[a] The whole Pentateuch is divided into nine hundred and sixty four paragraphs, or *Kazzin*, the termination of which is indicated by these figures, =, .·., or ⁘ At the end of each book the number of its divisions is stated thus: —

| | | | | | | | | | | | | |
|---|---|---|---|---|---|---|---|---|---|---|---|---|
| (250) | קצין מארים וג | : | הזה ספר הראשון | | | [ | Masoret. Cod. 12 Sidras (Parshioth), 50 Chapters | | | | | |
| (200) | מארים | " | חשני | " | " | [ | " | 11 | " | 40 | " | |
| (180) | מאח ושלושים | " | חשלישי | " | " | [ | " | 10 | " | 27 | " | |
| (218) | ר · ויח | " | חרביעי | " | " | [ | " | 10 | " | 36 | " | |
| (166) | ק · וסו | " | החמישי | " | " | [ | " | 11 | " | 34 | " | |

The Sam. Pentateuch is halved in Lev. vii. 15 (viii. 8, in Hebrew Text), where the words "Middle of the Thorah"[b] are found. At the end of each MS. the year of the copying, the name of the scribe, and also that of the proprietor, are usually stated. Yet their dates are not always trustworthy when given, and very difficult to be conjectured when entirely omitted, since the Samaritan letters afford no internal evidence of the period in which they were written. To none of the MSS., however, which have as yet reached Europe, can be assigned a higher date than the 10th Christian century. The scroll used in *Nâblus* bears — so the Samaritans pretend — the following inscription: "I, Abisha, son of Pinehas, son of Eleazar, son of Aaron Priest, — upon them be the Grace of Jehovah! his honor have I written this Holy Law at the trance of the Tabernacle of Testimony on Mount Gerizim, Beth El, in the thirteenth yea the taking possession of the Land of Canaan, all its boundaries around it, by the Children o rael. I praise Jehovah." (Letter of Meshah b. Ab Sechuah, Cod. 19,791, Add. MSS. Brit. M Comp. *Epist. Sam. Sichemitarum ad Jobum dolphum*, Cizæ, 1688; *Antiq. Eccl. Orient.* p. Huntingtoni *Epist.* pp. 49, 56: Eichhorn's *Re torium f. bibl. und morg. Lit.*, tom. ix., etc.) no European[c] has ever succeeded in finding

this scroll, however great the pains bestowed upon the search (comp. Eichhorn, *Einleit.* ii. 132); and even if it had been found, it would not have deserved the slightest credence.

We have briefly stated above that the *Exercitationes* of Morinus, which placed the Samaritan Pentateuch far above the Received Text in point of genuineness, — partly on account of its agreeing in many places with the LXX., and partly on account of its superior "lucidity and harmony," — excited and kept up for nearly two hundred years one of the most extraordinary controversies on record. Characteristically enough, however, this was set at rest once for all by the very first systematic investigation of the point at issue. It would now appear as if the unquestioning rapture with which every new literary discovery was formerly hailed, the innate animosity against the Masoretic (Jewish) Text, the general preference for the LXX., the defective state of Semitic studies, — as if, we say, all these put together were not sufficient to account for the phenomenon that men of any critical acumen could for one moment not only place the Sam. Pent. on a par with the Masoretic Text, but even raise it, unconditionally, far above it. There was indeed another cause at work, especially in the first period of the dispute: it was a controversial spirit which prompted Morinus and his followers, Cappellus and others, to prove to the Reformers what kind of value was to be attached to *their* authority: the received form of the Bible, upon which and which alone they professed to take their stand; — it was now evident that nothing short of the Divine Spirit, under the influence and inspiration of which the Scriptures were interpreted and expounded by the Roman Church, could be relied upon. On the other hand, most of the "*Antimorinians*" — De Muys, Hottinger, St. Morinus, Buxtorf, Fuller, Leusden, Pfeiffer, etc. — instead of patiently and critically examining the subject and refuting their adversaries by arguments which were within their reach, as they are within ours, directed their attacks against the persons of the Morinians, and thus their misguided zeal left the question of the superiority of the new document over the old where they found it. Of higher value were, it is true, the labors of Simon, Le Clerc, Walton, etc., at a later period, who proceeded eclectically, rejecting many readings, and adopting others which seemed preferable to those of the old text. Houbigant, however, with unexampled ignorance and obstinacy, returned to Morinus's first notion — already generally abandoned — of the unquestionable and thorough superiority. He, again, was followed more or less closely by Kennicott, Al. a St. Aquilino, Lobstein, Geddes, and others. The discussion was taken up once more on the other side, chiefly by Ravius, who succeeded in finally disposing of this point of the superiority (*Exercitt. Phil. in Houbig. Prol.* Lugd. Bat. 1755). It was from his day forward allowed, almost on all hands, that the Masoretic Text was the genuine one, but that in doubtful cases, when the Samaritan had an "unquestionably clearer" reading, this was to be adopted, since a certain amount of value, however limited, did attach to it. Michaelis, Eichhorn, Bertholdt, Jahn, and the majority of modern critics, adhered to this opinion. Here the matter rested until 1815, when Gesenius (*De Pent. Sam. Origine, Indole, et Auctoritate*) abolished the remnant of the authority of the Sam. Pent. So masterly, lucid, and clear are his arguments and his proofs, that there has been and will be no further question as to the absence of all value in this Recension, and in its pretended emendations. In fact, a glance at the systematic arrangement of the variants, of which he first of all bethought himself, is quite sufficient to convince the reader at once that they are for the most part mere blunders, arising from an imperfect knowledge of the first elements of grammar and exegesis. That others owe their existence to a studied design of conforming certain passages to the Samaritan mode of thought, speech, and faith — more especially to show that the Mount Gerizim, upon which their temple stood, was *the* spot chosen and indicated by God to Moses as the one upon which He desired to be worshipped.[a] Finally, that others are due to a tendency towards removing, as well as linguistic shortcomings would allow, all that seemed obscure or in any way doubtful, and towards filling up all apparent imperfections: either by repetitions or by means of newly-invented and badly-fitting words and phrases. It must, however, be premised that except two alterations (Ex. xiii. 7, where the Sam reads "*Six* days shalt thou eat unleavened bread," instead of the received "*Seven* days," and the change of the word הַחֲזִיק, "There shall not *be*," into הַחֲזִיק, "*live*," Deut. xxiii. 18), the Mosaic laws and ordinances themselves are nowhere tampered with.

We will now proceed to lay specimens of these once so highly prized variants before the reader, in order that he may judge for himself. We shall follow in this the commonly received arrangement of Gesenius, who divides all these readings into eight classes; to which, as we shall afterwards show, Frankel has suggested the addition of two or three others, while Kirchheim (in his Hebrew work כרמי שומרון) enumerates thirteen,[b] which we will name hereafter.

1. The *first* class, then, consists of readings by which emendations of a grammatical nature have been attempted.

(*a.*) The quiescent letters, or so-called *matres lectionis*, are supplied.[c]

(*b.*) The more poetical forms of the pronouns, probably less known to the Sam. are altered into the more common ones.[d]

---

[a] For יִבְחַר, "He *will* elect" (the spot), the Sam. always puts בָּחַר, "He *has* elected" (namely, Gerizim). See below.

[b] יב׳ שערים must be a misprint.

[c] Thus יָם is found in the Samar. for ם־ in the Masoretic T.; וֹת for ־וֹת; יָו for ־וֹ; אליהם for אֲלֵיהֶם; מאורות for מְאֹרֹת etc.: sometimes a ו is put even where the Heb. T. has, in accordance with the grammatical rules, only a short vowel or a sheva: חופניו is found for חָפְנָיו, אוניות for אֳנִיּוֹת.

[d] חמה, בחנו, חם, חָאַל, become אנחנו, חמה דאלה

(*c.*) The same propensity for completing apparently incomplete forms is noticeable in the flexion of the verbs. The apocopated or short future is altered into the regular future.[a]

(*d.*) On the other hand the paragogical letters ו and י at the end of nouns, are almost universally struck out by the Sam. corrector;[b] and, in the ignorance of the existence of nouns of a common gender, he has given them genders according to his fancy.[c]

(*e.*) The infin. absol. is, in the quaintest manner possible, reduced to the form of the finite verb.[d]

For obsolete or rare forms, the modern and more common ones have been substituted in a great number of places.[e]

2. The *second* class of variants consists of glosses and interpretations received into the text: glosses, moreover, in which the Sam. not unfrequently coincides with the LXX., and which are in many cases evidently derived by both from some ancient Targum.[f]

3. The *third* class exhibits conjectural emendations — sometimes far from happy — of real or imaginary difficulties in the Masoretic Text.[g]

4. The *fourth* class exhibits readings in which apparent deficiencies have been corrected or sup-

---

[a] וַתִּגַּד becomes ותניד; וימת is emendated into וימות; יִרְאֶה (verb ל"ה) into יראה; the final ן of the 3d pers. fem. plur. fut. into הָ.

[b] שוכני is shortened into שוכן, חיתו into חית.

[c] Masculine are made the words לחם (Gen. xlix. 20), שער (Deut. xv. 7, etc.), מחנה (Gen. xxxii. 9); feminine the words ארץ (Gen. xiii. 6), דרך (Deut. xxviii. 25), נפש (Gen. xlvi. 25, etc.); wherever the word נער occurs in the sense of "girl," a ה is added at the end (Gen. xxiv. 14, etc.).

[d] וישובו חלוך ושוב, "the waters returned *continually*," is transformed into וישובו הלכו ושבו, "they returned, they went and they returned" (Gen. viii. 3). Where the infin. is used as an adverb, *e. g.* הרחק (Gen. xxi. 16), "far off," it is altered into הרחיקה, "she went far away," which renders the passage almost unintelligible.

[e] עירם for עירם (Gen. iii. 10, 11); ילד for צפור ולד (xl. 30); צפורים for the collective צפור (xv. 10); אמות, "female servants," for אמהות (xx. 17); ויראו מנוחה כי טובה for the adverbial טוב (xlix. 15); בריחי for בריחים (Ex. xxvi. 26, making it depend from עצי); מֶשֶׁם, in the unusual sense of "from it" (comp. 1 K. xvii. 13), is altered into מִמֶּנָּה (Lev. ii. 2); חיח

[f] wrongly put for חי (3d p. s. m. of חיו = חֵי); עו, the obsolete form, is replaced by the more recent עיו (Num. xxi. 15); the unusual fem. termination ־ִי (comp. אביגיל (אביטל, is elongated into ־ִית; שהו is the emendation for שִׁיו (Deut. xxi. 1); הדרי for חַדְרֵי (Deut. xxxiii. 15), etc.

[g] איש ואשה, "man and woman," used by Gen. vii. 2 of animals, is changed into זכר ונקבה, "male and female;" שׂנאיו (Gen. xxiv. 60), "his haters," becomes אויביו, "his enemies;" for מה (indefin.) is substituted מאומה; ירא, "he will see, choose," is amplified by a לו, "for himself;" הנר אשר ינור חַגָּר is transformed into וַיִּקָּר אלה׳ אל בלעם (Lev. xvii. 10); (Num. xxiii. 4), "And God met Bileam," becomes with the Sam. ויומצא מלאך אל׳ את ב׳, "and *an Angel of the Lord found* Bileam;" על דאשת (Gen. xx. 3), "for the woman," is amplified into על אודת דאשה, "for the sake of the woman;" for ולנכרי, from נכד (obsol., comp. נכא), is put לנגדי, "those that are before me," in contradistinction to "those who will come after me;" וַתְּעַר, "and she emptied" (her pitcher into the trough, Gen. xxiv. 20), has made room for ותוריד, "and she took down;" נועדתי שמה, "I will meet there" (A. V., Ex. xxix. 43), is made בדרשתי שם, "I shall be [searched] found there;" Num. xxxi. 15, before the words החייתם כל נקבה, "Have you spared the life of every female?" a לָמָּה, "Why," is inserted (LXX.); for כי שם יהוה אקרא (Deut. xxxii. 3), "If I call the name of Jehovah," the Sam. has בשם, "In the name," etc.

[h] The elliptic use of ילד, frequent both in Hebrew and Arabic, being evidently unknown to the emendator, he alters the הלבן מאה שנה יִוָּלֵד (Gen. xvii. 17), "shall *a child* be born unto him that is a hundred years old?" into האליד, "shall I beget?" Gen. xxiv. 62, בא מבוא, "he came from going" (A. V. "from the way") to the well of Lahai-roi, the Sam. alters into בא במדבר, "in or through the desert" (LXX., διὰ τῆς ἐρήμου). In Gen. xxx. 34, הן לו יהי כדבריך, "Behold, may it be according to thy word," the לו (Arab. لو) is transformed into לא, "and if not — let it be like thy word." Gen. xli. 32, וְעַל חֲשָׁנוֹת החלום, "And for that the dream was doubled," becomes ועלה שנית ח׳, "The dream rose a second time," which is both un-Hebrew, and diametrically opposed to the sense and construction of the passage. Better is the emendation Gen. xlix. 10, סָגִין

Digitized by Google

ased from parallel passages in the commot. text. Gen. xviii. 29, 30, for "I shall not do it, [a] "I shall not destroy," [b] is substituted from Gen. xviii. 26, 31, 32. Gen. xxxvii. 4, אחיו, "his brethren," is replaced by בניו, "his sons," from the former verse. One of the most curious specimens of the endeavors of the Samaritan Codex to render the readings as smooth and consistent as possible, is its uniform spelling of proper nouns like יתרו, Jethro, occasionally spelt יתר in the Hebrew text, Moses' father-in-law — a man who, according to the Midrash (*Sifri*), had no less than *seven* names; יהושע (Jehoshua), into which form it corrects the shorter הושע (Hoshea) when it occurs in the Masoretic Codex. More frequent still are the additions of single words and short phrases inserted from parallel passages where the Hebrew text appeared too concise: [c] — unnecessary, often excessively absurd interpolations.

5. The *fifth* class is an extension of the one immediately preceding, and comprises larger phrases, additions, and repetitions from parallel passages. Whenever anything is mentioned as having been done or said previously by Moses, or where a command of God is related as being executed, the whole speech bearing upon it is repeated again at full length. These tedious and always superfluous repetitions are most frequent in Exodus, both in the record of the plagues and in the many interpolations from Deuteronomy.

6. To the *sixth* class belong those "emendations" of passages and words of the Hebrew text which contain something objectionable in the eyes of the Samaritans, on account either of historical improbability or apparent want of dignity in the terms applied to the Creator. Thus in the Sam. Pent. no one in the antediluvian times begets his first son after he has lived 150 years: but one hundred years are, where necessary, subtracted before, and added after the birth of the first son. Thus Jared, according to the Hebrew Text, begat at 162 years, lived afterwards 800 years, and "all his years were 962 years;" according to the Sam. he begot when only 62 years old, lived afterwards 785 years, "and all his years were 847." After the Deluge the opposite method is followed. A hundred or fifty years are added before and subtracted after the begetting: *e. g.* Arphaxad, who in the Common Text is 35 years old when he begets Shelah, and lived afterwards 403 years: in all 438 — is by the Sam. made 135 years old when he begets Shelah, and lives only 303 years afterwards = 438. (The LXX. has, according to its own peculiar psychological and chronological notions, altered the Text in the opposite manner. [See SEPTUAGINT.]) An exceedingly important and often discussed emendation of this class is the passage in Ex. xii. 40, which in our text reads, "Now the sojourning of the children of Israel who dwelt in Egypt was four hundred and thirty years." The Samaritan (supported by LXX. Cod. Al.) has "the sojourning of the children of Israel [*and their fathers who dwelt in the land of Canaan and in the land of Egypt* — ἐν γῇ Αἰγύπτῳ καὶ ἐν γῇ Χαναάν] was four hundred and thirty years:" an interpolation of very late date indeed.

---

מבין דגליו, "from between his feet," into "from among his banners," Ex. xv. 18, all but five of the Sam. Codd. read לעולם ועוד, "*for ever and longer*," instead of ועד, the common form, "evermore." Ex. xxxiv. 7, וְנַקֵּה לֹא יְנַקֶּה, "that will by no means clear *the sin*," becomes וְנַקֵּה לו יְנַקֶּה, "and the innocent *to sin* shall be innocent," against both the parallel passages and the obvious sense. The somewhat difficult ולא יָסְפוּ, "and they did not cease" (A. V., Num. xi. 25), reappears as a still more obscure conjectural יאכפו, which we would venture to translate, "they were not gathered in," in the sense of "killed": instead of either the אכנשו, "congregated," of the Sam. Vers., or Castell's "continuerunt," or Houbigant's and Dathe's "convenerant." Num. xxi. 28, the עָר, "Ar" (Moab), is emendated into עד, "as far as," a perfectly meaningless reading; only that the עָר, "city," as we saw above, was a word unknown to the Sam. The somewhat uncommon words (Num. xi. 32), וישטחו להם שטוח, "and they (the people) spread them all abroad," are transposed into וישחטו להם שחוטי, "and they slaughtered for themselves a slaughter." Deut. xxviii. 37. he used לְשַׁמָּה, "an astonishment" (A. V.), very rarely used in this sense (Jer. xix. 8, xxv. 9), becomes לְשֵׁם, "to a name," *i. e.* a bad name. Deut. xxxiii. 6, ויהי מתיו מספר, "May his *men* be a multitude," the Sam., with its characteristic aversion to, or rather ignorance of, the use of poetical diction, reads ויהי מאתו מספר, "May there be *from him* a multitude," thereby trying perhaps to encounter also the apparent difficulty of the word מספר, standing for "a great number." Anything more absurd than the מארו in this place could hardly be imagined A few verses further on, the uncommon use of מִן in the phrase מִן יְקוּמוּן (Deut. xxxiii. 11), as "lest," "not," caused the no less unfortunate alteration מִי יְקִימֻנּוּ, so that the latter part of the passage, "smite through the loins of them that rise against him, and of them that hate him, *that they rise not again*," becomes "*who will raise them?*" — barren alike of meaning and of poetry. For the unusual and poetical דָּבְאֵךְ (Deut. xxxiii. 25; A. V. "thy strength"), דביך is suggested; a word about the significance of which the commentators are at a greater loss even than about that of the original.

[a] לא אעשה. [b] לא אשחית.

[c] Thus in Gen. i. 15, the words לזהיר על הארץ, "to give light upon the earth," are inserted from ver. 17; Gen. xi. 8, the word וּמִגְדָּל, "and a tower," is added from ver. 4; Gen. xxiv. 22, על אפה, "on her face" (nose), is added from ver. 47, so that the former verse reads "And the man took (וישם for ויקח) a golden ring 'upon her face.'"

Digitized by Google

Again, in Gen. ii. 2, "And God [? had] finished (ויכל, ? pluperf.) on the seventh day," השביעי is altered into ששי, "the *sixth*," lest God's rest on the Sabbath-day might seem incomplete (LXX.). In Gen. xxix. 3, 8, "We cannot, until all the flocks be gathered together, and till they roll the stone from the mouth of the well," עדרים, "flocks," is replaced by רועים, "shepherds," since the flocks *could* not roll the stone from the well: the corrector not being apparently aware that in common parlance in Hebrew, as in other languages, "they" occasionally refers to certain not particularly specified persons. Well may Gesenius ask what this corrector would have made of Is. xxxvii. [not xxxvi.] 36: "And when *they* arose in the morning, behold *they* were all dead corpses." The surpassing reverence of the Samaritan is shown in passages like Ex. xxiv. 10, "and they beheld God," [a] which is transmuted into "and they held by, clung to, God" [b] — a reading certainly less in harmony with the following — "and they ate and drank."

7. The *seventh* class comprises what we might briefly call Samaritanisms, *i. e.* certain Hebrew forms translated into the idiomatic Samaritan; and here the Sam. Codices vary considerably among themselves, — as far as the very imperfect collation of them has hitherto shown — some having retained the Hebrew in many places where the others have adopted the new equivalents.[c]

8. The *eighth* and last class contains alterations made in favor or on behalf of Samaritan theology, hermeneutics and domestic worship. Thus the word *Elohim*, four times construed with the plura. verb in the Hebrew Pentateuch, is in the Samaritan Pent. joined to the singular verb (Gen. xx. 13, xxxi. 53, xxxv. 7; Ex. xxii. 9); and further, both anthropomorphisms as well as anthropopathisms are carefully expunged — a practice very common in later times.[d] The last and perhaps the most momentous of all intentional alterations is the constant change of all the יִבְחַר, "God will choose a spot," into בחר, "He has chosen," namely, Gerizim, and the well known substitution of Gerizim for Ebal in Deut. xxvii. 4: "It shall be when ye be gone over Jordan, that ye shall set

---

[a] ויחזו את אלהים. [b] ויאחזו.

[c] The gutturals and *Ahevi*-letters are frequently changed: — הרחם becomes אחרם (Gen. viii. 4); באי is altered into בעי (xxiii. 18); שבה into שבע (xxvii. 19); זחלי stands for זחלי (Deut. xxxii. 24); the ה is changed into ח in words like נהג גבחים, which become נחג, גבחים; ח is altered into ע — חמר becomes עמר. The י is frequently doubled (? as a mater lectionis): חייטיב is substituted for חיטיב; איירא for אירא; פיי for פי. Many words are joined together: — מרדרור stands for מר דרור (Ex. xxx. 23); כהנאן for כהן אן (Gen. xli. 45); חר גריזים is always הרגריזים. The pronouns אַתְּ and אַתֶּן, 2d p. fem. sing. and plur., are changed into ארתי, ארתין (the obsolete Heb. forms) respectively; the suff. ךָ into אך; ךָ into יך; the termination of the 2d p. s. fem. pret. תְּ, becomes תי, like the first p.; the verbal form Aphel is used for the Hiphil; אזכרתי for הזכרתי; the medial letter of the verb ע"ו is sometimes retained as א or י, instead of being dropped as in the Heb. Again, verbs of the form ל"ה have the י frequently at the end of the infin. fut. and part., instead of the ה. Nouns of the *schema* קָטֶל (אָבֶל, etc.) are often spelt קָטִיל, into which the form קָטוֹל is likewise occasionally transformed. Of distinctly Samaritan words may be mentioned: חד (Gen xxxiv. 31) = אֵיךְ, חֵיךְ (Chald.) "like;" חתים, for Heb. חותם, "seal;" פלרחת, "as though it budded," becomes כאפרחת = Targ. חכם כד אפרחת; חכם, "wise," reads חכום; עד, "spoil," עדי; יָמוֹת, "days," יומת.

[d] איש מלחמה, "man of war," an expression used of God (Ex. xv. 3), becomes גבור מ', "hero of war," the former apparently of irreverent import to the Samaritan ear; for יעשן אף ה' (Deut. xxix. 19. A. V. 20), lit. "And the wrath (nose) of the Lord shall smoke," יחר אף ה', "the wrath of the Lord will be kindled," is substituted; צור מחוללך (Deut. xxxii. 18), "the rock (God) which begat thee," is changed into צור מהללך, "the rock which glorifies thee;" Gen. xix. 12, האנשים, "the men," used of "the angels," has been replaced by המלאכים, "the angels." Extreme reverence for the patriarchs changed ארור, "Cursed be their (Simeon and Levi's) anger," into אדיר, "brilliant is their anger" (Gen. xlix. 7). A flagrant falsification is the alteration, in an opposite sense, which they ventured in the passage ידיד ה' ישכן לבטח, "The beloved of God [Benjamin, the founder of the Judaeo-Davidian empire, hateful to the Samaritans] shall dwell securely," transformed by them into the almost senseless יד יד ה' ישכן לבטח, "*The hand, the hand* of God will rest [If Hiph.: יַשְׁכֵּן, 'will cause to rest'] securely" (Deut. xxxiii. 12). Reverence for the Law and the Sacred Records gives rise to more emendations: — במבשיו (Deut. xxv. 12, A. V. 11), "by his secrets," becomes בבשרו, "by his flesh;" ישנלה "coibit cum ea;" (Deut. xxviii. 30), ישכב עמה "concumbet cum ea;" לכלב תשליכון, "to the dog shall ye throw it" (Ex. xxii. 30) (A. V. 31) השלך תשל', "ye shall indeed throw [away]."

Digitized by Google

up these stones which I command you this day on Mount Ebal (Sam. *Gerisim*), and there shalt thou build an altar unto the Lord thy God," etc. This passage gains a certain interest from Whiston and Kennicott having charged the *Jews* with corrupting it from Gerizim into Ebal. This supposition, however, was met by Rutherford, Parry, Tychsen, Lobstein, Verschuir, and others, and we need only add that it is completely given up by modern Biblical scholars, although it cannot be denied that there is some *primâ facie* ground for a doubt upon the subject. To this class also belong more especially interpolations of really existing passages, dragged out of their context for a special purpose. In Exodus as well as in Deuteronomy the Sam. has, immediately after the Ten Commandments, the following insertions from Deut. xxvii. 2–7 and xi. 30: "And it shall be on the day when ye shall pass over Jordan . . . ye shall set up these stones . . . on Mount *Gerisim* . . . and there shalt thou build an altar . . . '*That mountain*' on the other side Jordan by the way where the sun goeth down . . . in the champaign over against Gilgal, beside the plains of Moreh, *over against Shechem:*' " — this last superfluous addition, which is also found in Deut. xi. 30 of the Sam. Pent., being ridiculed in the Talmud, as we have seen above.

From the immense number of these worse than worthless variants Gesenius has singled out four, which he thinks preferable on the whole to those of the Masoretic Text. We will confine ourselves to mentioning them, and refer the reader to the recent commentaries upon them: he will find that they too have since been, all but unanimously, rejected.[a] (1.) After the words, "And Cain spoke (ויאמר) to his brother Abel" (Gen. iv. 8), the Sam. adds, "let us go into the field,"[b] in ignorance of the absolute use of אמר, "to say, speak" (comp. Ex. xix. 25; 2 Chr. ii. 10 (A. V. 11)), and the absol. ויבך (Gen. ix. 22). (2.) For אחר (Gen. xxii. 13) the Sam. reads אחד, *i. e.* instead of "behind him a ram," "*one* ram." (3.) For חמור גרם (Gen. xlix. 14), "an ass of bone," *i. e.* a strong ass, the Sam. has חמור גרים (Targ. גְּרֵם, Syr. ). And (4.) for וירק (Gen. xiv. 14), "he led forth his trained servants," the Sam. reads וידד, "he numbered."

We must briefly state, in concluding this portion of the subject, that we did not choose this classification of Gesenius because it appeared to us to be either systematic (Gesenius says himself: "Ceterum facile perspicitur complures in his esse lectiones quarum singulas alius ad aliud genus referre forsitan malit . . . . in una vel altera lectione ad aliam classem referenda haud difficiles erimus . . . . ") or exhaustive, or even because the illustrations themselves are unassailable in point of the reason he assigns for them; but because, deficient as it is, it has at once and forever silenced the utterly unfounded though time-hallowed claims of the Samaritan Pentateuch. It was only necessary, as we said before, to collect a great number of variations (or to take them from Walton), to compare them with the old text and with each other, to place them in some kind of order before the reader and let them tell their own tale. That this was not done during the two hundred years of the contest by a single one of the combatants is certainly rather strange: albeit not the only instance of the kind.

Important additions to this list have, as we hinted before, been made by Frankel, such as the Samaritans' preference of the imperat. for the 3d pers.;[c] ignorance of the use of the abl. absol.;[d] Galileanisms, — to which also belongs the permutation of the letters *Ahevi*[e] (comp. *Erub.* p. 53, עמר, אמר, חמר), in the Samaritan Cod.; the occasional softening down of the פ into ב, of כ into ג, צ into ז, etc., and chiefly the presence of words and phrases in the Sam. which are *not* interpolated from parallel passages, but are entirely wanting in our text.[f] Frankel derives from these passages chiefly the conclusion that the Sam. Pent. was, partly at least, emendated from the LXX., Onkelos, and other very late sources. (See below.)

We now subjoin, for the sake of completeness, the beforementioned thirteen classes of Kirchheim, in the original, to which we have added the translation: —

1. תוספות ושנויים למעלת הר גריזים [Additions and alterations in the Samaritan Pentateuch in favor of Mount Gerizim.]

2. תוספות למלאות. [Additions for the purpose of completion.]

3. באור. [Commentary, glosses.]

4. חלוף חפעלים וחביניים. [Change of verbs and moods.]

---

[a] Keil, in the latest edition of his *Introd.*, p. 590, note 7, says, "Even the few variants, which Gesenius tries to prove genuine, fall to the ground on closer examination."

[b] גלכה השדה.

[c] *E. g.* יקרב for הקרב (Ex. xii. 48); יבא for ועשה (Ex. xxxv. 10).

[d] *E. g.* זכור for זכוד (Ex. xiii. 12); רגמו for רגום (Num. xv. 35).

[e] *E. g.* והרף for והרף (Gen. viii. 22); חוץ for עוץ (Gen. xxxvi. 28); השחף for השאף (Lev. xi. 16), &c.

[f] וידחפש for ויחבש (Gen. xxxi. 35); נשבת for נשפת (Ex. xv. 10).

[g] Gen. xxiii. 2, after בקרית הארבע the words אל עמק are added; xxvii. 27, after חשדה the word מלא is found (LXX.); xliii. 28, the phrase ברוך האיש ההוא לאלהים is inserted after the Ethnach; xlvii. 21, העביד לעבדים, and Ex. xxxv. 33, אם תשא תמא תם שא is read. An exceedingly difficult and un-Hebrew passage is found in Ex. xxiii. 19, reading כי עשה זאת כזבח שכח וטירדה הוא לאלהי יעקב.

Digitized by Google

5. חלוף השמות. [Change of nouns.]

6. הש אה. [Emendation of seeming irregularities by assimilating forms, etc.]

7. המורת האותיות. [Permutation of letters.]

8. כנויים. [Pronouns.]

9. מין. [Gender.]

10. אותיות הנוספות. [Letters added.]

11. אותיות החסר. [Addition of prepositions, conjunctions, articles, etc.]

12. קבוץ ופירוד. [Junction of separated, and separation of joined words.]

13. ימות עולם. [Chronological alterations.]

It may, perhaps, not be quite superfluous to observe, before we proceed any further, that, since up to this moment no critical edition of the Sam. Pent., or even an examination of the Codices since Kennicott — who can only be said to have begun the work — has been thought of, the treatment of the whole subject remains a most precarious task, and beset with unexampled difficulties at every step; and also that, under these circumstances, a more or less scientific arrangement of isolated or common Samaritan mistakes and falsifications appears to us to be a subject of very small consequence indeed.

It is, however, this same rudimentary state of investigation — after two centuries and a half of fierce discussion — which has left the other and much more important question of the *Age and Origin* of the Sam. Pent. as unsettled to-day as it was when it first came under the notice of European scholars. For our own part we cannot but think that as long as (1) the history of the Samaritans remains involved in the obscurities of which a former article will have given an account; (2) we are restricted to a small number of comparatively recent Codices; (3) neither these Codices themselves have, as has just been observed, been thoroughly collated and recollated, nor (4) more than a feeble beginning has been made with anything like a collation between the various readings of the Sam. Pent. and the LXX. (Walton omitted the greatest number, "cum nullam sensus varietatem constituant"); so long must we have a variety of the most divergent opinions, all based on "probabilities," which are designated on the other side as "false reasonings" and "individual crotchets," and which, moreover, not unfrequently start from flagrantly false premises.

We shall, under these circumstances, confine ourselves to a simple enumeration of the leading opinions, and the chief reasons and arguments alleged for and against them: —

(1.) The Samaritan Pentateuch came into the hands of the Samaritans as an inheritance from the ten tribes whom they succeeded — so the popular notion runs. Of this opinion are J. Morinus, Walton, Cappellus, Kennicott, Michaelis, Eichhorn, Bauer, Jahn, Bertholdt, Steudel, Maszde, Stuart, Davidson, and others. Their reasons for it may be thus briefly summed up: —

(*a.*) It seems improbable that the Samaritans should have accepted their code at the hands of the Jews after the exile, as supposed by some critics, since there existed an intense hatred between the two nationalities.

(*b.*) The Samaritan Canon has only the Pentateuch in common with the Hebrew Canon: had that book been received at a period when the Hagiographa and the Prophets were in the Jews' hands, it would be surprising if they had not also received those.

(*c.*) The Sam. letters, avowedly the more ancient, are found in the Sam. Cod.: therefore it was written before the alteration of the character into the square Hebrew — which dates from the end of the Exile — took place.

[We cannot omit briefly to draw attention here to a most keen-eyed suggestion of S. D. Luzzatto, contained in a letter to R. Kirchheim (*Carmi Shomron*, p. 106, &c.), by the adoption of which many readings in the Heb. Codex, now almost unintelligible, appear perfectly clear. He assumes that the copyist who at some time or other after Ezra transcribed the Bible into the modern square Hebrew character, from the ancient copies written in so-called Samaritan, occasionally mistook Samaritan letters of similar form.[a] And since our Sam. Pent. has those difficult readings in common with the Mas. Text, that other moot point, whether it was copied from a Hebrew or Samaritan Codex, would thus appear to be solved. Its constant changes of ר and ד, י and ו, ח and ה — letters which are similar in Hebrew, but *not* in Samaritan — have been long used as a powerful argument for the Samaritans having received the Pent. at a very late period indeed.]

Since the above opinion — that the Pent. came into the hands of the Samaritans from the Ten Tribes — is the most popular one, we will now adduce some of the chief reasons brought against it, and the reader will see by the somewhat feeble nature of the arguments on either side, that the last word has not yet been spoken in the matter.

(*a.*) There existed no *religious* animosity whatsoever between Judah and Israel when they separated. The ten tribes could not therefore have

---

[a] *E. g.* Is. xi. 15, בעים instead of בעצם adopted by Gesenius in *Thes.* p. 1017 *a*, without a mention of its source, which he, however, distinctly avowed to Rosenmüller — comp. כ"ש, p. 107, note א); Jer. iii. 8, ואראו instead of ותרא; 1 Sam. xxiv. 11, ותחס for ואחס; Esr. vi. 4, הדת for חדא; Ps. xxii. 20, והנחתני for והפחדתני; Judg xv. 20, עשרים — Samson's reign during the time of the Philistines being given as *twenty* years instead of *forty* (comp. *Jer. Sota*, 1), accounted for by the מ (numerical letter for forty) in the original being mistaken for כ (twenty). Again, 2 Chr. xxii 2, *forty* is put instead of *twenty* (comp. 2 K. viii. 26); 2 K. xxii. 4, ויהך for ויתם; Ex. iii. 12, בירך for ברום, etc.; all those letters — ם and ך, א and ל, ג and ל, ר and ת — resembling each other very closely.

Digitized by Google

bequeathed such an animosity to those who succeeded them, and who, we may add, probably cared as little originally for the disputes between Judah and Israel, as colonists from far-off countries, belonging to utterly different races, are likely to care for the quarrels of the aborigines who formerly inhabited the country. On the contrary, the contest between the slowly judaized Samaritans and the Jews only dates from the moment when the latter refused to recognise the claims of the former, of belonging to the people of God, and rejected their aid in building the Temple: why then, it is said, should they not first have received the one book which would bring them into still closer conformity with the returned exiles, at their hands? That the Jews should yet have refused to receive them as equals is no more surprising than that the Samaritans from that time forward took their stand upon this very Law — altered according to their circumstances; and proved from it that they and they alone were the Jews *κατ' ἐξοχήν*.

(*b.*) Their not possessing any other book of the Hebrew Canon is not to be accounted for by the circumstance that there was no other book in existence at the time of the schism, because many psalms of David, writings of Solomon, etc., must have been circulating among the people. But the jealousy with which the Samaritans regarded Jerusalem, and the intense hatred which they naturally conceived against the post-Mosaic writers of national Jewish history, would sufficiently account for their rejecting the other books, in all of which, save Joshua, Judges, and Job, either Jerusalem as the centre of worship, or David and his House, are extolled. If, however, Loewe has really found with them, as he reports in the *Allgem. Zeitung d. Judenth.* April 18th, 1839, our Book of Kings and Solomon's Song of Songs, — which they certainly would not have received subsequently, — all these arguments are perfectly gratuitous.

(*c.*) The present Hebrew character was *not* introduced by Ezra after the return from the Exile, but came into use at a much later period. The Samaritans might therefore have received the Pentateuch at the hands of the returned exiles, who, according to the Talmud, *afterwards* changed their writing, and in the Pentateuch only, so as to distinguish it from the Samaritan. "Originally," says Mar Sutra (*Sanhedr.* xxi. b), "the Pentateuch was given to Israel in *Ibri* writing and the Holy (Hebrew) language: it was again given to them in the days of Ezra in the *Ashurith* writing and *Aramaic* language. Israel then selected the Ashurith writing and the Holy language, and left to the Hediotes ('Ιδιῶται) the Ibri writing and the Aramaic language. Who are the Hediotes? The Cuthim (Samaritans). What is Ibri writing? The Libonasah (Samaritan)." It is well known also that the Maccabean coins bear Samaritan inscriptions: so that "Hediotes" would point to the common use of the Samaritan character for ordinary purposes, down to a very late period.

(2.) The second leading opinion on the age and origin of the Sam. Pent. is that it was introduced by Manasseh (comp. Josephus, *Ant.* xi. 8, §§ 2, 4, at the time of the foundation of the Samaritan Sanctuary on Mount Gerizim (Ant. van Dale, R. Simon, Prideaux, Fulda, Hasse, De Wette, Gesenius, Hupfeld, Hengstenberg, Keil etc.). In support of this opinion are alleged, the idolatry of the Samaritans before they received a Jewish priest through Esarhaddon (2 K. xvii. 24–33), and the immense number of readings common to the LXX. and this Code, against the Masoretic Text.

(3.) Other, but very isolated notions, are those of Morin, Le Clerc, Poncet, etc., that the Israelitish priest sent by the king of Assyria to instruct the new inhabitants in the religion of the country brought the Pentateuch with him. Further, that the Samaritan Pentateuch was the production of an impostor, Dositheus (דוסתאי in Talmud), who lived during the time of the Apostles, and who falsified the sacred records in order to prove that he was the Messiah (Ussher). Against which there is only this to be observed, that there is not the slightest alteration of such a nature to be found. Finally, that it is a very late and faulty recension, with additions and corruptions of the Masoretic Text (6th century after Christ), into which glosses from the LXX. had been received (Frankel). Many other suggestions have been made, but we cannot here dwell upon them: suffice it to have mentioned those to which a certain popularity and authority attaches.

Another question has been raised: Have all the variants which we find in our copies been introduced at once, or are they the work of many generations? From the number of vague opinions on that point, we have only room here to adduce that of Azariah de Rossi, who traces many of the glosses (Class 2) both in the Sam. and in the LXX. to an ancient Targum in the hands of the people at the time of Ezra, and refers to the Talmudical passage of *Nedar.* 37: "And he read in the Book of the Law of God — this is *Mikra*, the Pentateuch; מפורש, explanatory, this is *Targum*." [VERSIONS (TARGUM).] Considering that no Masorah fixed the letters and signs of the Samar. Codex, and that, as we have noticed, the principal object was to make it read as smoothly as possible, it is not easily seen why each succeeding century should not have added its own emendations. But here, too, investigation still wanders about in the mazes of speculation.

The chief opinions with respect to the agreement of the numerous and as yet uninvestigated — even uncounted — readings of the LXX. (of which likewise no critical edition exists as yet), and the Sam. Pent. are: —

1. That the LXX. have translated from the Sam. (De Dieu, Selden, Hottinger, Hassencamp, Eichhorn, etc.).

2. That mutual interpolations have taken place (Grotius, Ussher, Ravius, etc.).

3. That both Versions were formed from Hebrew Codices, which differed among themselves as well as from the one which afterwards obtained public authority in Palestine; that however very many willful corruptions and interpolations have crept in in later times (Gesenius).

4. That the Samar. has, in the main, been altered from the LXX. (Frankel).

It must, on the other hand, be stated also, that the Sam. and LXX. quite as often disagree with each other, and follow each the Masor. Text. Also, that the quotations in the N. T. from the LXX., where they coincide with the Sam. against the Hebr. Text, are so small in number and of so unimportant a nature that they cannot be adduced as any argument whatsoever.

The following is list of the MSS. of the Sam. Pent. now in European libraries [Kennicott]: —

Digitized by Google

No. 1. Oxford (Ussher) Bodl., fol., No. 3127. Perfect, except the first twenty and last nine verses.

No. 2. Oxford (Ussher) Bodl., 4to, No. 3128, with an Arabic version in Sam. characters. Imperfect. Wanting the whole of Leviticus and many portions of the other books.

No. 3. Oxford (Ussher) Bodl., 4to, No. 3129. Wanting many portions in each book.

No. 4. Oxford (Ussher, Laud) Bodl., 4to, No. 824. Defective in parts of Deut.

No. 5. Oxford (Marsh) Bodl., 12mo, No. 15. Wanting some verses in the beginning; 21 chapters obliterated.

No. 6. Oxford (Pocock) Bodl., 24mo, No. 5328. Parts of leaves lost; otherwise perfect.

No. 7. London (Ussher) Br. Mus. Claud. B. 8. Vellum. Complete. 254 leaves.

No. 8. Paris (Peiresc) Imp. Libr., Sam. No. 1. Recent MS., containing the Hebr. and Sam. Texts, with an Arab. Vers. in the Sam. character. Wanting the first 34 cc., and very defective in many places.

No. 9. Paris (Peiresc) Imp. Libr., Sam. No. 2. Ancient MS., wanting first 17 chapters of Gen.; and all Deut. from the 7th ch. Houbigant, however, quotes from Gen. x. 11 of this Codex, a rather puzzling circumstance.

No. 10. Paris (Harl. de Sancy) Oratory, No. 1. The famous MS. of P. della Valle.

No. 11. Paris (Dom. Nolin) Oratory, No. 2. Made-up copy.

No. 12. Paris (Libr. St. Genèv.). Of little value.

No. 13. Rome (Peir. and Barber.) Vatican, No. 106. Hebr. and Sam. texts, with Arab. Vers. in Sam. character. Very defective and recent. Dated the 7th century (?).

No. 14. Rome (Card. Cobellutius), Vatican. Also supposed to be of the 7th century, but very doubtful.

No. 15. Milan (Ambrosian Libr.). Said to be very ancient; not collated.

No. 16. Leyden (Golius MS.), fol., No. 1. Said to be complete.

No. 17. Gotha (Ducal Libr.). A fragment only.

No. 18. London, Count of Paris' Library. With Version.

Printed editions are contained in the Paris and Walton Polyglots; and a separate reprint from the latter was made by Blayney, Oxford, 1790. A Facsimile of the 20th ch. of Exodus, from one of he *Nâblus* MSS., has been edited, with portions of the corresponding Masoretic text, and a Russian Translation and Introduction, by Levysohn, Jerusalem, 1860.[a]

## II. Versions.

1. *Samaritan.* — The origin, author, and age of the Samaritan Version of the Five Books of Moses, has hitherto — so Eichhorn quaintly observes — 'always been a golden apple to the investigators, and will very probably remain so, until people leave off venturing decisive judgments upon historical subjects which no one has recorded in antiquity." And, indeed, modern investigators, keen as they have been, have done little towards the elucidation of the subject. According to the Samaritans themselves (De Sacy, *Mem.* 3; Paulus; Winer), their high-priest Nathaniel, who died about 20 B. C., is its author. Gesenius puts its date a few years after Christ. Juynboll thinks that it had long been in use in the second post-Christian century. Frankel places it in the post-Mohammedan time. Other investigators date it from the time of Esarhaddon's priest (Schwarz), or either shortly before or after the foundation of the temple on Mount Gerizim. It seems certain, however, that it was composed before the destruction of the second temple; and being intended, like the Targums, for the use of the people exclusively, it was written in the popular Samaritan idiom, a mixture of Hebrew, Aramaic, and Syriac.

In this version the original has been followed, with a very few exceptions, in a slavish and sometimes perfectly childish manner, the sense evidently being of minor consideration. As a very striking instance of this may be adduced the translation of Deut. iii. 9: "The Zidonians call Hermon שריון (Shirion), and the Amorites call it שניר (Shenir)." The translator deriving שריון from שר "prince, master," renders it רבן "masters;" and finding the letters reversed in the appellation of the Amorites as שניר, reverses also the *sense* in his version, and translates it by "slaves" משעבדון! In other cases, where no Samaritan equivalent could be found for a Hebrew word, the translator, instead of paraphrasing it, simply transposes its letters, so as to make it *look* Samaritan. Occasionally he is misled by the orthography of the original: אם כן אפוא, "If so, where . . .?" he renders אם כן ארגזה, "If so, I shall be wrath:" mistaking אפוא for אפו, from אף "anger." On the whole it may be considered a very valuable aid towards the study of the Samar. Text, on account of its very close verbal adherence. A few cases, however, may be brought forward, where the Version has departed from the Text, either under the influence of popular religious notions, or for the sake of explanation. "We pray" — so they write to Scaliger — "every day in the morning and in the evening, as it is said, the one lamb shalt thou prepare in the morning and the second in the evening; we bow to the ground and worship God." Accordingly, we find the translator rendering the passage, "And Isaac went to 'walk' (לשוח) in the field," by — "and Isaac went to pray (למצלאה) in the field." "And Abraham rose in the morning (בבוקר)," is rendered בצלי, "in the prayer," etc. Anthropomorphisms are avoided. "The image (תמונת) of God" is rendered נעימת, "the glory." פי יהוה "The mouth of Jehovah," is transformed into מימר יהוה, "the word of Jehovah." For

[a] The original intention of the Russian Government to publish the whole Codex in the same manner seems to have been given up for the present. We can only hope that, if the work is ever taken up again, it will fall into more competent hands. Mr. Levysohn's Introduction, brief as it is, shows him to be utterly wanting both in scholarship and in critical acumen, and to be, moreover, entirely unacquainted with the fact that his new discoveries have been disposed of some hundred and fifty years since.

Digitized by Google

אלהים, "God," מלאכיה, "Angel," is frequently found, etc. A great difficulty is offered by the proper names which this version often substitutes, they being, in many cases, less intelligible than the original ones.[a] The similarity it has with Onkelos occasionally amounts to complete identity, for instance —

| Onkelos in *Polyglott*. | Num. vi. 1, 2. | Sam. Vers. in *Barberini Triglott*. |
|---|---|---|
| ומלל יהוה עם מושה למימר: מלל עם בני ישראל ותימר להון גבר או אתתא ארי יפריש למדר נדר נזיר למזר קדם יהוה: מחמר חדת ועתיק יזר חל דחמר חדת וחל דחמר עתיק לא ישתי וכל מתרות ענבין לא ישתי ועבין רטיבין ויבישין לא ייכול. | ומלל יהוה עם מושה למימר: מלל עם בני ישראל ותימר להון גבר או אתה כד יפרש למדר נדר נזיר למרחנזרה ליהוה: מן חמר ורחט יזיר חמי דחמר וחמי דרחט לא ישתא וכל מור שורת ענבין לא ישתה וענבין רטיבין ויבישין לא ייכל. | ומלל יהוה עם מושה למימר: מלל עם בני ישראל ותימר להון גבר או אתה כד יפרש למדר נדר נזיר למרחנזרה ליהוה: מן חמר ורחט יזיר חמי דחמר וחמי דרחט לא ישתא וכל מור שורת ענבין לא ישתה וענבין רטיבין ויבישין לא ייכל. |

But no safe conclusion as to the respective relation of the two versions can be drawn from this.

This Version has likewise, in passing through the hands of copyists and commentators, suffered many interpolations and corruptions. The first copy of it was brought to Europe by De la Valle, together with the Sam. Text, in 1616. Joh. Nedrinus first published it together with a faulty Latin translation in the Paris Polyglott, whence it was, with a few emendations, reprinted in Walton, with some notes by Castellus. Single portions of it appeared in Hallc, ed. by Cellarius, 1706, and by Uhlemann, Leipz., 1837. Compare Gesenius, *De Pent. Sam. Origine*, etc., and Winer's monograph, *De Versionis Pent. Sam. Indole*, etc., Leipzig, 1817.

2. Τὸ Σαμαρειτικόν. The hatred between the Samaritans and the Jews is supposed to have caused the former to prepare a Greek translation of their Pent. in opposition to the LXX. of the Jews. In this way at least the existence of certain fragments of a Greek Version of the Sam. Pent., preserved in some MSS. of the LXX., together with portions of Aquila, Symmachus, Theodotion, etc., is accounted for. These fragments are supposed to be alluded to by the Greek Fathers under the name Σαμαρειτικόν. It is doubtful, however, whether it ever existed (as Gesenius, Winer, Juynboll, suppose) in the shape of a complete translation, or only designated (as Castellus, Voss, Herbst, hold) a certain number of scholia translated from the Sam. Version. Other critics again (Hävernick, Hengstenberg, etc.) see in it only a corrected edition of certain passages of the LXX.

3. In 1070 an *Arabic* Version of the Sam. Pent. was made by Abu Said in Egypt, on the basis of the Arabic translation of Saadjah haggaon. Like the original Samaritan it avoids anthropomorphisms and anthropopathisms, replacing the latter by euphemisms, besides occasionally making some slight alterations, more especially in proper nouns. It is extant in several MS. copies in European libraries, and is now in course of being edited by Kuenen, Leyden, 1850–54, &c. It appears to have been drawn up from the Sam. Text, not from the Sam. Version; the Hebrew words occasionally remaining unaltered in the translation.[b] Often also it renders the original differently from the

— 17, " Chinnereth, Genesar, גנסר.
iv. 48, " Sion, Tûr Telga, טור תלגא (Jebel et Telj).

[b] E. g. Ex. xiii. 12, כל פטר רחם (Sam. Ver. כל פתיחי רחם) remains נל פאטר: xxi. 3 בצל אשה (Sam. Ver מסחן אתה) is given بعل امراة.

Digitized by Google

Samar. Version.[a] Principally noticeable is its excessive dread of assigning to God anything like human attributes, physical or mental. For ידוה אלהים, "God," we find (as in Saadiah sometimes) ملاك الله, "the Angel of God;" for "the eyes of God" we have (Deut. xi. 12) ملاحظة الله, "the Beholding of God." For "Bread of God," لازم, "the necessary," etc. Again, it occasionally adds honorable epithets where the Scripture seems to have omitted them, etc. Its language is far from elegant or even correct; and its use must likewise be confined to the critical study of the Sam. Text.

4. To this Arabic version Abu Barachat, a Syrian, wrote in 1208 a somewhat paraphrastic commentary, which has by degrees come to be looked upon as a new Version — the *Syriac*, in contradistinction to the *Arabic*, and which is often confounded with it in the MSS. On both Recensions see Eichhorn, Gesenius, Juynboll, etc.

### III. Samaritan Literature.

It may perhaps not be superfluous to add here a concise account of the Samaritan literature in general, since to a certain degree it bears upon our subject.

1. *Chronicon Samaritanum.* — Of the Pentateuch and its Versions we have spoken. We have also mentioned that the Samaritans have no other book of our Received Canon. "There is no Prophet but Moses" is one of their chief dogmas, and fierce are the invectives in which they indulge against men like Samuel, "a Magician and an Infidel," كفر[b] (*Chron. Sam.*); Eli; Solomon, "Shiloh" (Gen. xlix. 10), "*i. e.* the man who shall spoil the Law and whom many nations will follow because of their own licentiousness" (De Sacy, *Mem.* 4); Ezra "cursed for ever" (*Lett. to Huntington*, etc.). Joshua alone, partly on account of his being an Ephraimite, partly because Shechem was selected by him as the scene of his solemn valedictory address, seems to have found favor in their eyes; but the *Book of Joshua*, which they perhaps possessed in its original form, gradually came to form only the groundwork of a fictitious national Samaritan history, overgrown with the most fantastic and anachronistic legends. This is the so-called "Samaritan Joshua," or *Chronicon Samaritanum* (سفر يهشع بن نون), sent to Scaliger by the Samaritans of Cairo in 1584. It was edited by Juynboll (Leyden, 1848), and his acute investigations have shown that it was redacted into its present form about A. D. 1300, out of four special documents, three of which were Arabic and one Hebrew (*i. e.* Samaritan). The Leyden MS. in 2 pts., which Gesenius, *De Sam. Theol.* p. 8, n. 18, thinks unique, is dated A. H. 764–919 (A. D. 1362–1513); — the Cod. in the Brit. Museum, lately acquired, dates A. H. 908 (A. D. 1502). The chronicle embraces the time from Joshua to about A. D. 350, and was originally written in, or subsequently translated into, Arabic. After eight chapters of introductory matter begins the early history of "Israel" under "*King* Joshua," who, among other deeds of arms, wages war, with 300,000 mounted men — "half Israel" — against two kings of Persia. The last of his five "royal" successors is Shimshon (Samson), the handsomest and most powerful of them all. These reigned for the space of 250 years, and were followed by five high-priests, the last of whom was Usi (? = Uzzi, Ex. vii. 4). With the history of Eli, "the seducer," which then follows, and Samuel "a sorcerer," the account, by a sudden transition, runs off to Nebuchadnezzar (ch. 45), Alexander (ch. 46), and Hadrian (47), and closes suddenly at the time of Julian the Apostate.

We shall only adduce here a single specimen out of the 45th ch. of the book, which treats of the subject of the Pentateuch: —

Nebuchadnezzar was king of Persia (Mossul), and conquered the whole world, also the kings of Syria. In the thirteenth year of their subjugation they rebelled, together with the kings of Jerusalem (Kodah). Whereupon the Samaritans, to escape from the vengeance of their pursuer, fled, and Persian colonists took their place. A curse, however, rested upon the land, and the new immigrants died from eating of its fruits (Joseph. *Ant.* ix. 14, §. 3). The chiefs of Israel (*i. e.* Samaritans), being asked the reason of this by the king, explained it by the abolition of the worship of God. The king upon this permitted them to return and to erect a temple, in which work he promised to aid them, and he gave them a letter to all their dispersed brethren. The whole Dispersion now assembled, and the Jews said, "We will now go up into the Holy City (Jerusalem) and live there in unity." But the sons of Harûn (Aaron) and of Joseph (*i. e.* the priests and the Samaritans) insisted upon going to the "Mount of Blessing," Gerizim. The dispute was referred to the king, and while the Samaritans proved their case from the books of Moses, the Jews grounded their preference for Jerusalem on the post-Mosaic books. The superior force of the Samaritan argument was fully recognized by the king. But as each side — by the mouth of their spokesmen, Sanballat and Zerubabel respectively, — charged the other with basing its claims on a forged document, the sacred books of each party were subjected to the ordeal of fire. The Jewish Record was immediately consumed, while the Samaritan leaped three times from the flames into the king's lap: the third time, however, a portion of the scroll, upon which the king had spat, was found to have been consumed. Thirty-six Jews were immediately beheaded, and the Samaritans, to the number of 300,000 wept, and all Israel worshipped henceforth upon Mount Gerizim — "and so we will ask our help from the grace of God, who has in his mercy granted all these things and in Him we will confide."

2. From this work chiefly has been compiled another Chronicle, written in the 14th century (1355)

---

[a] Thus עירה, Gen. xlix. 11 (Sam. Ver. קרתה, "his city"), the Arab. renders عبر; Gen. xii. 43, אבך (Sam. Ver. כרוז = κήρυξ), the Arab. translates אב יד = الاب الشفوق.

[b] A word, it may be observed by the way taken by the Mohammedans from the Rabbinics כופר (בעיקר).

Digitized by Google

by Abu'l Fatah.[a] This comprises the history of the Jews and Samaritans from Adam to A. H. 756 and 798 (A. D. 1355 and 1397) respectively (the forty-two years must have been added by a later historiographer). It is of equally low historical value; its only remarkable feature being its adoption of certain Talmudical legends, which it took at second hand from Josippon ben Gorion. According to this chronicle, the deluge did not cover Gerizim, in the same manner as the Midrash (*Ber. Rab.*) exempts the whole of Palestine from it. A specimen, likewise on the subject of the Pentateuch, may not be out of place: —

In the year of the world 4150, and in the 10th year of Philadelphus, this king wished to learn the difference between the Law of the Samaritans, and that of the Jews. He therefore bade both send him some of their elders. The Samaritans delegated Ahron, Sumla, and Hudmaka, the Jews Eleazar only. The king assigned houses to them, and gave them each an adept of the Greek language, in order that he might assist them in their translation. The Samaritans rendered only their Pentateuch into the language of the land, while Eleazar produced a translation of the whole Canon. The king, perceiving variations in the respective Pentateuchs, asked the Samaritans the reason of it. Whereupon they replied that these differences chiefly turned upon two points. (1.) God *had* chosen the Mount of Gerizim: and if the Jews were right, why was there no mention of it in their Thora? (2.) The Samaritans read, Deut. xxxii. 35, ליום נקם, "to the *day* of vengeance and reward," the Jews לי נקם, "*Mine* is vengeance and reward" — which left it uncertain whether that reward was to be given here or in the world to come. The king then asked what was their opinion about the Jewish prophets and their writings, and they replied, "Either they must have said and contained what stood in the Pentateuch, and then their saying it again was superfluous; or more; or less:[b] either of which was again distinctly prohibited in the Thora; or finally they must have *changed* the laws, and these were unchangeable." A Greek who stood near, observed that laws must be adapted to different times, and altered accordingly; whereupon the Samaritans proved that this was only the case with human, not with divine laws: moreover, the seventy Elders had left them the explicit command not to accept a word beside the Thora. The king now fully approved of their translation, and gave them rich presents. But to the Jews he strictly enjoined not even to approach Mount Gerizim. There can be no doubt that there is a certain historical fact, however contorted, at the bottom of this (comp. the Talmudical and other accounts of the LXX.), but we cannot now further pursue the subject. A lengthened extract from this chronicle — the original text with a German translation — is given by Schnurrer in Paulus' *Neues Repertorium*, 1790, 117–159.

3. Another "historical" work is the كتاب الاسطير on the history and genealogy of the patriarchs, from Adam to Moses, attributed to Moses himself; perhaps the same which Petermann saw at *Nâblus*, and which consisted of sixteen vellum leaves (supposed, however, to contain the history of the world down to the end). An anonymous recent commentary on it, A. H. 1200, A. D. 1784, is in the Brit. Mus. (No. 1140, Add.).

4. Of other Samaritan works, chiefly in Arabic — their Samaritan and Hebrew literature having mostly been destroyed by the Emperor Commodus — may be briefly mentioned Commentaries upon the whole or parts of their Pentateuch, by Zadaka b. Manga b. Zadaka;[c] further, by Maddib Eddin Jussuf b. Abi Said b. Khalef; by Ghazel Ibn Abu-l-Surur Al-Safawi Al-Ghazzi[d] (A. H. 1167–68, A. D. 1753–54, Brit. Mus.), &c. Theological works chiefly in Arabic, mixed with Samaritanisms, by Abul Hassan of Tyre, *On the religious Manners and Customs of the Samaritans, and the World to come*; by Mowaffek Eddin Zadaka el Israili, *A Compendium of Religion, on the Nature of the Divine Being, on Man, on the Worship of God*; by Amin Eddin Abu'l Baracat, *On the Ten Commandments*; by Abu'l Hassan Ibn El Markum Gonajem ben Abulfaraj' ibn Chatir, *On Penance*; by Muhaddib Eddin Jussuf Ibn Salmaah Ibn Jussuf Al Askari, *An Exposition of the Mosaic Laws*, etc., etc. Some grammatical works may be further mentioned, by Abu Ishak Ibrahim, *On the Hebrew Language*; by Abu Said, *On reading the Hebrew Text* (قوانين المقرا).

This grammar begins in the following characteristic manner: —

"Thus said the Sheikh, rich in good works and knowledge, the model, the abstemious, the well-guided Abu Said, to whom God be merciful and compassionate.

"Praise be unto God for his help, and I ask for his guidance towards a clear exposition. I have resolved to lay down a few rules for the proper manner of reading the Holy Writ, on account of the difference which I found with respect to it, among our co-religionists — whom may God make numerous and inspire to obedience unto Him! — and in such a manner that I shall bring proofs for my assertions, from which the wise could in no way differ. But God knows best!

"Rule 1: With all their discrepancies about dogmas or religious views, yet all the confessors of the Hebrew religion agree in this, that the ה of the first pers. (sing. perf.) is always pronounced with Kasra, and that a י follows it, provided it has no suffix. It is the same, when the suffix of the plural, ם, is added to it, according to the unanimous testimony of the MSS., etc."

[d] Under the title كاشف الغياهب عن اسرار المواهب.

Digitized by Google

The treatise concludes, at the end of the 12th Canon or Rule: —

"Often also the perfect is used in the form of the imperative. Thus it is reported of a man of the best reputation, that he had used the form of the imperative in the passage (Ex. iii. 13), ואמרו לי מה שמו — 'And they shall say to me, What is his name?' He who reported this to me is a man of very high standing, against whose truthfulness nothing can be brought forward. But God knows best!

"There are now a few more words to be treated, of which, however, we will treat *sind soce*. And blessed be His name forevermore."

5. Their Liturgical literature is more extensive, and not without a certain poetical value. It consists chiefly of hymns (Defter, Durrân) and prayers for Sabbath and Feast-days, and of occasional prayers at nuptials, circumcisions, burials, and the like. We subjoin a few specimens from MSS. in the British Museum, transcribed into Hebrew characters.

The following is part of a Litany for the dead: —

ארני · יהוה · אלהים · ב רחמיך · ובך · ובשמך · ובכבודך · ובאדון גן · אברהם · ויצחק · ויעקב · ואדונינו · משה · וכו׳

Lord Jehovah, Elohim, for Thy mercy, and for Thine Own sake, and for Thy name, and for Thy glory, and for the sake of our Lords Abraham, and Isaac, and Jacob, and our Lords Moses and Aaron, and Eleazar, and Ithamar, and Pinehas, and Joshua, and Caleb, and the Holy Angels, and the seventy Elders, and the holy mountain of Gerizim, Beth El. If Thou accept-est [תשים] this prayer [מקרא = reading], may there go forth from before Thy holy countenance a gift sent to protect the spirit of Thy servant, פלאן בן פלאן [N. the son of N.], of the sons of [——], daughter [——] from the sons of [——]. O Lord Jehovah, in Thy mercy have compassion on him (או) [or] have compassion on her), and rest his (her) soul in the garden of Eden; and forgive him (או) or] her), and all the congregation of Israel who flock to Mount Gerizim, Beth El. Amen. Through Moses the trusty. Amen, Amen, Amen.

The next is part of a hymn (see Kirchheim's *Carmina Shomron*, emendations on Gesenius, *Carm. Sam.* iii.): —

1.

| | |
|---|---|
| לית אלה אלא אחד | There is no God but one, |
| אלהים קעימה | The everlasting God, |
| דקעים עד לעלם | Who liveth forever; |
| אלח על כל חילין | God above all powers, |
| וממי כן לעלם | And who thus remaineth forever. |

2.

| | |
|---|---|
| בחילך רבה נתרחץ | In Thy great power shall we trust, |
| דאת הו מרן | For Thou art our Lord; |
| באלהותך דאנדית | In Thy Godhead; for Thou hast conducted |
| עלמה מן רישה | The world from beginning. |

3.

| | |
|---|---|
| גבורתך כסיה | Thy power was hidden, |
| ותהרך ורחמיך | And Thy glory and mercy |
| גלין גליאתה וכסאתה | Revealed are both the things that are revealed, and those that are unrevealed |
| בשלטן אלהותך וכו׳ | Before the reign of Thy Godhead, etc. |

IV. We shall only briefly touch here, in conclusion, upon the strangely contradictory rabbinical law framed for the regulation of the intercourse between the two rival nationalities of Jews and Samaritans in religious and ritual matters; discrepancies due partly to the ever-shifting phases of their mutual relations, partly to the modifications brought about in the Samaritan creed, and partly to the now less now greater acquiescence of the Jews in the religious state of the Samaritans. Thus we find the older Talmudical authorities disputing whether the Cuthim (Samaritans) are to be considered as "Real Converts" גירי אמת, or only converts through fear — "Lion Converts" גירי אריות — in allusion to the incident related in 2 K. xvii. 25 (*Baba K.* 38; *Kidush.* 75, &c.) One Rabbi holds כותי כגוי, "A Samaritan is to be considered as a heathen;" while R. Simon b. Gamaliel — the same whose opinion on the Sam. Pent. we had occasion to quote before — pronounces that they are "to be treated in every respect like Israelites" (*Dem. Jer.* ix. 2; *Ketub.* 11, &c.). It would appear that notwithstanding their rejection of all but the Pentateuch, they had adopted many traditional religious practices from the Jews — principally such as were derived direct from the books of Moses. It was acknowledged that they kept these ordinances with even greater rigor than those from whom they adopted them. The utmost confidence was therefore placed in them for their ritually slaughtering animals, even fowls (*Chul.* 4 *a*); their wells are pronounced to be conformed to all the conditions prescribed by the Mishnah (*Toseph. Mikw.* 6; comp. *Mikw.* 8, 1). See, however, *Abodah Zarah* (*Jer.* v. 4). Their unleavened bread for the Passover is commended (*Git.* 10; *Chul.* 4); their cheese (*Mas. Cuth.* 2); and even their whole food is allowed to the Jews (*Ab. Zar. Jer.* v. 4). Compare John iv. 8, where the disciples are reported to have gone into the city of Samaria to buy food. Their testimony was valued in that most stringent matter of the letter of divorce (*Mas. Cuth.* ii.). They were admitted to the office of circumcising Jewish boys (*Mas. Cuth.* i.) — against R. Jehudah, who asserts that they circumcise "in the name of Mount Gerizim" (*Abodah Zarah*, 43). The criminal law makes no difference whatever between them and the Jews (*Mas. Cuth.* 2; *Makk.* 8); and a Samaritan who strictly adheres to his own special creed is honored with the title of a Cuthi-Chaber (*Gittin*, 10 *b*; *Middah*, 33 *b*). By degrees, however, inhibitions began to be laid upon the use of their wine, vinegar, bread (*Mas. Cuth.* 2 *Toseph.* 77, 5), &c. This intermediate stage of uncertain and inconsistent treatment, which must have lasted for nearly two centuries, is best characterised by the small rabbinical treatise quoted above — *Massecheth Cuthim* (2d cent. A D) —

Digitized by Google

last edited by Kirchheim (שבע מס' קטנות ירושלם) Francf. 1851 — the beginning of which reads: "The ways (treatment) of the Cuthim (Samaritans), *sometimes* like Goyim (heathens) *sometimes* like Israel." No less striking is its conclusion: —

"And why are the Cuthim not permitted to come into the midst of the Jews? Because they have mixed with the priests of the heights" (idolaters). R. Ismael says: "They were *at first* pious converts (גירי צדק = real Israelites), and why is the intercourse with them prohibited? Because of their illegally begotten children,[a] and because they do not fulfill the duties of יבם (marrying the deceased brother's wife);" a law which they understand, as we saw above, to apply to the betrothed only.

"At what period are they to be received (into the Community)?" "When they abjure the Mount Gerizim, recognize Jerusalem (namely, its superior claims), and believe in the Resurrection."[b]

We hear of their exclusion by R. Meïr (*Chul.* 5), in the third generation of the Tanaim, and later again under R. Abbuha, the Amora, at the time of Diocletian; this time the exclusion was unconditional and final (*Jer. Abodah Zarah*, 5, &c.). Partaking of their bread[c] was considered a transgression, to be punished like eating the flesh of swine (*Zeb.* 8, 6). The intensity of their mutual hatred, at a later period, is best shown by dicta like that in *Meg.* 28, 6. "May it never happen to me that I behold a Cuthi." "Whoever receives a Samaritan hospitably in his house, deserves that his children go into exile" (*Synh.* 104, 1). In Matt. x. 5 Samaritans and Gentiles are already mentioned together; and in Luke xvii. 18 the Samaritan is called "a stranger" (ἀλλογενής). The reason for this exclusion is variously given. They are said by some to have used and sold the wine of heathens for sacrificial purposes (*Jer.* ibid.); by others they were charged with worshipping the dove sacred to Venus; an imputation over the correctness of which hangs, up to this moment, a certain mysterious doubt. It has, at all events, never been brought home to them, that they really worshipped this image, although it was certainly seen with them, even by recent travellers.

**SAM'ATUS** (Σαματός: *Semelius*). One of the sons of Ozora in the list of 1 Esdr. ix. 34 The whole verse is very corrupt.

* **SAMECH**, one of the Hebrew letters employed in the alphabetic compositions. [POETRY; WRITING.] H.

**SAME'IUS** [3 syl.] (Σαμαῖος [Vat. Θαμιους, Ald. Σαμεῖος]). SHEMAIAH of the sons of Harim (1 Esdr. ix. 21; comp. Ezr. x. 21).

**SAM'GAR-NE'BO** סַמְגַּר־נְבוֹ [see below]: *Senegarnabu*). One of the princes or generals of the king of Babylon who commanded the victorious army of the Chaldæans at the capture of Jerusalem (Jer. xxxix. 3). The text of the LXX. is corrupt. The two names "Samgar-nebo, Sarsechim," are there written Σαμαγαβὲ [Alex. Εισσαμαγαθ καὶ Ναβουσάχαρ. The *Nebo* is the Chaldæan Mercury; about the Samgar, opinions are divided. Vor Bohlen suggested that from the Sanskrit *sangara* "war," might be formed *sângara*, "warrior," and that this was the original of Samgar.

---

[a] The briefest rendering of ממזרים which we can give — a full explanation of the term would exceed our limits.

[b] On this subject the Pent. contains nothing explicit. They at first rejected that dogma, but adopted it at a later period, perhaps since Dositheus; comp. the sayings of Jehudda-hadassi and Massudi, that one of the two Samaritan sects believes in the Resurrection; Epiphanius, Leontius, Gregory the Great, testify unanimously to their former unbelief in this article of their *present* faith.

**SA'MI** (Τωβίς; [Vat. Τωβεις; Ald. Σαμί;] Alex. Σαβει: *Tobi*). SHOBAI (1 Esdr. v. 29; comp. Ezr. ii. 42).

**SA'MIS** (Σομεὶς, [Vat. Σομεεις; Alex. Σομεις; Ald. Σαμίς:] om. in Vulg.). SHIMEI 13 (1 Esdr. ix. 34; comp. Ezr. x. 38).

**SAM'LAH** (שַׂמְלָה [*garment*]: Σαμαδά; Alex. Σαλαμα; [in 1 Chr., Rom. Σεβαδά; Vat. Alex. Σαμαα:] *Semla*), Gen. xxxvi. 36, 37; 1 Chr. i. 47, 48. One of the kings of Edom, successor to HADAD or HADAR. Samlah, whose name signifies "a garment," was of MASREKAH; that being probably the chief city during his reign. This mention of a separate city as belonging to each (almost without exception) of the "kings" of Edom, suggests that the Edomite kingdom consisted of a confederacy of tribes, and that the chief city of the reigning tribe was the metropolis of the whole. E. S. P.

**SAM'MUS** (Σαμμούς; [Vat. Σαμμουν:] *Samus*). SHEMA (1 Esdr. ix. 43; comp. Neh. viii. 4).

**SA'MOS** (Σάμος [*height: Samus*]). A very illustrious Greek island off that part of Asia Minor where IONIA touches CARIA. For its history, from the time when it was a powerful member of the Ionic confederacy to its recent struggles against Turkey during the war of independence, and since, we must refer to the *Dict. of Greek and Rom. Geog.*[a] Samos is a very lofty and commanding island; the word, in fact, denotes a height, especially by the seashore: hence, also, the name of SAMOTHRACIA, or "the Thracian Samos." The Ionian Samos comes before our notice in the detailed account of St. Paul's return from his third missionary journey (Acts xx. 15). He had been at Chios, and was about to proceed to Miletus, having passed by Ephesus without touching there. The topographical notices given incidentally by St. Luke are most exact. The night was spent at the anchorage of TROGYLLIUM, in the narrow strait between Samos and the extremity of the mainland-ridge of Mycale. This spot is famous both for the great battle of the old Greeks against the Persians in B. C. 479, and also for a gallant action of the modern Greeks against the Turks in 1824. Here, however, it is more natural (especially as we know, from 1 Macc. xv. 23, that Jews resided here) to allude to the meeting of Herod the Great with Marcus Agrippa in Samos, whence resulted many privileges to the Jews (Joseph. *Ant.* xvi. 2, §§ 2, 4). At this time and when St. Paul was there, it was politically a "free city" in the province of ASIA. Various travellers (Tournefort, Pococke, Dallaway, Ross) have described this island. We may refer particularly to a very recent work on the subject, *Description de l'île de Patmos et de l'île de Samos* (Paris, 1856), by V. Guérin, who spent two months in the island. J. S. H.

**SAMOTHRA'CIA** (Σαμοθρᾴκη [prob. *height of Thrace*]: *Samothracia*). The mention of this island in the account of St. Paul's first voyage to Europe (Acts xvi. 11) is for two reasons worthy of careful notice. In the first place, being a very lofty and conspicuous island, it is an excellent landmark for sailors, and must have been full in view if the weather was clear, throughout that voyage from Troas to Neapolis. From the shore at Troas Samothrace is seen towering over Imbros (Hom. *Il.* xiii. 12, 13; Kinglake's *Eothen*, p. 64), and it is similarly a marked object in the view from the hills between Neapolis and Philippi (Clarke's *Travels*, ch. xiii.). These allusions tend to give vividness to one of the most important voyages that ever took place. Secondly, this voyage was made with a fair wind. Not only are we told that it occupied only parts of two days, whereas on a subsequent return-voyage (Acts xx. 6) the time spent at sea was five: but the technical word here used (εὐθυδρομήσαμεν) implies that they ran before the wind. Now the position of Samothrace is exactly such as to correspond with these notices, and thus incidentally to confirm the accuracy of a most artless narrative. St. Paul and his companions anchored for the night off Samothrace. The ancient city, and therefore probably the usual anchorage, was on the N. side, which would be sufficiently sheltered from a S. E. wind. It may be added, as a further practical consideration not to be overlooked, that such a wind would be favorable for overcoming the opposing current, which sets southerly after leaving the Dardanelles, and easterly between Samothrace and the mainland. Fuller details are given in *Life and Epp. of St. Paul*, 2d. ed. i. 335–338. The chief classical associations of this island are mythological and connected with the mysterious divinities called Cabeiri. Perseus took refuge here after his defeat by the Romans at Pydna. In St. Paul's time Samothrace had, according to Pliny, the privileges of a small free state, though it was doubtless considered a dependency of the province of Macedonia.[b] J. S. H.

**SAMP'SAMES** ([Rom. Sin.] Σαμψάμης, [Alex.] Σαμψαίης: *Lampsacus, Sampsames*), a name which occurs in the list of those to whom the Romans are said to have sent letters in favor of the Jews (1 Macc. xv. 23). The name is probably not that of a sovereign (as it appears to be taken in A. V.), but of a place, which Grimm identifies with *Samsun* on the coast of the Black Sea, between Sinope and Trebizond. B. F. W.

**SAM'SON** (שִׁמְשׁוֹן, *i. e.* Shimshon: Σαμψών: [*Samson,*] "little sun," or "sunlike;" but according to Joseph. *Ant.* v. 8, § 4 "strong:" if the root *shemesh* has the significance of "awe" which Gesenius ascribes to it, the name Samson would seem naturally to allude to the "awe" and "astonishment" with which the father and mother

---

[a] A curious illustration of the renown of the Samian earthenware is furnished by the Vulgate rendering of Is xlv. 9: "Testa de Samiis terræ."

[b] Samothrace lies in the track of the steamers from Constantinople to Neapolis (*Kavalla*) and Thessalonica. The work of A. Conze, *Reise auf den Inseln des Thrakischen Meeres*, contains the results of a visit in 1858 to Thasos, Samothrace, Imbros, and Limnos, mainly for the purpose of copying monumental sculptures and inscriptions. Some of those in Samothrace are specially interesting on account of their great antiquity and their symbolic import as connected with the remarkable religious rites of which that island was the seat. Fr. W. J. Schelling maintains the Shemitic origin of these rites and of some of the associated teachings in his noted lecture, *Ueber die Gottheiten von Samothrake*. See also Creuzer's *Symbolik*, ii 202 ff. It is worth mentioning that the old form of the Greek future which has generally disappeared from the modern Greek is found to be common in these rarely visited retreats of the old Hellenic race. H.

ooked upon the angel who announced Samson's birth — see Judg. xiii. 6, 18–20, and Joseph. *l. c.*), son of Manoah, a man of the town of Zorah, in the tribe of Dan, on the border of Judah (Josh. xv. 33, xix. 41). The miraculous circumstances of his birth are recorded in Judg. xiii.; and the three following chapters are devoted to the history of his life and exploits. Samson takes his place in Scripture, (1) as a judge — an office which he filled for twenty years (Judg. xv. 20, xvi. 31); (2) as a Nazarite (Judg. xiii. 5, xvi. 17); and (3) as one endowed with supernatural power by the Spirit of the Lord (Judg. xiii. 25, xiv. 6, 19, xv. 14).

(1.) As a judge his authority seems to have been limited to the district bordering upon the country of the Philistines, and his action as a deliverer does not seem to have extended beyond desultory attacks upon the dominant Philistines, by which their hold upon Israel was weakened, and the way prepared for the future emancipation of the Israelites from their yoke. It is evident from Judg. xiii. 1, 5, xv. 9–11, 20, and the whole history, that the Israelites, or at least Judah and Dan, which are the only tribes mentioned, were subject to the Philistines through the whole of Samson's judgeship; so that, of course, Samson's twenty years of office would be included in the forty years of the Philistine dominion. From the angel's speech to Samson's mother (Judg. xiii. 5), it appears further that the Israelites were already subject to the Philistines at his birth; and as Samson cannot have begun to be judge before he was twenty years of age, it follows that his judgeship must about have coincided with the last twenty years of Philistine dominion. But when we turn to the First Book of Samuel, and especially to vii. 1–14, we find that the Philistine dominion ceased under the judgeship of Samuel. Hence it is obvious to conclude that the early part of Samuel's judgeship coincided with the latter part of Samson's; and that the capture of the ark by the Philistines in the time of Eli occurred during Samson's lifetime. There are besides several points in the respective narratives of the times of Samson and Samuel which indicate great proximity. First, there is the general prominence of the Philistines in their relation to Israel. Secondly, there is the remarkable coincidence of both Samson and Samuel being Nazarites (Judg. xiii. 5, xvi. 17, compared with 1 Sam. i. 11). It looks as if the great exploits of the young Danite Nazarite had suggested to Hannah the consecration of her son in like manner, or, at all events, as if for some reason the Nazarite vow was at that time prevalent. No other mention of Nazarites occurs in the Scripture history till Amos ii. 11, 12; and even there the allusion seems to be to Samuel and Samson. Thirdly, there is a similar notice of the house of Dagon in Judg. xvi. 23, and 1 Sam. v. 2. Fourthly, the lords of the Philistines are mentioned in a similar way in Judg. xvi. 8, 18, 27, and in 1 Sam. vii. 7. All of which, taken together, indicates a close proximity between the times of Samson and Samuel. There does not seem, however, to be any means of fixing the time of Samson's judgeship more precisely. The effect of his prowess must have been more of a preparatory kind, by arousing the cowed spirit of his people, and shaking the insolent security of the Philistines, than in the way of decisive victory or deliverance. There is no allusion whatever to other parts of Israel during Samson's judgeship, except the single fact of the men of the border tribe of Judah, 3,000 in number, fetching him from the rock Etam to deliver him up to the Philistines (Judg. xv. 9–13). The whole narrative is entirely local, and, like the following story concerning Micah (Judg. xvii., xviii.), seems to be taken from the annals of the tribe of Dan.

(2.) As a Nazarite, Samson exhibits the law in Num. vi. in full practice. [NAZARITE.] The eminence of such Nazarites as Samson and Samuel would tend to give that dignity to the profession which is alluded to in Lam. iv. 7, 8.

(3.) Samson is one of those who are distinctly spoken of in Scripture as endowed with supernatural power by the Spirit of the Lord. "The Spirit of the Lord began to move him at times in Mahaneh-Dan." "The Spirit of the Lord came mightily upon him, and the cords that were upon his arms became as flax burnt with fire." "The Spirit of the Lord came upon him, and he went down to Ashkelon, and slew thirty men of them. But, on the other hand, after his locks were cut, and his strength was gone from him, it is said "He wist not that the Lord was departed from him" (Judg. xiii. 25, xiv. 6, 19, xv. 14, xvi. 20). The phrase, "the Spirit of the Lord came upon him," is common to him with Othniel and Gideon (Judg. iii. 10, vi. 34); but the connection of supernatural power with the integrity of the Nazaritic vow, and the particular gift of great strength of body, as seen in tearing in pieces a lion, breaking his bonds asunder, carrying the gates of the city upon his back, and throwing down the pillars which supported the house of Dagon, are quite peculiar to Samson. Indeed, his whole character and history have no exact parallel in Scripture. It is easy, however, to see how forcibly the Israelites would be taught, by such an example, that their national strength lay in their complete separation from idolatry, and consecration to the true God; and that He could give them power to subdue their mightiest enemies, if only they were true to his service (comp. 1 Sam. ii. 10).

It is an interesting question whether any of the legends which have attached themselves to the name of Hercules may have been derived from Phœnician traditions of the strength of Samson. The combination of great strength with submission to the power of women; the slaying of the Nemeæan lion; the coming by his death at the hands of his wife; and especially the story told by Herodotus of the captivity of Heroules in Egypt,[a] *with the loss of all his hair*, is also curious, and seems to be a compound of the stories of Samson and Jonah To this may be added the connection between *Samson*, considered as derived from *Shemesh*, "the sun," and the designation of Moul, the Egyptian Hercules, as "Son of the Sun, worshipped also under the name *Sem*, which Sir G. Wilkinson compares with Samson The Tyrian Hercules (whose temple at Tyre is described by Herodot. ii. 44), he also tells us, "was originally the Sun, and the same as Baal" (Rawl. *Herod.* ii. 44, note 7). The connection between the

[a] "Hercules once went to Egypt, and there the inhabitants took him, and, putting a chaplet on his head, led him out in solemn procession, intending to offer him in sacrifice to Jupiter. For awhile he submitted quietly; but when they led him up to the altar, and began the ceremonies, he put forth his strength and slew them all" (Rawlins. *Herod.* book ii. 45).

The passage from Lycophron, with the scholion, quoted by Bochart (*Hieroz.* pars ii. lib. v. cap. xii.), where Hercules is said to have been three nights in the belly of the sea-monster, and to have come out

are certainly remarkable coincidences. Phœnician traders might easily have carried stories concerning the Hebrew hero to the different countries where they traded, especially Greece and Italy; and such stories would have been moulded according to the taste or imagination of those who heard them. The following description of Hercules given by C. O. Müller (*Dorians*, b. ii. c. 12) might almost have been written for Samson: "The highest degree of human suffering and courage is attributed to Hercules: his character is as noble as could be conceived in those rude and early times; but he is by no means represented as free from the blemishes of human nature; on the contrary, he is frequently subject to wild, ungovernable passions, when the noble indignation and anger of the suffering hero degenerate into frenzy. Every crime, however, is atoned for by some new suffering; but nothing breaks his invincible courage, until, purified from earthly corruption, he ascends Mount Olympus." And again: "Hercules was a jovial guest, and not backward in enjoying himself. . . . . It was Hercules, above all other heroes, whom mythology placed in ludicrous situations, and sometimes made the butt of the buffoonery of others. The Cercopes are represented as alternately amusing and annoying the hero. In works of art they are often represented as satyrs who rob the hero of his quiver, bow, and club. Hercules, annoyed at their insults, binds two of them to a pole, and marches off with his prize. . . . . It also seems that mirth and buffoonery were often combined with the festivals of Hercules: thus at Athens there was a society of sixty men, who on the festival of the Diomean Hercules attacked and amused themselves and others with sallies of wit." Whatever is thought, however, of such coincidences, it is certain that the history of Samson is an historical, and not an allegorical narrative. It has also a distinctly supernatural element which cannot be explained away. The history, as we now have it, must have been written several centuries after Samson's death (Judg. xv. 19, 20, xviii. 1, 30, xix. 1), though probably taken from the annals of the tribe of Dan. Josephus has given it pretty fully, but with alterations and embellishments of his own, after his manner. For example, he does not make Samson eat any of the honey which he took out of the hive, doubtless as unclean, and unfit for a Nazarite, but makes him give it to his wife. The only mention of Samson in the N. T. is that in Heb. xi. 32, where he is coupled with Gideon, Barak, and Jephthah, and spoken of as one of those who "through faith waxed valiant in fight, and turned to flight the armies of the aliens." See, besides the places quoted in the course of this article, a full article in Winer, *Realwb*; Ewald, *Geschichte*, ii. 516, &c.; Bertheau, *On Judges*; Bayle's *Dict.* A. C. H.

**SAMUEL** (שְׁמוּאֵל, *i. e.* Shemûel: Σαμουήλ: [*Samuel:*] Arabic, *Samuwil*, or *Aschmouyl*, see D'Herbelot, under this last name). Different derivations have been given. (1.) שֵׁם אֵל, "name of God:" so apparently Origen (Eus. *H. E.* vi. 25), Θεοκλητός. (2.) שׂוּם אֵל, "placed by God." (3.) שְׁאוּל אֵל, "asked of God" (1 Sam. i. 20). Josephus ingeniously makes it correspond to the well-known Greek name *Theætetus*. (4.) שְׁמוּעַ אֵל, "heard of God." This, which may have the same meaning as the previous derivation, is the most obvious. The last Judge, the first of the regular succession of Prophets, and the founder of the monarchy. So important a position did he hold in Jewish history as to have given his name to the sacred book, now divided into two, which covers the whole period of the first establishment of the kingdom, corresponding to the manner in which the name of Moses has been assigned to the sacred book, now divided into five, which covers the period of the foundation of the Jewish Church itself. In fact no character of equal magnitude had arisen since the death of the great Lawgiver.

He was the son of Elkanah, an Ephrathite or Ephraimite, and Hannah or Anna. His father is one of the few private citizens in whose household we find polygamy. It may possibly have arisen from the irregularity of the period.

The descent of Elkanah is involved in great obscurity. In 1 Sam. i. 1 he is described as an Ephraimite. In 1 Chr. vi. 22, 23 he is made a descendant of Korah the Levite. Hengstenberg (on Ps. lxxviii. 1) and Ewald (ii. 433) explain this by supposing that the Levites were occasionally incorporated into the tribes amongst whom they dwelt. The question, however, is of no practical importance, because, even if Samuel were a Levite, he certainly was not a Priest by descent.

His birthplace is one of the vexed questions of sacred geography, as his descent is of sacred genealogy. [See RAMAH, and RAMATHAIM-ZOPHIM.] All that appears with certainty from the accounts is that it was in the hills of Ephraim, and (as may be inferred from its name) a double height, used for the purpose of beacons or outlookers (1 Sam. i.

---

Phœnician Baal (called Baal Shemen, Baal Shemesh, and Baal Hamman), and Hercules is well known. Gesenius (*Thes. s. v.* בעל) tells us that, in certain Phœnician inscriptions, which are accompanied by a Greek translation, *Baal* is rendered *Herakles*, and that the Tyrian Hercules" is the constant Greek designation of the Baal of Tyre. He also gives many Carthaginian inscriptions to Baal Hamman, which he renders Baal Solaris; and also a sculpture in which Baal Hamman's head is surrounded with rays, and which has an image of the sun on the upper part of the monument (*Mon. Phœn.* i. 171; ii. tab 21). Another evidence of the identity of the Phœnician Baal and Hercules may be found in *Baulí*, near Baiæ, place sacred to Hercules ("locus Herculis," Serv.), but evidently so called from Baal. Thirlwall (*Hist. of Greece*) ascribes to the numerous temples built by the Phœnicians in honor of Baal in their different settlements the Greek fables of the labors and journeys of Hercules. Bochart thinks the custom described by Ovid (*Fast.* liv.) of tying a lighted torch between two foxes in the circus, in memory of the damage once done to the harvest by a fox with burning hay and straw tied to it, was derived from the Phœnicians, and is clearly to be traced to the history of Samson (*Hieroz* pars. i. lib. iii. cap. xiii.). From all which arises a considerable probability that the Greek and Latin conception of Hercules in regard to his strength was derived from Phœnician stories and reminiscences of the great Hebrew hero Samson. Some learned men connect the name *Hercules* with *Samson* etymologically (See Sir G. Wilkinson's note in Rawlinson's *Herod.* ii. 43; Patrick, *On Judg.* xvi. 30; Cornel. a Lapide, etc. But none of these etymologies are very convincing.

1). At the foot of the hill was a well (1 Sam. xix. 22). On the brow of its two summits was the city. It never lost its hold on Samuel, who in later life made it his fixed abode.

The combined family must have been large. Peninnah had several children, and Hannah had, besides Samuel, three sons and two daughters. But of these nothing is known, unless the names of the sons are those enumerated in 1 Chr. vi. 26, 27.

It is on the mother of Samuel that our chief attention is fixed in the account of his birth. She is described as a woman of a high religious mission. Almost a Nazarite by practice (1 Sam. i. 15), and a prophetess in her gifts (1 Sam. ii. 1), she sought from God the gift of the child for which she longed with a passionate devotion of silent prayer, of which there is no other example in the O. T., and when the son was granted, the name which he bore, and thus first introduced into the world, expressed her sense of the urgency of her entreaty — *Samuel*, "the Asked or Heard of God."

Living in the great age of vows, she had before his birth dedicated him to the office of a Nazarite. As soon as he was weaned, she herself with her husband brought him to the Tabernacle at Shiloh, where she had received the first intimation of his birth, and there solemnly consecrated him. The form of consecration was similar to that with which the irregular priesthood of Jeroboam was set apart in later times (2 Chr. xiii. 9) — a bullock of three years old (LXX.), loaves (LXX.), an ephah of flour, and a skin of wine (1 Sam. i. 24). First took place the usual sacrifices (LXX.) by Elkanah himself — then, after the introduction of the child, the special sacrifice of the bullock. Then his mother made him over to Eli (i. 25, 28), and (according to the Hebrew text, but not the LXX.) the child himself performed an act of worship.

The hymn which followed on this consecration is the first of the kind in the sacred volume. It is possible that, like many of the Psalms, it may have been enlarged in later times to suit great occasions of victory and the like. But verse 5 specially applies to this event, and verses 7, 8 may well express the sense entertained by the prophetess of the coming revolution in the fortunes of her son and of her country. [HANNAH.]

From this time the child is shut up in the Tabernacle. The priests furnished him with a sacred garment, an ephod, made, like their own, of white linen, though of inferior quality, and his mother every year, apparently at the only time of their meeting, gave him a little mantle reaching down to his feet, such as was worn only by high personages, or women, over the other dress, and such as he retained, as his badge, till the latest times of his life. [MANTLE, vol. ii. p. 1782 *b*.] He seems to have slept within the Holiest Place (LXX., 1 Sam. iii. 3), and his special duty was to put out, as it would seem, the sacred candlestick, and to open the doors at sunrise.

In this way his childhood was passed. It was whilst thus sleeping in the Tabernacle that he received his first prophetic call. The stillness of the night — the sudden voice — the childlike misconception — the venerable Eli — the contrast between the terrible doom and the gentle creature who has to announce it — give to this portion of the narrative a universal interest. It is this side of Samuel's career that has been so well caught in the well-known picture by Sir Joshua Reynolds.

From this moment the prophetic character of Samuel was established. His words were treasured up, and Shiloh became the resort of those who came to hear him (iii. 19–21).

In the overthrow of the sanctuary, which followed shortly on this vision, we hear not who became of Samuel.[a] He next appears, probably twenty years afterwards, suddenly amongst the people, warning them against their idolatrous practices. He convened an assembly at Mizpeh — probably the place of that name in the tribe of Benjamin — and there with a symbolical rite, expressive partly of deep humiliation, partly of the libations of a treaty, they poured water on the ground, they fasted, and they entreated Samuel to raise the piercing cry, for which he was known, in supplication to God for them. It was at the moment that he was offering up a sacrifice, and sustaining this loud cry (compare the situation of Pausanias before the battle of Platæa, Herod. ix. 61), that the Philistine host suddenly burst upon them. A violent thunderstorm, and (according to Josephus, *Ant.* vi. 2, § 2) an earthquake, came to the timely assistance of Israel. The Philistines fled, and, exactly at the spot where twenty years before they had obtained their great victory, they were totally routed. A stone was set up, which long remained as a memorial of Samuel's triumph, and gave to the place its name of Eben-ezer, "the Stone of Help," which has thence passed into Christian phraseology, and become a common name of Nonconformist chapels (1 Sam. vii. 12). The old Canaanites, whom the Philistines had dispossessed in the outskirts of the Judæan hills, seem to have helped in the battle, and a large portion of territory was recovered (1 Sam. vi. 14). This was Samuel's first and, as far as we know, his only military achievement. But, as in the case of the earlier chiefs who bore that name, it was apparently this which raised him to the office of "Judge" (comp. 1 Sam. xii. 11, where he is thus reckoned with Jerubbaal, Bedan, and Jephthah; and Eccius. xlvi. 15–18). He visited, in discharge of his duties as ruler, the three chief sanctuaries (*ἐν πᾶσι τοῖς ἡγιασμένοις τούτοις*) on the west of the Jordan — Bethel, Gilgal, and Mizpeh (1 Sam. vii. 16). His own residence was still his native city, Ramah or Ramathaim, which he further consecrated by an altar (vii. 17). Here he married, and two sons grew up to repeat under his eyes the same perversion of high office that he had himself witnessed in his childhood in the case of the two sons of Eli. One was Abiah, the other Joel, sometimes called simply "the second" (*vashni*, 1 Chr. vi. 28). In his old age, according to the quasi-hereditary principle, already adopted by previous judges, he shared his power with them, and they exercised their functions at the southern frontier in Beer-sheba (1 Sam. viii. 1–4).

2. Down to this point in Samuel's life there is but little to distinguish his career from that of his predecessors. Like many characters in later days, had he died in youth his fame would hardly have been greater than that of Gideon or Samson. He

[a] According to the Mussulman tradition, Samuel's birth is granted in answer to the prayers of the nation on the overthrow of the sanctuary and loss of the ark (D'Herbelot, *Aschmouyl*). This, though false in the letter, is true to the spirit of Samuel's life.

was a judge, a Nazarite, a warrior, and (to a certain point) a prophet.

But his peculiar position in the sacred narrative turns on the events which follow. He is the inaugurator of the transition from what is commonly called the theocracy to the monarchy. The misdemeanor of his own sons, in receiving bribes, and in extorting exorbitant interest on loans (1 Sam. viii. 3, 4), precipitated the catastrophe which had been long preparing. The people demanded a king. Josephus (*Ant.* vi. 3, § 3) describes the shock to Samuel's mind, "because of his inborn sense of justice, because of his hatred of kings, as so far inferior to the aristocratic form of government, which conferred a godlike character on those who lived under it." For the whole night he lay fasting and sleepless, in the perplexity of doubt and difficulty. In the vision of that night, as recorded by the sacred historian, is given the dark side of the new institution, on which Samuel dwells on the following day (1 Sam. viii. 9–18).

This presents his reluctance to receive the new order of things. The whole narrative of the reception and consecration of Saul gives his acquiescence in it. [SAUL.]

The final conflict of feeling and surrender of his office is given in the last assembly over which he presided, and in his subsequent relations with Saul. The assembly was held at Gilgal, immediately after the victory over the Ammonites. The monarchy was a second time solemnly inaugurated, and (according to the LXX.) "Samuel" (in the Hebrew text "Saul") "and all the men of Israel rejoiced greatly." Then takes place his farewell address. By this time the long flowing locks on which no razor had ever passed were white with age (xii. 2). He appeals to their knowledge of his integrity. Whatever might be the lawless habits of the chiefs of those times — Hophni, Phinehas, or his own sons — he had kept aloof from all. No ox or ass had he taken from their stalls — no bribe to obtain his judgment (LXX., ἐξίλασμα) — not even a sandal (ὑπόδημα, LXX., and Ecclus. xlvi. 19). It is this appeal, and the response of the people, that has made Grotius call him the Jewish Aristides. He then sums up the new situation in which they have placed themselves; and, although "the wickedness of asking a king" is still strongly insisted on, and the unusual portent[a] of a thunderstorm in May or June, in answer to Samuel's prayer, is urged as a sign of Divine displeasure (xii. 16–19), the general tone of the condemnation is much softened from that which was pronounced on the first intimation of the change. The first king is repeatedly acknowledged as "the Messiah" or anointed of the Lord (xii. 3, 5), the future prosperity of the nation is declared to depend on their use or misuse of the new constitution, and Samuel retires with expressions of goodwill and hope: "I will teach you the good and the right way . . . . only fear the Lord . . . . ." (1 Sam. xii. 23, 24).

It is the most signal example afforded in the O. T. of a great character reconciling himself to a changed order of things, and of the Divine sanction resting on his acquiescence. For this reason it is that Athanasius is by Basil called the Samuel of the Church (Basil, *Ep.* 82).

3. His subsequent relations with Saul are of the same mixed kind. The two institutions which they respectively represented ran on side by side. Samuel was still Judge. He judged Israel "*all the days of his life*" (vii. 15), and from time to time came across the king's path. But these interventions are chiefly in another capacity, which this is the place to unfold.

Samuel is called emphatically "the Prophet" (Acts iii. 24, xiii. 20). To a certain extent this was in consequence of the gift which he shared in common with others of his time. He was especially known in his own age as "Samuel the Seer" (1 Chr. ix. 22, xxvi. 28, xxix. 29). "I am the seer," was his answer to those who asked "Where is the seer?" "Where is the seer's house?" (1 Sam. ix. 11 18, 19). "Seer," the ancient name, was not yet superseded by "Prophet" (1 Sam. ix.). By this name, Samuel *Videns* and Samuel ὁ βλέπων, he is called in the *Acta Sanctorum*. Of the three modes by which Divine communications were then made, "by dreams, Urim and Thummim, and prophets," the first was that by which the Divine will was made known to Samuel (1 Sam. iii. 1, 2; Jos. *Ant.* v. 10, § 4). "The Lord uncovered his ear" to whisper into it in the stillness of the night the messages that were to be delivered. It is the first distinct intimation of the idea of "*Revelation*" to a human being (see Gesenius, *in voc.* גָּלָה). He was consulted far and near on the small affairs of life; loaves of "bread," or "the fourth part of a shekel of silver," were paid for the answers (1 Sam. ix. 7, 8).

From this faculty, combined with his office of ruler, an awful reverence grew up round him. No sacrificial feast was thought complete without his blessing (1 Sam. ix. 13). When he appeared suddenly elsewhere for the same purpose, the villagers "trembled" at his approach (1 Sam. xvi. 4, 5). A peculiar virtue was believed to reside in his intercession. He was conspicuous in later times amongst those that "*call* upon the name of the Lord" (Ps. xcix. 6; 1 Sam. xii. 18), and was placed with Moses as "standing" for prayer, in a special sense, "before the Lord" (Jer. xv. 1). It was the last consolation he left in his parting address that he would "pray to the Lord" for the people (1 Sam. xii. 19, 23). There was something peculiar in the long-sustained cry or shout of supplication, which seemed to draw down as by force the Divine answer (1 Sam. vii. 8, 9). All night long, in agitated moments, "he *cried* unto the Lord" (1 Sam. xv. 11).

But there are two other points which more especially placed him at the head of the prophetic order as it afterwards appeared. The first is brought out in his relation with Saul, the second in his relation with David.

(*a.*) He represents the independence of the moral law, of the Divine Will, as distinct from regal or sacerdotal enactments, which is so remarkable a characteristic of all the later prophets. As we have seen, he was, if a Levite, yet certainly not a Priest; and all the attempts to identify his opposition to Saul with a hierarchical interest are founded on a complete misconception of the facts of the case. From the time of the overthrow of Shiloh,

[a] According to the Mussulman traditions, his anger was occasioned by the people rejecting Saul as not being of the tribe of Judah. The sign that Paul was the king was the liquefaction of the sacred oil in his presence and the recovery of the Tabernacle (D'Herbelot, *Archmouel*).

he never appears in the remotest connection with the priestly order. Amongst all the places included in his personal or administrative visits, neither Shiloh, nor Nob, nor Gibeon, the seats of the sacerdotal caste, are ever mentioned. When he counsels Saul, it is not as the priest, but as the prophet; when he sacrifices or blesses the sacrifice, it is not as the priest, but either as an individual Israelite of eminence, or as a ruler, like Saul himself. Saul's sin in both cases where he came into collision with Samuel, was not of intruding into sacerdotal functions, but of disobedience to the prophetic voice. The first was that of not waiting for Samuel's arrival, according to the sign given by Samuel at his original meeting at Ramah (1 Sam. x. 8, xiii. 8); the second was that of not carrying out the stern prophetic injunction for the destruction of the Amalekites. When, on that occasion, the aged Prophet called the captive[a] prince before him, and with his own hands hacked him limb from limb,[b] in retribution for the desolation he had brought into the homes of Israel, and thus offered up his mangled remains almost as a human sacrifice ("before the Lord in Gilgal"), we see the representative of the older part of the Jewish history. But it is the true prophetic utterance, such as breathes through the psalmists and prophets, when he says to Saul in words which, from their poetical form, must have become fixed in the national memory, "To obey is better than sacrifice, and to hearken than the fat of rams."

The parting was not one of rivals, but of dear though divided friends. The King throws himself on the Prophet with all his force; not without a vehement effort (Jos. *Ant.* vi. 7, § 5) the prophet tears himself away. The long mantle by which he was always known is rent in the struggle; and, like Ahijah after him, Samuel saw in this the omen of the coming rent in the monarchy. They parted each to his house to meet no more. But a long shadow of grief fell over the prophet. "Samuel mourned for Saul." "It grieved Samuel for Saul." "How long wilt thou mourn for Saul?" (1 Sam. xv. 11, 35, xvi. 1).

(*b.*) He is the first of the regular succession of prophets. "All the prophets from Samuel and those that follow after" (Acts iii. 24). "Ex quo sanctus Samuel propheta cœpit et deinceps donec populus Israel in Babyloniam captivus veheretur, . . . . . totum est tempus prophetarum" (Aug. *Civ. Dei*, xvii. 1). Moses, Miriam, and Deborah, perhaps Ehud, had been prophets. But it was only from Samuel that the continuous succession was unbroken. This may have been merely from the coincidence of his appearance with the beginning of the new order of things, of which the prophetical office was the chief expression. Some predisposing causes there may have been in his own family and birthplace. His mother, as we have seen, though not expressly so called, was in fact a prophetess; the word *Zophim*, as the affix of Ramathaim, has been explained, not unreasonably, to mean "seers;" and Elkanah, his father, is by the Chaldee paraphrast on 1 Sam. i. 1, said to be "a disciple of the prophets." But the connection of the continuity of the office with Samuel appears to be still more direct. It is in his lifetime, long after he had been "established as a prophet" (1 Sam. iii. 20), that we hear of the companies of disciples, called in the O. T. "the sons of the prophets," by modern writers "the schools of the prophets." All the peculiarities of their education are implied or expressed — the sacred dance, the sacred music, the solemn procession (1 Sam. x. 5, 10; 1 Chr. xxv. 1, 6). At the head of this congregation, or "church as it were within a church" (LXX. *τὴν ἐκκλησίαν*, 1 Sam. x. 5, 10), Samuel is expressly described as "standing appointed over them" (1 Sam xix. 20). Their chief residence at this time (though afterwards, as the institution spread, it struck root in other places) was at Samuel's own abode, Ramah, where they lived in habitations (*Naioth*, 1 Sam. xix. 19, &c.) apparently of a rustic kind, like the leafy huts which Elisha's disciples afterwards occupied by the Jordan (*Naioth* = "habitations," but more specifically used for "pastures").

In those schools, and learning to cultivate the prophetic gifts, were some whom we know for certain, others whom we may almost certainly conjecture, to have been so trained or influenced. One was Saul. Twice at least he is described as having been in the company of Samuel's disciples, and as having caught from them the prophetic fervour to such a degree as to have "prophesied among them" (1 Sam. x. 10, 11), and on one occasion to have thrown off his clothes, and to have passed the night in a state of prophetic trance (1 Sam. xix. 24): and even in his palace, the prophesying mingled with his madness on ordinary occasions (1 Sam. xviii. 9). Another was DAVID. The first acquaintance of Samuel with David, was when he privately anointed him at the house of Jesse [see DAVID]. But the connection thus begun with the shepherd boy must have been continued afterwards. David, at first, fled to "Naioth in Ramah," as to his second home (1 Sam. xix. 19) and the gifts of music, of song, and of prophecy, here developed on so large a scale, were exactly such as we find in the notices of those who looked up to Samuel as their father. It is, further, hardly possible to escape the conclusion that David there first met his fast friends and companions in after life, prophets like himself — GAD and NATHAN.

It is needless to enlarge on the importance with which these incidents invest the appearance of Samuel. He there becomes the spiritual father of the Psalmist king. He is also the Founder of the first regular institutions of religious instruction, and communities for the purposes of education. The schools of Greece were not yet in existence. From these Jewish institutions were developed, by a natural order, the universities of Christendom. And it may be further added, that with this view the whole life of Samuel is in accordance. He is the prophet — the only prophet till the time of Isaiah — of whom we know that he was so from his earliest years. It is this continuity of his own life and character, that makes him so fit an instrument for conducting his nation through so great a change.

The death of Samuel is described as taking place

[a] Agag is described by Josephus (*Ant.* vi. 7, § 2) as a chief of magnificent appearance; and hence rescued from destruction. This is perhaps an inference from the word מַעֲדַנֹּת, which the Vulgate translates *magnificentius*.

[b] 1 Sam. xv. The LXX. softens this into *ἐσφαξε* but the Vulg. translation, *in frusta concidit*, "cut up into small pieces," seems to be the true meaning.

Digitized by Google

in the year of the close of David's wanderings. It is said with peculiar emphasis, as if to mark the loss, that "*all* the Israelites" — all, with a universality never specified before — "were gathered together" from all parts of this hitherto divided country, and "lamented him," and "buried him," not in any consecrated place, nor outside the walls of his city, but within his own house, thus in a manner consecrated by being turned into his tomb (1 Sam. xxv. 1). His relics were translated "from Judæa" (the place is not specified) A. D. 406, to Constantinople, and received there with much pomp by the Emperor Arcadius. They were landed at the pier of Chalcedon, and thence conveyed to a church, near the palace of Hebdomon (see *Acta Sanctorum*, Aug. 20).

The situation of Ramathaim, as has been observed, is uncertain. But the place long pointed out as his tomb is the height, most conspicuous of all in the neighborhood of Jerusalem, immediately above the town of Gibeon, known to the Crusaders as "Montjoye," as the spot from whence they first saw Jerusalem, now called *Neby Samuil*, "the Prophet Samuel." The tradition can be traced back as far as the 7th century, when it is spoken of as the monastery of St. Samuel (Robinson, *Bibl. Res.* ii. 142), and if once we discard the connection of Ramathaim with the nameless city where Samuel met Saul (as is set forth at length in the articles RAMAH; RAMATHAIM-ZOPHIM), there is no reason why the tradition should be rejected. A cave is still shown underneath the floor of the mosque. "He built the tomb in his lifetime," is the account of the Mussulman guardian of the mosque, "but was not buried here till after the expulsion of the Greeks." It is the only spot in Palestine which claims any direct connection with the first great prophet who was born within its limits; and its commanding situation well agrees with the importance assigned to him in the sacred history.

His descendants were here till the time of David. Heman, his grandson, was one of the chief singers in the Levitical choir (1 Chr. vi. 33, xv. 17, xxv. 5).

The apparition of Samuel at Endor (1 Sam. xxviii. 14; Ecclus. xlvi. 20) belongs to the history of SAUL.

It has been supposed that Samuel wrote a Life of David (of course of his earlier years), which was still accessible to one of the authors of the Book of Chronicles (1 Chr. xxix. 29); but this appears doubtful. [See p. 2826 *b*.] Various other books of the O. T. have been ascribed to him by the Jewish tradition: the Judges, Ruth, the two Books of Samuel, the latter, it is alleged, being written in the spirit of prophecy. He is regarded by the Samaritans as a magician and an infidel (Hottinger, *Hist. Orient.* p. 52).

The Persian traditions fix his life in the time of Kai-i-Kobad, 2d king of Persia, with whom he is said to have conversed (D'Herbelot, *Kai Kobad*).

A. P. S.

• The prophet Samuel lived at a great transitional period of Jewish history. The Israelites had been intended for a great nation, living under the immediate Divine government, and closely knit together by religious ties. Through their unfaithfulness to God, they had become little more than a collection of independent tribes, continually engaged in harassing wars with their neighbors, and often falling for long periods together under their power. It was therefore a natural desire that they should have a king to reunite them in one nationality, and enable them to make head against their foes. To this Samuel was earnestly opposed, nor did he acquiesce in their wish until expressly directed to do so from on high. God saw that the people were too sinful for the great destiny offered them, and therefore it was fitting that in this matter of government they should be reduced to the level of other nations. It was by no means an "example of the Divine sanction resting on [Samuel's] acquiescence;" but rather of a Divine command to him to let a stiff-necked people have their way.

In the Tabernacle Samuel probably slept in one of the chambers over, or at the side of, the Tabernacle [TEMPLE]. The extreme improbability that he should have slept in the Holy of Holies is enhanced by the fact that he was evidently in a different apartment from Eli (1 Sam. iii. 4–10), and if the latter was not within the vail, much less the former. There is nothing in 1 Sam. iii. 3 to suggest such a supposition. The "Temple" is there particularized as the place "where the ark of God was," and the time is fixed as "before the lamp of God" — which was outside the vail — "went out in the Temple of the Lord." No hint is given of the place of Samuel's chamber. At a later date, when the Ark was taken into the battle with the Philistines, it does not appear that the Tabernacle was otherwise disturbed, or that Samuel then gave up his residence there. It is not likely that Samuel himself ever actually engaged in military operations. In the successful battle with the Philistines (1 Sam. vii.) he assisted by his prayers, but could have taken no part in the battle itself, as he was engaged at the time in offering sacrifice (ver 10). The name "warrior" must therefore be omitted from the list of his titles.

The narrative in 1 Sam. ix. 7, 8, affords no ground for the supposition that either he or other inspired prophets received compensation for their utterances as a *quid pro quo* after the fashion of heathen soothsayers or modern necromancers. Saul, a young man not of distinguished birth, and an entire stranger to Samuel, did not think it fitting, according to oriental etiquette, to approach the great judge of Israel and divinely appointed prophet without a present. This appears in the narrative much more as a tribute to the rank and station of Samuel than as a proposed payment for his counsel — a thing abhorrent to the whole idea of the prophetic office.

In 1 Sam. xiii. the narrative distinctly makes the sin of Saul "his intruding into sacerdotal functions." Saul says (ver. 12), "Therefore, said I, the Philistines will come down now upon me to Gilgal, and I have not made supplication unto the LORD; I forced myself therefore, and offered a burnt offering." Samuel replies — making no allusion to the not waiting for his coming, — "Thou hast done foolishly: thou hast not kept the commandment of the Lord thy God."

It is impossible that Saul, and improbable that David had any training in the schools of the prophets under Samuel. The first passage adduced in the article above in evidence of such training (1 Sam. x. 10) reads that "a company of the prophets met" Saul as he went home after his anointing (when he spent one night with Samuel, whom he had not before known) and "the spirit of God came upon him, and he prophesied among them." The only other passage given (1 Sam.

Digitized by Google

xix. 24) is quite late in the reign of Saul when he came to Naioth in pursuit of David, and there spent a day and a night, while the spirit of prophecy was upon him. In both cases the astonishment of the beholders is expressed by the exclamation, "Is Saul also among the prophets?" — which of course contradicts the supposition that he had been trained among them. In regard to David, it is inaccurately said that he fled to "'Naioth in Ramah' as to his second home (1 Sam. xix. 19)." What is said is that "he came to Samuel to Ramah and told him all that Saul had done to him. And he and Samuel went and dwelt in Naioth." David's purpose was to seek refuge with Samuel, the aged judge whom Saul still feared and respected. He went to his residence at Ramah. For reasons not mentioned, but probably from prudential considerations, they left then together and "went and dwelt at Naioth."

Some other slight inadvertencies in the above article the reader will readily correct for himself.

F. G.

**SAMUEL, BOOKS OF** (שְׁמוּאֵל: Βασιλειων Πρώτη, Δευτέρα: *Liber Regum Primus, Secundus*). Two historical books of the Old Testament, which are not separated from each other in the Hebrew MSS., and which, from a critical point of view, must be regarded as one book. The present division was first made in the Septuagint translation, and was adopted in the Vulgate from the Septuagint. But Origen, as quoted by Eusebius (*Histor. Eccles.* vi. 25), expressly states that they formed only one book among the Hebrews. Jerome (*Præf. in Libros Samuel et Malachim*) implies the same statement; and in the Talmud (*Baba Bathra*, fol. 14, c. 2), wherein the authorship is attributed to Samuel, they are designated by the name of his book, in the singular number (שמואל פרוב ספרו). After the invention of printing they were published as one book in the first edition of the whole Bible printed at Soncino in 1488 A. D., and likewise in the Complutensian Polyglot printed at Alcala, 1502–1517 A. D.; and it was not till the year 1518 that the division of the Septuagint was adopted in Hebrew, in the edition of the Bible printed by the Bomberge at Venice. The book was called by the Hebrews "Samuel," probably because the birth and life of Samuel were the subjects treated of in the beginning of the work — just as a treatise on festivals in the Mishna bears the name of *Beitsah*, an egg, because a question connected with the eating of an egg is the first subject discussed in it. [PHARISEES, vol. iii. p. 2475 *a*.] It has been suggested indeed by Abarbanel, as quoted by Carpzov (211), that the book was called by Samuel's name because all things that occur in each book may, in a certain sense, be referred to Samuel, including the acts of Saul and David, inasmuch as each of them was anointed by him, and was, as it were, the work of his hands. This, however, seems to be a refinement of explanation for a fact which is to be accounted for in a less artificial manner. And, generally, it is to be observed that the logical titles of books adopted in modern times must not be looked for in Eastern works, nor indeed in early works of modern Europe. Thus David's Lamentation over Saul and Jonathan was called "The Bow," for some reason connected with the occurrence of that word in his poem (2 Sam. i. 18–22); and Snorro Storleson's Chronicle of the Kings of Norway obtained the name of "Heimskringla," the World's Circle, because Heimskringla was the first prominent word of the MS. that caught the eye (Laing's *Heimskringla*, i. 1).

*Authorship and Date of the Book.* — The most interesting points in regard to every important historical work are the name, intelligence, and character of the historian, and his means of obtaining correct information. If these points should not be known, next in order of interest is the precise period of time when the work was composed. On all these points, however, in reference to the book of Samuel, more questions can be asked than can be answered, and the results of a dispassionate inquiry are mainly negative.

1st, as to the authorship. In common with all the historical books of the Old Testament, except the beginning of Nehemiah, the book of Samuel contains no mention in the text of the name of its author. The earliest Greek historical work extant, written by one who has frequently been called the Father of History, commences with the words, "This is a publication of the researches of Herodotus of Halicarnassus;" and the motives which induced Herodotus to write the work are then set forth. Thucydides, the writer of the Greek historical work next in order of time, who likewise specifies his reasons for writing it, commences by stating, "Thucydides the Athenian wrote the history of the war between the Peloponnesians and Athenians," and frequently uses the formula that such or such a year ended — the second, or third, or fourth, as the case might be — "of this war of which Thucydides wrote the history" (ii. 70, 103; iii. 25, 88, 116). Again, when he speaks in one passage of events in which it is necessary that he should mention his own name, he refers to himself as "Thucydides son of Olorus, who composed this work" (iv. 104). Now, with the one exception of this kind already mentioned, no similar information is contained in any historical book of the Old Testament, although there are passages not only in Nehemiah, but likewise in Ezra, written in the first person. Still, without any statement of the authorship embodied in the text, it is possible that historical books might come down to us with a title containing the name of the author. This is the case, for example, with Livy's *Roman History*, and Cæsar's *Commentaries of the Gallic War*. In the latter case, indeed, although Cæsar mentions a long series of his own actions, without intimating that he was the author of the work, and thus there is an antecedent improbability that he wrote it, yet the traditional title of the work outweighs this improbability, confirmed as the title is, by an unbroken chain of testimony, commencing with contemporaries (Cicero, *Brut.* 75; Cæsar, *De Bell. Gall.* viii. 1; Suetonius, *Jul. Cæs.* 56; Quinctilian, x. 1; Tacitus, *Germ.* 28). Here, again, there is nothing precisely similar in Hebrew history. The five books of the Pentateuch have in Hebrew no title except the first Hebrew words of each part; and the titles Genesis, Exodus, Leviticus, Numbers, and Deuteronomy, which are derived from the Septuagint, convey no information as to their author. In like manner, the book of Judges, the books of the Kings and the Chronicles, are not referred to any particular historian; and although six works bear respectively the names of Joshua, Ruth, Samuel, Ezra, Nehemiah, and Esther, there is nothing in the works themselves to preclude the idea that in each case the subject only of the work may

Digitized by Google

indicated, and not its authorship; as is shown conclusively by the titles Ruth and Esther, which no one has yet construed into the assertion that those celebrated women wrote the works concerning themselves. And it is indisputable that the title "Samuel" does not imply that the prophet was the author of the book of Samuel as a whole; for the death of Samuel is recorded in the beginning of the 25th chapter; so that, under any circumstances, a different author would be required for the remaining chapters, constituting considerably more than one half of the entire work. Again, in reference to the book of Samuel, the absence of the historian's name from both the text and the title is not supplied by any statement of any other writer, made within a reasonable period from the time when the book may be supposed to have been written. No mention of the author's name is made in the book of Kings, nor, as will be hereafter shown, in the Chronicles, nor in any other of the sacred writings. In like manner, it is not mentioned either in the Apocrypha or in Josephus. The silence of Josephus is particularly significant. He published his *Antiquities* about 1100 years after the death of David, and in them he makes constant use of the book of Samuel for one portion of his history. Indeed, it is his exclusive authority for his account of Samuel and Saul, and his main authority, in conjunction with the Chronicles, for the history of David. Yet he nowhere attempts to name the author of the book of Samuel, or of any part of it. There is a similar silence in the Mishna, where, however, the inference from such silence is far less cogent. And it is not until we come to the Babylonian Gemara, which is supposed to have been completed in its present form somewhere about 500 A. D., that any Jewish statement respecting the authorship can be pointed out, and then it is for the first time asserted (*Baba Bathra*, fol. 14, c. 2), in a passage already referred to, that "Samuel wrote his book," *i. e.* as the words imply, the book which bears his name. But this statement cannot be proved to have been made earlier than 1550 years after the death of Samuel — a longer period than has elapsed since the death of the Emperor Constantine; and unsupported as the statement is by reference to any authority of any kind, it would be unworthy of credit even if it were not opposed to the internal evidence of the book itself. At the revival of learning, an opinion was propounded by Abarbanel, a learned Jew, † A. D. 1508, that the book of Samuel was written by the prophet Jeremiah[a] (Lat. by Aug. Pfeiffer, Leipzig, 1686), and this opinion was adopted by Hugo Grotius (*Pref. ad Librum priorem Samuelis*), with a general statement that there was no discrepancy in the language, and with only one special reference. Notwithstanding the eminence, however, of these writers, this opinion must be rejected as highly improbable. Under any circumstances it could not be regarded as more than a mere guess; and it is in reality a guess uncountenanced by peculiar similarity of language, or of style, between the history of Samuel and the writings of Jeremiah. In our own time the most prevalent idea in the Anglican Church seems to have been that the first twenty-four chapters of the book of Samuel were written by the prophet himself, and the rest of the chapters by the prophets Nathan and Gad. This is the view favored by Mr. Horne (*Introduction to the Holy Scriptures*, ed. 1846, p. 45), in a work which has had very extensive circulation, and which amongst many readers has been the only work of the kind consulted in England. If, however, the authority adduced by him is examined, it is found to be ultimately the opinion "of the Talmudists, which was adopted by the most learned Fathers of the Christian Church, who unquestionably had better means of ascertaining this point than we have." Now the absence of any evidence for this opinion in the Talmud has been already indicated, and it is difficult to understand how the opinion could have been stamped with real value through its adoption by learned Jews called Talmudists, or by learned Christians called Fathers of the Christian Church, who lived subsequently to the publication of the Talmud. For there is not the slightest reason for supposing that in the year 500 A. D either Jews or Christians had access to trustworthy documents on this subject which have not been transmitted to modern times, and without such documents it cannot be shown that they had any better means of ascertaining this point than we have. Two circumstances have probably contributed to the adoption of this opinion at the present day: 1st, the growth of stricter ideas as to the importance of knowing who was the author of any historical work which advances claims to be trustworthy; and 2dly, the mistranslation of an ambiguous passage in the First Book of Chronicles (xxix. 29), respecting the authorities for the life of David. The first point requires no comment. On the second point it is to be observed that the following appears to be the correct translation of the passage in question: "Now the history of David first and last, behold it is written in the history of Samuel the seer, and in the history of Nathan the prophet, and in the history of Gad the seer" — in which the Hebrew word *dibrei*, here translated "history," has the same meaning given to it each of the four times that it is used. This agrees with the translation in the Septuagint, which is particularly worthy of attention in reference to the Chronicles, as the Chronicles are the very last work in the Hebrew Bible; and whether this arose from their having been the last admitted into the Canon, or the last composed, it is scarcely probable that any translation in the Septuagint, with one great exception, was made so soon after the composition of the original. The rendering of the Septuagint is by the word λόγοι, in the sense, so well known in Herodotus, of "history" (i. 184, ii. 161, vi. 137), and in the like sense in the Apocrypha, wherein it is used to describe the history of Tobit, βίβλος λόγων Τωβίτ. The word "history" (*Geschichte*) is likewise the word four times used in the translation of this passage of the Chronicles in Luther's Bible, and in the modern version of the German Jews made under the superintendence

[a] Professor Hitzig, in like manner, attributes some of the Psalms to Jeremiah. In support of this view, he points out, 1st, several *special* instances of striking similarity of language between those Psalms and the writings of Jeremiah, and, 2dly, agreement between historical facts in the life of Jeremiah and the situation in which the writer of those Psalms depicts himself as having been placed (Hitzig, *Die Psalmen*, pp 48–85). Whether the conclusion is correct or incorrect, this is a legitimate mode of reasoning, and there is a sound basis for a critical superstructure. See Psalms xxxi., xxxv., xl.

Digitized by Google

of the learned Dr. Zunz (Berlin, 1858). In the English Version, however, the word *dibrei* is translated in the first instance "acts" as applied to David, and then "book" as applied to Samuel, Nathan, and Gad; and thus, through the ambiguity of the word "book" the possibility is suggested that each of these three prophets wrote a book respecting his own life and times. This double rendering of the same word in one passage seems wholly inadmissible; as is also, though in a less degree, the translation of *dibrei* as "book," for which there is a distinct Hebrew word — *sepher*. And it may be deemed morally certain that this passage of the Chronicles is no authority for the supposition that, when it was written, any work was in existence of which either Gad, Nathan, or Samuel was the author.[a]

2. Although the authorship of the book of Samuel cannot be ascertained, there are some indications as to the date of the work. And yet even on this point no precision is attainable, and we must be satisfied with a conjecture as to the range, not of years or decades, but of centuries, within which the history was probably composed. Evidence on this head is either external or internal. The earliest undeniable external evidence of the existence of the book would seem to be the Greek translation of it in the Septuagint. The exact date, however, of the translation itself is uncertain, though it must have been made at some time between the translation of the Pentateuch in the reign of Ptolemy Philadelphus, who died B. C. 247, and the century before the birth of Christ. The next best external testimony is that of a passage in the Second Book of Maccabees (ii. 13), in which it is said of Nehemiah, that "he, founding a library, gathered together the acts of the kings, and the prophets, and of David, and the epistles of the kings concerning the holy gifts." Now, although this passage cannot be relied on for proving that Nehemiah himself did in fact ever found such a library,[b] yet it is good evidence to prove that the Acts of the Kings, τὰ περὶ τῶν βασιλέων, were in existence when the passage was written; and it cannot reasonably be doubted that this phrase was intended to include the book of Samuel, which is equivalent to the two first books of Kings in the Septuagint. Hence there is external evidence that the book of Samuel was written before the Second Book of Maccabees. And lastly, the passage in the Chronicles already quoted (1 Chr. xxix. 29) seems likewise to prove externally that the book of Samuel was written before the Chronicles. This is not absolutely certain, but it seems to be the most natural inference from the words that the history of David, first and last, is contained in the history of Samuel, the history of Nathan, and the history of Gad. For as a work has come down to us, entitled Samuel, which contains an account of the life of David till within a short period before his death, it appears most reasonable to conclude (although this point is open to dispute) that the writer of the Chronicles referred to this work by the title History of Samuel. In this case, admitting the date assigned, on internal grounds, to the Chronicles by a modern Jewish writer of undoubted learning and critical powers, there would be external evidence for the existence of the book of Samuel earlier than 247 B. C., though not earlier than 312 B. C., the era of the Seleucidæ (Zunz, *Die Gottesdienstlichen Vorträge der Juden*, p. 32). Supposing that the Chronicles were written earlier, this evidence would go, in precise proportion, further back, but there would be still a total absence of earlier external evidence on the subject than is contained in the Chronicles. If, however, instead of looking solely to the external evidence, the internal evidence respecting the book of Samuel is examined, there are indications of its having been written some centuries earlier. On this head the following points are worthy of notice: —

1. The book of Samuel seems to have been written at a time when the Pentateuch, whether it was or was not in existence in its present form, was at any rate not acted on as the rule of religious observances. According to the Mosaic Law as finally established, sacrifices to Jehovah were not lawful anywhere but before the door of the Tabernacle of the congregation, whether this was a permanent temple, as at Jerusalem, or otherwise (Deut. xii. 13, 14; Lev. xvii. 3, 4; but see Ex. xx. 24). But in the book of Samuel, the offering of sacrifices, or the erection of altars, which implies sacrifices, is mentioned at several places, such as Mizpeh, Ramah, Bethel, the threshing-place of Araunah the Jebusite, and elsewhere, not only without any disapprobation, apology, or explanation, but in a way which produces the impression that such sacrifices were pleasing to Jehovah (1 Sam. vii. 9, 10, 17, ix. 13, x. 3, xiv. 35; 2 Sam. xxiv. 18–25). This circumstance points to the date of the book of Samuel as earlier than the reformation of Josiah, when Hilkiah the high-priest told Shaphan the scribe that he had found the Book of the Law in the house of Jehovah, when the Passover was kept as was enjoined in that book, in a way that no Passover had been holden since the days of the Judges, and when the worship upon high-places was abolished by the king's orders (2 K. xxii. 8, xxiii. 8, 13, 15, 19, 21, 22). The probability that a sacred historian, writing after that reformation, would have expressed disapprobation of, or would have accounted for, any seeming departure from the laws of the Pentateuch by David, Saul, or Samuel is not in itself conclusive, but joined to other considerations it is entitled to peculiar weight. The natural mode of dealing with such a religious scandal, when it shocks the ideas of a later generation, is followed by the author of the book of Kings, who

[a] In the Swedish Bible the word *dibrei* in each of the four instances is translated "acts" (*Gerningar*), using precisely the same word which is used to designate the Acts of the Apostles in the New Testament. This translation is self-consistent and admissible. But the German translations, supported as they are by the Septuagint, seem preferable.

[b] Professors Ewald and Bleek have accepted the statement that Nehemiah founded such a library, and they make inferences from the account of the library to the time when certain books of the Old Testament were admitted into the Canon. There are, however, the following reasons for rejecting the statement: 1st. It occurs in a letter generally deemed spurious. 2dly. In the same letter a fabulous story is recorded not only of Jeremiah (ii. 1–7), but likewise of Nehemiah himself. 3dly. An erroneous historical statement is likewise made in the same letter, that Nehemiah built the Temple of Jerusalem (i 18). No witness in a court of justice, whose credit had been shaken to a similar extent, would, unless corroborated by other evidence, be relied on as an authority for any important fact.

Digitized by Google

undoubtedly lived later than the reformation of Josiah, or than the beginning, at least, of the captivity of Judah (2 K. xxv. 21, 27). This writer mentions the toleration of worship on high-places with disapprobation, not only in connection with bad kings, such as Manasseh and Ahaz, but likewise as a drawback in the excellence of other kings, such as Asa, Jehoshaphat, Jehoash, Amasiah, Azariah, and Jotham, who are praised for having done what was right in the sight of Jehovah (1 K. xv. 14, xxii. 43; 2 K. xii. 3, xiv. 4, xv. 4, 35, xvi. 4, xxi. 3); and something of the same kind might have been expected in the writer of the book of Samuel, if he had lived at a time when the worship on high-places had been abolished.

2. It is in accordance with this early date of the book of Samuel that allusions in it even to the existence of Moses are so few. After the return from the Captivity, and more especially after the changes introduced by Ezra, Moses became that great central figure in the thoughts and language of devout Jews which he could not fail to be when all the laws of the Pentateuch were observed, and they were all referred to him as the divine prophet who communicated them directly from Jehovah. This transcendent importance of Moses must already have commenced at the finding of the Book of the Law at the reformation of Josiah. Now it is remarkable that the book of Samuel is the historical work of the Old Testament in which the name of Moses occurs most rarely. In Joshua it occurs 56 times; in Chronicles, Ezra, and Nehemiah, 31 times; in the book of Kings ten times; in Judges three times; but in Samuel only twice (Zunz, *Vortrâge*, 35). And it is worthy of note that in each case Moses is merely mentioned with Aaron as having brought the Israelites out of the land of Egypt, but nothing whatever is said of the *Law* of Moses (1 Sam. xii. 6, 8). It may be thought that no inference can be drawn from this omission of the name of Moses, because, inasmuch as the Law of Moses, as a whole, was evidently not acted on in the time of Samuel, David, and Solomon, there was no occasion for a writer, however late he lived, to introduce the name of Moses at all in connection with their life and actions. But it is very rare indeed for later writers to refrain in this way from importing the ideas of their own time into the account of earlier transactions. Thus, very early in the book of Kings there is an allusion to what is "written in the Law of Moses" (1 K. ii. 3). Thus the author of the book of Chronicles makes, for the reign of David, a calculation of money in *darics*, a Persian coin, not likely to have been in common use among the Jews until the Persian domination had been fully established. Thus, more than once, Josephus, in his *Antiquities of the Jews*, attributes expressions to personages in the Old Testament which are to be accounted for by what was familiar to his own mind, although they are not justified by his authorities. For example, evidently copying the history of a transaction from the book of Samuel, he represents the prophet Samuel as exhorting the people to bear in mind "the code of laws which Moses had given them" (τῆς Μωυσέως νομοθεσίας, *Ant.* vi. 5, § 3), though there is no mention of Moses, or of his legislation, in the corresponding passage of Samuel (1 Sam. xii. 20–25). Again, in giving an account of the punishments with which the Israelites were threatened for disobedience of the Law by Moses in the book of Deuteronomy, Josephus attributes to Moses the threat that their temple should be burned (*Ant.* iv. 8, § 46). But no passage can be pointed out in the whole Pentateuch in which such a threat occurs; and in fact, according to the received chronology (1 K. vi. 1), or according to any chronology, the first temple at Jerusalem was not built till some centuries after the death of Moses. Yet this allusion to the burning of an unbuilt temple ought not to be regarded as an intentional misrepresentation. It is rather an instance of the tendency in an historian who describes past events to give unconsciously indications of his living himself at a later epoch. Similar remarks apply to a passage of Josephus (*Ant.* vii. 4, § 4), in which, giving an account of David's project to build a temple at Jerusalem, he says that David wished to prepare a temple for God, "as Moses commanded," though no such command or injunction is found to be in the Pentateuch. To a religious Jew, when the laws of the Pentateuch were observed, Moses could not fail to be the predominant idea in his mind; but Moses would not necessarily be of equal importance to a Hebrew historian who lived before the reformation of Josiah.

3. It tallies with an early date for the composition of the book of Samuel that it is one of the best specimens of Hebrew prose in the golden age of Hebrew literature. In prose it holds the same place which Joel and the undisputed prophecies of Isaiah hold in poetical or prophetical language. It is free from the peculiarities of the book of Judges, which it is proposed to account for by supposing that they belonged to the popular dialect of Northern Palestine; and likewise from the slight peculiarities of the Pentateuch, which it is proposed to regard as archaisms[a] (Gesenius, *Hebrew Grammar*, § 2, 5). It is a striking contrast to the language of the book of Chronicles, which undoubtedly belongs to the silver age of Hebrew prose, and it does not contain as many alleged Chaldaisms as the few in the book of Kings. Indeed the number of Chaldaisms in the book of Samuel which the most rigid scrutiny has suggested do not amount to more than about six instances, some of them doubtful ones, in 90 pages of our modern Hebrew Bible. And, considering the general purity of the language, it is not only possible, but probable, that the trifling residuum of Chaldaisms may be owing to the inadvertence of Chaldee copyists, when Hebrew had ceased to be a living language. At the same time this argument from language must not be pushed so far as to imply that, standing alone, it would be conclusive; for some writings, the date of which is about the time of the Captivity, are in pure Hebrew, such as the prophecies of Habakkuk, the Psalms cxx., cxxxvii., cxxxix., pointed out by Gesenius, and by far the largest portion of the latter part of the prophecies attributed to "Isaiah" (xl.–lxvi.). And we have not sufficient knowledge of the condition of the Jews at the time of the Captivity, or for a few centuries after, to entitle any one to assert that there were no individuals among them who wrote the purest Hebrew. Still the balance of probability inclines to the contrary direction, and, as a subsidiary argument

[a] As compared with Samuel, the peculiarities of the Pentateuch are not *quite* as striking as the differences in language between Lucretius and Virgil: the parallel which has been suggested by Gesenius. Virgil seems to have been about 14 years of age when Lucretius' great poem was published.

Digitized by Google

he purity of language of the book of Samuel is entitled to some weight.

Assuming, then, that the work was composed at a period not later than the reformation of Josiah, — say, B. C. 622, — the question arises as to the very earliest point of time at which it could have existed in its present form. And the answer seems to be, that the earliest period was subsequent to the secession of the Ten Tribes. This results from the passage in 1 Sam. xxvii. 6, wherein it is said of David, "Then Achish gave him Ziklag that day: wherefore Ziklag pertaineth unto the kings of Judah unto this day:" for neither Saul, David, nor Solomon is in a single instance called king of Judah simply. It is true that David is said, in one narrative respecting him, to have reigned in Hebron seven years and six months over Judah (2 Sam. v. 5) before he reigned in Jerusalem thirty-three years over all Israel and Judah; but he is, notwithstanding, never designated by the title King of Judah. Before the secession, the designation of the kings was that they were kings of Israel (1 Sam. xiii. 1, xv. 1, xvi. 1; 2 Sam. v. 17, viii. 15; 1 K. ii. 11, iv. 1, vi. 1, xi. 42). It may safely, therefore, be assumed that the book of Samuel could not have existed in its present form at an earlier period than the reign of Rehoboam, who ascended the throne B. C. 975. If we go beyond this, and endeavor to assert the precise time between 975 B. C. and 622 B. C., when it was composed, all certain indications fail us. The expression "unto this day," used several times in the book (1 Sam. v. 5, vi. 18, xxx. 25; 2 Sam. iv. 3, vi. 8), in addition to the use of it in the passage already quoted, is too indefinite to prove anything, except that the writer who employed it lived subsequently to the events he described. It is inadequate to prove whether he lived three centuries, or only half a century, after those events. The same remark applies to the phrase, "Therefore it became a proverb, 'Is Saul among the Prophets?'" (1 Sam. x. 12), and to the verse, "Beforetime in Israel, when a man went to enquire of God, thus he spake, Come, and let us go to the seer: for he that is now called a Prophet was beforetime called a Seer" (1 Sam. ix. 9). In both cases it is not certain that the writer lived more than eighty years after the incidents to which he alludes. In like manner, the various traditions respecting the manner in which Saul first became acquainted with David (1 Sam. xvi. 14–23, xvii. 55–58) — respecting the manner of Saul's death (1 Sam. xxxi. 2–6, 8–13; 2 Sam. i. 2–12) — do not necessarily show that a very long time (say even a century) elapsed between the actual events and the record of the traditions. In an age anterior to the existence of newspapers or the invention of printing, and when probably few could read, thirty or forty years, or even less, have been sufficient for the growth of different traditions respecting the same historical fact. Lastly, internal evidence of language lends no assistance for discrimination in the period of 353 years within which the book may have been written: for the undisputed Hebrew writings belonging to that period are comparatively few, and not one of them is a history, which would present the best points of comparison. They embrace scarcely more than the writings of Joel, Amos, Hosea, Micah, Nahum, and a certain portion of the writings under the title "Isaiah." The whole of these writings together can scarcely be estimated as occupying more than sixty pages of our Hebrew Bibles, and whatever may be their peculiarities of language or style, they do not afford materials for a safe inference as to which of their authors was likely to have been contemporary with the author of the book of Samuel. All that can be asserted as undeniable is, that the book, as a whole, can scarcely have been composed later than the reformation of Josiah, and that it could not have existed in its present form earlier than the reign of Rehoboam.

It is to be added that no great weight, in opposition to this conclusion, is due to the fact that the death of David, although in one passage evidently implied (2 Sam. v. 5), is not directly recorded in the book of Samuel. From this fact Hävernick (*Einleitung in das Alte Testament*, part ii., p. 145) deems it a certain inference that the author lived not long after the death of David. But this is a very slight foundation for such an inference, since we know nothing of the author's name, or of the circumstances under which he wrote, or of his precise ideas respecting what is required of an historian. We cannot, therefore, assert, from the knowledge of the character of his mind, that his deeming it logically requisite to make a formal statement of David's death would have depended on his living a short time or a long time after that event. Besides, it is very possible that he did formally record it, and that the mention of it was subsequently omitted on account of the more minute details by which the account of David's death is preceded in the First Book of Kings. There would have been nothing wrong in such an omission, nor indeed, in any addition to the book of Samuel; for, as those who finally inserted it in the Canon did not transmit it to posterity with the name of any particular author, their honesty was involved, not in the mere circumstance of their omitting or adding anything, but solely in the fact of their adding nothing which they believed to be false, and of omitting nothing of importance which they believed to be true.

In this absolute ignorance of the author's name, and vague knowledge of the date of the work, there has been a controversy whether the book of Samuel is or is not a compilation from preëxisting documents; and if this is decided in the affirmative, to what extent the work is a compilation. It is not intended to enter fully here into this controversy, respecting which the reader is referred to Dr. Davidson's *Introduction to the Critical Study and Knowledge of the Holy Scriptures*, London, Longman, 1856, in which this subject is dispassionately and fairly treated. One observation, however, of some practical importance, is to be borne in mind. It does not admit of much reasonable doubt that in the book of Samuel there are two different accounts (already alluded to) respecting Saul's first acquaintance with David, and the circumstances of Saul's death — and that yet the editor or author of the book did not let his mind work upon these two different accounts so far as to make him interpose his own opinion as to which of the conflicting accounts was correct, or even to point out to the reader that the two accounts were apparently contradictory. Hence, in a certain sense, and to a certain extent, the author must be regarded as a compiler, and not an original historian. And in reference to the two accounts of Saul's death, this is not the less true, even if the second account be deemed reconcilable with the first by the supposition that the Amalekite had fabricated the story of his having killed Saul (2 Sam.

Digitized by Google

i. 6–10). Although possibly true, this is an unlikely supposition, because, as the Amalekite's object in a lie would have been to curry favor with David, it would have been natural for him to have forged some story which would have redounded more to his own credit than the clumsy and improbable statement that he, a mere casual spectator, had killed Saul at Saul's own request. But whether the Amalekite said what was true or what was false, an historian, as distinguished from a compiler, could scarcely have failed to convey his own opinion on the point, affecting, as on one alternative it did materially, the truth of the narrative which he had just before recorded respecting the circumstances under which Saul's death occurred. And if compilation is admitted in regard to the two events just mentioned, or to one of them, there is no antecedent improbability that the same may have been the case in other instances; such, for example, as the two explanations of the proverb, "Is Saul also among the Prophets?" (1 Sam. x. 9–12, xix. 22–24), or the two accounts of David's having forborne to take Saul's life, at the very time when he was a fugitive from Saul, and his own life was in danger from Saul's enmity (1 Sam. xxiv. 3–15, xxvi. 7–12). The same remark applies to what seem to be summaries or endings of narratives by different writers, such as 1 Sam. vii. 13–17, 1 Sam. xiv. 47–52, compared with chapter xv.; 2 Sam. viii. 15–18. In these cases, if each passage were absolutely isolated, and occurred in a work which contained no other instance of compilation, the inference to be drawn might be uncertain. But when even one instance of compilation has been clearly established in a work, all other seeming instances must be viewed in its light, and it would be unreasonable to contest each of them singly, on principles which imply that compilation is as unlikely as it would be in a work of modern history. It is to be added, that as the author and the precise date of the book of Samuel are unknown, its historical value is not impaired by its being deemed to a certain extent a compilation. Indeed, from one point of view, its value is in this way somewhat enhanced; as the probability is increased of its containing documents of an early date, some of which may have been written by persons contemporaneous, or nearly so, with the events described.

*Sources of the Book of Samuel.* — Assuming that the book is a compilation, it is a subject of rational inquiry to ascertain the materials from which it was composed. But our information on this head is scanty. The only work actually quoted in this book is the book of Jasher; *i. e.* the book of the Upright. Notwithstanding the great learning which has been brought to bear on this title by numerous commentators [vol. ii. p. 1215], the meaning of the title must be regarded as absolutely unknown, and the character of the book itself as uncertain. The best conjecture hitherto offered as an induction from facts is, that it was a book of Poems; but the facts are too few to establish this as a positive general conclusion. It is only quoted twice in the whole Bible, once as a work containing David's Lamentation over Saul and Jonathan (2 Sam. i. 18), and secondly, as an authority for the statement that the sun and moon stood still at the command of Joshua (Josh. x. 13). There can be no doubt that the Lamentation of David is a poem; and it is most probable that the other passage referred to as written in the book of Jasher includes four lines of Hebrew poetry,[a] though the poetical diction and rhythm of the original are somewhat impaired in a translation. But the only sound deduction from these facts is, that the book of Jasher contained some poems. What else it may have contained we cannot say, even negatively. Without reference, however, to the book of Jasher, the book of Samuel contains several poetical compositions, on each of which a few observations may be offered; commencing with the poetry of David.

(1.) David's Lamentation over Saul and Jonathan, called "The Bow." This extremely beautiful composition, which seems to have been preserved through David's having caused it to be taught to the children of Judah (2 Sam. i. 18), is universally admitted to be the genuine production of David. In this respect, it has an advantage over the Psalms; as, owing to the unfortunate inaccuracy of some of the inscriptions, no one of the psalms attributed to David has wholly escaped challenge. One point in the Lamentation especially merits attention, that, contrary to what a later poet would have ventured to represent, David, in the generosity and tenderness of his nature, sounds the praises of Saul.

(2.) David's Lamentation on the death of Abner (2 Sam. iii. 33, 34). There is no reason to doubt the genuineness of this short poetical ejaculation.

(3.) 2 Sam. xxii. A Song of David, which is introduced with the inscription that David spoke the words of the song to Jehovah, in the day that Jehovah had delivered him out of the hand of all his enemies and out of the hand of Saul. This song, with a few unimportant verbal differences, is merely the xviiith Psalm, which bears substantially the same inscription. For poetical beauty, the song is well worthy to be the production of David. The following difficulties, however, are connected with it.

(*a.*) The date of the composition is assigned to the day when David had been delivered not only out of the hand of all his enemies, but likewise "out of the hand of Saul." Now David reigned forty years after Saul's death (2 Sam. v. 4, 5), and it was as king that he achieved the successive conquests to which allusion is made in the psalm. Moreover, the psalm is evidently introduced as composed at a late period of his life; and it immediately precedes the twenty-third chapter, which commences with the passage, "Now these be the last words of David." It sounds strange, therefore, that the name of Saul should be introduced, whose hostility, so far distant in time, had been

---

[a] Any Hebrew scholar who will write out the original four lines commencing with "Sun, stand thou still upon Gibeon!" may satisfy himself that they belong to a poem. The last line, "Until the people had avenged themselves upon their enemies," which in the A. V. is somewhat heavy, is almost unmistakably a line of poetry in the original. In a narrative respecting the Israelites in arose they would not have been described as גוי (*gôi*), without even an article. Moreover, there is no other instance in which the simple accusative of the person on whom vengeance is taken is used after נקם (*nakam*). In simple poesy מן (*min*) intervenes, and, like the article, it may have been here omitted for conciseness.

Digitized by Google

endowed, as it were, by David in his noble Lamentation.

(*b.*) In the closing verse (2 Sam. xxii. 51), Jehovah is spoken of as showing "mercy to his anointed, unto David and his seed for evermore." These words would be more naturally written *of* David than *by* David. They may, however, be a later addition; as it may be observed that at the present day, notwithstanding the safeguard of printing, the poetical writings of living authors are occasionally altered, and it must be added disfigured, in printed hymn-books. Still, as far as they go, the words tend to raise a doubt whether the psalm was written by David, as it cannot be *proved* that they are an addition.

(*c.*) In some passages of the psalm, the strongest assertions are made of the poet's uprightness and purity. He says of himself, "According to the cleanness of my hands hath He recompensed me. For I have kept the ways of Jehovah, and have not wickedly departed from my God. For all his judgments were before me: and as for his statutes, I did not depart from them. I was also upright before Him, and have kept myself from mine iniquity" (xxii. 21–24). Now it is a subject of reasonable surprise that, at any period after the painful incidents of his life in the matter of Uriah, David should have used this language concerning himself. Admitting fully that, in consequence of his sincere and bitter contrition, "the princely heart of innocence" may have been freely bestowed upon him, it is difficult to understand how this should have influenced him so far in his assertions respecting his own uprightness in past times, as to make him forget that he had once been betrayed by his passions into adultery and murder. These assertions, if made by David himself, would form a striking contrast to the tender humility and self-mistrust in connection with the same subject by a great living genius of spotless character. (See "Christian Year," *6th Sunday after Trinity — ad finem.*)

(4.) A song, called "last words of David" (2 Sam. xxiii. 2–7). According to the Inscription, it was composed by "David the son of Jesse, the man who was raised up on high, the anointed of the God of Jacob, and the sweet psalmist of Israel." It is suggested by Bleek, and is in itself very probable, that both the psalm and the inscription were taken from some collection of songs or psalms. There is not sufficient reason to deny that this song is correctly ascribed to David.

(5.) One other song remains, which is perhaps the most perplexing in the book of Samuel. This is the Song of Hannah, a wife of Elkanah (1 Sam. ii. 1–10). One difficulty arises from an allusion in verse 10 to the existence of a king under Jehovah, many years before the kingly power was established among the Israelites. Another equally great difficulty arises from the internal character of the song. It purports to be written by one of two wives as a song of thanksgiving for having borne a child, after a long period of barrenness, which had caused her to be looked down upon by the other wife of her husband. But, deducting a general allusion, in verse 5, to the barren having borne seven, there is nothing in the song peculiarly applicable to the supposed circumstances, and by far the greater portion of it seems to be a song of triumph for deliverance from powerful enemies in battle (vv. 1, 4, 10). Indeed, Thenius does not hesitate to conjecture that it was written by David after he had slain Goliath, and the Philistines had been defeated in a great battle (*Exegetisches Handbuch*, p. 8). There is no historical warrant for this supposition; but the song is certainly more appropriate to the victory of David over Goliath, than to Hannah's having given birth to a child under the circumstances detailed in the first chapter of Samuel. It would, however, be equally appropriate to some other great battles of the Israelites.

In advancing a single step beyond the songs of the book of Samuel, we enter into the region of conjecture as to the materials which were at the command of the author; and in points which arise for consideration, we must be satisfied with a suspense of judgment, or a slight balance of probabilities. For example, it being plain that in some instances there are two accounts of the same transaction, it is desirable to form an opinion whether these were founded on distinct written documents, or on distinct oral traditions. This point is open to dispute; but the theory of written documents seems preferable; as in the alternative of mere oral traditions it would have been supereminently unnatural even for a compiler to record them without stating in his own person that there were different traditions respecting the same event. Again, the truthful simplicity and extraordinary vividness of some portions of the book of Samuel naturally suggest the idea that they were founded on contemporary documents or a peculiarly trustworthy tradition. This applies specially to the account of the combat between David and Goliath, which has been the delight of successive generations, which charms equally in different ways the old and the young, the learned and the illiterate, and which tempts us to deem it certain that the account must have proceeded from an eye-witness. On the other hand, it is to be remembered that vividness of description often depends more on the discerning faculties of the narrator than on mere bodily presence. "It is the mind that sees," so that 200 years after the meeting of the Long Parliament a powerful imaginative writer shall portray Cromwell more vividly than Ludlow, a contemporary who knew him and conversed with him. Moreover, Livy has described events of early Roman history which educated men regard in their details as imaginary; and Defoe, Swift, and the authors of *The Arabian Nights* have described events which all men admit to be imaginary, with such seemingly authentic details, with such a charm of reality, movement, and spirit, that it is sometimes only by a strong effort of reason that we escape from the illusion that the narratives are true. In the absence, therefore, of any external evidence on this point, it is safer to suspend our judgment as to whether any portion of the book of Samuel is founded on the writing of a contemporary, or on a tradition entitled to any peculiar credit. Perhaps the two conjectures respecting the composition of the book of Samuel which are most entitled to consideration are — 1st. That the list which it contains of officers or public functionaries under David is the result of contemporary registration; and 2dly. That the book of Samuel was the compilation of some one connected with the schools of the prophets, or penetrated by their spirit. On the first point, the reader is referred to such passages as 2 Sam. viii. 16–18, and xx. 23–26, in regard to which one fact may be mentioned. It has already been stated [KING, vol. i. p. 1540 b]

Digitized by Google

that under the kings there existed an officer called Recorder, Remembrancer, or Chronicler; in Hebrew, *mazkir*. Now it can scarcely be a mere accidental coincidence that such an officer is mentioned for the first time in David's reign, and that it is precisely for David's reign that a list of public functionaries is for the first time transmitted to us. On the second point, it cannot but be observed what prominence is given to prophets in the history, as compared with priests and Levites. This prominence is so decided, that it undoubtedly contributed towards the formation of the uncritical opinion that the book of Samuel was the production of the prophets Samuel, Nathan, and Gad. This opinion is unsupported by external evidence, and is contrary to internal evidence; but it is by no means improbable that some writers among the sons of the prophets recorded the actions of those prophets. This would be peculiarly probable in reference to Nathan's rebuke of David after the murder of Uriah. Nathan here presents the image of a prophet in its noblest and most attractive form. Boldness, tenderness, inventiveness, and tact, were combined in such admirable proportions, that a prophet's functions, if always discharged in a similar manner with equal discretion, would have been acknowledged by all to be purely beneficent. In his interposition there is a kind of ideal moral beauty. In the schools of the prophets he doubtless held the place which St. Ambrose afterwards held in the minds of priests for the exclusion of the Emperor Theodosius from the church at Milan after the massacre at Thessalonica. It may be added, that the following circumstances are in accordance with the supposition that the compiler of the book of Samuel was connected with the schools of the prophets. The designation of Jehovah as the "Lord of Hosts," or God of Hosts, does not occur in the Pentateuch, or in Joshua, or in Judges; but it occurs in the book of Samuel thirteen times. In the book of Kings it occurs only seven times; and in the book of Chronicles, as far as this is an original or independent work, it cannot be said to occur at all, for although it is found in three passages, all of these are evidently copied from the book of Samuel. (See 1 Chr. xi. 9 — in the original, precisely the same words as in 2 Sam. v. 10; and see 1 Chr. xvii. 7, 24, copied from 2 Sam. vii. 8, 26.) Now this phrase, though occurring so rarely elsewhere in prose, that it occurs nearly twice as often in the book of Samuel as in all the other historical writings of the Old Testament put together, is a very favorite phrase in some of the great prophetical writings. In Isaiah it occurs sixty-two times (six times only in the chapters xl.–xvi.), and in Jeremiah sixty-five times at least. Again, the predominance of the idea of the prophetical office in Samuel is shown by the very subordinate place assigned in it to the Levites. The difference between the Chronicles and the book of Samuel in this respect is even more striking than their difference in the use of the expression "Lord of Hosts;"[a] though in a reverse proportion. In the whole book of Samuel the Levites are mentioned only twice (1 Sam. vi. 15; 2 Sam. xv. 24), while in Chronicles they are mentioned about thirty times in the first book alone, which contains the history of David's reign.

In conclusion, it may be observed that it is very instructive to direct the attention to the passages in Samuel and the Chronicles which treat of the same events, and, generally, to the manner in which the life of David is treated in the two histories. A comparison of the two works tends to throw light on the state of the Hebrew mind at the time when the book of Samuel was written, compared with the ideas prevalent among the Jews some hundred years later, at the time of the compilation of the Chronicles. Some passages correspond almost precisely word for word; others agree, with slight but significant alterations. In some cases there are striking omissions; in others there are no less remarkable additions. Without attempting to exhaust the subject, some of the differences between the two histories will be now briefly pointed out; though at the same time it is to be borne in mind that, in drawing inferences from them, it would be useful to review likewise all the differences between the Chronicles and the book of Kings.

1. In 1 Sam. xxxi. 12, it is stated that the men of Jabesh Gilead took the body of Saul and the bodies of his sons from the wall of Beth-shan, and came to Jabesh and burnt them there. The compiler of the Chronicles omits mention of the burning of their bodies, and, as it would seem, designedly; for he says that the valiant men of Jabesh Gilead buried the *bones* of Saul and his sons under the oak in Jabesh; whereas if there had been no burning, the natural expression would have been to have spoken of burying their *bodies*, instead of their bones. Perhaps the chronicler objected so strongly to the burning of bodies that he purposely refrained from recording such a fact respecting the bodies of Saul and his sons, even under the peculiar circumstances connected with that incident.[b]

2. In the Chronicles it is assigned as one of the causes of Saul's defeat that he had asked counsel of one that had a familiar spirit, and "had not inquired of Jehovah" (1 Chr. x. 13, 14); whereas in Samuel it is expressly stated (1 Sam. xxviii. 6) that Saul *had* inquired of Jehovah before he consulted the witch of Endor, but that Jehovah had not answered him either by dreams, or by Urim, or by prophets.

3. The Chronicles make no mention of the civil war between David and Ishbosheth the son of Saul, nor of Abner's changing sides, nor his assassination by Joab, nor of the assassination of Ishbosheth by Rechab and Baanah (2 Sam. ii. 8–32, iii., iv.).

---

[a] It is worthy of note that the prophet Ezekiel never uses the expression "Lord of Hosts." On the other hand, there is no mention of the Levites in the undisputed writings of Isaiah.

[b] Tacitus records it as a distinguishing custom of the Jews, "corpora condere quam cremare, ex more Ægyptio" (*Hist.* v. 5). And it is certain that, in later times, they buried dead bodies, and did not burn them; though, notwithstanding the instance in Gen. l. 2. they did not, strictly speaking, embalm them, like the Egyptians. And though it may be suspected, it cannot be proved, that they ever burned their dead in early times. The passage in Am. vi. 10 is ambiguous. It may merely refer to the burning of bodies as a sanitary precaution in a plague; but it is not undoubted that burning is alluded to. See Fürst *s. v.* שְׂרֵפָה. The burning *for* Asa (2 Chr. xvi. 14) is different from the burning of his body. Compare Jer. xxxiv. 5; 2 Chr. xxi. 19, 20. Joseph. *Ant.* xv. 8, § 3; *De Bell. Jud.* i. 33, § 9.

Digitized by Google

4. David's adultery with Bath-sheba, the exposure of Uriah to certain death by David's orders, the solemn rebuke of Nathan, and the penitence of David, are all passed over in absolute silence in the Chronicles (2 Sam. xi., xii. 1–25).

5. In the account given in Samuel (2 Sam. vi. 2–11) of David's removing the Ark from Kirjath-jearim, no special mention is made of the priests or Levites. David's companions are said, generally, to have been "all the people that were with him," and "all the house of Israel" are said to have played before Jehovah on the occasion with all manner of musical instruments. In the corresponding passage of the Chronicles (1 Chr. xiii. 1–14) David is represented as having publicly proposed to send an invitation to the priests and Levites in their cities and "suburbs," and this is said to have been assented to by all the congregation. Again, in the preparations which are made for the reception of the Ark of the Covenant at Jerusalem, nothing is said of the Levites in Samuel; whereas in the Chronicles David is introduced as saying that none ought to carry the Ark of God but the Levites; the special numbers of the Levites and of the children of Aaron are there given; and names of Levites are specified as having been appointed singers and players on musical instruments in connection with the Ark (1 Chr. xv., xvi. 1–6).

6. The incident of David's dancing in public with all his might before Jehovah, when the Ark was brought into Jerusalem, the censorious remarks of his wife Michal on David's conduct, David's answer, and Michal's punishment, are fully set forth in Samuel (2 Sam. vi. 14–23); but the whole subject is noticed in one verse only in Chronicles (1 Chr. xv. 29). On the other hand, no mention is made in Samuel of David's having composed a psalm on this great event; whereas in Chronicles a psalm is set forth which David is represented as having delivered into the hand of Asaph and his brethren on that day (1 Chr. xvi. 7–36). Of this psalm the first fifteen verses are almost precisely the same as in Ps. cv. 1–15. The next eleven verses are the same as in Ps. xcvi. 1–11; and the next three concluding verses are in Ps. cvi. 1, 47, 48. The last verse but one of this psalm (1 Chr. xvi. 35) appears to have been written at the time of the Captivity.

7. It is stated in Samuel that David in his conquest of Moab put to death two thirds either of the inhabitants or of the Moabitish army (2 Sam. viii. 2). This fact is omitted in Chronicles (1 Chr. xviii. 2), though the words used therein in mentioning the conquest are so nearly identical with the beginning and the end of the passage in Samuel, that in the A. V. there is no difference in the translation of the two texts, "And he smote Moab; and the Moabites became David's servants, and brought gifts."

8. In 2 Sam. xxi. 19, it is stated that "there was a battle in Gob with the Philistines, where Elhanan the son of Jaare-oregim, a Bethlehemite (in the original *Beit hal-lachmi*), slew Goliath the Gittite, the staff of whose spear was like a weaver's beam." In the parallel passage in the Chronicles (1 Chr. xx. 5) it is stated that "Elhanan the son of Jair slew Lachmi the brother of Goliath the Gittite." Thus Lachmi, which in the former case is merely part of an adjective describing Elhanan's place of nativity, seems in the Chronicles to be the substantive name of the man whom Elhanan slew, and is so translated in the LXX. [ELHANAN, i. 696 f.; LAHMI, ii. 1581.]

9. In Samuel (2 Sam. xxiv. 1) it is stated that, the anger of Jehovah having been kindled against Israel, *He* moved David against them to give orders for taking a census of the population. In the Chronicles (1 Chr. xxi. 1) it is mentioned that David was provoked to take a census of the population *by Satan*. This last is the first and the only instance in which the name of Satan is introduced into any historical book of the Old Testament. In the Pentateuch Jehovah himself is represented as hardening Pharaoh's heart (Ex. vii. 13), as in this passage of Samuel He is said to have incited David to give orders for a census.[a]

10. In the incidents connected with the three days' pestilence upon Israel on account of the census, some facts of a very remarkable character are narrated in the Chronicles, which are not mentioned in the earlier history. Thus in Chronicles it is stated of the Angel of Jehovah, that he stood between the earth and the heaven, having a drawn sword in his hand stretched over Jerusalem; that afterwards Jehovah commanded the angel, and that the angel put up again his sword into its sheath[b] (1 Chr. xxi. 15–27). It is further stated (ver. 20) that Ornan and his four sons hid themselves when they saw the angel; and that when David (ver. 26) had built an altar to Jehovah, and offered burnt-offerings to Him, Jehovah answered him from heaven by fire upon the altar of burnt-offering. Regarding all these circumstances there is absolute silence in the corresponding chapter of Samuel.

11. The Chronicles make no mention of the horrible fact mentioned in the book of Samuel (2 Sam. xxi. 3–9) that David permitted the Gibeonites to sacrifice seven sons of Saul to Jehovah, as an atonement for the injuries which the Gibeonites had formerly received from Saul. This barbarous act of superstition, which is not said to have been commanded by Jehovah (ver. 1), is one of the most painful incidents in the life of David, and can scarcely be explained otherwise than by the supposition either that David seized this opportunity to rid himself of seven possible rival claimants to the throne, or that he was, for a while at least, infected by the baneful example of the Phœnicians, who endeavored to avert the supposed wrath of their gods by human sacrifices [PHŒNICIA]. It was, perhaps, wholly foreign to the ideas of the Jews at the time when the book of Chronicles was compiled.

---

[a] Th. Parker (De Wette, *Introd. to the O. T.* ii. 268) speaks of "an amusing mistake" in 2 Sam. xxiii. 21, as compared with 1 Chr. xi. 23. But there is no foundation for this, unless it be his own singular rendering, "a respectable man," where the Hebrew is simply אִישׁ מַרְאֶה, "a man of appearance" (= *notabilis visu*), in the A. V. "a goodly man," because curiously as defined in 1 Chr. xi. 23, he was very tall, a man of stature, five cubits high," etc. H.

[b] The statue of the archangel Michael on the top of the mausoleum of Hadrian at Rome is in accordance with the same idea. In a procession to St. Peter's, during a pestilence, Gregory the Great saw the archangel in a vision, as he is supposed to be represented in the statue. It is owing to this that the fortress subsequently had the name of the Castle of St. Angelo. See Murray's *Handbook for Rome* p 67 6th ed. 1862.

It only remains to add, that in the numerous instances wherein there is a close verbal agreement between passages in Samuel and in the Chronicles, the sound conclusion seems to be that the Chronicles were copied from Samuel, and not that both were copied from a common original. In a matter of this kind, we must proceed upon recognized principles of criticism. If a writer of the 3d or 4th century narrated events of Roman history almost precisely in the words of Livy, no critic would hesitate to say that all such narratives were copied from Livy. It would be regarded as a very improbable hypothesis that they were copied from documents to which Livy and the later historian had equal access, especially when no proof whatever was adduced that any such original documents were in existence at the time of the later historian. The same principle applies to the relation in which the Chronicles stand to the book of Samuel. There is not a particle of proof that the original documents, or any one of them, on which the book of Samuel was founded, were in existence at the time when the Chronicles were compiled; and in the absence of such proof, it must be taken for granted that, where there is a close verbal correspondence between the two works, the compiler of the Chronicles copied passages, more or less closely, from the book of Samuel. At the same time it would be unreasonable to deny, and it would be impossible to disprove, that the compiler, in addition to the book of Samuel, made use of other historical documents which are no longer in existence.

*Literature.* — The following list of Commentaries is given by De Wette: Serrarii, Seb. Schmidii, Jo. Clerici, Maur. *Commentt.*; Jo. Drusii, *Annotatt. in Locos diffic. Jos., Jud., et Sam.*; Victorini Strigelii, *Comm. in Libr. Sam., Reg., et Paralipp.*, Lips. 1591, fol.: Casp. Sanctii, *Comm. in IV. Lib. Reg. et Paralipp.*, 1624, fol.; Hensler, *Erläuterungen des I. B. Sam. u. d. Salom. Denksprüche*, Hamburg, 1795. The best modern Commentary seems to be that of Thenius, *Exegetisches Handbuch*, Leipzig, 1842. In this work there is an excellent Introduction, and an interesting detailed comparison of the Hebrew text in the Bible with the Translation of the LXX. There are no Commentaries on Samuel in Rosenmüller's great work, or in the Compendium of his *Scholia*.

The date of the composition of the book of Samuel and its authorship is discussed in all the ordinary Introductions to the Old Testament — such as those of Horne, Hävernick, Keil, De Wette, which have been frequently cited in this work. To these may be added the following works, which have appeared since the first volume of this Dictionary was printed: Bleek's *Einleitung in das Alte Testament*, Berlin, 1860, pp. 355–368; Stähelin's *Specielle Einleitung in die Kanonischen Bücher des Alten Testaments*, Elberfeld, 1862, pp. 93–105; Davidson's *Introduction to the Old Testament*, London and Edinburgh, 1862, pp. 491–536.

E. T.

* The alleged "mistranslation" (see the article above) of 1 Chr. xxix. 29, is of a technical rather than a practical character. The same Hebrew word is indeed rendered by different terms in English, but only in order to express more clearly the different senses in which the Hebrew word must necessarily be understood. "The history of David" which is written somewhere, must of course take history in the sense of biography; while "the history of Samuel," in which it is written, must be the written record. The passage certainly asserts that the prophets mentioned did write an account of David and his reign which was still extant in the time of the writer of the book of Chronicles. The question whether that account was the same with our present books of Samuel turns upon the probability or improbability of still another history (beside Samuel and Chronicles) having been written of the same events when one from such authority was already in existence. Possibly the original work may have been more full, and the present books have been more or less abridged; but in this case they still remain substantially, contemporaneous history.

The arguments given above in favor of an early date of these books are entitled to more weight than is there allowed to them; especially the argument from the language does not require to be so much qualified. The instances of pure Hebrew cited as belonging to the time of the Captivity, with the single exception of Ps. cxxxvii. (which is too brief to support the inference from its language) all belong to a much earlier date. At least, if the opinion of Gesenius and some other scholars be considered an offset to the solid arguments for their earlier date, the question must be considered an open one; and these books cannot therefore be legitimately referred to as evidence of compositions in pure Hebrew as late as the time of the Captivity.

On the other hand, the arguments in favor of a comparatively late date require important qualification. The expression in 1 Sam. xxvii. 6, "wherefore Ziklag pertaineth unto the kings of Judah to this day," relied on to prove that the book could not have been composed before the accession of Rehoboam (B. C. 975), will not sustain the inference. Such a clause might be a marginal note, crept into the text; but this supposition is unnecessary. As Judah was the leading tribe, it is not unlikely that *kings of Judah* was sometimes used instead of *kings of Israel* to designate the monarchs, even before the secession. The contrary is asserted above: "Before the secession, the designation of the kings was that they were kings of Israel." But not one of the nine references given happens to contain the exact expression. They are all "king OVER Israel," or "king OVER ALL Israel," and this is quite another matter when the question is one of a precise title. There are indeed three passages (none of which are given above) in which the construction is the same as in the present instance, the exact title "king of Israel" being used, with the word *king* in Hebrew in construction with *Israel* (1 Sam. xxiv. 14, xxvi. 20, 2 Sam. vi. 20). But those instances of this title along with one of "kings of Judah" do not form a sufficient basis for an induction. There is, too, a special reason why "kings of Judah" should be here used. Ziklag was one of the cities originally assigned to Judah (Josh. xv. 31), and subsequently allotted out of his territory to Simeon (xix. 5). When it came back from the Philistines as the private property of David and his descendants, it did not belong to the kings of Israel as such, but only to those of the tribe of Judah, and particularly, it did not pass to the inheritance of Simeon. The first king was of the tribe of Benjamin; then for two years his son, of course a Benjamite, reigned over "all Israel" (1 Sam. ii. 9), while David reigned only over Judah; during five more years David continued to reign over Judah only, while the son

Digitized by Google

ard is silent as to the sovereignty over the other tribes; and then at last David became king over all. Certainly it was natural in his reign to speak of Ziklag as pertaining "unto the kings of Judah."

It is truly said that from certain expressions in the book "it is not certain that the writer lived more than eighty years after the incidents to which he alludes." It should have been added that these expressions furnish no probable inference that the writer lived more than *twenty* years after the events.

The "various traditions respecting the manner in which Saul first became acquainted with David (1 Sam. xvi. 14–23, xvii. 55–58), respecting the manner of Saul's death (1 Sam. xxxi. 2–6, 8–13, 2 Sam. i. 2–12)," are easily shown to be quite harmonious. It is evident that the passage in 1 Sam. xvi. 18–23 is chronologically later than that in xvii. 55–58 (or rather, xvii. 55–xviii. 9); for in the latter David is represented as an unknown stripling, while in the former (ver. 18) he is "a mighty valiant man, and a man of war, and prudent in matters," and accordingly in some chronological arrangements, as in that of Townsend, the passage is actually transposed, and there is then seen to be no inconsistency whatever in the story. In the narrative itself, however, the former passage is a narration by anticipation in order to complete without interruption the narrative begun in ver. 14.

The other supposed inconsistency depends entirely upon the assumed truthfulness of an Amalekite who, according to his own story, had just committed a great crime. His fabrication may have been "clumsy and improbable," as lies are apt to be; or it may have been, under the circumstances, clever. His object was to curry favor with David (cf. 2 Sam. iv. 10), and nothing seemed to him more to the purpose than to say that in Saul's extremity he had himself actually dispatched him. This he had to reconcile with facts as best he could.

The theory of "a compilation" has surely but slight support in the mention of Saul's having been filled with the spirit of prophecy at the only times when he was brought into close contact with the company of the prophets, and of his having twice fallen into the power of David. There is nothing surprising in the fact that both these events should have occurred twice in the life of Saul; and even were the accounts of them given in separate books, they are yet so clearly distinguished in time and in differing circumstances, that we should still be compelled to regard them as separate events.

There is nothing then to forbid, but much to favor, the supposition that the earlier part of the books of Samuel was written by the prophet of that name, and the later parts by his successors in the prophetic office, Nathan and Gad; or at least that they wrote the original history, of which the present books, if an abridgment at all, must have been an authorized abridgment, since none other would have been likely to supplant the original.

In comparing the narrative of Samuel with that of Chronicles, eleven points of difference are mentioned, two or three of which are worthy of further attention. The first instance may well be classed among those "undesigned coincidences" which so beautifully illustrate the trustworthiness of the Scripture narratives. In Chronicles no mention is made of the burning of the bodies of Saul and his sons recorded by Samuel; yet the fact is recognised in saying that the men of Jabesh Gilead buried — not their bodies, but only their bones. In the second instance both accounts agree in the fact, although there is a superficial verbal opposition in the manner of stating it. Both assert that Saul did not obtain counsel of the Lord, Samuel only mentioning that he vainly attempted to do so. The fact is thus expressed by Samuel: he inquired, but obtained no answer because of his wicked heart, which led him into the further sin of inquiring of the witch of Endor; the same fact is more briefly expressed in Chronicles by saying that he sinned in not inquiring of the Lord (*i. e.* in acting without his counsel), but seeking counsel of the witch. Most of the other instances are merely the fuller relation of events by one or other of the writers, showing that the author of Chronicles had access to other sources of information in addition to our present books of Samuel, and that he did not think it necessary to transcribe everything he found in that book.

We dissent from the representation, under the 11th head, of the event narrated in 2 Sam. xxi. 3–9, as a human sacrifice to Jehovah. It was such in the same sense in which the destruction of the Canaanites, or any other guilty people, was a sacrifice. Saul had broken the ancient treaty with the Gibeonites, and for this sin God afflicted the land. To remove the famine David offered the Gibeonites any satisfaction they might demand, and they chose to have seven of Saul's descendants given up to them. These they hung "up unto the Lord in Gibeah," not with the remotest idea of a sacrifice to Him; but as a public token that they were themselves appeased. If this punishment of Saul's sins upon his descendants incidentally removed a danger from David's throne, it was an advantage not of his own devising, but brought about by the sin and cruelty of Saul rankling in the minds of the Gibeonites. F. G.

Bohlen, meaning in Sanskrit "giving strength to the army," but according to Fürst "a chestnut tree" A Moabite of Horonaim, as appears by his designation "Sanballat the Horonite" (Neh. ii. 10, 19, xiii. 28). All that we know of him from Scripture is that he had apparently some civil or military command in Samaria, in the service of Artaxerxes (Neh. iv. 2), and that, from the moment of Nehemiah's arrival in Judæa, he set himself to oppose every measure for the welfare of Jerusalem, and was a constant adversary to the Tirshatha. His companions in this hostility were Tobiah the Ammonite, and Geshem the Arabian (Neh. ii. 19, iv. 7). For the details of their opposition the reader is referred to the articles NEHEMIAH and NEHEMIAH, BOOK OF, and to Neh. vi., where the enmity between Sanballat and the Jews is brought out in the strongest colors. The only other incident in his life is his alliance with the high-priest's family, by the marriage of his daughter with one of the grandsons of Eliashib, which, from the similar connection formed by Tobiah the Ammonite (Neh. xiii. 4), appears to have been part of a settled policy concerted between Eliashib and the Samaritan faction. The expulsion from the priesthood of the guilty son of Joiada by Nehemiah must have still further widened the breach between him and Sanballat, and between the two parties in the Jewish state. Here, however, the Scriptural narrative ends — owing, probably, to Nehemiah's return to Persia — and with it likewise our knowledge of Sanballat.

But on turning to the pages of Josephus a wholly new set of actions, in a totally different time, is brought before us in connection with Sanballat, while his name is entirely omitted in the account there given of the government of Nehemiah, which is placed in the reign of Xerxes. Josephus, after interposing the whole reign of Artaxerxes Longimanus between the death of Nehemiah and the transactions in which Sanballat took part, and utterly ignoring the very existence of Darius Nothus, Artaxerxes Mnemon, Ochus, etc., jumps at once to the reign of "Darius the last king," and tells us (*Ant.* xi. 7, § 2) that Sanballat was his officer in Samaria, that he was a Cuthean, *i. e.* a Samaritan, by birth, and that he gave his daughter Nicaso in marriage to Manasseh, the brother of the high-priest Jaddua, and consequently the fourth in descent from Eliashib, who was high-priest in the time of Nehemiah. He then relates that on the threat of his brother Jaddua and the other Jews to expel him from the priesthood unless he divorced his wife, Manasseh stated the case to Sanballat, who thereupon promised to use his influence with king Darius, not only to give him Sanballat's government, but to sanction the building of a rival temple on Mount Gerizim, of which Manasseh should be the high-priest. Manasseh on this agreed to retain his wife and join Sanballat's faction, which was further strengthened by the accession of all those priests and Levites (and they were many) who had taken strange wives. But just at this time happened the invasion of Alexander the Great; and Sanballat, with 7,000 men, joined him, and renounced his allegiance to Darius (*Ant.* xi. 8, § 4). Being favorably received by the conqueror, he took the opportunity of speaking to him in behalf of Manasseh. He represented to him how much it was for his interest to divide the strength of the Jewish nation, and how many there were who wished for a temple in Samaria; and so obtained Alexander's permission to build the temple on Mount Gerizim, and make Manasseh the hereditary high-priest. Shortly after this, Sanballat died; but the temple on Mount Gerizim remained, and the Shechemites, as they were called, continued also as a permanent schism, which was continually fed by all the lawless and disaffected Jews. Such is Josephus' account. If there is any truth in it, of course the Sanballat of whom he speaks is a different person from the Sanballat of Nehemiah, who flourished fully one hundred years earlier; but when we put together Josephus' silence concerning a Sanballat in Nehemiah's time, and the many coincidences in the lives of the Sanballat of Nehemiah and that of Josephus, together with the inconsistencies in Josephus' narrative (pointed out by Prideaux, *Connect.* i. 466, 288, 290), and its disagreement with what Eusebius tells of the relations of Alexander with Samaria[a] (*Chron. Can.* lib. post. p. 346), and remember how apt Josephus is to follow any narrative, no matter how anachronistic and inconsistent with Scripture, we shall have no difficulty in concluding that his account of Sanballat is not historical. It is doubtless taken from some apocryphal romance, now lost, in which the writer, living under the empire of the Greeks, and at a time when the enmity of the Jews and Samaritans was at its height,[b] chose the downfall of the Persian empire for the epoch, and Sanballat for the ideal instrument, of the consolidation of the Samaritan Church and the erection of the temple on Gerizim. To borrow events from some Scripture narrative and introduce some Scriptural personage, without any regard to chronology or other propriety, was the regular method of such apocryphal books. See 1 Esdras, apocryphal Esther, apocryphal additions to the book of Daniel, and the articles on them, and the story inserted by the LXX. after 2 K. xii. 24, &c., with the observations on it in the art. KINGS, vol. ii. p. 1550. To receive as historical Josephus' narrative of the building of the Samaritan temple by Sanballat, circumstantial as it is in its account of Manasseh's relationship to Jaddua, and Sanballat's intercourse with both Darius Codomanus and Alexander the Great, and yet to transplant it, as Prideaux does, to the time of Darius Nothus (B. C. 409), seems scarcely compatible with sound criticism. For a further discussion of this subject, see the article NEHEMIAH, BOOK OF, iii. 2096; Prideaux, *Connect.* i. 395–396; *Geneal. of our Lord*, p. 323, &c.; Mill's *Vindic. of our Lord's Geneal.* p. 165; Hales' *Analys.* ii. 534. * SANCTUARY. [TABERNACLE; TEMPLE.]

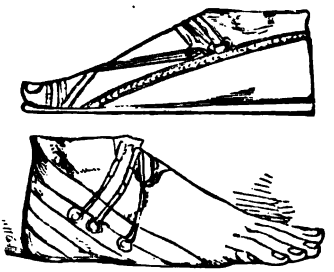
SANDAL (נַעַל: ὑπόδημα, σανδάλιον). The

[a] He says that Alexander appointed Andromachus governor of Judæa and the neighboring districts; that the Samaritans murdered him; and that Alexander on his return took Samaria in revenge, and settled a colony of Macedonians in it, and the inhabitants of Samaria retired to Sichem.

[b] Such a time, *e. g.*, as when the book of Ecclesiasticus was written, in which we read (ch. l. 25, 26) "There be two manner of nations which mine heart abhorreth, and the third is no nation: they that sit upon the mountain of Samaria, and they that dwell among the Philistines, and that foolish people that dwell in Sichem."



Digitized by Google

sandal appears to have been the article ordinarily used by the Hebrews for protecting the feet. It consisted simply of a sole attached to the foot by thongs. The Hebrew term *na'al* [a] implies such an article, its proper sense being that of *confining* or shutting in the foot with thongs: we have also express notice of the thong [b] (שְׂרוֹךְ: *lŭds*: A.V. "shoe-latchet") in several passages (Gen. xiv. 23; Is. v. 27; Mark i. 7). The Greek term ὑπόδημα properly applies to the sandal exclusively, as it means what is bound *under* the foot; but no stress can be laid on the use of the term by the Alexandrine writers, as it was applied to any covering of the foot, even to the military *caliga* of the Romans (Joseph. *B. J.* vi. 1, § 8). A similar observation applies to σανδάλιον, which is used in a general, and not in its strictly classical sense, and was adopted in a Hebraized form by the Talmudists. We have no description of the sandal in the Bible itself, but the deficiency can be supplied from collateral sources. Thus we learn from the Talmudists that the materials employed in the construction of the sole were either leather, felt, cloth, or wood (Mishn. *Jebam.* 12, §§ 1, 2), and that it was occa-

Egyptian Sandals.

sionally shod with iron (*Sabb.* 6, § 2). In Egypt various fibrous substances, such as palm leaves and papyrus stalks, were used in addition to leather (Herod. ii. 37; Wilkinson, ii. 332, 333), while in Assyria, wood or leather was employed (Layard, *Nin.* ii. 323, 324). In Egypt the sandals were usually turned up at the toe like our skates, though other forms, rounded and pointed, are also exhibited. In Assyria the heel and the side of the foot were encased, and sometimes the sandal consisted of little else than this. This does not appear to have been the case in Palestine, for a heel-strap was essential to a proper sandal (*Jebam.* 12, § 1). Great attention was paid by the ladies to their sandals; they were made of the skin of an animal named *tachash* (Ex. xvi. 10), whether a hyena or a seal (A. V. "badger") is doubtful: the skins of a fish (a species of Halicore) are used for this purpose in the peninsula of Sinai (Robinson, *Bibl. Res.* i. 116). The thongs were handsomely embroidered (Cant. vii. 1; Jud. x. 4, xvi. 9), as were those of the Greek ladies (*Dict. of Ant.* s. v. "Sandalium"). Sandals were worn by all classes of society in Palestine, even by the very poor (Am. viii. 6), and both the sandal and the thong or shoe-latchet were so cheap and common, that they passed into a proverb for the most insignificant thing (Gen.

Assyrian Sandals. (From Layard, ii. 294.)

xiv. 23; Ecclus. xlvi. 19). They were not, however, worn at all periods; they were dispensed with in-doors, and were only put on by persons about to undertake some business away from their homes such as a military expedition (Is. v. 27; Eph. vi. 15), or a journey (Ex. xii. 11; Josh. ix. 5, 13; Acts xii. 8): on such occasions persons carried an extra pair, a practice which our Lord objected to as far as the Apostles were concerned (Matt. x. 10; comp. Mark vi. 9, and the expression in Luke x. 4, "do not carry," which harmonizes the passages). An extra pair might in certain cases be needed, as the soles were liable to be soon worn out (Josh. ix. 5), or the thongs to be broken (Is. v. 27). During meal-times the feet were undoubtedly uncovered, as implied in Luke vii. 38; John xiii. 5, 6, and in the exception specially made in reference to the Paschal feast (Ex. xii. 11): the same custom must have prevailed wherever reclining at meals was practiced (comp. Plato, *Sympos.* p. 213). It was a mark of reverence to cast off the shoes in approaching a place or person of eminent sanctity: [c] hence the command to Moses at the bush (Ex. iii. 5) and to Joshua in the presence of the angel (Josh. v. 15). In deference to these injunctions the priests are said to have conducted their ministrations in the Temple barefoot (Theodoret, *ad Ex.* iii. *quæst.* 7), and the Talmudists even forbade any person to pass through the Temple with shoes on (Mishn. *Berach.* 9, § 5). This reverential act was not peculiar to the Jews: in ancient times we have instances of it in the worship of Cybele at Rome (Prudent. *Peris.* 154), in the worship of Isis as represented in a picture at Herculaneum (*Ant. d'Ercol.* ii. 320), and in the practice of the Egyptian priests, according

[a] In the A. V. this term is invariably rendered "shoes." There is, however, little reason to think that the Jews really wore shoes, and the expressions which Carpzov (*Apparat.* pp. 781, 782) quotes to prove that they did — (namely, "put the blood of war in his shoes," 1 K. ii. 5; "make men go over in shoes," Is. xi. 15), are equally adapted to the sandal — the first signifying that the blood was sprinkled *on the bong* of the sandal, the second that men should cross the river *on foot* instead of in boats. The shoes found in Egypt probably belonged to Greeks (Wilkinson, ii. 338).

[b] The terms applied to the removal of the shoe (חָלַץ, Deut. xxv. 10; Is. xx. 2; and שָׁלַף, Ruth iv. 7) imply that the thongs were either so numerous or so broad as almost to cover the top of the foot.

[c] It is worthy of observation that the term used for "putting off" the shoes on these occasions is peculiar (נָשַׁל), and conveys the notion of violence and haste.

Digitized by Google

to Sil. Ital. iii. 28. In modern times we may compare the similar practice of the Mohammedans of Palestine before entering a mosque (Robinson's *Researches*, ii. 36), and particularly before entering the Kaaba at Mecca (Burckhardt's *Arabia*, i. 270), of the Yezidis of Mesopotamia before entering the tomb of their patron saint (Layard's *Nin.* i. 282), and of the Samaritans as they tread the summit of Mount Gerizim (Robinson, ii. 278). The practice of the modern Egyptians, who take off their shoes before stepping on to the carpeted *leewán*, appears to be dictated by a feeling of reverence rather than cleanliness, that spot being devoted to prayer (Lane, i. 35). It was also an indication of violent emotion, or of mourning, if a person appeared barefoot in public (2 Sam. xv. 30; Is. xx. 2; Ez. xxiv. 17, 23). This again was held in common with other nations, as instanced at the funeral of Augustus (Suet. *Aug.* 100), and on the occasion of the solemn processions which derived their name of *Nudipedalia* from this feature (Tertull. *Apol.* 40). To carry or to unloose a person's sandal was a menial office betokening great inferiority on the part of the person performing it; it was hence selected by John the Baptist to express his relation to the Messiah (Matt. iii. 11; Mark i. 7; John i. 27; Acts xiii. 25). The expression in Ps. lx. 8, cviii. 9, "over Edom will I cast out my shoe," evidently signifies the subjection of that country, but the exact point of the comparison is obscure; for it may refer either to the custom of handing a sandal to a slave, or to that of claiming possession of a property by planting the foot on it, or of acquiring it by the symbolic action of casting the shoe, or again, Edom may be regarded in the still more subordinate position of a shelf on which the sandals were rested while their owner bathed his feet. The use of the shoe in the transfer of property is noticed in Ruth iv. 7, 8, and a similar significancy was attached to the act in connection with the repudiation of a Levirate marriage (Deut. xxv. 9). Shoe-making, or rather strap-making (*i. e.* making the straps for the sandals), was a recognized trade among the Jews (Mishn. *Pesach.* 4, § 6). W. L. B.

**SAN'HEDRIM** (accurately Sanhedrin, סַנְהֶדְרִין, formed from *συνέδριον*: the attempts of the Rabbins to find a Hebrew etymology are idle; Buxtorf, *Lex. Chald.* s. v.), called also in the Talmud *the great Sanhedrin*, the supreme council of the Jewish people in the time of Christ and earlier. In the Mishna it is also styled בֵּית דִּין, *Beth Din*, "house of judgment."

1. The *origin* of this assembly is traced in the Mishna (*Sanhedr.* i. 6) to the seventy elders whom Moses was directed (Num. xi. 16, 17) to associate with him in the government of the Israelites. This body continued to exist, according to the Rabbinical accounts, down to the close of the Jewish commonwealth. Among Christian writers Schickhard, Isaac Cassubon, Salmasius, Selden, and Grotius have held the same view. Since the time of Vorstius, who took the ground (*De Synhedriis*, §§ 25–40) that the alleged identity between the assembly of seventy elders mentioned in Num. xi. 16, 17, and the Sanhedrim which existed in the later period of the Jewish commonwealth, was simply a conjecture of the Rabbins, and that there are no traces of such a tribunal in Deut. xvii. 8, 10, nor in the age of Joshua and the Judges, nor during the reign of the kings, it has been generally admitted that the tribunal established by Moses was probably temporary, and did not continue to exist after the Israelites had entered Palestine (Winer, *Realwörterb.* art. "Synedrium").

In the lack of definite historical information as to the establishment of the Sanhedrim, it can only be said in general that the Greek etymology of the name seems to point to a period subsequent to the Macedonian supremacy in Palestine. Livy expressly states (xiv. 32), "pronuntiatum quod ad statum Macedoniæ pertinebat, senatores, quos *synedros* vocant, legendos esse, quorum consilio respublica administraretur." The fact that Herod, when procurator of Galilee, was summoned before the Sanhedrim (B. C. 47) on the ground that in putting men to death he had usurped the authority of the body (Joseph. *Ant.* xiv. 9, § 4) shows that it then possessed much power and was not of very recent origin. If the *γερουσία τῶν Ἰουδαίων*, in 2 Macc. i. 10, iv. 44, xi. 27, designates the Sanhedrim — as it probably does — this is the earliest historical trace of its existence. On these grounds the opinion of Vorstius, Witsius, Winer, Keil, and others, may be regarded as probable, that the Sanhedrim described in the Talmud arose after the return of the Jews from Babylon, and in the time of the Seleucidæ or of the Hasmonean princes.

In the silence of Philo, Josephus, and the Mishna, respecting the constitution of the Sanhedrim, we are obliged to depend upon the few incidental notices in the New Testament. From these we gather that it consisted of *ἀρχιερεῖς*, chief priests, or the heads of the twenty-four classes into which the priests were divided (including probably those who had been high-priests), *πρεσβύτεροι*, elders, men of age and experience, and *γραμματεῖς*, *scribes*, lawyers, or those learned in the Jewish law (Matt. xxvi. 57, 59; Mark xv. 1; Luke xxii. 66; Acts v. 21).

2. The *number of members* is usually given as seventy-one, but this is a point on which there is not a perfect agreement among the learned. The nearly unanimous opinion of the Jews is given in the Mishna (*Sanhedr.* i. 6): "the great Sanhedrim consisted of seventy-one judges. How is this proved? From Num. xi. 16, where it is said, 'gather unto me seventy men of the elders of Israel.' To these add Moses, and we have seventy-one. Nevertheless R. Judah says there were seventy." The same difference made by the addition or exclusion of Moses, appears in the works of Christian writers, which accounts for the variations in the books between seventy and seventy-one. Baronius, however (*Ad. Ann.* 31, § 10), and many other Roman Catholic writers, together with not a few Protestants, as Drusius, Grotius, Prideaux, Jahn, Bretschneider, etc., hold that the true number was seventy-two, on the ground that Eldad and Medad, on whom it is expressly said the Spirit rested (Num. xi. 26), remained in the camp and should be added to the seventy (see Hartmann, *Verbindung des A. T.* p. 182; Selden, *De Synedr.* lib. ii cap. 4). Between these three numbers that given by the prevalent Jewish tradition is certainly to be preferred; but if, as we have seen, there is really no evidence for the identity of the seventy elders summoned by Moses, and the Sanhedrim existing after the Babylonish Captivity the argument from Num. xi. 16 in respect to the number of members of which the latter body consisted, has no force, and we are left, as Keil main-

Digitized by Google

sius (*Archäologie*, ii. § 259), without any certain information on the point.

The president of this body was styled נָשִׂיא *Nasi*, and, according to Maimonides and Lightfoot, was chosen on account of his eminence in worth and wisdom. Often, if not generally, this pre-eminence was accorded to the high-priest. That the high-priest presided at the condemnation of Jesus (Matt. xxvi. 62) is plain from the narrative. The vice-president, called in the Talmud אָב בֵּית דִּין, "father of the house of judgment," sat at the right hand of the president. Some writers speak of a second vice-president, styled חָכָם, "wise," but this is not sufficiently confirmed (see Selden, *De Synedr.* p. 156 ff.). The Babylonian Gemara states that there were two scribes, one of whom registered the votes for acquittal, the other those for condemnation. In Matt. xxvi. 58; Mark xiv. 54, &c., the lictors or attendants of the Sanhedrim are referred to under the name of ὑπηρέται. While in session the Sanhedrim sat in the form of a half-circle (*Gem. Hieros. Const.* vii. *ad Sanhedr.* i.), with all which agrees the statement of Maimonides (quoted by Vorstius): "him who excels all others in wisdom they appoint head over them and head of the assembly. And he it is whom the wise everywhere call NASI, and he is in the place of our master Moses. Likewise him who is the oldest among the seventy, they place on the right hand, and him they call 'father of the house of judgment.' The rest of the seventy sit before these two, according to their dignity, in the form of a semicircle, so that the president and vice-president may have them all in sight."

3. The *place* in which the sessions of the Sanhedrim were ordinarily held was, according to the Talmud, a hall called גָּזִית, *Gazzith* (*Sanhedr.* x.), supposed by Lightfoot (*Works*, i. 2005) to have been situated in the southeast corner of one of the courts near the Temple building. In special exigencies, however, it seems to have met in the residence of the high-priest (Matt. xxvi. 3). Forty years before the destruction of Jerusalem, and consequently while the Saviour was teaching in Palestine, the sessions of the Sanhedrim were removed from the hall Gazzith to a somewhat greater distance from the Temple building, although still on Mt. Moriah (*Abod. Zara*, i. Gem. Babyl. *ad Sanhedr.* v.). After several other changes, its seat was finally established at Tiberias (Lightfoot, *Works*, § 365).

As a judicial body the Sanhedrim constituted a supreme court, to which belonged in the first instance the trial of a tribe fallen into idolatry, false prophets, and the high-priest (Mishna, *Sanhedr.* i.); also the other priests (*Middoth*, v.). As an administrative council it determined other important matters. Jesus was arraigned before this body as a false prophet (John xi. 47), and Peter, John, Stephen, and Paul as teachers of error and deceivers of the people. From Acts ix. 2 it appears that the Sanhedrim exercised a degree of authority beyond the limits of Palestine. According to the Jerusalem Gemara (quoted by Selden, lib. ii. c. 15, 11), the power of inflicting capital punishment was taken away from this tribunal forty years before the destruction of Jerusalem. With this agrees the answer of the Jews to Pilate (John xviii. 31), "It is not lawful for us to put any man to death." Beyond the arrest, trial, and condemnation of one convicted of violating the ecclesiastical law, the jurisdiction of the Sanhedrim at the time could not be extended; the confirmation and execution of the sentence in capital cases belonged to the Roman procurator. The stoning of Stephen (Acts vii. 56, &c.) is only an apparent exception, for it was either a tumultuous proceedure, or, if done by order of the Sanhedrim, was an illegal assumption of power, as Josephus (*Ant.* xx. 9, § 1) expressly declares the execution of the Apostle James during the absence of the procurator to have been (Winer, *Realwb.* art. "Synedrium").

The Talmud also mentions a *lesser Sanhedrim* of twenty-three members in every city in Palestine in which were not less than 120 householders; but respecting these judicial bodies Josephus is entirely silent.

The leading work on the subject is Selden, *De Synedriis et Præfecturis Juridicis veterum Ebræorum*, Lond. 1650, Amst. 1679, 4to. It exhibits immense learning, but introduces much irrelevant matter, and is written in a heavy and unattractive style. The monographs of Vorstius and Witsius, contained in Ugolini's *Thesaurus*, vol. xxv., are able and judicious. The same volume of Ugolini contains also the Jerusalem and Babylonian Gemaras, along with the Mishna on the Sanhedrim, with which may be compared *Duo Tituli Talmudici Sanhedrin et Maccoth*, ed. Jo. Coch, Amst. 1629, 4to, and Maimonides, *De Sanhedriis et Pœnis*, ed. Houting. Amst. 1695, 4to. Hartmann, *Die Verbindung des Alten Testaments mit dem Neuen*, Hamb. 1831, 8vo, is worthy of consultation, and for a compressed exhibition of the subject, Winer, *Realwb.*, and Keil, *Archæologie*. G. E. D.

**SANSANNAH** (חֲצַר סוּסָה [*palm-branch*, Ges., Fürst]: Ἀσασσανά; Alex. Ἀσασανα: *Sensenna*). One of the towns in the south district of Judah, named in Josh. xv. 31 only. The towns of this district are not distributed into small groups, like those of the highlands or the *Shefelah*; and as only very few of them have been yet identified, we have nothing to guide us to the position of Sansannah. It can hardly have had any connection with KIRJATH-SANNAH (Kirjath-Sepher, or Debir), which was probably near Hebron, many miles to the north of the most northern position possible for Sansannah. It does not appear to be mentioned by any explorer, ancient or modern. Gesenius (*Thes.* p. 962) explains the name to mean "palm-branch;" but this is contradicted by Fürst (*Hwb.* ii. 88), who derives it from a root which signifies "writing." The two propositions are probably equally wide of the mark. The conjecture of Schwarz that it was at *Simsim*, on the valley of the same name, is less feasible than usual.

The termination of the name is singular (comp. MADMANNAH).

By comparing the list of Josh. xv. 26–32 with those in xix. 2–7 and 1 Chr. iv. 28–33, it will be seen that Beth-marcaboth and Hazar-susim, or -susah, occupy in the two last the place of Madmannah and Sansannah respectively in the first. In like manner Shilhim is exchanged for Sharuhen and Shaaraim. It is difficult to believe that these changes can have arisen from the mistakes of copyists solely, but equally difficult to assign any other satisfactory reason. Prof. Stanley has suggested that Beth-marcaboth and Hazar-susim are

Digitized by Google

tokens of the trade in chariots and horses which arose in Solomon's time; but, if so, how comes it that the new names bear so close a resemblance in form to the old ones? G.

**SAPH** (סַף [*threshold, dish*, Gen.]: Σέφ; Alex. Σεφε: *Saph*). One of the sons of the giant ('Ραφά, *Arapha*) slain by Sibbechai the Hushathite in the battle against the Philistines at Gob or Gaza (2 Sam. xxi. 18). In 1 Chr. xx. 4 he is called SIPPAI. The title of Ps. cxliii. in the Peshito Syriac is, "Of David: when he slew Asaph (Saph) the brother of Gûlyad (Goliath), and thanksgiving for that he had conquered."

**SA'PHAT** (Σαφάτ: om. in the Vulg.). SHEPHATIAH 2 (1 Esdr. v. 9; comp. Ezr. ii. 4).

**SAPHATI'AS** (Σαφατίας; [Vat. Σοφοτιας:] *Saphatias*). SHEPHATIAH 2 (1 Esdr. viii. 34; comp. Ezr. viii. 8).

**SA'PHETH** (Σαφάτ; [Vat. Σαφνει; Ald. Σαφέθ:] Alex. Σαφνθι: *Sephegi*). SHEPHATIAH (1 Esdr. v. 33; comp. Ezr. ii. 57).

**SA'PHIR** (שָׁפִיר, [*i. e.* Shaphir, *fair, beautiful*]: καλῶς: *pulchra*, but in Jerome's *Comment. Saphir*). One of the villages addressed by the prophet Micah (i. 11), but not elsewhere mentioned. By Eusebius and Jerome (*Onomast.* "Saphir") it is described as "in the mountain district between Eleutheropolis and Ascalon." In this direction a village called *es-Sawâfir* still exists (or rather three with that name, two with affixes), possibly the representative of the ancient Saphir (Rob. *Bibl. Res.* ii. 34 *note*; Van de Velde, *Syr. & Pal.* p. 159). *Es-Sawâfir* lies seven or eight miles to the N. E. of Ascalon, and about 12 W. of *Beit-Jibrin*, to the right of the coast road from Gaza. Tobler prefers a village called Saber, close to *Sawâfir*, containing a copious and apparently very ancient well (*3te Wanderung*, p. 47). In one important respect, however, the position of neither of these agrees with the notice of the *Onomasticon*, since it is not near the mountains, but on the open plain of the *Shefelah*. But as *Beit-Jibrin*, the ancient Eleutheropolis, stands on the western slopes of the mountains of Judah, it is difficult to understand how any place could be westward of it (*i. e.* between it and Ascalon), and yet be itself in the mountain district, unless that expression may refer to places which, though situated in the plain, were for some reason considered as belonging to the towns of the mountains. We have already seen reason to suspect that the reverse was the case with some others. [KEILAH; NEZIB, etc.]

Schwarz, though aware of the existence of *Sawâfir* (p. 116), suggests as the most feasible identification the village of *Safiriyeh*, a couple of miles N. W. of Lydda (p. 136). The drawback to this is, that the places mentioned by Micah appear, as far as we can trace them, to be mostly near *Beit-Jibrin*, and in addition, that *Safiriyeh* is in clear contradiction to the notice of Eusebius and Jerome. G.

**SAPPHI'RA** (Σαπφείρη = either *sapphire*, from σάπφειρος, or *beautiful*, from the Syriac שְׁפִירָא). The wife of Ananias, and the participator both in his guilt and in his punishment (Acts v. 1–10). The interval of three hours that elapsed between the two deaths, Sapphira's ignorance of what had happened to her husband, and the predictive language of St. Peter towards her, are decisive evidences as to the supernatural character of the whole transaction. The history of Sapphira's death thus supplements that of Ananias, which might otherwise have been attributed to natural causes. W. L. B.

**SAPPHIRE** (סַפִּיר, *sappîr*: σάπφειρος *sapphirus*). A precious stone, apparently of a bright blue color, see Ex. xxiv. 10, where the God of Israel is represented as being seen in vision by Moses and the Elders with "a paved work of a *sappîr* stone, and as it were the body of heaven in its clearness" (comp. Ez. i. 26). The *sappîr* was the second stone in the second row of the high-priest's breastplate (Ex. xxviii. 18); it was extremely precious (Job xxviii. 16); it was one of the precious stones that ornamented the king of Tyre (Ez. xxviii. 13). Notwithstanding the identity of name between our sapphire and the σάπφειρος and *sapphirus* of the Greeks and Romans, it is generally agreed that the *sapphirus* of the ancients was not our gem of that name, namely, the azure or indigo-blue, crystalline variety of Corundum, but our *lapis-lazuli* (*ultra-marine*); this point may be regarded as established, for Pliny (*H. N.* xxxvii. 9) thus speaks of the *sapphirus*: "It is refulgent with spots of gold, of an azure color sometimes, but not often purple; the best kind comes from Media; it is never transparent, and is not well suited for engraving upon when intersected with hard crystalline particles." This description answers exactly to the character of the lapis-lazuli; the "crystalline particles" of Pliny are crystals of iron pyrites, which often occur with this mineral. It is, however, not so certain that the *sappîr* of the Hebrew Bible is identical with the lapis-lazuli; for the Scriptural requirements demand transparency, great value, and good material for the engraver's art, all of which combined characters the lapis-lazuli does not possess in any great degree. Mr. King (*Antique Gems*, p. 44) says that intagli and cameï of Roman times are frequent in the material, but rarely any works of much merit. Again, the *sappîr* was certainly pellucid, "sane apud Judæos," says Braun (*De Vest. Sac.* p. 680, ed. 1680), "sapliros pellucidas notas fuisse manifestissimum est, adeo etiam ut *pellucidum* illorum philosophis dicatur סַפִּיר, *sappîr*." Beckmann (*Hist. of Invent.* i. 472) is of opinion that the *sappîr* of the Hebrews is the same as the lapis-lazuli; Rosenmüller and Braun agree in favor of its being our sapphire or precious Corundum. We are inclined to adopt this latter opinion, but are unable to come to any satisfactory conclusion. W. H.

**SA'RA** (Σάρρα: *Sara*). 1. SARAH the wife of Abraham (Heb. xi. 11; 1 Pet. iii. 6).

2. The daughter of Raguel, in the apocryphal history of Tobit. As the story goes, she had been married to seven husbands, who were all slain on the wedding night by Asmodeus, the evil spirit, who loved her (Tob. iii. 7). The breaking of the spell and the chasing away of the evil spirit by the "fishy fume," when Sara was married to Tobias, are told in chap. viii.

**SARABI'AS** (Σαραβίας: *Sarebias*). SHEREBIAH (1 Esdr. ix. 48; comp. Neh. viii. 7).

**SA'RAH** (שָׂרָה, *princess*: Σάρρα: *Sara* originally שָׂרַי: Σάρα: *Sarai*). 1. The wife of Abraham and mother of Isaac.

Digitized by Google

Of her birth and parentage we have no certain account in Scripture. Her name is first introduced in Gen. xi. 29, as follows: "Abram and Nahor took them wives: the name of Abram's wife was Sarai; and the name of Nahor's wife was Milcah, the daughter of Haran, the father of Milcah and the father of Iscah." In Gen. xx. 12, Abraham speaks of her as "his sister, the daughter of the same father, but not the daughter of the same mother." The common Jewish tradition, taken for granted by Josephus (*Ant.* i. c. 6, § 6) and by St. Jerome (*Quæst. Hebr. ad Genesin*, vol. iii. p. 323, ed. Ben. 1735), is that Sarai is the same as Iscah, the daughter of Haran, and the sister of Lot, who is called Abraham's "brother" in Gen. xiv. 14, 16. Judging from the fact that Rebekah, the granddaughter of Nahor, was the wife of Isaac the son of Abraham, there is reason to conjecture that Abraham was the youngest brother, so that his wife might not improbably be younger than the wife of Nahor. It is certainly strange, if the tradition be true, that no direct mention of it is found in Gen. xi. 29. But it is not improbable in itself; it supplies the account of the descent of the mother of the chosen race, the omission of which in such a passage is most unlikely; and there is no other to set against it.

The change of her name from "Sarai" to "Sarah" was made at the same time that Abram's name was changed to Abraham, on the establishment of the covenant of circumcision between him and God. That the name "Sarah" signifies "princess" is universally acknowledged. But the meaning of "Sarai" is still a subject of controversy. The older interpreters (as, for example, St. Jerome in *Quæst. Hebr.*, and those who follow him) suppose it to mean "my princess;" and explain the change from Sarai to Sarah, as signifying that she was no longer the queen of one family, but the royal ancestress of "all families of the earth." They also suppose that the addition of the letter ה, as taken from the sacred Tetragrammaton Jehovah, to the names of Abram and Sarai, mystically signified their being received into covenant with the Lord. Among modern Hebraists there is great diversity of interpretation. One opinion, keeping to the same general derivation as that referred to above, explains "Sarai" as "noble," "nobility," etc., an explanation which, even more than the other, labors under the objection of giving little force to the change. Another opinion supposes Sarai to be a contracted form of שָׂרִיָּה (*Śārîyâh*), and to signify "Jehovah is ruler." But this gives no force whatever to the change, and besides introduces the same name *Jah* into a proper name too early in the history. A third (following Ewald) derives it from שָׂרַר, root which is found in Gen. xxxii. 28, Hos. xii. 4, in the sense of "to fight," and explains it as "contentious" (*streitsüchtig*). This last seems to be etymologically the most probable, and differs from the others in giving great force and dignity to the change of name. (See Ges. *Thes.* vol. iii. p. 1238 *b.*)

Her history is, of course, that of Abraham. She came with him from Ur to Haran, from Haran to Canaan, and accompanied him in all the wanderings of his life. Her only independent action is the demand that Hagar and Ishmael should be cast out, far from all rivalry with her and Isaac; a demand, symbolically applied in Gal. iv. 22–31 to the displacement of the Old Covenant by the New. The times in which she plays the most important part in the history, are the times when Abraham was sojourning, first in Egypt, then in Gerar, and where Sarah shared his deceit, towards Pharaoh and towards Abimelech. On the first occasion, about the middle of her life, her personal beauty is dwelt upon as its cause (Gen. xii. 11–15); on the second, just before the birth of Isaac, at a time when she was old (thirty-seven years before her death), but when her vigor had been miraculously restored, the same cause is alluded to, as supposed by Abraham, but not actually stated (xx. 9–11). In both cases, especially the last, the truthfulness of the history is seen in the unfavorable contrast in which the conduct both of Abraham and Sarah stands to that of Pharaoh and Abimelech. She died at Hebron at the age of 127 years, 28 years before her husband, and was buried by him in the cave of Machpelah. Her burial place, purchased of Ephron the Hittite, was the only possession of Abraham in the land of promise; it has remained, hallowed in the eyes of Jews, Christians, and Mohammedans alike, to the present day; and in it the "shrine of Sarah" is pointed out opposite to that of Abraham, with those of Isaac and Rebekah on the one side, and those of Jacob and Leah on the other (see *Stanley's Lect. on Jewish Church*, app. ii. pp. 484–509).

Her character, like that of Abraham, is no ideal type of excellence, but one thoroughly natural, inferior to that of her husband, and truly feminine, both in its excellences and its defects. She is the mother, even more than the wife. Her natural motherly affection is seen in her touching desire for children, even from her bondmaid, and in her unforgiving jealousy of that bondmaid, when she became a mother; in her rejoicing over her son Isaac, and in the jealousy which resented the slightest insult to him, and forbade Ishmael to share his sonship. It makes her cruel to others as well as tender to her own,[a] and is remarkably contrasted with the sacrifice of natural feeling on the part of Abraham to God's command in the last case (Gen. xxi. 12). To the same character belong her ironical laughter at the promise of a child, long desired, but now beyond all hope; her trembling denial of that laughter, and her change of it to the laughter of thankful joy, which she commemorated in the name of Isaac. It is a character deeply and truly affectionate, but impulsive, jealous, and imperious in its affection. It is referred to in the N. T. as a type of conjugal obedience in 1 Pet. iii. 6, and as one of the types of faith in Heb. xi. 11.

A. B.

2. (שָׂרַח: Σάρα; [Vat.[1] M. Κάρα:] *Sara.*), SERAH the daughter of Asher (Num. xxvi. 46).

SA'RAI [2 syl.] (שָׂרַי [see below]: Σάρα: *Saraï*). The original name of Sarah, the wife of Abraham. It is always used in the history from

[a] Note the significant remark on Isaac's marriage (Gen. xxiv. 67), "Isaac was comforted after his mother's death." There is a Jewish tradition based apparently on the mention of Sarah's death almost immediately after the sacrifice of Isaac, that the shock of it killed her, and that Abraham found her dead on his return from Moriah.

Digitized by Google

(Gen. xi. 29 to xvii. 15, when it was changed to Sarah at the same time that her husband's name from Abram became Abraham, and the birth of Isaac was more distinctly foretold. The meaning of the name appears to be, as Ewald has suggested, "contentious." [SARAH.]

**SARAIAS** [3 syl.] (Σαραΐας: om. in Vulg.). 1. SERAIAH the high-priest (1 Esdr. v. 5).

2. ('Αζαραΐας; Alex. [Ald.] Σαραΐας: *Azarias, Azareus.*) SERAIAH the father of Ezra (1 Esdr. viii. 1; 2 Esdr. i. 1).

**SAR'AMEL** ([Rom.] Alex. Σαραμέλ; [Sin. and] other MSS. 'Ασαραμέλ: *Asaramel*). The name of the place in which the assembly of the Jews was held at which the high-priesthood was conferred upon Simon Maccabæus (1 Macc. xiv. 28). The fact that the name is found only in this passage has led to the conjecture that it is an imperfect version of a word in the original Hebrew or Syriac, from which the present Greek text of the Maccabees is a translation. Some (as Castellio) have treated it as a corruption of Jerusalem: but this is inadmissible, since it is inconceivable that so well-known a name should be corrupted. The other conjectures are enumerated by Grimm in the *Kurzgef. exegetisches Handb.* on the passage. A few only need be named here, but none seem perfectly satisfactory. All appear to adopt the reading *Asaramel*. 1. *Hahatsar Millo*, "the court of Millo," Millo being not improbably the citadel of Jerusalem [vol. iii. p. 1937]. This is the conjecture of Grotius, and has at least the merit of ingenuity.[a] 2. *Hahatsar Am El*, "the court of the people of God, that is, the great court of the Temple." This is due to Ewald (*Gesch.* iv. 387), who compares with it the well-known *Sarbeth Sabanai El*, given by Eusebius as the title of the Maccabæan history. [See MACCABEES, vol. ii. p. 1718.] 3. *Hasshaar Am El*, "the gate of the people of God," adopted by Winer (*Realwb.*). 4. *Hasar Am El*, "prince of the people of God," as if not the name of a place, but the title of Simon, the "in" having been inserted by puzzled copyists. This is adopted by Grimm himself. It has in its favor the fact that without it Simon is here styled high-priest only, and his second title, "captain and governor of the Jews and priests" (ver. 47), is then omitted in the solemn official record — the very place where it ought to be found. It also seems to be countenanced by the Peshito-Syriac version, which certainly omits the title of "high-priest," but inserts *Rabba de Israel*, "leader of Israel." None of these explanations, however, can be regarded as entirely satisfactory. G.

**SA'RAPH** (שָׂרָף) [*burning, fiery, poisonous*]: Σαρφώ: [Vat. Σαια:] *Incendens*). Mentioned in 1 Chr. iv. 22 among the descendants of Shelah the son of Judah. Burrington (*Geneal.* i. 179) makes Seraph a descendant of Jokim, whom he regards as the third son of Shelah. In the Targum of R. Joseph, Joash and Saraph are identified with Mahlon and Chilion, "who married (יָעֲלָה) in Moab."

**SARCHED'ONUS** ([Rom. Vat.] Σαχερδονός, [Alex.] Σαχερδών, [Ald. Σαρχεδόνος:] *Archedonasar, Achenossar, Sarcedonassar*), a collateral form of the name Esar-haddon [ESAR-HADDON], occurring Tob. i. 21. The form in A. V. is *Sacherdonus* appears to be an oversight. [An extract from the Aldine edition. — A.] B. F. W.

**SARDEUS** (Ζεραλίας; Alex. Ζαρδαιος [so Tisch., but Ζαρδαιας, Baber's ed.; Ald. Σαρδαῖος:] *Tebedias*). AZIZA (1 Esdr. ix. 28; comp. Ezr. x. 27).

**SARDINE, SARDIUS** (אֹדֶם, *ôdem*: σάρδιον: *sardius*) is, according to the LXX and Josephus (*Bell. Jud.* v. 5, § 7), the correct rendering of the Hebrew term, which occurs in Ex. xxviii. 17, xxxix. 10, as the name of the stone which occupied the first place in the first row of the high-priest's breastplate; it should, however, be noticed that Josephus is not strictly consistent with himself, for in the *Antiq.* iii. 7, § 5, he says that the *sardonyx* was the first stone in the breastplate; still as this latter named mineral is merely another variety of agate, to which also the sard or sardius belongs, there is no very great discrepancy in the statements of the Jewish historian. The *ôdem* is mentioned by Ezekiel (xxviii. 13) as one of the ornaments of the king of Tyre. In Rev. iv. 3, St. John declares that he whom he saw sitting on the heavenly throne "was to look upon like a jasper and a *sardine* stone." The sixth foundation of the wall of the heavenly Jerusalem was a *sardius* (Rev. xxi. 20). There can scarcely be a doubt that either the sard or the sardonyx is the stone denoted by *ôdem*. The authority of Josephus in all that relates to the high-priest's breastplate is of the greatest value, for as Braun (*De Vest. Sac. Heb.* p. 635) has remarked, Josephus was not only a Jew but a priest, who might have seen the breastplate with the whole sacerdotal vestments a hundred times, since in his time the Temple was standing; the Vulgate agrees with his nomenclature; in Jerome's time the breastplate was still to be inspected in the Temple of Concord; hence it will readily be acknowledged that this agreement of the two is of great weight.

The sard, which is a superior variety of agate, has long been a favorite stone for the engraver's art; "on this stone," says Mr. King (*Antique Gems*, p. 5), "all the finest works of the most celebrated artists are to be found; and this not without good cause, such is its toughness, facility of working, beauty of color, and the high polish of which it is susceptible, and which Pliny states that it retains longer than any other gem." Sards differ in color; there is a bright red variety which, in Pliny's time, was the most esteemed, and, perhaps, the Heb. *ôdem*, from a root which means "to be red," points to this kind; there is also a pale or honey-colored variety; but in all sards there is always a shade of yellow mingling with the red (see King's *Ant. Gems*, p. 6). The sardius, according to Pliny (*H. N.* xxxvii. 7), derived its name from Sardis in Lydia, where it was first found; Babylonian specimens, however, were the most esteemed. The Hebrews, in the time of Moses, could easily have obtained their sard stones from Arabia, in which country they were at the time the breastplate was made; other precious stones not acquirable during their wanderings, may have been brought with them from the land of their bondage when "they spoiled the Egyptians."

W. H.

**SARDIS** [*or* SARDES] (Σάρδεις). A city situated about two miles to the south of the river Hermus, just below the range of Tmolus (*Bos*

[a] Junius and Tremellius render it by *in aerio munitionis*.

Digitized by Google

*Dagh*), on a spur of which its acropolis was built. It was the ancient residence of the kings of Lydia. After its conquest by Cyrus, the Persians always kept a garrison in the citadel, on account of its natural strength, which induced Alexander the Great, when it was surrendered to him in the sequel of the battle of the Granicus, similarly to occupy it. Sardis was in very early times, both from the extremely fertile character of the neighboring region, and from its convenient position, a commercial mart of importance. Chestnuts were first produced in the neighborhood, which procured them the name of βάλανοι Σαρδιανοί. The art of dyeing wool is said by Pliny to have been invented there; and at any rate, Sardis was the entrepôt of the dyed woolen manufactures, of which Phrygia with its vast flocks (πολυπροβατωτάτη, Herod. v. 49) furnished the raw material. Hence we hear of the φοινικίδες Σαρδιαναί, and Sappho speaks of the ποικίλος μάσθλης Λύδιον κάλὸν ἔργον, which was perhaps something like the modern Turkish carpets. Some of the woolen manufactures, of a peculiarly fine texture, were called ψιλοτάπιδες. The hall through which the king of Persia passed from his state apartments to the gate where he mounted on his horse, was laid with these, and no foot but that of the monarch was allowed to tread on them. In the description given of the habits of a young Cyprian exquisite of great wealth, he is represented as reposing upon a bed of which the feet were silver, and upon which these ψιλοτάπιδες Σαρδιαναί were laid as a mattress. Sardis, too, was the place where the metal *electrum* was procured (Soph. *Antig.* 1037); and it was thither that the Spartans sent in the sixth century B. C. to purchase gold for the purpose of gilding the face of the Apollo at Amyclæ. This was probably furnished by the auriferous sand of the Pactolus, a brook which came from Tmolus, and ran through the *agora* of Sardis by the side of the great temple of Cybebe. But though its gold-washings may have been celebrated in early

Ruins of Sardis.

times the greatness of Sardis in its best days was much more due to its general commercial importance and its convenience as an entrepôt. This seems to follow from the statement, that not only silver and gold coins were there first minted, but there also the class of κάπηλοι (stationary traders as contradistinguished from the ἔμποροι, or travelling merchants) first arose. It was also, at any rate between the fall of the Lydian and that of the Persian dynasty, a slave-mart.

Sardis recovered the privilege of municipal government (and, as was alleged several centuries afterwards, the right of a sanctuary) upon its surrender to Alexander the Great, but its fortunes for the next three hundred years are very obscure. It changed hands more than once in the contests between the dynasties which arose after the death of Alexander. In the year 214 B C., it was taken and sacked by the army of Antiochus the Great, who besieged his cousin Achæus in it for two years before succeeding, as he at last did through treachery, in obtaining possession of the person of the latter. After the ruin of Antiochus's fortunes, it passed, with the rest of Asia on that side of Taurus, under the dominion of the kings of Pergamus, whose interests led them to divert the course of traffic between Asia and Europe away from Sardis. Its productive soil must always have continued a source of wealth; but its importance as a central mart appears to have diminished from the time of the invasion of Asia by Alexander. Of the few inscriptions which have been discovered, all, or nearly all, belong to the time of the Roman empire. Yet there still exist considerable remains of the earlier days. The massive temple of Cybebe still bears witness in its fragmentary remains to the wealth and architectural skill of the people that raised it. Mr. Cockerell, who visited it in 1812, found two columns standing with their architrave, the stone of which stretched in a single block from the centre of one to that of the other. This stone, although it was not the largest of the architrave

Digitized by Google

he calculates must have weighed 25 tons. The diameters of the columns supporting it are 6 feet 4½ inches at about 35 feet below the capital. The present soil (apparently formed by the crumbling away of the hill which backs the temple on its eastern side) is more than 25 feet above the pavement. Such proportions are not inferior to those of the columns in the Heræum at Samos, which divides, in the estimation of Herodotus, with the Artemisium at Ephesus, the palm of preëminence among all the works of Greek art. And as regards the details, "the capitals appeared," to Mr. Cockerell, "to surpass any specimen of the Ionic he had seen in perfection of design and execution." On the north side of the acropolis, overlooking the valley of the Hermus, is a theatre near 400 feet in diameter, attached to a stadium of about 1,000. This probably was erected after the restoration of Sardis by Alexander. In the attack of Sardis by Antiochus, described by Polybius (vii. 15–18), it constituted one of the chief points on which, after entering the city, the assaulting force was directed. The temple belongs to the era of the Lydian dynasty, and is nearly contemporaneous with the temple of Zeus Panhellenius in Æginа, and that of Herè in Samos. To the same date may be assigned the "Valley of Sweets" (γλυκὺς ἀγκών), a pleasure ground, the fame of which Polycrates endeavored to rival by the so-called *Laura* at Samos.

The modern name of the ruins at Sardis is *Sert-Kalessi*. Travellers describe the appearance of the locality on approaching it from the N. W. as that of complete solitude. The Pactolus is a mere thread of water, all but evanescent in summer time. The *Wadis-tchai* (Hermus), in the neighborhood of the town, is between 50 and 60 yards wide, and nearly 3 feet deep, but its waters are turbid and disagreeable, and are not only avoided as unfit for drinking, but have the local reputation of generating the fever which is the scourge of the neighboring plains.

In the time of the emperor Tiberius, Sardis was desolated by an earthquake, together with eleven, or as Eusebius says twelve, other important cities of Asia. The whole face of the country is said to have been changed by this convulsion. In the case of Sardis the calamity was increased by a pestilential fever which followed; and so much compassion was in consequence excited for the city at Rome, that its tribute was remitted for five years, and it received a benefaction from the privy purse of the emperor. This was in the year 17 A. D. Nine years afterwards the Sardians are found among the competitors for the honor of erecting, as representatives of the Asiatic cities, a temple to their benefactor. [SMYRNA.] On this occasion they plead, not only their ancient services to Rome in the time of the Macedonian war, but their well-watered country, their climate, and the richness of the neighboring soil: there is no allusion, however, to the important manufactures and the commerce of the early times. In the time of Pliny it was included in the same *conventus juridicus* with Philadelphia, with the Cadueni, a Macedonian colony in the neighborhood, with some settlements of the old Mæonian population, and a few other towns of less note. These Mæonians still continued to call Sardis by its ancient name Hydè, which it bore in the time of Omphale.

The only passage in which Sardis is mentioned in the Bible, is Rev. iii. 1–6. There is nothing in it which appears to have any special reference to the peculiar circumstances of the city, or to anything else than the moral and spiritual condition of the Christian community existing there. This latter was probably, in its secular relations, pretty nearly identical with that at Philadelphia.

(Athenæus ii. 48, vi. 231, xii. 514, 540; Arrian, i. 17; Pliny, *H. N.* v. 29, xv. 23; Stephanus Byz v. Σάρδη; Pausanias, iii. 9, 5; Diodorus Sic. xx. 107; Scholiast, Aristoph. *Pac.* 1174; Boeckh, *Inscriptiones Græcæ*, Nos. 3451–3473; Herodotus, i. 69, 94, iii. 48, viii. 105; Strabo, xiii. § 5; Tacitus, *Annal.* ii. 47, iii. 63, iv. 55; Cockerell, in Leake's *Asia Minor*, p. 343; Arundell, *Discoveries in Asia Minor*, i. pp. 26–28; Tchihatcheff, *Asie Mineure*, pp. 232–242.) J. W. B.

**SARDITES THE** (הַסַּרְדִי [patr.]: ὁ Σαρεδί [Vat. -δει]: *Saredita*). The descendants of SERED the son of Zebulon (Num. xxvi. 26).

**SARDONYX** (σαρδόνυξ: *sardonyx*) is mentioned in the N. T. once only, namely, in Rev. xxi. 20, as the stone which garnished the fifth foundation of the wall of the heavenly Jerusalem. "By sardonyx," says Pliny (*H. N.* xxxvii. 6), who describes several varieties, "was formerly understood, as its name implies, a sard with a white ground beneath it, like the flesh under the finger-nail." The sardonyx consists of "a white opaque layer, superimposed upon a red transparent stratum of the true red sard" (*Antique Gems*, p. 9); it is, like the sard, merely a variety of agate, and is frequently employed by engravers for the purpose of a signet-ring. W. H.

**SA'REA** (*Sarea*). One of the five scribes "ready to write swiftly" whom Esdras was commanded to take (2 Esdr. xiv. 24).

**SAREPTA** (Σάρεπτα: *Sarepta*: Syriac, *Tsarpath*). The Greek form of the name which in the Hebrew text of the O. T. appears as ZAREPHATH. The place is designated by the same formula on its single occurrence in the N. T. (Luke iv. 26) that it is when first mentioned in the LXX. version of 1 K. xvii. 9, "Sarepta of Sidonia." G.

**SAR'GON** (שַׁרְגּוֹן [perh. Pers., *prince of the sun*, Ges.]: Ἀρχά: *Sargon*) was one of the greatest of the Assyrian kings. His name is read in the native inscriptions as Sargina, while a town which he built and called after himself (now Khorsabad) was known as *Sarghún* to the Arabian geographers. He is mentioned by name only once in Scripture (Is. xx. 1), and then not in an historical book, which formerly led historians and critics to suspect that he was not really a king distinct from those mentioned in Kings and Chronicles, but rather one of those kings under another name. Vitringa, Offerhaus, Eichhorn, and Hupfeld identified him with Shalmaneser; Grotius, Lowth, and Keil with Sennacherib; Perizonius, Kalinsky, and Michaelis with Esarhaddon. All these conjectures are now shown to be wrong by the Assyrian inscriptions, which prove Sargon to have been distinct and different from the several monarchs named, and fix his place in the list — where it had been already assigned by Rosenmüller, Gesenius, Ewald, and Winer — between Shalmaneser and Sennacherib. He was certainly Sennacherib's father, and there is no reason to doubt that he was his immediate predecessor. He ascended the throne of Assyria, as we gather from his annals, in the same

Digitized by Google

year that Merodach-Baladan ascended the throne of Babylon, which, according to Ptolemy's Canon, was B. C. 721. He seems to have been an usurper, and not of royal birth, for in his inscriptions he carefully avoids all mention of his father. It has been conjectured that he took advantage of Shalmaneser's absence at the protracted siege of Samaria (2 K. xvii. 5) to effect a revolution at the seat of government, by which that king was deposed, and he himself substituted in his room. [SHALMANESER.] It is remarkable that Sargon claims the conquest of Samaria, which the narrative in Kings *appears* to assign to his predecessor. He places the event in his first year, before any of his other expeditions. Perhaps, therefore, he is the "king of Assyria" intended in 2 K. xvii. 6 and xviii. 11, who is not said to be Shalmaneser, though we might naturally suppose so from no other name being mentioned.[a] Or perhaps he claimed the conquest as his own, though Shalmaneser really accomplished it, because the capture of the city occurred after he had been acknowledged king in the Assyrian capital. At any rate, to him belongs the settlement of the Samaritans (27,280 families, according to his own statement) in Halah, and on the Habor (*Khabour*), the river of Gozan, and (at a later period probably) in the cities of the Medes.

Sargon was undoubtedly a great and successful warrior. In his annals, which cover a space of fifteen years (from B. C. 721 to B. C. 706), he gives an account of his warlike expeditions against Babylonia and Susiana on the south, Media on the east, Armenia and Cappadocia towards the north, Syria, Palestine, Arabia, and Egypt towards the west and the southwest. In Babylonia he deposed Merodach-Baladan, and established a viceroy; in Media he built a number of cities, which he peopled with captives from other quarters; in Armenia and the neighboring countries he gained many victories; while in the far west he reduced Philistia, penetrated deep into the Arabian peninsula, and forced Egypt to submit to his arms and consent to the payment of a tribute. In this last direction he seems to have waged three wars — one in his second year (B. C. 720), for the possession of Gaza; another in his sixth year (B. C. 715), when Egypt itself was the object of attack; and a third in his ninth (B. C. 712), when the special subject of contention was Ashdod, which Sargon took by one of his generals. This is the event which causes the mention of Sargon's name in Scripture. Isaiah was instructed at the time of this expedition to "put off his shoe, and go naked and barefoot," for a sign that "the king of Assyria should lead away the Egyptians prisoners, and the Ethiopians captives, young and old, naked and barefoot, to the shame of Egypt" (Is. xx. 2–4). We may gather from this, either that Ethiopians and Egyptians formed part of the garrison of Ashdod and were captured with the city, or that the attack on the Philistine town was accompanied by an invasion of Egypt itself, which was disastrous to the Egyptians. The year of the attack, being B. C. 712, would fall into the reign of the first Ethiopian king, Sabaco I., who probably conquered Egypt in B. C. 714 (Rawlinson's *Herodotus*, i. 386, note 7, 2d ed.), and it is in agreement with this [that] Sargon speaks of Egypt as being at this time subject to Meroë. Besides these expeditions of Sargon, his monuments mention that he took Tyre, and received tribute from the Greeks of Cyprus, against whom there is some reason to think that he conducted an attack in person.[b]

It is not as a warrior only that Sargon deserves special mention among the Assyrian kings. He was also the builder of useful works and of one of the most magnificent of the Assyrian palaces. He relates that he thoroughly repaired the walls of Nineveh, which he seems to have elevated from a provincial city of some importance to the first position in the empire; and adds further, that in its neighborhood he constructed the palace and town which he made his principal residence. This was the city now known as "the French Nineveh," or "Khorsabad," from which the valuable series of Assyrian monuments at present in the Louvre is derived almost entirely. Traces of Sargon's buildings have been found also at Nimrûd and Koyunjik; and his time is marked by a considerable advance in the useful and ornamental arts, which seem to have profited by the connection which he established between Assyria and Egypt. He probably reigned nineteen years, from B. C. 721 to B. C. 702, when he left the throne to his son, the celebrated Sennacherib. G. R.

SA'RID (שָׂרִיד [*one left, a survivor*]: Σεδεκγαλᾶ,[c] Σεδδούκ; Alex. Σαρθιδ, Σαριδ: *Sarid*). A chief landmark of the territory of Zebulun, apparently the pivot of the western and southern boundaries (Josh. xix. 10, 12). All that can be gathered of its position is that it lay to the west of Chisloth-Tabor. It was unknown to Eusebius and Jerome, and no trace of it seems to have been found by any traveller since their day (*Onom.* "Sarith"). The ancient Syriac version, in each case, reads Asdod. This may be only from the interchange, so frequent in this version, of R and D. At any rate, the Ashdod of the Philistines cannot be intended. G.

SA'RON (τὸν Σαρῶνα; in some MSS. ασσαρωνα, *i. e.* הַשָּׁרוֹן [*the plain*]: *Sarona*). The district in which Lydda stood (Acts ix. 35 only); the SHARON of the O. T. The absence of the article from Lydda, and its presence before Saron, is noticeable, and shows that the name denotes a district — as in "The Shefelah," and in our own "The Weald," "The Downs." G.

* The Plain extended along the sea-coast from Joppa to Cæsarea, about 30 miles. Though connected by καί to Lydda, in Acts ix. 35, Saron included that city. It has been conjectured that there was a village of this name, but no trace of it has been discovered. Luke's meaning is that not only the inhabitants of Lydda but of the Plain generally, heard of the miracle and believed. H.

[a] There is a peculiarity of phraseology in 2 K. xviii. 9, 10, which perhaps indicates a knowledge on the part of the writer that Shalmaneser was not the actual captor. "In the fourth year of Hezekiah," he says, "Shalmaneser king of Assyria came up against Samaria and besieged it: and at the end of three years, they took it."

[b] The statue of Sargon, now in the Berlin Museum, was found at Idalium in Cyprus. It is not very likely that the king's statue would have been set up unless he had made the expedition in person.

[c] This barbarous word is obtained by joining to it the first word of the following verse, וְעַלְה.

**SARO'THIE** [4 syl.] (Σαρωθί [Vat. -θει]; Alex. [Ald.] Σαρωθιέ: *Caroneth*). "The sons of Sarothie" are among the sons of the servants of Solomon who returned with Zorobabel, according to the list in 1 Esdr. v. 34. There is nothing corresponding to it in the Hebrew.

**SAR'SECHIM** (שַׂרְסְכִים [*princes of the eunuchs*]: *Sarsechim*). One of the generals of Nebuchadnezzar's army at the taking of Jerusalem (Jer. xxxix. 3). He appears to have held the office of chief eunuch, for Rab-saris is probably a title and not a proper name. In Jer. xxxix. 13, Nebushasban is called Rab-saris, "chief eunuch," and the question arises whether Nebushasban and Sarsechim may not be names of the same person. In the LXX., verses 3 and 13 are mixed up together, and so hopelessly corrupt that it is impossible to infer anything from their reading of Ναβουσάχαρ [but Comp. Ναβουσαρσαχ[μ] for Sarsechim. In Gesenius' *Thesaurus* it is conjectured that Sarsechim and Rab-saris may be identical, and both titles of the same office.

**SA'RUCH** (Σαρούχ: *Sarug*). SERUG the son of Reu (Luke iii. 35).

**SA'TAN.** The word itself, the Hebrew שָׂטָן, is simply an "adversary," and is so used in 1 Sam. xxix. 4; 2 Sam. xix. 22; 1 K. v. 4 (LXX. ἐναντίος); in 1 K. xi. 25 (LXX. ἀντικείμενος); in Num. xxii. 22, and Ps. cix. 6 (LXX. διάβολος and cognate words); in 1 K. xi. 14, 23 (LXX. σατάν). This original sense is still found in our Lord's application of the name to St. Peter in Matt. xvi. 23. It is used as a proper name or title only four times in the O. T., namely, (with the article) in Job i. 6, 12, ii. 1; Zech. iii. 1, and (without the article) in 1 Chr. xxi. 1. In each case the LXX. has διάβολος, and the Vulgate *Satan*. In the N. T. the word is σατανᾶς, followed by the Vulgate *Satanas*, except in 2 Cor. xii. 7, where σατάν is used. It is found in twenty-five places (exclusive of parallel passages), and the corresponding word ὁ διάβολος in about the same number. The title ὁ ἄρχων τοῦ κόσμου τούτου is used three times; ὁ πονηρός is used certainly six times, probably more frequently, and ὁ πειράζων twice.

It is with the Scriptural revelation on the subject that we are here concerned, and it is clear, from this simple enumeration of passages, that it is to be sought in the New, rather than in the Old Testament.

It divides itself naturally into the consideration of his existence, his nature, and his power and action.

(A.) HIS EXISTENCE. — It would be a waste of time to prove, that, in various degrees of clearness, the personal existence of a Spirit of Evil is revealed again and again in Scripture. Every quality, every action, which can indicate personality, is attributed to him in language which cannot be explained away. It is not difficult to see why it should be thus revealed. It is obvious that the fact of his existence is of spiritual importance, and it is also clear, from the nature of the case, that it could not be discovered, although it might be suspected, by human reason. It is in the power of that reason to test any supposed manifestations of supernatural power, and any asserted principles of Divine action, which fall within its sphere of experience ("the earthly things" of John iii. 12); it may by such examination satisfy itself of the truth and divinity of a Person or a book; but, having done this, it must then accept and understand, without being able to test or to explain, the disclosures of this Divine authority upon subjects beyond this world (the "heavenly things," of which it is said that none can see or disclose them, save the "Son of Man who is in heaven").

It is true, that human thought can assert an *à priori* probability or improbability in such statements made, based on the perception of a greater or less degree of accordance in principle between the things seen and the things unseen, between the effects, which are visible, and the causes, which are revealed from the regions of mystery. But even this power of weighing probability is applicable rather to the fact and tendency, than to the method, of supernatural action. This is true even of natural action beyond the sphere of human observation. In the discussion of the Plurality of Worlds, for example, it may be asserted without doubt, that in all the orbs of the universe the Divine power, wisdom, and goodness must be exercised; but the inference that the method of their exercise is found there, as here, in the creation of sentient and rational beings, is one at best of but moderate probability. Still more is this the case in the spiritual world. Whatever supernatural orders of beings may exist, we can conclude that in their case, as in ours, the Divine government must be carried on by the union of individual freedom of action with the overruling power of God, and must tend finally to that good which is his central attribute. But beyond this we can assert nothing to be certain, and can scarcely even say of any part of the method of this government, whether it is antecedently probable or improbable.

Thus, on our present subject, man can ascertain by observation the existence of evil, that is, of facts and thoughts contrary to the standard which conscience asserts to be the true one, bringing with them suffering and misery as their inevitable results. If he attempts to trace them to their causes, he finds them to arise, for each individual, partly from the power of certain internal impulses which act upon the will, partly from the influence of external circumstances. These circumstances themselves arise, either from the laws of nature and society, or by the deliberate action of other men. He can conclude with certainty, that both series of causes must exist by the permission of God, and must finally be overruled to his will. But whether there exists any superhuman but subordinate cause of the circumstances, and whether there be any similar influence acting in the origination of the impulses which move the will, this is a question which he cannot answer with certainty. Analogy from the observation of the only ultimate cause which he can discover in the visible world, namely, the free action of a personal will, may lead him, and generally has led him, to conjecture in the affirmative, but still the inquiry remains unanswered by authority.

The tendency of the mind in its inquiry is generally towards one or other of two extremes. The first is to consider evil as a negative imperfection, arising, in some unknown and inexplicable way from the nature of matter, or from some disturbing influences which limit the action of goodness on earth; in fact, to ignore as much of evil as possible, and to decline to refer the residuum to any positive cause at all. The other is the old Persian or Manichean hypothesis, which traces the existence o

Digitized by Google

will be a rival Creator, not subordinate to the Creator of Good, though perhaps inferior to Him in power, and destined to be overcome by Him at last. Between these two extremes the mind varied, through many gradations of thought and countless forms of superstition. Each hypothesis had its arguments of probability against the other. The first labored under the difficulty of being insufficient as an account of the anomalous facts, and indeterminate in its account of the disturbing causes; the second sinned against that belief in the Unity of God and the natural supremacy of goodness, which is supported by the deepest instincts of the heart. But both were laid in a sphere beyond human cognisance; neither could be proved or disproved with certainty.

The Revelation of Scripture, speaking with authority, meets the truth, and removes the error inherent in both these hypotheses. It asserts in the strongest terms the perfect supremacy of God, so that under his permission alone, and for his inscrutable purposes, evil is allowed to exist (see for example, Prov. xvi. 4; Is. xlv. 7; Am. iii. 6; comp. Rom. ix. 22, 23). It regards this evil as an anomaly and corruption, to be taken away by a new manifestation of Divine Love in the Incarnation and Atonement. The conquest of it began virtually in God's ordinance after the Fall itself, was effected actually on the Cross, and shall be perfected in its results at the Judgment Day. Still Scripture recognizes the existence of evil in the world, not only as felt in outward circumstances ("the world"), and as inborn in the soul of man ("the flesh"), but also as proceeding from the influence of an Evil Spirit, exercising that mysterious power of free will, which God's rational creatures possess, to rebel against Him, and to draw others into the same rebellion ("the devil").

In accordance with the "economy" and progressiveness of God's revelation, the existence of Satan is but gradually revealed. In the first entrance of evil into the world, the temptation is referred only to the serpent. It is true that the whole narrative, and especially the spiritual nature of the temptation ("to be as gods"), which was united to the sensual motive, would force on any thoughtful reader[a] the conclusion that something more than a mere animal agency was at work; but the time was not then come to reveal, what afterwards was revealed, that "he who sinneth is of the devil" (1 John iii. 8), that "the old serpent" of Genesis was "called the devil and Satan, who deceiveth the whole world" (Rev. xii. 9, xx. 3).

Throughout the whole period of the patriarchal and Jewish dispensation, this vague and imperfect revelation of the Source of Evil alone was given. The Source of all Good is set forth in all his supreme and unapproachable Majesty; evil is known negatively as the falling away from Him; and the "vanity" of idols, rather than any positive evil influence, is represented as the opposite to his reality and goodness. The Law gives "the knowledge of sin" in the soul, without referring to any external influence of evil to foster it; it denounces idolatry, without even hinting, what the N. T. declares plainly, that such evil implied a 'power of Satan."[b]

The book of Job stands, in any case, alone (whether we refer it to an early or a later period) on the basis of "natural religion," apart from the gradual and orderly evolutions of the Mosaic revelation. In it, for the first time, we find a distinct mention of "Satan," "the adversary" of Job. But it is important to remark the emphatic stress laid on his subordinate position, on the absence of all but delegated power, of all terror, and all grandeur in his character. He comes among the "sons of God" to present himself before the Lord; his malice and envy are permitted to have scope, in accusation or in action, only for God's own purposes; and it is especially remarkable that no power of spiritual influence, but only a power over outward circumstances, is attributed to him. All this is widely different from the clear and terrible revelations of the N. T.

The Captivity brought the Israelites face to face with the great dualism of the Persian mythology, the conflict of Ormuzd with Ahriman, the coordinate Spirit of Evil. In the books written after the Captivity we have again the name of "Satan" twice mentioned; but it is confessed by all that the Satan of Scripture bears no resemblance to the Persian Ahriman. His subordination and inferiority are as strongly marked as ever. In 1 Chr. xxi. 1, where the name occurs without the article ("an adversary," not "*the* adversary"), the comparison with 2 Sam. xxiv. 1 shows distinctly that, in the temptation of David, Satan's malice was overruled to work out the "anger of the Lord" against Israel. In Zech. iii. 1, 2, "Satan" is ὁ ἀντίδικος (as in 1 Pet. v. 8), the accuser of Joshua before the throne of God, rebuked and put to silence by Him (comp. Ps. cix. 6). In the case, as of the good angels, so also of the Evil One, the presence of fable and idolatry gave cause to the manifestation of the truth. [ANGELS, i. 97 *b*.] It would have been impossible to guard the Israelites more distinctly from the fascination of the great dualistic theory of their conquerors.

It is perhaps not difficult to conjecture, that the reason of this reserve as to the disclosure of the existence and nature of Satan is to be found in the inveterate tendency of the Israelites to idolatry, an idolatry based as usual, in great degree, on the supposed power of their false gods to inflict evil. The existence of evil spirits is suggested to them in the stern prohibition and punishment of witchcraft (Ex. xxii. 18; Deut. xviii. 10), and in the narrative of the possession of men by an "evil" or "lying spirit from the Lord" (1 Sam. xvi. 14; 1 K. xxii. 22); the tendency to seek their aid is shown by the rebukes of the prophets (Is. viii. 19, &c.). But this tendency would have been increased tenfold by the revelation of the existence of the great enemy, concentrating round himself all the powers of evil and enmity against God. Therefore, it would seem, the revelation of the "strong man armed" was withheld until "the stronger than he" should be made manifest.

For in the New Test. this reserve suddenly van-

[a] See Wisd. ii. 24, Φθόνῳ δὲ διαβόλου θάνατος εἰσῆλθεν εἰς τὸν κόσμον.

[b] For this reason, if for no other, it seems impossible to accept the interpretation of "Azazel," given by Ewald, Hengstenberg, and others, in Lev. xvi. 8, as a reference to the Spirit of Evil. Such a reference would not only stand alone, but would be entirely inconsistent with the whole tenor of the Mosaic revelation. See DAY OF ATONEMENT.

Digitized by Google

nbes. In the interval between the Old and New Test. the Jewish mind had pondered on the scanty revelations already given of evil spiritual influence. But the Apocryphal Books (as, for example, Tobit and Judith), while dwelling on "demons" (δαιμόνια), have no notice of Satan. The same may be observed of Josephus. The only instance to the contrary is the reference already made to Wisd. ii. 24. It is to be noticed also that the Targums often introduce the name of Satan into the descriptions of sin and temptation found in the O. T.; as for example in Ex. xxxii. 19, in connection with the worship of the golden calf (comp. the tradition as to the body of Moses, Deut. xxxiv. 5, 6; Jude 9, MICHAEL). But, while a mass of fable and superstition grew up on the general subject of evil spiritual influence, still the existence and nature of Satan remained in the background, felt, but not understood

The N. T. first brings it plainly forward. From the beginning of the Gospel, when he appears as the personal tempter of our Lord, through all the Gospels, Epistles, and Apocalypse, it is asserted or implied, again and again, as a familiar and important truth. To refer this to mere "accommodation" of the language of the Lord and his Apostles to the ordinary Jewish belief, is to contradict facts, and evade the meaning of words. The subject is not one on which error could be tolerated as unimportant; but one important, practical, and even awful. The language used respecting it is either truth or falsehood; and unless we impute error or deceit to the writers of the N. T., we must receive the doctrine of the existence of Satan as a certain doctrine of Revelation. Without dwelling on other passages, the plain, solemn, and unmetaphorical words of John viii. 44, must be sufficient: "Ye are of your father the devil. . . . . He was a murderer from the beginning, and abides (ἔστηκεν) not in the truth. . . . . When he speaketh a lie, he speaketh of his own, for he is a liar and the father of it." On this subject, see DEMONIACS, vol. i. p. 585.

(B.) HIS NATURE. — Of the nature and original state of Satan, little is revealed in Scripture. Most of the common notions on the subject are drawn from mere tradition, popularized in England by Milton, but without even a vestige of Scriptural authority. He is spoken of as a "spirit" in Eph. ii. 2, as the prince or ruler of the "demons" (δαιμόνια) in Matt. xii. 24–26, and as having "angels" subject to him in Matt. xxv. 41; Rev. xii. 7, 9. The whole description of his power implies spiritual nature and spiritual influence. We conclude therefore that he was of angelic nature [ANGELS], a rational and spiritual creature, superhuman in power, wisdom, and energy; and not only so, but an archangel, one of the "princes" of heaven. We cannot, of course, conceive that anything essentially and originally evil was created by God. We find by experience, that the will of a free and rational creature can, by his permission, oppose his will; that the very conception of freedom implies capacity of temptation; and that every sin, unless arrested by God's fresh gift of grace, strengthens the hold of evil on the spirit, till it may fall into the hopeless state of reprobation. We can only conjecture, therefore, that Satan is a fallen angel, who once had a time of probation, but whose condemnation is now irrevocably fixed.

But of the time, cause, and manner of his fall Scripture tells us scarcely anything. It limits its disclosures, as always, to that which we need to know. The passage on which all the fabric of tradition and poetry has been raised is Rev. xii. 7–9, which speaks of "Michael and his angels" as "fighting against the dragon and his angels," till the "great dragon, called the devil and Satan," was "cast out into the earth, and his angels cast out with him." Whatever be the meaning of this passage, it is certain that it cannot refer to the original fall of Satan. The only other passage which refers to the fall of the angels is 2 Pet. ii. 4, "God spared not the angels, when they had sinned, but having cast them into hell, delivered them to chains of darkness (σειραῖς ζόφου ταρταρώσας παρέδωκεν), reserved unto judgment," with the parallel passage in Jude 6, "Angels, who kept not their first estate (τὴν ἑαυτῶν ἀρχήν), but left their own habitation, he hath reserved in everlasting chains under darkness unto the judgment of the Great Day." Here again the passage is mysterious;[a] but it seems hardly possible to consider Satan as one of these; for they are in chains and guarded (τετηρημένους) till the Great Day; he is permitted still to go about as the Tempter and the Adversary, until his appointed time be come.

Setting these passages aside, we have still to consider the declaration of our Lord in Luke x. 18, "I beheld (ἐθεώρουν) Satan, as lightning, fall from heaven." This may refer to the fact of his original fall (although the use of the imperfect tense, and the force of the context, rather refer it figuratively to the triumph of the disciples over the evil spirits); but, in any case, it tells nothing of its cause or method. There is also the passage already quoted (John viii. 44) in which our Lord declares of him, that "he was a murderer from the beginning," that "he stands not (ἔστηκε) in the truth, because there is no truth in him," "that he is a liar and the father of it." But here it seems likely the words ἀπ' ἀρχῆς refer to the beginning of his action upon man; perhaps the allusion is to his temptation of Cain to be the first murderer, an allusion explicitly made in a similar passage in 1 John iii. 9–12. The word ἔστηκε (wrongly rendered "abode" in A. V.), and the rest of the verse, refer to present time. The passage therefore throws little or no light on the cause and method of his fall.

Perhaps the only one, which has any value, is 1 Tim. iii. 6, "lest being lifted up by pride he fall into the condemnation (κρίμα) of the devil." It is concluded from this, that pride was the cause of the devil's condemnation. The inference is a probable one; it is strengthened by the only analogy within our reach, that of the fall of man, in which the spiritual temptation of pride, the desire "to be as gods," was the subtlest and most deadly temptation. Still it is but an inference; it cannot be regarded as a matter of certain Revelation.

But, while these points are passed by almost in silence (a silence which rebukes the irreverent exercise of imagination on the subject), Scripture describes to us distinctly the moral nature of the

[a] It is referred by some to Gen. vi. 2, where many MSS. of the LXX. have ἄγγελοι Θεοῦ for "sons of God;" especially because 2 Pet. iii. 5, relating to the Flood, seems closely connected with that passage.

Digitized by Google

Evil One. This is no matter of barren speculation to those who by yielding to evil may become the "children of Satan," instead of "children of God." The ideal of goodness is made up of the three great moral attributes of God, Love, Truth, and Purity or Holiness; combined with that spirit, which is the natural temper of a finite and dependent creature, the spirit of Faith. We find, accordingly, that the opposites to these qualities are dwelt upon as the characteristics of the devil. In John viii. 44, compared with 1 John iii. 10–15, we have hatred and falsehood; in the constant mention of the "unclean" spirits, of which he is the chief, we find impurity; from 1 Tim. iii. 6, and the narrative of the Temptation, we trace the spirit of pride. These are especially the "sins of the devil;" in them we trace the essence of moral evil, and the features of the reprobate mind. Add to this a spirit of restless activity, a power of craft, and an intense desire to spread corruption, and with it eternal death, and we have the portraiture of the Spirit of Evil as Scripture has drawn it plainly before our eyes.

(C.) His Power and Action. — Both these points, being intimately connected with our own life and salvation, are treated with a distinctness and fullness remarkably contrasted with the obscurity of the previous subject.

The power of Satan over the soul is represented as exercised, either directly, or by his instruments. His direct influence over the soul is simply that of a powerful and evil nature on those in whom lurks the germ of the same evil, differing from the influence exercised by a wicked man in degree rather than in kind; but it has the power of acting by suggestion of thoughts, without the medium of actions or words — a power which is only in very slight degree exercised by men upon each other. This influence is spoken of in Scripture in the strongest terms, as a real external influence, correlative to, but not to be confounded with, the existence of evil within. In the parable of the sower (Matt. xiii. 19), it is represented as a negative influence, taking away the action of the Word of God for good; in that of the wheat and the tares (Matt. xiii. 39), as a positive influence for evil, introducing wickedness into the world. St. Paul does not hesitate to represent it as a power, permitted to dispute the world with the power of God; for he declares to Agrippa that his mission was "to turn men from darkness to light, and from the power (ἐξουσίας) of Satan unto God," and represents the excommunication, which cuts men off from the grace of Christ in his Church, as a "deliverance of them unto Satan" (1 Cor. v. 5; 1 Tim. i. 20). The same truth is conveyed, though in a bolder and more startling form, in the Epistles to the Churches of the Apocalypse, where the body of the unbelieving Jews is called a "synagogue of Satan" (Rev. ii. 9, iii. 9), where the secrets of false doctrine are called "the depths of Satan" (ii. 24), and the "throne" and "habitation" of Satan are said to be set up in opposition to the Church of Christ. Another and even more remarkable expression of the same idea is found in the Epistle to the Hebrews, where the death of Christ is spoken of as intended to baffle (καταργεῖν) "him that hath the power (τὸ κράτος) of death, that is the devil;" for death is evidently regarded as "the wages of sin," and the power of death as inseparable from the power of corruption. Nor is this truth only expressed directly and formally; it meets us again and again in passages simply practical, taken for granted, as already familiar (see Rom. xvi. 20; 2 Cor. ii. 11; 1 Thess. ii. 18; 2 Thess. ii. 9; 1 Tim. v. 15). The Bible does not shrink from putting the fact of Satanic influence over the soul before us, in plain and terrible certainty.

Yet at the same time it is to be observed, that its language is very far from countenancing, even for a moment, the horrors of the Manichæan theory. The influence of Satan is always spoken of as temporary and limited, subordinated to the Divine counsel, and broken by the Incarnate Son of God. It is brought out visibly, in the form of possession, in the earthly life of our Lord, only in order that it may give the opportunity of his triumph. As for Himself, so for his redeemed ones, it is true, that "God shall bruise Satan under their feet shortly" (Rom. xvi. 20; comp. Gen. iii. 15). Nor is this all, for the history of the book of Job shows plainly, what is elsewhere constantly implied, that Satanic influence is permitted, in order to be overruled to good, to teach humility, and therefore faith. The mystery of the existence of evil is left unexplained; but its present subordination and future extinction are familiar truths. So accordingly, on the other hand, his power is spoken of as capable of being resisted by the will of man, when aided by the grace of God. "Resist the devil, and he will flee from you," is the constant language of Scripture (Jam. iv. 7). It is indeed a power, to which "place" or opportunity "is given" only by the consent of man's will (Eph. iv. 27). It is probably to be traced most distinctly in the power of evil habit, a power real, but not irresistible, created by previous sin, and by every successive act of sin riveted more closely upon the soul. It is a power which cannot act directly and openly, but needs craft and dissimulation, in order to get advantage over man by entangling the will. The "wiles" (Eph. vi. 11), the "devices" (2 Cor. ii. 11), the "snare" (1 Tim. iii. 7, vi. 9; 2 Tim. ii. 26) "of the devil," are expressions which indicate the indirect and unnatural character of the power of evil. It is therefore urged as a reason for "soberness and vigilance" (1 Pet. v. 8), for the careful use of the "whole armor of God" (Eph. vi. 10–17); but it is never allowed to obscure the supremacy of God's grace, or to disturb the inner peace of the Christian. "He that is born of God, keepeth himself, and the wicked one toucheth him not" (1 John v. 18).

Besides his own direct influence, the Scripture discloses to us the fact that Satan is the leader of a host of evil spirits or angels who share his evil work, and for whom the "everlasting fire is prepared" (Matt. xxv. 41). Of their origin and fall we know no more than of his, for they cannot be the same as the fallen and imprisoned angels of 2 Pet. ii. 4, and Jude 6; but one passage (Matt. xii. 24–26) identifies them distinctly with the δαιμόνια (A. V. "devils"[a]) who had power to possess the souls of men. The Jews there speak of a Beelzebub (Βεελζεβούλ), "a prince of the demons," whom they identify with, or symbolize by the idol of Ekron, the "god of flies" [see Beelzebub], and by whose power they accuse our Lord of casting out demons. His answer is, "How

[a] It is unfortunate that the A. V. should use the word "devil," not only for its proper equivalent διάβολος, but also for δαιμόνιον.

san Satan cast out Satan?" The inference is clear that Satan is Beelzebub, and therefore the demons are "the angels of the devil;" and this inference is strengthened by Acts x. 38, in which St. Peter describes the possessed as *καταδυναστευομένους ὑπὸ τοῦ διαβόλου*, and by Luke x. 18, in which the mastery over the demons is connected by our Lord with the "fall of Satan from heaven," and their power included by Him in the "power of the enemy" (*τοῦ ἐχθροῦ*); comp. Matt. xiii. 39). For their nature, see DEMONS. They are mostly spoken of in Scripture in reference to possession; but in Eph. vi. 12 they are described in various lights, as "principalities" (*ἀρχαί*), "powers" (*ἐξουσίαι*), "rulers of the darkness of this world," and "spiritual powers of wickedness in heavenly places" (or "things") (*τὰ πνευματικὰ τῆς πονηρίας ἐν τοῖς ἐπουρανίοις*); and in all as "wrestling" against the soul of man. The same reference is made less explicitly in Rom. viii 38, and Col. ii. 15. In Rev. xii. 7–9 they are spoken of as fighting with "the dragon, the old serpent called the devil and Satan," against "Michael and his angels," and as cast out of heaven with their chief. Taking all these passages together, we find them sharing the enmity to God and man implied in the name and nature of Satan; but their power and action are but little dwelt upon in comparison with his. That there is against us a power of spiritual wickedness is a truth which we need to know, and a mystery which only Revelation can disclose; but whether it is exercised by few or by many is a matter of comparative indifference.

But the Evil One is not only the "prince of the demons," but also he is called the "prince of this world" (*ὁ ἄρχων τοῦ κόσμου τούτου*) in John xii. 31, xiv. 30, xvi. 11, and even the "god of this world" (*ὁ θεὸς τοῦ αἰῶνος τούτου*) in 2 Cor. iv. 4; the two expressions being united in the words *τοὺς κοσμοκράτορας τοῦ σκότους τοῦ αἰῶνος τούτου*, used in Eph. vi. 12[a] This power he claimed for himself, *as a delegated authority*, in the temptation of our Lord (Luke iv. 6); and the temptation would have been unreal, had he spoken altogether falsely. It implies another kind of indirect influence exercised through earthly instruments. There are some indications in Scripture of the exercise of this power through inanimate instruments, of an influence over the powers of nature, and what men call the "chances" of life. Such a power is distinctly asserted in the case of Job, and probably implied in the case of the woman with a spirit of infirmity (in Luke xiii. 16), and of St. Paul's "thorn in the flesh" (2 Cor. xii. 7). It is only consistent with the attribution of such action to the angels of God (as in Ex. xii. 23; 2 Sam. xxiv. 16; 2 K. xix. 35; Acts xii. 23); and, in our ignorance of the method of connection of the second causes of nature with the Supreme Will of God we cannot even say whether it has in it any antecedent improbability; but it is little dwelt upon in Scripture, in comparison with the other exercise of this power through the hands of wicked men, who become "children of the devil," and accordingly "do the lusts of their father." (See John viii. 44; Acts xiii. 10; 1 John iii. 8–10; and comp. John vi. 70.) In this sense the Scripture regards all sins as the "works of the devil," and traces to him, through his ministers, all spiritual evil and error (2 Cor. xi. 14, 15), and all the persecution and hindrances which oppose the Gospel (Rev. ii. 10; 1 Thess. ii. 18). Most of all is this indirect action of Satan manifested in those who deliberately mislead and tempt men, and who at last, independent of any interest of their own, come to take an unnatural pleasure in the sight of evil-doing in others (Rom. i. 32).

The method of his action is best discerned by an examination of the title by which he is designated in Scripture. He is called emphatically *ὁ διάβολος*, "the devil." The derivation of the word in itself implies only the endeavor to break the bonds between others, and "set them at variance" (see, *e. g.*, Plat. *Symp.* p. 222 *c*: *διαβάλλειν ἐμὲ καὶ Ἀγάθωνα*); but common usage adds to this general sense the special idea of "setting at variance *by slander*." In the N. T. the word *διάβολοι* is used three times as an epithet (1 Tim. iii. 11; 2 Tim. iii. 3; Tit. ii. 3); and in each case with something like the special meaning. In the application of the title to Satan, both the general and special senses should be kept in view. His general object is to break the bonds of communion between God and man, and the bonds of truth and love which bind men to each other, to "set" each soul "at variance" both with men and God, and so reduce it to that state of self-will and selfishness which is the seed-plot of sin. One special means by which he seeks to do this, is slander of God to man, and of man to God.

The slander of God to man is seen best in the words of Gen. iii. 4, 5: "Ye shall not surely die: for God doth know, that in the day that ye eat thereof your eyes shall be opened, and ye shall be as gods, knowing good and evil." These words contain the germ of the false notions, which keep men from God, or reduce their service to Him to a hard and compulsory slavery, and which the heathen so often adopted in all their hideousness, when they represented their gods as either careless of human weal and woe, or "envious" of human excellence and happiness. They attribute selfishness and jealousy to the Giver of all good. This is enough (even without the imputation of falsehood which is added) to pervert man's natural love of freedom, till it rebels against that which is made to appear as a hard and arbitrary tyranny, and seeks to set up, as it thinks, a freer and nobler standard of its own. Such is the slander of God to man, by which Satan and his agents still strive against his reuniting grace.

The slander of man to God is illustrated by the book of Job (Job i. 9–11, ii. 4, 5). In reference to it, Satan is called the "adversary" (*ἀντίδικος*) of man in 1 Pet. v. 8, and represented in that character in Zech. iii. 1, 2; and more plainly still designated in Rev. xii. 10, as "the accuser of our brethren, who accused them before our God day and night" It is difficult for us to understand what can be the need of accusation or the power of slander, under the all-searching eye of God. The mention of it is clearly an "accommodation" of

[a] The word *κόσμος*, properly referring to the system of the universe, and so used in John i. 10, is generally applied in Scripture to human society as alienated from God, with a reference to the "pomp and vanity" which makes it an idol (see, *e. g.*, 1 John ii. 15); *αἰών* refers to its transitory character, and is evidently used above to qualify the startling application of the word *θεός*, a "god of an age" being of course no true God at all. It is used with *κόσμος* in Eph ii. 2.

God's judgment to the analogy of our human experience; but we understand by it a practical and awful truth, that every sin of life, and even the admixture of lower and evil motives which taints the best actions of man, will rise up against us at the judgment, to claim the soul as their own, and fix forever that separation from God, to which, through them, we have yielded ourselves. In that accusation Satan shall in some way bear a leading part, pleading against man with that worst of slander which is based on perverted or isolated facts; and shall be overcome, not by any counter-claim of human merit, but "by the blood of the Lamb" received in true and steadfast faith.

But these points, important as they are, are of less moment than the disclosure of the method of Satanic action upon the heart itself. It may be summed up in two words — Temptation and Possession.

The subject of temptation is illustrated, not only by abstract statements, but also by the record of the temptations of Adam and of our Lord. It is expressly laid down (as in James i. 2–4) that "temptation," properly so called, *i. e.* "trial" (πειρασμός), is essential to man, and is accordingly ordained for him and sent to him by God (as in Gen. xxii. 1). Man's nature is progressive; his faculties, which exist at first only in capacity (δυνάμει) must be brought out to exist in actual efficiency (ἐνεργείᾳ) by free exercise.[a] His appetites and passions tend to their objects, simply and unreservedly, without respect to the rightness or wrongness of their obtaining them; they need to be checked by the reason and conscience, and this need constitutes a trial, in which, if the conscience prevail, the spirit receives strength and growth; if it be overcome, the lower nature tends to predominate, and the man has fallen away. Besides this, the will itself delights in independence of action. Such independence of physical compulsion is its high privilege; but there is over it the Moral Power of God's Law, which, by the very fact of its truth and goodness, acknowledged as they are by the reason and the conscience, should regulate the human will. The need of giving up the individual will, freely and by conviction, so as to be in harmony with the will of God, is a still severer trial, with the reward of still greater spiritual progress, if we sustain it, with the punishment of a subtler and more dangerous fall if we succumb. In its struggle the spirit of man can only gain and sustain its authority by that constant grace of God, given through communion of the Holy Spirit, which is the breath of spiritual life.

It is this tentability of man, even in his original nature, which is represented in Scripture as giving scope to the evil action of Satan. He is called the "tempter" (as in Matt. iv. 3; 1 Thess. iii. 5). He has power (as the record of Gen. iii. shows clearly), first, to present to the appetites or passions their objects in vivid and captivating forms, so as to induce man to seek these objects against the Law of God "written in the heart;" and next, to set upon the false desire of the will for independence, the desire "to be as gods, knowing" (that is, practically, judging and determining) "good and evil." It is a power which can be resisted, because it is under the control and overruling power of God, as is emphatically laid down in 1 Cor. x. 13; Jam. iv. 7, &c.; but it can be so resisted only by yielding to the grace of God, and by a struggle (sometimes an "agony") in reliance on its strength.

It is exercised both negatively and positively. Its negative exercise is referred to in the parable of the sower, as taking away the word, the "engrafted word" (James i. 21) of grace, *i. e.* as interposing itself, by consent of man, between him and the channels of God's grace. Its positive exercise is set forth in the parable of the wheat and the tares, represented as sowing actual seed of evil in the individual heart or the world generally; and it is to be noticed, that the consideration of the true nature of the tares (ζιζάνια) leads to the conclusion, which is declared plainly in 2 Cor. xi. 14, namely, that evil is introduced into the heart mostly as the counterfeit of good.

This exercise of the Tempter's power is possible, even against a sinless nature. We see this in the Temptation of our Lord. The temptations presented to Him appeal, first to the natural desire and need of food, next to the desire of power, to be used for good, which is inherent in the noblest minds; and lastly, to the desire of testing and realizing God's special protection, which is the inevitable tendency of human weakness under a real but imperfect faith. The objects contemplated involved in no case positive sinfulness; the temptation was to seek them by presumptuous or by unholy means; the answer to them (given by the Lord as the Son of Man, and therefore as one like ourselves in all the weakness and finiteness of our nature) lay in simple Faith, resting upon God, and on his Word, keeping to his way, and refusing to contemplate the issues of action, which belong to Him alone. Such faith is a renunciation of all self-confidence, and a simple dependence on the will and on the grace of God.

But in the temptation of a fallen nature Satan has a greater power. Every sin committed makes a man the "servant of sin" for the future (John viii. 34; Rom. vi. 16); it therefore creates in the spirit of man a positive tendency to evil, which sympathizes with, and aids, the temptation of the Evil One. This is a fact recognized by experience; the doctrine of Scripture, inscrutably mysterious, but unmistakably declared, is that, since the Fall, this evil tendency is born in man in capacity, prior to all actual sins, and capable of being brought out into active existence by such actual sins committed. It is this which St. Paul calls "a law," *i. e.* (according to his universal use of the word) an external power "of sin" over man, bringing the inner man (the νοῦς) into captivity (Rom. vii. 14–24). Its power is broken by the Atonement and the gift of the Spirit, but yet not completely cast out; it still "lusts against the spirit" so that men "cannot do the things which they would" (Gal. v. 17). It is to this spiritual power of evil, the tendency to falsehood, cruelty, pride, and unbelief, independently of any benefits to be derived from them, that Satan is said to appeal in tempting us. If his temptations be yielded to without repentance, it becomes the reprobate (ἀδόκιμος) mind, which delights in evil for its own sake (Rom. i. 28, 32) and makes men emphatically "children of the devil" (John viii. 44; Acts xiii. 10; 1 John iii. 8, 10), and "accursed" (Matt. xxv. 41), fit for "the fire pre-

[a] See the connection between faith and love by which it is made perfect (ἐνεργουμένη) in Gal. v. 6, and between faith and the works by which it is made perfected (τελειοῦται) in Jam. ii. 22.

Digitized by Google

pared fo the devil and his angels." If they be resisted, as by God's grace they may be resisted, then the evil power (the "flesh" or the "old man") is gradually "crucified" or "mortified," until the soul is prepared for that heaven, where no evil can enter.

This twofold power of temptation is frequently referred to in Scripture, as exercised, chiefly by the suggestion of evil thoughts, but occasionally by the delegated power of Satan over outward circumstances. To this latter power is to be traced (as has been said) the trial of Job by temporal loss and bodily suffering (Job i., ii.), the remarkable expression, used by our Lord, as to the woman with a "spirit of infirmity" (Luke xiii. 16), the "thorn in the flesh," which St. Paul calls the "messenger of Satan" to buffet him (2 Cor. xii. 7). Its language is plain, incapable of being explained as metaphor, or poetical personification of an abstract principle. Its general statements are illustrated by examples of temptation. (See, besides those already mentioned, Luke xxii. 3; John xiii. 27 (Judas); Luke xxii. 31 (Peter); Acts v. 3 (Ananias and Sapphira); 1 Cor. vii. 5; 2 Cor. ii. 11; 1 Thess. iii. 5.) The subject itself is the most startling form of the mystery of evil; it is one on which, from our ignorance of the connection of the First Cause with Second Causes in Nature, and of the process of origination of human thought, experience can hardly be held to be competent either to confirm or to oppose the testimony of Scripture.

On the subject of Possession see DEMONIACS. It is sufficient here to remark, that although widely different in form, yet it is of the same intrinsic character as the other power of Satan, including both that external and internal influence to which reference has been made above. It is disclosed to us only in connection with the revelation of that redemption from sin, which destroys it, — a revelation begun in the first promise in Eden, and manifested, in itself at the Atonement, in its effects at the Great Day. Its end is seen in the Apocalypse, where Satan is first "bound for a thousand years," then set free for a time for the last conflict, and finally "cast into the lake of fire and brimstone . . . for ever and ever" (xx. 2, 7–10).

A. B.

* The literature of this subject is extensive. Some of the works relating to it are referred to under the articles ANGELS, DEMONS, and DEMONIACS. Among the more recent books it may be sufficient to name here G. Roskoff's *Geschichte des Teufels*, 2 vols. Leipz. 1869, 8vo. A.

**SATHRABUZA'NES** (Σαθραβουζάνης; [Vat. once -βουρζανης:] *Satrabuzanes*). SHETHARBOZNAI (1 Esdr. vi. 3, 7, 27 [vii. 1]; comp. Ezr. v. 3, 6, vi. 6, 13).

**SATYRS** (שְׂעִירִים, *sĕirim*: δαιμόνια: *pilosi*), he rendering in the A. V. of the above-named plural noun, which, having the meaning of "hairy" or "rough," is frequently applied to "he-goats" (comp. the Latin *hircus*, from *hirtus*, *hirsutus*); the *Sĕirim*, however, of Is. xiii. 21, and xxxiv. 14, where the prophet predicts the desolation of Babylon, have, probably, no allusion to any species of goat whether wild or tame. According to the old versions, and nearly all the commentators, our own translation is correct, and Satyrs, that is, demons of woods and desert places, half men and half goats, are intended. Comp. Jerome (*Comment. ad Is.* xiii.), "Seirim vel incubones vel satyros vel sylvestres quosdam homines quos nonnulli fatuos ficarios vocant, aut dæmonum genera intelligunt." This explanation receives confirmation from a passage in Lev. xvii. 7, "they shall no more offer their sacrifices unto *Sĕirim*," and from a similar one in 2 Chr. xi. 15. The Israelites, it is probable, had become acquainted with a form of goat-worship from the Egyptians (see Bochart, *Hieroz.* iii. 825; Jablonski, *Pant. Ægypt.* i. 273 ff.). The opinion held by Michaelis (*Supp.* p. 2342) and Lichtenstein (*Commentat. de Simiarum, etc.*, § 4,

Cynocephalus. (Egyptian Monuments.)

50, sqq.), that the *Sĕirim* probably denote some species of ape, has been sanctioned by Hamilton Smith in Kitto's *Cyc.* art. "Ape." From a few passages in Pliny (*H. N.* v. 8; vii. 2; viii. 54) it is clear that by Satyrs are sometimes to be understood some kind of ape or monkey; Col. H. Smith has figured the *Macacus Arabicus* as being the probable satyr of Babylon. That some species of *Cynocephalus* (dog-faced baboon) was an animal that entered into the theology of the ancient Egyptians, is evident from the monuments and from what Horapollo (i. 14–16) has told us. The other explanation, however, has the sanction of Gesenius, Bochart, Rosenmüller, Parkhurst, Maurer, Fürst, and others. As to the "dancing" satyrs, comp. Virg. *Ecl.* v. 73, —

"Saltantes satyros imitabitur Alphesiboeus"

**SAUL** (שָׁאוּל, *i. e.* Shaûl [*asked for, besought*]: Σαούλ; Joseph. Σάουλος: *Saül*), more accurately SHAUL, in which form it is given on several occasions in the Authorized Version. The name of various persons in the Sacred History.

1. Saul of Rehoboth by the River was one of the early kings of Edom, and successor of Samlah (Gen. xxxvi. 37, 38). In 1 Chr. i. 48 he is called SHAUL. G.

2. The first king of Israel. The name here first appears in the history of Israel, though found before in the Edomite prince already mentioned; and in a son of Simeon (Gen. xlvi. 10; A. V. Shaul). It also occurs among the Kohathites in the genealogy of Samuel (1 Chr. vi. 24), and in Saul, like the king, of the tribe of Benjamin, better known as the Apostle Paul (see below, p. 2857) Josephus (*B. J.* ii. 18, § 4) mentions a Saul, father of one Simon who distinguished himself at Scythopolis in the early part of the Jewish war.

In the following genealogy may be observed··

1. The repetition in two generations of the names of Kish and Ner, of Nadab and Abi-nadab, and of Mephibosheth. 2. The occurrence of the name of Baal in three successive generations: possibly in four, as there were two Mephibosheths. 3. The constant shiftings of the names of God as incorporated in the proper names: (*a.*) *Ab*-iel = *Je*-hiel. (*b.*) *Malchi*-shua = *Je*-shua. (*c.*) Esh-*baal* = Ish-*bosheth*. (*d.*) Mephi- (or Meri-) *baal* = Mephi-*bosheth*. 4. The long continuance of the family down to the times of Ezra. 5. Is it possible that Zimri (1 Chr. ix. 42) can be the usurper of 1 K. xvi. — if so, the last attempt of the house of Saul to regain its ascendency? The time would agree.

There is a contradiction between the pedigree in 1 Sam. ix. 1, xiv. 51, which represents Saul and Abner as the grandsons of Abiel, and 1 Chr. viii. 33, ix. 39, which represents them as his great-grandsons. If we adopt the more elaborate pedigree in the Chronicles, we must suppose either that a link has been dropped between Abiel and Kish, in 1 Sam. ix. 1, or that the elder Kish, the son of Abiel (1 Chr. ix. 36), has been confounded with the younger Kish, the son of Ner (1 Chr. ix. 39). The pedigree in 1 Chr. viii. is not free from confusion, as it omits, amongst the sons of Abiel, Ner, who in 1 Chr. ix. 36 is the fifth son, and who in both is made the father of Kish.

His character is in part illustrated by the fierce, wayward, fitful nature of the tribe [BENJAMIN], and in part accounted for by the struggle between the old and new systems in which he found himself involved. To this we must add a taint of madness, which broke out in violent frenzy at times, leaving him with long lucid intervals. His affections were strong, as appears in his love with for David and his son Jonathan, but they were unequal to the wild accesses of religious zeal or insanity which ultimately led to his ruin. He was, like the earlier Judges, of whom in one sense he may be counted as the successor, remarkable for his strength and activity (2 Sam. i. 23), and he was, like the Homeric heroes, of gigantic stature, taller by head and shoulders than the rest of the people, and of that kind of beauty denoted by the Hebrew word "good" (1 Sam. ix. 2), and which caused him to be compared to the gazelle, "the gazelle of Israel."[a] It was probably these external qualities which led to the epithet which is frequently attached to his name, "chosen" — "whom the Lord did choose" — "*See* ye (i. e. Look at) him whom the Lord hath chosen!" (1 Sam. ix. 17, x. 24; 2 Sam. xxi. 6).

The birthplace of Saul is not expressly mentioned; but as Zelah was the place of Kish's sepulchre (2 Sam. xxi.), it was probably his native village. There is no warrant for saying that it was Gibeah,[b] though, from its subsequent connection with him, it is called often "Gibeah of Saul" [GIBEAH]. His father, Kish, was a powerful and wealthy chief, though the family to which he belonged was of little importance (1 Sam. ix. 1, 21)

[a] 2 Sam. i. 19, the word translated "beauty," but the same term (צְבִי) in 2 Sam. ii. 18 and elsewhere is translated "roe." The LXX. have confounded it with a very similar word, and render it Ἐπὶ λίθου, "set up a pillar."

[b] When Abiel, or Jehiel (1 Chr. viii. 29, ix. 35), is called the father of "Gibeon," it probably means *founder of Gibeah*.

Digitized by Google

A portion of his property consisted of a drove of asses. In search of these asses, gone astray on the mountains, he sent his son Saul, accompanied by a servant,[a] who acted also as a guide and guardian of the young man (ix. 3–10). After a three days' journey (ix. 20), which it has hitherto proved impossible to track, through Ephraim and Benjamin [SHALISHA; SHALIM; ZUPH], they arrived at the foot of a hill surrounded by a town, when Saul proposed to return home, but was deterred by the advice of the servant, who suggested that before doing so they should consult "a man of God," "a seer," as to the fate of the asses — securing his oracle by a present (*backshish*) of a quarter of a silver shekel. They were instructed by the maidens at the well outside the city to catch the seer as he came out of the city to ascend to a sacred eminence, where a sacrificial feast was waiting for his benediction (1 Sam. ix. 11–13). At the gate they met the seer for the first time — it was Samuel. A divine intimation had indicated to him the approach and the future destiny of the youthful Benjamite. Surprised at his language, but still obeying his call, they ascended to the high place, and in the inn or caravanserai at the top (τὸ κατάλυμα, LXX., ix. 27) found thirty or (LXX., and Joseph. *Ant.* vi. 4, § 1) seventy guests assembled, amongst whom they took the chief place. In anticipation of some distinguished stranger, Samuel had bade the cook reserve a boiled shoulder, from which Saul, as the chief guest, was bidden to tear off the first morsel (LXX., ix. 22–24). They then descended to the city, and a bed was prepared for Saul on the housetop. At daybreak Samuel roused him. They descended again to the skirts of the town, and there (the servant having left them) Samuel poured over Saul's head the consecrated oil, and with a kiss of salutation announced to him that he was to be the ruler and (LXX.) deliverer of the nation (ix. 25–x. 1). From that moment, as he turned on Samuel the huge shoulder which towered above all the rest (x. 9, LXX.), a new life dawned upon him. He returned by a route which, like that of his search, it is impossible to make out distinctly; and at every step homeward it was confirmed by the incidents which according to Samuel's prediction, awaited him (x. 2, 10). At Rachel's sepulchre he met two men,[b] who announced to him the recovery of the asses — his lower cares were to cease. At the oak[c] of Tabor [PLAIN; TABOR, PLAIN OF] he met three men carrying gifts of kids and bread, and a skin of wine, as an offering to Beth-el. Two of the loaves were offered to him as if to indicate his new dignity. At "the hill of [d]God" (whatever may be meant thereby, possibly his own city, GIBEAH), he met a band of prophets descending with musical instruments, and he caught the inspiration from them, as a sign of his new life.[e]

This is what may be called the private, inner view of his call. The outer call, which is related independently of the other, was as follows. An assembly was convened by Samuel at Mizpeh, and lots (so often practiced at that time) were cast to find the tribe and the family which was to produce the king. Saul was named — and, by a Divine intimation, found hid in the circle of baggage which surrounded the encampment (x. 17–24). His stature at once conciliated the public feeling, and for the first time the shout was raised, afterwards so often repeated in modern times, "Long live the king" (x. 23, 24), and he returned to his native Gibeah, accompanied by the fighting part[f] of the people, of whom he was now to be the especial head. The murmurs of the worthless part of the community who refused to salute him with the accustomed presents were soon dispelled[g] by an occasion arising to justify the selection of Saul. He was (having apparently returned to his private life) on his way home, driving his herd of oxen, when he heard one of those wild lamentations in the city of Gibeah, such as mark in eastern towns the arrival of a great calamity. It was the tidings of the threat issued by Nahash king of Ammon against Jabesh Gilead (see AMMON). The inhabitants of Jabesh were connected with Benjamin, by the old adventure recorded in Judg. xxi. It was as if this one spark was needed to awaken the dormant spirit of the king. "The Spirit of the Lord came upon him," as on the ancient judges. The shy, retiring nature which we have observed, vanished never to return. He had recourse to the expedient of the earlier days, and summoned the people by the bones of two of the oxen from the herd which he was driving: three (or six, LXX.) hundred thousand followed from Israel, and (perhaps not in due proportion) thirty (or seventy, LXX.) thousand from Judah: and Jabesh was rescued. The effect was instantaneous on the people; the punishment of the murmurers was demanded — but refused by Saul, and the monarchy was inaugurated anew at Gilgal (xi. 1–15). It should be, however, observed that, according to 1 Sam. xii. 12, the affair of Nahash *preceded* and occasioned the election of Saul. He becomes king of Israel. But he still so far resembles the earlier judges, as to be virtually king only of his own tribe, Benjamin, or of the immediate neighborhood. Almost all his exploits are confined to this circle of territory or associations.

Samuel, who had up to this time been still named as ruler with Saul (xi. 7, 12, 14), now withdrew, and Saul became the acknowledged chief.[h] In the 2d year[i] of his reign, he began to organize an attempt to shake off the Philistine yoke which pressed on his country; not least on his own tribe, where a Philistine officer had long been stationed even in his own field (x. 5, xiii. 3). An army of

4,000 was formed, which he soon afterwards gathered together round him; and Jonathan, apparently with his sanction, rose against the officer[a] and slew him (xiii. 2–4). This roused the whole force of the Philistine nation against him. The spirit of Israel was completely broken. Many concealed themselves in the caverns; many crossed the Jordan; all were disarmed, except Saul and his son, with their immediate retainers. In this crisis, Saul, now on the very confines of his kingdom at Gilgal, found himself in the position long before described by Samuel; longing to exercise his royal right of sacrifice, yet deterred by his sense of obedience to the prophet.[b] At last, on the 7th day, he could wait no longer, but just after the sacrifice was completed Samuel arrived, and pronounced the first curse, on his impetuous zeal (xiii. 5–14). Meanwhile the adventurous exploit of Jonathan at Michmash brought on the crisis which ultimately drove the Philistines back to their own territory [JONATHAN]. It was signalized by two remarkable incidents in the life of Saul. One was the first appearance of his madness in the rash vow which all but cost the life of his son (1 Sam. xiv. 24, 44). The other was the erection of his first altar, built either to celebrate the victory, or to expiate the savage feast of the famished people (xiv. 35).

The expulsion of the Philistines (although not entirely completed, xiv. 52) at once placed Saul in a position higher than that of any previous ruler of Israel. Probably from this time was formed the organization of royal state, which contained in germ some of the future institutions of the monarchy. The host of 3,000 has been already mentioned (1 Sam. xiii., xxiv. 2, xxvi. 2; comp. 1 Chr. xii. 29). Of this Abner became captain (1 Sam. xiv. 50). A body guard was also formed of runners and messengers (see 1 Sam. xvi. 15, 17, xxii. 14, 17, xxvi. 22).[c] Of this David was afterwards made the chief. These two were the principal officers of the court, and sate with Jonathan at the king's table (1 Sam xx. 25). Another officer is incidentally mentioned — the keeper of the royal mules — the *comes stabuli*, the "constable" of the king, such as appears in the later monarchy (1 Chr. xxvii. 30). He is the first instance of a foreigner employed about the court — being an Edomite or (LXX.) Syrian, of the name of Doeg (1 Sam. xxi. 7, xxii. 9). According to Jewish tradition (Jer. *Qu. Heb.* ad loc.) he was the servant who accompanied Saul in his pursuit of his father's asses, who counseled him to send for David (ix., xvi.), and whose son ultimately killed him (2 Sam. i. 10). The high priest of the house of Ithamar (Ahimelech or Ahijah) was in attendance upon him with the ephod, when he desired it (xiv. 3), and felt himself bound to assist his secret commissioners (xxi. 1–9, xxii. 14).

The king himself was distinguished by a state not before marked in the rulers. He had a tall spear, of the same kind as that described in the hand of Goliath. [ARMS.] This never left him — in repose (1 Sam. xviii. 10, xix. 9); at his meals (xx. 33); at rest (xxvi. 11), in battle (2 Sam. i. 6). In battle he wore a diadem on his head and a bracelet on his arm (2 Sam. i. 10). He sate at meals on a seat of his own facing his son (1 Sam xx. 25; LXX.). He was received on his return from battle by the songs of the Israelite[d] women (1 Sam. xviii. 6), amongst whom he was on such occasions specially known as bringing back from the enemy scarlet robes, and golden ornaments for their apparel (2 Sam. i. 24).

The warlike character of his reign naturally still predominated, and he was now able (not merely, like his temporary predecessors, to act on the defensive, but) to attack the neighboring tribes of Moab, Ammon, Edom, Zobah, and finally Amalek (xiv. 47). The war with Amalek is twice related, first briefly (xiv. 48), and then at length (xv. 1–9). Its chief connection with Saul's history lies in the disobedience to the prophetical command of Samuel; shown in the sparing of the king, and the retention of the spoil.

The extermination of Amalek and the subsequent execution of Agag belong to the general question of the moral code of the O. T. There is no reason to suppose that Saul spared the king for any other reason than that for which he retained the spoil — namely, to make a more splendid show at the sacrificial thanksgiving (xv. 21). Such was the Jewish tradition preserved by Josephus (*Ant.* vi. 7, § 2), who expressly says that Agag was spared for his stature and beauty, and such is the general impression left by the description of the celebration of the victory. Saul rides to the southern Carmel in a chariot (LXX.), never mentioned elsewhere, and sets up a monument there (Heb. "a hand," 2 Sam. xviii. 18), which in the Jewish traditions (Jerome, *Qu. Heb.* ad loc.) was a triumphal arch of olives, myrtles, and palms. And in allusion to his crowning triumph, Samuel applies to God the phrase, "The Victory (Vulg. *triumphator*) of Israel will neither lie nor repent" (xv. 29; and comp. 1 Chr. xxix. 11). This second act of disobedience called down the second curse, and the first distinct intimation of the transference of the kingdom to a rival. The struggle between Samuel and Saul in their final parting is indicated by the rent of Samuel's robe of state, as he tears himself away from Saul's grasp (for the gesture, see Joseph *Ant* vi. 7, § 5), and by the long mourning of Samuel for the separation — "Samuel mourned for Saul." "How long wilt thou mourn for Saul?" (xv. 35, xvi. 1).

The rest of Saul's life is one long tragedy. The frenzy, which had given indications of itself before, now at times took almost entire possession of him. It is described in mixed phrases as "an evil spirit of God" (much as we might speak of "religious madness"), which, when it came upon him, almost choked or strangled him from its violence (xvi. 14, LXX.; Joseph. *Ant.* vi. 8, § 2).

In this crisis David was recommended to him by one of the young men of his guard (in the Jewish tradition groundlessly supposed to be DOEG. Jerome, *Qu. Heb.* ad loc.). From this time forward their lives are blended together. [DAVID.] In Saul' better moments he never lost the strong af-

---

[a] The word may be rendered either "garrison" or "officer;" its meaning is uncertain.

[b] The command of Samuel (x. 8) had apparently a perpetual obligation (xiii. 13). It had been given two years before and in the interval they had both been at Gilgal (xi. 15). N. B. — The words "had appointed" (xiii. 8) are inserted in A. V.

[c] They were Benjamites (1 Sam. xxii. 7; Joseph. *Ant.* vii. 14), young, tall, and handsome (*Ibid.* vi. 6, § 6).

[d] Joseph. (*Ant.* vi. 10, § 1) makes the women sing the praises of Saul, the maidens, of David.

fiction which he had contracted for David. "He loved him greatly" (xvi. 21). "Saul would let him go no more home to his father's house" (xviii. 2). "Wherefore cometh not the son of Jesse to meat?" (xx. 27). "Is this thy voice, my son David. . . . Return, my son David; blessed be thou, my son David" (xxiv. 16, xxvi. 17, 25). Occasionally too his prophetical gift returned, blended with his madness. He "prophesied" or "raved" in the midst of his house — "he prophesied and lay down naked all day and all night" at Ramah (xix. 24). But his acts of fierce, wild zeal increased. The massacre of the priests, with all their families[a] (xxii.) — the massacre, perhaps at the same time, of the Gibeonites (2 Sam. xxi. 1), and the violent extirpation of the necromancers (1 Sam. xxviii. 3, 9), are all of the same kind. At last the monarchy itself, which he had raised up, broke down under the weakness of its head. The Philistines reëntered the country, and with their chariots and horses occupied the Plain of Esdraelon. Their camp was pitched on the southern slope of the range now called Little Hermon, by Shunem. On the opposite side, on Mount Gilboa, was the Israelite army, clinging as usual to the heights which were their safety. It was near the spring of Gideon's encampment, hence called the spring of Harod or "trembling" — and now the name assumed an evil omen, and the heart of the king as he pitched his camp there "trembled exceedingly" (1 Sam. xxviii. 5). In the loss of all the usual means of consulting the Divine will, he determined, with that wayward mixture of superstition and religion which marked his whole career, to apply[b] to one of the necromancers who had escaped his persecution. She was a woman living at Endor, on the other side of Little Hermon; she is called a woman of "Ob," *i. e.* of the skin or bladder, and this the LXX. has rendered by ἐγγαστρίμυθος or ventriloquist, and the Vulgate by Pythoness. According to the Hebrew tradition mentioned by Jerome, she was the mother of Abner, and hence her escape from the general massacre of the necromancers (see Leo Allatius, *De Engastrimytho*, cap. 6, in *Critici Sacri*, ii.). Volumes have been written on the question, whether in the scene that follows we are to understand an imposture or a real apparition of Samuel. Eustathius and most of the Fathers take the former view (representing it, however, as a figment of the devil); Origen, the latter view. Augustine wavers. (See Leo Allatius, *ut supra*, pp. 1062–1114.) The LXX. of 1 Sam. xxvii. 7 (by the above translation) and the A. V. (by its omission of "himself" in xxviii. 14, and insertion of "when" in xxviii. 12) lean to the former. Josephus (who pronounces a glowing eulogy on the woman, *Ant.* vi. 14, §§ 2, 3), and the LXX. of 1 Chr. x. 13, to the latter. At this distance of time it is impossible to determine the relative amount of fraud or of reality, though the obvious meaning of the narrative itself tends to the hypothesis of some kind of apparition. She recognizes the disguised king first by the appearance of Samuel, seemingly from his threatening aspect or tone as towards his enemy.[c] Saul apparently saw nothing, but listened to her description of a god-like figure of an aged man, wrapped round with the royal or sacred robe.[d]

On hearing the denunciation which the apparition conveyed, Saul fell the whole length of his gigantic stature (see xxviii. 20, margin) on the ground, and remained motionless till the woman and his servants forced him to eat.

The next day the battle came on, and according to Josephus (*Ant.* vi. 14, § 7), perhaps according to the spirit of the sacred narrative, his courage and self-devotion returned. The Israelites were driven up the side of Gilboa. The three sons of Saul were slain (1 Sam. xxxi. 2). Saul himself with his armor-bearer was pursued by the archers and the charioteers of the enemy (1 Sam. xxxi. 3; 2 Sam. i. 6). He was wounded in the stomach (LXX., 1 Sam. xxxi. 3). His shield was cast away (2 Sam. i. 21). According to one account, he fell upon his own sword (1 Sam. xxxi. 4). According to another account (which may be reconciled with the former by supposing that it describes a later incident), an Amalekite[e] came up at the moment of his death-wound (whether from himself or the enemy), and found him "fallen," but leaning on his spear (2 Sam. i. 6, 10). The dizziness of death was gathered over him (LXX., 2 Sam. i. 9), but he was still alive; and he was, at his own request put out of his pain by the Amalekite, who took off his royal diadem and bracelet, and carried the news to David (2 Sam. i. 7–10). Not till then, according to Josephus (*Ant.* vi. 14, § 7), did the faithful armor-bearer fall on his sword and die with him (1 Sam. xxxi. 5). The body on being found by the Philistines was stripped, and decapitated. The armor was sent into the Philistine cities, as if in retribution for the spoliation of Goliath, and finally deposited in the temple of Astarte, apparently in the neighboring Canaanitish city of Beth-shan; and over the walls of the same city was hung the naked, headless corpse, with those of his three sons (vv. 9, 10). The head was deposited (probably at Ashdod) in the temple of Dagon (1 Chr. x. 10). The corpse was removed from Beth-shan by the gratitude of the inhabitants of Jabesh-gilead, who came over the Jordan by night, carried off the bodies, burnt them, and buried them under the tamarisk at Jabesh (1 Sam. xxxi. 13). Thence, after the lapse of several years, his ashes and those of Jonathan were removed by David to their ancestral sepulchre at Zelah in Benjamin (2 Sam. xxi. 14). [MEPHIBOSHETH, vol. iii. p. 1889 *b*.] A. P. S.

* On the history and character of Saul may be mentioned Ewald, *Geschichte des Volkes Israel*, 3e Ausg. (1866), iii. 22–76; Nägelsbach, art. *Saul*, in Herzog's *Real-Encyk.* xiii. 432–437; Wunderlich, in Zeller's *Bibl. Wörterb.* ii. 407–9; Bishop Hall, *Contemplations on the O. and N. Testaments*, bks. xiii.–xv; Milman, *History of the Jews*, i. 315–331 (N. Y. 1865); Stanley, writer of the preceding sketch, "House of Saul," in his *Lectures on the Jewish Church*, ii. 1–44; and Archbishop Trench, *Shipwrecks of Faith:* Three Sermons preached before the University of Cambridge in May, 1867. This last writer has drawn a sad picture of the con-

[a] This is placed by Josephus as the climax of his guilt, brought on by the intoxication of power (*Ant.* vi. 12, § 7).

[b] His companions were Abner and Amasa (*Seder 'Olam*, Meyer, p. 492).

[c] When we last heard of Samuel he was mourning for, not hating, Saul. Had the massacre of the priests and the persecution of David (xix. 18) alienated him

[d] Ἱερατικὴν ἐσθῆτα (Joseph. *Ant.* vi. 14, § 2).

[e] According to the Jewish tradition (Jerome, *Qu Heb* ad loc.), he was the son of Doeg.

trust between the beginning and the close of Saul's career. All the finer and nobler elements of his character displayed themselves at the outset of his eventful life; while at the end we have before us the mournful spectacle of "the gradual breaking down under the wear and the tear of the world, under the influence of unresisted temptations, of a lofty soul: the unworthy close of a life worthily begun." H.

3. The Jewish name *of* ST. PAUL. This was the most distinguished name in the genealogies of the tribe of Benjamin, to which the Apostle felt some pride in belonging (Rom. xi. 1; Phil. iii. 5). He himself leads us to associate his name with that of the Jewish king, by the marked way in which he mentions Saul in his address at the Pisidian Antioch: "God gave unto them Saul the son of Cis, a man of the tribe of Benjamin" (Acts xiii. 21). These indications are in harmony with the intensely Jewish spirit of which the life of the Apostle exhibits so many signs. [PAUL.] The early ecclesiastical writers did not fail to notice the prominence thus given by St. Paul to his tribe. Tertullian (*adv. Marc.* v. 1) applies to him the dying words of Jacob on Benjamin. And Jerome, in his *Epitaphium Paulæ* (§ 3), alluding to the preservation of the six hundred men of Benjamin after the affair of Gibeah (Judg. xx. 49), speaks of them as "trecentos (sic) viros *propter Apostolum reservatos*." Compare the article on BENJAMIN (vol. i. p. 379 *a*).

Nothing certain is known about the change of the Apostle's name from Saul to Paul (Acts xiii. 9), to which reference has been already made. [PAUL, vol. iii. p. 2369 *a*.] Two chief conjectures[a] prevail concerning the change. (1.) That of Jerome and Augustine, that the name was derived from SERGIUS PAULUS, the first of his Gentile converts. (2.) That which appears due to Lightfoot, that Paulus was the Apostle's Roman name as a citizen of Tarsus, naturally adopted into common use by his biographer when his labors among the heathen commenced. The former of these is adopted by Olshausen and Meyer. It is also the view of Ewald (*Gesch.* vi. 419, 420), who seems to consider it self-evident, and looks on the absence of any explanation of the change as a proof that it was so understood by all the readers of the Acts. [See vol. iii. p. 2369 *a*, and *note*, Amer. ed.] However this may be, after Saul has taken his place definitively as the Apostle to the Gentile world, his Jewish name is entirely dropped. Two divisions of his life are well marked by the use of the two names. J. Ll. D.

**SAV'ARAN** (ὁ Σαυαράν; [Sin. ο Αυραν; Comp. with 4 MSS. Αναραν:] *filius Saura, Avaranes f*), an erroneous form of the title *Avaran*, borne by Eleazar the son of Mattathias, which is found in the common texts in 1 Macc. vi. 43. [ELEAZAR 8, vol. i. p. 695 *a*.] B. F. W.

**SAVI'AS** (om. in Vat.; Alex. Ζαουΐα; om. in Vulg.). UZZI the ancestor of Ezra (1 Esdr. viii. 2; comp. Ezr. vii. 4).

**SAVIOUR.** The following article, together with the one on the SON OF GOD, forms the complement to the life of our Lord JESUS CHRIST. [See vol. ii. p. 1437.] An explanation is first given of the *word* "Saviour," and then of his *work* of salvation, as unfolded and taught in the New Testament. [See also MESSIAH.]

I. THE WORD SAVIOUR. — The term "Saviour," as applied to our Lord Jesus Christ, represents the Greek *sôter* (σωτήρ), which in turn represents certain derivatives from the Hebrew root *yâsh'a* (יָשַׁע): particularly the participle of the Hiphil form *môshî'a* (מוֹשִׁיעַ): which is usually rendered "Saviour" in the A. V. (*e. g.* Is. xlv. 15, xlix. 26). In considering the true import of "Saviour," it is essential for us to examine the original terms answering to it, including in our view the use of *sôter* in the LXX., whence it was more immediately derived by the writers of the New Testament, and further noticing the cognate terms "to save" and "salvation," which express respectively the action and the results of the Saviour's office. (1.) The first point to be observed is that the term *sôter* is of more frequent occurrence in the LXX. than the term "Saviour" in the A. V. of the Old Testament. It represents not only the word *môshî'a* above mentioned, but also very frequently the nouns *yesh'a* (יֶשַׁע) and *yêshû'âh* (יְשׁוּעָה): which, though properly expressive of the abstract notion "salvation," are yet sometimes used in a concrete sense for "Saviour." We may cite as an example, Is. lxii. 11, "Behold, thy salvation cometh, *his* reward is with him," where evidently "salvation" = *Saviour*. So again in passages where these terms are connected immediately with the person of the Godhead, as in Ps. lxviii. 20, "the God our Saviour" (A. V. "God of our salvation"). Not only in such cases as these, but in many others where the sense does not require it, the LXX. has *sôter* where the A. V. has "salvation;" and thus the word "Saviour" was more familiar to the ear of the reader of the Old Testament in our Lord's age than it is to us. (2.) The same observation holds good with regard to the verb σώζειν, and the substantive σωτηρία, as used in the LXX. An examination of the passages in which they occur shows that they stand as equivalents for words conveying the notions of well-being, succor, peace, and the like. We have further to notice σωτηρία in the sense of recovery of the *bodily* health (2 Macc. iii. 32), together with the etymological connection supposed to exist between the terms σωτήρ and σῶμα, to which St. Paul evidently alludes in Eph. v. 23; Phil. iii. 20, 21. (3.) If we turn to the Hebrew terms, we cannot fail to be struck with their comprehensiveness. Our verb "to save" implies, in its ordinary sense, the rescue of a person from actual or impending danger. This is undoubtedly included in the Hebrew root *yâsh'a*, and may be said to be its ordinary sense, as testified by the frequent accompaniment of the preposition *min* (מִן); compare the σώσει ἀπό which the angel gives in explanation of the name Jesus, Matt. i. 21). But *yâsh'a*, beyond this, expresses *assistance* and *protection* of every kind · assistance in aggressive measures, protection against attack; and, in a secondary sense, the results of such assistance — *victory*, *safety*, *prosperity*, and *happiness*. We may cite as an instance of the *ag-*

[a] There are many other theories, one of which may be mentioned; that of Nicephorus (*Hist. Eccl.* ii. 37), who treats Paulus as a contraction of Pusillus, and supposes it to have been a nickname given to the Apostle on account of his insignificant stature!

Digitized by Google

*gressive* sense, Deut. xx. 4, "to fight for you against your enemies, to save you;" of *protection* against attack, Is. xxvi. 1, "salvation will God appoint for walls and bulwarks;" of *victory*, 2 Sam. viii. 6, "The Lord preserved David," i. e. gave him victory; of *prosperity* and *happiness*, Is. lx. 18, "Thou shalt call thy walls Salvation;" Is. lxi. 10, "He hath clothed me with the garments of salvation." No better instance of this last sense can be adduced than the exclamation "Hosanna," meaning, "Save, I beseech thee," which was uttered as a prayer for God's blessing on any joyous occasion (Ps. cxviii. 25), as at our Lord's entry into Jerusalem, when the etymological connection of the terms Hosanna and Jesus could not have been lost on the ear of the Hebrew (Matt. xxi. 9, 15). It thus appears that the Hebrew and Greek terms had their positive as well as their negative side, in other words that they expressed the presence of blessing as well as the absence of danger, actual security as well as the removal of insecurity.[a] (4.) The historical personages to whom the terms are applied further illustrate this view. The judges are styled "saviours," as having rescued their country from a state of bondage (Judg. iii. 9, 15, A. V. "deliverer;" Neh. ix. 27); a "saviour" was subsequently raised up in the person of Jeroboam II. to deliver Israel from the Syrians (2 K. xiii. 5); and in the same sense Josephus styles the deliverance from Egypt a "salvation" (*Ant.* iii. 1, § 1). Joshua on the other hand verified the promise contained in his name by his conquests over the Canaanites: the Lord was his helper in an aggressive sense. Similarly the office of the "saviours" promised in Obad. 21 was to execute vengeance on Edom. The names Isaiah, Jeshua, Ishi, Hosea, Hoshea, and lastly, Jesus, are all expressive of the general idea of *assistance* from the Lord. The Greek *sôter* was in a similar manner applied in the double sense of a deliverer from foreign foes as in the case of Ptolemy Soter, and a general protector, as in the numerous instances where it was appended as the title of heathen deities. (5.) There are numerous indications in the O. T. that the idea of a spiritual salvation, to be effected by God alone, was by no means foreign to the mind of the pious Hebrew. In the Psalms there are numerous petitions to God to save from the effects of sin (*e. g.* xxxix. 8, lxxix. 9). Isaiah in particular appropriates the term "saviour" to Jehovah (xliii. 11), and connects it with the notions of justice and righteousness (xlv. 21, lx. 16, 17): he adduces it as the special manner in which Jehovah reveals Himself to man (xlv. 15): he hints at the means to be adopted for effecting salvation in passages where he connects the term "saviour" with "redeemer" (*goël*), as in xli. 14, xlix. 26, lx. 16, and again with "ransom," as in xliii. 3. Similar notices are scattered over the prophetical books (*e. g.* Zech. ix. 9; Hos. i. 7), and though in many instances these notices admitted of a reference to proximate events of a temporal nature, they evidently looked to higher things, and thus fostered in the mind of the Hebrew the idea of a "Saviour" who should far surpass in his achievements the "saviours" that had as yet appeared. The mere sound of the word would conjure up before his imagination visions of deliverance, security, peace, and prosperity.

II. THE WORK OF THE SAVIOUR. — 1. The three first Evangelists, as we know, agree in showing that Jesus unfolded his message to the disciples by degrees. He wrought the miracles that were to be the credentials of the Messiah; He laid down the great principles of the Gospel morality, until He had established in the minds of the Twelve the conviction that He was the Christ of God. Then as the clouds of doom grew darker, and the malice of the Jews became more intense, He turned a new page in his teaching. Drawing from his disciples the confession of their faith in Him as Christ, He then passed abruptly, so to speak, to the truth that remained to be learned in the last few months of his ministry, that his work included suffering as well as teaching (Matt. xvi. 20, 21). He was instant in pressing this unpalatable doctrine home to his disciples, from this time to the end. Four occasions when He prophesied his bitter death are on record, and they are probably only examples out of many more (Matt. xvi. 21). We grant that in none of these places does the word "sacrifice" occur; and that the mode of speaking is somewhat obscure, as addressed to minds unprepared, even then, to bear the full weight of a doctrine so repugnant to their hopes. But that He must (δεῖ) go and meet death that the powers of sin and of this world are let loose against Him for a time, so that He shall be betrayed to the Jews, rejected, delivered by them to the Gentiles, and by them be mocked and scourged, crucified, and slain; and that all this shall be done to achieve a foreseen work, and accomplish all things written of Him by the prophets — these we do certainly find. They invest the death of Jesus with a peculiar significance; they set the mind inquiring what the meaning can be of this hard necessity that is laid on Him. For the answer we look to other places; but at least there is here no contradiction to the doctrine of sacrifice, though the Lord does not yet say, "I bear the wrath of God against your sins in your stead; I become a curse for you." Of the two sides of this mysterious doctrine, — that Jesus dies for us willingly, and that He dies to bear a doom laid on Him as of necessity, because some one must bear it, — it is the latter side that is made prominent. In all the passages it pleases Jesus to speak, not of his desire to die, but of the burden laid on Him, and the power given to others against Him.

2. Had the doctrine been explained no further, there would have been much to wait for. But the series of announcements in these passages leads up to one more definite and complete. It cannot be denied that the words of the institution of the Lord's Supper speak most distinctly of a sacrifice. "Drink ye all of this, for this is my blood of the new covenant," or, to follow St. Luke, "the new

[a] The Latin language possessed in the classical period no proper equivalent for the Greek σωτήρ. This appears from the introduction of the Greek word itself in a Latinised form, and from Cicero's remark (*in Verr. Act.* 2, ii. 63) that there was no one word which expressed the notion *qui salutem dedit*. Tacitus (*Ann.* xv. 71) uses *conservator*, and Pliny (xxii. 5) *servator*. The term *salvator* appears appended as a title of Jupiter in an inscription of the age of Trajan (Gruter, p. 19, No. 5). This was adopted by Christian writers as the most adequate equivalent for σωτήρ, though objections were evidently raised against it (Augustin *Serm.* 299, § 6). Another term, *salutificator*, was occasionally used by Tertullian (*De Resurr. Carn.* c. 47; *De Carn. Chr.* c. 14).

Digitized by Google

covenant in my blood." We are carried back by these words to the first covenant, to the altar with twelve pillars, and the burnt offerings and peace-offerings of oxen, and the blood of the victims sprinkled on the altar and on the people, and the words of Moses as he sprinkled it: "Behold the blood of the covenant which the Lord hath made with you concerning all these words" (Ex. xxiv.). No interpreter has ever failed to draw from these passages the true meaning: "When my sacrifice is accomplished, my blood shall be the sanction of the new covenant." The word "sacrifice" is wanting; but sacrifice and nothing else is described. And the words are no mere figure used for illustration, and laid aside when they have served that turn, "Do this in remembrance of Me." They are the words in which the Church is to interpret the act of Jesus to the end of time. They are reproduced exactly by St. Paul (1 Cor. xi. 25). Then, as now, Christians met together, and by a solemn act declared that they counted the blood of Jesus as a sacrifice wherein a new covenant was sealed; and of the blood of that sacrifice they partook by faith, professing themselves thereby willing to enter the covenant and be sprinkled with the blood.

3. So far we have examined the three "synoptic" Gospels. They follow a historical order. In the early chapters of all three the doctrine of our Lord's sacrifice is not found, because He will first answer the question about Himself, "Who is this?" before He shows them "What is his work?" But at length the announcement is made, enforced, repeated; until, when the feet of the betrayer are ready for their wicked errand, a command is given which secures that the death of Jesus shall be described forever as a sacrifice and nothing else, sealing a new covenant, and carrying good to many. Lest the doctrine of Atonement should seem to be an afterthought, as indeed De Wette has tried to represent it, St. John preserves the conversation with Nicodemus, which took place early in the ministry; and there, under the figure of the brasen serpent lifted up, the atoning virtue of the Lord's death is fully set forth. "As Moses lifted up the serpent in the wilderness, even so must the Son of Man be lifted up: that whosoever believeth in Him should not perish, but have eternal life" (John iii. 14, 15). As in this intercessory act, the image of the deadly, hateful, and accursed (Gen. iii. 14, 15) reptile became by God's decree the means of health to all who looked on it earnestly, so does Jesus in the form of sinful man, of a deceiver of the people (Matt. xxvii. 63), of Antichrist (Matt. xii. 24; John xviii. 33), of one accursed (Gal. iii. 13), become the means of our salvation; so that whoever fastens the earnest gaze of faith on Him shall not perish, but have eternal life. There is even a significance in the word "lifted up;" the Lord used probably the word נָשָׂא, which in older Hebrew meant to lift up in the widest sense, but began in the Aramaic to have the restricted meaning of lifting up for punishment.[a] With Christ the lifting up was a seeming disgrace, a true triumph and elevation. But the context in which these verses occur is as important as the verses themselves. Nicodemus comes as an inquirer; he is told that a man must be born again and then he is directed to the death of Jesus as the means of that regeneration. The earnest gaze of the wounded soul is to be the condition of its cure and that gaze is to be turned, not to Jesus on the mountain, or in the Temple, but on the Cross. This, then, is no passing allusion, but it is the substance of the Christian teaching addressed to an earnest seeker after truth.

Another passage claims a reverent attention — "If any man eat of this bread, he shall live for ever, and the bread that I will give is my flesh, which I will give for the life of the world" (John vi. 51). He is the bread; and He will give the bread.[b] If his presence on earth were the expected food, it was given already; but would He speak of "drinking his blood" (ver. 53), which can only refer to the dead? It is on the cross that He will afford this food to his disciples. We grant that this whole passage has occasioned as much disputing among Christian commentators as it did among the Jews who heard it; and for the same reason, — for the hardness of the saying. But there stands the saying; and no candid person can refuse to see a reference in it to the death of Him that speaks.

In that discourse, which has well been called the Prayer of Consecration offered by our High Priest, there is another passage which cannot be alleged as evidence to one who thinks that any word applied by Jesus to his disciples and Himself must bear in both cases precisely the same sense, but which is really pertinent to this inquiry: "Sanctify them through thy truth: thy word is truth. As Thou hast sent Me into the world, even so have I also sent them into the world. And for their sakes I sanctify Myself, that they also might be sanctified through the truth" (John xvii. 17–19). The word ἁγιάζειν, "sanctify," "consecrate," is used in the LXX. for the offering of sacrifice (Lev. xxii. 2), and for the dedication of a man to the Divine service (Num. iii. 15). Here the present tense "I consecrate," used in a discourse in which our Lord says He is "no more in the world," is conclusive against the interpretation "I dedicate my *life* to Thee;" for life is over. No self-dedication, except that by death, can now be spoken of as present. "I dedicate Myself to Thee, in my death, that these may be a people consecrated to Thee;" such is the great thought in this sublime passage, which suits well with his other declaration, that the blood of his sacrifice sprinkles them for a new covenant with God. To the great majority of expositors from Chrysostom and Cyril, the doctrine of reconciliation through the death of Jesus is asserted in these verses.

The Redeemer has already described Himself as the Good Shepherd who lays down his life for the sheep (John x. 11, 17, 18), taking care to distinguish his death from that of one who dies against his will in striving to compass some other aim: "Therefore doth my Father love Me, because I lay down my life that I might take it again. No man taketh it from Me, but I lay it down of Myself. I have power to lay it down, and I have power to take it again."

---

[a] So Tholuck, and Knapp (*Opuscula*, i. 217) The treatise of Knapp on this discourse is valuable throughout.

[b] Some, omitting ὃν ἐγὼ δώσω, would read, "And my flesh is the bread that I will give for the life of the world." So Tertullian seems to have read "Panis quem ego dedero pro salute mundi caro mea est." The sense is the same with the omission; but the received reading may be successfully defended.

Other passages that relate to his death will occur to the memory of any Bible reader. The corn of wheat that dies in the ground to bear much fruit (John xii. 24) is explained by his own words elsewhere, where He says that He came "to minister, and to give his life a ransom for many" (Matt. xx. 28).

4. Thus, then, speaks Jesus of Himself. What say his witnesses of Him? "Behold the Lamb of God," says the Baptist, "which taketh away the sin of the world" (John i. 29). Commentators differ about the allusion implied in that name. But take any one of their opinions, and a sacrifice is implied. Is it the Paschal lamb that is referred to? Is it the lamb of the daily sacrifice? Either way the death of the victim is brought before us. But the allusion in all probability is to the well-known prophecy of Isaiah (liii.) to the Lamb brought to the slaughter, who bore our griefs and carried our sorrows.[a]

5. The Apostles after the Resurrection preach no moral system, but a belief in and love of Christ, the crucified and risen Lord, through whom, if they repent, men shall obtain salvation. This was Peter's preaching on the day of Pentecost (Acts ii.); and he appealed boldly to the prophets on the ground of an expectation of a suffering Messiah (Acts iii. 18). Philip traced out for the Eunuch, in that picture of suffering holiness in the well-known chapter of Isaiah, the lineaments of Jesus of Nazareth (Acts viii.; Is. liii.). The first sermon to a Gentile household proclaimed Christ slain and risen, and added "that through his name whosoever believeth in Him shall receive remission of sins" (Acts x.). Paul at Antioch preaches "a Saviour Jesus" (Acts xiii. 23); "through this Man is preached unto you the forgiveness of sins, and by Him all that believe are justified from all things from which ye could not be justified by the Law of Moses" (Acts xiii. 38, 39). At Thessalonica all that we learn of this Apostle's preaching is "that Christ must needs have suffered and risen again from the dead; and that this Jesus, whom I preach unto you, is Christ" (Acts xvii. 3). Before Agrippa he declared that he had preached always "that Christ should suffer, and that He should be the first that should rise from the dead" (Acts xxvi. 23); and it was this declaration that convinces his royal hearer that he was a crazed fanatic. The account of the first founding of the Church in the Acts of the Apostles is concise and fragmentary; and sometimes we have hardly any means of judging what place the sufferings of Jesus held in the teaching of the Apostles; but when we read that they "preached Jesus," or the like, it is only fair to infer from other passages that the Cross of Christ was never concealed, whether Jews, or Greeks, or barbarians were the listeners. And this very pertinacity shows how much weight they attached to the facts of the life of our Lord. They did not merely repeat in each new place the pure morality of Jesus as He uttered it in the Sermon on the Mount: of such lessons we have no record. They took in their hands, as the strongest weapon, the fact that a certain Jew crucified afar off in Jerusalem was the Son of God, who had died to save men from their sins; and they offered to all alike an interest, through faith, in the resurrection from the dead of this outcast of his own people. No wonder that Jews and Greeks, judging in their worldly way, thought this strain of preaching came of folly or madness, and turned from what they thought unmeaning jargon.

6. We are able to complete from the epistles our account of the teaching of the Apostles on the doctrine of Atonement. "The Man Christ Jesus" is the Mediator between God and man, for in Him the human nature, in its sinless purity, is lifted up to the Divine, so that He, exempt from guilt, can plead for the guilty (1 Tim. ii. 5; 1 John ii. 1, 2; Heb. vii. 25). Thus He is the second Adam that shall redeem the sin of the first; the interests of men are bound up in Him, since He has power to take them all into Himself (Eph. v. 29, 30; Rom. xii. 5; 1 Cor. xv. 22; Rom. v. 12, 17). This salvation was provided by the Father, to "reconcile us to Himself" (2 Cor. v. 18), to whom the name of "Saviour" thus belongs (Luke i. 47); and our redemption is a signal proof of the love of God to us (1 John iv. 10). Not less is it a proof of the love of Jesus, since He freely lays down his life for us — offers it as a precious gift, capable of purchasing all the lost (1 Tim. ii. 6; Tit. ii. 14; Eph. i. 7. Comp. Matt. xx. 28). But there is another side of the truth more painful to our natural reason. How came this exhibition of Divine *love* to be needed? Because wrath had already gone out against man. The clouds of God's anger gathered thick over the whole human race; they discharged themselves on Jesus only. God has made Him to be sin for us who knew no sin (2 Cor. v. 21); He is made "a curse" (a thing accursed) for us, that the curse that hangs over us may be removed (Gal. iii. 13); He bore our sins in his own body on the tree (1 Pet. ii. 24). There are those who would see on the page of the Bible only the sunshine of the Divine love; but the muttering thunders of Divine wrath against sin are heard there also: and He who alone was no child of wrath, meets the shock of the thunderstorm, becomes a curse for us, and a vessel of wrath; and the rays of love break out of that thunder-gloom, and shine on the bowed head of Him who hangs on the Cross, dead for our sins.

We have spoken, and advisedly, as if the New Testament were, as to this doctrine, one book in harmony with itself. That there are in the New Testament different types of the one true doctrine, may be admitted without peril to the doctrine. The principal types are four in number.

7. In the Epistle of James there is a remarkable absence of all explanations of the doctrine of the Atonement; but this admission does not amount to so much as may at first appear. True, the key-note of the epistle is that the Gospel is the Law made perfect, and that it is a practical moral system, in which man finds himself free to keep the Divine Law. But with him Christ is no mere Lawgiver appointed to impart the Jewish system. He knows that Elias is a man like himself, but of

---

[a] See this passage discussed fully in the notes of Meyer, Lange (*Bibelwerk*), and Alford. The reference to the Paschal lamb finds favor with Grotius and others; the reference to Isaiah is approved by Chrysostom and many others. The taking away of sin (ver. 29) of the Baptist, and the bearing it (φέρειν, LXX.) of Isaiah, have one meaning, and answer to the Hebrew word נָשָׂא. To take the sins on Himself is to remove them from the sinners; and how can this be through his death except in the way of expiation by that death itself?

Digitized by Google

the Person of Christ he speaks in a different spirit. He calls himself "a servant of God and of the Lord Jesus Christ," who is "the Lord of Glory." He speaks of the Word of Truth, of which Jesus has been the utterer. He knows that faith in the Lord of Glory is inconsistent with time-serving and "respect of persons" (James i. 1, ii. 1, i. 18). "There is one Lawgiver," he says, "who is able to save and to destroy" (James iv. 12); and this refers no doubt to Jesus, whose second coming he holds up as a motive to obedience (James v. 7–9). These and like expressions remove this epistle far out of the sphere of Ebionitish teaching. The inspired writer sees the Saviour, in the Father's glory, preparing to return to judge the quick and dead. He puts forth Christ as Prophet and King, for he makes Him Teacher and Judge of the world; but the office of the Priest he does not dwell on. Far be it from us to say that he knows it not. Something must have taken place before he could treat his hearers with confidence, as free creatures, able to resist temptations, and even to meet temptations with joy. He treats "your faith" as something founded already, not to be prepared by this epistle (James i. 2, 3, 21). His purpose is a purely practical one. There is no intention to unfold a Christology, such as that which makes the Epistle to the Romans so valuable. Assuming that Jesus has manifested Himself, and begotten anew the human race, he seeks to make them pray with undivided hearts, and be considerate to the poor, and strive with lusts, for which they and not God are responsible; and bridle their tongues, and show their fruits by their works.[a]

8. In the teaching of St. Peter the doctrine of the Person of our Lord is connected strictly with that of his work as Saviour and Messiah. The frequent mention of his sufferings shows the prominent place he would give them; and he puts forward as the ground of his own right to teach, that he was "a witness of the sufferings of Christ" (1 Pet. v. 1). The atoning virtue of those sufferings he dwells on with peculiar emphasis; and not less so on the purifying influence of the Atonement on the hearts of believers. He repeats again and again that Christ died for us (1 Pet. ii. 21, iii. 18, iv. 1); that He bare our sins in his own body on the tree[b] (1 Pet. ii. 24). He bare them; and what does this phrase suggest, but the goat that "shall bear" the iniquities of the people off into the land that was not inhabited? (Lev. xvi. 22) or else the *feeling the consequences* of sin, as the word is used elsewhere (Lev. xx. 17, 19)? We have to choose between the cognate ideas of sacrifice and substitution. Closely allied with these statements are those which connect moral reformation with the death of Jesus. He bare our sins that we might live unto righteousness. His death is our life. We are not to be content with a self-satisfied contemplation of our redeemed state, but to live a life worthy of it (1 Pet. ii. 21–25, iii. 15–18). In these passages the whole Gospel is contained; we are justified by the death of Jesus, who bore our sins that we might be sanctified and renewed to a life of godliness. And from this Apostle we hear again the name of "the Lamb," as well as from John the Baptist; and the passage of Isaiah comes back upon us with unmistakable clearness. We are redeemed "with the precious blood of Christ, as of a lamb without blemish and without spot" (1 Pet. i. 18, 19, with Is. liii. 7). Every word carries us back to the Old Testament and its sacrificial system: the spotless victim, the release from sin by its blood (elsewhere, i. 2, by the *sprinkling* of its blood), are here; not the type and shadow, but the truth of them; not a ceremonial purgation, but an effectual reconcilement of man and God.

9. In the inspired writings of John we are struck at once with the emphatic statements as to the Divine and human natures of Christ. A right belief in the incarnation is the test of a Christian man (1 John iv. 2; John i. 14; 2 John 7); we must believe that Jesus Christ is come in the flesh, and that He is manifested to destroy the works of the devil (1 John iii. 8). And, on the other hand, He who has come in the flesh is the One who alone has been in the bosom of the Father, seen the things that human eyes have never seen, and has come to declare them unto us (1 John i. 2, iv. 14; John i. 14–18). This Person, at once Divine and human, is "the propitiation for our sins," our "Advocate with the Father," sent into the world "that we might live through Him;" and the means was his laying down his life for us, which should make us ready to lay down our lives for the brethren (1 John ii. 1, 2, iv. 9, 10, v. 11–13, iii. 16, v. 6, i. 7; John xi. 51). And the moral effect of his redemption is, that "the blood of Jesus Christ cleanseth us from all sin" (1 John i. 7). The intimate connection between his work and our holiness is the main subject of his first epistle: "Whosoever is born of God doth not commit sin" (1 John iii. 9). As with St. Peter, so with St. John; every point of the doctrine of the Atonement comes out with abundant clearness: the substitution of another who can bear our sins, for us who cannot; the sufferings and death as the means of our redemption, our justification thereby, and our progress in holiness as the result of our justification.

10. To follow out as fully, in the more voluminous writings of St. Paul, the passages that speak of our salvation, would far transgress the limits of our paper. Man, according to this Apostle, is a transgressor of the Law. His conscience tells him that he cannot act up to that Law which, the same conscience admits, is Divine, and binding upon him. Through the old dispensations man remained in this condition. Even the Law of Moses could not justify him: it only by its strict behests held up a mirror to conscience that its frailness might be seen. Christ came, sent by the mercy of our Father who had never forgotten us; given to, not deserved by us. He came to reconcile men and God by dying on the Cross for them, and bearing their punishment in their stead[c] (2 Cor. v. 14–21; Rom. v. 6–8). He is "a propitiation through faith in his blood" (Rom iii. 25, 26. Compare

[a] See Neander, *Pflanzung*, b. vi. c. 3 [Robinson's transl. p. 498 ff.]; Schmid, *Theologie des N. T.*, part i.; and Dorner, *Christologie*, i 95.

[b] If there were any doubt that "for us" (ὑπὲρ ἡμῶν) means "in our stead" (see ver. 21), this 24th verse, which explains the former, would set it at rest.

[It may be the inferential, but not direct force of ὑπὲρ (comp. Philip. i. 29). See Winer, *N. T. Gr.*, 7th ed., pp. 382, 383 (Thayer's trans. 1869). — H.]

[c] These two passages are decisive as to the fact of substitution: they might be fortified with many others.

Digitized by Google

Lev. xvi. 15. Ἱλαστήριον means "victim for expiation"): words which most people will find unintelligible, except in reference to the Old Testament and its sacrifices. He is the ransom, or price paid, for the redemption of man from all iniquity [a] (Titus ii. 14). The wrath of God was against man, but it did not fall on man. God made his Son "to be sin for us" though He knew no sin, and Jesus suffered though men had sinned. By this act God and man were reconciled (Rom. v. 10; 2 Cor. v. 18–20; Eph. ii 16; Col. i. 21). On the side of man, trust and love and hope take the place of fear and of an evil conscience; on the side of God, that terrible wrath of his, which is revealed from heaven against all ungodliness and unrighteousness of men, is turned away (Rom. i. 18, v. 9; 1 Thess. i. 10). The question whether we are reconciled to God only, or God is also reconciled to us, might be discussed on deep metaphysical grounds; but we purposely leave that on one side, content to show that at all events the intention of God to punish man is averted by this "propitiation" and "reconcilement."

11. Different views are held about the authorship of the Epistle to the Hebrews, by modern critics; but its numerous points of contact with the other epistles of St. Paul must be recognized. In both, the incompleteness of Judaism is dwelt on; redemption from sin and guilt is what religion has to do for men, and this the Law failed to secure. In both, reconciliation and forgiveness and a new moral power in the believers are the fruits of the work of Jesus. In the Epistle to the Romans, Paul shows that the Law failed to justify, and that faith in the blood of Jesus must be the ground of justification. In the Epistle to the Hebrews the same result follows from an argument rather different: all that the Jewish system aimed to do is accomplished in Christ in a far more perfect manner. The Gospel has a better Priest, more effectual sacrifices, a more profound peace. In the one epistle the Law seems set aside wholly for the system of faith; in the other the Law is exalted and glorified in its Gospel shape; but the aim is precisely the same — to show the weakness of the Law and the effectual fruit of the Gospel.

12. We are now in a position to see how far the teaching of the New Testament on the effects of the death of Jesus is continuous and consistent. Are the declarations of our Lord about Himself the same as those of James and Peter, John and Paul? and are those of the Apostles consistent with each other? The several points of this mysterious transaction may be thus roughly described: —

(1.) God sent his Son into the world to redeem lost and ruined man from sin and death, and the Son willingly took upon Him the form of a servant for this purpose: and thus the Father and the Son manifested their love for us.

(2.) God the Father laid upon his Son the weight of the sins of the whole world, so that He bare in his own body the wrath which men must else have borne, because there was no other way of escape for them; and thus the Atonement was a manifestation of Divine justice.

(3.) The effect of the Atonement thus wrought in, that man is placed in a new position, freed from the dominion of sin, and able to follow holiness; and thus the doctrine of the Atonement ought to work in all the hearers a sense of love, of obedience and of self-sacrifice.

In shorter words, the sacrifice of the death of Christ is a proof of Divine *love*, and of Divine *justice*, and is for us a document of *obedience*.

Of the four great writers of the New Testament, Peter, Paul, and John set forth every one of these points. Peter, the "witness of the sufferings of Christ," tells us that we are redeemed with the blood of Jesus, as of a lamb without blemish and without spot; says that Christ bare our sins in his own body on the tree. If we "have tasted that the Lord is gracious" (1 Pet. ii. 3), we must not rest satisfied with a contemplation of our redeemed state, but must live a life worthy of it. No one can well doubt, who reads the two epistles, that the love of God and Christ, and the justice of God, and the duties thereby laid on us, all have their value in them; but the love is less dwelt on than the justice, whilst the most prominent idea of all is the moral and practical working of the Cross of Christ upon the lives of men.

With St. John, again, all three points find place. That Jesus willingly laid down his life for us, and is an advocate with the Father; that He is also the propitiation, the suffering sacrifice, for our sins; and that the blood of Jesus Christ cleanseth us from all sin, for that whoever is born of God doth not commit sin — all are put forward. The death of Christ is both justice and love, both a propitiation and an act of loving self-surrender; but the moral effect upon us is more prominent even than these.

In the epistles of Paul the three elements are all present. In such expressions as a ransom, a propitiation, who was "made sin for us," the wrath of God against sin, and the mode in which it was turned away, are presented to us. Yet not wrath alone. "The love of Christ constraineth us; because we thus judge, that if one died for all, then were all dead: and that He died for all, that they which live should not henceforth live unto themselves, but unto Him which died for them, and rose again" (2 Cor. v. 14, 15). Love in Him begets love in us, and in our reconciled state the holiness which we could not practice before becomes easy.

The reasons for not finding from St. James similar evidence, we have spoken of already.

Now in which of these points is there the semblance of contradiction between the Apostles and their Master? In none of them. In the Gospels, as in the Epistles, Jesus is held up as the sacrifice and victim, draining a cup from which his human nature shrank, feeling in himself a sense of desolation such as we fail utterly to comprehend on a theory of human motives. Yet no one takes from Him his precious redeeming life; He lays it down of Himself, out of his great love for men. But men are to deny themselves and take up their cross and tread in his steps. They are his friends only if they keep his commands and follow his footsteps.

We must consider it proved that these three points or moments are the doctrine of the whole New Testament. What is there about this teaching that has provoked in times past and present so much disputation? Not the hardness of the doctrine, — for none of the theories put in its place are any easier, — but its want of logical completeness. Sketched out for us in a few broad lines, it

[a] Still stronger in 1 Tim. ii. 6, "ransom instead of" (ἀντίλυτρον). Also Eph. i. 7 (ἀπολύτρωσιν); 1 Cor. vi. 20, vii. 23.

Digitized by Google

accepts the fancy to fill it in and lend it color; and we do not always remember that the hands that attempt this are trying to make a mystery into a theory, an infinite truth into a finite one, and to reduce the great things of God into the narrow limits of our little field of view. To whom was the ransom paid? What was Satan's share of the transaction? How can one suffer for another? How could the Redeemer be miserable when He was conscious that his work was one which could bring happiness to the whole human race? Yet this condition of indefiniteness is one which is imposed on us in the reception of every mystery: prayer, the incarnation, the immortality of the soul, are all subjects that pass far beyond our range of thought. And here we see the wisdom of God in connecting so closely our redemption with our reformation. If the object were to give us a complete theory of salvation, no doubt there would be in the Bible much to seek. The theory is gathered by fragments out of many an exhortation and warning; nowhere does it stand out entire, and without logical flaw. But if we assume that the New Testament is written for the guidance of sinful hearts, we find a wonderful aptness for that particular end. Jesus is proclaimed as the solace of our fears, as the founder of our moral life, as the restorer of our lost relation with our Father. If He had a cross, there is a cross for us; if He pleased not himself, let us deny ourselves; if He suffered for sin, let us hate sin. And the question ought not to be, What do all these mysteries mean? but, Are these thoughts really such as will serve to guide our life and to assuage our terrors in the hour of death? The answer is twofold — one from history and one from experience. The preaching of the Cross of the Lord even in this simple fashion converted the world. The same doctrine is now the ground of any definite hope that we find in ourselves, of forgiveness of sins and of everlasting life.

It would be out of place in a Dictionary of the Bible to examine the History of the Doctrine or to answer the modern objections urged against it. For these subjects the reader is referred to the author's essay on the "Death of Christ," in *Aids to Faith*, which also contains the substance of the present article. [See also the arts. JESUS CHRIST, MESSIAH, SON OF GOD, and SON OF MAN, in this Dictionary.] W. T.

• **SAVOUR** as a verb occurs in the A. V. only in Matt. xvi. 23, and the parallel passage Mark viii. 33, in our Lord's rebuke of Peter: "Thou *savourest* not the things that be of God, but those that be of men." The Greek, *οὐ φρονεῖς τὰ τοῦ Θεοῦ*, etc, may be well rendered, as it is by Mr. Green in his *Twofold New Test.*, "Thy mind is not on the things of God, but on those of men." Dr. Johnson defines the word *savour* here "to exhibit a taste for," and probably most English readers so understand it. But it may have been used by our translators in a more comprehensive sense, corresponding to the translation given above. Wycliffe renders Col. iii. 2 (Vulg. *quæ sursum sunt, sapite*), "*savor* ye tho thingis that ben above," and uses the same word in his translation of Rom. viii. 5, xii. 3, 16; Phil. iii. 19, etc., where the A. V. has "mind" or "think of." The term is derived, ultimately, through the French noun *savour*, O. F. *savor*, verb *savorer*, from the Latin *sapere*, meaning primarily to *taste* or *smell*, then to *discern*, *possess discernment* or *knowledge*, etc.

The noun *savour* occurs very often in the A. V., and almost always in the sense (now becoming obsolete) of "odor." A.

SAW.[a] Egyptian saws, so far as has yet been discovered, were single-handed, though St. Jerome has been thought to allude to circular saws. As is the case in modern oriental saws, the teeth usually incline toward the handle, instead of away from it like ours. They have in most cases, bronze blades, apparently attached to the handles by leathern thongs, but some of those in the British Museum have their blades let into them like our knives. A double-handed iron saw has been found at Nimrûd; and double saws strained with a cord, such as modern carpenters use, were in use among the Romans. In sawing wood the Egyptians placed the wood perpendicularly in a sort of frame, and cut it downwards. No evidence exists of the use of the saw applied to stone in Egypt, nor without the double-handed saw does it seem likely that this should be the case; but we read of sawn stones used in the Temple. (1 K. vii. 9; Ges. *Thes.* p. 305; Wilkinson, *Anc. Egyp.* ii. 114, 119; Brit. Mus. *Egyp. Room*, No. 6046; Layard, *Nin. and Bab.* p. 195; Jerome, *Comm. in Is.* xxviii. 27.) The saws "under" or "in"[b] which David is said to have placed his captives were of iron. The expression in 2 Sam. xii. 31 does not necessarily imply torture, but the word "cut" in 1 Chr. xx. 3 can hardly be understood otherwise. (Ges. *Thes.* p. 1326; Thenius on 2 Sam. xii. and 1 Chr. xx.) A case of sawing asunder, by placing the criminal between boards, and then beginning at the head, is mentioned by Shaw, *Trav.* p. 254. (See *Dict. of Antiq.* "Serra.") [HANDICRAFT; PUNISHMENTS, III. *b.* (3).] H. W. P.

SCAPE-GOAT. [ATONEMENT, DAY OF.]

SCARLET. [COLORS.]

SCEPTRE (שֵׁבֶט). The Hebrew term *shebet*, like its Greek equivalent σκῆπτρον, and our derivative *sceptre*, originally meant a *rod* or *staff* It was thence specifically applied to the shepherd's crook (Lev. xxvii. 32; Mic. vii. 14), and to the wand or sceptre of a ruler. It has been inferred that the latter of these secondary senses is derived from the former (Winer, *Realwb.* "Sceptre"); but this appears doubtful from the circumstance that the sceptre of the Egyptian kings, whence the idea of a sceptre was probably borrowed by the early Jews, resembled not a shepherd's crook, but a plough (Diod. Sic. iii. 3). The use of the staff as a symbol of authority was not confined to kings; it might be used by any leader, as instanced in Judg. v. 14, where for "pen of the writer," as in the A. V., we should read "sceptre of the leader." Indeed, no instance of the sceptre being actually handled by a Jewish king occurs in the Bible: the allusions to it are all of a metaphorical character, and describe it simply as one of the insignia of supreme power (Gen. xlix. 10; Num. xxiv. 17; Ps. xlv. 6; Is. xiv. 5; Am. i. 5; Zech. x. 11; Wisd. x. 14; Bar. vi. 14 [or Epist. of Jer. 14]). We are

consequently unable to describe the article from any Biblical notices; we may infer from the term *shebet*, that it was probably made of wood; but we are not warranted in quoting Ez. xix. 11, in support of this, as done by Winer, for the term rendered "rods" may better be rendered "shoots," or "sprouts" as = *offspring*. The sceptre of the Persian monarchs is described as "golden," *i. e.* probably of massive gold (Esth. iv. 11; Xen. *Cyrop.* viii. 7, § 13); the inclination of it towards a subject by the monarch was a sign of favor, and kissing it an act of homage (Esth. iv. 11, v. 2). A carved ivory staff discovered at Nimrûd is supposed to have been a sceptre (Layard, *Nin. and Bab.* p. 195). The sceptre of the Egyptian queens is represented in Wilkinson's *Anc. Eg.* i. 276. The term *shebet* is rendered in the A. V. "rod" in two passages where *sceptre* should be substituted, namely, in Ps. ii. 9, where "sceptre of iron" is an expression for strong authority, and in Ps. cxiv. 3. W. L. B.

SCE'VA (Σκευᾶς: *Sceva*). A Jew residing at Ephesus at the time of St. Paul's second visit to that town (Acts xix. 14–16). He is described as a "high-priest" (ἀρχιερεύς), either as having exercised the office at Jerusalem, or as being chief of one of the twenty-four classes. His seven sons attempted to exorcise spirits by using the name of Jesus, and on one occasion severe injury was inflicted by the demoniac on two of them (as implied in the term ἀμφοτέρων, the true reading in ver. 16 instead of αὐτῶν). * SCHOOLS OF THE PROPHETS. [SAMUEL, 3 (*b*); PROPHET, II.]

SCIENCE (מַדָּע: γνῶσις: *scientia*). In the A. V. this word occurs only in Dan. i. 4, and 1 Tim. vi. 20. Elsewhere the rendering for the Hebrew or Greek words and their cognates is "knowledge," while the Vulg. has as uniformly *scientia*. Its use in Dan. i. 4 is probably to be explained by the number of synonymous words in the verse, forcing the translators to look out for diversified equivalents in English. Why it should have been chosen for 1 Tim. vi. 20 is not so obvious. Its effect is injurious, as leading the reader to suppose that St. Paul is speaking of something else than the "knowledge" of which both the Judaixing and the mystic sects of the apostolic age continually boasted, against which he so urgently warns men (1 Cor. viii. 1, 7), the counterfeit of the true knowledge which he prizes so highly (1 Cor. xii. 8, xiii. 2; Phil. i. 9; Col. iii. 10). A natural perversion of the meaning of the text has followed from this translation. Men have seen in it a warning, not against a spurious theosophy — of which Swedenborgianism is, perhaps, the nearest modern analogue — but against that which did not come within St. Paul's horizon, and which, if it had, we may believe he would have welcomed — the study of the works of God, the recognition of his Will working by laws in nature. It has been hurled successively at the heads of astronomers and geologists, whenever men have been alarmed at what they have deemed the antagonism of physics. "science" to religion. It would be interesting to ascertain whether this were at all the *animus* of the translators of the A. V. — whether they were beginning to look with alarm at the union of skepticism and science, of which the common proverb, *ubi tres medici duo athei*, was a witness. As it is, we must content ourselves with noting a few facts in the Biblical history of the English word.

(1.) In Wickliffe's translation, it appears less frequently than might have been expected in a version based upon the Vulgate. For the "knowledge of salvation" of the A. V. in Luke i. 77, we have the "science of health." In Christ are hid "the treasures of wisdom and of science" (Col. ii. 3). In 1 Tim. vi. 20, however, Wickliffe has "kunuynge."

(2.) Tindal, rejecting "science" as a rendering elsewhere, introduces it here; and is followed by Cranmer's and the Geneva Bibles, and by the A. V.[a]

(3.) The Rhemish translators, in this instance adhering less closely to the Vulg. than the Protestant versions, give "knowledge."

It would obviously be out of place to enter here into the wide question what were the ἀντιθέσεις τῆς ψευδωνύμου γνώσεως of which St. Paul speaks. A dissertation on the Gnosticism of the Apostolic age would require a volume. What is necessary for a Dictionary will be found under TIMOTHY, EPISTLES TO. E. H. P.

SCORPION (עַקְרָב, *'akrâb*: σκορπίος: *scorpio*). The well-known animal of that name, belonging to the class *Arachnida* and order *Pulmonaria*, which is twice mentioned in the O. T. and four times in the N. T. The wilderness of Sinai is especially alluded to as being inhabited by scorpions at the time of the Exodus (Deut. viii. 15), and to this day these animals are common in the same district, as well as in some parts of Palestine. Ehrenberg (*Symb. Phys.*) enumerates five species as occurring near Mt. Sinai, some of which are found also in the Lebanon. Ezekiel (ii. 6) is told to be in no fear of the rebellious Israelites, here compared to scorpions. The Apostles were endued with power to resist the stings of serpents and scorpions (Luke x. 19). In the vision of St. John (Rev. ix. 3, 10) the locusts that came out of the smoke of the bottomless pit are said to have had "tails like unto scorpions," while the pain resulting from this creature's sting is alluded to in verse 5. A scorpion for an egg (Luke xi. 12) was probably a proverbial expression. According to Erasmus the Greeks had a similar proverb (ἀντὶ περικῆς σκορπίον). Scorpions are generally found in dry and in dark places, under stones and in ruins, chiefly in warm climates. They are carnivorous in their habits, and move along in a threatening attitude with the tail elevated. The sting, which is

[a] The following quotation from Tindal is decisive as to the sense in which he used the word. It shows that he contemplated no form of science (in the modern sense of the term), mathematical or physical, but the very opposite of this, — the attempt to bring all spiritual or divine truths under the formulæ of the logical understanding. He speaks of the disputes of Romish theologians as the "contradictions of which Paul warned Timothy, calling them the oppositions of a false-named science, for that their *scholastical divinity* must make objections against any truth, be it never so plain, with *pro* and *contra*" (*Supper of the Lord* iii 284, Parker Soc. Edition). Tindal's use and application of the word accounts, it may be remarked, for the choice of a different word by the Rhemish translators. Those of the A. V. *may* have used it with different meaning.

Digitized by Google

situated at the extremity of the tail, has at its base a gland that secretes a poisonous fluid, which is discharged into the wound by two minute orifices at its extremity. In hot climates the sting often occasions much suffering, and sometimes alarming symptoms. The following are the species of scorpions mentioned by Ehrenberg: *Scorpio macrocentrus, S. palmatus, S. bicolor, S. leptochelis, S. funestus*, all found at Mt. Sinai; *S. nigrocinctus, S. melanophysis, S. palmatus*, Mt. Lebanon.[a] Besides these Palestine and Sinai kinds, five others are recorded as occurring in Egypt.

Scorpion.

The "scorpions" of 1 K. xii. 11, 14, 2 Chr. x. 11, 14, have clearly no allusion whatever to the animal, but to some instrument of scourging — unless, indeed, the expression is a mere figure. Celsius (*Hierob.* ii. 45) thinks the "scorpion" scourge was the spiny stem of what the Arabs call *Hedek* (حدق). the *Solanum melongena*, var. *esculentum*, egg-plant, because, according to Abdul Fadli, this plant, from the resemblance of its spines to the sting of a scorpion, was sometimes called "scorpion thorn;" but in all probability this instrument of punishment was in the form of a whip armed with iron points "Virga — si nodosa vel aculeata, scorpio rectissimo nomine vocatur, qui arcuato vulnere in corpus infigitur." (Isidorus, *Orig. Lat.* 5, 27; and see Jahn, *Bib. Ant.* p. 287.) In the Greek of 1 Macc. vi. 51, some kind of war missile is mentioned under the name σκορπίδιον; but we want information both as to its form and the reason of its name. (See *Dict. of Antiquities*, art. "Tormentum.") W. H.

**SCOURGING.**[b] The punishment of scourging was prescribed by the Law in the case of a betrothed bondwoman guilty of unchastity, and perhaps in the case of both the guilty persons (Lev. xix. 20). Women were subject to scourging in Egypt, as they still are by the law of the Korân, for incontinence (Sale, *Koran*, chap. xxiv. and chap. iv. *note*; Lane, *Mod. Egyp.* i. 147; Wilkinson, *Anc. Egyp.* abridgm. ii 211). The instrument of punishment in ancient Egypt, as it is also in modern times generally in the East, was usually the stick, applied to the soles of the feet — bastinado (Wilkinson, *l. c.*; Chardin, vi. 114; Lane, *Mod. Egyp.* i. 146). A more severe scourge is possibly implied in the term "scorpions," whips armed with pointed balls of lead, the "horribile flagellum" of Horace, though it is more probably merely a vivid figure. Under the Roman method the culprit was stripped, stretched with cords or thongs on a frame (*divaricatio*), and beaten with rods. After the Porcian law (B. C. 300), Roman citizens were exempted from scourging, but slaves and foreigners were liable to be beaten, even to death (Gesen. *Thes.* p. 1062; Isid. *Orig.* v. 27, ap. Scheller, *Lex. Lat.* Scorpio; Hor. 1 *Sat.* ii. 41, iii. 119; Prov. xxvi. 3; Acts xvi. 22, and Grotius, *ad l.*, xxii. 24, 25; 1 K. xii. 11; Cic. *Ver.* iii. 28, 29; *pro Rab.* 4; Liv. x. 9; Sall. *Cat.* 51) [PUNISHMENTS, III. c. (4.)] H. W. P

**SCREECH-OWL.** [OWL.]

**SCRIBES** (סֹפְרִים: γραμματεῖς: *scribæ*). The prominent position occupied by the Scribes in the Gospel history would of itself make a knowledge of their life and teaching essential to any clear conception of our Lord's work. It was by their influence that the later form of Judaism had been determined. Such as it was when the "new doctrine" was first proclaimed, it had become through them. Far more than priests or Levites they represented the religious life of the people. On the one hand we must know what they were in order to understand the innumerable points of contrast presented by our Lord's acts and words. On the other, we must not forget that there were also, inevitably, points of resemblance. Opposed as his teaching was, in its deepest principles, to theirs, He was yet, in the eyes of men, as one of their order, a Scribe among Scribes, a Rabbi among Rabbis (John i. 49, iii. 2, vi. 25, &c.; Schoettgen, *Hor. Heb.* ii. *Christus Rabbinorum Summus*).

I. *Name.* — (1.) Three meanings are connected with the verb *sâphar* (סָפַר) the root of *Sopherim* — (1) to write, (2) to set in order, (3) to count. The explanation of the word has been referred to each of these. The *Sopherim* were so called because they wrote out the Law, or because they classified and arranged its precepts, or because they counted with scrupulous minuteness every clause and letter it contained. The traditions of the Scribes, glorying in their own achievements,[c] were in favor of the last of these etymologies (*Sekalim*, 5; Carpzov, *App. Crit.* ii. 135). The second fits in best with the military functions connected with the word in the earlier stages of its history (*infra*). The authority of most Hebrew scholars is with the first (Gesenius, *s. v.*). The Greek equivalent answers to the derived rather than the original meaning of the word. The γραμματεύς of a Greek

---

[a] Modern naturalists restrict the genus *Scorpio* to those kinds which have six eyes, Bosthus to those which have eight, and Androctonus to those which have twelve.

[b] 1. To scourge, שׁוֹט; the scourge, שׁוֹט: μάστιξ: *flagellum*: also in A. V. "whip."

2. שׁמם: ἄλοε: *verberatum*; only in Josh. xxiii. 13. Either a subst. or the inf. in Piel (Ges. p 1579).

[c] They had ascertained that the central letter of the whole Law was the vau in וְגֹרֶן in Lev. xi. 42, and wrote it accordingly in a larger character. (*Kiddush* in Lightfoot, *On Luke* x.) They counted up in like manner the precepts of the Law that answered to the number of Abraham's servants or Jacob's descendants.

Digitized by Google

state was not the mere writer, but the keeper and registrar of public documents (Thuc. iv. 118, vii. 10, so in Acts xix. 35). The Scribes of Jerusalem were, in like manner, the custodians and interpreters of the γράμματα upon which the polity of the nation rested. Other words applied to the same class are found in the N. T. Νομικοί appears in Matt. xxii. 35, Luke vii. 30, x. 25, xiv. 3; νομοδιδάσκαλοι in Luke v. 17; Acts v. 34. Attempts have been made, but not very successfully, to reduce the several terms to a classification.[a] All that can be said is that γραμματεύς appears the most generic term; that in Luke xi. 45 it is contrasted with νομικός; that νομοδιδάσκαλος, as in Acts v. 34, seems the highest of the three. Josephus (*Ant.* xvii. 6, § 2) paraphrases the technical word by ἐξηγηταὶ νόμων.

(2.) The name of KIRJATH-SEPHER (πόλις γραμμάτων, LXX., Josh. xv. 15; Judg. i. 12) may possibly connect itself with some early use of the title. In the Song of Deborah (Judg. v. 14) the word appears to point to military functions of some kind. The "pen of the writer" of the A. V. (LXX. ἐν ῥάβδῳ διηγήσεως γραμματέως) is probably the rod or sceptre of the commander numbering or marshalling his troops.[b] The title appears with more distinctness in the early history of the monarchy. Three men are mentioned as successively filling the office of Scribe under David and Solomon (2 Sam. viii. 17, xx. 25; 1 K. iv. 3, in this instance two simultaneously). Their functions are not specified, but the high place assigned to them, side by side with the high-priest and the captain of the host, implies power and honor. We may think of them as the king's secretaries, writing his letters, drawing up his decrees, managing his finances (comp. the work of the Scribe under Joash, 2 K. xii. 10). At a later period the word again connects itself with the act of numbering the military forces of the country (Jer. lii. 25, and probably Is. xxxiii. 18). Other associations, however, began to gather round it about the same period. The zeal of Hezekiah led him to foster the growth of a body of men whose work it was to transcribe old records, or to put in writing what had been handed down orally (Prov. xxv. 1). To this period, accordingly, belongs the new significance of the title. It no longer designates only an officer of the king's court, but a class, students and interpreters of the Law boasting of their wisdom (Jer. viii. 8).

(3.) The seventy years of the Captivity gave a fresh glory to the name. The exiles would be anxious above all things to preserve the sacred books, the laws, the hymns, the prophecies of the past. To know what was worth preserving, to transcribe the older Hebrew documents accurately, when the spoken language of the people was passing into Aramaic, to explain what was hard and obscure — this was what the necessities of the time demanded. The man who met them became emphatically Ezra the Scribe, the priestly functions falling into the background, as the priestly order itself did before the Scribes as a class. The words of Ezr. vii. 10 describe the high ideal of the new office. The Scribe is "to seek (דָּרַשׁ) the law of the Lord and to do it, and to teach in Israel statutes and judgments." This, far more than his priesthood, was the true glory of Ezra. In the eyes even of the Persian king he was "a Scribe of the Law of the God of Heaven" (vii. 12). He was assisted in his work by others, chiefly Levites. Publicly they read and expounded the Law, perhaps also translated it from the already obsolescent Hebrew into the Aramaic of the people[c] (Neh viii. 8–13).

(4.) Of the time that followed we have but scanty records. The Scribes' office apparently became more and more prominent. Traces are found in the later canonical books of their work and influence. Already they are recognized as "masters of assemblies," acting under "one shepherd," having, that is, something of a corporate life (Eccl. xii. 11; Jost, *Judenth.* i. 42). As such they set their faces steadily to maintain the authority of the Law and the Prophets, to exclude from all equality with them the "many books" of which "there is no end" (Eccl. xii. 12). They appear as a distinct class, "the families of the Scribes," with a local habitation (1 Chr. ii. 55). They compile, as in the two books of Chronicles, *excerpta* and epitomes of larger histories (1 Chr. xxix. 29; 2 Chr. ix. 29). The occurrence of the word *midrash* ("the story — margin, 'the commentary' — of the Prophet Iddo"), afterwards so memorable, in 2 Chr. xiii. 22, shows that the work of commenting and expounding had begun already.

II. *Development of Doctrine.* — (1.) It is characteristic of the Scribes of this period that, with the exception of Ezra and Zadok (Neh. xiii. 13), we have no record of their names. A later age honored them collectively as the men of the Great Synagogue, the true successors of the Prophets (*Pirke Aboth*, i. 1), but the men themselves by whose agency the Scriptures of the O. T. were written in their present characters,[d] compiled in their present form, limited to their present number, remain unknown to us. Never, perhaps, was so important a work done so silently. It has been well argued (Jost, *Judenthum*, i. 42) that it was so of set purpose. The one aim of those early Scribes was to promote reverence for the Law, to make it the groundwork of the people's life. They would write nothing of their own, lest less worthy words should be raised to a level with those of the oracles of God. If interpretation were needed, their teaching should be oral only. No precepts should be perpetuated as resting on their authority.[e] In the

[a] Lightfoot's arrangement, though conjectural, is worth giving (*Harm.* § 77). The "Scribes," as such, were those who occupied themselves with the *Mikra*. Next above them were the "Lawyers," students of the *Mishna*, acting as assessors, though not voting in the Sanhedrim. The "Doctors of the Law" were expounders of the *Gemara*, and actual members of the Sanhedrim. (Comp. Carpzov, *App. Crit.* i. 7; Leusden, *Phil. Hebr.* c. 23; Leyrer, in Herzog's *Encyklop.* Schriftgelehrte.")

[b] Ewald, however (*Post. Bücher*, i. 126 [182, 2e Aufl.]), takes שֹׁפֵט as equivalent to שָׁפָט, "a judge."

[c] If this were so (and most commentators adopt this view), we should have in this history the starting-point of the Targum. It has, however, been questioned. (Comp. Leyrer, *l. c.*)

[d] Jost (*Judenth.* i. 52) draws attention to the singular, almost unique combinations of this period. The Jewish teachers kept to the old Hebrew, but used Aramaic characters. The Samaritans spoke Aramaic but retained the older Hebrew writing.

[e] The principle of an unwritten teaching was maintained among the Rabbis of Palestine up to the destruction of the Temple (Jost, i. 97, 267).

Digitized by Google

words of later Judaism, they devoted themselves to the *Mikra* (*i. e.* recitation, reading, as in Neh. viii. 8), the careful study of the text, and laid down rules for transcribing it with the most scrupulous precision (comp. the tract *Sopherim* in the Jerusalem Gemara).

(2.) A saying is ascribed to Simon the Just (B. C. 300–290), the last of the succession of the men of the Great Synagogue, which embodies the principle on which they had acted, and enables us to trace the next stage of the growth of their system. "Our fathers have taught us," he said, "three things, to be cautious in judging, to train many scholars, and to set a fence about the Law" (*Pirke Aboth*, i. 1; Jost, i. 95). They wished to make the Law of Moses the rule of life for the whole nation and for individual men. But it lies in the nature of every such law, of every informal, half-systematic code, that it raises questions which it does not solve. Circumstances change, while the Law remains the same. The infinite variety of life presents cases which it has not contemplated. A Roman or Greek jurist would have dealt with these on general principles of equity or polity. The Jewish teacher could recognise no principles beyond the precepts of the Law. To him they all stood on the same footing, were all equally divine. All possible cases must be brought within their range, decided by their authority.

(3.) The result showed that, in this as in other instances, the idolatry of the letter was destructive of the very reverence in which it had originated. Step by step the Scribes were led to conclusions at which we may believe the earlier representatives of the order would have started back with horror. Decisions on fresh questions were accumulated into a complex system of casuistry. The new precepts, still transmitted orally, more precisely fitting in to the circumstances of men's lives than the old, came practically to take their place. The "Words of the Scribes" (דִּבְרֵי סוֹפְרִים), now used as a technical phrase for these decisions) were honored above the Law (Lightfoot, *Harm.* i. § 77; Jost, *Judenth.* i. 93). It was a greater crime to offend against them than against the Law. They were as wine, while the precepts of the Law were as water. The first step was taken towards annulling the commandments of God for the sake of their own traditions. The casuistry became at once subtle and prurient,[a] evading the plainest duties, tampering with conscience (Matt. xv. 1–6, xxiii. 16–23). The right relation of moral and ceremonial laws was not only forgotten, but absolutely inverted. This was the result of the profound reverence for the letter which gave no heed to the "word abiding in them" (John v. 38).

(4.) The history of the full development of these tendencies belongs to a history of the Talmud.[b] Here it will be enough to notice in what way the teaching of the Scribes in our Lord's time was making to that result. Their first work was to report the decisions of previous Rabbis. These were the *Halachoth* (that which *goes*, the *current* precepts of the schools) — precepts binding on th conscience. As they accumulated they had to be compiled and classified. A new code, a second *Corpus Juris*, the Mishna (*δευτερώσεις*), grew out of them, to become in its turn the subject of fresh questions and commentaries. Here ultimately the spirit of the commentators took a wider range. The anecdotes of the schools or courts of law, the *obiter dicta* of Rabbis, the wildest fables of Jewish superstition (Tit. i. 14), were brought in, with or without any relation to the context, and the *Gemara* (completeness) filled up the measure of the Institutes of Rabbinic Law. The Mishna and the Gemara together were known as the Talmud (instruction), the "necessary doctrine and erudition" of every learned Jew (Jost, *Judenth.* ii. 202–222).

(5.) Side by side with this was a development in another direction. The sacred books were not studied as a code of laws only. To *search* into their meaning had from the first belonged to the ideal office of the Scribe. He who so searched was secure, in the language of the Scribes themselves, of everlasting life (John v. 39; *Pirke Aboth*, ii. 8) But here also the book suggested thoughts which could not logically be deduced from it. Men came to it with new beliefs, new in form if not in essence, and, not finding any ground for them in a literal interpretation, were compelled to have recourse to an interpretation which was the reverse of literal.[c] The fruit of this effort to find what was not there appears in the *Midrashim* (searchings, investigations) on the several books of the O. T. The process by which the meaning, moral or mystical, was elicited, was known as *Hagada* (saying, opinion). There was obviously no assignable limit to such a process. It became a proverb that no one ought to spend a day in the Beth-ham-Midrash ("the house of the interpreter") without lighting on something new. But there lay a stage higher even than the Hagada. The mystical school of interpretation culminated in the *Kabbala* (reception, the received doctrine). Every letter, every number, became pregnant with mysteries. With the strangest possible distortion of its original meaning, the Greek word which had been the representative of the most exact of all sciences was chosen for the wildest of all interpretations. The Gematria (= *γεωμετρία*) showed to what depths the wrong path could lead men. The mind of the interpreter, obstinately shutting out the light of day, moved in its self-chosen darkness amid a world of fantastic Eidola (comp. Carpzov, *App. Crit.* i 7; Schoettgen, *Hor. Heb. de Mess.* i. 4; Zuns, *Gottesdienstl. Vortrdge*, pp. 42–61; Jost, *Judenth.* iii. 65–81; [Ginsburg, *The Kabbalah: its Doctrines, Development, and Literature*, Lond. 1865; also his arts. *Kabbalah* and *Midrash* in Kitto's *Cyclop. of Bibl. Lit.*, 3d ed.]).

---

[a] It would be profitless to accumulate proofs of this. Those who care for them may find them in Buxtorf, *Synagoga Judaica*; M'Caul, *Old Paths*. Revolting as it is, we must remember that it rose out of the principle that there can be no indifferent action, that there must be a right or a wrong even for the commonest necessities, the merest animal functions of man's life, that it was the work of the teacher to formulate that principle into rules. [Compare the Roman Catholic writers on "Moral Theology." — A.]

[b] For a partial view of the literature relating to the Talmud the reader may see the references under PHARISEES (vol. iii. p. 2472, note *b*), to which may be added the interesting and instructive article on *The Jewish Reformation and the Talmud* in Blackwood's *Mag.* for Nov. 1869, reprinted in Littell's *Living Age* for Jan. 22, 1870, No. 1388. A.

[c] Comp. *e. g.* the exposition which found in Laban and Balaam "going to their own place" (Gen. xxxi 55; Num. xxiv. 25) an intimation of their being sentenced to Gehenna (Gill, *Comm. on Acts*, i. 25).

III. *History.* — (1.) The names of the earlier Scribes passed away, as has been said, unrecorded. Simon the Just (cir. B. C. 300–290) appears as the last of the men of the Great Synagogue, the beginner of a new period. The memorable names of the times that followed — Antigonus of Socho, Zadok, Boethos — connect themselves with the rise of the first opposition to the traditional system which was growing up. [SADDUCEES.] The tenet of the Sadducees, however, never commanded the adhesion of more than a small minority. It tended, by maintaining the sufficiency of the letter of the Law, to destroy the very occupation of a Scribe,[a] and the class, as such, belonged to the party of its opponents. The words "Scribes" and "Pharisees" were bound together by the closest possible alliance (Matt. xxiii. *passim*; Luke v. 30). [PHARISEES.] Within that party there were shades and subdivisions, and to understand their relation to each other in our Lord's time, or their connection with his life and teaching, we must look back to what is known of the five pairs (זוגות) of teachers who represented the scribal succession. Why two, and two only, are named in each case we can only conjecture, but the Rabbinic tradition that one was always the Nasi or President of the Sanhedrim as a council, the other the Ab-beth-din (Father of the House of Judgment), presiding in the supreme court, or in the Sanhedrim when it sat as such, is not improbable (Jost, *Judenth.* i. 160).

(2.) The two names that stand first in order are Joses ben-Joezer, a priest, and Joses ben-Jochanan (cir. B. C. 140–130). The precepts ascribed to them indicate a tendency to a greater elaboration of all rules connected with ceremonial defilement. Their desire to *separate* themselves and their disciples from all occasions of defilement may have furnished the starting-point for the name of Pharisee. The brave struggle with the Syrian kings had turned chiefly on questions of this nature, and it was the wish of the two teachers to prepare the people for any future conflict by founding a fraternity (the *Chaberim*, or associates) bound to the strictest observance of the Law. Every member of the order on his admission pledged himself to this in the presence of three *Chaberim*. They looked on each other as brothers. The rest of the nation they looked on as "the people of the earth." The spirit of Scribedom was growing. The precept associated with the name of Joses ben-Joezer, "Let thy house be the assembly-place for the wise; dust thyself with the dust of their feet; drink eagerly of their words," pointed to a further growth (*Pirke Aboth*, i. 1; Jost, i. 233). It was hardly checked by the taunt of the Sadducees that "these Pharisees would purify the sun itself" (Jost, i. 217).

(3.) Joshua ben-Perachiah and Nithai of Arbela were contemporary with John Hyrcanus (cir. B. C. 135–108), and enjoyed his favor till towards the close of his reign, when caprice or interest led him to pass over to the camp of the Sadducees. The saying ascribed to Joshua, "Take to thyself a teacher (*Rab*), get to thyself an associate (*Chaber*), judge every man on his better side" (*Pirke Aboth*, i. 1), while its last clause attracts us by its candor, shows how easily even a fair-minded man might come to recognise no bonds of fellowship outside the limits of his sect or order (Jost, i 227–233).

(4.) The secession of Hyrcanus involved the Pharisees, and therefore the Scribes as a class, in difficulties, and a period of confusion followed. The meetings of the Sanhedrim were suspended or became predominantly Sadducean. Under his successor, Alexander Jannai, the influence of Simon ben-Shetach over the queen-mother Salome reëstablished for a time the ascendency of the Scribes. The Sanhedrim once again assembled, with none to oppose the dominant Pharisaic party. The day of meeting was observed afterwards as a festival only less solemn than those of Purim and the Dedication. The return of Alexander from his campaign against Gaza again turned the tables. Eight hundred Pharisees took refuge in a fortress, were besieged, taken, and put to death. Joshua ben-Perachiah, the venerable head of the order, was driven into exile. Simon ben-Shetach, his successor, had to earn his livelihood by spinning flax. The Sadducees failed, however, to win the confidence of the people. Having no body of oral traditions to fall back on, they began to compile a code. They were accused by their opponents of wishing to set up new laws on a level with those of Moses, and had to abandon the attempt. On the death of Jannai the influence of his widow Alexandra was altogether on the side of the Scribes, and Simon ben-Shetach and Judah ben-Tabbai entered on their work as joint teachers. Under them the juristic side of the Scribe's functions became prominent. Their rules turn chiefly on the laws of evidence (*Pirke Aboth*, i. 1). In two memorable instances they showed what sacrifices they were prepared to make in support of those laws. Judah had, on one occasion, condemned false witnesses to death. His zeal against the guilt led him to neglect the rule which only permitted that penalty when it would have been the consequence of the original accusation. His colleague did not shrink from rebuking him, "Thou hast shed innocent blood." From that day Judah resolved never to give judgment without consulting Simon, and every day threw himself on the grave of the man he had condemned, imploring pardon. Simon, in his turn, showed a like sense of the supreme authority of the Law. His own son was brought before him as an offender, and he sentenced him to death. On the way to execution the witnesses confessed that they had spoken falsely; but the son, more anxious that they should suffer than that he himself should escape, turned round and entreated his father not to stop the completion of the sentence. The character of such a man could not fail to impress itself upon his followers. To its influence may probably be traced the indomitable courage in defense of the Temple, which won the admiration even of the Roman generals (Jost, i. 234–247).

(5.) The two that followed, Shemaiah and Abtalion (the names also appear under the form of Samaea, Joseph. *Ant.* xiv. 9, § 4, and Pollio, Joseph. *Ant.* xiv. 1, § 1), were conspicuous for another reason. Now, for the first time, the teach-

[a] A striking instance of this is seen in the history of John Hyrcanus. A Sadducee came to him with proofs of the disaffection of the Pharisees. The king asked, "What then am I to do?" "Crush them," was the answer. "But what then will become of the teaching of the Law?" "The Law is now in the hands of every man. They, and they only, would keep it in a corner" (Jost, *Judenth.* i. 235).

Digitized by Google

ers who sat in Moses' seat were not even of the children of Abraham. Proselytes themselves, or the sons of proselytes, their preëminence in the knowledge of the Law raised them to this office. The jealousy of the high-priest was excited. As the people flocked round their favorite Rabbis when it was his function to pronounce the blessing, he looked round and, turning his benediction into a sarcasm, said, with a marked emphasis, "May the sons of the *alien* walk in peace!" The answer of the two teachers expressed the feeling of scorn with which the one order was beginning to look upon the other: "Yes, the sons of the alien shall indeed walk in peace, for they do the work of peace. Not so the son of Aaron who follows not in the footsteps of his father." Here also we have some significant sayings. The growing love of titles of honor was checked by Shemaiah by the counsel that "men should love the work, but hate the Rabbiship." The tendency to new opinions (the fruits, probably, of the freer exposition of the *Hagada*) was rebuked by Abtalion in a precept which enwraps a parable: "Take good heed to thy words, lest, if thou wander, thou light upon a place where the wells are poisoned, and thy scholars who come after thee drink deep thereof and die" (*Pirke Aboth*, i. 1). The lot of these two also was cast upon evil days. They had courage to attempt to check the rising power of Herod in his bold defiance of the Sanhedrim (Joseph. *Ant.* xiv. 9, § 3). When he showed himself to be irresistible they had the wisdom to submit, and were suffered to continue their work in peace. Its glory was, however, in great measure, gone. The doors of their school were no longer thrown open to all comers so that crowds might listen to the teacher. A fixed fee[a] had to be paid on entrance. The regulation was probably intended to discourage the attendance of the young men of Jerusalem at the Scribes' classes; and apparently it had that effect (Jost, i. 248–253). On the death of Shemaiah and Abtalion there were no qualified successors to take their place. Two sons of Bethera, otherwise unknown, for a time occupied it, but they were themselves conscious of their incompetence. A question was brought before them which neither they nor any of the other Scribes could answer. At last they asked, in their perplexity, "Was there none present who had been a disciple of the two who had been so honored?" The question was answered by Hillel the Babylonian, known also, then or afterwards, as the son of David. He solved the difficulty, appealed to principles, and, when they demanded authority as well as argument, ended by saying, "So have I heard from my masters Shemaiah and Abtalion." This was decisive. The sons of Bethera withdrew. Hillel was invited by acclamation to enter on his high office. His alleged descent from the house of David may have added to his popularity.

(6.) The name of Hillel (born circ. B. C. 112[b]) has hardly received the notice due to it from students of the Gospel history.[c] The noblest and most genial representative of his order, we may see in him the best fruit which the system of the Scribes was capable of producing.[d] It is instructive to mark at once how far he prepared the way for the higher teaching which was to follow, how far he inevitably fell short of it. The starting-point of his career is told in a tale which, though deformed by Rabbinic exaggerations, is yet fresh and genial enough. The young student had come from Golah in Babylonia to study under Shemaiah and Abtalion. He was poor and had no money. The new rule requiring payment was in force. For the most part he worked for his livelihood, kept himself with half his earnings, and paid the rest as the fee to the college-porter. On one day, however, he had failed to find employment. The door-keeper refused him entrance; but his zeal for knowledge was not to be baffled. He stationed himself outside, under a window, to catch what he could of the words of the Scribes within. It was winter, and the snow began to fall, but he remained there still. It fell till it lay upon him six cubits high (!) and the window was darkened and blocked up. At last the two teachers noticed it, sent out to see what caused it, and when they found out, received the eager scholar without payment. "For such a man," said Shemaiah, "one might even break the Sabbath" (Geiger, *ut supra*; Jost, i. 254). In the earlier days of his activity Hillel had as his colleague Menahem, probably the same as the Essene Manaen of Josephus (*Ant.* xv. 10, § 5). He, however, was tempted by the growing power of Herod, and, with a large number (eighty in the Rabbinic tradition) of his followers, entered the king's service and abandoned at once their calling as Scribes and their habits of devotion. They appeared publicly in the gorgeous apparel, glittering with gold, which was inconsistent with both[e]

---

[a] The amount is uncertain. The story of Hillel (*infra*) represents it as half a *stater*, but it is doubtful whether the *stater* here is equal to twice the *didrachma* or to half (comp. Geiger, *De Hillele et Shammai*, in Ugolini, *Thes.* xxi.). It was, at any rate, half the day's wages of a skilled laborer.

[b] We have not the means of fixing with any precision the date of Hillel's birth. The question is fully discussed by Ewald in his *Gesch. d. Volkes Israel*, 3te Ausg. (1867), v. 12–26. Assuming that Hillel is the same person with the Pollio of Josephus (so Josippon, v. 4, etc. cited by Ewald) he is disposed to consider him as flourishing from about 60 B. C. to 10 A. D. Derenbourg (*Essai sur l'hist. et la géog. de la Palestine*, i. 149 f., 468 f.) thinks that the Samea and Pollio of Josephus represent, through a confusion on the part of this writer, sometimes Shemaiah and Abtalion, and sometimes Shammai and Hillel. Ginsburg, art. *Hillel* in Kitto's *Cyclop. of Bibl. Lit.*, 3d ed., says, without giving any authority, that he was born about 75, B. C. On Hillel, whose merits, really great, have been strangely exaggerated by some recent Jewish writers, g. Dr. Geiger (not the Geiger so often referred to in this article), one may see, in addition to the works already referred to in the body of the article, or just mentioned, Ewald's *Jahrb. d. Bibl. wissenschaft*, x. 56–88 (substantially reproduced in his *Geschichte*, as above), and the interesting little pamphlet of Delitzsch, *Jesus und Hillel, mit Rücksicht auf Renan und Geiger verglichen*, 2te Aufl., Erlangen, 1867. A.

[c] The exhaustive treatise by Geiger in Ugolini, *Thes.* xxi. must be mentioned as an exception.

[d] The reverence of later Jews for Hillel is shown in some curious forms. To him it was given to understand the speech of animals as well as of men. He who hearkened not to the words of Hillel was worthy of death. (Geiger, *ut supra*.) Of him too it was said that the Divine Shechinah rested on him: if the heavens were parchment and all the trees of the earth pens, and all the sea ink, it would not be enough to write down his wisdom (comp. John xxi. 25). (See Houbner, *De Academiis Hebræorum*, in Ugolini, *Thes.* xxi.)

[e] We may perhaps find in this fact an explanation which gives a special force to words that have hitherto been interpreted somewhat vaguely. When our Lord

(Jost, i. 259). The place thus vacant was soon filled by Shammai. The two were held in nearly equal honor. One, in Jewish language, was the Nasi, the other the Ab-beth-din of the Sanhedrim. They did not teach, however, as their predecessors had done, in entire harmony with each other. Within the party of the Pharisees, within the order of the Scribes, there came for the first time to be two schools with distinctly opposed tendencies, one vehemently, rigidly orthodox, the other orthodox also, but with an orthodoxy which, in the language of modern politics, might be classed as Liberal Conservative. The points on which they differed were almost innumerable (comp. Geiger, *ut supra*). In most of them, questions as to the causes and degrees of uncleanness, as to the law of contracts or of wills, we can find little or no interest. On the former class of subjects the school of Shammai represented the extremest development of the Pharisaic spirit. Everything that could possibly have been touched by a heathen or an unclean Israelite, became itself unclean. "Defilement" was as a contagious disease which it was hardly possible to avoid even with the careful scrupulosity described in Mark vii. 1–4. They were, in like manner, rigidly sabbatarian. It was unlawful to do anything before the Sabbath which would, in any sense, be in operation during it, *e. g.* to put cloth into a dye-vat, or nets into the sea. It was unlawful on the Sabbath itself to give money to the poor, or to teach children, or to visit the sick. They maintained the marriage law in its strictness, and held that nothing but the adultery of the wife could justify repudiation (Jost, i. 257–269). We must not think of them, however, as rigid and austere in their lives. The religious world of Judaism presented the inconsistencies which it has often presented since. The "straitest sect" was also the most secular. Shammai himself was said to be rich, luxurious, self-indulgent. Hillel remained to the day of his death as poor as in his youth (Geiger, *l. c.*).

(7.) The teaching of Hillel showed some capacity for wider thoughts. His personal character was more lovable and attractive. While on the one side he taught as from a mind well stored with the traditions of the elders, he was, on the other, anything but a slavish follower of those traditions. He was the first to lay down principles for an equitable construction of the Law with a dialectic precision which seems almost to imply a Greek culture (Jost, i. 257). When the letter of a law, as *e. g.* that of the year of release, was no longer suited to the times, and was working, so far as it was kept at all, only for evil, he suggested an interpretation which met the difficulty or practically set it aside. His teaching as to divorce was in like manner an adaptation to the temper of the age. It was lawful for a man to put away his wife for any cause of disfavor, even for so slight an offense as that of spoiling his dinner by her bad cooking [a] (Geiger, *l. c.*). The genial character of the man comes out in some of his sayings, which remind us of the tone of Jesus the son of Sirach, and present some faint approximations to a higher teaching: "Trust not thyself to the day of thy death." "Judge not thy neighbor till thou art in his place." "Leave nothing dark and obscure, saying to thyself, I will explain it when I have time; for how knowest thou whether the time will come?" (comp. James iv. 13–15). "He who gains a good name gains it for himself, but he who gains a knowledge of the Law gains everlasting life" (comp. John v. 39; *Pirke Aboth*, ii. 5–8). In one memorable rule we find the nearest approach that had as yet been made to the great commandment of the Gospel: "Do nothing to thy neighbor that thou wouldest not that he should do to thee." [b]

(8.) The contrast showed itself in the conduct of the followers not less than in the teachers. The disciples of Shammai were conspicuous for their fierceness, appealed to popular passions, used the sword to decide their controversies. Out of that school grew the party of the Zealots, fierce, fanatical, vindictive, the Orangemen of Pharisaism (Jost, i. 267–269). Those of Hillel were, like their master (comp. *e. g.* the advice of Gamaliel, Acts v. 34–42), cautious, gentle, tolerant, unwilling to make enemies, content to let things take their course. One school resisted, the other was disposed to foster the study of Greek literature. One sought to impose upon the proselyte from heathenism the full burden of the Law, the other that he should be treated with some sympathy and indulgence.

---

contrasted the steadfastness and austerity of the Baptist with the lives of those who were soft clothing, were gorgeously appareled, and lived delicately in kings' houses (Matt. xi. 8; Luke vii. 24), those who heard Him may at once have recognised the picture. In the multitude of uncertain guesses as to the Herodians of the Gospels (Matt. xxii. 16) we may be permitted to hazard the conjecture that they may be identified with the party, perhaps rather with the clique, of Menahem and his followers (Geiger, *ut sup.*; Otho, *Hist. Doctorum Mismicorum*, in Ugolini, *Thes.* xxi.). The fact that the stern, sharp words of a divine scorn which have been quoted above, meet us just after the first combination of Herodians and Pharisees, gives it a strong confirmation (comp. Mark iii. 6; Luke vi. 11, vii. 19).

[a] It is fair to add that a great Rabbinic scholar maintains that this "spoiling the dinner" was a well-known figurative phrase for conduct which brought shame or discredit on the husband (Jost, i. 264).

[b] The history connected with this saying is too charmingly characteristic to be passed over. A proselyte came to Shammai and begged for some instruction in the Law if it were only for as long as he, the learner, could stand on one foot. The Scribe was angry, and drove him away harshly. He went to Hillel with the same request. He received the inquirer benignantly, and gave him the precept above quoted, adding — "Do this, and thou hast fulfilled the Law and the Prophets" (Geiger, *ut supra*). [Comp. Tobit, iv. 15, ὃ μισεῖς μηδενὶ ποιήσῃς, and see Wetstein's note on Matt. vii. 12. It is well known that the same precept appears repeatedly, in this negative form, among the sayings ascribed to Confucius. See the *Lun-Yu*, or "Confucian Analects," as Dr. Legge calls the work, bk. v. c. 11; xii. 2; xv. 23. In the *Chung-Yung*, xiii. 3, 4, Confucius delivers the same rule with a positive application, but confesses that he has not himself been able to practice it perfectly Comp. the *Lun-Yu*, iv. 15, where the whole doctrine of Confucius is summed up in two words, *chung* and *shu*, translated by Pauthier (*Confucius et Mencius*, Paris, 1858, p. 122) *avoir la droiture du cœur* and *aimer son prochain comme soi-même*. S. W. Williams, *Tonic Dict. of the Chinese Lang in the Canton Dialect*, Canton, 1856, pp. 458, 454, gives among the meanings of *shu*, "treating others as one wishes to be treated," and similar definitions are given by De Guignes, Morrison, Medhurst, and Legge Confucius does not appear to have accepted the doctrine of returning good for evil (*Lun-Yu*, xiv. 36). — A.]

[PROSELYTE.] One subject of debate between the schools exhibits the contrast as going deeper than these questions, touching upon the great problems of the universe. "Was the state of man so full of misery that it would have been better for him never to have been? Or was this life, with all its suffering, still the gift of God, to be valued and used as a training for something higher than itself?" The school of Shammai took, as might be expected, the darker, that of Hillel the brighter and the wiser view (Jost, i. 264).

(9.) Outwardly the teaching of our Lord must have appeared to men different in many ways from both. While they repeated the traditions of the elders, He "spake as one having authority," "not as the Scribes" (Matt. vii. 29; comp. the constantly recurring "I say unto you"). While they confined their teaching to the class of scholars, He "had compassion on the multitudes" (Matt. ix. 36). While they were to be found only in the council or in their schools, He journeyed through the cities and villages (Matt. iv. 23, ix. 35, &c., &c.). While they spoke of the kingdom of God vaguely, as a thing far off, He proclaimed that it had already come nigh to men (Matt. iv. 17). But in most of the points at issue between the two parties, He must have appeared in direct antagonism to the school of Shammai, in sympathy with that of Hillel. In the questions that gathered round the law of the Sabbath (Matt. xii. 1–14, and John v. 1–16, &c.), and the idea of purity (Matt. xv. 1–11, and its parallels), this was obviously the case. Even in the controversy about divorce, while his chief work was to assert the truth which the disputants on both sides were losing sight of, He recognized, it must be remembered, the rule of Hillel as being a true interpretation of the Law (Matt. xix. 8). When He summed up the great commandment in which the Law and the Prophets were fulfilled, He reproduced and ennobled the precept which had been given by that teacher to his disciples (Matt. vii. 12, xxii. 34–40). So far, on the other hand, as the temper of the Hillel school was one of mere adaptation to the feeling of the people, cleaving to tradition, wanting in the intuition of a higher life, the teaching of Christ must have been felt as unsparingly condemning it.

(10.) It adds to the interest of this inquiry to remember that Hillel himself lived, according to the tradition of the Rabbis, to the great age of 120, and may therefore have been present among the doctors of Luke ii. 46, and that Gamaliel, his grandson and successor,[a] was at the head of this school during the whole of the ministry of Christ, as well as in the early portion of the history of the Acts. We are thus able to explain the fact, which so many passages in the Gospels lead us to infer, the existence all along of a party among the Scribes themselves, more or less disposed to recognise Jesus of Nazareth as a teacher (John iii 1; Mark x. 17), not far from the kingdom of God (Mark xii. 34), advocates of a policy of toleration (John vii. 51), but, on the other hand, timid and time-serving, unable to confess even their half-belief (John xii. 42), afraid to take their stand against the strange alliance of extremes which brought together the Sadducean section of the priesthood and the ultra-Pharisaic followers of Shammai. When the last great crisis came, they apparently contented themselves with a policy of absence (Luke xxiii. 50, 51), possibly were not even summoned, and thus the Council which condemned our Lord was a packed meeting of the confederate parties, not a formally constituted Sanhedrim. All its proceedings, the hasty investigation, the immediate sentence, were vitiated by irregularity (Jost, i. 407–409). Afterwards, when the fear of violence was once over, and popular feeling had turned, we find Gamaliel summoning courage to maintain openly the policy of a tolerant expectation (Acts v. 34).

IV. *Education and Life.* — (1.) The special training for a Scribe's office began, probably, about the age of thirteen. According to the *Pirke Aboth* (v. 24) the child began to read the Mikra at five and the Mishna at ten. Three years later every Israelite became a child of the Law (*Bar-Mitzvah*), and was bound to study and obey it. The great mass of men rested in the scanty teaching of their synagogues, in knowing and repeating their Tephillim, the texts inscribed on their phylacteries. For the boy who was destined by his parents, or who devoted himself, to the calling of a Scribe, something more was required. He made his way to Jerusalem, and applied for admission to the school of some famous Rabbi. If he were poor, it was the duty of the synagogue of his town or village to provide for the payment of his fees, and in part also for his maintenance. His power to learn was tested by an examination on entrance. If he passed it he became a "chosen one" (בָּחוּר, comp. John xv. 16), and entered on his work as a disciple (Carpzov, *App. Crit.* i. 7). The master and his scholars met, the former sitting on a high chair, the elder pupils (תַּלְמִידִים) on a lower bench, the younger (קְטַנִּים) on the ground, both literally "at his feet." The class-room might be the chamber of the Temple set apart for this purpose, or the private school of the Rabbi. In addition to the Rabbi, or head master, there were assistant teachers, and one interpreter or crier, whose function it was to proclaim aloud to the whole school what the Rabbi had spoken in a whisper (comp. Matt. x. 27). The education was chiefly catechetical, the pupil submitting the cases and asking questions, the teacher examining the pupil (Luke ii.). The questions might be ethical, "What was the great commandment of all? What must a man do to inherit eternal life?" or casuistic, "What might a man do or leave undone on the Sabbath?" or ceremonial, "What did or did not render him unclean?"[b] In due time the pupil passed on to the laws of property, of contracts, and

[a] Rabbi Simeon, the son of Jamaliel, came between these, but apparently for a short time only. The question whether he is to be identified with the Simeon of Luke ii. 25, is one which we have not sufficient data to determine. Most commentators answer it in the negative. There seem, however, some probabilities on the other side. One trained in the school of Hillel might not unnaturally be looking for the "consolation of Israel." Himself of the house and lineage of David, he would readily accept the inward witness which pointed to a child of that house as "the Lord's Christ." There is something significant, too, in the silence of Rabbinic literature. In the *Pirke Aboth* he is not even named. Comp. Otho, *Hist. Doct. Mish.* in Ugolini xxi.

[b] We are left to wonder what were the questions and answers of the school-room of Luke ii. 46, but those proposed to our Lord by his own disciples, or by the Scribes, as tests of his proficiency, may fairly be taken as types of what was commonly discussed. The

Digitized by Google

of evidence. So far he was within the circle of the Halachah, the simple exposition of the traditional "Words of the Scribes." He might remain content with this, or might pass on to the higher knowledge of the Beth-ham-Midrash, with its inexhaustible stores of mystical interpretation. In both cases, preëminently in the latter, parables entered largely into the method of instruction. The teacher uttered the similitude, and left it to his hearers to interpret for themselves. [PARABLES.] That the relation between the two was often one of genial and kindly feeling, we may infer from the saying of one famous Scribe, "I have learnt much from the Rabbis my teachers, I have learnt more from the Rabbis my colleagues, I have learnt most of all from my disciples" (Carpzov, *App. Crit.* i. 7).

(2.) After a sufficient period of training, probably at the age of thirty,[a] the probationer was solemnly admitted to his office. The presiding Rabbi pronounced the formula, "I admit thee, and thou art admitted to the Chair of the Scribe," solemnly ordained him by the imposition of hands (the סמיכה = χειροθεσία),[b] and gave to him, as the symbol of his work, tablets on which he was to note down the sayings of the wise, and the "key of knowledge" (comp. Luke xi. 52), with which he was to open or to shut the treasures of Divine wisdom. So admitted, he took his place as a *Chaber*, or member of the fraternity, was no longer ἀγράμματος καὶ ἰδιώτης (Acts iv. 13), was separated entirely from the multitude, the brute herd that knew not the Law, the "cursed" "people of the earth" (John vii. 15, 49).[c]

(3.) There still remained for the disciple after his admission the choice of a variety of functions, the chances of failure and success. He might give himself to any one of the branches of study, or combine two or more of them. He might rise to high places, become a doctor of the Law, an arbitrator in family litigations (Luke xii. 14), the head of a school, a member of the Sanhedrim. He might have to content himself with the humbler work of a transcriber, copying the Law and the Prophets for the use of synagogues, or Tephillim for that of the devout (Otho, *Lex. Rabb.* s. v. "Phylacteria"), or a notary writing out contracts of sale, covenants of espousals, bills of repudiation. The position of the more fortunate was of course attractive enough. Theoretically, indeed, the office of the Scribe was not to be a source of wealth. It is doubtful how far the fees paid by the pupils were appropriated by the teacher (Buxtorf, *Synag. Judaic.* cap. 46). The great Hillel worked as a day-laborer. St. Paul's work as a tent maker, our Lord's work as a carpenter, were quite compatible with the popular conception of the most honored Rabbi. The indirect payments were, however, considerable enough. Scholars brought gifts. Rich and devout widows maintained a Rabbi as an act of piety, often to the injury of their own kindred (Matt. xxiii. 14). Each act of the notary's office, or the arbitration of the jurist, would be attended by an honorarium.

(4.) In regard to social position there was a like contradiction between theory and practice. The older Scribes had had no titles [RABBI]; Shemaiah, as we have seen, warned his disciples against them. In our Lord's time the passion for distinction was insatiable. The ascending scale of Rab, Rabbi, Rabban (we are reminded of our own Reverend, Very Reverend, Right Reverend) presented as many steps on the ladder of ambition (Scrupius, *de tit. Rabbi*, in Ugolini xxii.). Other forms of worldliness were not far off.[d] The salutations in the market-place (Matt. xxiii. 7), the reverential kiss offered by the scholars to their master, or by Rabbis to each other, the greeting of Abba, father (Matt. xxiii. 9, and Lightfoot, *Hor. Heb.* in loc.), the long στολαί, as contrasted with the simple χίτων and ἱμάτιον of our Lord and his disciples, with the broad blue Zhith or fringe (the κράσπεδον of Matt. xxiii. 5), the Tephillim of ostentatious size, all these go to make up the picture of a Scribe's life. Drawing to themselves, as they did, nearly all the energy and thought of Judaism, the close hereditary caste of the priesthood was powerless to compete with them. Unless the priest became a Scribe also, he remained in obscurity. The order, as such, became contemptible and base.[e] For the Scribes there were the best places at feasts, the chief seats in synagogues (Matt. xxiii. 6; Luke xiv. 7).

(5.) The character of the order was marked under these influences by a deep, incurable hypocrisy, all the more perilous because, in most cases, it was unconscious. We must not infer from this that all were alike tainted, or that the work which they had done, and the worth of their office, were not recognized by Him who rebuked them for their evil. Some there were not far from the kingdom of God, taking their place side by side with prophets and wise men, among the instruments by which the wisdom of God was teaching men (Matt. xxiii. 34). The name was still honorable. The Apostles themselves were to be Scribes in the kingdom of God (Matt. xiii. 52). The Lord himself did not refuse the salutations which hailed Him as a Rabbi. In "Zenas the lawyer" (νομικός, Tit. iii. 13) and Apollos "mighty in the Scriptures," sent apparently for the special purpose of dealing with the μάχαι νομικαί which prevailed at Crete (Tit. iii. 9), we may recognize the work which members of the order were capable of doing for the edifying of the Church of Christ (comp. Winer. *Realwb.*, and Herzog's *Encyklop.* "Schriftgelehrte"). E. H. P.

* *Literature.* — The preceding article is so full and satisfactory that it is not worth while to add many references. We may name, however, the

---

Apocryphal Gospels, as usual, mock our curiosity with the most irritating puerilities. (Comp. *Evangel. Infant.* c. 45, in Tischendorf, *Evangelia Apocrypha.*)

[a] This is inferred by Schoettgen (*Hor. Heb.* l. c.) from the analogy of the Levite's office, and from the fact that the Baptist and our Lord both entered on their ministry at this age.

[b] It was said of Hillel that he placed a limit on this practice. It had been exercised by any Scribe. After his time it was reserved for the Nasi or President of the Sanhedrim (Geiger, *ut supra*).

[c] For all the details in the above section, and many others, comp. the elaborate treatises by Ursinus, *Antiqq. Heb.*, and Heubner, *De Academiis Hebræorum*, in Ugolini, *Thes.* xxi.

[d] The later Rabbinic saying that "the disciples of the wise have a right to a goodly house, a fair wife and a soft couch," reflected probably the luxury of an earlier time. (Ursini *Antiqq. Heb.* cap. 5, *ut supra.*)

[e] The feeling is curiously prominent in the Rabbinic scale of precedence. The Wise Man, *i. e.* the Rabbi is higher than the High Priest himself. (Gem. Hieros *Horaioth*, f. 84.)

Histories of the Jews (in German) by Hernfeld, Ginsburg, and Ewald; Zunz, *Die gottesdienstliche Vorträge der Juden*, Berl. 1832; Hirschfeld, *Halachische Exegese*, Berl. 1840, and *Hagadische Exegese*, 1847; Ginsburg's art. "Scribes" in Kitto's *Cyclop. of Bibl. Lit.* 3d ed., vol. iii.; and Hausrath's *Neutest. Zeitgeschichte*, i. 75–114. A.

**SCRIP** (יַלְקוּט: συλλογή, πήρα: *pera*). The Hebrew word[a] thus translated appears in 1 Sam. xvii. 40, as a synonym for כְּלֵי הָרֹעִים (τὸ κύδιον τὸ ποιμενικόν), the bag in which the shepherds of Palestine carried their food or other necessaries. In Symmachus and the Vulg. *pera*, and in the marginal reading of A. V. "scrip," appear in 2 K. iv. 42, for the צְקְלוֹן, which in the text of the A. V. is translated *husk* (comp. Gesen. *s. v.*). The πήρα of the N. T. appears in our Lord's command to his disciples as distinguished from the ζώνη (Matt. x. 10; Mark vi. 8) and the βαλλάντιον (Luke x. 4, xxii. 35, 36), and its nature and use are sufficiently defined by the lexicographers. The scrip of the Galilean peasants was of leather, used especially to carry their food on a journey (ἡ θηκη τῶν ἄρτων, Suid.; δέρμα τι ἀρτοφόρον, Ammon.), and slung over their shoulders. In the Talmudic writers the word הַרְמִיל is used as denoting the same thing, and is named as part of the equipment both of shepherds in their common life and of proselytes coming on a pilgrimage to Jerusalem (Lightfoot, *Hor. Heb.* on Matt. x. 10). The ζώνη, on the other hand, was the loose girdle, in the folds of which money was often kept for the sake of safety [GIRDLE]; the βαλλάντιον (*sacculus*, Vulg.), the smaller bag used exclusively for money (Luke xii. 33). The command given to the Twelve first, and afterwards to the Seventy, involved therefore an absolute dependence upon God for each day's wants. They were to appear in every town or village, as men unlike all other travellers, freely doing without that which others looked on as essential. The fresh rule given in Luke xxii. 35, 36, perhaps also the facts that Judas was the bearer of the bag (γλωσσόκομον, John xii. 6), and that when the disciples were without bread they were ashamed of their forgetfulness (Mark viii. 14–16), show that the command was not intended to be permanent.

The English word has a meaning precisely equivalent to that of the Greek. Connected as it probably is, with *scrape*, *scrap*, the scrip was used for articles of food. It belonged especially to shepherds (*As You Like It*, act iii. sc. 2). It was made of leather (Milton, *Comus*, 626). A similar article is still used by the Syrian shepherds (Porter's *Damascus*, ii. 109). The later sense of *scrip* as a written certificate, is, it need hardly be said, of different origin or meaning; the word, on its first use in English, was written "*scripte*" (Chaucer). E. H. P.

**SCRIPTURE** (כְּתָב, Dan. x. 21: γραφή, γράμματα, 2 Tim. iii. 16: *Scriptura*). The chief facts relating to the books to which, individually and collectively, this title has been applied, will be found under BIBLE and CANON. It will fall within the scope of this article to trace the history of the word, and to determine its exact meaning in the language of the O. and N. T.

(1.) It is not till the return from the Captivity that the word meets us with any distinctive force. In the earlier books we read of the Law, the Book of the Law. In Ex. xxxii. 16, the commandments written on the tables of testimony are said to be "the writing of God" (γραφὴ θεοῦ), but there is no special sense in the word taken by itself. In the passage from Dan. x. 21 (ἐν γραφῇ ἀληθείας), where the A. V. has "the Scripture *of* truth," the words do not probably mean more than a "true writing." The thought of *the* Scripture as a whole is hardly to be found in them

This first appears in 2 Chr. xxx. 5, 18 (כַּכָּתוּב, κατὰ τὴν γραφήν, LXX., "as it was written," A. V.), and is probably connected with the profound reverence for the Sacred Books which led the earlier Scribes to confine their own teaching to oral tradition, and gave therefore to "the Writing" a distinctive preëminence. [SCRIBES.] The same feeling showed itself in the constant formula of quotation, "It is written," often without the addition of any words defining the passage quoted (Matt. iv. 4, 6, xxi. 13, xxvi. 24). The Greek word, as will be seen, kept its ground in this sense. A slight change passed over that of the Hebrew, and led to the substitution of another. The כְּתוּבִים (*cĕthúbim* = writings), in the Jewish arrangement of the O. T., was used for a part and not the whole of the O. T. (the Hagiographa; comp. BIBLE), while another form of the same root (*cĕthîb*) came to have a technical significance as applied to the text, which, though written in the MSS. of the Hebrew Scriptures, might, or might not be recognized as *kĕrî*, the right intelligible reading to be read in the congregation. Another word was therefore wanted, and it was found in the *Mikra'* (מִקְרָא, Neh. viii. 8), or "reading," the thing read or recited, recitation.[b] This accordingly we find as the equivalent for the collective γραφαί. The boy at the age of five begins the study of the *Mikra*, at ten passes on to the *Mishnâ* (*Pirke Aboth*, v. 24). The old word has not, however, disappeared, and הַכָּתוּב, "the Writing," is used with the same connotation (*ibid.* iii. 10).

(2.) With this meaning the word γραφή passed into the language of the N. T. Used in the singular it is applied chiefly to this or that passage quoted from the O. T. (Mark xii. 10; John vii. 38, xiii. 18, xix. 37; Luke iv. 21; Rom. ix. 17; Gal. iii. 8, *et al.*). In Acts viii. 32 (ἡ περιοχὴ τῆς γραφῆς) it takes a somewhat larger extension, as denoting the *writing* of Isaiah; but in ver. 35 the more limited meaning reappears. In two passages of some difficulty, some have seen the wider, some the narrower sense. (1.) Πᾶσα γραφὴ θεόπνευστος (2 Tim. iii. 16) has been translated in the A. V. "All Scripture is given by the inspiration of God," as though γραφή, though without the article, were taken as equivalent to the O. T. as a whole (comp. πᾶσα οἰκοδομή, Eph. ii. 21; πᾶσα Ἱεροσόλυμα, Matt. ii. 3), and θεόπνευστος, the predicate asserted of it. Retaining the narrower

[a] *Yalkut*, the scrip, is the quaint title of some of the most learned of the Rabbinical treatises: for instance, the *Yalkut Shimoni*, a miscellaneous collection of fragmentary comments on the whole of the O. T., consisting of extracts from more than fifty older Jewish works (Zunz, *Gottesd. Vortrage*, cap. 18).

[b] The same root, it may be noticed, is found in the title of the sacred book of Islam (Koran = recitation).

Digitized by Google

meaning, however, we might still take θεόπνευστος as the predicate. "Every Scripture — *sc.* every separate portion — is divinely inspired." It has been urged, however, that this assertion of a truth, which both St. Paul and Timothy held in common, would be less suitable to the context than the assigning that truth as a ground for the further inference drawn from it; and so there is a preponderance of authority in favor of the rendering, "Every γραφή, being inspired, is also profitable, . . ." (comp. Meyer, Alford, Wordsworth, Ellicott, Wiesinger, *in loc.*). There does not seem any ground for making the meaning of γραφή dependent on the adjective θεόπνευστος ("every inspired writing"), as though we recognized a γραφή not inspired. The *usus loquendi* of the N. T. is uniform in this respect: and the word γραφή is never used of any common or secular writing.

(2.) The meaning of the genitive in πασα προφητεία γραφῆς (2 Pet. i. 20) seems at first sight, anarthrous though it be, distinctively collective. "Every prophecy of, *i. e.* contained in, the O. T. Scripture." A closer examination of the passage will perhaps lead to a different conclusion. The Apostle, after speaking of the vision on the holy mount, goes on, "We have as something yet firmer, the prophetic word" (here, probably including the utterances of N. T. προφῆται, as well as the writings of the O. T.[a]). Men did well to give heed to that word. They needed one caution in dealing with it. They were to remember that no προφητεία γραφῆς, no such prophetic utterance starting from, resting on a γραφή,[b] came from the ἰδία ἐπίλυσις, the individual power of interpretation of the speaker, but was, like the γραφή itself, inspired. It was the law of προφητεία, of the later as well as the earlier, that men of God spake, "borne along by the Holy Spirit."

(3.) In the plural, as might be expected, the collective meaning is prominent. Sometimes we have simply αἱ γραφαί (Matt. xxi. 42, xxii. 29; John v. 39; Acts xvii. 11; 1 Cor. xv. 3). Sometimes πᾶσαι αἱ γραφαί (Luke xxiv. 27). The epithets ἅγιαι (Rom. i. 2), προφητικαί (Rom. xvi. 26), are sometimes joined with it. In 2 Pet. iii. 16, we find an extension of the term to the Epistles of St. Paul; but it remains uncertain whether αἱ λοιπαὶ γραφαί are the Scriptures of the O. T. exclusively, or include other writings, then extant, dealing with the same topics. There seems little doubt that such writings did exist. A comparison of Rom. xvi. 26 with Eph. iii. 5 might even suggest the conclusion, that in both there is the same assertion, that what had not been revealed before was now manifested by the Spirit to the apostles and *prophets* of the Church; and so that the "prophetic writings" to which St. Paul refers, are, like the spoken words of N. T. prophets, those that reveal things not made known before, the knowledge of the mystery of Christ.

It is noticeable, that in the [spurious] 2d Epistle of Clement of Rome (c. xi.) we have a long citation of this nature, not from the O. T., quoted as ὁ προφητικὸς λόγος (comp. 2 Pet. i. 19), and that in the 1st Epistle (c. xxiii.) the same is quoted as ἡ γραφή. Looking to the special fulness of the prophetic gifts in the Church of Corinth (1 Cor. i. 5, xiv. 1), it is obviously probable that some of the spoken prophecies would be committed to writing; and it is a striking coincidence, that both the apostolic and post-apostolic references are connected, first with that church, and next with that of Rome, which was so largely influenced by it.

(4.) In one passage, τὰ ἱερὰ γράμματα (2 Tim. iii. 15) answers to "The Holy Scriptures" of the A. V. Taken by itself, the word might, as in John vii. 15, Acts xxvi. 24, have a wider range, including the whole circle of Rabbinic education As determined, however, by the use of other Hellenistic writers, Philo (*Leg. ad Caium*, vol. ii. p 574, ed. Mang.), Josephus (*Ant. proem.* 3, x. 10, § 4; *c. Apion.* i. 26), there can be no doubt that it is accurately translated with this special meaning. E. H. P.

* SCRIPTURE INTERPRETATION. [OLD TESTAMENT, vol. iii. p. 2228 ff.]

* SCURVY. [MEDICINE.]

SCYTHIAN (Σκύθης: *Scytha*) occurs in Col. iii. 11, as a generalized term for rude, ignorant, degraded. In the Gospel, says Paul, "there is neither Greek nor Jew, circumcision nor uncircumcision, barbarian, Scythian, bond nor free; but Christ is all and in all." The same view of Scythian barbarism appears in 2 Macc. iv. 47, and 3 Macc. vii. 5. For the geographical and ethnographical relations of the term, see *Dict. of Geog.* ii. 936–945. The Scythians dwelt mostly on the north of the Black Sea and the Caspian, stretching thence indefinitely into inner Asia, and were regarded by the ancients as standing extremely low in point of intelligence and civilization. Josephus (*c. Apion.* ii. 37) says, Σκύθαι δὲ φόνοις χαίροντες ἀνθρώπων καὶ βραχὺ τῶν θηρίων διαφέροντες; and Parmenio (*ap.* Athen. v. 221), ἀνὴρ γὰρ ἐλαιον οἶνον, ἐς ὕδωρ ἵππος Σκυθιστὶ φωνεῖ, οὐδὲ κάπτα γιγνώσκων. For other similar testimonies see Wetstein, *Nov. Test.* vol. ii. p. 292. At the same time, by the force of numbers, and by their wildness and savage ferocity, the Scythians were a dreaded foe, and often spread slaughter and desolation through the lands which they invaded (see Rawlinson's *Ancient Monarchies*, ii. 508–517). It is generally allowed that they are the hordes meant under the name of MAGOG in Ez. xxxviii. and xxxix., and are also the warriors whom Jeremiah describes as so terrible (iv.–vi.). Perhaps it may be inferred from Col. iii. 11 that there were Scythians also among the early converts to Christianity. Many of this people lived in Greek and Roman lands, and could have heard the Gospel there, even if some of the first preachers had not penetrated into Scythia itself. According to one of the early Christian traditions it was the mission of the Apostle Andrew to go to the Scythians and preach to them the Gospel (Euseb. *Hist. Eccles.* iii. 1).

Herodotus states (i. 103–105) that the Scythians made an incursion through Palestine into Egypt,

[a] Ὁ προφητικὸς λόγος is used by Philo of the words of Moses (*Leg. Alleg.* iii. 14, vol. i. p. 95, ed. Mang.). He, of course, could recognise no prophets but those of the O. T. Clement of Rome [*Pseudo*-Clement, A.] (ii. 11) uses it of a prophecy not included in the Canon.

[b] So in the only other instance in which the genitive is found (Rom. xv. 4), ἡ παράκλησις τῶν γραφῶν is the counsel, admonition, drawn from the Scriptures. Λόγος παρακλήσεως appears in Acts xiii. 15 as the received term for such an address, the Sermon of the Synagogue. Παράκλησις itself was so closely allied with προφητεία (comp. Barnabas = υἱὸς προφητείας = υἱὸς παρακλήσεως), that the expressions of the two Apostles may be regarded as substantially identical.

Digitized by Google

under Psammetichus, the contemporary of Josiah. In this way some would account for the Greek name of Beth-shean, *Scythopolis*. H. B. H.

**SCYTHOPOLIS** (Σκυθῶν πόλις: Peshito-Syriac, *Beisan: civitas Scytharum*), that is, "the city of the Scythians," occurs in the A. V. of Jud. iii. 10 and 2 Macc. xii. 29 only. In the LXX. of Judg. i. 27, however, it is inserted (in both the great MSS.) as the synonym of BETH-SHEAN, and this identification is confirmed by the narrative of 1 Macc. v. 52, a parallel account to that of 2 Macc. xii. 29, as well as by the repeated statements of Josephus (*Ant.* v. 1, § 22, vi. 14, § 8, xii. 8, § 5). He uniformly gives the name in the contracted shape (Σκυθόπολις) in which it is also given by Eusebius (*Onom.* passim), Pliny (*H. N.* v. 18), Strabo (xvi.), etc., etc., and which is inaccurately followed in the A. V. Polybius (v. 70, § 4) employs the fuller form of the LXX. Beth-shean has now, like so many other places in the Holy Land, regained its ancient name, and is known as *Beisân* only. A mound close to it on the west is called *Tell Shûk*, in which it is perhaps just possible that a trace of Scythopolis may linger.

But although there is no doubt whatever of the identity of the place, there is considerable difference of opinion as to the origin of the name.[a] The LXX. (as is evident from the form in which they present it) and Pliny (*H. N.* v. 16 [b]) attribute it to the Scythians, who, in the words of the Byzantine historian, George Syncellus, "overran Palestine, and took possession of Baisan, which from them is called Scythopolis." This has been in modern times generally referred to the invasion recorded by Herodotus (i. 104–6), when the Scythians, after their occupation of Media, passed through Palestine on their road to Egypt (about B. C. 600 — a few years before the taking of Jerusalem by Nebuchadnezzar), a statement now recognised as a real fact, though some of the details may be open to question (*Dict. of Geogr.* ii. 940 *b*; Rawlinson's *Herod.* i. 246). It is not at all improbable that either on their passage through, or on their return after being repulsed by Psammetichus (Herod. i. 105), some Scythians may have settled in the country (Ewald, *Gesch.* iii. 694, *note*); and no place would be more likely to attract them than *Beisân* — fertile, most abundantly watered, and in an excellent military position. In the then state of the Holy Land they would hardly meet with much resistance.

Reland, however (apparently incited thereto by his doubts of the truth of Herodotus' account), disregarded this explanation, and suggested that Scythopolis was a corruption of Succothopolis — the chief town of the district of Succoth. In this he is supported by Gesenius (*Notes to Burckhardt*, p. 1053) and by Grimm (*Exeg. Handbuch* on 1 Macc. v. 52). Since, however, the objection of Reland to the historical truth of Herodotus is now removed, the necessity for this suggestion (certainly most ingenious) seems not to exist. The distance of Succoth from *Beisan*, if we identify it with *Sakût*, is 10 miles, while if the arguments of Mr. Beke are valid it would be nearly double as far. And it is surely gratuitous to suppose that so large, independent, and important a town as Beth-shean was in the earlier history, and as the remains show it to have been in the Greek period, should have taken its name from a comparatively insignificant place at a long distance from it. Dr. Robinson (*Bibl. Res.* iii. 330) remarks with justice, that had the Greeks derived the name from Succoth they would have employed that name in its translated form as Σκηναί, and the compound would have been Scenopolis. Reland's derivation is also dismissed without hesitation by Ewald, on the ground that the two names Succoth and Skythes have nothing in common (*Gesch.* iii. 694, *note*). Dr. Robinson suggests that, after all, *City of the Scythians* may be right; the word *Scythia* being used as in the N. T. as equivalent to a barbarian or savage. In this sense he thinks it may have been applied to the wild Arabs, who then, as now, inhabited the *Ghôr*, and at times may have had possession of Beth-shean.

The Canaanites were never expelled from Beth-shean, and the heathen appear to have always maintained a footing there. It is named in the *Mishna* as the seat of idolatry (Mishna, *Aboda Zara*, i. 4), and as containing a double population of Jews and heathens. At the beginning of the Roman war (A. D. 65) the heathen rose against the Jews and massacred a large number, according to Josephus (*B. J.* ii. 18, § 3) no less than 13,000, in a wood or grove close to the town. Scythopolis was the largest city of the Decapolis, and the only one of the ten which lay west of Jordan. By Eusebius and Jerome (*Onom.* "Bethsan") it is characterized as πόλις ἐπίσημος and *urbs nobilis*. It was surrounded by a district of its own of the most abundant fertility. It became the seat of a Christian bishop, and its name is found in the lists of signatures as late as the Council of Constantinople, A. D. 536. The latest mention of it under the title of Scythopolis is probably that of William of Tyre (xxii. 16, 26). He mentions it as if it was then actually so-called, carefully explaining that it was formerly Beth-shan. G.

* **SCYTHOPOLITANS** (Σκυθοπολῖται: *Scythopolitæ*), inhabitants of SCYTHOPOLIS (2 Macc. xii. 30). H.

**SEA.** The Sea, *yâm*,[c] is used in Scripture to denote — (1.) The "gathering of the waters" (*yâmim*) encompassing the land, or what we call in a more or less definite sense "the Ocean." (2.) Some

---

[a] The "modern Greeks" are said to derive it from σκύτος, a hide (Williams, in *Dict. of Geogr.*). This is, doubtless, another appearance of the legend so well known in connection with the foundation of Byrsa (Carthage). One such has been mentioned in reference to Hebron under MACHPELAH (vol. ii. p. 1729, note *c*).

[b] The singular name Nysa, mentioned in this passage as a former appellation of Scythopolis, is identified by Ewald (*Gesch.* iv. 453) with *Neash*, an ir den of (Beth-) *Shean*, actually found on coins.

[c] יָם, Ch. יַמָּא, Dan. vii. 2, 3 θάλασσα: *mare*, from יָמַם, not used, i. q. הָמַם, or חָמָם, "roar," ה and ח being interchanged. Connected with this is תְּהוֹם: ἄβυσσος: *abyssus*, "the deep" (Gen. i. 2; Jon. ii. 5; Ges. p. 371). It also means the west (Ges. pp. 380, 598). When used for the sea, it very often, but not always, takes the article.

Other words for the sea (in A. V. "deep") are: (1.) מְצוּלָה, מְצוֹלָה (only in plural), or צוֹלָה: ἄβυσσος, βάθος: *abyssus, profundum*. (2.) מַבּוּל: κατακλυσμός; *diluvium*, "water-flood" (Ps. xxix. 10).

Digitized by Google

portion of this, as the Mediterranean Sea. (3.) Inland lakes, whether of salt or fresh water. (4.) Any great collection of water, as the rivers Nile or Euphrates, especially in a state of overflow.

1. In the first sense it is used in Gen. i. 2, 10, and elsewhere, as Deut. xxx. 13; 1 K. x. 22; Ps. xxiv. 2; Job xxvi. 8, 12, xxxviii. 8; see Hom. *Il.* xiv. 301, 302, and Hes. *Theog.* 107, 109; and 2 Pet. iii. 5.

2. In the second, it is used, with the article (*a*) of the Mediterranean Sea, called the "hinder," [a] the "western," and the "utmost" sea (Deut. xi. 24, xxxiv. 2; Joel ii. 20); "sea of the Philistines" (Ex. xxiii. 31); "the great sea" (Num. xxxiv. 6, 7; Josh. xv. 47); "the sea" (Gen. xlix. 13; Ps. lxxx. 11, cvii. 23; 1 K. iv. 20, &c.). (*b*) Also frequently of the Red Sea (Ex. xv. 4; Josh. xxiv. 6), or one of its gulfs (Num. xi. 31; Is. xi. 15), and perhaps (1 K. x. 22) the sea traversed by Solomon's fleet. [RED SEA.]

3. The inland lakes termed seas, as the Salt or Dead Sea. (See the special articles.)

4. The term *ydm*, like the Arabic *bahr*, is also applied to great rivers, as the Nile (Is. xix. 5; Am. viii. 8, A. V. "flood;" Nah. iii. 8; Ez. xxxii. 2), the Euphrates (Jer. li. 36). (See Stanley, *S. & P.* App. p. 533.)

The qualities or characteristics of the sea and sea-coast mentioned in Scripture are, (1.) The sand, [b] whose abundance on the coast both of Palestine and Egypt furnishes so many illustrations (Gen xxii. 17, xli. 49; Judg. vii. 12; 1 Sam. xiii. 5; 1 K. iv. 20, 29; Is. x. 22; Matt. vii. 26; Strabo, lib. xvi. 758, 759; Raumer, *Pal.* p. 45; Robinson, ii. 34–38, 464; Shaw, *Trav.* p. 280; Hasselquist, *Trav.* p. 119; Stanley, *S. & P.* pp. 255, 260, 264). (2.) The shore. [c] (3.) Creeks [d] or inlets. (4.) Harbors. [e] (5.) Waves [f] or billows.

It may be remarked that almost all the figures of speech taken from the sea in Scripture refer either to its power or its danger, and among the woes threatened in punishment of disobedience, one may be remarked as significant of the dread of the sea entertained by a non-seafaring people, the being brought back into Egypt "in ships" (Deut. xxviii. 68). The national feeling on this subject may be contrasted with that of the Greeks in reference to the sea. [COMMERCE.] It may be remarked, that, as is natural, no mention of the tide is found in Scripture.

The place "where two seas met" [g] (Acts xxvii. 41) is explained by Conybeare and Howson as a place where the island Salmonetta, off the coast of Malta in St. Paul's Bay, so intercepts the passage from the sea without to the bay within as to give the appearance of two seas, just as Strabo represents the appearance of the entrance from the Bosphorus into the Euxine; but it seems quite as likely that by the "place of the double sea," is meant one where two currents, caused by the intervention of the island, met and produced an eddy, which made it desirable at once to ground the ship (Conybeare and Howson, ii. 423; Strabo, ii. 124).

H. W. P.

* SEA, THE GREAT. [SEA, 2.]

**SEA, MOLTEN.** [A] The name given to the great brazen [i] laver of the Mosaic ritual. [LAVER.]

In the place of the laver of the Tabernacle, Solomon caused a laver to be cast for a similar purpose, which from its size was called a sea. It was made partly or wholly of the brass, or rather copper, which had been captured by David from "Tibhath and Chun, cities of Hadarezer king of Zobah" (1 K. vii. 23–26; 1 Chr. xviii. 8). Its dimensions were as follows: Height, 5 cubits; diameter, 10 cubits; circumference, 30 cubits; thickness, 1 handbreadth; and it is said to have been capable of containing 2,000, or, according to 2 Chr. iv. 5, 3,000 baths. Below the brim [j] there was a double row of "knops," [k] 10 (*i. e.* 5 + 5) in each cubit. These were probably a running border or double fillet of tendrils, and fruits, said to be gourds, of an oval shape (Celsius, *Hierob.* i. 397, and Jewish authorities quoted by him). The brim itself, or lip, was wrought "like the brim of a cup, with flowers [l] of lilies," *i. e.* curved outwards like a lily or lotus flower. The laver stood on twelve oxen, three towards each quarter of the heavens, and all looking outwards. It was mutilated by Ahaz, by being removed from its basis of oxen and placed on a stone base, and was finally broken up by the Assyrians (2 K. xvi. 14, 17, xxv. 13).

Josephus says that the form of the sea was hemispherical, and that it held 3,000 baths; and he elsewhere tells us that the bath was equal to 72 Attic ξέσται, or 1 μετρητής = 8 gallons 5.12 pints (Joseph. *Ant.* viii. 2, § 9, and 3, § 5. The question arises, which occurred to the Jewish writers themselves, how the contents of the laver, as they are given in the sacred text, are to be reconciled with its dimensions. At the rate of 1 bath = 8 gallons 5.12 pints, 2,000* baths would amount to about 17,250 gallons, and 3,000 (the more precisely stated reading of 2 Chr. iv. 5) would amount to 25,920 gallons. Now, supposing the vessel to be hemispherical, as Josephus says it was, the cubit to be = 20½ inches (20 6250), and the palm or handbreadth = 3 inches (2.9464, Wilkinson, *Anc. Egypt.* ii. 258), we find the following proportions: From the height (5 cubits = 102½ inches) subtract the thickness (3 inches), the axis of the hemisphere

[a] אַחֲרוֹן: (θάλασσα ἡ) ἐσχάτη: (*mare*) *novissimum.*

[b] חוֹל · ἄμμος: *arena.*

[c] חוֹף, joined with יָם: παραλία γῆ: *littus.* In Jon. xlix. 13, "haven;" Acts xxvii. 39, αἰγιαλός.

[d] מִפְרָץ, from פָּרַץ, "break," only in Judg. v. 17, in plural: διακοπαί: *portus:* A. V. "breaches."

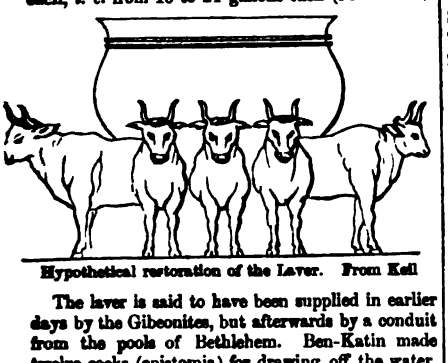
[e] מָחוֹז, a place of retreat: λιμήν: *portus:* A. V. "haven."

[f] (1.) גַּל, lit. a heap, in plural, waves: κῦμα: *cumulus, mare fluctuans.* (2.) דָּכְיָ, or דָּכָה: ἐπιτρόπιος: *fluctus;* only in Ps. xciii. 3. (3.) מְשֻׁבָּר: μετεωρισμός: *gurges, elatio:* "a breaker" (4.) דָּמָה (Job ix. 8): *fluctus:* lit. "a high place" (Ez. xx. 29).

[g] Τόπος διθάλασσος: *locus dithalassus.*

[h] מוּצָק: χυτός: *fusilis.*

[i] נְחֹשֶׁת: χαλκός: *aneus.*



[j] שְׂפָה: χεῖλος: *labrum.*

[k] פְּקָעִים: ἐκστοφώματα: *sculpturæ:* properly "gourds."

[l] פֶּרַח שׁוֹשָׁן: βλαστὸς κρίνου: *folium repandi lilii.* The passage literally is, "and its lip (was) like work (such as) a cup's lip, a lily-flower."

Digitized by Google

would be 99½ inches, and its contents in gallons, at 277½ cubic inches to the gallon, would be about 7,500 gallons; or taking the cubit at 22 inches, the contents would reach 10,045 gallons — an amount still far below the required quantity. On the other hand, a hemispherical vessel, to contain 17,250 gallons, must have a depth of 11 feet nearly, or rather more than 6 cubits, at the highest estimate of 22 inches to the cubit, exclusive of the thickness of the vessel. To meet the difficulty, we may imagine — (1.) An erroneous reading of the numbers. ב, ל. We may imagine the laver, like its prototype in the Tabernacle, to have had a "foot," which may have been a basin which received the water as it was drawn out by taps from the laver, so that the priests might be said to wash "at" [a] not "in" it (Ex. xxx. 18, 19; 2 Chr. iv. 6). (3.) We may suppose the laver to have had another shape than the hemisphere of Josephus. The Jewish writers supposed that it had a square hollow base for 3 cubits of its height, and 2 cubits of the circular form above (Lightfoot, *Descr. Templ.* vol. i. p. 647). A far more probable suggestion is that of Thenius, in which Keil agrees, that it was of a bulging form below, but contracted at the mouth to the dimensions named in 1 K. vii. 23. (4.) A fourth supposition is perhaps tenable, that when it is said the laver contained 2,000 or 3,000 baths, the meaning is that the supply of water required for its use amounted, at its utmost, to that quantity. The quantity itself of water is not surprising, when we remember the quantity mentioned as the supply of a private house for purification, namely, 6 amphorae of 2 or 3 firkins (*μετρηταί*) each, *i. e.* from 16 to 24 gallons each (John ii. 6).

Hypothetical restoration of the Laver. From Keil

The laver is said to have been supplied in earlier days by the Gibeonites, but afterwards by a conduit from the pools of Bethlehem. Ben-Katin made twelve cocks (epistomia) for drawing off the water, and invented a contrivance for keeping it pure during the night (*Joma*, iii. 10; *Tamid*, iii. 8; *Middoth*, iii. 6; Lightfoot, *l. c.*). Mr. Layard mentions some circular vessels found at Nineveh, of 6 feet in diameter and 2 feet in depth, which seemed to answer, in point of use, to the Molten Sea, though far inferior in size; and on the basreliefs it is remarkable that cauldrons are represented supported by oxen (Layard, *Nin. and Bab.* p. 180; see Thenius on 1 K. vii.; and Keil, *Arch. Bibl.* i. 127, and pl. 3, fig. i.). H. W. P.

[a] מִמֶּנּוּ : ἐξ αὐτοῦ : A. V. "thereat" (Ex. xxx. 19). בּוֹ : ἐν αὐτῷ (2 Chr. iv. 6).

**SEA, THE SALT** (יָם הַמֶּלַח : ἡ θάλασσα τῶν ἁλῶν; θ. ἡ ἁλυκή, and τῆς ἁλυκῆς; θ. ἁλός in Gen. *mare salis*, elsewhere *m. salsissimum*, except Josh. iii. *quod nunc vocatur mortuum*). The usual, and perhaps the most ancient name for the remarkable lake, which to the Western world is now generally known as the Dead Sea.

I. (1.) It is found only, and but rarely, in the Pentateuch (Gen. xiv. 3; Num. xxxiv. 3, 12; Deut. iii. 17[b]), and in the book of Joshua (iii. 16, xii. 3, xv. 2, 5, xviii. 19).

(2.) Another, and possibly a later name, is the SEA OF THE ARABAH (יָם הָעֲרָבָה : θάλασσα Ἀραβα; ἡ θάλ. Ἀραβα; ἡ θάλ. τῆς Ἀραβα: *mare solitudinis*, or *deserti*; A. V. "Sea of the plain"), which is found in Deut. iv. 49, and 2 K. xiv. 25; and combined with the former — "the sea of the Arabah, the salt sea" — in Deut. iii. 17: Josh. iii. 16, xii. 3.

(3.) In the prophets (Joel ii. 20; Ez. xlvii. 18, Zech. xiv. 8) it is mentioned by the title of THE EAST[c] SEA (הַיָּם הַקַּדְמוֹנִי : in Ez. τὴν θάλασσαν τὴν πρὸς ἀνατολὰς Φοινικῶνος;[d] in Joel and Zech. τὴν θάλ. τὴν πρώτην: *mare orientale*).

(4.) In Ez. xlvii. 8, it is styled, without previous reference, THE SEA (הַיָּם), and distinguished from "the great sea" — the Mediterranean (ver. 10).

(5.) Its connection with Sodom is first suggested in the Bible in the book of 2 Esdras (v. 7) by the name "Sodomitish sea" (*mare Sodomiticum*).

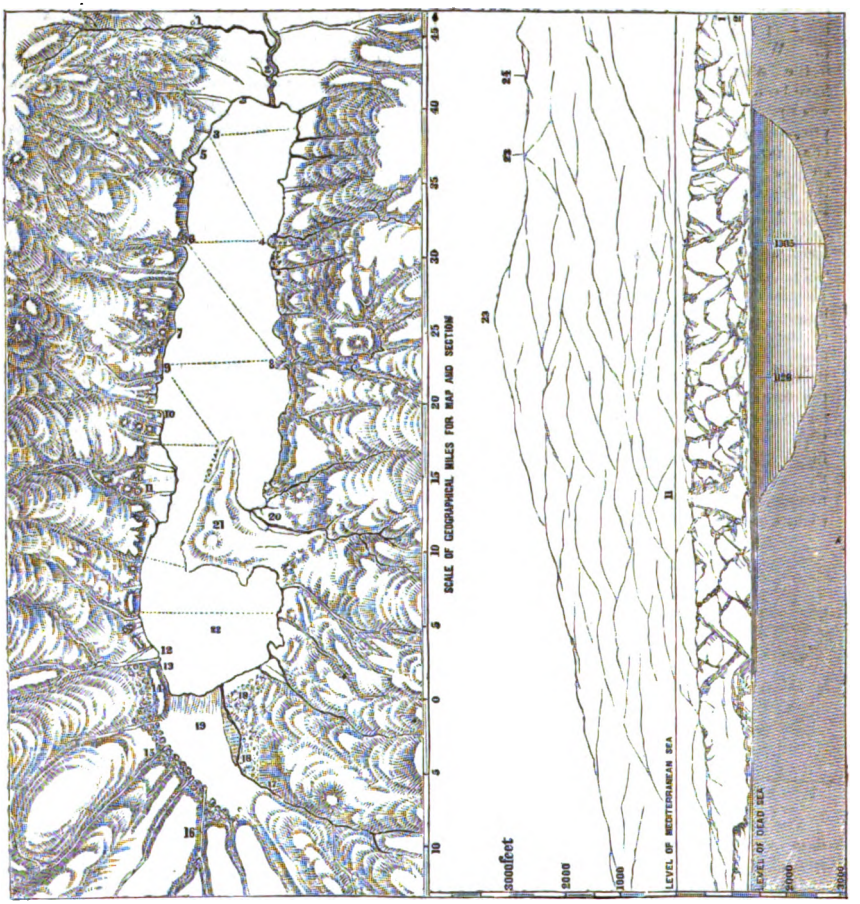
(6.) In the Talmudical books it is called both the "Sea of Salt" (ימא דמלחא), and "Sea of Sodom" (ימא של סדום). See quotations from Talmud and Midrash Tehillim, by Reland (*Pal.* p. 237).

(7.) Josephus, and before him Diodorus Siculus (ii. 48, xix. 98), names it the Asphaltic Lake — ἡ Ἀσφαλτῖτις λίμνη (*Ant.* i. 9, iv. 5, § 1, ix. 10, § 1; *B. J.* i. 33, § 5, iii. 10, § 7, iv. 8, § 2, 4), and once λ. ἡ ἀσφαλτοφόρος (*Ant.* xvii. 6, § 5) Also (*Ant.* v. 1, § 22) ἡ Σοδομῖτις λίμνη.

(8.) The name "Dead Sea" appears to have been first used in Greek (θάλασσα νεκρά) by Pausanias (v. 7) and Galen (iv. 9), and in Latin (*mare mortuum*) by Justin (xxxvi. 3, § 6), or rather by the older historian, Trogus Pompeius (cir. B. C. 10), whose work he epitomized. It is employed also by Eusebius (*Onom.* Σόδομα). The expressions of Pausanias and Galen imply that the name was in use in the country. And this is corroborated by the expression of Jerome (*Comm.* on Dan. xi. 45). "mare . . . . quod hume appellatur mortuum." The Jewish writers appear never to have used it, and it has become established in modern literature, from the belief in the very exaggerated stories of its deadly character and gloomy aspect, which themselves probably arose out of the name, and were due to the preconceived notions of the travellers who visited its shores, or to the implicit

[b] In the Samaritan Pentateuch also in iv. 49.

[c] In Zechariah and Joel, as an antithesis to "the utmost sea," *i. e.* the Mediterranean; whence the obtuse rendering of the A. V., "former sea."



[d] The version of the LXX. is remarkable, as introducing the name of Phoenicia in both vv. 18 and 19. This may be either an equivalent of En-gedi, originally Hasson-tamar, the "City of Palm-trees" (*φοινίκων*); or may arise out of a corruption of *Kadmoni* into *Kanaan*, which in this version is occasionally rendered by Phoenicia. The only warrant for it in the existing Hebrew text is the name Tamar (= "a palm," and rendered Φοινὶξ καὶ Φοινικῶνες) in ver. 19.

Digitized by Google

faith with which they received the statements of their guides. Thus Maundeville (ch. ix.) says it is called the Dead Sea because it moveth not, but is ever still — the fact being that it is frequently agitated, and that when in motion its waves have great force. Hence also the fable that no birds could fly across it alive, a notion which the experience of almost every modern traveller to Palestine would contradict.

(2.) The Arabic name is *Bahr Lût*, the "Sea of Lot." The name of Lot is also specially connected with a small piece of land, sometimes island sometimes peninsula, at the north end of the lake.

II. (1.) The so-called DEAD SEA is the final receptacle of the river Jordan, the lowest and largest of the three lakes which interrupt the rush of its downward course. It is the deepest portion of that very deep natural fissure which runs like a furrow

Map, and Longitudinal Section (from north to south), of the DEAD SEA, from the Observations, Surveys, and Soundings of Lynch, Robinson, De Saulcy, Van de Velde, and others, drawn under the superintendence of Mr. Grove by Trelawney Saunders, and engraved by J. D. Cooper.

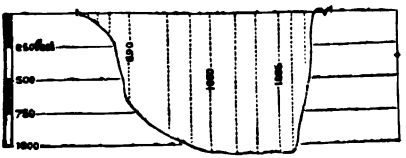
from the Gulf of Akaba to the range of Lebanon, and from the range of Lebanon to the extreme north of Syria. It is in fact a pool left by the ocean, in its retreat from what there is reason to believe was at a very remote period a channel connecting the Mediterranean with the Red Sea. As the most enduring result of the great geological operation which determined the present form of the country it may be called without exaggeration the key to the physical geography of the Holy Land. It is therefore in every way an object of extreme interest. The probable conditions of the formation of the lake will be alluded to in the course of this article: we shall now attempt to describe its dimensions, appearance, and natural features



2. Viewed on the map, the lake is of an oblong

Transverse Sections (from west to east) of the DEAD SEA; plotted for the first time, from the Soundings given by Lynch on the Map in his *Narrative of the U. S. Expedition*, etc., London, 1849. The spots at which the Sections were taken are indicated on the Map (opposite) by the dotted lines. The depths are given in English feet.

N. B. — For the sake of clearness, the horizontal and vertical scales for these Sections have been enlarged from those adopted for the Map and Longitudinal Section on the opposite page.

form, of tolerably regular contour, interrupted only by a large and long peninsula which projects from the eastern shore, near its southern end, and virtually divides the expanse of the water into two portions, connected by a long, narrow, and somewhat devious passage. Its longest axis is situated nearly north and south. It lies between 31° 6′ 20″ and 31° 46′ N. lat., nearly; and thus its water surface is from N. to S. as nearly as possible 40 geographical, or 46 English miles long. On the other hand, it lies between 35° 24′ and 35° 37′ east long.,[a] nearly; and its greatest width (some 3 miles S. of *Ain Jidy*) is about 9[b] geographical miles, or 10¼ English miles. The ordinary area of the upper portion is about 174 square geographical miles; of the channel 29; and of the lower portion, hereafter styled "the lagoon," 46; in all about 250 square geographical miles. These dimensions are not very dissimilar to those of the Lake of Geneva. They are, however, as will be seen further on, subject to considerable variation according to the time of the year.

At its northern end the lake receives the stream of the Jordan: on its eastern side the *Zürka Ma'in* (the ancient Callirrhoë, and possibly the more ancient en-Eglaim), the *Mojib* (the Arnon of the Bible), and the *Beni-Hemâd*. On the south the *Kurâhy* or *el-Ahsy*; and on the west that of *Ain Jidy*. These are probably all perennial, though variable streams; but, in addition, the beds of the torrents which lead through the mountains east and west, and over the flat shelving plains on both north and south of the lake, show that in the winter a very large quantity of water must be poured into it. There are also all along the western side a considerable number of springs, some fresh, some warm, some salt and fetid — which appear to run continually, and all find their way, more or less absorbed by the sand and shingle of the beach, into its waters. The lake has no visible[c] outlet.

3. Excepting the last circumstance, nothing has yet been stated about the Dead Sea that may not be stated of numerous other inland lakes. The depression of its surface, however, and the depth which it attains below that surface, combined with the absence of any outlet, render it one of the most remarkable spots on the globe. According to the observations of Lieut. Lynch, the surface of the lake in May, 1848, was 1,316.7[d] feet below the level of

[a] The longitudes and latitudes are given with care by Van de Velde (*Mem.* p. 65), but they can none of them be implicitly trusted.

[b] Lynch says 9 to 9½; Dr. Robinson says 9 (1. 509). The ancient writers, as is but natural, estimated its dimensions very inaccurately. Diodorus states the length as 500 stadia, or about 50 miles, and breadth 60, or 6 miles. Josephus extends the length to 580 stadia, and the breadth to 150. It is not necessary to accuse him, on this account, of wilful exaggeration. Nothing is more difficult to estimate accurately than the extent of a sheet of water, especially one which varies so much in appearance as the Dead Sea. As regards the length, it is not impossible that at the time of Josephus the water extended over the southern plain, which would make the entire length over 50 geographical miles.

[c] Nor can there be any invisible one: the distance of the surface below that of the ocean alone renders it impossible; and there is no motive for supposing it, because the evaporation (see note to § 4) is amply sufficient to carry off the supply from without.

[d] This figure was obtained by running levels from

the Mediterranean at Jaffa (*Report of Secretary of Navy*, etc., 8vo, p. 23), and although we cannot absolutely rely on the accuracy of that dimension, still there is reason to believe that it is not very far from the fact. The measurements of the depth of the lake taken by the same party are probably more trustworthy. The expedition consisted of sailors, who were here in their element, and to whom taking soundings was a matter of every day occurrence. In the upper portion of the lake, north of the peninsula, seven cross sections were obtained, six of which are exhibited on the preceding page.[a] They show this portion to be a perfect basin, descending rapidly till it attains, at about one-third of its length from the north end, a depth of 1,308[b] feet. Immediately west of the upper extremity of the peninsula, however, this depth decreases suddenly to 336 feet, then to 114, and by the time the west point of the peninsula is reached, to 18 feet. Below this the southern portion is a mere lagoon of almost even bottom, varying in depth from 12 feet in the middle to 3 at the edges. It will be convenient to use the term "lagoon"[c] in speaking of the southern portion.

The depression of the lake, both of its surface and its bottom, below that of the ocean is at present quite without parallel. The lake Assal, on the Somali coast of Eastern Africa opposite Aden, furnishes the nearest approach to it. Its surface is said to be 570 feet below that of the ocean.[d]

4. The level of the lake is liable to variation according to the season of the year. Since it has no outlet, its level is a balance struck between the amount of water poured into it, and the amount given off by evaporation.[e] If more water is sup-

---

*Ain Terâbeh* up the *Wady Ras el-Ghuweir* and *Wady en-Nar* to Jerusalem, and thence by Ramleh to Jaffa. It seems to have been usually assumed as accurate, and as settling the question. The elements of error in leveling across such a country are very great, and even practiced surveyors would be liable to mistake, unless by the adoption of a series of checks which it is inconceivable that Lynch's party can have adopted. The very fact that no datum on the beach is mentioned, and that they appear to have leveled from the then surface of the water, shows that the party was not directed by a practiced leveler, and casts suspicion over all the observations. Lynch's observations with the barometer (p. 12) gave 1,284.589 feet — 82 feet less depression than that mentioned above. The existence of the depression was for a long time unknown. Even Seetzen (i. 425) believed that it lay higher than the ocean. Marmont (*Voyage*, iii. 61) calculates the Mount of Olives at 747 metres above the Mediterranean, and then estimates the Dead Sea at 500 metres below the Mount. The fact was first ascertained by Moore and Beek in March, 1837, by boiling water; but they were unable to arrive at a figure. It may be well here to give a list of the various observations on the level of the lake, made by different travellers: —

| | | | Eng. ft. |
|---|---|---|---|
| Apr. 1837 | Von Schubert . | Barom. | 637. |
| 1838 | De Bertou . . . | Barom. | 1,374.7 |
| 1838 | Russegger . . . | Barom. | 1,429.2 |
| 1841 | Symonds . . . . | Trignom. | 1,312.2 |
| 1845 | Von Wildenbruch | Barom. | 1,446.3 |
| May, 1848 | Lynch . . . . . | Barom. | 1,284.6 |
| May, 1848 | Lynch . . . . . | Level | 1,316.7 |
| Nov. 1850 | Rev. G. W. Bridges | Aneroid | 1,387. |
| Oct. 27, 1855 | Poole . . . . . | Aneroid | 1,313.5 |
| Apr. (?) 1857 | Roth . . . . . | Barom. | 1,374.6 |

— See Petermann, in *Geogr. Journal*, xviii. 90; for Roth, Petermann's *Mittheilungen*, 1858, p. 3; for Poole, *Geogr. Journ.* xxvi. 58. Mr. Bridges has kindly communicated to the writer the results of his observations. Captain Symonds' operations are briefly described by Mr. Hamilton in his addresses to the Royal Geogr. Society in 1842 and 1843. He carried levels across from Jaffa to Jerusalem by two routes, and thence to the Dead Sea by one route: the ultimate difference between the two observations was less than 12 feet (*Geogr. Journal*, xii. p. lx.; xiii. p. lxxiv.). One of the sets, ending in 1,312.2 feet, is given in Van de Velde's *Memoir*, pp. 75–81.

Widely as the results in the table differ, there is yet enough agreement among them, and with Lynch's level-observation, to warrant the statement in the text. Those of Symonds, Lynch, and Poole, are remarkably close, when the great difficulties of the case are considered; but it must be admitted that those of De Bertou, Roth, and Bridges are equally close. The time of year must not be overlooked. Lynch's level was taken about midway between the winter rains and the autumnal drought, and therefore is consistent with that of Poole, taken 5 months later, at the very end of the dry season.

[a] The map in Lynch's private *Narrative* (London, 1849), from which these sections have, for the first time, been plotted, is to a much larger scale, contains more details, and is a more valuable document, than that in his *Official Report*, 4to (Baltimore, 1852), or his *Report*, 8vo (Senate Papers, 30th Congr., 2d Session, No. 34).

[b] Three other attempts have been made to obtain soundings, but in neither case with any very practical result. (1.) By Messrs. Moore and Beek, in March, 1837. They record a maximum depth of 2,400 ft. between *Ain Terâbeh* and *W. Zürka*, and a little north of the same 2,220 ft. (See Palmer's *Map*, to which these observations were contributed by Mr. Beek himself: also *Geogr. Journ.* vii. 456.) Lynch's soundings at nearly the same spots give 1,170 and 1,309 ft. respectively, at once reversing and greatly diminishing the depths. (2.) Captain Symonds, R. E., is said to have been upon the lake and to have obtained soundings, the deepest of which was 2,100 ft. But for this the writer can find no authority beyond the statement of Ritter (*Erdkunde*, "Jordan," p. 704), who does not name the source of his information. (3.) Lieut. Molyneux, R. N., in Sept. 1847, took three soundings. The first of these seems to have been about opposite *Ain Jidy*, and gave 1,350 ft., though without certainly reaching the bottom. The other two were further north, and gave 1,068 and 1,098 ft. (*Geogr. Journ.* xviii. pp. 127, 128). The greatest of these appears to be about coincident with Lynch's 1,104 feet; but there is so much vagueness about the spots at which they were taken, that no use can be made of the results. Lynch and Beek agree in representing the west side as more gradual in slope than the east, which has a depth of more than 900 ft. close to the brink.

[c] Irby and Mangles always term this part "the back-water," and reserve the name "Dead Sea" for the northern and deeper portion.

[d] Murchison in *Geogr. Journal*, xiv. p. cxvi. A brief description of this lake is given in an interesting paper by Dr. Buist on the principal depressions of the globe, reprinted in the *Edinb. N. Phil. Journal*, April, 1855.

[e] This subject has been ably and carefully investigated by the late Professor Marchand, the eminent chemist of Halle, in his paper on the Dead Sea in the *Journal für prakt. Chemie*, Leipsig, 1849, pp. 371–374. The result of his calculations, founded on the observations of Shaw, A. von Humboldt, and Balard, is that while the average quantity supplied cannot exceed 20,000,000 cub. ft., the evaporation may be taken at 24,000,000 cub. ft. per diem.

Digitized by Google

plied than the evaporation can carry off, the lake will rise until the evaporating surface is so much increased as to restore the balance. On the other hand, should the evaporation drive off a larger quantity than the supply, the lake will descend until the surface becomes so small as again to restore the balance. This fluctuation is increased by the fact that the winter is at once the time when the clouds and streams supply most water, and when the evaporation is least; while in summer, on the other hand, when the evaporation goes on most furiously, the supply is at its minimum. The extreme differences in level resulting from these causes, have not yet been carefully observed. Dr. Robinson, in May, 1838, from the lines of drift-wood which he found beyond the then brink of the water in the southern part of the lake, judged that the level must be sometimes from 10 to 15 feet higher than it then was (*Bibl. Res.* i. 515, ii. 115); but this was only the commencement of the summer, and by the end of September the water would probably have fallen much lower. The writer, in the beginning of September, 1858, after a very hot summer, estimated the line of drift-wood along the steep beach of the north end at from 10 to 12 feet above the then level of the water. Robinson (i. 506) mentions a bank of shingle at *Ain Jidy*, 6 or 8 feet above the then (May 10) level of the water, but which bore marks of having been covered. Lynch (*Narr.* p. 289) says that the marks on the shore near the same place indicated that the lake had already (April 22) fallen 7 feet that season.

Possibly a more permanent rise has lately taken place, since Mr. Poole (p. 60) saw many dead trees standing in the lake for some distance from the shore opposite *Khashm Usdum*. This too was at the end of October, when the water must have been at its lowest (for that year).

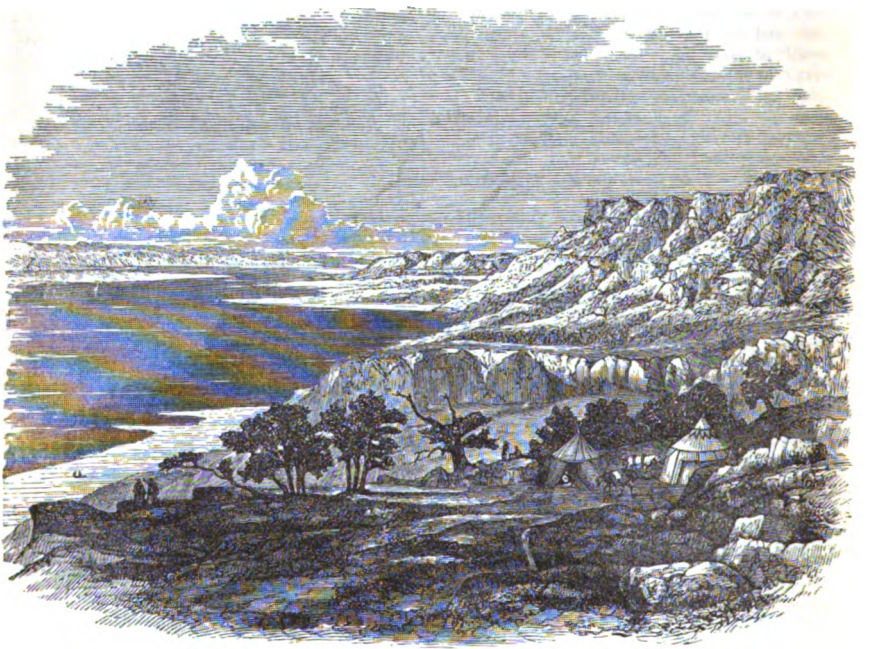
5. The change in level necessarily causes a change in the dimensions of the lake. This will chiefly affect the southern end. The shore of that part slopes up from the water with an extremely gradual incline. Over so flat a beach a very slight rise in the lake would send the water a considerable distance. This was found to be actually the case. The line of drift-wood mentioned by Dr. Robinson (ii. 115) was about 3 miles from the brink of the lagoon. Dr Anderson, the geologist of the American expedition, conjectured that the water occasionally extended as much as 8 or 10 miles south of its then position (*Official Report*, 4to, p. 182). On the peninsula, the acclivity of which is much greater than that of the southern shores of the lagoon, and in the early part of the summer (June , Irby and Mangles found the "high-water mark mile distant from the water's edge." At the rthern end, the shore being steeper, the water-line probably remains tolerably constant. The variation in breadth will not be so much. At the N. W. and N. E. corners there are some flats which must be often overflowed. Along the lower part of the western shore, where the beach widens, as at *Birket el-Khuttl*, it is occasionally covered in portions, but they are probably not enough to make any great variation in the width of the lake. Of the eastern side hardly anything is known, but the beach there appears to be only partial, and confined to the northern end.

6. The mountains which form the walls of the great fissure in whose depths the lake is contained, continue a nearly parallel course throughout its entire length. Viewed from the beach at the northern end of the lake — the only view within the reach of most travellers — there is little perceptible difference between the two ranges. Each is equally bare and stern to the eye. On the left the eastern mountains stretch their long, hazy, horizontal line, till they are lost in the dim distance. The western mountains, on the other hand, do not offer the same appearance of continuity, since the headland of *Ras el-Feshkhah* projects so far in front of the general line as to conceal the southern portion of the range when viewed from most points. The horizon is formed by the water-line of the lake itself, often lost in a thick mist which dwells on the surface, the result of the rapid evaporation always going on. In the centre of the horizon, when the haze permits it, may be discovered the mysterious peninsula.

7. Of the eastern side but little is known. One traveller in modern times (Seetzen) has succeeded in forcing his way along its whole length. The American party landed at the *W. Mójib* and other points. A few others have rounded the southern end of the lake, and advanced for 10 or 12 miles along its eastern shores. But the larger portion of those shores — the flanks of the mountains which stretch from the peninsula to the north end of the lake — have been approached by travellers from the west only on very rare occasions nearer than the western shore.

Both Dr. Robinson from *Ain Jidy* (i. 502), and Lieut. Molyneux (p. 127) from the surface of the lake, record their impression that the eastern mountains are much more lofty than the western, and much more broken by clefts and ravines than those on the west. In color they are brown, or red — a great contrast to the gray and white stones of the western mountains. Both sides of the lake, however, are alike in the absence of vegetation — almost entirely barren and scorched, except where here and there a spring, bursting up at the foot of the mountains, covers the beach with a bright green jungle of reeds and thorn bushes, or gives life to a clump of stunted palms; or where, as at *Ain Jidy* or the *Wady Mójib*, a perennial stream betrays its presence, and breaks the long monotony of the precipice by filling the rift with acacias, or nourishing a little oasis of verdure at its embouchure.

8. Seetzen's journey, just mentioned, was accomplished in 1807. He started in January from the ford of the Jordan through the upper country, by *Mkaur*, *Attarrus*, and the ravine of the *Wady Mójib* to the peninsula; returning immediately after by the lower level, as near the lake as it was possible to go. He was on foot with but a single guide. He represents the general structure of the mountains as limestone, capped in many places by basalt, and having at its foot a red ferruginous sandstone, which forms the immediate margin of the lake.[a] The ordinary path lies high up on the face of the mountains, and the lower track, which Seetzen pursued, is extremely rough, and often all but impassable. The rocks lie in a succession of enormous terraces, apparently more vertical in form than those on the west. On the lower one of these, but still far above the water, lies the path, if path it can be called, where the traveller has to scramble through and over a chaos of enormous blocks of limestone, sandstone, and basalt, or basalt conglomerate, the



[a] Termed by Anderson (pp. 189, 190) the Undercliff.

Digitized by Google

débris of the slopes above, or is brought abruptly to a stand by wild clefts in the solid rock of the precipice. The streams of the *Mojib* and *Zárka* issue from portals of dark red sandstone of romantic beauty, the overhanging sides of which no ray of sun ever enters.[a] The deltas of these streams, and that portion of the shore between them, where several smaller rivulets[b] flow into the lake, abound in vegetation, and form a truly grateful relief to the rugged desolation of the remainder. Palms in particular are numerous (Anderson, p. 192; Lynch, *Narr.* p. 369), and in Seetzen's opinion bear marks of being the relics of an ancient cultivation; but except near the streams, there is no vegetation. It was, says he, the greatest possible rarity to see a plant. The northeast corner of the lake is occupied by a plain of some extent left by the retiring mountains, probably often overflowed by the lake, mostly salt and unproductive, and called the *Ghôr el Belka*.

9. One remarkable feature of the northern portion of the eastern heights is a plateau which divides the mountains half-way up, apparently forming a gigantic landing-place in the slope, and stretching northwards from the *Wady Zárka Ma'in*. It is very plainly to be seen from Jerusalem, especially at sunset, when many of the points of these fascinating mountains come out into unexpected relief. This plateau appears to be on the same general level with a similar plateau on the western side opposite it (Poole, p. 68), with the top of the rock of *Sebbeh*, and perhaps with the Mediterranean.

10. The western shores of the lake have been more investigated than the eastern, although they cannot be said to have been yet more than very

The Dead Sea. — View from *Ain Jidy*, looking south. From a drawing made on the spot in 1842, by W. Tipping, Esq.

partially explored. Two travellers have passed over their entire length: De Saulcy in January 1851, from north to south, *Voyage dans la Syrie*, etc., 1853; and *Narrative of a Journey*, etc., London, 1854; and Poole in November 1855, from south to north (*Geogr. Journal*, xxvi. 55). Others have passed over considerable portions of it, and have recorded observations both with pen and pencil. Dr. Robinson on his first journey in 1838 visited *Ain Jidy*, and proceeded from thence to the Jordan and Jericho: Wolcott and Tipping, in 1842, scaled the rock of Masada (probably the first travellers from the western world to do so), and from thence journeyed to *Ain Jidy* along the shore. The views which illustrate this article have been, through the kindness of Mr. Tipping, selected from those which he took during this journey. Lieut. Van de Velde, in 1852, also visited Masada, and then went south as far as the south end of *Jebel Usdum*, after which he turned up to the right into the western mountains. Lieut. Lynch's party, in 1848, landed and travelled over the greater part of the shore from *Ain Feshkhah* to *Usdum*. Mr. Holman Hunt, in 1854, with the Messrs. Beamont, resided at *Usdum* for several days, and afterwards went over the entire length from *Usdum* to the Jordan. Of this journey one of the ultimate fruits was Mr. Hunt's picture of the Dead Sea at sunset, known as "The Scapegoat." Miss Emily Beaufort and her sister, in December 1860, accomplished the ascent of Masada, and the journey from thence to *Ain Jidy*; and the same thing, including *Usdum*,

[a] A rude view of the embouchure of the former of these is given by Lynch (*Narrative*, p. 368).

[b] Conjectured by Seetzen to be the "springs of Fesgah."

Digitized by Google

was done in April, 1863, by a party consisting of Mr. G. Clowes, Jr., Mr. Straton, and others.

11. The western range preserves for the greater part of its length a course hardly less regular than the eastern. That it does not appear so regular when viewed from the northwestern end of the lake is owing to the projection of a mass of the mountain eastward from the line sufficiently far to shut out from view the range to the south of it. It is Dr. Robinson's opinion (*Bibl. Res.* i. 510, 511) that the projection consists of the *Ras el-Feshkhah* and its "adjacent cliffs" only, and that from that headland the western range runs in a tolerably direct course as far as *Usdum*, at the S. W. corner of the lake. The *Ras el-Feshkhah* stands some six miles below the head of the lake, and forms the northern side of the gorge by which the *Wady en-Nar* (the Kidron) debouches into the lake. Dr. Robinson is such an accurate observer, that it is difficult to question his opinion, but it seems probable that the projection really commences further south, at the *Ras Mersed*, north of *Ain Jidy*. At any rate no traveller [a] appears to have been able to pass along the beach between *Ain Jidy* and *Ras Feshkhah*, and the great Arab road, which adheres to the shore from the south as far as *Ain Jidy*, leaves it at that point, and mounts to the summit. It is much to be regretted that Lynch's party, who had encampments of several days' duration at *Ain Feshkhah*, *Ain Terâbeh*, and *Ain Jidy*, did not make such observations as would have decided the configuration of the shores.

12. The accompanying wood-cut represents the view looking southward from the spring of *Ain Jidy*, a point about 700 feet above the water (Poole, p. 66). It is taken from a drawing by the accurate pencil of Mr. Tipping, and gives a good idea of the course of that portion of the western heights, and of their ordinary character, except at a few such exceptional spots as the headlands just mentioned, or the isolated rock of *Sebbeh*, the ancient Masada. In their present aspect they can hardly be termed "vertical" or "perpendicular," or even "cliffs" [b] (the favorite term for them), though from a distant point on the surface of the lake they probably look vertical enough (Molyneux, p. 127). Their structure was originally in huge steps or offsets, but the horizontal portion of each offset is now concealed by the slopes of *debris*, which have in the lapse of ages rolled down from the vertical cliff above.[c]

13. The portion actually represented in this view is described by Dr. Anderson (p. 175) as "varying from 1,200 to 1,500 feet in height, bold and steep, admitting nowhere of the ascent or descent of beasts of burden, and practicable only here and there to the most intrepid climber. . . . . The marked divisions of the great escarpment, reckoning from above, are: (1.) Horizontal layers of limestone from 200 to 300 feet in depth. (2.) A series of tent-shaped embankments of *débris*, brought down through the small ravines intersecting the upper division, and lodged on the projecting terrace below. (3.) A sharply defined, well-marked formation, less perfectly stratified than No. 1, and constituting by its unbroken continuity a zone of naked rock, probably 150 feet in depth, running like a vast frieze along the face of the cliff, and so precipitous that the detritus pushed over the edge of this shelf-like ledge finds no lodgment anywhere on its almost vertical face. Above this zone is an interrupted bed of yellow limestone 40 feet thick. (4.) A broad and boldly sloping talus of limestone — partly bare, partly covered by *débris* from above — descends nearly to the base of the cliff. (5.) A breastwork of fallen fragments, sometimes swept clean away, separates the upper edge of the beach from the ground line of the escarpment. (6.) A beach of variable width and structure — sometimes sandy, sometimes gravelly or shingly, sometimes made up of loose and scattered patches of a coarse travertine or marl — falls gradually to the border of the Dead Sea."

14. Further south the mountain sides assume a more abrupt and savage aspect, and in the *Wady Zuweirah*, and still more at *Sebbeh* — the ancient Masada [d] — reach a pitch of rugged and repulsive, though at the same time impressive desolation, which perhaps cannot be exceeded anywhere on the face of the earth. Beyond *Usdum* the mountains continue their general line, but the district at their feet is occupied by a mass of lower eminences, which, advancing inwards, gradually encroach on the plain at the south end of the lake, and finally shut it in completely, at about 8 miles below *Jebel Usdum*.

15. The region which lies on the top of the western heights was probably at one time a wide table-land, rising gradually towards the high lands which form the central line of the country — Hebron, *Beni-naim*, etc. It is now cut up by deep and difficult ravines, separated by steep and inaccessible summits; but portions of the table-lands still remain in many places to testify to the original conformation. The material is a soft cretaceous limestone, bright white in color, and containing a good deal of sulphur. The surface is entirely desert, with no sign of cultivation: here and there a shrub of *Retem*, or some other desert-plant, but only enough to make the monotonous desolation of the scene more frightful. "Il existe au monde," says one of the most intelligent of modern travellers, "peu de régions plus désolées, plus abandonnées de Dieu, plus fermées à la vie, que la pente rocailleuse qui forme le bord occidental de la Mer Morte" (Renan, *Vie de Jésus*, ch. vii.).

16. Of the elevation of this region we hitherto possess but scanty observations. Between *Ain Jidy*

[a] Poole appears to have tried his utmost to keep the shore, and to have accomplished more than others, but with only small success. De Sauley was obliged to take to the heights at *Ain Terâbeh*, and keep to them till he reached *Ain Jidy*.

[b] It is a pity that travellers should so often indulge in the use of such terms as "vertical," "perpendicular," "overhanging," etc., to describe acclivities which prove to be only moderately steep slopes. Even Dr. Robinson — usually so moderate — on more than one occasion speaks of a mountain-side as "perpendicular," and immediately afterwards describes the ascent or descent of it by his party!

[c] Lynch's view of *Ain Jidy* (*Narr.* p. 290), though rough, is probably not inaccurate in general effect. It agrees with Mr. Tipping's as to the structure of the heights. That in De Sauley by M. Belly, which purports to be from the same spot as the latter, is very poor.

[d] This was the fortress in which the last remnant of the Zealots, or fanatical party of the Jews, defended themselves against Silva, the Roman general, in A. D. 71, and at last put themselves to death to escape capture. The spot is described and the tragedy related in a very graphic and impressive manner by Dean Milman (*Hist. of the Jews*, 3d ed., ii. 385–389).

Digitized by Google

and *Ain Terâbeh* the summit is a table-land 740 feet above the lake (Poole, p. 67).[a] Further north, above *Ain Terâbeh*, the summit of the pass is 1,305.75 feet above the lake (Lynch, *Off. Rep.* p. 43), within a few feet the height of the plain between the *Wady en-Nar* and *Goumran*, which is given by Mr. Poole (p. 68) at 1,340 feet. This appears also to be about the height of the rock of *Sebbeh*, and of the table-land, already mentioned, on the eastern mountains north of the *Wady Zârka*. It is also nearly coincident with that of the ocean. In ascending from the lake to *Nebi Mûsa*, Mr. Poole (p. 58) passed over what he "thought might be the original level of the old plain, 532½ feet above the Dead Sea." That these are the remains of ancient sea margins, chronicling steps in the history of the lake (Allen, in *Geogr. Journ.* xxiii. 163), may reasonably be conjectured, but can only be determined by the observation of a competent geologist on the spot.

17. A beach of varying width skirts the foot of the mountains on the western side. Above *Ain Jidy* it consists mainly of the deltas of the torrents — fan-shaped banks of *débris*[b] of all sizes, at a steep slope, spreading from the outlet of the torrent like those which become so familiar to travellers, in Northern Italy for example. In one or two places — as at the mouth of the Kidron and at *Ain Terâbeh* — the beach may be 1,000 to 1,400 yards wide, but usually it is much narrower, and often is reduced to almost nothing by the advance of the headlands. For its major part, as already remarked, it is impassable. Below *Ain Jidy*, however, a marked change occurs in the character of the beach. Alternating with the shingle, solid deposits of a new material, soft friable chalk, marl, and gypsum, with salt, begin to make their appearance. These are gradually developed towards the south, till at *Sebbeh* and below it they form a terrace 80 feet or more in height at the back, though sloping off gradually to the lake. This new material is a greenish white in color, and is ploughed up by the cataracts from the heights behind into very strange forms: here, hundreds of small mamelons, covering the plain like an eruption; there, long rows of huge cones, looking like an encampment of enormous tents; or, again, rectangular blocks and pillars, exactly resembling the streets of a town, with rows of houses and other edifices, all as if constructed of white marble.[c] These appear to be the remains of strata of late- or post-tertiary date, deposited at a time when the water of the lake stood much higher, and covered a much larger area, than it does at present. The fact that they are strongly impregnated with the salts of the lake[d] is itself presumptive evidence of this. In many places they have completely disappeared, doubtless washed into the lake by the action of torrents from the hills behind, similar to, though more violent than those which have played the strange freaks just described: but they still linger on this part of the shore, on the peninsula opposite,[e] at the southern and western outskirts of the plain south of the lake, and probably in a few spots at the northern and northwestern end, to testify to the condition which once existed all round the edge of the deep basin of the lake. The width of the beach thus formed is considerably greater than that above *Ain Jidy*. From the *Birket el-Khâlil* to the wady south of *Sebbeh*, a distance of six miles, it is from one to two miles wide, and is passable for the whole distance. The *Birket el-Khâlil* just alluded to is a shallow depression on the shore, which is filled by the water of the lake when at its greatest height, and forms a natural salt-pan. After the lake retires the water evaporates from the hollow, and the salt remains for the use of the Arabs. They also collect it from similar though smaller spots further south,[f] and on the peninsula (Irby, June 2). One feature of the beach is too characteristic to escape mention — the line of driftwood which encircles the lake, and marks the highest, or the ordinary high level of the water. It consists of branches of brushwood, and of the limbs of trees, some of considerable size, brought down by the Jordan and other streams, and in course of time cast up on the beach. They stand up out of the sand and shingle in curiously fantastic shapes, all signs of life gone from them, and with a charred though blanched look very desolate to behold. Amongst them are said to be great numbers of palm trunks (Poole, p. 69); some doubtless floated over from the palm groves on the eastern shore already spoken of, and others brought down by the Jordan in the distant days when the palm flourished along its banks. The driftwood is saturated with salt, and much of it is probably of a very great age.

A remarkable feature of the western shore has been mentioned to the writer by the members of Mr. Clowes' party. This is a set of 3 parallel beaches one above the other, the highest about 50 feet above the water; which, though often interrupted by ravines, and by *débris*, etc., can be traced during the whole distance from *Wady Zuweirah* to *Ain Jidy*. These terraces are possibly alluded to by Anderson when speaking of the "several descents" necessary to reach the floor of *Wady Seyal* (p. 177).

18. At the southwest corner of the lake, below

---

[a] De Saulcy mentions this as a small rocky table-land, 250 metres above the Dead Sea. But this was evidently not the actual summit, as he speaks of the sheikh occupying a post a few hundred yards above the level of that position, and further west (*Narr.* i. 169).

[b] Lynch remarks that at *Ain el-Feshkhah* there was a "total absence of round pebbles; the shore was covered with small angular fragments of flint" (*Narr.* p. 274). The same at *Ain Jidy* (p. 290).

[c] De Saulcy, *Narr.* ibid.; Anderson, p 176. See also a striking description of the "resemblance of a great city" at the foot of *Sebbeh*, in Beamont's *Diary*, etc., ii. 52.

[d] A specimen brought by Mr. Clowes from the foot of *Sebbeh* has been examined for the writer by Dr. Price, and proves to contain no less than 6.38 per cent. of salts soluble in water, namely, chlor. sodium, 4.559, chlor. calcium, 2.08, chlor. magnesium, 0.241. Bromine was distinctly found.

[e] They are identified by Dr. Anderson.

[f] The salt of the Dead Sea was anciently much in request for use in the Temple service. It was preferred before all other kinds for its reputed effect in hastening the combustion of the sacrifice, while it diminished the unpleasant smell of the burning flesh. Its deliquescent character (due to the chlorides of alkaline earths it contains) is also noticed in the Talmud (*Menacoth*, xxi. 1; *Jalkut*). It was called "Sodom salt," but also went by the name of the "salt that does not rest" (מלח שאינן שוברות), because it was made on the Sabbath as on other days like the "Sunday salt" of the English salt-works. It is still much esteemed in Jerusalem.

Digitized by Google

where the wadies *Zuweirah* and *Mahauwa* break down through the inclosing heights, the beach is encroached on by the salt mountain or ridge of *Khashm Usdum*. This remarkable object is hitherto but imperfectly known. It is said to be quite independent of the western mountains, lying in front of and separated from them by a considerable tract filled up with conical hills and short ridges of the soft, chalky, marly deposit just described. It is a long, level ridge or dyke, of several miles long.[a] Its northern portion runs S. S. E.: but after more than half its length it makes a sudden and decided bend to the right, and then runs S. W. It is from 300 to 400 feet in height, of inconsiderable width,[b] consisting of a body of crystallized rock-salt, more or less solid, covered with a capping of chalky limestone and gypsum. The lower portion, the salt rock, rises abruptly from the glossy plain at its eastern base, sloping back at an angle of not more than 45°, often less. It has a strangely dislocated, shattered look, and is all furrowed and worn into huge angular buttresses and ridges, from the face of which great fragments are occasionally detached by the action of the rains, and appear as "pillars of salt," advanced in front of the general mass. At the foot the ground is strewed with lumps and masses of salt, salt streams drain continually from it into the lake, and the whole of the beach is covered with salt — soft and sloppy, and of a pinkish hue in winter and spring, though during the heat of summer dried up into a shining, brilliant crust. An occasional patch of the Kali plant (*Salicornia*, etc.) is the only vegetation to vary the monotony of this most monotonous spot.

Between the north end of *K. Usdum* and the lake is a mound covered with stones and bearing the name of *um-Zoghal*.[c] It is about 60 feet in diameter and 10 or 12 high, evidently artificial, and not improbably the remains of an ancient structure. A view of it, engraved from a photograph by Mr. James Graham, is given in Isaac's *Dead Sea* (p. 21). This heap M. De Saulcy maintained to be a portion of the remains of Sodom. Its name is more suggestive of Zoar, but there are great obstacles to either identification. [SODOM; ZOAR.]

19. It follows from the fact that the lake occupies a portion of a longitudinal depression, that its northern and southern ends are not inclosed by highland, as its east and west sides are. The floor of the Ghor or Jordan Valley has been already described. [PALESTINE, iii. 2298.] As it approaches the northern shore of the lake it breaks down by two offsets or terraces, tolerably regular in figure and level. At the outside edge of the second of these a range of driftwood marks the highest level of the waters — and from this point the beach slopes more rapidly into the clear light-green water of the lake.

20. A small piece of land lies off the shore about halfway between the entrance of the Jordan and the western side of the lake. It is nearly circular in form. Its sides are sloping, and therefore its size varies with the height of the water When the writer went to it in September, 1858, it was about 100 yards in diameter, 10 or 12 feet out of the water, and connected with the shore by a narrow neck or isthmus of about 100 yards in length. The isthmus is concealed when the water is at its full height, and then the little peninsula becomes an island. M. De Saulcy attributes to it the name *Redjém Lût* — the cairn of Lot.[d] It is covered with stones, and dead wood washed up by the waves. The stones are large, and though much weather-worn, appear to have been originally rectangular. At any rate they are very different from any natural fragments on the adjacent shores.

21. Beyond the island the northwestern corner of the lake is bordered by a low plain, extending up to the foot of the mountains of *Neby Musa*, and south as far as *Ras Feshkhah*. This plain must be considerably lower than the general level of the land north of the lake, since its appearance implies that it is often covered with water. It is described as sloping gently upwards from the lake; flat and barren, except rare patches of weeds round a spring. It is soft and slimy to the tread, or in the summer covered with a white film of salt, formed by the evaporation of the surface water. The upper surface appears to be only a crust, covering a soft and deep substratum, and often not strong enough to bear the weight of the traveller.[e] In all these particulars it agrees with the plain at the south of the lake, which is undoubtedly covered when the waters rise. It further agrees with it in exhibiting at the back remains of the late tertiary deposits already mentioned, cut out, like those about *Sebbeh*, into fantastic shapes by the rush of the torrents from behind.

A similar plain (the *Ghôr el-Belka*, or *Ghôr Seisubân*) appears to exist on the N. E. corner of the lake between the embouchure of the Jordan and the slopes of the mountains of Moab. Beyond, however, the very brief notice of Seetzen (ii. 373), establishing the fact that it is "salt and stony," nothing is known of it.[f]

22. The southern end is, like the northern, a wide plain, and like it retains among the Arabs the

---

[a] There is great uncertainty about its length. Dr. Robinson states it at 5 miles and "a considerable distance further" (ii. 107, 112). Van de Velde makes it 10 miles (ii. 113), or 8½ hours (ii. 116). But when these dimensions are applied to the map they are much too large, and it is difficult to believe that it can be more than 5 miles in all.

[b] Dr. Anderson (p. 181) says it is about 2½ miles wide But this appears to contradict Dr. Robinson's expressions (ii. 107). The latter are corroborated by Mr. Clowes' party. They also noticed salt in large quantities among the rocks in regular strata some considerable distance back from the lake.

[c] ام زوغل (Robinson, ii. 107). By De Saulcy the name is given Redjom el-Mesorrahl (the gh and rr are both attempts to represent the *ghain*). The "Pilgrim" in *Athenæum*, Apr. 2, 1864, expressly states that his guide called it *Rudjeim ez-Zogheir*.

[d] This island was shown to Maundrell (March 30, 1697) as containing, or having near it, the "monument of Lot's wife." It forms a prominent feature in the view of "the Dead Sea from its northern shore," No. 429 of Frith's stereoscopic views in the Holy Land.

[e] This was especially mentioned to the writer by Mr. David Roberts, R. A., who was nearly lost in such a hole on his way from the Jordan to *Mar Saba*.

[f] The statement of the ancient traveller Thietmar (A. D. 1217), who crossed the Jordan at the ordinary ford, and at a mile from thence was shown the "salt pillar" of Lot's wife, seems to imply that there are masses of rock-salt at this spot, of the same nature as that at *Usdum*, though doubtless less extensive (Thietmar, *Peregr.* xi 47)

Digitized by Google

name of *El Ghôr*.[a] It has been visited by but few travellers. Seetzen crossed it from E. to W. in April, 1806 (*Reisen*, i. 426–429), Irby and Mangles in May, 1818, De Saulcy in Jan. 1851, and Poole in Nov. 1855, all crossed it in the opposite direction at a moderate distance from the lake. Dr. Robinson, on his way from Hebron to Petra in May, 1838, descended the *Wady Zuweirah*, passed between *K. Usdum* and the lake, and went along the western side of the plain to the *Wady el-Jeib*. The same route was partially followed by M. Van de Velde. The plain is bounded on the west side, below the *Khashm Usdum*, by a tract thickly studded with a confused mass of unimportant eminences, "low cliffs and conical hills," of chalky indurated marl (Rob. ii. 116), apparently of the same late formation as that already mentioned further north. These eminences intervene between the lofty mountains of Judah and the plain, and thus diminish the width of the *Ghôr* from what it is at *Ain Jidy*. Their present forms are due to the fierce rush of the winter torrents from the elevated tracts behind them. In height they vary from 50 to 150 feet. In color they are brilliant white (Poole, p. 61). All along their base are springs, generally of brackish, though occasionally of fresh water, the overflow from which forms a tract of marshland, overgrown with canes, tamarisks, retem, ghurkud, thorn, and other shrubs. Here and there a stunted palm is to be seen. Several principal wadies, such as the *Wady Emaz*, and the *Wady Fikreh*, descend into the *Ghôr* through these hills from the higher mountains behind, and their wide beds, strewed with great stones and deeply furrowed, show what vast bodies of water they must discharge in the rainy season. The hills themselves bend gradually round to the eastward, and at last close the valley in to the south. In plan they form "an irregular curve, sweeping across the *Ghôr* in something like the segment of a circle, the chord of which would be 6 or 7 geographical miles in length, extending obliquely from N. W. to S. E." (Rob. ii. 120). Their apparent height remains about what it was on the west, but though still insignificant in themselves, they occupy here an important position as the boundary-line between the districts of the *Ghôr* and the *Arabah* — the central and southern compartments of the great longitudinal valley mentioned in the outset of this article. The *Arabah* is higher in level than the *Ghôr*. The valley takes at this point a sudden rise or step of about 100 feet in height, and from thence continues rising gradually to a point about 35 miles north of *Akabeh*, where it reaches an elevation of 1800 feet above the Dead Sea, or very nearly 500 feet above the ocean.[b]

23. Thus the waters of two thirds of the *Arabah* drain northwards into the plain at the south of the lake, and thence into the lake itself. The *Wady el-Jeib* — the principal channel by which this vast drainage is discharged on to the plain — is very large, "a huge channel," "not far from half a mile wide," "bearing traces of an immense volume of water, rushing along with violence, and covering the whole breadth of the valley." The body of detritus discharged by such a river must be enormous. We have no measure of the elevation of the plain at the foot of the southern line of mounds, but there can be no doubt that the rise from the lake upwards is, as the torrents are approached, considerable, and it seems hardly possible to avoid the conclusion that the silting up of the lagoon which forms the southern portion of the lake itself is due to the materials brought down by this great torrent, and by those hardly inferior to it, which, as already mentioned, discharge the waters of the extensive highlands both on the east and west.

24. Of the eastern boundary of the plain we possess hardly any information. We know that it is formed by the mountains of Moab, and we can just discern that, adjacent to the lake, they consist of sandstone, red and yellow, with conglomerate containing porphyry and granite, fragments of which have rolled down and seem to occupy the position which on the western side is occupied by the tertiary hills. We know also that the wadies *Ghurundel* and *Tufileh*, which drain a district of the mountains N. of Petra, enter at the S. E. corner of the plain — but beyond this all is uncertain.

25. Of the plain itself hardly more is known than of its boundaries. Its greatest width from W. to E. is estimated at from 5 to 6 miles, while its length, from the cave in the salt mountain to the range of heights on the south, appears to be about 8. Thus the breadth of the *Ghôr* seems to be here considerably less than it is anywhere north of the lake, or across the lake itself. That part of it which more immediately adjoins the lake consists of two very distinct sections, divided by a line running nearly N. and S. Of these the western is a region of salt and barrenness, bounded by the salt mountain of *Khashm Usdum*, and fed by the liquefied salt from its caverns and surface, or by the drainage from the salt springs beyond it — and overflowed periodically by the brine of the lake itself. Near the lake it bears the name of *es-Sabkah*, i. e. the plain of salt mud (De Saulcy, p. 262). Its width from W. to E. — from the foot of *K. Usdum* to the belt of reeds which separates it from the *Ghôr es-Safieh* — is from 3 to 4 miles.[c] Of its extent to the south nothing is known, but it is probable that the muddy district, the *Sabkah* proper, does not extend more, at most, than 3 miles from the lake. It is a naked, marshy plain, often so boggy as to be impassable for camels (Rob. ii. 115), destitute of every species of vegetation, scored at frequent intervals[d] by the channels of salt streams from the *Jebel Usdum*, or the salt springs along the base of the hills to the south thereof. As the southern boundary is approached the plain appears to rise, and its surface is covered with a "countless number" of those conical mamelons (Poole, p. 61), the remains of late aqueous deposits, which are so characteristic of the whole of this region. At a distance from the lake a partial vegetation is found (Rob. ii. 103), clumps of reeds surrounding and choking the springs, and spreading out as the water runs off.

26. To this curious and repulsive picture the eastern section of the plain is an entire contrast. A dense thicket of reeds, almost impenetrable, divides it from the *Sabkah*. This past, the aspect of the

[c] Irby, 1½ hour; De Saulcy, 1 hr. 18 min. + 800 metres; Poole, 1 hr. 5 min. Seetzen, 3 hours (i. 428).

[d] Irby and Mangles report the number of these "drains" between *Jebel Usdum* and the edge of the *Ghôr es-Safieh* at six; Poole at eleven; De Saulcy at three, but he evidently names only the most remarkable ones.

Digitized by Google

land completely changes. It is a thick copse of shrubs similar to that around Jericho (Rob. ii. 113), and, like that, cleared here and there in patches where the *Ghawarineh*,[a] or Arabs of the *Ghôr*, cultivate their wheat and durra, and set up their wretched villages. The variety of trees appears to be remarkable. Irby and Mangles (p. 108 *b*) speak of "an infinity of plants that they knew not how to name or describe." De Saulcy expresses himself in the same terms — "une riche moisson botanique." The plants which these travellers name are dwarf mimosa, tamarisk, dom, osher, *Asclepias procera*, nubk, arek, indigo. Seetzen (i. 427) names also the *Thuja aphylla*. Here, as at Jericho, the secret of this vegetation is an abundance of fresh water acting on a soil of extreme richness (Seetzen, ii. 355). Besides the watercourse,[b] in which the belt of reeds flourishes (like those north of the Lake of Huleh in the marshes which bound the upper Jordan[c]), the *Wady Kurdhy* (or *el-Ahsy*), a considerable stream[d] from the eastern mountains, runs through it, and Mr. Poole mentions having passed three swift brooks, either branches of the same,[e] or independent streams. But this would hardly be sufficient to account for its fertility, unless this portion of the plain were too high to be overflowed by the lake; and although no mention is made of any such change of level, it is probably safe to assume it. Perhaps, also, something is due to the nature of the soil brought down by the *Wady el-Ahsy*, of which it is virtually the delta. This district, so well wooded and watered, is called the *Ghôr es-Safieh*.[f] Its width is less than that of the *Sabkah*. No traveller has traversed it from W. to E., for the only road through it is apparently that to *Kerak*, which alone takes a N. E. direction immediately after passing the reeds. De Saulcy made

THE DEAD SEA. — View from the heights behind *Sebbeh* (Masada), showing the wide beach on the western side of the lake, and the tongue-shaped peninsula. From a drawing made on the spot by W. Tipping, Esq.

the nearest approach to such a traverse on his return from *Kerak* (*Narrative*, i. 492), and on his detailed map (feuille 6) it appears about 2¼ miles in width. Its length is still more uncertain, as we are absolutely without record of any exploration of its southern portion. Seetzen (ii. 355) specifies it (at second hand) as extending to the mouth of the *Wady el-Hôssa* (*i. e.* the *el-Ahsy*). On the other hand, De Saulcy, when crossing the *Sabkah* for the first time from W. to E. (*Narr.* i. 263), remarked that there was no intermission in the wood before him, between the *Ghôr es-Safieh* and the foot of the hills at the extreme south of the plain. It is possible that both are right, and that the wood extends over the whole east of the *Ghôr*, though it bears the name of *es-Safieh* only as far as the mouth of the *el-Ahsy*.

27. The eastern mountains, which form the back-

[d] Larger than the *Wady Mojib* (Seetzen, i. 427).

[e] Seetzen (ii. 355) states that the stream, which he calls *el-Hôssa*, is conducted in artificial channels (*Kanaten*) through the fields (also i. 427). Poole names them *Ain Ashka*.

[f] Mr. Tristram found even at the foot of the salt mountain of *Usdum* that about 2 feet below the salt surface there was a splendid alluvial soil; and he has suggested to the writer that there is an analogy between this plain and certain districts in North Africa, which, though fertile and cultivated in Roman times, are now barren and covered with efflorescence of natron. The cases are to a certain degree parallel, inasmuch as the African plains (also called *Sebkha*) have their salt mountains (like the *Khashm Usdum*, "isolated from the mountain range behind," and flanked by small mamelons bearing stunted herbage), the streams from which supply them with salt (*The Great Sahara*, p. 71, &c.). They are also, like the Sabkah of Syria, overflowed every winter by the adjoining lake

Digitized by Google

ground to this district of woodland, are no less naked and rugged than those on the opposite side of the valley. They consist, according to the reports of Seetzen (ii. 354), Poole, and Lynch, of a red sandstone, with limestone above it — the sandstone in horizontal strata with vertical cleavage (Lynch, *Narr.* pp. 311, 313). To judge from the fragments at their feet, they must also contain very fine breccias and conglomerates of granite, jasper, greenstone, and felspar of varied color. Irby and Mangles mention also porphyry, serpentine, and basalt; but Seetzen expressly declares that of basalt he there found no trace.

Of their height nothing is known, but all travellers concur in estimating them as higher than those on the west, and as preserving a more horizontal line to the south.

After passing from the *Ghôr es-Safieh* to the north, a salt plain is encountered resembling the *Sabkah*, and like it overflowed by the lake when high (Seetzen, ii. 355). With this exception the mountains come down abruptly on the water during the whole length of the eastern side of the lagoon. In two places only is there a projecting beach, apparently due to the deltas caused by the wadies *en-Nemeirah* and *Uheimir*.

28. We have now arrived at the peninsula which projects from the eastern shore and forms the north inclosure of the lagoon. It is too remarkable an object, and too characteristic of the southern portion of the lake, to be passed over without description.

It has been visited and described by three explorers — Irby and Mangles in June, 1818; Mr. Poole in November, 1855; and the American expedition in April, 1848. Among the Arabs it appears to bear the names *Ghôr el-Mezra'ah* and *Ghôr el-Lisân*. The latter name — "the Tongue" [a] — recalls the similar Hebrew word *lashon*, לָשׁוֹן, which is employed three times in relation to the lake in the specification of the boundaries of Judah and Benjamin, contained in the book of Joshua. But in its three occurrences the word is applied to two different places — one at the north (Josh. xv. 5, xviii. 19), and one at the south (xv. 2); and it is probable that it signifies in both cases a tongue of water — a bay — instead of a tongue [b] of land.

29. Its entire length from north to south is about 10 geographical miles, and its breadth from 5 to 6 — though these dimensions are subject to some variation according to the time of year. It appears to be formed entirely of recent aqueous deposits, late, or post-tertiary, very similar, if not identical, with those which face it on the western shore, and with the "mounds" which skirt the plains at the south and N. W. of the lake. It consists of a friable carbonate of lime intermixed with sand or sandy marls, and with frequent masses of sulphate of lime (gypsum). The whole is impregnated strongly with sulphur, lumps of which are found, as on the plain at the north end of the lake, and also with salt, existing in the form of lumps or packs of rock-salt (And. p. 187). Nitre is reported by Irby (p. 139), but neither Poole nor Anderson succeeded in meeting with it. The stratification is almost horizontal, with a slight dip to the east (Poole, p. 63). At the north it is worn into a sharp ridge or mane, with very steep sides and serrated top. Towards the south the top widens into a table-land, which Poole (*ibid.*) reports as about [c] 230 ft. above the level of the lake at its southern end. It breaks down on the W., S., and N. E. sides by steep declivities to the shore, furrowed by the rains which are gradually washing it into the lake into cones and other fantastic forms, like those already described on the western beach near *Sebbeh*. It presents a brilliant white appearance when lit up by the blazing sun, and contrasted with the deep blue of the lake (Beaufort, p. 104). A scanty growth of shrubs (Poole, p. 64) — so scanty as to be almost invisible (Irby, p. 139 *b*) — is found over the table-land. On the east the highland descends to a depression of 1½ or 2 miles wide, which from the description of Dr. Anderson (p. 184) appears to run across the neck from S. to N., at a level hardly above that of the lake. It will doubtless be ultimately worn down quite to the level of the water, and then the peninsula will become an island (Anderson, pp. 184, 189). Into this valley lead the torrents from the ravines of the mountains on the east. The principal of these is the *Wady ed-Dra'a* or *W. Kerak*, which leads up to the city of that name. It is here that the few inhabitants of the peninsula reside, in a wretched village called *Mezra'ah*. The soil is of the most unbounded fertility, and only requires water to burst into riotous prodigality of vegetation (Seetzen, ii. 351, 352).

30. There seems no reason to doubt that this peninsula is the remnant of a bed of late aqueous strata, which were deposited at a period when the

---

[a] This appellation is justified by the view on the preceding page.

[b] From the expression being in the first two cases "tongue of the sea," and in the third simply "tongue," M. de Saulcy conjectures that in the last case a tongue *of land* is intended: but there is nothing to warrant this. It is by no means certain whether the two Arabic names just mentioned apply to different parts of the peninsula, or are given indiscriminately to the whole. *Ghôr el-Mezra'ah* is the only name which Seetzen mentions, and he attaches it to the whole. It is also the only one mentioned by Dr. Anderson, but he restricts it to the depression on the east side of the peninsula, which runs N. and S. and intervenes between the main body and the foot of the eastern mountains (And. p. 184). M. de Saulcy is apparently the earliest traveller to mention the name *Lisân*. He (Jan. 15) ascribes it to the whole peninsula, though he appears to attach it more particularly to its southern portion, — "Le Liçan actuel des Arabes, c'est-à-dire la pointe sud de la presqu'-île," (*Voyage*, i. 290). And this is supported by the practice of Van de Velde, who on his map marks the north portion of the peninsula as *Ghôr el-Mezra'ah*, and the south *Ghôr el-Lisân*. M. de Saulcy also specifies with much detail the position of the former of these two as at the opening of the *Wady ed-Dra'a* (Jan. 15). The point is well worth the attention of future travellers, for if the name *Lisân* is actually restricted to the south side, a curious confirmation of the accuracy of the ancient survey recorded in Josh. xv. 2 would be furnished, as well as a remarkable proof of the tenacity of an old name.

[c] This dimension, which Mr. Poole took with his aneroid, is strangely at variance with the estimate of Lynch's party. Lynch himself, on approaching it at the north point (*Narr.* p. 297), states it at from 40 to 60 feet high, with a sharp angular central ridge some 20 feet above that. This last feature is mentioned also by Irby (June 2). Anderson increases the dimension of his chief to 80 or 90 ft. (*Off. Rep.* p. 185); but even this falls short of Poole. The peninsula probably slopes off considerably towards the north end, at which Lynch and Anderson made their estimate.

Digitized by Google

water of the lake stood very much higher than it now does, but which, since it attained its present level, and thus exposed them to the action of the winter torrents, are gradually being disintegrated and carried down into the depths of the lake. It is in fact an intrusion upon the form of the lake, as originally determined by the rocky walls of the great fissure of the *Ghôr*. Its presence here, so long after the great bulk of the same formation has been washed away, is an interesting and fortunate circumstance, since it furnishes distinct evidence of a stage in the existence of the lake, which in its absence might have been inferred from analogy, but could never have been affirmed as certain. It may have been deposited either by the general action of the lake, or by the special action of a river, possibly in the direction of *Wady Kerak*, which in that case formed this extensive deposit at its mouth, just as the Jordan is now forming a similar bank at its embouchure. If a change were to take place which either lowered the water, or elevated the bottom of the lake, the bank at the mouth of the Jordan would be laid bare, as the *Lisân* now is, and would immediately begin to undergo the process of disintegration which that is undergoing.

31. The extraordinary difference between the depth of the two portions of the lake — north and south of the peninsula — has been already alluded to, and may be seen at a glance on the section given on page 2878. The former is a bowl, which at one place attains the depth of more than 1,300 feet, while the average depth along its axis may be taken at not far short of 1,000. On the other hand the southern portion is a flat plain, with the greater part of its area nearly level, a very few feet[a] only below the surface, shoaling gradually at the edges till the brink is reached. So shallow is this lagoon that it is sometimes possible to ford right across from the west to the east side (Seetzen, i. 428,[b] ii. 358; Rob. i. 521; Lynch, *Narr.* p. 304).

The channel connecting the two portions, on the western side of the peninsula, is very gradual in its slope from S. to N.,[c] increasing in depth from 3 fathoms to 13, and from 13 to 19, 32 and 56, when it suddenly drops to 107 (642 feet), and joins the upper portion.

32. Thus the circular portion above the peninsula, and a part of the channel, form a mere lagoon, entirely distinct and separate from the basin of the lake proper. This portion and the plain at the south as far as the rise or offset at which the Arabah commences — a district in all of some 16 miles by 8 — would appear to have been left by the last great change in the form of the ground at a level not far below its present one, and consequently much higher than the bottom of the lake itself. But surrounded as it is on three sides by highlands, the waters of which have no other outlet, it has become the delta into which those waters discharge themselves. On its south side are the immense torrents of the *Jeib*, the *Umm-mudet*, and the *Fikreh*. On the east the somewhat less important *el-Ahsy*, *Numeirah*, *Humeir*, and *ed-Dra'ah*. On the west the *Zuweirah*, *Mubughghik*,[d] and *Senin*. These streams are the drains of a district not less than 6,000 square miles in area, very uneven in form, and composed of materials more or less friable. They must therefore bring down enormous quantities of silt and shingle. There can be little doubt that they have already filled up the southern part of the estuary as far as the present brink of the water, and the silting up of the rest is merely a work of time. It is the same process which is going on, on a larger and more rapid scale, in the Sea of Azov, the upper portion of which is fast filling up with the detritus of the river Don. Indeed the two portions of the Dead Sea present several points of analogy to the Sea of Azov and the Black Sea.

It is difficult to speak with confidence on any of the geological features of the lake, in the absence of reports by competent observers. But the theory that the lagoon was lowered by a recent change, and overflowed (Robinson, *Bibl. Res.* ii. 189), seems directly contrary to the natural inference from the fact that such large torrents discharge themselves into that spot. There is nothing in the appearance of the ground to suggest any violent change in recent (*i. e.* historical) times, or that anything has taken place but the gradual accumulation of the deposits of the torrents all over the delta.

33. The water of the lake is not less remarkable than its other features. Its most obvious peculiarity is its great weight.[e] Its specific gravity has been found to be as much as 12.28; that is to say, a gallon of it would weigh over 12½ lbs. instead of 10 lbs., the weight of distilled water. Water so heavy must not only be extremely buoyant but must possess great inertia. Its buoyancy is a common theme of remark by the travellers who have been upon it or in it. Josephus (*B. J.* iv. 8, § 4) relates some experiments made by Vespasian by throwing bound criminals into it; and Lynch, bathing on the eastern shore near the mouth of the *Wady Zârka*, says (*Narr.* p. 371), in words curiously parallel to those of the old historian, "With great difficulty I kept my feet down, and when I laid upon my back, and, drawing up my knees, placed my hands upon them, I rolled immediately over." In the bay on the north side of the peninsula, "a horse could with difficulty keep himself upright. Two fresh hens' eggs floated up one-third of their length," *i. e.* with one-third exposed; "they would have sunk in the water of the Mediterranean or Atlantic" (*Narr.* p. 342). "A muscular man floated nearly breast high without the least exertion" (*ibid.* p. 325). One of the things remembered by the Maltese ser-

[a] When sounded by Lynch, its depth over the greater part of the area was 12 feet.

[b] He fixes the ford at ½ an hour north of the N. end of *Jebel Usdum*.

[c] Across this, too, there is a ford, described in some detail by Irby and Mangles (June 2). The water must have been unusually low, since they not only state that donkeys were able to cross, but also that the width did not exceed a mile, a matter in which the keen eye of a practical sailor is not likely to have been deceived. Lynch could find no trace of either ford, and his map shows the channel as fully two miles wide at its narrowest spot.

[d] Pronounced Mubarrik; the Embarreg of De Saulcy.

[e] Of the salt lakes in Northern Persia (*Urumiyeh*, etc.) nothing is yet known. Wagner's account is very vague. Those in Southern Russia have been fully investigated by Goebel (*Reisen*, etc., Dorpat, 1837). The heaviest water is that of the "Red Sea," near Perekop in the Crimea (solid contents 37.22 per cent.; sp. gr. 18.31). The others, including the Iaitonskoi or Elton, contain from 24 to 28 per cent. of solid matter in solution, and range in sp. gr. from 12.07 to 12.68.

Digitized by Google

vant of Mr. Costigan — who lost his life from exposure on the lake — was that the boat "floated a palm higher than before" (Stephens, *Incidents*, ch. xxxii.). Dr. Robinson "could never swim before, either in fresh or salt water," yet here he "could sit, stand, lie, or swim without difficulty" (*Bibl. Res.* i. 506).

34. So much for its buoyancy. Of its weight and inertia the American expedition had also practical experience. In the gale in which the party were caught on their first day on the lake, between the mouth of the Jordan and *Ain Feshkhah*, "it seemed as if the bows of the boats were encountering the sledge-hammers of the Titans." When, however, "the wind abated, the sea rapidly fell; the water, from its ponderous quality, settling as soon as the agitating cause had ceased to act" (*Narr.* pp. 268, 269). At ordinary times there is nothing remarkable in the action of the surface of the lake. Its waves rise and fall, and surf beats on the shore, just like the ocean. Nor is its color dissimilar to that of the sea. The water has a greasy feel, owing possibly to the saponification of the lime and other earthy salts with the perspiration of the skin, and this seems to have led some observers to attribute to it a greasy look. But such a look exists in imagination only. It is quite transparent, of an opalescent green tint, and is compared by Lynch (*Narr.* p. 337) to diluted absinthe. Lynch (*Narr.* p. 296) distinctly contradicts the assertion that it has any smell, noxious or not. So do the chemists [a] who have analyzed it.

35. One or two phenomena of the surface may be mentioned. Many of the old travellers, and some modern ones (as Osburn, *Pal. Past and Present*, p. 443, and Churton, *Land of the Morning*, p. 149), mention that the turbid, yellow stream of the Jordan is distinguishable for a long distance in the lake. Molyneux (p. 129) speaks of a "curious broad strip of white foam which appeared to lie in a straight line nearly N. and S. throughout the whole length of the sea . . . . some miles W. of the mouth of the Jordan" (comp. Lynch, *Narr.* pp. 279, 295). "It seemed to be constantly bubbling and in motion, like a stream that runs rapidly through still water; while nearly over this track during both nights we observed in the sky a white streak like a cloud extending also N. and S. and as far as the eye could reach." Lines of foam on the surface are mentioned by others: as Robinson (i. 503); Borrer (*Journey*, etc., p. 479); Lynch (*Narr.* pp. 288, 289). From *Ain Jidy* a current was observed by Mr. Clowes' party running steadily to the N. not far from the shore (comp. Lynch, *Narr.* p. 291). It is possibly an eddy caused by the influx of the Jordan. Both De Saulcy (*Narr.* January 8) and Robinson (i. 504) speak of spots and belts of water remaining smooth and calm while the rest of the surface was rippled, and presenting a strong resemblance to islands (comp. Lynch, p. 288; Irby, June 5). The haze or mist which perpetually broods over the water has been already mentioned. It is the result of the prodigious evaporation. Lynch continually mentions it. Irby (June 1) saw it in broad, transparent columns, like water-spouts, only very much larger. Extraordinary effects of mirage due to the unequal refraction produced by the heat and moisture are occasionally seen (Lynch, *Narr.* p. 320).

36. The remarkable weight of this water is due to the very large quantity of mineral salts which it holds in solution. The details of the various analyses are given on p. 2891 in a tabular form, accompanied by that of sea-water for comparison. From that of the U. S. expedition [b] it appears that each gallon of the water, weighing 12½ lbs., contains nearly 3½ lbs. (3.319) of matter in solution — an immense quantity when we recollect that sea-water, weighing 10½ lbs. per gallon, contains less than ¼ a lb. Of this 3½ lbs. nearly 1 lb. is common salt (chloride of sodium); about 2 lbs. chloride of magnesium, and less than ¼ a lb. chloride of calcium (or muriate of lime). The most unusual ingredient is bromide of magnesium, which exists in truly extraordinary quantity.[c] To its presence is due the therapeutic reputation enjoyed by the lake when its water was sent to Rome for wealthy invalids (Galen, in Reland, *Pal.* p. 242), or lepers flocked to its shores (Ant. Mart. § x.). Boussingault (*Ann. de Chimie*, 1856, xlviii. 168) remarks that if ever bromine should become an article of commerce, the Dead Sea will be the natural source for it. It is the magnesian compounds which impart so nauseous and bitter a flavor to the water. The quantity of common salt in solution is very large. Lynch found (*Narr.* p. 377) that while distilled water would dissolve 5-17ths of its weight of salt, and the water of the Atlantic 1-6th, the water of the Dead Sea was so nearly saturated as only to be able to take up 1-11th.

37. The sources of the components of the water may be named generally without difficulty. The lime and magnesia proceed from the dolomitic limestone of the surrounding mountains; from the gypsum which exists on the shores, nearly pure, in large quantities; and from the carbonate of lime and carbonate of magnesia found on the peninsula and elsewhere (Anderson, p. 185). The chloride of sodium is supplied from *Khashm Usdum*, and the copious brine springs on both shores. Balls of nearly pure sulphur (probably the deposit of some sulphurous stream) are found in the neighborhood of the lake, on the peninsula (Anderson, p. 187), on the western beach and the northwestern heights (*ibid.* pp. 176, 180, 160), and on the plain S. of Jericho (Rev. G. W. Bridges). Nitre may exist, but the specimens mentioned by Irby and others are more probably pieces of rock salt, since no trace of nitric acid has been found in the water or soil (Marchand, p. 370).[d] Manganese, iron, and alumina have been found on the peninsula (Anderson, pp. 185, 187), and the other constituents are the product of the numerous mineral springs which surround the lake,[e] and the washings of the aque-

---

[a] With the single exception of Moldenhauer, who when he first opened the specimen he analysed, found it to smell strongly of sulphur.

[b] This is chosen because the water was taken from a considerable depth in the centre of the lake, and therefore probably more fairly represents the average composition than the others.

[c] Adopting Marchand's analysis, it appears that the quantity of this salt in the Dead Sea is 126 times as great as in the ocean and 74 times as great as in the Kreuznach water, where its strength is considered remarkable.

[d] On the subject of the bitumen of the lake, the writer has nothing to add to what is said under PALESTINE, iii. 2207, and SLIME.

[e] The bromine has not yet been satisfactorily traced. The salt of *Khashm Usdum* has been analysed for its discovery (Rev. *l.* 1091), but in vain. Marchand ex-

No. 1. The figures in the table are the recalculations of Marchand (*Journal*, etc., p. 359) on the basis of the improved chemical science of his time. The original analysis is in *Naturwiss. Abhandl.*, Tübingen, i. (1827) 333.

No. 2. See *The Athenæum*, June 15, 1839.

No. 3. *Journal für prakt. Chemie*, etc., Leipzig, xlvii. (1849), 265.

No. 4. *Quarterly Journal of Chem. Soc.* ii. (1850) 93.

No 5. *Off. Report of U. S. Expedition*, 4to, p. 204.

No. 6. *Journal de Pharmacie et de Chimie*, Mars, 1852.

No. 7. Calculated by the writer from the proportionate table of salts given in Stewart's *Text and Khan*, p. 261.

No 8. Liebig and Wöhler's *Annalen der Chemie*, xlvii. (1856) 357; xlviii. (1856) 129–170.

No. 9. Regnault's *Cours Elém. de Chimie*, ii. 190.

The older analyses have not been reprinted, the methods employed having been imperfect and the results uncertain as compared with the more modern ones quoted. They are as follows: (1.) Macquer, Lavoisier, and Lesage (*Mém. de l'Acad. des Sciences*, 1778); (2.) Marcet (*Phil. Trans.*, 1807, p. 296, &c.); (3.) Klaproth (*Mag. der Gesells. naturfor. Freunde zu Berlin*, iii. 139); (4.) Gay Lussac (*Ann. de Chimie*, xi. (1819) 197); (5.) Hermbstädt (Schweigger's *Journal*, xxxiv. 168).

Want of space compels the omission of the analysis of Boussingault of water collected in spring, 1855 (*Ann. de Chimie*, xlviii. (1856) 129–170), which corresponds very closely with that of Gmelin (namely, sp. gr. 1.194; salts, 22.755 per cent.), as well as that of Commines (quoted in the same paper) of water collected in June, 1853, showing sp. gr. 1.196 and salts 18.26 per cent. Another analysis by Professor W. Gregory, giving 19.25 per cent. of salts, is quoted by Kitto (*Phys. Geogr.* p. 374).

The writer has been favored with specimens of water collected 13th November, 1855, by the Rev. G. W. Bridges, and 7th April, 1853, by Mr. R. D. Wilson. Both were taken from the north end. The former which had been carefully sealed up until examination, exhibited sp. gr. 1.1812, solid contents, 21.585 per cent.; the latter, sp. gr. 1.184, solid contents, 22.188; the boiling point in both cases 226° 4 Fahr. — a singular agreement, when it is remembered that one specimen was obtained at the end, the other at the beginning of summer. For this investigation, and much more valuable assistance in this part of his article, the writer is indebted to his friend, Dr. David Simpson Price, F. C. S.

The inferiority in the quantity of the salts in Nos. 2, 6, and 8 is very remarkable, and must be due to the fact (acknowledged in the two first) that the water was obtained during the rainy season, or from near the entrance of the Jordan or other fresh water. Nos. 7 and 8 were collected within two months of each other. The preceding winter, 1853–54, was one of the wettest and coldest remembered in Syria, and yet the earlier of the two analyses shows a largely preponderating quantity of salts. There is sufficient discrepancy in the whole of the results to render it desirable that a fresh set of analyses should be made, of water obtained from various defined spots and depths, at different times of the year, and investigated by the same analyst. The variable density of the water was observed as early as by Galen (see quotations in Reland, *Pal.* p. 242).

The best papers on this interesting subject are those of Gmelin, Marchand, Herapath, and Boussingault (see the references given above). The second of these contains an excellent review of former analyses, and most instructive observations on matters more or less connected with the subject.

The absence of iodine is remarkable. It was particularly searched for by both Herapath and Marchand, but without effect. In September, 1858, the writer obtained a large quantity of water from the island at the north end of the lake, which he reduced by boiling on the spot. The concentrated salts were afterwards tested by Dr. D. S. Price by his nitrate of potash test (see *Chem. Soc. Journal* for 1851), with the express view of detecting iodine, but not a trace could be discovered.

* Dr. Anderson (*Off. Rep.* p. 203) states that in water from "another part" of the lake he found as much as 4.8 per cent chlor. calcium.

sus deposits on the shores (see § 17), which are gradually restoring to the lake the salts they received from it ages back, when covered by its waters. The strength of these ingredients is heightened by the continual evaporation, which (as already stated) is sufficient to carry off the whole amount of the water supplied, leaving, of course, the salts in the lake; and which in the Dead Sea, as in every other lake which has affluents but no outlets, is gradually concentrating the mineral constituents of the water, as in the alembic of the chemist. When the water becomes saturated with salt, or even before, deposition will take place, and salt-beds be formed on the bottom of the lake.[a] If, then, at a future epoch a convulsion should take place which should upheave the bottom of the lake, a salt mountain would be formed similar to the *Khashm Usdum*; and this is not improbably the manner in which that singular mountain was formed. It appears to have been the bed of an ancient salt lake, which, during the convulsion which depressed the bed of the present lake, or some other remote change, was forced up to its present position. Thus this spot may have been from the earliest ages *the home of Dead Seas*; and the present lake but one of a numerous series.

38. It has been long supposed that no life whatever existed in the lake. But recent facts show that some inferior organizations can and do find a home even in these salt and acrid waters. The Cabinet d'Hist. Naturelle at Paris contains a fine specimen of a coral called *Stylophora pistillata*, which is stated to have been brought from the lake in 1837 by the Marq. de l'Escalopier, and has every appearance of having been a resident there, and not an ancient or foreign specimen.[b] Ehrenberg discovered 11 species of Polygaster, 2 of Polythalamiæ, and 5 of Phytolitharieæ, in mud and water brought home by Lepsius (*Monatsb. d. Kön. Pr. Akad.* June, 1849). The mud was taken from the north end of the lake, 1 hour N. W. of the Jordan, and far from the shore. Some of the specimens of Polygaster exhibited ovaries, and it is worthy of remark that all the species were found in the water of the Jordan also. The copious phosphorescence mentioned by Lynch (*Narr.* p. 280) is also a token of the existence of life in the waters. In a warm salt stream which rose at the foot of the *Jebel Usdum*, at a few yards only from the lake, Mr. Poole (Nov. 4) caught small fish (*Cyprinodon hammonis*) 1½ inch long. He is of opinion, though he did not ascertain the fact, that they are denizens of the lake. The *melanopsis* shells found by Poole (p. 67) at the fresh springs (? *Ain Terâbeh*), and which other travellers have brought from the shore at *Ain Jidy*, belong to the spring and not to the lake. Fucus and ulva are spoken of by some of the travellers, but nothing certain is known of them. The ducks seen diving by Poole must surely have been in search of some form of life, either animal or vegetable.

39. The statements of ancient travellers and geographers to the effect that no living creature could exist on the shores of the lake, or bird fly across its surface, are amply disproved by later travellers. It is one of the first things mentioned by Maundrell (March 30); and in our own days almost every traveller has noticed the fable to contradict it. The cane brakes of *Ain Feshkhah*, and the other springs on the margin of the lake, harbor snipe, partridges, ducks, nightingales, and other birds, as well as frogs; hawks, doves, and hares are found along the shore (Lynch, pp. 274, 277, 279, 287, 294, 371, 376); and the thickets of *Ain Jidy* contain "innumerable birds," among which were the lark, quail, and partridge, as well as birds of prey (*Bibl. Res.* i. 524). Lynch mentions the curious fact that "all the birds, and most of the insects and animals" which he saw on the western side were of a stone color, so as to be almost invisible on the rocks of the shore (*Narr.* pp. 279, 291, 294). Van de Velde (*S. & P.* ii. 119), Lynch (*Narr.* pp. 279, 287, 308), and Poole (Nov. 2, 3, and 7), even mention having seen ducks and other birds, single and in flocks, swimming and diving in the water.

40. Of the temperature of the water more observations are necessary before any inferences can be drawn. Lynch (*Report*, May 5) states that a stratum at 59° Fahr. is almost invariably found at 10 fathoms below the surface. Between *Wady Zârka* and *Ain Terâbeh* the temp. at surface was 76°, gradually decreasing to 62° at 1,044 ft. deep, with the exception just named (*Narr.* p. 374). At other times, and in the lagoon, the temp ranged from 82° to 90°, and from 5° to 10° below that of the air (*ibid.* pp. 310–320. Comp. Poole. Nov. 2). Dr. Stewart (*Tent and Khan*, p. 381) on 11th March, 1854, found the Jordan 60° Fahr. and the Dead Sea (N. end) 73°; the temperature of the air being 83° in the former case, and 78° in the latter.

41. Nor does there appear to be anything inimical to life in the atmosphere of the lake or its shores, except what naturally proceeds from the great heat of the climate. The *Ghawârineh* and *Rushaideh* Arabs, who inhabit the southern and

---

amined a specimen of soil from a "salt-plain called Sâph" ½ an hour W. of the lake, and found it to contain "an appreciable quantity of bromine" (*Journal für prakt. Chemie*, xlvii. 369, 370).

In addition to the obvious sources named in the text, there are doubtless others less visible. The remarkable variation in the proportions of the constituents of the water in the specimens obtained by different travellers (see the analyses) leads to the inference that in the bed of the lake there are masses of mineral matter, or mineral springs, which may modify the constitution of the water in their immediate neighborhood.

[a] This is already occurring, for Lynch's sounding-lead several times brought up cubical crystals of salt, sometimes with mud, sometimes alone (*Narr.* pp. 281, 297; comp. Molyneux, p. 127). The lake of Assal, on the E. coast of Africa, which has neither affluent nor outlet, is said to be concentrated to (or nearly to) the point of saturation (*Edin. N. Phil. Journ.* April, 1858, p. 259)

[b] This interesting fact is mentioned by Humboldt (*Views of Nat.* p. 270); but the writer is indebted to the kind courtesy of M. Valenciennes, keeper of the Cabinet, for confirmation of it. Humboldt gives the coral the name of *Porites elongata*, but the writer has the authority of Dr. P. Martin Duncan for saying that its true designation is *Stylophora pist.* Unfortunately nothing whatever is known of the place or manner of its discovery; and it is remarkable that after 26 years no second specimen should have been acquired. It is quite possible for the coral in question to grow under the conditions presented by the Dead Sea, and it is true that it abounds also in the Red Sea; but it will not be safe to draw any deduction from these facts till other specimens of it have been brought from the lake.

Digitized by Google

western sides and the peninsula, are described as a poor stunted race; but this is easily accounted for by the heat and relaxing nature of the climate, and by their meagre way of life, without inferring anything specially unwholesome in the exhalations of the lake. They do not appear to be more stunted or meagre than the natives of Jericho, or, if more, not more than would be due to the fact that they inhabit a spot 500 to 600 feet further below the surface of the ocean and more effectually inclosed. Considering the hard work which the American party accomplished in the tremendous heat (the thermometer on one occasion 106°, after sunset, *Narr.* p. 314), and that the sounding and working the boats necessarily brought them a great deal into actual contact with the water of the lake, their general good health is a proof that there is nothing pernicious in the proximity of the lake itself. A strong smell of sulphur pervades some parts of the western shore, proceeding from springs or streams impregnated with sulphuretted hydrogen (De Saulcy, *Narr.* i. 192; Van de Velde,[a] ii. 109; Beaufort, ii. 113). It accompanied the north wind which blew in the evenings (Lynch, pp. 292, 294). But this odor, though unpleasant, is not noxious, and in fact M. de Saulcy compares it to the baths of Barèges. The *Sabkah* has in summer a "strong marshy smell," from the partial desiccation of the ditches which convey the drainage of the salt springs and salt rocks into the lagoon; but this smell can hardly be stronger or more unhealthy than it is in the marshes above the lake *el-Huleh*, or in many other places where marshy ground exists under a sun of equal power; such, for example, as the marshes at *Iskanderún*, quoted by Mr. Porter (*Handbook*, p. 201 *a*).

42. Of the botany of the Dead Sea little or nothing can be said. Dr. Hooker, in his portion of the article PALESTINE, has spoken (iii. 2312, 2313) of the vegetation of the *Ghôr* in general, and of that of *Ain Jidy* and the N. W. shore of the lake in particular. Beyond these, the only parts of the lake which he explored, nothing accurate is known. A few plants are named by Seetzen as inhabiting the *Ghôr es-Safieh* and the peninsula. These, such as they are, have been already mentioned. In addition, the following are enumerated in the lists[b] which accompany the *Official Report* (4to) of Lynch, and the *Voyage* of De Saulcy (*Atlas des Planches*, etc.). At *Ain Jidy*, *Reseda lutea*, *Malva sylvestris*, *Glinus lotoides*, *Sedum reflexum*, *Sideritis syriaca*, *Eupatorium syriacum*, and *Withania somnifera*. On the southeastern and eastern shore of the lake, at the *Ghôr es-Safieh*, and on the peninsula, they name *Zilla myagroides*, *Zygophylla coccinea*, *Ruta bracteosa*, *Zizyphus spina Christi*, *Indigofera*, *Tamarix*, *Aizoon canariense*, *Salvadora persica*, *Iphoga fontanesii*, *Picridium tingitanum*, *Solanum villosum*, *Euphorbia peplus*, *Erythrostictus punctatus*, *Carex stenophylla*, and *Heliotropum albidum*. At *Ain Feshkhah*, *Ain Ghuweir*, *Ain Terábeh*, and other spots on the western shore, they name, in addition to those given by Dr. Hooker, *Sida asiatica*, *Knautia arvensis*, *Scabiosa pupposa*, *Echium italicum* and *creticum*, *Statice sinuata*, *Anastatica hierochuntina*, *Heliotropum rotundifolium*, and *Phragmites communis*. At other places not specified along the shores, *Kakile* and *Crambe maritima*, *Arenaria maritima*, *Chenopodium maritimum*, *Anabasis aphylla*, *Anemone coronaria*, *Ranunculus asiaticus*, *Fumaria micrantha*, *Sisymbrium irio*, *Cleone trinervia*, *Anagyris fœtida*, *Chrysanthemum coronaria*, *Rhagadiolus stellatus*, *Anagallis arvensis*, *Convolvulus siculus*, *Onosma syriaca*, *Lithospermum tenuiflorum*, *Hyoscyamus aureus*, *Euphorbia helioscopa*, *Iris caucasica*, *Morea sisyrinchium*, *Romulea bulbocodium* and *grandiflora*. The mouth of the *Wady Zuweirah* contains large quantities of oleanders.

43. Of the zoölogy of the shores, it is hardly too much to say that nothing is known. The birds and animals mentioned by Lynch and Robinson have been already named, but their accurate identification must await the visit of a traveller versed in natural history. On the question of the existence of life in the lake itself, the writer has already said all that occurs to him.

44. The appearance of the lake does not fulfill the idea conveyed by its popular name. "The Dead Sea," says a recent traveller,[c] "did not strike me with that sense of desolation and dreariness which I suppose it ought. I thought it a pretty, smiling lake — a nice ripple on its surface." Lord Nugent (*Lands*, etc., ii. ch. 5) expresses himself in similar terms. Schubert came to it from the Gulf of Akabeh, and he contrasts the "desert look" of that with the remarkable beauties of this, "the most glorious spot he had ever seen" (Ritter, p. 557). This was the view from its northern end. The same of the southern portion. "I expected a scene of unequaled horror," says Mr. Van de Velde (ii. 117), "instead of which I found a lake calm and glassy, blue and transparent, with an unclouded heaven, a smooth beach, and surrounded by mountains whose blue tints were of rare beauty. . . . . It bears a remarkable resemblance to Loch Awe." "It reminded me of the beautiful lake of Nice" (Paxton, in Kitto, *Phys. Geogr.* p 383). "Nothing of gloom and desolation," says another traveller, ". . . . . even the shore was richly studded with bright[d] yellow flowers growing to the edge of the rippling waters." Of the view from Masada, Miss Beaufort (ii. 110) thus speaks: "Some one says there is no beauty in it . . . . . but this view is beyond all others for the splendor of its savage and yet beautiful wildness." Seetzen, in a lengthened and unusually enthusiastic passage (ii. 364, 365) extols the beauties of the view from the delta at the mouth of the *Wady Mojib*, and the advantages of that situation for a permanent residence. These testimonies might be multiplied at pleasure, and they contrast strangely with the statements of some of the mediæval pilgrims (on whose accounts the ordinary conceptions of the lake are based), and even those of some modern travellers,[e] of the perpetual gloom which broods over the lake, and the thick vapors which roll

[a] M. Van de Velde's watch turned black with the sulphur in the air of the hills and valleys south of Hasmon. Miss Beaufort (at *Birket el-Khulil*) says it was "very strong, immensely more nauseous than that at the springs of Tadmor."

[b] Lynch's lists were drawn up by Dr. R. Eglesfield Griffith; and De Saulcy's by the Abbé Michon, who also himself collected the bulk of the specimens.

from its waters like the smoke of some infernal furnace, filling the whole neighborhood with a miasma which has destroyed all life within its reach.

45. The truth lies, as usual, somewhere between these two extremes. On the one hand the lake certainly is not a gloomy, deadly, smoking gulf. In this respect it does not at all fulfill the promise of its name.[a] The name is more suggestive of the dead solitude of the mountain tarns of Wales or Scotland, the perpetual twilight and undisturbed lingering decay of the Great Dismal Swamp, or the reeking miasma of the Putrid Sea of the Crimea. Death can never be associated with the wonderful brightness of the sun of Syria, with the cheerful reflection of the calm bosom of the lake at some periods of the day, or with the regular alternation of the breezes which ruffle its surface at others. At sunrise and sunset the scene must be astonishingly beautiful. Every one who has been in the West of Scotland knows what extraordinary pictures are sometimes seen mirrored in the sea-water lochs when they lie unruffled in the calm of early morning or of sunset. The reflections from the bosom of the Dead Sea are said to surpass those, as far as the hues of the mountains which encircle it, when lit up by the gorgeous rising and setting suns of Syria, surpass in brilliancy and richness those of the hills around Loch Fyne and Loch Goyle. One such aspect may be seen — and it is said by competent judges to be no exaggerated representation — in "The Scapegoat" of Mr. Holman Hunt, which is a view of the Moab mountains at sunset, painted from the foot of *Jebel Usdum*, looking across the lower part of the lagoon.[b] But on the other hand, with all the brilliancy of its illumination, its frequent beauty of coloring, the fantastic grandeur of its inclosing mountains, and the tranquil charm afforded by the reflection of that unequaled sky on the no less unequaled mirror of the surface — with all these there is something in the prevalent sterility and the dry, burnt look of the shores, the overpowering heat, the occasional smell of sulphur the dreary salt marsh at the southern end, and the fringe of dead driftwood round the margin, which must go far to excuse the title which so many ages have attached to the lake, and which we may be sure it will never lose.

46. It does not appear probable that the condition or aspect of the lake in Biblical times was materially different from what it is at present. Other parts of Syria may have deteriorated in climate and appearance owing to the destruction of the wood which once covered them, but there are no traces either of the ancient existence of wood in the neighborhood of the lake, or of anything which would account for its destruction, supposing it to have existed. A few spots, such as *Ain Jidy*, the mouth of the *Wady Zuweirah*, and that of the *Wady ed Dra'a*, were more cultivated, and consequently more populous than they are under the discouraging influences of Mohammedanism. But such attempts must always have been partial, confined to the immediate neighborhood of the fresh springs and to a certain degree of elevation, and ceasing directly irrigation was neglected. In fact the climate of the shores of the lake is too sultry and trying to allow of any considerable amount of civilized occupation being conducted there. Nothing will grow without irrigation, and artificial irrigation is too laborious for such a situation. The plain of Jericho, we know, was cultivated like a garden, but the plain of Jericho is very nearly on a level with the spring of *Ain Jidy*, some 600 feet above the *Ghôr el-Lisân* the *Ghôr es-Safieh*, or other cultivable portions of the beach of the Dead Sea. Of course, as far as the capabilities of the ground are concerned, provided there is plenty of water, the hotter the climate the better, and it is not too much to say that, if some system of irrigation could be carried out and maintained, the plain of Jericho, and, still more, the shores of the lake (such as the peninsula and the southern plain), might be the most productive spots in the world. But this is not possible, and the difficulty of communication with the external world would alone be (as it must always have been) a serious bar to any great agricultural efforts in this district.

When Machærus and Callirrhoë were inhabited (if indeed the former was ever more than a fortress, and the latter a bathing establishment occasionally resorted to), and when the plain of Jericho was occupied with the crowded population necessary for the cultivation of its balsam-gardens, vineyards, sugar-plantations, and palm-groves, there may have been a little more life on the shores. But this can never have materially affected the lake. The track along the western shore and over *Ain Jidy* was then, as now, used for secret marauding expeditions, not for peaceable or commercial traffic. What transport there may have been between Idumæa and Jericho came by some other channel. A doubtful passage in Josephus,[c] and a reference by Edrisi (ed. Jaubert, in Ritter, *Jordan*, p. 700) to an occasional venture of the people of "Zara and Dara" in the 12th century, are all the allusions known to exist to the navigation of the lake, until Englishmen and Americans[d] launched their boats on it within the last twenty years for purposes of scientific investigation. The temptation to the dwellers in the environs must always have been to ascend to the

works (Amst. 1711); Sir R. Guylforde (A. D. 1506); Schwarz (A. D. 1845). It is, however, surprising how free the best of the old travellers are from such fables. The descriptions of the Bordeaux Pilgrim, of Arculfus, Maundeville, Thietmar, Doubdan, Maundrell, barring a little exaggeration of the buoyancy of the water and of its repulsion to life, are sober, and, as far as they go, accurate. It is to be lamented that the popular conception of the lake was not founded on these accounts, instead of the sensation-descriptions of others at second hand.

a "It is not gloom but desolation that is its prevailing characteristic," is the remark of Prof. Stanley, in his excellent chapter on the lake in *Sinai and Palestine* (ch. vii.). "So mournful a landscape, for one having real beauty, I have never seen" (Miss Martineau, *Eastern Life*, pt iii. ch. 4).

b The remarks in the text refer to the mountains which form the background to this remarkable painting The title of the picture and the accidents of the foreground give the key to the sentiment which it conveys, which is certainly that of loneliness and death. But the mountains would form an appropriate background to a scene of a very different description.

c Quoted by Reland (*Pal.* p. 252) as "liber v. de bell. cap. 3." But this — if it can be verified, which the writer has not yet succeeded in doing — only shows that the Romans on one occasion, sooner than let their fugitives escape them, got some boats over and put them on the lake. It does not indicate any continuous navigation.

nearer air of the heights, rather than descend to the sultry climate of the shores.

47. The connection between this singular lake and the Biblical history is very slight. In the topographical records of the Pentateuch and the book of Joshua [a] it forms one among the landmarks of the boundaries of the whole country, as well as of the inferior divisions of Judah and Benjamin; and attention has been already drawn to the minute accuracy with which, according to the frequent custom of these remarkable records, one of the salient features of the lake is singled out for mention. As a landmark it is once named in what appears to be a quotation from a lost work of the prophet Jonah (2 K. xiv. 25), itself apparently a reminiscence of the old Mosaic statement (Num. xxxiv. 8, 12). Besides this the name occurs once or twice in the imagery of the Prophets.[b] In the New Testament there is not even an allusion to it. There is, however, one passage in which the "Salt Sea" is mentioned in a different manner to any of those already quoted, namely, as having been in the time of Abraham the Vale of Siddim (Gen. xiv. 3). The narrative in which this occurs is now generally acknowledged to be one of the most ancient of those venerable documents from which the early part of the book of Genesis was compiled. But a careful examination shows that it contains a number of explanatory statements which cannot, from the very nature of the case, have come from the pen of its original author. The sentences, "Bela which is Zoar" [c] (2 and 8); "En-Mishpat which is Kadesh" (7); "The Valley of Shaveh which is the King's Valley" (17); and the one in question, "the Vale of Siddim which is the Salt Sea" (3), are evidently explanations added by a later hand at a time when the ancient names had become obsolete. These remarks (or, as they may be termed, "annotations") stand on a perfectly different footing to the words of the original record which they are intended to elucidate, and whose antiquity they enhance. *It* bears every mark of being contemporary with the events it narrates. *They* merely embody the opinion of a later person, and must stand or fall by their own merits.

48. Now the evidence of the spot is sufficient to show that no material change has taken place in the upper and deeper portion of the lake for a period very long anterior to the time of Abraham. In the lower portion — the lagoon and the plain below it — if any change has occurred, it appears to have been rather one of reclamation than of submersion — the gradual silting up of the district by the torrents which discharge their contents into it (see § 23). We have seen that, owing to the gentle slope of the plain, temporary fluctuations in the level of the lake would affect this portion very materially; and it is quite allowable to believe that a few wet winters followed by cold summers, would raise the level of the lake sufficiently to lay the whole of the district south of the lagoon under water, and convert it for the time into a part of the "Salt Sea." A rise of 20 feet beyond the ordinary high-water point would probably do this, and it would take some years to bring things back to their former condition. Such an exceptional state of things the writer of the words in Gen. xiv. may have witnessed and placed on record.

49. This is merely stated as a possible explanation; and it assumes the Vale of Siddim to have been the plain at the south end of the lake, for which there is no evidence. But it seems to the writer more natural to believe that the author of this note on a document which even in his time was probably of great antiquity, believed that the present lake covered a district which in historic times had been permanently habitable dry land. Such was the implicit belief of the whole modern world — with the exception perhaps of Reland [d] — till within less than half a century. Even so lately as 1830 the formation of the Dead Sea was described by a divine of our Church, remarkable alike for learning and discernment, in the following terms: —

"The Valley of the Jordan, in which the cities of Sodom, Gomorrah, Adma, and Tseboim, were situated, was rich and highly cultivated. It is most probable that the river then flowed in a deep and uninterrupted channel down a regular descent, and discharged itself into the eastern gulf of the Red Sea. The cities stood on a soil broken and undermined with veins of bitumen and sulphur. These inflammable substances set on fire by lightning caused a terrible convulsion; the watercourses — both the river and the canals by which the land was extensively irrigated — burst their banks; the cities, the walls of which were perhaps built from the combustible materials of the soil, were entirely swallowed up by the fiery inundation, and the whole valley, which had been compared to Paradise and the well-watered corn-fields of the Nile, became a dead and fetid lake" (Milman, *Hist. of the Jews*, 2d ed., i. 15).

In similar language does the usually cautious Dr. Robinson express himself, writing on the spot, before the researches of his countrymen had revealed the depth and nature of the chasm, and the consequent remote date of the formation of the lake: "Shattered mountains and the deep chasms of the rent earth are here tokens of the wrath of God, and of his vengeance upon the guilty inhabitants of the plain" (*Bibl. Res.* i. 525).[e]

Now if these explanations — so entirely groundless, when it is recollected that the identity of the Vale of Siddim with the Plain of Jordan, and the submersion of the cities, find no warrant whatever in Scripture — are promulgated by persons of learning and experience in the 19th century after Christ, surely it need occasion no surprise to find a similar view put forward at the time when the contradictions involved in the statement that the Salt Sea

---

[a] See the quotations at the head of the article.

[b] One of these (Ps. xlvii.) is remarkable for the manner in which the characteristics of the lake and its environs — the dry ravines of the western mountains; the noxious waters; the want of fish; the southern ugnon—are brought out. See Prof. Stanley's notes *S. & P.* p. 294)

[c] וְהִיא צֹעַר: such is the formula adopted in each of the instances quoted. It is the same which is used in the precisely parallel case, "Hazazon-Tamar, which is En-gedi" (2 Chr. xx. 2). In other cases, where the remark seems to have proceeded from the original writer, another form is used — אֲשֶׁר — as in "El-Paran, which is by the Wilderness" (6), "Hobah, which is on the left hand of Damascus" (15).

[d] See his chapter *De lacu Asphaltite* in *Palaestina*, lib. i. cap. xxxviii. — truly admirable, considering the scanty materials at his disposal. He seems to have been the first to disprove the idea that the cities of the plain were submerged.

[e] Even Lieut. Lynch can pause between the oaths of the lead to apostrophize the "unhallowed sea . . . the record of God's wrath," or to notice the "sepulchral light cast around by the phosphorescence, etc., etc. (*Narr.* pp. 294, 288, 280).

had once been the Vale of Siddim could not have presented themselves to the ancient commentator who added that explanatory note to the original record of Gen. xiv. At the same time it must not be overlooked that the passage in question is the only one in the whole Bible — Old Testament, Apocrypha, or New Testament — to countenance the notion that the cities of the plain were submerged; a notion which the present writer has endeavored elsewhere [a] to show does not date earlier than the Christian era.

50. The writer has there also attempted to prove that the belief which prompted the statements just quoted from modern writers, namely, that the Dead Sea was formed by the catastrophe which overthrew the "Cities of the Plain," is a mere assumption. It is not only unsupported by Scripture, but is directly in the teeth of the evidence of the ground itself. Of the situation of those cities we only know that, being in the "Plain of the Jordan," they must have been to the north of the lake. Of the catastrophe which destroyed them, we only know that it is described as a shower of ignited sulphur descending from the skies. Its date is uncertain, but we shall be safe in placing it within the limit of 2,000 years before Christ. Now, how the chasm in which the Jordan and its lakes were contained was produced out of the limestone block which forms the main body of Syria, we are not at present sufficiently informed to know. It may have been the effect of a sudden fissure of dislocation,[b] or of gradual erosion,[c] or of a combination of both. But there can be no doubt that, however the operation was performed, it was of far older date than the time of Abraham, or any other historic event.[d] And not only this, but the details of the geology, so far as we can at present discern them, all point in a direction opposite to the popular hypothesis. That hypothesis is to the effect that the valley was once dry, and at a certain historic period was covered with water and converted into a lake. The evidence of the spot goes to show that the very reverse was the case; the plateaus and terraces traceable round its sides, the aqueous deposits of the peninsula and the western and southern shores, saturated with the salts of their ancient immersion, speak of a depth at one time far greater than it is at present, and of a gradual subsidence, until the present level (the balance, as already explained, between supply and evaporation) was reached.

Beyond these and similar tokens of the action of water, there are no marks of any geological action nearly so recent as the date of Abraham. Inexperienced and enthusiastic travellers have reported craters, lava, pumice, scoriæ, as marks of modern volcanic action, at every step. But these things are not so easily recognized by inexperienced observers, nor, if seen, is the deduction from them so obvious. The very few competent geologists who have visited the spot — both those who have published their observations (as Dr. Anderson, geologist to the American expedition [e]), and those who have not, concur in stating that no certain indications exist in or about the lake, of volcanic action within the historical or human period, no volcanic craters, and no *coulées* of lava traceable to any vent. The igneous rocks described as lava are more probably basalt of great antiquity; the bitumen of the lake has nothing necessarily to do with volcanic action. The scorched, calcined look of the rocks in the immediate neighborhood, of which so many travellers have spoken [f] as an evident token of the conflagration of the cities, is due to natural causes — to the gradual action of the atmosphere on the constituents of the stone.

The destruction of Sodom and Gomorrah may have been by volcanic action, but it may be safely asserted that no traces of it have yet been discovered, and that, whatever it was, it can have had no connection with that far vaster and far more ancient event which opened the great valley of the Jordan and the Dead Sea, and at some subsequent time cut it off from communication with the Red Sea by forcing up between them the tract of the *Wady Arabah*.[g] G.

* The theory advanced in the preceding article,

---

[a] Under the heads of SODOM, SIDDIM, ZOAR.

[b] See the remarks of Sir R. Murchison before the B. Association (in *Athenæum*, 29 Sept. 1849)

[c] This is the opinion of Dr. Anderson.

[d] Dr Anderson is compelled to infer from the features of the eastern shore that the *Ghôr* existed "before the tertiary age" (p. 189; and see his interesting remarks on pp. 190, 192).

[e] This Report is the only document which purports to give a scientific account of the geology of the Dead Sea. The author was formerly Professor at Columbia College, U. S. It forms a part of his *Geological Reconnaissance* of those portions of the Holy Land which were visited by the American expedition. The writer is not qualified to pass judgment on its scientific merits, but he can speak to its fullness and clearness, and to the modesty with which the author submits his conclusions, and which contrasts very favorably with the loose bombast in which the chief of the expedition is too prone to indulge. Its usefulness would be greatly increased by the addition of sections, showing the order of succession of the strata, and diagrams of some of the more remarkable phenomena.

[f] An instance of the loose manner in which these expressions are used is found in Lynch's *Narrative* (p. 383), where he characterizes as "scathed by fire" a rock near the mouth of the Kidron, which in the same sentence he states was in rapid progress of disintegration, with a "sloping hill of half its own height" at its base formed by the dust of its daily decay.

[g] There is a slight correspondence, though probably but a superficial one, between the Dead Sea at the apex of the Gulf of Akabeh and the Bitter Lakes at the apex of the Gulf of Suez. Each was probably at one time a portion of the sea, and each has been cut off by some change in the elevation of the land, and left to concentrate its waters at a distance from the parent branch of the ocean. The change in the latter case was probably far more recent than in the former, and may even have occurred since the Exodus.

The parallel between the Euxine and the Dead Sea has been already spoken of. If by some geological change the strait of the Bosphorus should ever be closed, and the outlet thus stopped, the parallel would in some respects be very close — the Danube and the Dnieper would correspond to the Jordan and the *Zürka:* the Sea of Azov with the Sivash would answer to the lagoon and the *Sabkah* — the river Don to the *Wady el-Jeib*. The process of adjustment between supply and evaporation would at once commence, and from the day the straits were closed the saltness of the water would begin to concentrate. If, further, the evaporation should be greater than the present supply, the water would sink and sink until the great Euxine became a little lake in a deep hollow far below the level of the Mediterranean; and the parallel would then be complete.

The likeness between the Jordan with its lakes and the river of Utah has been so often alluded to, that I need not be more than mentioned here. See Dr. Bale in *Edin. N. Phil. Journal*, April, 1855; Burton's *City of the Saints*, p. 394.

Digitized by Google

that the cities of the plain "must have been to the north of the lake," the reader will find critically examined in the articles SODOM and ZOAR (Amer. ed.). We propose to review here the theory advanced in the preceding article, and in the articles SODOM and SIDDIM, THE VALE OF, respecting *the submergence of the plain*. The question of the submergence of the site of the cities is distinct from that of the submergence of a portion of the valley. It is only on the latter point that we claim any clear historical data; the former is a matter of inference merely.

The evidences which bear on the question of submergence are mainly of two classes, the historical and the geological. The latter we pass over, concurring with Mr. Grove in the conviction that the data as yet ascertained would not furnish the most scientific observer with the basis of a solid and adequate theory. It is sufficient that no points have thus far been established by geological exploration which conflict with the historical testimony as we understand it.

The earliest historical evidence is contained in the oldest record extant: "All these were joined together in the Vale of Siddim, which is the Salt Sea" (Gen. xiv. 3). The writer here asserts that what was the Vale of Siddim at the time of the battle described, was at the time of his writing the Salt Sea. If we are to accept the unity of the authorship of the book, it was so when the original record was made. If we may regard the book as a compilation, and the last clause of this verse as the gloss of the compiler, it was so when the compilation was made. Both theories leave us the ancient, indisputable, Biblical testimony to the identity, in whole or in part, of the site of the Vale of Siddim and of that of the Salt Sea. This interpretation is sustained by Gesenius, who defines the Vale of Siddim (valley of the plains) as the plain "now occupied by the Dead Sea" (*Lex.* שִׂדִּים).

Mr. Grove adopts the second of the theories just named, but he places on this passage the same interpretation that we do. He rejects the translation of those who would construe the latter clause of the verse, "which is near, at, or by the Salt Sea," and insists on the other interpretation. He says: "The original of the passage will not bear even this slight accommodation, and it is evident that in the mind of the author of the words, no less than of the learned and eloquent divine and historian of our own time already alluded to, the Salt Sea covers the actual space formerly occupied by the Vale of Siddim" (SIDDIM, THE VALE OF). This is decisive: and thus understanding the Scriptural testimony, which pointedly contradicts his theory, how does he dispose of it? His explanation: given above is concisely repeated in the article just quoted, as follows: "The words which more especially bear on the subject of this article (v. 3) do not form part of the original document. That venerable record has — with a care which shows how greatly it was valued at a very early date — been annotated throughout by a later, though still very ancient chronicler, who has added what in his day were believed to be the equivalents for names of places that had become obsolete. Bela is explained to be Zoar; En-Mishpat to be Kadesh; the Emek-Shaveh to be the Valley of the King; the Emek has-Siddim to be the Salt Sea, that is, in modern phraseology, the Dead Sea. And when we remember how persistently the notion has been entertained for the last eighteen centuries that the Dead Sea covers a district which before its submersion was not only the Valley of Siddim but also the Plain of the Jordan, and what an elaborate account of the catastrophe of its submersion has been constructed even very recently by one of the most able scholars of our day, we can hardly be surprised that a chronicler in an age far less able to interpret natural phenomena, and at the same time long subsequent to the date of the actual event, should have shared in the belief." [SIDDIM, THE VALE OF.]

This reasoning from the modern to the ancient, from Dean Milman to Moses, or the ancient chronicler who wrote these words, is very unsatisfactory to those who believe in the integrity of the sacred canon.[a] Any theory which may be held respecting the authorship of the book is of no consequence in this matter, if we have here an unblemished copy of the Divine revelation. Any theory which gives us this, leaves this testimony of equal value to us. If the authenticity of the record is conceded in this passage, but it is alleged that the later, yet very ancient chronicler, who compiled or annotated the original document, and gave it to us in its present shape, was in point of fact mistaken, we consider the surmise wholly unwarranted and unwarrantable, and believe the writer to have had far better data for his statement than any modern critic can possibly have for correcting him. The reason assigned for the supposed error, moreover, is irrelevant. The submergence of the Vale of Siddim, the conversion of its site to the waters of the Dead Sea, is simply a question of historic fact, the statement of which does not require a chronicler who is "able to interpret natural phenomena." If, in the above extracts and in the remark in the present article that these "annotations" "must stand or fall by their own merits," the writer means to impeach the inspired record, or fasten the suspicion of corruption upon it, it is an uncalled-for disparagement of the Received Text.

The other glosses or annotations, as Mr. Grove claims them to be, he does not hesitate to accept as valid historic testimony. He says of Zoar, that "its original name was Bela," of Bethlehem, that "its earliest name was Ephrath," and of Hazezon-Tamar, that it "afterwards became En-gedi," on exactly the authority, and no other, which he rejects as inconclusive here. "Bela, which is Zoar;" "the Vale of Siddim, which is the Salt Sea;" "En-Mishpat, which is Kadesh;" "the valley of Shaveh, which is the king's dale;" "Ephrath, which is Bethlehem;" "Hazezon-Tamar, which is En-gedi;" annotations or glosses like these, if they are such (the first four occurring in the same narrative), are equally reliable or equally worthless. No law of interpretation will permit us to accept one and reject another on the ground that the writer was not a naturalist. Such a claim, if it were conceded, would establish the fact that prior to the composition or completion of our book of

[a] "The clause is found in all the ancient MSS. and versions, and in the Targum of Onkelos. Its genuineness rests on the very same basis as the other particulars of the narrative. We have the same evidence of its Mosaic authorship as we have of any other part of the book" (Porter, *Kitto's Bibl. Cyc.* iii 801)

Genesis, the belief was current that the chasm now filled by the waters of the Dead Sea had been, in part at least, a valley or plain; and then the question would remain: Whence could such a belief have originated? In attempting to withdraw from the view which he opposes the support of the ancient record, the writer is obliged to grant it the weight of a tradition older than the chronicler.

The sacred narrative names a single physical feature of the Vale of Siddim, namely, that it abounded with "slime-pits" (Gen. xiv. 10). These pits were wells of asphaltum, or bitumen, probably of various dimensions, "sufficient," either from their number, or size, or both, "materially to affect the issue of the battle." These asphaltic wells have disappeared; but bitumen is still found around the southern section of the sea, and it rises to the surface of the water in large quantities, in that portion of it, when dislodged by an earthquake (*Bibl. Res.* ii. 229); and the supply was formerly more copious than now. We have modern testimony to this effect, and we have that of three eminent ancient historians in the century before Christ, and the following: Diodorus Siculus, Josephus, and Tacitus, who represent the asphaltum as rising to the surface of the water in black and bulky masses. The theory that the Vale of Siddim is covered by the southern part of the sea reconciles the ancient record and the late phenomena. It sustains the statement that it was full of bituminous wells; it accounts for their disappearance, and it explains the occasional spectacle since, down to the present time, of large quantities of asphaltum on the surface of the water. Thus far we have a consistent, confirmed, uncontradicted testimony.

As we pass from the simple affirmation of the sacred writer, with the confirmation, in subsequent ages, of the only physical feature of the territory which he names, we leave behind us, of course, all direct testimony. The only remaining evidence, exclusively historical, is of that secondary and confirmatory kind which may be drawn from the investigations and impressions of later writers most competent to form a judgment, who have examined the subject, or who, as historians, have recorded the prevalent tradition, or the most intelligent opinion. The testimony of these writers the reader will find quoted in an article by the present writer on "The Site of Sodom," *Bibl. Sacra* (1868), xxv. 121–126.

Whether the flame which kindled on Sodom and the guilty cities and consumed them, the inflammable bitumen entering largely into the composition of their walls, devoured also the adjacent Vale of Siddim, whose soil, abounding with asphalt-wells, would under a storm of fire be a magazine of quenchless fuel, and thus burned out a chasm, which in whole or in part, now forms the lagoon; or whether some volcanic convulsion, an agency of which that region has been the known theatre, upheaved the combustible strata, exposing them to the action of fire, and thus secured the result, each supposition confirming the sacred narrative that as Abraham, from his high point of observation surveying the terrible destruction, "looked toward Sodom and Gomorrah, and toward all the land of the plain, and behold, and lo, the smoke of the country went up as the smoke of a furnace;" or whether, in connection with the destruction of the cities by fire, some earthquake-throe, such as that stupendous crevasse has more than once felt, sunk a portion of the soil out of sight, leaving the stagnant waters above as its memorial, cannot now be known. The agency which destroyed the cities was plainly igneous. The agency which converted the Vale of Siddim into a sheet of water is not stated. Any theory is admissible which consistently explains the two facts.

The submergence of the Vale of Siddim and the submergence of the cities of the plain, or of their site, are distinct questions, because the cities were not in this valley. On this point we concur with the judicious Reland: —

"The inspired writer does not say that the five cities, Sodom and the rest, were situated in the Valley of Siddim; on the contrary, the text (Gen. xiv. 3) leads to an opposite conclusion: since the kings of these five cities, after having collected their armies, joined together towards the Valley of Siddim. Supposing the translation to be *in* the valley, the meaning is still the same. The probability is, then, that the Valley of Siddim was quite distinct from the country in which the five cities were situated" (*Palæstina*, i. 181).

We see not how any other opinion than this could have obtained currency among scholars. The vale and the territory of the cities, though distinct, were evidently contiguous and may have shared, and to some extent probably did share a common catastrophe. The former may have been consumed with the latter, or the latter may have been depressed with the former. Neither the exact location nor extent of the Vale of Siddim can be ascertained. If it covered the whole breadth of the southern part of the sea, the plain which borders on the south, ten miles long by six broad, was ample enough for the cities; but in all probability it was confined to a part of its width, leaving the rest for fruitful fields and walled towns, the sites of which are entombed by the sea. The vale was the battle-field between Chedorlaomer and his allies, and the confederate kings of the cities; and as the invaders apparently menaced the cities from the present point of *Ain Jidy*, and the kings went forth to meet them in this vale, it must have lain west or north of the cities.

If the rich vegetation of the well-watered plain of the Jordan, on whose tropical luxuriance Lot looked down from the highlands of Judæa, extended southward skirting fresh water along the site of a part of the present basin of the Salt Sea, and embosoming the Vale of Siddim with the cities which bordered it, the allusions in the Scripture narrative are all adjusted and explained. This theory encounters no historic difficulty, nor any insuperable scientific difficulty, so far as is known. If there be a fatal objection to it, it lies buried in that vast, mysterious fissure, and awaits the resurrection of some future explorer. Should geology ever compel the substitution of a different theory, we may expect from some quarter the additional light which will enable us to reconcile it with the inspired record. In the meantime we rest on this hypothesis. [Siddim, the Vale of, Amer. ed.]

**SEAL.**[a] The importance attached to seals in

---

[a] 1. חוֹתָם (Arab. خَاتَم): σφραγίς, ἀναστρόφιον, γλυφα: *annulus* (Gen. xxxviii. 25). חוֹתֶמֶת *f.* δακτύλιος: *annulus*; from חָתַם, "close" or "seal

the East is so great that without one no document is regarded as authentic (Layard, *Nin. & Bab.* p. 208; Chardin, *Voy.* v. 454). The use of some method of sealing is obviously, therefore, of remote antiquity. Among such methods used in Egypt at a very early period were engraved stones, pierced through their length and hung by a string or chain from the arm or neck, or set in rings for the finger. The most ancient form used for this purpose was the scarabæus, formed of precious or common stone, or even of blue pottery or porcelain, on the flat side of which the inscription or device was engraved. Cylinders of stone or pottery bearing devices were also used as signets. One in the Alnwick Museum bears the date of Osirtasen I., or between 2000 and 3000 B. C. Besides finger-rings, the Egyptians, and also the Assyrians and Babylonians, made use of cylinders of precious stone or terra-cotta, which were probably set in a frame and rolled over the document which was to be sealed. The document, especially among the two latter nations, was itself often made of baked clay, sealed while it was wet and burnt afterwards. But in many cases the seal consisted of a lump of clay, impressed with the seal and attached to the document, whether of papyrus or other material, by strings. These clay lumps often bear the impress of the finger, and also the remains of the strings by which they had been fastened. One such found at Nimroud was the seal of Sabaco king of Egypt, B. C. 711, and another is believed by Mr. Layard to have been the seal of Sennacherib, of nearly the same date (Birch, *Hist. of Pottery*, i. 101, 118; Wilkinson, *Anc. Egypt.* ii. 341, 364; Layard, *Nin. & Bab.* pp. 154–160). In a somewhat similar manner doors of tombs or other places intended to be closed were sealed with lumps of clay. The custom prevalent among the Babylonians of carrying seals is mentioned by Herodotus, i. 195, who also notices the seals on tombs, ii. 121; Wilkinson, i. 15, ii. 364; Matt. xxvii. 66; Dan. vi. 17. The use of clay in sealing is noticed in the book of Job (xxxviii. 14), and the signet-ring as an ordinary part of a man's equipment in the case of Judah (Gen. xxxviii. 18), who probably, like many modern Arabs, wore it suspended by a string[a] from his neck or arm. (See Cant. viii. 6; Ges. pp. 538, 1140; Robinson, i. 36; Niebuhr, *Descr. de l'Ar.* p. 90; Chardin, *l. c* Olearius, *Trav.* p. 317; Knobel on Gen. xxxviii. in *Exeg. Hdb.*) The ring or the seal as an emblem of authority both in Egypt, in Persia, and elsewhere, is mentioned in the cases of Pharaoh with Joseph, Gen. xli. 42; of Ahab, 1 K. xxi. 8; of Ahasuerus, Esth. iii. 10, 12, viii. 2; of Darius, Dan. *l. c.*, also 1 Macc. vi. 15; Joseph. *Ant.* xx. 2, § 2; Herod. iii. 128; Curtius, iii. 6, 7, x. 5, 4; Sandys, *Trav.* p. 62; Chardin, ii. 291, v. 451, 462; and as an evidence of a covenant in Jer. xxxii. 10, 44; Neh. ix. 38, x. 1; Hag. ii. 23. Its general importance is denoted by the metaphorical use of the word (Rev. v. 1, ix. 4). Rings with seals are mentioned in the Mishna (*Shabb.* vi. 3), and earth or clay[b] as used for seals of bags (viii. 5). Seals of four sorts used in the Temple, as well as special guardians of them, are mentioned in *Shekal.* v. 1.

Among modern Orientals the size and place of the seal vary according to the importance both of the sender of a letter and of the person to whom it is sent. In sealing, the seal itself, not the paper, is smeared with the sealing-substance. Thus illiterate persons sometimes use the object nearest a hand — their own finger, or a stick notched for the purpose — and, daubing it with ink, smear the paper therewith (Chardin, v. 454, ix. 347; Arvieux, *Trav.* p. 161; Rauwolff, *Trav.* in Ray, ii. 61; Niebuhr, *l. c.*; Robinson, i. 36). Engraved signets were in use among the Hebrews in early times, as is evident in the description of the high-priest's breastplate (Ex. xxviii. 11, 36, xxxix. 6), and the work of the engraver as a distinct occupation is mentioned in Ecclus. xxxviii. 27. [CLAY, i. 471.]

* SEALED FOUNTAIN. [FOUNTAIN.]

* SEALS' SKINS. [BADGERS' SKINS.]

**SE'BA** (סְבָא [see below]: Σαβά, Σοήθ; [Vat. in 1 Chr. Σαβατ:] *Suba*: gent. n. pl. סְבָאִים: [Is. xlv. 14,] Σαβαείμ, [FA.[1] Σαβαειν, Alex. Σεβωειμ:] *Sabaim*: A. V. incorrectly rendered SABEANS, a name there given with more probability to the שְׁבָאִים, Joel iii. 8 [Heb. text, iv. 8]; and to Sheba, used for the people, Job i. 15; but it would have been better had the original orthography been followed in both cases by such renderings as "people of Seba," "people of Sheba," where the gent. nouns occur). Seba heads the list of the sons of Cush. If Seba be of Hebrew or cognate origin, it may be connected with the root סָבָא, "he or it drank, drank to excess," which would not be inappropriate to a nation seated, as we shall see was that of Seba, in a well-watered country; but the comparison of two other similar names of Cushites, Sabtah (סַבְתָּה) and Sabtechah (סַבְתְּכָא), does not favor this supposition, as they were probably seated in Arabia, like the Cushite Sheba (שְׁבָא), which is not remote from Seba (סְבָא), the two letters being not unfrequently interchanged. Gesenius has suggested the Ethiopic ሰብኣይ: *sábbay*, "a man," as the origin of both Seba and Sheba, but this seems unlikely. The ancient Egyptian names of nations or tribes, possibly countries, of Ethiopia, probably mainly, if not wholly, of Nigritian race, SAHABA, SABARA (Brugsch, *Geogr. Inschr.* ii. 9, tav. xii. K. l.), are more to the point; and it is needless to cite later geographical names of cities, though that of one of the upper confluents of the Nile, Astasobas, compared with Astaboras, and Astapus, seems worthy of notice, as perhaps indicating the name of a nation. The proper names of the first and second kings of the Ethiopian XXVth dynasty of Egypt, SHEBEK (סוא) and SHEBETEK, may also be compared. Gesenius was led, by an error of the Egyptologists, to connect Sevechus, a Greek transcription of SHEBETEK, with SABK or SBAḲ.

the crocodile-headed divinity of Ombos (*Lex.* s. v. סוא).

The list of the sons of Cush seems to indicate the position of the Cushite nation or country Seba. Nimrod, who is mentioned at the close of the list, ruled at first in Babylonia, and apparently afterwards in Assyria: of the names enumerated between Seba and Nimrod, it is highly probable that some belong to Arabia. We thus may conjecture a curve of Cushite settlements, one extremity of which is to be placed in Babylonia, the other, if prolonged far enough in accordance with the mention of the African Cush, in Ethiopia. The more exact position of Seba will be later discussed.

Besides the mention of Seba in the list of the sons of Cush (Gen. x. 7; 1 Chr. i. 9), there are but three, or, as some hold, four notices of the nation. In Psalm lxxii., which has evidently a first reference to the reign of Solomon, Seba is thus spoken of among the distant nations which should do honor to the king: "The kings of Tarshish and of the isles shall bring presents: the kings of Sheba and Seba shall offer gifts" (10). This mention of Sheba and Seba together is to be compared with the occurrence of a Sheba among the descendants of Cush (Gen. x. 7), and its fulfillment is found in the queen of Sheba's coming to Solomon. There can be little doubt that the Arabian kingdom of Sheba was Cushite as well as Joktanite; and this occurrence of Sheba and Seba together certainly lends some support to this view. On the other hand, the connection of Seba with an Asiatic kingdom is important in reference to the race of its people, which, or at least the ruling class was, no doubt, not Nigritian. In Isaiah xliii., Seba is spoken of with Egypt, and more particularly with Cush, apparently with some reference to the Exodus, where we read: "I gave Egypt [for] thy ransom, Cush and Seba for thee" (3). Here, to render Cush by Ethiopia, as in the A. V., is perhaps to miss the sense of the passage, which does not allow us to infer, though it is by no means impossible, that Cush, as a geographical designation, includes Seba, as it would do if here meaning Ethiopia. Later in the book there is a passage parallel in its indications: "The labor of Egypt, and merchandise of Cush, and of the people of Seba, men of stature, shall come over unto thee, and they shall be thine" (xlv. 14). Here there is the same mention together of the three nations, and the same special association of Cush and Seba. The great stature and beauty of the Ethiopians is mentioned by Herodotus, who speaks of them as by report the tallest and handsomest men in the world (iii. 20; comp. 114); and in the present day some of the tribes of the dark races of a type intermediate between the Nigritians and the Egyptians, as well as the Caucasian Abyssinians, are remarkable for their fine form, and certain of the former for their height. The doubtful notice is in Ezekiel, in a difficult passage: "and with men of the multitude of Adam [were] brought drunkards סְבָאִים, but the Kori reads סָבָאִים, 'people of Seba'] from the wilderness, which put bracelets upon their hands, and beautiful crowns upon their heads" [a] (xxiii. 42). The first clause would seem to favor the idea that a nation is meant, but the reading of the text is rather supported by what follows the mention of the "drunkards." Nor is it clear why people of Seba should come from the wilderness. The passages we have examined thus seem to show (if we omit the last) that Seba was a nation of Africa, bordering on or included in Cush, and in Solomon's time independent and of political importance. We are thus able to conjecture the position of Seba. No ancient Ethiopian kingdom of importance could have excluded the island of Meroë, and therefore this one of Solomon's time may be identified with that which must have arisen in the period of weakness and division of Egypt that followed the Empire, and have laid the basis of that power that made SHEBEK, or Sabaco, able to conquer Egypt, and found the Ethiopian dynasty which ruled that country as well as Ethiopia.

Josephus says that Saba (Σαβά) was the ancient name of the Ethiopian island and city of Meroë (*A. J.* ii. 10, § 2), but he writes Seba, in the notice of the Noachian settlements, Sabas (*ibid.* i. 6, § 2). Certainly the kingdom of Meroë succeeded that of Seba; and the ancient city of the same name may have been the capital, or one of the capitals, of Seba, though we do not find any of its monuments to be even as early as the XXVth dynasty. There can be no connection between the two names. According to Josephus and others, Meroë was named after a sister of Cambyses; but this is extremely unlikely, and we prefer taking it from the ancient Egyptian MERU, an island, which occurs in a name of a part of Ethiopia that can only be this or a similar tract, MERU-PET, "the island of PET [Phut?] the bow," where the bow may have a geographical reference to a bend of the river, and the word island to the country inclosed by that bend and a tributary [PHUT].

As Meroë, from its fertility, must have been the most important portion of any Ethiopian kingdom in the dominions of which it was included, it may be well here to mention the chief facts respecting it which are known. It may be remarked that it seems certain that, from a remote time, Ethiopia below Meroë could never have formed a separate powerful kingdom, and was probably always dependent upon either Meroë or Egypt. The island of Meroë lay between the Astaboras, the Atbara, the most northern tributary of the Nile, and the Astapus, the Bahr el-Azrak or "Blue River," the eastern of its two great confluents; it is also described as bounded by the Astaboras, the Astapus, and the Astasobas, the latter two uniting to form the Blue River (Strab. xvii. 821), but this is essentially the same thing. It was in the time of the kingdom rich and productive. The chief city was Meroë, where was an oracle of Jupiter Ammon. Modern research confirms these particulars. The country is capable of being rendered very wealthy, though its neighborhood to Abyssinia has checked its commerce in that direction, from the natural dread that the Abyssinians have of their country being absorbed like Kurdufán, Dárfoor, and Fazóglu, by their powerful neighbor Egypt. The remains of the city Meroë have not been identified with certainty, but between N. lat. 16° and 17° temples, one of them dedicated to the ram-headed Num, confounded with Ammon by the Greeks, and pyramids, indicate that there must have been a great population, and at least one important city. When ancient writers speak of sovereigns of Meroë they may either mean rulers of Meroë alone, or, as

[a] The reading of the A. V. in the text is, "with the men of the common sort," and in the margin, "with the men of the multitude of men."

addition, of Ethiopia to the north nearly as far, or as far as Egypt. R. S. P.

**SE'BAT.** [MONTH.]

**SEC'ACAH** (סְכָכָה [*thicket*, Distr.]: Αἰσχιδζα; Alex. Σοχοχα: *Schacha*, or *Sachacha*). One of the six cities of Judah which were situated in the *Midbar* ("wilderness"), that is, the tract bordering on the Dead Sea (Josh. xv. 61). It occurs in the list between Middin and han-Nibshan. It was not known to Eusebius and Jerome, nor has the name been yet encountered in that direction in more modern times. From *Sinjil*, among the highlands of Ephraim, near *Seilûn*, Dr. Robinson saw a place called *Sekâkah* (*Bibl. Res.* ii. 267, note). G.

**SECHENI'AS** (Σεχενίας; [Vat. omits:] *Sceciliæ*). 1. SHECHANIAH (1 Esdr. viii. 29; comp. Ezr. viii. 3).

2. ([Vat. Ελεχονιας:] *Jechonias.*) SHECHANIAH (1 Esdr. viii. 32; comp. Ezr. viii. 5).

**SE'CHU** (הַשֻּׂכָּה with the article [*the watch-tower*]: ἐν τῷ Σεφί [Vat. Σεφει]; Alex. ἐν Σοκχω: *Socho*). A place mentioned once only (1 Sam. xix. 22), apparently as lying on the route between Saul's residence, Gibeah, and Ramah (Ramathaim Zophim), that of Samuel. It was notorious for "the great well" (or rather cistern, בּוֹר) which it contained. The name is derivable from a root signifying elevation, thus perhaps implying that the place was situated on an eminence.

Assuming that Saul started from Gibeah (*Tuleil el-Fûl*), and that *Neby Samwil* is Ramah, then *Bîr Neballa* (the well of Neballa), alleged by a modern traveller (Schwarz, p. 127) to contain a large pit, would be in a suitable position for the great well of Sechu. Schwarz would identify it with *Askar*, on the S. E. end of Mount Ebal, and the well with Jacob's Well in the plain below; and Van de Velde (*S. & P.* ii. 53, 54) hesitatingly places it at *Shâk*, in the mountains of Judah N. E. of Hebron; but this they are forced into by their respective theories as to the position of Ramathaim Zophim.

The Vat. LXX. alters the passage, and has "the well of the threshing-floor that is in Sephei," substituting, in the first case, גרן for גדל, or ἅλω for μεγάλου, and in the latter שפי for שכו. The Alex. MS., as usual, adheres more closely to the Hebrew. G.

* **SECT.** This word is used five times in the Bible, always in the singular, and always as a translation of αἵρεσις: of the Sadducees, Acts v. 17; of the Pharisees, xv. 5, xxvi. 5; and of the Christians (by Jews or heathen), xxiv. 5, xxviii. 22. Αἵρεσις occurs once more in the singular, xxiv. 14 (A. V. "heresy"), and three times in the plural, 1 Cor. xi. 19, Gal. v. 20, 2 Pet. ii. 1 (A. V. "heresies," but 1 Cor. xi. 19 "sects" in the margin). The word seems in the N. T. to be used in the twofold sense which it had before in classical and afterwards in ecclesiastical Greek (cf. Sophocles: *Glossary of Later and Byzantine Greek*): denoting now a "chosen" set of doctrines or mode of life (*e. g.* Acts xxiv. 14, τὴν ὁδὸν ἣν λέγουσιν αἵρεσιν, 2 Pet. ii. 1, perhaps also Acts xxviii. 22, Gal. v. 20), now a *party* adhering to the doctrines.

That αἵρεσις denotes in the N. T. *religious* peculiarities or parties is evident from the six cases in which it is used in the singular. The presumption therefore is that in the three other cases the αἱρέσεις have the same characteristic. It is evident also that the word has (as it did not have in classical Greek) a *bad* sense. The reason for this is to be found in the N. T. conception of the Church as a unit, a body united to Christ the Head (1 Cor. xii. 27; Eph. i. 22), so that diversities of opinion which produce a schism in the body or divide any part of it from the Head (cf. 1 Cor. xii. 25; Col. ii. 19) cannot be tolerated, as could differences on merely philosophical or indifferent matters. Especially instructive is 1 Cor. xi. 18, 19. While Paul has spoken of ἔριδες, i. 11, and of ζῆλος καὶ ἔρις, iii. 3, as undoubtedly existing among the Corinthians, he is reluctant to give to the report that there are σχίσματα among them more than qualified credit (xi. 18, μέρος τι πιστεύω), and founds even this qualified belief not so much on the reports, as on the general principle (ver. 19) that there is a providential necessity that there should be even αἱρέσεις (δεῖ γὰρ καὶ αἱρέσεις εἶναι), that the δόκιμοι may be made manifest (cf. 1 John. ii. 19). The ἀδόκιμοι are those who do not have Christ in them (2 Cor. xiii. 5). Αἱρέσεις then are divisions (distinguished from σχίσματα, as the cause from the effect) which imply or lead to a separation of false from true Christians. In strict accordance with this is the use of αἱρέσεις in Gal. v. 20, and especially in 2 Pet. ii. 1; as also Paul's injunction (Tit. iii. 10), to reject an αἱρετικὸν ἄνθρωπον.

The term αἵρεσις, as far as parties in the Church are concerned, is in the N. T. confined to general or hypothetical statements, and is not applied to any particular heretical body, though the existence of heretical tendencies is recognized. But the prominent notion in the N. T. conception of αἵρεσις is that of apostasy from Christ. Mere variations in belief among those who "hold the Head" are nowhere branded with the name of αἵρεσις (cf. Rom. xiv.; 1 Cor. viii.). C. M. M.

**SECUN'DUS** (Σεκοῦνδος: *Secundus*) was one of the party who went with the Apostle Paul from Corinth as far as Asia (ἄχρι τῆς Ἀσίας), probably to Troas or Miletus (all of them so far, some further), on his return to Jerusalem from his third missionary tour (see Acts xx. 4). He and Aristarchus are there said to have been Thessalonians. He is otherwise unknown. H. B. H.

* **SECURE** formerly differed from "safe," as the feeling of safety (which may be unfounded) differs from the reality. Thus, in Judg. xviii. 7, 10, 27, the people of Laish are said to have been "secure"; *i. e.* in their own belief, which their speedy and utter overthrow showed to be a delusion. It is in the same sense that the A. V. renders ὑμᾶς ἀμερίμνους ποιήσομεν by "we will secure you," in Matt. xxviii. 14. (See Trench's *Glossary of English Words*, p. 147, Amer. ed.) H.

**SEDECI'AS** (Σεδεκίας: *Sedecias*), the Greek form of Zedekiah. 1. A man mentioned in Bar. i. 1, as the father of Maaseiah, himself the grandfather of Baruch, and apparently identical with the false prophet in Jer. xxix. 21, 22.

2. The "son of Josiah, king of Judah" (Bar i. 8). [ZEDEKIAH.] B. F. W.

* **SEDITIONS**, in the current sense of the word, appears out of place in Paul's catalogue of the sins of the flesh (Gal. v. 19–21). It stands for

Digitized by Google

διχοστασίαι, correctly rendered "divisions" in Rom. xvi. 16 and 1 Cor. iii. 3, as it should be in the above passage. The restricted political sense, if included at all in this instance, is only a part of the sense. Archdeacon Hare ascribes the mistake of the A. V. to Tyndale's following Erasmus' version, where *seditiones* means "divisions" as one of its Latin significations (*Mission of the Comforter*, p. 225 f. Amer. ed.). H.

SEER. [PROPHET.]

SE'GUB (שְׂגוּב; *Kri*, שְׁגוּב [*elevated*]: Σεγούβ [Vat. M. Ζεγουβ:] *Segub*). 1. The youngest son of Hiel the Bethelite, who rebuilt Jericho (1 K. xvi. 34). According to Rabbinical tradition he died when his father had set up the gates of the city. One story says that his father slew him as a sacrifice on the same occasion.

2. (Σερούχ; Alex. Σεγουβ.) Son of Hezron, by the daughter of Machir the father of Gilead (1 Chr. ii. 21, 22).

* SE'IR (שֵׂעִיר, *rough*, *bristly*: Σηείρ; in 1 Chr. Σηίρ, Alex. Σηθιρ: *Seir*), a Horite chief, who, perhaps, gave his name to the mountainous region in which he dwelt (Gen. xxxvi. 20, 21; 1 Chr. i. 38). [SEIR, MOUNT, 1.] A.

SE'IR, MOUNT (שֵׂעִיר, *rough* or *rugged*: Σηείρ: *Seir*). We have both אֶרֶץ שֵׂעִיר, "land of Seir" (Gen. xxxii. 3, xxxvi. 30), and הַר שֵׂעִיר, "Mount Seir" (Gen. xiv. 6). 1. The original name of the mountain ridge extending along the east side of the Valley of Arabah, from the Dead Sea to the Elanitic Gulf. The name may either have been derived from Seir the Horite, who appears to have been the chief of the aboriginal inhabitants (Gen. xxxvi. 20), or, what is perhaps more probable, from the rough aspect of the whole country. The view from Aaron's tomb on Hor, in the centre of Mount Seir, is enough to show the appropriateness of the appellation. The sharp and serrated ridges, the jagged rocks and cliffs, the straggling bushes and stunted trees, give the whole scene a sternness and ruggedness almost unparalleled. In the Samaritan Pentateuch, instead of שעיר, the name גבלה is used; and in the Jerusalem Targum, in place of "Mount Seir" we find טוּרָא דגבלא, *Mount Gabla*. The word *Gabla* signifies "mountain," and is thus descriptive of the region (Reland, *Pal.* p. 83). The name Gebala, or Gebalene, was applied to this province by Josephus, and also by Eusebius and Jerome (Joseph. *Ant.* ii. 1, § 2; *Onomast.* "Idumæa"). The northern section of Mount Seir, as far as Petra, is still called *Jebâl*, the Arabic form of Gebal. The Mount Seir of the Bible extended much further south than the modern province, as is shown by the words of Deut. ii. 1–8. In fact its boundaries are there defined with tolerable exactness. It had the Arabah on the west (vv. 1, 8); it extended as far south as the head of the Gulf of Akabah (ver. 8); its eastern border ran along the base of the mountain range where the plateau of Arabia begins. Its northern border is not so accurately determined. The land of Israel, as described by Joshua, extended from "the Mount Halak that goeth up to Seir, even unto Baal Gad" (Josh. xi. 17). As no part of Edom was given to Israel, Mount Halak must have been on its northern border. Now there is a line of "naked" (*halak* signified "naked") white hills or cliffs which runs across the great valley about eight miles south of the Dead Sea, forming the division between the Arabah proper and the deep *Ghôr* north of it. The view of these cliffs, from the shore of the Dead Sea, is very striking. They appear as a line of hills shutting in the valley, and extending up to the mountains of Seir. The impression left by them on the mind of the writer was that this is the very "Mount Halak, that goeth up to Seir" (Robinson, *Bibl. Res.* ii. 113, &c.; see Keil on Josh. xi. 17). The northern border of the modern district of *Jebâl* is *Wady el-Ahsy*, which falls into the *Ghôr* a few miles further north (Burckhardt, *Syr.* p. 401).

In Deut. xxxiii. 2, Seir appears to be connected with Sinai and Paran; but a careful consideration of that difficult passage proves that the connection is not a geographical one. Moses there only sums up the several glorious manifestations of the Divine Majesty to the Israelites, without regard either to time or place (comp. Judg. v. 4, 5).

Mount Seir was originally inhabited by the Horites, or "troglodytes," who were doubtless the excavators of those singular rock-dwellings found in such numbers in the ravines and cliffs around Petra. They were dispossessed, and apparently annihilated, by the posterity of Esau, who "dwelt in their stead" (Deut. ii. 12). The history of Seir thus early merges into that of Edom. Though the country was afterwards called Edom, yet the older name, Seir, did not pass away; it is frequently mentioned in the subsequent history of the Israelites (1 Chr. iv. 42; 2 Chr. xx. 10). Mount Seir is the subject of a terrible prophetic curse pronounced by Ezekiel (ch. xxxv.), which seems now to be literally fulfilled: "Thus saith the Lord God, Behold, O Mount Seir, I am against thee, and I will make thee most desolate. I will lay thy cities waste, . . . . when the whole earth rejoiceth I will make thee desolate. . . . . I will make thee perpetual desolations, and thy cities shall not return, and ye shall know that I am the Lord." J. L. P.

2. (הַר שֵׂעִיר: ὄρος Ἀσσάρ; [a] Alex. ο. Σηειρ: *Mons Seir.*) An entirely different place from the foregoing; one of the landmarks on the north boundary of the territory of Judah (Josh. xv. 10 only). It lay westward of Kirjath-jearim, and between it and Beth-shemesh. If *Kuriet el-Enab* be the former, and *Ain-shems* the latter of these two, then Mount Seir cannot fail to be the ridge which lies between the *Wady Aly* and the *Wady Ghurab* (Rob. iii. 155). A village called *Saris* [b] stands on the southern site of this ridge, which Tobler (*3te Wanderung*, p. 203) and Schwarz (p. 97) would identify with Seir. The obstacle to this is that the names are radically different.[c] The *Sa'iyah*

[a] Ἀσσάρ. This looks as if the Heb. name had once had the article prefixed.

[b] Possibly the Σωρίς which, in the Alex. MS., is one of the eleven names inserted by the LXX. in Josh. xv. 59. The neighboring names agree. In the Vat. MS. it is Σωβής.

[c] ساريس is the orthography of *Saris* (Lists in Dr. Smith in 1st ed. of Robinson, iii. App. 128) not containing no *Ain* and a duplicate s.

Digitized by Google

.Sسعير) on the south of the *Wady Surar* (hob. *Bibl. Res.* 1st ed. ii. 364), is nearer in orthography, but not so suitable in position.

How the name of Seir came to be located so far to the north of the main seats of the Seirites we have no means of knowing. Perhaps, like other names occuring in the tribe of Benjamin, it is a monument of an incursion by the Edomites which has escaped record. [OPHNI, etc.] But it is more probable that it derived its name from some peculiarity in the form or appearance of the spot. Dr. Robinson (iii. 155), apparently without intending any allusion to the name of Seir, speaks of the "rugged points which composed the main ridge" of the mountain in question. Such is the meaning of the Hebrew word *Seir*. Whether there is any connection between this mountain and SEIRATH or *has-Seirah* (see the next article) is doubtful. The name is not a common one, and it is not unlikely that it may have been attached to the more northern continuation of the hills of Judah which ran up into Benjamin — or, as it was then called, Mount Ephraim. G.

* SEI'RAH. [SEIRATH.]

**SEI'RATH** (הַשְּׂעִירָה, with the definite article [*the hairy*, perh. = *woody*]: Σεειρωθά;[a] Alex. Σεειρωθα: *Seirath*). The place to which Ehud fled after his murder of Eglon (Judg. iii. 26), and whither, by blasts of his cowhorn, he collected his countrymen for the attack of the Moabites in Jericho (27). It was in "Mount [mountains of] Ephraim" (27), a continuation, perhaps, of the same wooded, shaggy hills (such seems to be the signification of *Seir*, and *Seirath*) which stretched even so far south as to enter the territory of Judah (Josh. xv. 10). The definite article prefixed to the name in the original shows that it was a well-known spot in its day. It has, however, hitherto escaped observation in modern times.[b] G.

**SE'LA** and **SE'LAH** (סֶלַע, or הַסֶּלַע: πέτρα, or ἡ πέτρα), 2 K. xiv. 7; Is. xvi. 1: rendered "the rock" in the A. V., in Judg. i. 36, 2 Chr. xxv. 12, Obad. 3. Probably the city later known as Petra, 500 Roman miles from Gaza (Plin. vi. 32), the ruins of which are found about two days' journey N. of the top of the Gulf of Akaba, and three or four S. from Jericho. It was in the midst of Mount Seir, in the neighborhood of Mount Hor (Joseph. *Ant.* iv. 4, § 7), and therefore Edomite territory, taken by Amaziah, and called JOKTHEEL (not therefore to be confounded with Joktheel, Josh. xv. 38, which pertained to Judah in the time of Joshua), but seems to have afterwards come under the dominion of Moab. In the end of the fourth century B. C. it appears as the head-quarters of the Nabathæans, who successfully resisted the attacks of Antigonus (Diod. Sic. xix. 731, ed. Hanov. 1604), and under them became one of the greatest stations for the approach of eastern commerce to Rome (*ibid.* 94; Strabo, xvi. p. 799; Apul. *Flor.* i. 6). About 70 B. C. Petra appears as the residence of the Arab princes named Aretas (Joseph. *Ant.* xiv. 1, § 4, and 5, § 1; *B. J.* i. 6, § 2, and 29, § 3). It was by Trajan reduced to subjection to the Roman empire (Dion Cass. lxviii. 14), and from the next emperor received the name of Hadriana,[c] as appears from the legend of a coin. Josephus (*Ant.* iv. 4, § 7) gives the name of Arce (Ἄρκη) as an earlier synonym for Petra, where, however, it is probable that Ἀρκήμ or Ἀρκέμ[d] (alleged by Euseb. *Onom.*, as found in Josephus, should be read. The city Petra lay, though at a high level,[e] in a hollow shut in by mountain cliffs, and approached only by a narrow ravine through which, and across the city's site, the river winds (Plin. vi. 32; Strabo, xvi. p. 779). The principal ruins are — (1.) *el-Khuzneh*, (2) the theatre; (3) a tomb with three rows of columns; (4) a tomb with a Latin inscription; (5) ruined bridges; (6) a triumphal arch; (7) *Zub Far'ón*; (8) *Kŭsr Far'ón*; and are chiefly known by the illustrations of Laborde and Linant, who also thought that they traced the outline of a naumachia or theatre for sea-fights, which would be flooded from cisterns, in which the water of the torrents in the wet season had been reserved — a remarkable proof, if the hypothesis be correct, of the copiousness of the water supply, if properly husbanded, and a confirmation of what we are told of the exuberant fertility of the region, and its contrast to the barren Arabah on its immediate west (Robinson, ii. 169). Prof. Stanley (*S. & P.* p. 95) leaves little doubt that Petra was the seat of a primeval sanctuary, which he fixes at the spot now called the "Deir" or "Convent," and with which fact the choice of the site of Aaron's tomb may, he thinks, have been connected (p. 96) As regards the question of its identity with Kadesh, see KADESH; and, for the general subject, Ritter, xiv. 69, 997 ff., and Robinson, ii. 1. H. H.

**SE'LA-HAM-MAH'LEKOTH** (*i. e.* "the cliff of escapes" or "of divisions," סֶלַע הַמַּחְלְקוֹת: πέτρα ἡ μεριστεῖσα, in both MSS.: *Petra dividens*). A rock or cliff in the wilderness of Maon, the scene of one of those remarkable escapes which are so frequent in the history of Saul's pursuit of David (1 Sam. xxiii. 28). Its name, if interpreted as Hebrew, signifies the "cliff of escapes," or "of divisions." The former is the explanation of Gesenius (*Thes.* p. 485), the latter of the Targum and the ancient Jewish interpreters (Midrash; Rashi). The escape is that of David; the divisions are those of Saul's mind undecided

---

[a] This is the reading of the Vat. Codex according to Mai. If accurate, it furnishes an instance of the ע being represented by τ, which is of the greatest rarity, and is not mentioned by Frankel (*Vorstudien*, etc., p. 1121). γ and κ are the ordinary equivalents of ע in the LXX.

[b] * The name for us is properly Seirah, and not Seirath (which is only the directive local form). It was properly a district rather than a town, and was among the mountains of Ephraim (the Heb. being a collective singular). H.

[c] Nummi in quibus ΑΔΡΙΑΝΗ ΠΕΤΡΑ ΜΗΤΡΟΠΟΛΕΙΣ, Reland, *s. v.*

[d] Eusebius (*Onom.*), under a later article, identifies Petra and Ῥεκέμ, which appears (Num. xxxi. 8) as the name of a Midianitish prince (see Stanley, *S & P.* p. 94, note).

[e] Robinson (ii. 124) computes the *Wady Mousa* as about 2,000 feet or more above the Arabah.

[f] One of the few cases in which the Hebrew article has been retained in our translation. Ham-molekoth and Halkath has-Zurim are examples of the same.

Digitized by Google

whether to remain in pursuit of his enemy or to go after the Philistines; but such explanations, though appropriate to either interpretation, and consistent with the oriental habit of playing on words, are doubtless mere accommodations. The analogy of topographical nomenclature makes it almost certain that this cliff must have derived its name either from its smoothness (the radical meaning of חָלַק) or from some peculiarity of shape or position, such as is indicated in the translations of the LXX. and Vulgate. No identification has yet been suggested. G.

**SELAH** (סֶלָה). This word, which is only found in the poetical books of the Old Testament, occurs seventy-one times in the Psalms, and three times in Habakkuk. In sixteen psalms it is found once, in fifteen twice, in seven three times, and in one four times — always at the end of a verse, except in Ps. lv. 19 [20], lvii. 3 [4], and Hab. iii. 3, 9, where it is in the middle, though at the end of a clause. All the psalms in which it occurs, except eleven (iii., vii., xxiv., xxxii., xlviii., l., lxxxii., lxxxiii., lxxxvii., lxxxix., cxliii.), have also the musical direction, "to the Chief Musician" (comp. also Hab. iii. 19); and in these exceptions we find the words מִזְמוֹר, *mizmôr* (A. V. "Psalm"), Shiggaion, or Maschil, which sufficiently indicate that they were intended for music. Besides these, in the titles of the Psalms in which Selah occurs, we meet with the musical terms Alamoth (xlvi.), Altaschith (lvii., lix., lxxv.), Gittith (lxxxi., lxxxiv.), Mahalath Leannoth (lxxxviii.), Michtam (lvii., lix., lx.), Neginah (lxi.), Neginoth (iv., liv., lv., lxvii., lxxvi.; comp. Hab. iii. 19), and Shushan-eduth (lx.); and on this association alone might be formed a strong presumption that, like these, Selah itself is a term which had a meaning in the musical nomenclature of the Hebrews. What that meaning may have been is now a matter of pure conjecture. Of the many theories which have been framed, it is easier to say what is not likely to be the true one than to pronounce certainly upon what is. The Versions are first deserving of attention.

In by far the greater number of instances the Targum renders the word by לְעָלְמִין, *lĕ'almin*, "for ever;" four times (Ps. xxxii. 4, 7; xxxix. 11 [12]; 4 [6]) לְעָלְמָא, *lĕ'almâ*; once (Ps. xlv. 8 [9]) לְעָלְמֵי עָלְמִין, *lĕ'almê 'almin*; and (Ps. xlviii. 8 [9]) עַד עָלְמֵי עָלְמִין, *'ad 'almê 'almin*, with the same meaning, "for ever and ever." In Ps. xlix. 13 [14] it has לְעָלְמָא דְאָתֵי, *lĕ'almâ dĕâthê*, "for the world to come;" in Ps. xxxix. 5 [6] לְחַיֵּי עָלְמָא, *lĕchayyê 'almâ*, "for the life everlasting;" and in Ps. cxl. 5 [6] תְּדִירָא, *tĕdîrâ*, "continually." This interpretation, which is the one adopted by the majority of Rabbinical writers, is purely traditional, and based upon no etymology whatever. It is followed by Aquila, who renders "Selah" *ἀεί*; by the *Editio quinta* and *Editio sexta*, which give respectively *διαπαντός* and *εἰς τέλος*;[a] by Symmachus (*εἰς τὸν αἰῶνα*) and Theodotion (*εἰς τέλος*), in Habakkuk; by the reading of the Alex. MS. (*εἰς τέλος*) in Hab. iii. 13; by the Peshito-Syriac in Ps. iii. 3 [3], xxiv. 10, and Hab. iii. 13; and by Jerome, who has *semper*. In Ps. lv. 19 [20] קֶדֶם סֶלָה, *kedem selâh*, is rendered in the Peshito "from before the world." That this rendering is manifestly inappropriate in some passages, as for instance Ps. xxi. 2 [3], xxxii. 4, lxxxi. 7 [8], and Hab. iii. 3, and superfluous in others, as Ps. xliv. 8 [9], lxxxiv. 4 [5], lxxxix. 4 [5], was pointed out long since by Aben Ezra. In the Psalms the uniform rendering of the LXX. is *διάψαλμα*. Symmachus and Theodotion give the same, except in Ps. ix. 16 [17], where Theodotion has *ἀεί*, and Ps. lii. 5 [7], where Symmachus has *εἰς ἀεί*. In Hab. iii. 13, the Alex. MS. gives *εἰς τέλος*. In Ps. xxxviii. (in LXX.) 7, lxxx. 7 [8], *διάψαλμα* is added in the LXX., and in Hab. iii. 7 in the Alex. MS. In Ps. lvii. it is put at the end of ver. 2; and in Ps. iii. 8 [9], xxiv. 10, lxxxviii. 10 [11], it is omitted altogether. In all passages except those already referred to, in which it follows the Targum, the Peshito-Syriac has ܕܣܠ, an abbreviation for *διάψαλμα*. This abbreviation is added in Ps. xlviii. 13 [14], l. 15 [16], lxviii. 13 [14], lvii. 2, lxxx. 7 [8], at the end of the verse; and in Ps. lii. 3 in the middle of the verse after תָּמִיד; in Ps. xlix. it is put after עֲצֻמָּן in ver. 14 [15], and in Ps. lxviii. after רָעָשָׁה in ver. 8 [9], and after לֵאלֹהִים in ver. 32 [33]. The Vulgate omits it entirely, while in Hab. iii. 3 the *Editio sexta* and others give *μεταβολὴ διαψάλματος*.

The rendering *διάψαλμα* of the LXX. and other translators is in every way as traditional as that of the Targum "for ever," and has no foundation in any known etymology. With regard to the meaning of *διάψαλμα* itself there are many opinions. Both Origen (*Comm. ad Ps.*, *Opp.* ed. Delarue, ii. 516) and Athanasius (*Synops. Script. Sacr.* xiii.) are silent upon this point. Eusebius of Cæsarea (*Præf. in Ps.*) says it marked those passages in which the Holy Spirit ceased for a time to work upon the choir. Gregory of Nyssa (*Tract. 2 in Ps.* cap. x.) interprets it as a sudden lull in the midst of the psalmody, in order to receive anew the Divine inspiration. Chrysostom (*Opp.* ed. Montfaucon, v. 540) takes it to indicate the portion of the psalm which was given to another choir. Augustine (on Ps. iv.) regards it as an interval of silence in the psalmody. Jerome (*Ep ad Marcellam*) enumerates the various opinions which have been held upon the subject; that *diapsalma* denotes a change of metre, a cessation of the Spirit's influence, or the beginning of another sense. Others, he says, regard it as indicating a difference of rhythm, and the silence of some kind of music in the choir; but for himself he falls back upon the version of Aquila, and renders Selah by *semper*, with a reference to the custom of the Jews to put at the end of their writings Amen, Selah, or Shalom. In his commentary on Ps. iii. he is doubtful whether to regard it as simply a musical sign, or as indicating the perpetuity of the truth contained in the passage after which it is placed; so that, he

[a] Except in Ps. ix. 16 [17], lxxv. 3 [4], lxxvi. 3, 9 [4, 10], where *Ed. 5ta* has *ἀεί*, Ps. xxi. 2 [3], where it has *διαψαλμός*, and in Hab. iii. 3, 13, where it reproduces the Hebrew *σελά*. In Ps. ix. 16 [17] *Editio 6ta* has *ἀεί*, in Ps. lxxv. 3 [4] *διαπαντός*, and in Ps. lxxvi. 3 [4] *εἰς τὸ τέλος*.

says, "wheresoever *Selah*, that is *diapsalma* or *semper*, is put, there we may know that what follows, as well as what precedes, belongs not only to the present time, but to eternity." Theodoret (*Praef. in Ps.*) explains *diapsalma* by *μέλους μεταβολή* or *ἀναλαγή* (as Suidas), "a change of the melody." On the whole, the rendering *διάψαλμα* rather increases the difficulty, for it does not appear to be the true meaning of Selah, and its own signification is obscure.

Leaving the Versions and the Fathers, we come to the Rabbinical writers, the majority of whom follow the Targum and the dictum of R. Eliezer (Talm. Babl. *Erubin*, v. 54) in rendering Selah "for ever." But Aben Ezra (on Ps. iii. 3) showed that in some passages this rendering was inappropriate, and expressed his own opinion that Selah was a word of emphasis, used to give weight and importance to what was said, and to indicate its truth: "But the right explanation is that the meaning of Selah is like 'so it is' or 'thus,' and 'the matter is true and right.'" Kimchi (*Lex.* s. v.) doubted whether it had any special meaning at all in connection with the sense of the passage in which it was found, and explained it as a musical term. He derives it from סָלַל, to raise, elevate, with ה paragogic, and interprets it as signifying a raising or elevating the voice, as much as to say, in this place there was an elevation of the voice in song.

Among modern writers there is the same diversity of opinion. Gesenius (*Thes.* s. v.) derives Selah from סָלָה, *sâlâh*, to suspend, of which he thinks it is the imperative Kal, with ה paragogic, סָלָה־, in pause סֶלָה. But this form is supported by no parallel instance. In accordance with his derivation, which is harsh, he interprets Selah to mean either "suspend the voice," that is, "be silent," a hint to the singers; or "raise, elevate the stringed instruments." In either case he regards it as denoting a pause in the song, which was filled up by an interlude played by the choir of Levites. Ewald (*Die Dichter des A. B.* i. 179) arrives at substantially the same result by a different process. He derives Selah from סָלַל, *sâlal*, to rise, whence the substantive סֹל, which with ה paragogic becomes in pause סֶלָה (comp. הָרָה, from הַר, root הָרַר, Gen. xiv. 10). So far as the form of the word is concerned, this derivation is more tenable than the former. Ewald regards the phrase "Higgaion, Selah," in Ps. ix. 16 [17], as the full form, signifying "music, strike up!" — an indication that the voices of the choir were to cease while the instruments alone came in. Hengstenberg follows Gesenius, De Wette, and others, in the rendering *pause!* but refers it to the contents of the psalm, and understands it of the silence of the music in order to give room for quiet reflection. If this were the case, Selah at the end of a psalm would be superfluous. The same meaning of *pause* or *end* is arrived at by Fürst (*Handw.* s. v.) who derives Selah from a root סָלָה, *sâlâh*, to cut off (a meaning which is perfectly arbitrary), whence the substantive סֹל, *sêl*, which with ה paragogic becomes in pause סֶלָה; a form which is without parallel. While etymologists have recourse to such shifts as these, it can scarcely be expected that the true meaning of the word will be evolved by their investigations. Indeed the question is as far from solution as ever. Beyond the fact that Selah is a musical term, we know absolutely nothing about it, and are entirely in the dark as to its meaning. Sommer (*Bibl. Abhandl.* i. 1–84) has devoted an elaborate discourse to its explanation.[a] After observing that Selah everywhere appears to mark critical moments in the religious consciousness of the Israelites, and that the music was employed to give expression to the energy of the poet's sentiments on these occasions, he (p. 40) arrives at the conclusion that the word is used "in those passages where, in the Temple Song, the choir of priests, who stood opposite to the stage occupied by the Levites, were to raise their trumpets (חֲלִל), and with the strong tones of this instrument mark the words just spoken, and bear them upwards to the hearing of Jehovah. Probably the Levite minstrels supported this priestly intercessory music by vigorously striking their harps and psalteries; whence the Greek expression *διάψαλμα*. To this points, moreover, the fuller direction, 'Higgaion Selah' (Ps. ix. 16); the first word of which denotes the whirr of the stringed instruments (Ps xcii. 3), the other the raising of the trumpets, both which were here to sound together. The less important *Higgaion* fell away, when the expression was abbreviated, and *Selah* alone remained." Dr. Davidson (*Introd. to the O. T.* ii. 248) with good reason rejects this explanation as labored and artificial, though it is adopted by Keil in Hävernick's *Einleitung* (iii. 120–129). He shows that in some passages (as Ps. xxxii. 4, 5, lii. 3, lv. 7, 8) the playing of the priests on the trumpets would be unsuitable, and proposes the following as his own solution of the difficulty: "The word denotes *levation* or *ascent*, i. e. *loud, clear*. The music which commonly accompanied the singing was soft and feeble. In cases where it was to burst in more strongly during the silence of the song, *Selah* was the sign. At the end of a verse or strophe, where it commonly stands, the music may have readily been strongest and loudest." It may be remarked of this, as of all the other explanations which have been given, that it is mere conjecture, based on an etymology which, in any other language than Hebrew, would at once be rejected as unsound. A few other opinions may be noticed as belonging to the history of the subject. Michaelis, in despair at being unable to assign any meaning to the word, regarded it as an abbreviation, formed by taking the first or other letters of three other words (*Suppl. ad Lex. Hebr.*), though he declines to conjecture what these may have been, and rejects at once the guess of Meibomius, who extracts the meaning *da capo* from the three words which he suggests. For other conjectures of this kind, see Eichhorn's *Bibliothek*, v. 545. Mattheson was of opinion that the passages where Selah occurred were repeated either by the instruments or by another choir: hence he took it as equal to *ritornello*. Herder regarded it as marking a change of key; while Paulus Burgensis and Schindler assigned to it no meaning, but looked upon it as an

[a] For a translation of this treatise by Prof. B. B Edwards, see *Bibl. Sacra*, v. 68–79.

Digitized by Google

enclitic word used to fill up the verse. Buxtorf (*Lex. Hebr.*) derived it from סָלַח, *sâlâh*, to spread, lay low: hence used as a sign to lower the voice, like *piano*. In Eichhorn's *Bibliothek* (v. 550) it is suggested that Selah may perhaps signify a scale in music, or indicate a rising or falling in the tone. Küster (*Stud. und Krit.* 1831) saw in it only a mark to indicate the strophical divisions of the Psalms, but its position in the middle of verses is against this theory. Augusti (*Pract. Einl. in d. Ps.* p. 125) thought it was an exclamation, like *hallelujah!* and the same view was taken by the late Prof. Lee (*Heb. Gr.* § 243, 2), who classes it among the interjections, and renders it *praise!* "For my own part," he says, "I believe it to be descended from the root صَلَّى, 'he blessed,' etc., and used not unlike the word *amen*, or the *doxology* among ourselves." If any further information be sought on this hopeless subject, it may be found in the treatises contained in Ugolini, vol. xxii., in Noldius (*Concord. Part. Ann. et Vind.* No. 1877), in Saalschütz (*Hebr. Poes.* p. 346) and in the essay of Sommer quoted above. W. A. W.

**SE'LED** (סֶלֶד [*exultation*]: Ἀαλδᾶ; [Vat. once Αλσαλαδ.] *Saled*). One of the sons of Nadab, a descendant of Jerahmeel (1 Chr. ii. 30).

**SELEMI'A** (*Salemia*). One of the five men "ready to write swiftly," whom Esdras was commanded to take (2 Esdr. xiv. 24).

**SELEMI'AS** (Σελεμίας: om. in Vulg.). SHELEMIAH of the sons of Bani (1 Esdr. ix. 34; comp. Ezr. x. 39).

**SELEU'CIA** (Σελεύκεια: *Seleucia*) was practically the seaport of ANTIOCH, as Ostia was of Rome, Neapolis of Philippi, Cenchreæ of Corinth, and the Piræus of Athens. The river Orontes, after flowing past Antioch, entered the sea not far from Seleucia. The distance between the two towns was about 16 miles. We are expressly told that St. Paul, in company with Barnabas, sailed from Seleucia at the beginning of his first missionary circuit (Acts. xiii. 4); and it is almost certain that he landed there on his return from it (xiv. 26). The name of the place shows at once that its history was connected with that line of Seleucidæ who reigned at Antioch from the death of Alexander the Great to the close of the Roman Republic, and whose dynasty had so close a connection with Jewish annals. This strong fortress and convenient seaport was in fact constructed by the first Seleucus, and here he was buried. It retained its importance in Roman times, and in St. Paul's day it had the privileges of a free city (Plin. *H. N.* v. 18). The remains are numerous, the most considerable being an immense excavation extending from the higher part of the city to the sea: but to us the most interesting are the two piers of the old harbor, which still bear the names of Paul and Barnabas. The masonry continues so good, that the idea of clearing out and repairing the harbor has recently been entertained. Accounts of Seleucia will be found in the narrative of the *Euphrates Expedition* by General Chesney, and in his papers in the *Journal of the Royal Geographical Society*, and also in a paper by Dr Yates in the *Museum of Classical Antiquities*.[a]

J. S. H.

**SELEU'CUS** (Σέλευκος: *Seleucus*) IV Philopator, "king of Asia" (2 Macc. iii. 3), that is, of the provinces included in the Syrian monarchy, according to the title claimed by the Seleucidæ, even when they had lost their footing in Asia Minor (comp. 1 Macc. viii. 6, xi. 13, xii. 39, xiii. 32), was the son and successor of Antiochus the Great. He took part in the disastrous battle of Magnesia (B. C. 190), and three years afterwards, on the death of his father, ascended the throne. He seems to have devoted himself to strengthening the Syrian power, which had been broken down at Magnesia, seeking to keep on good terms with Rome and Egypt till he could find a favorable opportunity for war. He was, however, murdered, after a reign of twelve years (B. C. 175), by Heliodorus, one of his own courtiers [HELIODORUS], "neither in [sudden] anger nor in battle" (Dan. xi. 20, and Jerome, *ad loc.*), but by ambitious treachery, without having effected anything of importance. His son Demetrius I. Soter [DEMETRIUS], whom he had sent, while still a boy, as a hostage to Rome, after a series of romantic adventures gained the crown in 162 B. C. (1 Macc. vii. 1; 2 Macc. xiv. 1). The general policy of Seleucus towards the Jews, like that of his father (2 Macc. iii. 2, 3, καὶ Σέλευκον), was conciliatory, as the possession of Palestine was of the highest importance in the prospect of an Egyptian war; and he undertook a large share of the expenses of the Temple-service (2 Macc. iii. 3, 6). On one occasion, by the false representations of Simon, a Jewish officer [SIMON, 3], he was induced to make an attempt to carry away the treasures deposited in the Temple, by means of the same Heliodorus who murdered him. The attempt signally failed, but it does not appear that he afterwards showed any resentment against the Jews (2 Macc. iv. 5, 6); though his want of money to pay the enormous tribute due to the Romans [ANTIOCHUS III., vol. i p. 115] may have compelled him to raise extraordinary revenues, for which cause he is described in Daniel as "a raiser of taxes" (Dan. xi. *l. c.*; Liv. xli. 19).

B. F. W.

**SEM** (Σήμ: *Sem*). SHEM the patriarch (Luke iii. 36).

**SEMACHI'AH** (סְמַכְיָהוּ: Σαβαχία; [Vat. Σαβαχεια:] Alex. Σαμαχίας: *Samachias*). One of the sons of Shemaiah, the son of Obed-edom (1 Chr. xxvi. 7).

**SEM'EI** (Σεμεΐ; [Vat. Σεμεει:] *Semei*) 1. SHIMEI of the sons of Hashum (1 Esdr. ix. 33; comp. Ezr. x. 33).

2. (Σεμεΐας; [Vat. Σεμεειας; FA. Σεμειας]). SHIMEI, the ancestor of Mordecai (Est. xi. 2).

3. (Σεμεΐ: [Tisch. Treg. Σεμεείν]). The father of Mattathias in the genealogy of Jesus Christ (Luke iii. 26).

**SEMEL'LIUS** (Σαμέλλιος; [Alex. also Σεμελλιος, Σεβελλιος:] *Sabellius*). SHIMSHAI the scribe (1 Esdr. ii. 16, 17, 25, 30; comp. Ezr. iv.)

**SE'MIS** (Σεμείς; [Vat. Σενηεις; Ald. Σεμίς:] *Semeis*). SHIMEI the Levite in the time of Ezra (1 Esdr. ix. 23; comp. Ezr. x. 23).

**SEMITIC LANGUAGES.** [SEMITIC LANGUAGES.]

**SENA'AH** (סְנָאָה) [*thorny*]: [Σενεδ, Σαναά, Ἀσανά; Vat.] Σααν, Σανανα; [in Neh. 3ii. 3, Vat. Ασαν, FA. Ασανα; Alex. in Ezr. Σενναα:] *Senaa*). The "children of Senaah" are enumerated amongst the "people of Israel" who returned from the Captivity with Zerubbabel (Ezr. ii. 35; Neh. vii. 38). In Neh. iii. 3, the name is given with the article has-Senaah.

The names in these lists are mostly those of towns; but Senaah does not occur elsewhere in the Bible as attached to a town.[a]

The Magdal-Senna, or "great Senna" of Eusebius and Jerome, seven miles N. of Jericho (*Onom.* "Senna"), however, is not inappropriate in position. There is a variation in the numbers given by Ezra and Nehemiah; but even adopting the smaller figure, it is difficult to understand how the people of Senaah should have been so much more numerous than those of the other places in the catalogue. Bertheau (*Exeg. Handb.*) suggests that Senaah represents not a single place but a district; but there is nothing to corroborate this.

In the parallel passages of 1 Esdras (iv. 23) the name is given ANNAAS, and the number 3,330.

G.

* **SENATE** occurs in the N. T. only in Acts v. 21, the translation of γερουσία, also peculiar to that place. As συνέδριον accompanies the term, it cannot be equivalent to Sanhedrim, but must denote a branch of that body, and no doubt, as the affinity of meaning itself indicates, is interchangeable with πρεσβυτέριον, "eldership," one of the three classes (priests, elders, scribes) collectively designated as the Sanhedrim (see Acts iv. 5). We find γερουσία in 1 Macc. xii. 6; 2 Macc. i. 10, iv. 44, xi. 27; 3 Macc. i. 8, where it designates the highest Jewish Council of that earlier period, but whether the Council was then organized precisely like the Sanhedrim in the time of the Saviour is not easily determined. (See Fritzsche, *Handb. zu den Apokryphen*, iii. 184 f.) The Latin Vulgate renders γερουσία by *senatus* and *seniores*. On the general topic, see in the *Dictionary*, ELDERS; SANHEDRIM.

H.

**SE'NEH** (סֶנֶה) [*thorn*]: Σεννά, [Vat. Ενναμ;] Alex. omits: *Sene*). The name of one of the two isolated rocks which stood in the "passage of Michmash," at the time of the adventure of Jonathan and his armor-bearer (1 Sam. xiv. 4). It was the southern one of the two (ver. 5), and the nearest to Geba. The name in Hebrew means a "thorn," or thorn-bush, and is applied elsewhere only to the memorable thorn of Horeb; but whether it refers in this instance to the shape of the rock, or to the growth of *seneh* upon it, we cannot ascertain. The latter is more consistent with analogy. It is remarkable that Josephus (*B. J.* v. 2, § 1), in describing the route of Titus from the north to Jerusalem, mentions that the last encampment of his army was at a spot "which in the Jews' tongue is called the valley" or perhaps the plain "of thorns (ἀκανθῶν αὐλών), near a certain village called Gabathsaoulé," i. e. Gibeath of Saul. The ravine of Michmash is about four miles from the hill which is, with tolerable certainty, identified with Gibeah. This distance is perhaps too great to suit Josephus' expression; still the point is worth notice.

G.

**SE'NIR** (שְׂנִיר) [*coat of mail*]: [Σανίρ, Σενείρ, Alex.] Σανειρ, [and so Vat. in 1 Chr.:] *Senir*). This name occurs twice in the A. V., namely, 1 Chr. v. 23, and Ez. xxvii. 5; but it should be found in two other passages, in each of which the Hebrew word is exactly similar to the above, namely, Deut. iii. 9, and Cant. iv. 8. In these it appears in the A. V. as SHENIR. Even this slight change is unfortunate, since, as one of the few Amorite words preserved, the name possesses an interest which should have protected it from the addition of a single letter. It is the Amorite name for the mountain in the north of Palestine which the Hebrews called HERMON, and the Phœnicians SIRION; or perhaps it was rather the name for a portion of the mountain than the whole. In 1 Chr. v. 23, and Cant. iv. 8, Hermon and it are mentioned as distinct. Abulfeda (ed. Köhler, p. 164, quoted by Gesenius) reports that the part of Anti-Lebanon north of Damascus — that usually denominated *Jebel esh-Sharky*, "the East Mountain" — was in his day called *Senir*. The use of the word in Ezekiel is singular. In describing Tyre we should naturally expect to find the Phœnician name (Sirion) of the mountain employed, if the ordinary Israelite name (Hermon) were discarded. That it is not so may show that in the time of Ezekiel the name of Senir had lost its original significance as an Amorite name, and was employed without that restriction.

The Targum of Joseph on 1 Chr. v. 23 (ed. Beck) renders Senir by מוֹד מֵישְׁרֵי פְּרִזָי, of which the most probable translation is "the mountain of the plains of the Perizzites." In the edition of Wilkins the text is altered to מַ מַסְרֵי פְּרִזָי, "the mountain that corrupteth fruits," in agreement with the Targums on Deut. iii. 9, though it is there given as the equivalent of Sirion. Which of these is the original it is perhaps impossible now to decide. The former has the slight consideration in its favor, that the Hivites are specially mentioned as "under Mount Hermon," and thus may have been connected or confounded with the Perizzites; or the reading may have arisen from mere caprice, as that of the Sam. version of Deut. iii. 9 appears to have done. [See SAMARITAN PENTATEUCH, p. 2812 *b*.]

G.

**SENNACH'ERIB or SENNA'CHE RIB** (סַנְחֵרִיב) [see below]: [Rom. in 2 K. and 2 Chr.] Σενναχηρίμ, [in Is.] Σενναχηρείμ; [Vat. Alex. and Sin. Σενναχηρειμ throughout, exc. 2 K. xviii. 13, Alex. Σενακ., and Is. xxxvii. 21, Sin. -χηριμ:] Σεναχήριβος, Joseph.; Σαναχάριβος, Herod.: *Sennacherib*) was the son and successor of Sargon. [SARGON.] His name in the original is read as *Tsin-akki-irib*, which is understood to mean "Sin (or the Moon) increases brothers:" an indication that he was not the first-born of his father. The LXX. have thus approached much more nearly to the native articulation than the Jews of Palestine, having kept the vowel-sounds almost exactly, and merely changed the labial at the close from β to μ. Josephus has been even more entirely correct, having only added the Greek nominatival ending.

We know little or nothing of Sennacherib during his father's lifetime. From his name, and from a circumstance related by Polyhistor, we may gather that he was not the eldest son, and not the heir to the crown till the year before his father's death

[a] The rock of SENEH of 1 Sam. xiv. 4 is hardly appropriate.

Digitized by Google

Polyhistor (following Berosus) related that the tributary kingdom of Babylon was held by a brother — who would doubtless be an elder brother — of Sennacherib's, not long before that prince came to the throne (Beros. *Fr.* 12). Sennacherib's brother was succeeded by a certain Hagisa, who reigned only a month, being murdered by Merodach-Baladan, who then took the throne and held it six months. These events belong to the year B. C. 703, which seems to have been the last year of Sargon. Sennacherib mounted the throne B. C. 702. His first efforts were directed to crushing the revolt of Babylonia, which he invaded with a large army. Merodach-Baladan ventured on a battle, but was defeated and driven from the country. Sennacherib then made Belibus, an officer of his court, viceroy, and, quitting Babylonia, ravaged the lands of the Aramæan tribes on the Tigris and Euphrates, whence he carried off 200,000 captives. In the ensuing year (B. C. 701) he made war upon the independent tribes in Mount Zagros, and penetrated thence to Media, where he reduced a portion of the nation which had been previously independent. In his third year (B. C. 700) he turned his arms towards the west, chastised Sidon, took tribute from Tyre, Aradus, and the other Phœnician cities, as well as from Edom and Ashdod, besieged and captured Ascalon, made war on Egypt, which was still dependent on Ethiopia, took Libnah and Lachish on the Egyptian frontier, and, having probably concluded a convention with his chief enemy,[a] finally marched against Hezekiah, king of Judah. Hezekiah, apparently, had not only revolted and withheld his tribute, but had intermeddled with the affairs of the Philistian cities, and given his support to the party opposed to the influence of Assyria. It was at this time that "Sennacherib came up against all the fenced cities of Judah, and took them" (2 K. xviii. 13). There can be no doubt that the record which he has left of his campaign against "Hiskiah" in his third year, is the war with Hezekiah so briefly touched in the four verses of this chapter (vv. 13–16). The Jewish monarch was compelled to make a most humble submission. He agreed to bear whatever the Great King laid upon him; and that monarch, besides carrying off a rich booty and more than 200,000 captives, appointed him a fixed tribute of 300 talents of silver, and 30 talents of gold. He also deprived him of a considerable portion of his territory, which he bestowed on the petty kings of Ashdod, Ekron, and Gaza. Having made these arrangements, he left Palestine and returned into his own country.

In the following year (B. C. 699), Sennacherib invaded Babylonia for the second time. Merodach-Baladan continued to have a party in that country, where his brothers still resided; and it may be suspected that the viceroy, Belibus, either secretly favored his cause, or at any rate was remiss in opposing it. The Assyrian monarch, therefore, took the field in person, defeated a Chaldæan chief who had taken up arms on behalf of the banished king, expelled the king's brothers, and displacing Belibus, put one of his own sons on the throne in his stead.

It was perhaps in this same year that Sennacherib made his second expedition into Palestine. Hezekiah had again revolted, and claimed the protection of Egypt, which seems to have been regarded by Sennacherib as the true cause of the Syrian troubles. Instead, therefore, of besieging Jerusalem, the Assyrian king marched past it to the Egyptian frontier, attacked once more Lachish and Libnah, but apparently failed to take them, sent messengers from the former to Hezekiah (2 K. xviii. 17), and on their return without his submission wrote him a threatening letter (2 K. xix. 14), while he still continued to press the war against Egypt, which had called in the assistance of Tirhakah, king of Ethiopia (*ibid.* ver. 9). Tirhakah was hastening to the aid of the Egyptians, but probably had not yet united his troops with theirs, when an event occurred which relieved both Egypt and Judæa from their danger. In one night the Assyrians lost either by a pestilence or by some more awful manifestation of Divine power, 185,000 men! The camp immediately broke up — the king fled — the Egyptians, naturally enough, as the destruction happened upon their borders, ascribed it to their own gods, and made a boast of it centuries after (Herod. ii. 141). Sennacherib reached his capital in safety, and was not deterred, by the terrible disaster which had befallen his arms, from engaging in other wars, though he seems thenceforward to have carefully avoided Palestine. In his fifth year he led an expedition into Armenia and Media; after which, from his sixth to his eighth year, he was engaged in wars with Susiana and Babylonia. From this point his annals fail us.

Sennacherib reigned twenty-two years. The date of his accession is fixed by the Canon of Ptolemy to B. C. 702, the first year of Belibus or Elibus. The date of his death is marked in the same document by the accession of Asaridanus (Esar-Haddon) to the throne of Babylon in B. C. 680. The monuments are in exact conformity with these dates, for the 22d year of Sennacherib has been found upon them, while they have not furnished any notice of a later year.

It is impossible to reconcile these dates with the chronology of Hezekiah's reign, according to the numbers of the present Hebrew text. Those numbers assign to Hezekiah the space between B. C. 726 and B. C. 697. Consequently the first invasion of Sennacherib falls into Hezekiah's *twenty-seventh* year instead of his fourteenth, as stated in 2 K. xviii. 13, and Is. xxxvi. 1. Various solutions have been proposed of this difficulty. According to some, there has been a dislocation as well as an alteration of the text. Originally the words ran, "Now it came to pass in the fourteenth year of king Hezekiah, that the king of Assyria [Sargon] came up against the fenced cities of Judah." Then followed ch. xx. (Is. xxxviii.) — "In those days was Hezekiah sick unto death," etc.; after which came the narrative of Sennacherib's two invasions. [See HEZEKIAH.] Another suggestion is, that the year has been altered in 2 K. xviii. 13 and Is. xxxvi. 1, by a scribe, who, referring the narrative in ch. xx. (Is xxxviii.) to the period of Sennacherib's first invasion, concluded (from xx. 6) that the whole happened in Hezekiah's fourteenth year (Rawlinson's *Herodotus*, vol. i. p. 479, note 2), and therefore boldly changed "twenty-seventh" into "fourteenth."

Sennacherib was one of the most magnificent of the Assyrian kings. He seems to have been the first who fixed the seat of government permanently at Nineveh, which he carefully repaired and adorned with splendid buildings. His greatest work is the

[a] The impression on clay of the seal of Sabaco, found in Sennacherib's palace at Koyunjik, had probably been appended to this treaty.

Digitized by Google

grand palace at Koyunjik, which covered a space of above eight acres, and was adorned throughout with sculpture of finished execution. He built also, or repaired, a second palace at Nineveh on the mound of Nebbi Yunus, confined the Tigris to its channel by an embankment of brick, restored the ancient aqueducts which had gone to decay, and gave to Nineveh that splendor which she thenceforth retained till the ruin of the empire. He also erected monuments in distant countries. It is his memorial which still remains[a] at the mouth of the *Nahr-el-Kelb* on the coast of Syria, side by side with an inscription of Rameses the Great, recording his conquests six centuries earlier.

Of the death of Sennacherib nothing is known beyond the brief statement of Scripture, that "as he was worshipping in the house of Nisroch (?), his god, Adrammelech and Sharezer his sons smote him with the sword, and escaped into the land of Armenia" (2 K. xix. 37; Is. xxxvii. 38). It is curious that Moses of Chorene and Alexander Polyhistor should both call the elder of these two sons by a different name (Ardumazanes or Argamozanus); and it is still more curious that Abydenus, who generally drew from Berosus, should interpose a king Nergilus between Sennacherib and Adrammelech, and make the latter be slain by Esarhaddon (Euseb. *Chr. Can.* i. 9; comp. i. 5, and see also Mos. Chor. *Arm. Hist.* i. 22). Moses, on the contrary, confirms the escape of both brothers, and mentions the parts of Armenia where they settled, and which were afterwards peopled by their descendants. G. R.

**SENU'AH** (סְנוּאָה [*bristling*, Ges.]: Ἀσανά: *Senna*). Properly Hassenuah, with the def. article. A Benjamite, the father of Judah, who was second over the city after the return from Babylon (Neh. xi. 9). In 1 Chr. ix. 7, "Judah the son of Senuah" is "Hodaviah the son of Hasenuah." [HASENUAH.]

**SEO'RIM** (שְׂעֹרִים [*barley*]: Ἰεσρίμ; [Vat. Ἰεσφειμ;] Alex. Ἰεσρειν: *Seorim*). The chief of the fourth of the twenty-four courses of priests instituted by David (1 Chr. xxiv. 8).

**SEPHAR** (סְפָר [*book*]: Σαφηρά; Alex. Σεφηρ: *Sephar*). It is written, after the enumeration of the sons of Joktan, "and their dwelling was from Mesha as thou goest unto Sephar, a mount of the east" (Gen. x. 30). The immigration of the Joktanites was probably from west to east, as we have shown in ARABIA, MESHA, etc., and they occupied the southwestern portion of the peninsula. The undoubted identifications of Arabian places and tribes with their Joktanite originals are included within these limits and point to Sephar as the eastern boundary. There appears to be little doubt that the ancient sea-port town called *Dhafâri* or *Zafari*, and *Dhafâr* or *Zafâr*, without the inflexional termination, represents the Biblical site or district: thus the etymology is sufficiently near, and the situation exactly agrees with the requirements of the case. Accordingly, it has been generally accepted as the Sephar of Genesis. But the etymological fitness of this site opens out another question, inasmuch as there are no less than four places bearing the same name, besides several others bearing names that are merely variations from the same root. The frequent recurrence of these variations is curious; but we need only here concern ourselves with the four first named places, and of these two only are important to the subject of this article. They are of twofold importance, as bearing on the site of Sephar, and as being closely connected with the ancient history of the Joktanite kingdom of Southern Arabia, the kingdom founded by the tribes sprung from the sons of Joktan. The following extracts will put in a clear light what the best Arabian writers themselves say on the subject. The first is from the most important of the Arabic Lexicons: —

"*Dhafâri* (ظَفَارِ) is a town of the Yemen; one says, 'He who enters *Dhafâri* learns the Himyeritic.' . . . . Es Sâghânee says, 'In the Yemen are four places, every one of which is called *Dhafâri*; two cities and two fortresses. The two cities are *Dhafâri-l-Hakl*, near *San'à*, two days' journey from it on the south; and the Tubbaas used to abide there, and it is said that it is *San'à* [itself]. In relation to it is called the onyx of *Dhafâri*. (Ibn-es-Sikkeet says that the onyx of *Dhafâri* is so called in relation to *Dhafâri-Asad*, a city in the Yemen.) Another is in the Yemen, near *Mirbât*, in the extremity of the Yemen, and is known by the name of *Dhafâri-s-Sâhib* [that is, of the sea-coast], and in relation to it is called the *Kust-Dhafâri* [either costus or aloes-wood], that is, the wood with which one fumigates, because it is brought thither from India, and from it to [the rest of] the Yemen.' . . . . And it Yâkoot meant, for he said, '*Dhafâri* . . . . is a city in the extremity of the Yemen, near to *Esh-Shihr*.' As to the two fortresses, one of them is a fortress on the south of *San'à*, two days' journey from it, in the country of [the tribe of] *Benoo-Murâd*, and it is called *Dhafâri-l-Wadiyeyn* [that is, of the Two Valleys]. It is also called *Dhafâri-Zeyd*; and another is on the north thereof, also two days' journey from it, in the country of *Hemdân*, and is called *Dhafâri dh-Dhâhir*" (*Tâj-el-'Aroos*, MS., *s. v.*).[b]

Yâkoot, in his Homonymous Dictionary (*El-Mushtarak*, s. v.) says: "*Dhafâri* is a celebrated city in the extremity of the country of the Yemen between *'Omân* and *Mirbât*, on the shore of the sea of India: I have been informed of this by [illegible] who has seen it prosperous, abounding in good things. It is near *Esh-Shihr*. *Dhafâri-Zeyd* is a fortress in the Yemen, in the territory of *Habb*, and *Dhafâri* is a city near to *San'à*, and in relation to it is called the *Dhafâri* onyx; in it was the abode of the kings of Himyer, and of it was said 'He who enters *Dhafâri* learns the Himyeritic;' and it is said that *San'à* itself is *Dhafâri*."

Lastly, in the Geographical Dictionary called the *Marâsid*, which is ascribed to Yâkoot, we read, *s. v.*: "*Dhafâri*: two cities in the Yemen, one of

---

[a] It has been stated that in 1861 the French occupants of Syria destroyed this tablet, and replaced it by an inscription in their own honor; but such an act of barbarism seems scarcely possible in the nineteenth century.

[b] Abu-l-Fidâ has fallen into an absurd error in his *Geography*, noticed by M. Fresnel (*IVe Lettre*, p. 317). He endeavors to prove that the two *Zafâris* were only one, by supposing that the inland town, which he places only twenty-four leagues from *San'a*, was originally on the sea-coast.

Digitized by Google

them near to *San'á*, in relation to which is called the *Dhafári* onyx: in it was the dwelling of the kings of Himyer; and it is said that *Dhafári* is the city of *San'á* itself. And *Dhafári* of this day is a city on the shore of the sea of India, between it and *Mirbát* are five parasangs of the territories of *Esh-Shihr*, [and it is] near to *Suhár*, and *Mirbát* is the other anchorage besides *Dhafári*. Frankincense is only found on the mountain of *Dhafári* of *Esh-Shihr*."

These extracts show that the city of *Dhafári* near *San'á* was very little known to the writers, and that little only by tradition: it was even supposed to be the same as, or another name for *San'á*, and its site had evidently fallen into oblivion at their day. But the seaport of this name was a celebrated city, still flourishing, and identified on the authority of an eye-witness. M. Fresnel has endeavored to prove that this city, and not the western one, was the Himyerite capital; and certainly his opinion appears to be borne out by most of the facts that have been brought to light. Niebuhr, however, mentions the ruins of *Dhafári* near *Yereem*, which would be those of the western city (*Descr.* p. 206). While *Dhafári* is often mentioned as the capital in the history of the Himyerite kingdom (Caussin, *Essai*, i. *passim*), it was also in the later times of the kingdom the seat of a Christian Church (Philostorgius, *Hist. Eccles.* iii. 4).

But, leaving this curious point, it remains to give what is known respecting *Dhafári* the seaport, or as it will be more convenient to call it, after the usual pronunciation, *Zafár*. All the evidence is clearly in favor of this site being that of the Sephar of the Bible, and the identification has accordingly been generally accepted by critics. More accurately, it appears to preserve the name mentioned in Gen. x. 30, and to be in the district anciently so named. It is situate on the coast, in the province of *Hadramáut*, and near to the district which adjoins that province on the east, called *Esh-Shihr* (or, as M. Fresnel says it is pronounced in the modern Himyeritic, *Shhèr*). Wellsted says of it, "*Dofár* is situated beneath a lofty mountain" (ii. 453). In the *Marásid* it is said, as we have seen, that frankincense (in the author's time) was found only in the "mountain of *Dhafári*;" and Niebuhr (*Descr.* p. 248) says that it exports the best frankincense. M. Fresnel gives almost all that is known of the present state of this old site in his *Lettres sur l'Hist. des Arabes avant l'Islamisme* (V^e^ Lettre, *Journ. Asiat.* III^e^ série, tome v.). *Zafár*, he tells us, pronounced by the modern inhabitants "Isfôr," is now the name of a series of villages situate some of them on the shore, and some close to the shore, of the Indian Ocean, between *Mirbát* and *Rás-Sájir*, extending a distance of two days' journey, or 17 or 18 hours, from east to west. Proceeding in this direction, those near the shore are named *Tákah*, *Ed-Dahárez*, *El-Beleed*, *El-Háfeh*, *Saldhah*, and *Awkad*. The first four are on the sea-shore, and the last two at a small distance from it. *El-Beleed*, otherwise called *Harkám*, is, in M. Fresnel's opinion, the ancient *Zafár*. It is in ruins, but ruins that attest its former prosperity. The inhabitants were celebrated for their hospitality. There are now only three or four inhabited houses in *El-Beleed*. It is on a small peninsula lying between the ocean and a bay, and the port is on the land side of the town. In the present day during nearly the whole of the year, at least at low tide, the bay is a lake, and the peninsula an isthmus, but the lake is of sweet water. In the rainy season, which is in the spring, it is a gulf, of sweet water at low tide and of salt water at high tide.

The classical writers mention Sapphar metropolis (Σαπφὰρ μητρόπολις) or Saphar (in *Anon. Peripl.* p. 274), in long. 88°, lat. 14° 30′, according to Ptol., the capital of the Sappharitæ (Σαπφαρῖται), placed by Ptol. (vi. 6, § 25) near the Homeritæ; but their accounts are obscure, and probably from hearsay. In later times, as we have already said, it was the seat of a Christian Church: one of three which were founded A. D. 343, by permission of the reigning Tubbaa, in *Dhafári* (written *Tapharon*, Τάφαρον, by Philostorgius, *Hist. Eccles.* iii. 4), in *'Aden*, and on the shores of the Persian Gulf. Theophilus, who was sent with an embassy by order of the emperor Constantine to effect this purpose, was the first bishop (Caussin, i. 111 ff.). In the reign of Abrahah (A. D. 537–570), S. Gregentius was bishop of these churches, having been sent by the Patriarch of Alexandria (cf. authorities cited by Caussin, i. 142–145). E. S. P.

**SEPH'ARAD** (סְפָרַד [see below]: Targ. אִסְפַּמְיָא, *i. e.* "Ispania": ἕως Ἐφραθά, in both MSS.: *in Bosporo*). A name which occurs in Obad. ver. 20 only, as that of a place in which the Jews of Jerusalem were then held in captivity, and whence they were to return to possess the cities of the south.

Its situation has always been a matter of uncertainty, and cannot even now be said to be settled.

1. The reading of the LXX. given above, and followed by the Arabic Version, is probably a mere conjecture, though it may point to a modified form of the name in the then original, namely, Sepharath. In Jerome's copy of the LXX. it appears to have been Εὐφράτης, since (*Comm. in Abd.*) he renders their version of the verse *transmigratio Jerusalem usque Euphrathem*. This is certainly extremely ingenious, but will hardly hold water when we turn it back into Hebrew.

2. The reading of the Vulgate, *Bosporus*,[a] was adopted by Jerome from his Jewish instructor, who considered it to be "the place to which Hadrian had transported the captives from Jerusalem" (*Comm. in Abdiam*). This interpretation Jerome did not accept, but preferred rather to treat Sepharad as connected with a similar Assyrian word signifying a "boundary," and to consider the passage as denoting the dispersion of the Jews into all regions.

We have no means of knowing to which Bosporus Jerome's teacher alluded — the Cimmerian or the Thracian. If the former (Strait of *Yeni-kale*), which was in Iberia, it is not impossible that this Rabbi, as ignorant of geography outside the Holy Land as most of his brethren, confounded it with Iberia in Spain, and thus agreed with the rest of the Jews whose opinions have come down to us. If the latter (Strait of Constantinople), then he may be taken as confirming the most modern opinion (noticed below), that Sepharad was Sardis in Lydia.

The Targum Jonathan (see above) and the Peshito-Syriac, and from them the modern Jews interpret Sepharad as Spain (Ispamia and Ispania).

[a] Obtained by taking the prefixed preposition as part of the name — בְּסְפָרַד; and at the same time rejecting the final ד.

Digitized by Google

one common variation of which name, Hesperia (*Dict. of Geogr.* i. 1074 *b*), does certainly bear considerable resemblance to Sepharad; and so deeply has this taken root that at the present day the Spanish Jews, who form the chief of the two great sections into which the Jewish nation is divided, are called by the Jews themselves the *Sephardim*, German Jews being known as the *Ashkenazim*.

It is difficult to suppose that either of these can be the true explanation of Sepharad. The prophecy of Obadiah has every appearance of referring to the destruction of Jerusalem by Nebuchadnezzar, and there is no reason to believe that any Jews had been at that early date transported to Spain.

3. Others have suggested the identity of Sepharad with Sipphara in Mesopotamia, but that is more probably SEPHARVAIM.

4. The name has perhaps been discovered in the cuneiform Persian inscriptions of *Naksh-i-Rustam* and *Behistun*; and also in a list of Asiatic nations given by Niebuhr (*Reiseb.* ii. pl. 31). In the latter it occurs between Ka Ta Pa TUK (Cappadocia) and Ta UNA (Ionia). De Sacy was the first to propose the identification of this with Sepharah, and subsequently it was suggested by Lassen that S Pa Ra D was identical with Sardis, the ancient capital of Lydia. This identification is approved of by Winer, and adopted by Dr. Pusey (*Introd. to Obad.* p. 232, *note*, also p. 245). In support of this, Fürst (*Handwb.* ii. 95 *a*) points out that Antigonus (cir. B. C. 320) may very probably have taken some of his Jewish captives to Sardis; but it is more consistent with the apparent date of Obadiah's prophecy to believe that he is referring to the event mentioned by Joel (iii. 6), when "children of Judah and Jerusalem" were sold to the "sons of the Javanim" (Ionians), which — as the first captivity that had befallen the kingdom of Judah, and a transportation to a strange land, and that beyond the sea — could hardly fail to make an enduring impression upon the nation.

5. Ewald (*Propheten*, i. 404) considers that Sepharad has a connection with Zarephath in the preceding verse; and while deprecating the "penstration" of those who have discovered the name in a cuneiform inscription, suggests that the true reading is Sepharam, and that it is to be found in a place three hours from *Akka*, i. e. doubtless the modern *Shefa 'Omar*, a place of much ancient repute and veneration among the Jews of Palestine (see Zunz, note to "Parchi," p. 428); but it is not obvious how a residence within the Holy Land can have been spoken of as a captivity, and there are considerable differences in the form of the two names.

6. Michaelis (*Suppl.* No. 1778) has devoted some space to this name; and, among other conjectures, ingeniously suggests that the "Spartans" of 1 Macc. xii. 5 are accurately "Sepharadites." This suggestion, however, does not appear to have stood the test of later investigation. [See SPARTANS.] G.

**SEPHARVAIM** (סְפַרְוַיִם [see below]; Σεφαρουαΐμ, Ἐφαρουαΐμ: *Sepharvaim*) is mentioned by Sennacherib in his letter to Hezekiah as a city whose king had been unable to resist the Assyrians (2 K. xix. 13; Is. xxxvii. 13; comp. 2 K. xviii. 34). It is coupled with Hena and Ava, or Ivah, which were towns on the Euphrates above Babylon. Again, it is mentioned, in 2 K. xvii. 24, as one of the places from which colonists were transported to people the desolate Samaria, after the Israelites had been carried into captivity, where it was again joined with Ava, and also with Cuthah and Babylon. These indications are enough to justify us in identifying the place with the famous town of Sippara, on the Euphrates above Babylon (Ptol. v. 18), which was near the site of the modern Mosaib. Sippara was mentioned by Berosus as the place where, according to him, Xithrus (or Noah) buried the records of the antediluvian world at the time of the Deluge, and from which his posterity recovered them afterwards. (*Fragm. Hist. Gr.* ii. 501, iv. 280.) Abydenus calls it πόλιν Σιππαρηνῶν (*Fr.* 9), and says that Nebuchadnezzar excavated a vast lake in its vicinity for the purposes of irrigation. Pliny seems to intend the same place by his "oppida Hipparenorum" [a] — where, according to him, was a great seat of the Chaldaic learning (*H. N.* vi. 30). The plural form here used by Pliny may be compared with the dual form in use among the Jews; and the explanation of both is to be found in the fact that there were two Sipparas, one on either side of the river. Berosus called Sippara, "a city of the sun" (Ἡλίου πόλιν); and in the inscriptions it bears the same title, being called *Tsipar sha Shamas*, or "Sippara of the sun" — the sun being the chief object of worship there. Hence the Sepharvites are said, in 2 K. xvii. 31, to have "burnt their children in the fire to Adrammelech and Anammelech, the gods of Sepharvaim" — these two distinct deities representing respectively the male and female powers of the sun, as Lunus and Luna represented the male and female powers of the moon among the Romans. G. R.

* **SEPHARVITES** (סְפַרְוִיִּם: Σεφαρουαΐμ; Vat. Σεφφαρουν; Alex. Σεφφαρουαιμ: *hi qui erant de Sepharvaim*), 2 K. xvii. 31. The people of SEPHARVAIM. H.

**SEPHE'LA** (ἡ Σεφηλά: *Sephela*). The Greek form of the ancient word *has-Shĕfēlāh* (הַשְּׁפֵלָה), the native name for the southern division of the low-lying flat district which intervenes between the central highlands of the Holy Land and the Mediterranean, the other and northern portion of which was known as SHARON. The name occurs throughout the topographical records of Joshua, the historical works, and the topographical passages in the Prophets; always with the article prefixed, and always denoting the same region [b] (Deut. i. 7; Josh. ix. 1, x. 40, xi. 2, 16 *a*, xii. 8, xv. 33; Judg. i. 9; 1 K. x. 27; 1 Chr. xxvii. 28; 2 Chr. i. 15, ix. 27, xxvi. 10, xxviii. 18; Jer. xvii. 26, xxxii. 44, xxxiii. 13; Obad. 19; Zech. vii. 7). In each of these passages, however, the word is

[a] When Pliny places Hippara or Sippara on the Narragam (*Nahr Agam*), instead of on the Euphrates, his reference is to the artificial channel which branched off from the Euphrates at Sippara, and led to the great *lake* (Chald. אַגַּמָּא) excavated by Nebuchadnezzar. Abydenus called this branch "Araxanus" (Ἀράξανος), *Ar Akan* (*Fr.* 10).

[b] So absolute is this usage, that on the single occasion where it is used without the article (Josh. xi. 16 *b*) it evidently does not denote the region referred to above, but the plains surrounding the mountains of Ephraim.

Digitized by Google

treated in the A. V. not as a proper name, analogous to *the Campagna, the Wolds, the Carse*, but as a mere appellative, and rendered "the vale," "the valley," "the plain," "the low plains," and "the low country." How destructive this is to the force of the narrative may be realized by imagining what confusion would be caused in the translation of an English historical work into a foreign tongue, if such a name as "The Downs" were rendered by some general term applicable to any other district in the country of similar formation. Fortunately the book of Maccabees has redeemed our Version from the charge of having entirely suppressed this interesting name. In 1 Macc. xii. 38 the name Sephela is found, though even here stripped of the article, which was attached to it in Hebrew, and still accompanies it in the Greek of the passage.

Whether the name is given in the Hebrew Scriptures in the shape in which the Israelites encountered it on entering the country, or modified so as to conform it to the Hebrew root *shafal*, and thus (according to the constant tendency of language) bring it to a form intelligent to Hebrews — we shall probably never know. The root to which it is related is in common use both in Hebrew and Arabic. In the latter it has originated more than one proper name — as *Mespila*, now known as *Koyunjik; el-Mesfale*, one of the quarters of the city of Mecca (Burckhardt, *Arabia*, i. 203, 204); and Seville, originally *Hi-spalis*, probably so called from its wide plain (Arias Montano, in Ford, *Handbook of Spain*).

The name *Shefelah* is retained in the old versions, even those of the Samaritans, and Rabbi Joseph on Chronicles (probably as late as the 11th century A. D.). It was actually in use down to the 5th century. Eusebius, and after him Jerome, (*Onom.* "Sephela," and *Comm.* on Obad.), distinctly state that "the region round Eleutheropolis on the north and west was so called." [a] And a careful investigation might not improbably discover the name still lingering about its ancient home even at the present day.

No definite limits are mentioned to the *Shefelah*, nor is it probable that there were any. In the list of Joshua (xv. 33–47) it contains 43 "cities" as well as the hamlets and temporary villages dependent upon them. Of these, as far as our knowledge avails us, the most northern was Ekron, the most southern Gaza, and the most western Nezib (about 7 miles N. N. W. of Hebron). A large number of these towns, however, were situated not in the plain, nor even on the western slopes of the central mountains, but in the mountains themselves. [JARMUTH; KEILAH; NEZIB, etc.] This seems to show, either that on the ancient principle of dividing territory one district might intrude into the limits of another, or, which is more probable, that, as already suggested, the name *Shefelah* did not originally mean a lowland, as it came to do in its accommodated Hebrew form.

The *Shefelah* was, and is, one of the most productive regions in the Holy Land. Sloping as it does gently to the sea, it receives every year a fresh dressing from the materials washed down from the mountains behind it by the furious rains of winter. This natural manure, aided by the great heat of its climate, is sufficient to enable it to reward the rude husbandry of its inhabitants year after year with crops of corn which are described by the travellers as prodigious.

Thus it was in ancient times the corn-field of Syria, and as such the constant subject of warfare between Philistines and Israelites, and the refuge of the latter when the harvests in the central country were ruined by drought (2 K. viii. 1–3). But it was also, from its evenness, and from its situation on the road between Egypt and Assyria, exposed to continual visits from foreign armies, visits which at last led to the destruction of the Israelite kingdom. In the earlier history of the country the Israelites do not appear to have ventured into the *Shefelah*, but to have awaited the approach of their enemies from thence. Under the Maccabees, however, their tactics were changed, and it became the field where some of the most hardly contested and successful of their battles were fought.

These conditions have hardly altered in modern times. Any invasion of Palestine must take place through the maritime plain, the natural and only road to the highlands. It did so in Napoleon's case, as has already been noticed under PALESTINE [iii. 2291 *a*]. The *Shefelah* is still one vast cornfield, but the contests which take place on it are now reduced to those between the oppressed peasants and the insolent and rapacious officials of the Turkish government, who are gradually putting a stop by their extortions to all the industry of this district, and driving active and willing hands to better governed regions. [See JUDAH, vol. ii. p. 1490; PALESTINE, vol. iii. pp. 2290 f., 2196 f.; PLAINS, 2547.] G.

**SEPTUAGINT.** The Greek version of the Old Testament known by this name, is like the Nile, *fontium qui celat origines*. The causes which produced it, the number and names of the translators, the times at which different portions were translated, are all uncertain.

It will therefore be best to launch our skiff on known waters, and try to track the stream upwards towards its source.

This Version appears at the present day in four principal editions.

1. Biblia Polyglotta Complutensis, A. D. 1514–1517. [The publication of the work was not authorized till 1520, and it did not get into general circulation before 1522. — A.]

2. The Aldine Edition, Venice, A. D. 1518.

3. The Roman Edition, edited under Pope Sixtus V., A. D. 1587. [Some copies have the date 1586. These want the "Corrigenda in Notationibus Psalterii," etc., and the *Privilegium* of Sixtus V., dated May 9, 1587. The copies of this later issue have the date 1586 changed to 1587 with a pen. Before the work was published it was carefully revised, and many MS. corrections were made in all the copies. — A.]

4. Fac-simile Edition of the Codex Alexandrinus, by H. H. Baber, A. D. 1816 [–1828].

1, 2. The texts of (1) and (2) were probably formed by collation of several MSS.

3. The Roman edition (3) is printed from the venerable *Codex Vaticanus*, but not without many errors. The text has been followed in most of the modern editions.

A transcript of the Codex Vaticanus, prepared by Cardinal Mai, was lately published at Rome, by

[a] In his comment on Obadiah, St. Jerome appears to extend it to Lydda and Emmaus-Nicopolis; and at the same time to extend Sharon so far south as to include the Philistine cities.

Digitized by Google

Venetians. [Published in 1587, in 5 vols. fol., including the N. T.] It is to be regretted that this edition is not so accurate as to preclude the necessity of consulting the MS. The text of the Codex, and the parts added by a later hand, to complete the Codex (among them nearly all Genesis), are printed in the same Greek type, with distinguishing notes. [See addition below.]

4. The Fac-simile Edition, by Mr. Baber, is printed with types made after the form of the letters in the *Codex Alexandrinus* (Brit. Museum Library) for the Fac-simile Edition of the New Testament, by Woide, in 1786. Great care was bestowed on the sheets as they passed through the press.

* Some further account of the first three editions here mentioned seems desirable. The Complutensian text has been supposed by many critics (*e. g.* Walton) to have been arbitrarily formed by the editors, partly from the Septuagint and partly from the other Greek versions and even the Greek commentators, in order to make it more conformable to the Hebrew or the Vulgate. The fact, however, is now well established, that it represents a certain class of manuscripts, agreeing particularly with those numbered by Holmes and Parsons 19, 61, 72 (in part), 93, 108, 119, and 248. Of these we know that Nos. 108 and 248 were borrowed from the Vatican Library for the use of the editors. (See Vercellone's Preface to Cardinal Mai's *Vet. et Nov. Test. e Cod. Vat.*, Rom. 1857, vol. i. p. v.) The Complutensian text was reprinted in the Antwerp Polyglott (1569–72), that of Vatable or rather C. B. Bertram (*ex officina Sanctandreana* [Heidelberg], 1586 or 1587; *ex off. Commeliniana* [ibid.], 1599, 1616), Wolder's (Hamb. 1596), and the Paris Polyglott (1628–45). It does not contain the first (*Vulg.* third) book of Esdras.

In the dedication of the Aldine edition the text is said to have been formed from the collation of many very ancient manuscripts, "multis vetustissimis exemplaribus collatis;" but such expressions must be taken with large allowance. Its text in the Pentateuch accords with the MS. numbered by Holmes 29, of the 10th or 11th century, belonging to the Library of St. Mark in Venice, with which the other Venice MSS. numbered by Holmes 68, 120, 121, 122 agree, being all apparently transcripts of the same original. Copies of this edition, the first of the whole Bible in Greek, are now exceedingly rare. There is one, however, in the Library of Harvard College, deposited by the late George Livermore of Cambridge. The variations of the Aldine text from that of the Roman edition are given, though very imperfectly, in Walton's Polyglott, from which they have been copied by Bos in his edition of the Septuagint. As we have had frequent occasion to observe in this *Dictionary*, the forms of the proper names in the common English version of the Apocrypha generally agree with this edition, where it differs from the Roman text. Among the editions of the whole Bible in Greek derived mainly from the Aldine, may be mentioned those printed Argentorati, *ap. Wolph. Cephalæum*, 1526 (some copies dated 1529); Basileæ, *per J. Hervagium*, 1545; ibid., *per N. Brylingerum*, 1550; and Francof., *ap. A. Wecheli hæredes*, 1597. The variations of the last from the Aldine text are considerable.

The Roman edition of the Septuagint has been generally supposed to represent the text of the famous Vatican MS. No. 1209, and its readings are continually quoted in the English edition of this *Dictionary* as those of that MS. But this is a grave error. It is safe to say that in the forms of proper names alone it differs from the Vatican MS. in more than 1,000 places. The Vat. MS. was indeed used as the basis of the Roman edition and was understood by the editors to be of the highest value; but many other ancient MSS. were collated for it, particularly one belonging to Cardinal Bessarion, an uncial of the 8th or 9th century, numbered 23 in the edition of Holmes and Parsons, another in the possession of Cardinal Carafa, and several from the Medicean Library at Florence. The language of the Preface to the Roman edition (written by P. Morinus) might indeed lead the reader to suppose the text of the Vat. MS. to have been more closely followed than it really was, though he admits that the editors have changed the old orthography, and have corrected evident mistakes of the copyist. The Preface of Cardinal Carafa to the Latin translation published the next year (1588) as a complement to the edition gives a more correct account of the matter. (See on this subject Vercellone's Preface to Card. Mai's edition of the Vat. MS., vol. i. p. vi., note, and comp. Tischendorf's *Prolegom.* to his 4th ed. of the Sept., p. lxxxix.) It should further be observed that the Vat. MS. wants the larger part of the book of Genesis (it commences with the word πόλιν, Gen. xlvi. 28), Ps. cv. 27–cxxxviii. 6, and the books of Maccabees. The poetical and prophetical books of the O. T. (with the exception of Job), and the apocryphal books of Baruch, Wisdom, and Ecclesiasticus, were not collated for the edition of Holmes and Parsons. The edition of Cardinal Mai mentioned above is unsatisfactory (comp. Tischendorf, *ut supra*, p. lxxxix. ff.), though we may generally place confidence in its readings where its text differs from that of the Roman edition. It will be wholly superseded by the magnificent edition now publishing at Rome under the direction of Vercellone, Cozza, and Sergio, to be completed in six vols., of which two at least (one containing the N. T.) have already (Feb. 1870) appeared. Comp. the art. NEW TESTAMENT, vol. iii. p. 2121 *a*. A

*Other Editions.*

The Septuagint in Walton's Polyglott (1657) is the Roman text, with the various readings of the Codex Alexandrinus.

* The readings of other MSS. and of the Complutensian and Aldine editions are also given, and Walton reprints (vol. vi.) the valuable critical notes to the Roman edition, and to the Latin translation by Flaminius Nobilius which accompanied it. The text of the Roman edition is not very faithfully reproduced; see the Prolegomena to Bos's edition of the Septuagint (1709). A.

The Cambridge edition (1665), (Roman text,) is only valuable for the Preface by Pearson.

An edition of the Cod. Alex. was published by *Grabe* (Oxford, 1707–1720), but its critical value is far below that of Baber's. It is printed in common type, and the editor has exercised his judgment on the text, putting some words of the Codex in the margin, and replacing them by what he thought better readings, distinguished by a smaller type. This edition was reproduced by *Breitinger* (Zürich, 1730 [–32]), 4 vols. 4to, with the various readings of the Vatican text [the Roman edition].

The edition of *Bos* (Franeq. 1709) follows the Roman text, with its Scholia and the various read-

Digitized by Google

ings given in Walton's Polyglott, especially those of the Cod. Alex.

The valuable Critical Edition of *Holmes*, continued by *Parsons*, is similar in plan to the Hebrew Bible of Kennicott; it has the Roman text, with a large body of various readings from numerous MSS. and editions, *Oxford*, 1798–1827 [in 5 vols. fol.].

* For a full list of the MSS. used, see the end of vol. v.: they are described in the introductions to the different books. The uncials are numbered I. to XIII., IX. also being numbered by mistake 294, and XIII., 13. Nos. IV. and V. are really only parts of the same MS. To these are to be added Nos. 23, 27, 43, 258, and 262, making 17 uncials in all. The whole number of cursives, after making allowance for these which are designated by two different numbers, appears to be 285; but several of these are either mere transcripts of others on the list, or copied from the same archetype. Very few, if any, of these MSS. contain the whole of the Septuagint. A.

The Oxford Edition, by *Gaisford*, 1848, has the Roman text, with the various readings of the Codex Alexandrinus below.

*Tischendorf's* Editions (the 2d, 1856, [3d, 1860, 4th, 1869,]) are on the same plan; he has added readings from some other MSS. discovered by himself, with very useful Prolegomena.

* Besides the readings of the *Cod. Alex.*, he has given those of the *Codex Friderico-Augustanus*, and of the Ephrem MS. (See note *b* below.) The 2d and subsequent editions contain the Septuagint version of the book of Daniel in addition to that of Theodotion. The first edition (1850) having been stereotyped, the important materials gathered by Tischendorf since its publication have not been used (except to a small extent in his 4th edition) in the apparatus of various readings which accompanies the text. For a translation of the *Prolegomena* to Tischendorf's first edition, by Mr. Charles Short, see the *Bibl. Sacra* for Oct 1852 and Jan. 1853. A.

Some convenient editions have been published by Mr. Bagster, one in 8vo, and others of smaller size forming part of his Polyglott series of Bibles. His text is the Roman.

The latest edition, by *Mr. Field* (1859) differs from any of the preceding. He takes as his basis the Codex Alexandrinus, but corrects all the manifest errors of transcription, by the help of other MSS.; and brings the dislocated portions of the Septuagint into agreement with the order of the Hebrew Bible.[a]

### *Manuscripts.*

The various readings given by Holmes and Parsons, enable us to judge, in some measure, of the character of the several MSS. and of the degree of their accordance with the Hebrew text.

They are distinguished thus by Holmes: the *uncial* by Roman numerals [see the exceptions above], the *cursive* by Arabic figures.

Among them may be specially noted, with their probable dates and estimates of value as given by Holmes in his Preface to the Pentateuch: —

| | Uncial.[b] | Probable date. Century. |
|---|---|---|
| I. | Cottonianus. Brit. Mus. (fragments) . | 4 |
| II. | Vaticanus. Vat. Library, Rome . . . | 4 |
| III. | Alexandrinus. Brit. Mus. . . . . | 5 |
| VII. | Ambrosianus. Ambros. Lib., Milan . . | 7 |
| X. | Coislinianus. Bibl. Imp., Paris . . . | 7 |

[a] There are some singular variations in 1 Kings (see the article on Kings, vol. ii. p. 1549 f.).

[b] An uncial MS., brought by Tischendorf from St. Catherine's Monastery, and named Codex Sinaiticus, is supposed by him to be as ancient as Cod. Vaticanus (II.).

* This important manuscript was published by Tischendorf at St. Petersburg in 1862 in 4 vols. folio, the last containing the N. T. (For a description of the edition, see art. New Testament, iii. 2120 *b*.) Of the Old Testament, it contains 1 Chr. ix 27–xi. 22; Tobit ii. 2 to the end; Judith, except xi. 14–xiii. 8; 1st and 4th Macc.; Isaiah; Jer. i. 1–x. 25; the Minor Prophets from Joel to Malachi inclusive (wanting Hosea, Amos, Micah); and all the remaining poetical books (Psalms, Prov., Eccles., Cant., Wisdom of Sol., Ecclus., Job). The *Codex Friderico-Augustanus*, discovered by Tischendorf in 1844, and published in facsimile at Leipzig in 1846, consists of 43 leaves of the same manuscript, containing 1 Chr. xi. 22–xix. 17; Jer. ix. 9 to the end; Neh.; Esther; Tobit i. 1–ii. 2; Jer. x. 25 to the end; Lam i. 1–ii. 20. A few more fragments, most of which had been used by the monks of St. Catherine for binding MSS., contain small portions of Gen. xxiii., xxiv., and Num. v., vi, vii., and were published by Tischendorf in his *Mon. Sacr. ined. Nov. Coll.* vol. ii. p. 321 (1857), and *Appendix Codd. Sin. Vat Alex.* pp. 2–6 (1867). The books of Tobit and Judith in the Sinaitic MS. present a recension of the text differing very widely from that in the *Codex Vaticanus*.

Respecting the uncial MSS. mentioned in the text above, it should be stated that the fragments of the *Codex Cottonianus* (I.), containing part of Genesis, have been published by Tischendorf in his *Mon. Sacr. ined. Nova Coll.* vol. ii. pp. 95–176 (1857). The new edition of the Codex Vaticanus (II.) by Vercellone and others has already been referred to. The *Codex Amiatinus* (VII.), containing portions of the Pent. and Joshua, is in course of publication by Ceriani in vol. iii. of his *Monumenta sacra et profana ex Codicibus præsertim Biblioth. Ambrosianæ*, Milan, 1864 ff. Tischendorf assigns it to the 5th century instead of the 7th; and he (with Montfaucon) regards the Codex Coislinianus (X.) as probably belonging to the 6th century. The latter MS. has the Hexaplar text.

The fragments of the O. T. contained in the *Ephrem* manuscript, a palimpsest of the 5th century belonging to the Imperial Library at Paris, — namely, parts of Job, Proverbs, Ecclesiastes, Canticles, the Wisdom of Solomon, and Ecclesiasticus, — were published by Tischendorf in 1845. On his edition of the N. T. portion of the same MS. (designated by the letter C), see the art. New Testament, vol. iii. p. 2121.

Among the uncial MSS. collated for the edition of Holmes and Parsons, we may mention further the *Codex Sarravianus* (numbered by Holmes IV. and V.), of which 130 leaves are preserved at Leyden, 22 at Paris, and 1 at St. Petersburg. It has been published in part by Tischendorf in his *Mon. Sacr. ined. Nova Coll.* vol. iii. (1860), — the 22 Paris leaves are reserved for vol. viii., — and is referred by him to the 4th century or the beginning of the 5th. This MS. is of great importance for the Hexaplar text of Origen. It contains parts of the Pentateuch, Joshua, and Judges. The *Codex Marchalianus* (XII. Holmes) of the 7th century, now in the Vatican Library, is also an important Hexaplar MS., containing the Prophets. The part containing Daniel has been published by Tischendorf in vol. iv. of his *Monum.* (1869). Another uncial codex of the 8th or 9th century which has the Hexaplar text is Holmes's No. 23, belonging to the Library of St. Mark in Venice, containing Proverbs and all the following books of the O. T., with part of the book of Job. Next to the Vatican, this seems to have been the most important MS. used for the Roman edition of the Sept (1587) See above, p. 2913 *b*. No 265 in

The texts of these MSS. differ considerably from each other, and consequently differ in various degrees from the Hebrew original.

The following are the results of a comparison of the readings in the first eight chapters of Exodus: —

1. Several of the MSS. agree well with the Hebrew; others differ very much.

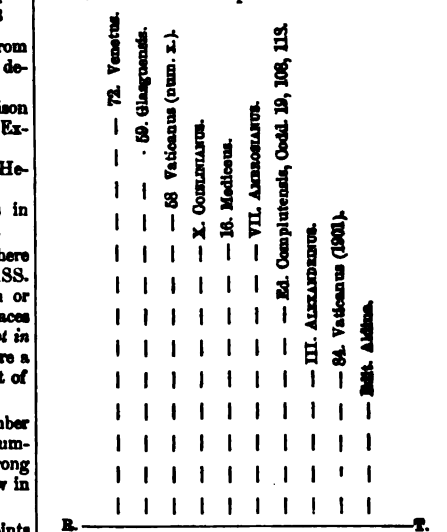
2. The chief variance from the Hebrew is in the addition, or omission, of words and clauses.

3. Taking the Roman text as the basis, there are found 80 places (α) where some of the MSS. differ from the Roman text, either by addition or omission, *in agreement with the Hebrew*; 26 places (β) where differences of the same kind are *not in agreement with the Hebrew*. There is therefore a large balance against the Roman text, in point of accordance with the Hebrew.

4. Those MSS. which have the largest number of differences of class (α) have the smallest number of class (β). There is evidently some strong reason for this close accordance with the Hebrew in these MSS.

5. The divergence between the extreme points of the series of MSS. may be estimated from the following statement: —

| | | |
|---|---|---|
| 72 differs from the Roman Text | in 40 places, *with* Hebrew. | |
| | in 4 " *against* " | |
| 59 ditto ditto | in 40 " *with* " | |
| | in 9 " *against* " | |



Between these and the Roman text lie many shades of variety.

The Alexandrine text falls about halfway between the two extremes: —

| | |
|---|---|
| Differing from Roman Text | in 25 places, *with* Hebrew. |
| | in 16 " *against* " |

The diagram below, drawn on a scale representing the comparison thus instituted (by the test of agreement with the Hebrew in respect of additions or omissions), may help to bring these results more clearly into view.

The base-line R. T. represents the Roman text.

The above can only be taken as an approximation, the range of comparison being limited. A

---

Holmes and Parsons's edition also represents an uncial MS., being the celebrated Zürich Psalter, to be noticed below.

For an account of 21 other very ancient MSS. of the Sept. not used by Holmes, see Tischendorf's *Prolegomena* to his 4th edition, p. lvii. ff. Many of these have been published by Tischendorf in vols. i.–iv. and vi. of his *Mon. Sacr. ined. Nova Coll.* (1855–1869), and others are destined for vol. viii. of the same collection. The most remarkable of them are the (1) Verona MS. of the Psalms, of the 5th or 6th century, in which the Greek text is written in Latin letters, with the Old Latin version in a parallel column. This was published by Blanchinus (Bianchini) at Rome in 1740, as an appendix to his *Vindiciæ Canon. Scripturarum*. (2.) Fragments of the Psalms on *papyrus*, in the British Museum, ascribed by Tischendorf to the 4th century, and formerly, at least, regarded by him as the oldest known Biblical MS. They are published in his *Mon. Sacr. ined. Nova Coll.* vol. i. pp. 217–278 (1855). (3.) Palimpsest fragments of the book of Numbers (now at St. Petersburg), of the 6th century, published by Tischendorf in his *Mon. Sacr. ined. Nova Coll.* vol. i. pp. 81–128 (1855). (4.) *Codex Tischendorfianus II.* (Leipzig), a palimpsest, containing fragments of Num., Deut., Josh., and Judges, of the 7th century. Published by Tischendorf in the vol. just mentioned, pp. 141–78. (5.) The *Codex Oxoniensis* (Bodl. Libr.) of the 8th century, discovered by Tischendorf in 1853, and published in his *Mon. Sacr. ined. Nova Coll.* vol. ii. pp. 179–308 (1857). It contains the larger part of Genesis. (6.) *Codex Cryptoferratensis*, a palimpsest of the 7th century, containing fragments of most of the prophetical books, belonging to the monastery of Grotta Ferrata near Rome, and published by Giuseppe Josua in his *Sacrorum Bibliorum vetustiss. Fragmenta Græca et Latina ex palimpsestis Codd. Biblioth. Cryptoferratensis eruta*, etc., Rome, 1867. The Zürich Psalter (No. 262, Holmes), a beautiful MS. in silver letters with the titles in gold, on purple vellum, has also just been published by Tischendorf in his *Mon. Sacr. ined. Nova Coll.* vol. iv. (1869).

For further information respecting the MSS. of the Septuagint one may consult, in addition to the *Prolegomena* of Holmes and Parsons and Tischendorf, F. A. Stroth's *Versuch einer Verzeichniss der Handschriften der LXX.*, in Eichhorn's *Repertorium*, v. 94 ff., viii. 177 ff., xi. 45 ff. (1779, 1780, 1782); the Preface to Lagarde's *Genesis Græce*, Lips. 1868; and the review of that work by Kamphausen in the *Theol. Stud. u. Krit.* 1869, p. 721 ff. Valuable contributions towards a classification of these MSS., with reference to the character of their text, have been made by O. F. Fritzsche in the works referred to at the end of this article. Digitized by Google

more extended comparison might enable us to discriminate the several MSS. more accurately, but the result would, perhaps, hardly repay the labor.

But whence these varieties of text? Was the Version at first more in accordance with the Hebrew, as in 72 and 59, and did it afterwards degenerate into the less accurate state of the Codex Vaticanus?

Or was the Version at first less accurate, like the Vatican text, and afterwards brought, by critical labors, into the more accurate form of the MSS. which stand highest in the scale?

History supplies the answer.

Hieronymus (*Ep. ad Suniam et Fretelam*, tom. 3. p. 627) speaks of two copies, one older and less accurate, *κοινή*, fragments of which are believed to be represented by the still extant remains of the old Latin Version; the other more faithful to the Hebrew, which he took as the basis of his own new Latin Version.

"In quo illud breviter admoneo, ut sciatis, aliam esse editionem, quam Origenes, et Cæsariensis Eusebius, omnesque Græciæ tractatores *κοινὴν*, id est, *communem*, appellant, atque *vulgatam*, et a plerisque nunc *Λουκιανὸν* dicitur; aliam LXX. interpretum, quæ et in *ἑξαπλοῖς* codicibus reperitur, et a nobis in Latinum sermonem fideliter versa est, et Hierosolymæ atque in Orientis Ecclesiis decantatur . . . . *κοινὴ* autem ista, hoc est, communis editio, ipsa est quæ et LXX. sed hoc interest inter utramque, quod *κοινὴ* pro locis et temporibus, et pro voluntate scriptorum, vetus corrupta editio est; ea autem quæ habetur in *ἑξαπλοῖς*, et quam nos vertimus, ipsa est quæ in eruditorum libris incorrupta et immaculata LXX. interpretum translatio reservatur. Quicquid ergo ab hoc discrepat, nulli dubium est, quin ita et ab Hebræorum auctoritate discordet."

In another place (*Præfat. in Paralip.* tom. i. col. 1022) he speaks of the corruption of the ancient translation, and the great variety of copies used in different countries: —

"Cum germana illa antiquaque translatio corrupta sit." . . . . "Alexandria et Ægyptus in LXX. suis Hesychium laudant auctorem: Constantinopolis usque Antiochiam Luciani Martyris exemplaria probat; mediæ inter has provinciæ Palæstinos codices legunt: quos *ab Origene elaboratos* Eusebius et Pamphilus vulgaverunt: totusque orbis hâc inter se contrariâ varietate compugnat."

The labors of Origen, designed to remedy the conflict of discordant copies, are best described in his own words (*Comment. in Matt.* tom. i. p. 381, ed. Huet.).

"Now there is plainly great difference in the copies, either from the carelessness of scribes, or the rash and mischievous correction of the text by others, or from the additions or omissions made by others at their own discretion. The discrepance in the copies of the Old Covenant, we have found means to remedy, by the help of God, *using as our criterion the other versions.* In all passages of the LXX. rendered doubtful by the discordance of the copies, *forming a judgment from the other versions*, we have preserved what agreed with them; and some words we have marked with an *obelos* as not found in the Hebrew, not venturing to omit them entirely; and some we have added with asterisks affixed, to show that they are not found in the LXX., but added by us from the other versions, in accordance with the Hebrew."

The other *ἐκδόσεις*, or versions, are those of Aquila, Theodotion, and Symmachus.

Origen, *Comm. in Joann.* (tom. ii. p. 131, ed. Huet.). "The same errors in names may be observed frequently in the Law and the Prophets, as we have learnt by diligent inquiry of the Hebrews, and by comparing our copies with their copies, as represented in the still uncorrupted versions of Aquila, Theodotion, and Symmachus."

It appears, from these and other passages, that Origen, finding great discordance in the several copies of the LXX., laid this version side by side with the other three translations, and, *taking their accordance with each other as the test of their agreement with the Hebrew*, marked the copy of the LXX. with an *obelos*, ÷, where he found superfluous words, and supplied the deficiencies of the LXX. by words taken from the other versions, with an *asterisk*, *, prefixed.

The additions to the LXX. were chiefly made from Theodotion (Hieronymus, *Prolog. in Genesin* tom. 1).

"Quod ut auderem, Origenis me studium provocavit, qui Editioni antiquæ translationem Theodotionis miscuit, asterisco * et obelo ÷, id est, stellâ et veru, opus omne distinguens: dum aut illuescere facit quæ minus ante fuerant, aut superflua quæque jugulat et confodit" (see also *Præf. in Job*, p. 795).

From Eusebius, as quoted below, we learn that this work of Origen was called *τετραπλᾶ*, *the fourfold Bible.* The specimen which follows is given by Montfaucon.

Gen. i. 1.

| ΑΚΥΛΑΣ. | ΣΥΜΜΑΧΟΣ. | Οἱ Ο. | Θεοδοτίωνος. |
|---|---|---|---|
| ἐν κεφαλαίῳ ἔκτισεν ὁ Θεὸς σὺν τὸν οὐρανὸν καὶ σὺν τὴν γῆν. | ἐν ἀρχῇ ἔκτισεν ὁ Θεὸς τὸν οὐρανὸν καὶ τὴν γῆν. | ἐν ἀρχῇ ἐποίησεν ὁ Θεὸς τὸν οὐρανὸν καὶ τὴν γῆν. | ἐν ἀρχῇ ἔκτισεν ὁ Θεὸς τὸν οὐρανὸν καὶ τὴν γῆν. |

But this was only the earlier and the smaller portion of Origen's labors; he rested not till he had acquired the knowledge of Hebrew, and compared the Septuagint directly with the Hebrew copies. Eusebius (*Hist. Eccl.* vi. 16, p. 217, ed. Vales.) thus describes the labors which led to the greater work, the *Hexapla*; the last clause of the passage refers to the *Tetrapla*: —

"So careful was Origen's investigation of the sacred oracles, that he learnt the Hebrew tongue, and made himself master of the original Scriptures received among the Jews, in the Hebrew letters: and reviewed the versions of the other interpreters of the Sacred Scriptures, besides the LXX.; and discovered some translations varying from the well-known versions of Aquila, Symmachus, and Theodotion, which he searched out, and brought to light from their long concealment in neglected corners . . . . and in his *Hexapla*, after the four principal versions of the Psalms, added a fifth, yea, a sixth and seventh translation, stating that one of these was found in a cask at Jericho, in the time of Antoninus, son of Severus: and bringing these all into one view, and dividing them in columns, over against one another, together with the Hebrew text, he left to us the work called *Hexapla*; having arranged separately, in the *Tetrapla*, the versions of Aquila, Symmachus, and Theodotion, together with the version of the Seventy."

Digitized by Google

So Jerome (in *Catal. Script. Eccl.* tom. iv. P. 2, p. 116): "Quis ignorat, quod tantum in Scripturis divinis habuerit studii, ut etiam Hebream linguam contra ætatis gentisque suæ naturam ediceret; et acceptis LXX. interpretibus, alias quoque editiones in unum volumen congregaret: Aquilæ scilicet Pontici proselyti, et Theodotionis Ebionæi, et Symmachi ejusdem dogmatis. . . . Præterea Quintam et Sextam et Septimam Editionem, quas etiam nos de ejus Bibliotheca habemus, miro labore reperit, et cum cæteris editionibus comparavit."

From another passage of Jerome (in *Epist. ad Titum*, tom. iv. P. 1, p. 437) we learn that in the Hexapla the Hebrew text was placed in one column in Hebrew letters, in the next column in Greek letters: —

"Unde et nobis curæ fuit omnes veteris legis libros, quos vir doctus Adamantius (Origenes) in Hexapla digesserat, de Cæsariensi Bibliotheca descriptos, ex ipsis authenticis emendare, in quibus et ipsa Hebræa propriis sunt characteribus verba descripta, et Græcis literis tramite expressa vicino."

HEXAPLA (Hos. xi. 1).

| Το ΕΒΡΑΙΚΟΝ. | Το ΕΒΡ. ΕΛΛΗΝΙΚΟΙΣ ΓΡ. | ΑΚΥΛΑΣ. | ΣΥΜΜΑΧΟΣ. | Οἱ Ο. | ΘΕΟΔΟΤΙΩΝ. |
|---|---|---|---|---|---|
| כי נער ישראל | χι νηρ | οτι παις | οτι παις | οτι νηπιος | οτι νηπιος |
| ואהבהו | Ισραηλ | Ισραηλ, | Ισραηλ | Ισραηλ και | Ισραηλ |
| וממצרים | ουναβηου | και ηγαπησα | και | εγω ηγαπησα | και ηγαπησα |
| קראתי לבני | ουμεμεσραιμ | αυτον, και | ηγαπημενος | αυτον και | αυτον και |
| | καραθι | απο Αιγυπτου | εξ Αιγυπτου | εξ Αιγυπτου | εκαλεσα |
| | λεβανι. | εκαλεσα | κεκληται | κεκληται | υιον μου |
| | | τον υιον μου. | υιος μου. | υιος μου. | εξ Αιγυπτου. |

It should here be mentioned that some take the *Tetrapla* as denoting, not a separate work, but only that portion of the Hexapla which contains the four columns filled by the four principal Greek versions. Valesius (*Notes on Eusebius*, p. 106) thinks that the Tetrapla was formed by taking those four columns out of the Hexapla, and making them into a separate book.

But the testimony of Origen himself (i. 381, ii. 131), above cited, is clear that he formed one corrected text of the Septuagint, by *comparison of the three other Greek versions* (A, Σ, Θ), *using them as his criterion*. If he had known Hebrew at this time, would he have confined himself to the Greek versions? Would he have appealed to the Hebrew, as represented by Aquila, etc.? It seems very evident that he must have learnt Hebrew at a later time, and therefore that the Hexapla, which rests on a comparison with the Hebrew, must have followed the Tetrapla, which was formed by the help of Greek versions only.

The words of Eusebius also (*H. E.* vi. 16) appear to distinguish very clearly between the Hexapla and Tetrapla as separate works, and to imply that the Tetrapla preceded the Hexapla.

The order of precedence is not a mere literary question; the view above stated, which is supported by Montfaucon, Usaher, etc., strengthens the force of Origen's example as a diligent student of Scripture, showing his increasing desire *integros accedere fontes*.

The labors of Origen, pursued through a long course of years, first in procuring by personal travel the materials for his great work, and then in comparing and arranging them, made him worthy of the name *Adamantius*.

But what was the result of all this toil? Where is now his great work, the Hexapla, prepared with so much care, and written by so many skillful hands? Too large for transcription, too early by centuries for printing (which alone could have saved it), it was destined to a short existence. It was brought from Tyre and laid up in the Library at Cæsarea, and there probably perished by the flames, A. D. 653.

One copy, however, had been made, by Pamphilus and Eusebius, of the column containing the corrected text of the Septuagint, with Origen's *asterisks* and *obeli*, and the letters denoting from which of the other translators each addition was taken. This copy is probably the ancestor of those Codices which now approach most nearly to the Hebrew, and are entitled *Hexaplar*; but in the course of transcription the distinguishing marks have disappeared or become confused; and we have thus a text composed partly of the old Septuagint text, partly of insertions from the three other chief Greek versions, especially that of Theodotion.

The facts above related agree well with the phenomena of the MSS. before stated. As we have Codices derived from the Hexaplar text, *e. g.* 72, 59, 58; and at the other extreme the Codex Vaticanus (II.), probably representing nearly the ancient uncorrected text, *κοινή*; so between these we find texts of intermediate character in the Codex Alexandrinus (III.), and others, which may perhaps be derived from the text of the Tetrapla.

To these main sources of our existing MSS. must be added the recensions of the Septuagint mentioned by Jerome and others, namely, those of Lucian of Antioch and Hesychius of Egypt, not long after the time of Origen. We have seen above that each of these had a wide range; that of Lucian (supposed to be corrected by the Hebrew) in the churches from Constantinople to Antioch; that of Hesychius in Alexandria and Egypt; while the churches lying between these two regions used the Hexaplar text copied by Eusebius and Pamphilus (Hieron. tom. i. col. 1022).

The great variety of text in the existing MSS. is thus accounted for by the variety of sources from which they have descended.

### I. HISTORY OF THE VERSION.

We have now to pursue our course upwards, by such guidance as we can find. The ancient text called *κοινή*, which was current before the time of Origen, whence came it?

We find it quoted by the early Christian Fathers in Greek by Clemens Romanus, Justin Martyr

Digitized by Google

Irenæus; in Latin versions by Tertullian and Cyprian; we find it questioned as inaccurate by the Jews (Just. Martyr, *Apol.*), and provoking them to obtain a better version (hence the versions of Aquila, etc.); we find it quoted by Josephus and Philo: and thus we are brought to the time of the Apostles and Evangelists, whose writings are full of citations and references, and imbued with the phraseology of the Septuagint.

But when we attempt to trace it to its origin, our path is beset with difficulties. Before we enter on this doubtful ground we may pause awhile to mark the wide circulation which the Version had obtained at the Christian era, and the important services it rendered, first, in preparing the way of CHRIST, secondly, in promoting the spread of the Gospel.

1. This version was highly esteemed by the Hellenistic Jews before the coming of Christ. An annual festival was held at Alexandria in remembrance of the completion of the work (Philo, *De Vita Mosis*, lib. ii.). The manner in which it is quoted by the writers of the New Testament proves that it had been long in general use. Wherever, by the conquests of Alexander, or by colonization, the Greek language prevailed: wherever Jews were settled, and the attention of the neighboring Gentiles was drawn to their wondrous history and law, there was found the Septuagint, which thus became, by Divine Providence, the means of spreading widely the knowledge of the one true God, and his promises of a Saviour to come, throughout the nations; it was indeed *ostium gentibus ad Christum*. To the wide dispersion of this version we may ascribe in great measure that general persuasion which prevailed over the whole East (*percrebuerat oriente toto*) of the near approach of the Redeemer, and led the Magi to recognize the star which proclaimed the birth of the King of the Jews.

2. Not less wide was the influence of the Septuagint in the spread of the Gospel. Many of those Jews who were assembled at Jerusalem on the day of Pentecost, from Asia Minor, from Africa, from Crete and Rome, used the Greek language; the testimonies to Christ from the Law and the Prophets came to them in the words of the Septuagint; St. Stephen probably quoted from it in his address to the Jews; the Ethiopian eunuch was reading the Septuagint version of Isaiah in his chariot (. . . . ὡς πρόβατον ἐπὶ σφαγὴν ἤχθη . . . .); they who were scattered abroad went forth into many lands speaking of Christ in Greek, and pointing to the things written of Him in the Greek version of Moses and the Prophets; from Antioch and Alexandria in the East to Rome and Massilia in the West the voice of the Gospel sounded forth in Greek; Clemens of Rome, Ignatius at Antioch, Justin Martyr in Palestine, Irenæus at Lyons, and many more, taught and wrote in the words of the Greek Scriptures; and a still wider range was given to them by the Latin version (or versions) made from the LXX. for the use of the Latin Churches in Italy and Africa; and in later times by the numerous other versions into the tongues of Ægypt, Æthiopia, Armenia, Arabia, and Georgia. For a long period the Septuagint was the Old Testament of the far larger part of the Christian Church.[a]

Let us now try to ascend towards the source. Can we find any clear, united, consistent testimony to the origin of the Septuagint? (1) Where and (2) when was it made? and (3) by whom? and (4) whence the title? The testimonies of ancient writers, or (to speak more properly) their traditions, have been weighed and examined by many learned men, and the result is well described by Pearson (*Præf. ad LXX.*, 1665):

"Neque vero de ejus antiquitate dignitateque quicquam impræsentiarum dicemus, de quibus viri docti multa, hoc præsertim sæculo, scripsere; qui cum maxime inter se dissentiant, *nihil adhuc satis certi et explorati videntur tradidisse.*"

1. The only point in which all agree is that Alexandria was the birthplace of the Version: the Septuagint begins where the Nile ends his course.

2. On one other point there is a near agreement, namely, as to time, that the Version was made, or at least commenced, in the time of the earlier Ptolemies, in the first half of the third century B. C.

3. *By whom was it made?* The following are some of the traditions current among the Fathers: —

Irenæus (lib. iii. c. 24) relates that Ptolemy Lagi, wishing to adorn his Alexandrian Library with the writings of all nations, requested from the Jews of Jerusalem a Greek version of their Scriptures; that they sent seventy elders well skilled in the Scriptures and in later languages; that the king *separated them from one another*, and bade them all translate the several books. When they came together before Ptolemy and showed their versions, God was glorified, for *they all agreed exactly*, from beginning to end, in every phrase and word, so that all men may know *that the Scriptures are translated by the inspiration of God.*

Justin Martyr (*Cohort. ad Græcos*, p. 34) gives the same account, and adds that he was taken to see the cells in which the interpreters worked.

Epiphanius says that the translators were divided into pairs, in 36 cells, each pair being provided with two scribes; and that 36 versions, agreeing in every point, were produced, *by the gift of the Holy Spirit* (*De Pond. et Mens.* cap. iii.–vi.).

Among the Latin Fathers Augustine adheres to the inspiration of the translators: "Non autem secundum LXX. interpretes, qui etiam ipsi divino Spiritu interpretati, ob hoc aliter videntur nonnulla dixisse, ut ad spiritualem sensum scrutandum magis admoneretur lectoris intentio . . . ." (*De Doctr. Christ.* iv. 15).

But Jerome boldly throws aside the whole story of the cells and the inspiration: "Et nescio quis primus auctor Septuaginta cellulas Alexandriæ mendacio suo extruxerit, quibus divisi eadem scripsitarent, cum Aristæus ejusdem Ptolemæi ὑπερασπιστὴς, et multo post tempore Josephus, nihil tale retulerint: sed in unâ basilicâ congregatos, contulisse scribant, non prophetasse. Aliud est enim vatem, aliud esse interpretem. Ibi spiritus ventura prædicit; hic eruditio et verborum copia ea quæ intelligit transfert" (*Præf. ad Pent.*).

The decision between these conflicting reports as to the inspiration may be best made by careful study of the Version itself.

It will be observed that Jerome, while rejecting the stories of others, refers to the relation of Aristæus, or Aristeas, and to Josephus, the former being followed by the latter.

[a] On this part of the subject see an Hulsean Prize Essay, by W. R. Churton, *On the Influence of the LXX. on the Progress of Christianity.*

Digitized by Google

This (so-called) letter of Aristeas to his brother Philocrates is still extant; it may be found at the beginning of the folio volume of Hody (*De Bibliorum Textibus Originalibus*, etc., Oxon. MDCCV.), and separately in a small volume published at Oxford (1692). It gives a splendid account of the origin of the Septuagint; of the embassy and presents sent by King Ptolemy to the high-priest at Jerusalem, by the advice of *Demetrius Phalereus, his librarian*, 50 talents of gold and 70 talents of silver, etc.; the Jewish slaves whom he set free, paying their ransom himself; the letter of the king; the answer of the high-priest; the choosing of six interpreters from each of the twelve tribes, and their names; the copy of the Law, in letters of gold; their arrival at Alexandria on the anniversary of the king's victory over Antigonus; the feast prepared for the seventy-two, which continued for seven days; the questions proposed to each of the interpreters in turn, with the answers of each; their lodging by the sea-shore; and the accomplishment of their work in seventy-two days, *by conference and comparison*.

Οἱ δὲ ἀνετέλουν ἕκαστα σύμφωνα ποιοῦντες πρὸς ἑαυτοὺς ταῖς ἀντιβολαῖς, τὸ δὲ ἐκ τῆς συμφωνίας γινόμενον πρεπόντως ἀναγραφῆς οὕτως ἐτύγχανε παρὰ τοῦ Δημητρίου . . . .

The king rejoiced greatly, and commanded the books to be carefully kept; gave to each three robes, two talents of gold, etc.; to Eleazar the high-priest he sent ten silver-footed tables, a cup of thirty talents, etc., and begged him to let any of the interpreters who wished come and see him again, for he loved to have such men and to spend his wealth upon them.

This is the story which probably gave to this version the title of the *Septuagint*. It differs from the later accounts above cited, being more embellished, but less marvelous. It speaks much of royal pomp and munificence, but says *nothing of inspiration*. The translators met together and conferred, and produced the best version they could.

A simpler account, and probably more genuine, is that given by Aristobulus (2d century B. C.) in a fragment preserved by Clemens Alexandrinus (*Stromata*, lib. v. p. 595) and by Eusebius (*Præp. Evang.* bk. xiii. c. 12): —

"It is manifest that Plato has followed our Law, and studied diligently all its particulars. For before Demetrius Phalereus a translation had been made, by others, of the history of the Hebrews' going forth out of Egypt, and of all that happened to them, and of the conquest of the land, and of the exposition of the whole Law. Hence it is manifest that the aforesaid philosopher borrowed many things; for he was very learned, as was Pythagoras, who also transferred many of our doctrines into his system. But the entire translation of our whole Law (ἡ δὲ ὅλη ἑρμήνεια τῶν διὰ τοῦ νόμου πάντων) was made in the time of the king named Philadelphus, a man of greater zeal, under the direction of Demetrius Phalereus." [a]

This probably expresses the belief which prevailed in the 2d century B. C., namely, that some portions of the Jewish history had been published in Greek before Demetrius, but that in his time and under his direction the whole Law was translated: and this agrees with the story of Aristeas.

The Prologue of the Wisdom of Jesus the Son of Sirach (ascribed to the time of Ptolemy Physcon, about 133 B. C.) makes mention of "the Law itself, the Prophets, and the rest of the books" having been translated from the Hebrew into another tongue.

The letter of Aristeas was received as genuine and true for many centuries; by Josephus and Jerome, and by learned men in modern times. The first who expressed doubts were Lud. de Vives (Note on Augustin. *De Civit. Dei*, xviii. 42) and Julius Scaliger, who boldly declared his belief that it was a forgery: "*a Judæo quodam Aristea nomine confectum esse:*" and the general belief of scholars now is, that it was the work of some Alexandrian Jew, whether with the object of enhancing the dignity of his Law, or the credit of the Greek version, or for the meaner purpose of gain. The age in which the letter of Aristeas makes its appearance was fertile in such fictitious writings (see Bentley *on Phalaris*, p. 85, ed. Dyce).

"The passage in Galen that I refer to is this. 'When the Attali and the Ptolemies were in emulation about their libraries, the knavery of forging books and titles began. For there were those that, to enhance the price of their books, put the names of great authors before them, and so sold them to those princes.'"

It is worth while to look through the letter of Aristeas, that the reader may see for himself how exactly the characters of the writing correspond to those of the fictitious writings of the Sophists, so ably exposed by Bentley.

Here are the same kind of errors and anachronisms in history, the same embellishments, eminent characters and great events, splendid gifts of gold and silver and purple, of which the writers of fiction were so lavish. These are well exposed by Hody; and we of later times, with our inherited wisdom, wonder how such a story could have obtained credit with scholars of former days.

"What clumsie cheats, those Sibylline oracles now extant, and Aristeas' story of the Septuagint, passed without contest, even among many learned men" (Bentley *on Phalaris*, Introd. p. 83).

But the Pseudo-Aristeas had a basis of fact for his fiction; on three points of his story there is no material difference of opinion, and they are confirmed by the study of the Version itself: —

1. The Version was made at Alexandria.

2. It was begun in the time of the earlier Ptolemies, about 280 B. C.

3. The Law (*i. e.* the Pentateuch) alone was translated at first.

It is also very possible that there is some truth in the statement of a copy being placed in the royal library. (The emperor Akbar caused the New Testament to be translated into Persian.)

But by whom was the Version made? As Hody justly remarks, "It is of little moment whether it was made at the command of the king or spontaneously by the Jews; but it is a question of great importance whether the Hebrew copy of the Law, and the interpreters (as Pseudo-Aristeas and his followers relate), were summoned from Jerusalem, and sent by the high-priest to Alexandria."

On this question no testimony can be so conclusive as the evidence of the Version itself, which bears upon its face the marks of imperfect knowledge of Hebrew, and exhibits the forms and phrases of the Macedonic Greek prevalent in Alexandria, with a plentiful sprinkling of Egyptian words. The

[a] Some doubts have been raised of the genuineness of this fragment, but it is well defended by Valckenaer (*Diatribe de Aristobulo Judæo*).

Digitized by Google

forms ἤλθοσαν, παρεσβάλοσαν, bewray the fellow-citizens of Lycophron, the Alexandrian poet, who closes his iambic line with κἀπὸ γῆς ἐσχάζοσαν. Hody (ii. c. iv.) gives several examples of Egyptian renderings of names, and coins, and measures; among them the hippodrome of Alexandria, for the Hebrew *Cîbrath* (Gen. xlviii. 7), and the papyrus of the Nile for the rush of Job (viii. 11). The reader of the LXX. will readily agree with his conclusion, "Sive regis jussu, sive sponte a Judæis, a Judæis Alexandrinis fuisse factam."

The question as to the moving cause which gave birth to the Version is one which cannot be so decisively answered either by internal evidence or by historical testimony. The balance of probability must be struck between the tradition, so widely and permanently prevalent, of the king's intervention, and the simpler account suggested by the facts of history, and the phenomena of the Version itself.

It is well known that, after the Jews returned from the Captivity of Babylon, having lost in great measure the familiar knowledge of the ancient Hebrew, the readings from the Books of Moses in the synagogues of Palestine were explained to them in the Chaldaic tongue, in Targums or Paraphrases; and the same was done with the Books of the Prophets when, at a later time, they also were read in the synagogues.

The Jews of Alexandria had probably still less knowledge of Hebrew; their familiar language was Alexandrian Greek. They had settled in Alexandria in large numbers soon after the time of Alexander, and under the earlier Ptolemies. They would naturally follow the same practice as their brethren in Palestine; the Law first and afterwards the Prophets would be explained in Greek, and from this practice would arise in time an entire Greek Version.

All the phenomena of the Version seem to confirm this view; the Pentateuch is the best part of the Version; the other books are more defective, betraying probably the increasing degeneracy of the Hebrew MSS., and the decay of Hebrew learning with the lapse of time.

4. *Whence the title?* It seems unnecessary to suppose, with Eichhorn, that the title *Septuagint* arose from the approval given to the Version by an Alexandrian Sanhedrim of 70 or 72; that title appears sufficiently accounted for above by the prevalence of the letter of Aristeas, describing the mission of 72 interpreters from Jerusalem. [For a different view of the origin of this name, founded on a curious Latin scholion, see art. VERSIONS, ANCIENT (GREEK). — A.]

## II. CHARACTER OF THE SEPTUAGINT.

We come now to consider the character of the Version, and the help which it affords in the criticism and interpretation of the Scriptures.

*The Character of the Version.* — Is it faithful in substance? Is it minutely accurate in details? Does it bear witness for or against the tradition of its having been made by special inspiration?

These are some of the chief questions: there are others which relate to particulars, and it will be well to discuss these latter first, as they throw some light on the more general questions.

א. Was the Version made from Hebrew MSS. with the vowel-points now used?

A few examples will indicate the answer.

1. PROPER NAMES

| | *Hebrew.* | *Septuagint* |
|---|---|---|
| Ex. vi. 17. | לִבְנִי, Libni. | Λοβενεί. |
| vi. 19. | מַחְלִי, Machli. | Μοολεί. |
| xiii. 20. | אֵתָם, Etham. | Ὀθάμ. |
| Deut. iii. 10. | סַלְכָה, Salchah. | Ἐλχᾶ. |
| iv. 43. | בֶּצֶר, Beser. | Βοσόρ. |
| xxxiv. 1. | פִּסְגָּה, Pisgah. | Φασγά. |

2. OTHER WORDS.

| | *Hebrew.* | *Septuagint.* |
|---|---|---|
| Gen. i. 9. | מָקוֹם, *place.* | συναγωγή (מִקְוֵה). |
| xv. 11. | וַיַּגֵּיב אֹתָם, *and he drove them away.* | καὶ συνεκάθισεν αὐτούς (וַיַּשֶׁב אֹתָם). |
| Ex. xii. 17. | אֶת־חַמֵּצוֹת, *unleavened bread.* | τὴν ἀντολὴν ταύτην (אֶת־חַמֻּצָּה). |
| Num. xvi. 5. | בֹּקֶר, *in the morning.* | ἐπέσκεπται (בָּקַר). |
| Deut. xv. 18. | מִשְׁנֶה, *double.* | ἐπέταιον (מִשְׁנָה). |
| Is. ix. 7. | דָּבָר, *a word.* | θάνατον (דֶּבֶר). |

Examples of these two kinds are innumerable. Plainly the Greek translators had not Hebrew MSS. pointed as at present.

In many cases (*e. g.* Ex. ii. 25; Nahum iii. 8) the LXX. have probably preserved the true pronunciation and sense where the Masoretic pointing has gone wrong.

ב. Were the Hebrew words divided from one another, and were the final letters, ך, ם, ן, ף, ץ, in use when the Septuagint was made?

Take a few out of many examples: —

| | *Hebrew.* | *LXX* |
|---|---|---|
| (1.) | Deut. xxiv. 5. אֲרַמִּי אֹבֵד, *a perishing Syrian* | Συρίαν ἀπέβαλεν (אֲרָם יֹאבֵד). |
| (2.) | 2 K. ii. 14. אַף־הוּא, *he also.* | ἀφφώ [they join the two words in one]. |
| (3.) | 2 K. xxii. 20. לָכֵן, *therefore.* | οὐχ οὕτως (לֹא־כֵן). |
| (4.) | 1 Chr. xvii. 10. וְאַגֶּד לְךָ, *and I will tell thee.* | καὶ αὐξήσω σε (וַאֲבַנֶּה לְךָ). |
| (5.) | Hos vi. 5. וּמִשְׁפָּטֶיךָ אוֹר יֵצֵא, *and thy judgments (are as) the light (that) goeth forth.* | καὶ τὸ κρίμα μου ὡς φῶς ἐξελεύσεται. The LXX. read וּמִשְׁפָּטַי כָּאוֹר. |
| (6.) | Zech. xi. 7. לָכֵן עֲנִיֵּי הַצֹּאן, *even you, O poor of the flock.* | εἰς τὴν Χαναανῖτιν [they join the two first words]. |

Here we find three cases (2, 4, 6) where the LXX. read as one word what makes two in the present Hebrew text: one case (3) where one Hebrew word is made into two by the LXX.; two cases (1, 5) where the LXX. transfer a letter from the end of one word to the beginning of the next

Digitized by Google

By inspection of the Hebrew in these cases it will be easily seen that the Hebrew MSS. must have been written without intervals between the words, and that the present final forms were not then in use.

In three of the above examples (4, 5, 6), the Septuagint has probably preserved the true division and sense.

In the study of these minute particulars, which enable us to examine closely the work of the translators, great help is afforded by *Cappelli Critica Sacra*, and by the *Vorstudien* of Frankel, who has most diligently anatomized the text of the LXX. His projected work on the whole of the Version has not been completed, but he has published a part of it in his treatise *Ueber den Einfluss der Palästinischen Exegese auf die Alexandrinische Hermeneutik*, in which he reviews minutely the Septuagint Version of the Pentateuch.

We now proceed to the larger questions.

A. *Is the Septuagint faithful in substance?* Here we cannot answer by citing a few examples; the question refers to the general texture, and any opinion we express must be verified by continuous reading.

1. And first it has been clearly shown by Hody, Frankel, and others, that the several books were translated by different persons, without any comprehensive revision to harmonize the several parts. Names and words are rendered differently in different books; *e. g.* פֶּסַח, the passover, in the Pentateuch is rendered πάσχα, in 2 Chr. xxxv. 6, φασέκ.

אוּרִים, *Urim*. Ex. xxviii. 30 (LXX. 26), δήλωσις, Deut. xxxiii. 8, δῆλοι, Ezr. ii. 63, φανερίζοντες, Neh. vii. 65, φανερώσων.

תֻּמִּים, *Thummim*, in Ex. xxviii. 30 (LXX. 26), ἡ ἀλήθεια; in Ezr. ii. 63, τέλειον.

The Philistines in the Pentateuch and Joshua are φυλιστιείμ, in the other books, ἀλλόφυλοι.

The books of Judges, Ruth, Samuel, and Kings, are distinguished by the use of ἐγώ εἰμι, instead of ἐγώ.

These are a few out of many like variations.

2. Thus the character of the Version varies much in the several books; those of the Pentateuch are the best, as Jerome says (*Confitemur plus quam cæteris cum Hebraicis consonare*), and this agrees well with the external evidence that the Law was translated first, when Hebrew MSS. were more correct and Hebrew better known. Perhaps the simplicity of the style in these early books facilitated the fidelity of the Version.

3. The poetical parts are, generally speaking, inferior to the historical, the original abounding with rarer words and expressions. In these parts the reader of the LXX. must be continually on the watch lest an imperfect rendering of a difficult word mar the whole sentence. The Psalms and Proverbs are perhaps the best.

4. In the Major Prophets (probably translated nearly 100 years after the Pentateuch) some of the most important prophecies are sadly obscured: *e. g.* Is. ix. 1, τοῦτο πρῶτον πίε ταχὺ ποίει, χόρα Ζαβουλὼν, κ. τ. λ., and in ix. 6, *Exstas noctus est interpretum sese indignum* (Zuingl!); Jer. xxiii. 6, καὶ τοῦτο τὸ ὄνομα αὐτοῦ ὃ καλέσει αὐτὸν Κύριος Ἰωσεδὲκ ἐν τοῖς προφήταις

Ezekiel and the Minor Prophets (speaking generally) seem to be better rendered. The LXX. version of Daniel was not used, that of Theodotion being substituted for it.

5. Supposing the numerous glosses and duplicate renderings, which have evidently crept from the margin into the text, to be removed (*e. g.* Is. vii. 16; Hab. iii. 2; Joel i. 8), — for these are blemishes, not of the Version itself, but of the copies, — and forming a rough estimate of what the Septuagint was in its earliest state, we may perhaps say of it, in the words of the well-known simile, that it was, in many parts, *the wrong side of the Hebrew tapestry*, exhibiting the general outlines of the pattern, but confused in the more delicate lines, and with many ends of threads visible; or, to use a more dignified illustration, the Septuagint is the image of the original seen through a glass not adjusted to the proper focus; the larger features are shown, but the sharpness of definition is lost.

B. We have anticipated the answer to the second question — *Is the Version minutely accurate in details?* — but will give a few examples:

1. The *same* word in the same chapter is often rendered by *differing* words, — Ex. xii. 13, וּפָסַחְתִּי, "I will pass over," LXX. σκεπάσω, but 23, וּפָסַח, "will pass over," LXX. παρελεύσεται.

2. *Differing* words by the *same* word, — Ex. xii. 23, עָבַר, "pass through," and וּפָסַח, "pass over," both by παρελεύσεται; Num. xv. 4, 5, מִנְחָה, "offering," and זֶבַח, "sacrifice," both by θυσία.

3. The divine names are frequently interchanged; Κύριος is put for אֱלֹהִים, God, and Θεός for יְהוָה, Jehovah; and the two are often wrongly combined or wrongly separated.

4. Proper names are sometimes translated, sometimes not. In Gen. xxiii. by translating the name *Machpelah* (τὸ διπλοῦν), the Version is made to speak first of the cave being in the field (ver. 9), and then of the *field being* in the cave (ver. 17), ὁ ἀγρὸς Ἐφρών, ὃς ἦν ἐν τῷ διπλῷ σπηλαίῳ, the last word not warranted by the Hebrew. Zech. vi. 14 is a curious example of four names of persons being translated, *e. g.* לְטוֹבִיָּה, "to Tobijah," LXX. τοῖς χρησίμοις αὐτῆς; Pisgah in Deut. xxxiv. 1 is φασγά, but in Deut. iii. 27, τοῦ λελαξευμένου.

5. The translators are often misled by the similarity of Hebrew words: *e. g.* Num. iii. 26, מֵיתָרָיו, "the cords of it," LXX. τὰ κατάλοιπα, and iv. 26, τὰ περισσά. In other places, οἱ κάλοι, and Is. liv. 2, τὰ σχοινίσματα, both rightly. Ex. iv. 31, יִשְׁמְעוּ, "they heard," LXX. ἐχάρη (יִשְׂמְחוּ); Num. xvi. 15, "I have not taken one ass" (חֲמוֹר), LXX. οὐκ ἐπιθύμημα (חֶמְדָּה) εἴληφα; Deut. xxxii. 10, יִמְצָאֵהוּ, "he found him," LXX. αὐτὸν ἐφύλαξεν αὐτόν; 1 Sam. xii. 2, שַׂבְתִּי, "I am grayheaded," LXX. κεκαθήσουαι (יָשַׁבְתִּי); Gen. iii. 17, בַּעֲבוּרֶךָ, "for thy sake," LXX. ἐν τοῖς ἔργοις σου (ד for ר).

Digitized by Google

In very many cases the error may be thus traced to the similarity of some of the Hebrew letters, ד and ר, ח and ת, י and ו, etc.; in some it is difficult to see any connection between the original and the Version: *e. g.* Deut. xxxii. 8, בְּנֵי יִשְׂרָאֵל, "the sons of Israel," LXX. ἀγγέλων Θεοῦ. Aquila and Symmachus, υἱῶν Ἰσραήλ.

| Is. xxi. 11, 12. | LXX. |
|---|---|
| Watchman, what of the night? | Φυλάσσετε ἐπάλξεις, |
| Watchman, what of the night? | Φυλάσσω τοπρωΐ καὶ |
| The watchman said, | τὴν νύκτα. |
| The morning cometh, and also | Ἐὰν ζητῆς ζήτει· |
| the night: | Καὶ πάρ' ἄλλοι εἶκε. |
| If ye will inquire, inquire ye. | |
| Return, come. | |

6. Besides the above deviations, and many like them, which are probably due to accidental causes, the change of a letter, or doubtful writing in the Hebrew, there are some passages which seem to exhibit a studied variation in the LXX. from the Hebrew: *e. g.* Gen. ii. 2, on the seventh (הַשְּׁבִיעִי) day God *ended his work*, LXX. συνετέλεσεν ὁ Θεὸς ἐν τῇ ἡμέρᾳ τῇ ἕκτῃ τὰ ἔργα αὐτοῦ. The addition in Ex. xii. 40, καὶ ἐν τῇ γῇ Χαναάν, appears to be of this kind, inserted to solve a difficulty.

Frequently the strong expressions of the Hebrew are softened down; where human parts are ascribed to God, for *hand* the LXX. substitute *power*; for *mouth* — *word*, etc. Ex. iv. 16, "Thou shalt be to him instead of God" (לֵאלֹהִים), LXX. σὺ δὲ αὐτῷ ἔσῃ τὰ πρὸς τὸν Θεόν; see Ex. iv. 15. These and many more savor of design, rather than of accident or error.

The Version is, therefore, not minutely accurate in details; and it may be laid down as a principle, *never to build any argument on words or phrases of the Septuagint, without comparing them with the Hebrew.* The Greek *may* be right; but very often its variations are wrong.

Γ. We shall now be prepared to weigh the tradition of the Fathers, that the Version was made by inspiration: κατ' ἐπίπνοιαν τοῦ Θεοῦ, Irenæus; "divino Spiritu interpretati," Augustine. Even Jerome himself seems to think that the LXX. may have sometimes added words to the original, "*ob Spiritus Sancti auctoritatem, licet in Hebraïs voluminibus non legatur*" (*Præfat. in Paralip.* tom. i. col. 1419).

Let us try to form some conception of what is meant by the *inspiration of translators.* It cannot mean what Jerome here seems to allow, that the translators were divinely moved to add to the original, for this would be the *inspiration of Prophets*; as he himself says in another passage (*Prolog. in Genesin*, tom. i.) "*aliud est enim vertere, aliud esse interpretem.*" Every such addition would be, in fact, a new revelation.

Nor can it be, as some have thought, that the deviations of the Septuagint from the original were divinely directed, whether in order to adapt the Scriptures to the mind of the heathen, or for other purposes. This would be, *pro tanto*, a new revelation, and it is difficult to conceive of such a revelation; for, be it observed, the discrepance between the Hebrew and Greek Scriptures would tend to separate the Jews of Palestine from those of Alexandria, and of other places where the Greek Scriptures were used; there would be two different copies of the same books dispersed throughout the world, each claiming Divine authority; the appeal to Moses and the Prophets would lose much of its force; the standard of Divine truth would be rendered doubtful; the trumpet would give an uncertain sound.

No! If there be such a thing as an *inspiration of translators*, it must be an effect of the Holy Spirit on their minds, enabling them to do their *work of translation* more perfectly than by their own abilities and acquirements; to overcome the difficulties arising from defective knowledge, from imperfect MSS., from similarity of letters, from human infirmity and weariness; and so to produce a copy of the Scriptures, setting forth the Word of God, and the history of his people, in its original truth and purity. This is the kind of inspiration claimed for the translators by Philo (*Vit. Moïs*, lib. ii.): "We look upon the persons who made this Version, not merely as translators, but as persons chosen and set apart by Divine appointment, to whom it was given to comprehend and express the sense and meaning of Moses in the fullest and clearest manner."

The reader will be able to judge, from the foregoing examples, whether the Septuagint Version satisfies this test. If it does, it will be found not only substantially faithful, but minutely accurate in details; it will enable us to correct the Hebrew in every place where an error has crept in; it will give evidence of that faculty of intuition in its highest form, which enables our great critics to divine from the faulty text the true reading; it will be, in short, a republication of the original text, purified from the errors of human hands and eyes, stamped with fresh authority from Heaven.

This is a question to be decided by facts, by the phenomena of the Version itself. We will simply declare our own conviction that, instead of such a Divine republication of the original, we find a marked distinction between the original and the Septuagint; a distinction which is well expressed in the words of Jerome (*Prolog. in Genesin*): "Ibi Spiritus ventura prædicit; hic eruditio et verborum copia ea quæ intelligit transfert."

And it will be remembered that this agrees with the ancient narrative of the Version, known by the name of Aristeas, which represents the interpreters as meeting in one house, forming one council, conferring together, and agreeing on the sense (see Hody, lib. ii. c. vi.).

There are some, perhaps, who will deem this estimate of the LXX. too low; who think that the use of this version in the N. T. stamps it with an authority above that of a mere translation. But as the Apostles and Evangelists do not invariably cite the O. T. according to this version, we are left to judge by the light of facts and evidence. Students of Holy Scripture, as well as students of the natural world, should bear in mind the maxim of Bacon: "Sola spes est in veră inductione."

### III. What, then, are the benefits to be derived from the study of the Septuagint?

After all the notices of imperfection above given, it may seem strange to say, but we believe it to be the truth, that the student of Scripture can scarcely read a chapter without some benefit, especially if he be a student of Hebrew, and able, even in a very humble way, to compare the Version with the Original.

Digitized by Google

1. For the Old Testament. We have seen above, that the Septuagint gives evidence of the character and condition of the Hebrew MSS. from which it was made, with respect to vowel-points and the mode of writing.

This evidence often renders very material help in the correction and establishment of the Hebrew text. Being made from MSS. far older than the Masoretic recension, the Septuagint often indicates readings more ancient and more correct than those of our present Hebrew MSS. and editions; and often speaks decisively between the conflicting readings of the present MSS.

*E. g.* Ps. xxii. 17 (in LXX. xxi. 16), the printed Hebrew text is כָּאֲרִי; but several MSS. have a verb in 3d pers. plural, כָּארוּ: the LXX. steps in to decide the doubt, *ὤρυξαν χεῖράς μου καὶ πόδας μου*, confirmed by Aquila, *ἤσχυναν*.

Ps. xvi. 10. The printed text is חֲסִידְךָ, in the plural; but near 200 MSS. have the singular, חֲסִידֶךָ, which is clearly confirmed by the evidence of the LXX., *οὐδὲ δώσεις τὸν ὅσιόν σου ἰδεῖν διαφθοράν*.

In passages like these, which touch on the cardinal truths of the Gospel, it is of great importance to have the testimony of an unsuspected witness, in the LXX., long before the controversy between Christians and Jews.

In Hosea vi. 5, the context clearly requires that the first person should be maintained throughout the verse; the LXX. corrects the present Hebrew text, without a change except in the position of one letter, *τὸ κρίμα μου ὡς φῶς ἐξελεύσεται*, rendering unnecessary the addition of words in Italics, in our English Version.

More examples might be given, but we must content ourselves with one signal instance, of a clause omitted in the Hebrew (probably by what is called *ὁμοιοτέλευτον*), and preserved in the LXX. In Genesis iv. 8, is a passage which in the Hebrew, and in our English Version, is evidently incomplete: —

"And Cain talked (וַיֹּאמֶר קַיִן) with Abel his brother; and it came to pass when they were in the field," etc.

Here the Hebrew word וַיֹּאמֶר is the word constantly used as the introduction to words spoken, "Cain *said* unto Abel" . . . . , but, as the text stands, there are no words spoken; and the following words " . . . . *when they were in the field*," come in abruptly. The LXX. fills up the *lacuna Hebræorum codicum* (Pearson), *καὶ εἶπε Κάϊν τῷ Ἄβελ τὸν ἀδελφὸν αὐτοῦ, διέλθωμεν εἰς τὸ πεδίον* (=בַּשָּׂדֶה נֵלְכָה). The Sam. Pentateuch and the Syriac Version agree with the LXX., and the passage is thus cited by Clemens Romanus (*Ep.* i. c. iv.). The Hebrew transcriber's eye was probably misled by the word שָׂדֶה, terminating both the clauses. [For a different view, see p. 2909 *a*, 2d par. (1). — A.]

In all the foregoing cases, we do not attribute any paramount *authority* to the LXX. on account of its superior antiquity to the extant Hebrew MSS.; but we take it as an evidence of a more ancient Hebrew text, as an eye-witness of the texts, 280 or 180 years B. C. The decision as to any particular reading must be made by weighing this evidence, together with that of other ancient Versions, with the arguments from the context, the rules of grammar, the genius of the language, and the comparison of parallel passages. And thus the Hebrew will sometimes correct the Greek, and sometimes the Greek the Hebrew; both liable to err through the infirmity of human eyes and hands, but each checking the other's errors.

2. The close connection between the Old and New Testament makes the study of the Septuagint extremely valuable, and almost indispensable to the theological student. Pearson quotes from Irenæus and Jerome, as to the citation of the words of prophecy from the Septuagint. The former, as Pearson observes, speaks too universally, when he says that the Apostles, "prophetica *omnia* ita enunciaverunt quemadmodum Seniorum interpretatio continet." But it was manifestly the chief storehouse from which they drew their proofs and precepts. Mr. Grinfield [a] says that "the number of direct quotations from the Old Testament in the Gospels, Acts, and Epistles, may be estimated at 350, of which not more than 50 materially differ from the LXX. But the indirect verbal allusions would swell the number to a far greater amount" (*Apol. for LXX.*, p. 37). The comparison of the citations with the Septuagint is much facilitated by Mr. Grinfield's "Editio Hellenistica" of the New Testament, and by Mr. Gough's *New Test. Quotations*, in which the Hebrew and Greek passages of the Old Test. are placed side by side with the citations in the New. (On this subject see Hody, pp. 248, 281; Kennicott, *Dissert. Gen.* § 84; Cappelli, *Critica Sacra*, vol. ii.) [See also Turpie's *The Old Test. in the New* (Lond. 1868), which gives various readings of the Hebrew and Greek; Kantzsch, *De Vet. Test. Locis a Paulo Apost. allegatis*, Lips. 1869; and the works referred to at the end of the art. OLD TESTAMENT, vol. iii. pp. 2239 *b*, 2240 *a*. — A.]

3. Further, the language of the LXX. is the mould in which the thoughts and expressions of the Apostles and Evangelists are cast. In this version Divine Truth has taken the Greek language as its shrine, and adapted it to the things of God. Here the peculiar idioms of the Hebrew are grafted upon the stock of the Greek tongue; words and phrases take a new sense. The terms of the Mosaic ritual in the Greek Version are employed by the Apostles to express the great truths of the Gospel, *e. g.* *ἀρχιερεύς, θυσία, δομὴ εὐσεβίας*. Hence the LXX. is a treasury of illustration for the Greek Testament.

Many examples are given by Pearson (*Præf. ad LXX.*), *e. g.* *σάρξ, πνεῦμα, δικαίωμα, φρόνημα τῆς σαρκός*. "Frustra apud veteres Græcos quæras quid sit *πιστεύειν τῷ Θεῷ*, vel *εἰς τὸν Θεόν*, quid sit *εἰς τὸν Κύριον*, vel *πρὸς τὸν Θεὸν πίστις*, quæ toties in Novo Fœdere inculcantur, et ex lectione Seniorum facile intelliguntur."

Valckenaer also (on Luke i. 51) speaks strongly on this subject: "Græcum Novi Testamenti contextum rite intellecturo nihil est utilius, quam diligenter versasse Alexandrinam antiqui Fœderis interpretationem, e quâ unâ plus peti poterit auxilii, quam ex veteribus scriptoribus Græcis simul sumtis. Centena reperientur in N. T. nusquam obvia in

[a] One of the most diligent students of the LXX., who has devoted his life to the promotion of this branch of Scripture study, and has lately founded a Lecture on the LXX. in the University of Oxford

Digitized by Google

scriptis Graecorum veterum, sed frequentata in Alex. Versione."

*E. g.* the sense of τὸ πάσχα in Deut. xvi. 2, including the sacrifices of the Paschal week, throws light on the question as to the day on which our Lord kept his last Passover, arising out of the words in John xviii. 28, ἀλλ' ἵνα φάγωσι τὸ πάσχα.

4. The frequent citations of the LXX. by the Greek Fathers, and of the Latin Version of the LXX. by the Fathers who wrote in Latin, form another strong reason for the study of the Septuagint. Pearson cites the appellation of *Scarabæus bonus*, applied to Christ by Ambrose and Augustine, as explained by reference to the LXX. in Habak. ii. 11, κάνθαρος ἐκ ξύλου.

5. On the value of the LXX. as a monument of the Greek language in one of its most curious phases, this is not the place to dwell. Our business is with the use of this Version, as it bears on the criticism and interpretation of the Bible. And we may safely urge the theological student who wishes to be "thoroughly furnished" to have always at his side the Septuagint. Let the Hebrew, if possible, be placed before him; and at his right, in the next place of honor, the Alexandrian Version; the close and careful study of this Version will be more profitable than the most learned inquiry into its origin; it will help him to a better knowledge both of the Old Testament and the New.

### Objects to be attained by the Critical Scholar.

1. A question of much interest still waits for a solution. In many of the passages which show a *studied variation* from the Hebrew (some of which are above noted), the Septuagint and the Samaritan Pentateuch agree together: *e. g.* Gen. ii. 2; Ex. xii. 40.

They also agree in many of the ages of the post-diluvian Patriarchs, adding 100 years to the age at which the first son of each was born, according to the Hebrew. (See Cappelli *Crit. Sacr.* iii., xx., vii.)

They agree in the addition of the words διέλθωμεν εἰς τὸ πεδίον, Gen. iv. 8, which we have seen reason to think rightly added.

Various reasons have been conjectured for this agreement; translation into Greek from a Samaritan text, interpolation from the Samaritan into the Greek, or *vice versâ*; but the question does not seem to have found a satisfactory answer. [Samaritan Pentateuch, p. 2811 *b*; Versions, Ancient (Greek).]

2. For the critical scholar it would be a worthy object of pursuit to ascertain, as nearly as possible, the original text of the Septuagint as it stood in the time of the Apostles and Philo. If this could be accomplished with any tolerable completeness, it would possess a strong interest, as being the first translation of any writing into another tongue, and the first repository of Divine truth to the great colony of Hellenistic Jews at Alexandria.

The critic would probably take as his basis the Roman edition, from the Codex Vaticanus, as representing most nearly the ancient (κοινή) texts. The collection of fragments of Origen's *Hexapla*, by Montfaucon and others, would help him to eliminate the additions which have been made to the LXX. from other sources, and to purge out the glosses and double renderings; the citations in the New Testament and in Philo, in the early Christian Fathers, both Greek and Latin, would render assistance of the same kind; and perhaps the most effective aid of all would be found in the fragments of the Old Latin Version collected by Sabatier in 3 vols. folio (Rheims, 1743).

3. Another work, of more practical and general interest, still remains to be done, namely, to provide a Greek version, accurate and faithful to the Hebrew original, for the use of the Greek Church, and of students reading the Scriptures in that language for purposes of devotion or mental improvement. Mr. Field's edition is as yet the best edition of this kind; it originated in the desire to supply the Greek Church with such a faithful copy of the Scriptures; but as the editor has followed the text of the Alexandrian MS., only correcting, by the help of other MSS., the evident errors of transcription (*e. g.* in Gen. xv. 15, correcting τραφείς in the Alex. MS. to ταφείς, the reading of the Complut. text), and as we have seen above that the Alexandrian text is far from being the nearest to the Hebrew, it is evident that a more faithful and complete copy of the Old Testament in Greek might yet be provided.

We may here remark, in conclusion, that such an edition might prepare the way for the correction of the blemishes which remain in our Authorised English Version. Embracing the results of the criticism of the last 250 years, it might exhibit several passages in their original purity; and the corrections thus made, being approved by the judgment of the best scholars, would probably, after a time, find their way into the margin, at least, of our English Bibles.

One example only can be here given, in a passage which has caused no small perplexity and loads of commentary. Is. ix. 3 is thus rendered in the LXX.: τὸ πλεῖστον τοῦ λαοῦ, ὁ κατήγαγες ἐν εὐφροσύνῃ σου· καὶ εὐφρανθήσονται ἐνώπιόν σου, ὡς οἱ εὐφραινόμενοι ἐν ἀμήτῳ, καὶ ὃν τρόπον οἱ διαιρούμενοι σκῦλα.

It is easy to see how the faulty rendering of the first part of this has arisen from the similarity of Hebrew letters, ר and ה, ד and ר, and from an ancient error in the Hebrew text. The following translation restores the whole passage to its original clearness and force: —

> ἐπλήθυνας τὴν ἀγαλλίασιν (הַגְוִיל),
> ἐμεγαλύνας τὴν εὐφροσύνην·
> εὐφραίνονται ἐνώπιόν σου ὡς οἱ εὐφραινόμενοι
> ἐν ἀμήτῳ,
> ὃν τρόπον ἀγαλλιῶνται οἱ διαιρούμενοι σκῦλα.
>
> Thou hast multiplied the gladness,
> Thou hast increased the joy;
> They rejoice before thee as with the joy of harvest,
> As men are glad when they divide the spoil.

Here ἀγαλλίασις and ἀγαλλιῶνται, in the first and fourth lines, correspond to גִּיל and יָגִילוּ: εὐφροσύνη and εὐφραίνονται, in the second and third, to שִׂמְחָה and שָׂמְחוּ.

The fourfold *introverted* parallelism is complete, and the connection with the context of the prophecy perfect.

It is scarcely necessary to remark that in such an edition the apocryphal additions to the book of Esther, and those to the book of Daniel, which are not recognized by the Hebrew Canon, would be either omitted, or (perhaps more properly, since they appear to have been incorporated with the

Digitized by Google

Septuagint at an early date) would be placed separately, as in Mr. Field's edition and our English Version. [See APOCRYPHA; CANON; DANIEL, APOC. ADDITIONS; ESTHER; SAMARITAN PENT.]

* We have as yet no critical edition of the Septuagint, — none in which the existing materials for settling the text have been applied for that purpose. The available materials are indeed inadequate. It is to be hoped, however, that through the labors of Bianchini, Baber, Tischendorf, Vercellone and Cozza, Ceriani, and others, we shall soon have the text of all the known *uncial* MSS. of this version published in a trustworthy form. When this is accomplished, Tischendorf promises, if his life is spared, to undertake a new edition, "talem qualem litterae sacrae poscunt et per instrumenta critica perfici licebit" (Pref. to his 4th ed., 1869, p. vii.). But before a thoroughly satisfactory edition can be prepared a great amount of labor must still be spent on the cursive manuscripts, the ancient versions made from the Greek (the Old Latin, Egyptian in different dialects, Æthiopic, Armenian, and Hexaplar Syriac), and on the quotations from the Sept. in the writings of the Fathers. The edition of Holmes and Parsons leaves very much to be desired in all these respects. A formidable programme of the work required, and a small but thankworthy contribution towards it, are given by P. A. de Lagarde in his *Genesis Graece, e Fide Ed. Sixtinae addita Scripturae Discrepantia e Libris Manu scriptis a se ipso conlatis et Edd. Compl. et Ald. accuratissime enotata* (Lips. 1868); comp. the review by Kamphausen in the *Theol. Stud. u. Krit.*, 1869, pp. 721–758. Useful preliminary labor has also been performed by O. F. Fritzsche, especially in regard to the classification of the MSS., in his editions of several books, namely, ΕΞΘΗΡ. *Duplicem Libri Textum ad optimos Codices edidit*, Turici, 1848; Τωβὶθ κατὰ τοὺς Ο', *ibid.* 1864; *Liber Iudicum secundum LXX. Interpretes. Triplicem Textus Conformationem recensuit*, etc. *ibid.* 1867, first published as two University programmes with the title, *Specimen novae Ed. crit. LXX. Interpretum.* He has also paid particular attention to the text in the *Kurzgef. exeg. Handb. zu d. Apokryphen d. A. T.*, edited by him and C. L. W. Grimm (1851–59); and the valuable articles *Alexandrinische Uebersetzung* and *Vulgata* in Herzog's *Real-Encykl.* are from his pen.

On the MSS. of the Sept. see before, p. 2914 f. and note *b*; see also Amersfoordt, *De variis Lectionibus Holmesianis Locorum quorundam Pentateuchi*, Lugd. Bat. 1815. Respecting the Hexaplar text there are a number of important articles by Doederlein, Matthaei, Eichhorn, Bruns, and De Rossi in Eichhorn's *Repertorium*; see also VERSIONS, ANCIENT (SYRIAC), I, B, and the editions of Jeremiah (by Spohn) and Ezekiel mentioned below. The more important MSS. containing this text have already been referred to (p. 2914 f. note *b*). For the quotations of the Christian Fathers, see F. A. Struth, *Beiträge zur Kritik üb. d. 70 Dollmetscher*, in Eichhorn's *Repert.* ii. 66 ff., iii. 213 ff. vi. 124 ff., xiii. 158 ff.; comp. Credner's *Beiträge zur Einl. in d. bibl. Schriften* (1838), Bd. ii. A new edition of the Hexapla has been begun by F Field, Tom. ii. fasc. 1, 2, Lond. 1867–68, 4to.

Among the monographs relating to the Septuagint version of particular books, we may also mention the following: G. Bickell, *De Indole et Rat. Vers. Alex. in interpretando Libro Jobi*, Marb 1863. J. G. Jäger, *Obss. in Prov. Salomonis Vers. Alex.* 1788. P. A. de Lagarde, *Anmerkungen zur griech. übers. d. Proverbien*, Leips. 1863. G. L. Spohn, *Jeremias Vates e Vers. Jud. Alex. ac reliq. Interp. Graecorum emend. Notisque crit. illustr.* 2 vols. Lips. 1794–1824. F. C. Movers, *De utriusque Recens. Vaticin. Jerem. Indole et Origine*, Hamb. 1837. J. Wichelhaus, *De Jerem. Vers. Alex. Indole et Auctoritate*, Hal. 1846. *Jezeciel secundum LXX. ex Tetraplis Origenis e singulari Chisiano Codice. . . . op. A. Vincentii de*

---

[a] * A special value of this treatise by Dr. Thiersch is the testimony which it furnishes to the accuracy of our present Hebrew text. His decision after an elaborate collation of the two works is, that in the great bulk of the passages the Greek Septuagint of the Pentateuch and the traditionary Masoretic text correspond to each other as nearly as the different genius of the two languages will permit. Variations exist, it is true, but we can refer these for the most part to principles of translation on the part of the Seventy, rhetorical or dogmatic, which will account for them without assuming the existence of different Hebrew readings. The conclusion of Dr. Thiersch under this head is: "Haec dissertatione videmur demonstrasse eam esse versionis Pentateuchi Alexandrinae indolem, ut ad explicandum quidem textum Masorethicum non parum conferat, *ad mutandum* vero nisi magna cum temeritate adhiberi nequeat."

The other two parts of the treatise relate to the character of the Greek dialect represented in this version, and to the unconsciously transferred Hebraisms which are mixed with it. The author's view as to the basis of the Greek dialect in distinction from its Hebrew coloring is substantially that of Sturz, Buttmann, Winer, and others.

*Regibus*, Rom. 1840, fol. *Daniel sec. LXX. ex Tetraplis Origenis nunc primum ed. e sing. Chisiano Codice*, Rom. 1772, fol., reprinted in several editions, the best by Hahn, Lips. 1845. J. G. C. Hoepfner, *Curarum crit. et exeg. in LXX. viralem Vers. Vaticin. Jonæ Specim.* i.–iii. Lips. 1787–88. The Septuagint version of the books of Samuel and Kings is particularly discussed by Thenius (*Kurzgef. exeg. Handb. zum A. T.* vols. iv., ix.). He regards it as a very important help in the correction of the Hebrew text.

Other dissertations worth naming are by L. T. Spittler, *De Usu Vers. Alex. ap. Josephum*, Gott. 1779; J. G. Scharfenberg, *De Josephi et Vers. Alex. Consensu*, Lips. 1780; and T. Studer, *De Vers. Alex. Origine, Hist. et Abusu critico*, Bern. 1823. See also Geiger, *Urschrift u. Uebersetzungen der Bibel*, Breal. 1857; Ewald, *Gesch. des Volkes Israel*, 3e Ausg. (1863), iv. 322 ff.; and the art. VERSIONS, ANCIENT (GREEK), in this *Dictionary*.

A good Lexicon to the Sept. is still a desideratum. The *Novus Thesaurus philol. sive Lex. in LXX.* etc. of J. C. Biel, 3 vols. Hagæ-Com. 1779–80, and the *Novus Thes. phil.-criticus* of J. F. Schleusner, 5 pts. Lips. 1820–21, reprinted at Glasgow in 1822 in 3 vols. 8vo, are but little more than collections of valuable materials for a dictionary, rudely arranged. Much better (for the Apocrypha) is C. A. Wahl's *Clavis Librorum Vet. Test. Apocr. Philologica*, Lips. 1863. A.

**SEPULCHRE.** [BURIAL.]

**SE'RAH** (שֶׂרַח [*abundance*]: Σάρα in Gen., Σορέ in 1 Chr.; Alex., Σαάρ in Gen., Σαρέ in 1 Chr.: *Sara*). The daughter of Asher (Gen. xlvi. 17; 1 Chr. vii. 30); called in Num. xxvi. 46, SARAH.

**SERA'IAH** [3 syl.] (שְׂרָיָה [*warrior of Jehovah*]: Σαρά; [Vat. Ασα:] Alex. Σαραιας: *Saraïas*). 1. Seraiah, the king's scribe or secretary in the reign of David (2 Sam. viii. 17). In the Vatican MS. [Roman ed.] of the LXX. Σαρά appears to be the result of a confusion between Seraiah and Shisha, whose sons were secretaries to Solomon (1 K. iv. 3).

2. (Σαραΐας, [Σαραΐα;] Alex. [Σαραΐα,] Σαραΐας: *Saraïas.*) The high-priest in the reign of Zedekiah. He was taken captive to Babylon by Nebuzaradan, the captain of the guard, and slain with others at Riblah (2 K. xxv. 18; 1 Chr. vi. 14; Jer. lii. 24).

3. ([Σαραΐας; Vat. in Jer., Σαραια:] *Saraïa, Sarea.*) The son of Tanhumeth the Netophathite, according to 2 K. xiv. 23, who came with Ishmael, Johanan, and Jaazaniah to Gedaliah, and was persuaded by him to submit quietly to the Chaldæans and settle in the land (Jer. xl. 8).

4. (Σαραΐα; [Alex. in ver. 14, Σαρια:] *Saraïa.*) The son of Kenaz, brother of Othniel, and father of Joab, the father or founder of the valley of Charashim (1 Chr. iv. 13, 14).

5. (Σαραΰ; [Vat. Σαρααν;] Alex. Σαραια.) Ancestor of Jehu, a chief of one of the Simeonite families (1 Chr. iv. 35).

6. (Σαραΐας; [Vat. Αραιας.]) One of the children of the province who returned with Zerubbabel (Ezr. ii. 2). In Neh. vii. 7 he is called AZARIAH, and in 1 Esdr. v. 8, ZACHARIAS.

7. [Σαραΐας.] One of the ancestors of Ezra the scribe (Ezr. vii. 1), but whether or not the same as Seraiah the high-priest seems uncertain. Called also SARAIAS (1 Esdr. viii. 1; 2 Esdr. i. 1).

8. (υἱὸς Ασελα; Alex. [FA.] υἱος Σαρεαι: [*Saraias.*]) A priest, or priestly family, who signed the covenant with Nehemiah (Neh. x. 2).

9. (Σαραΐα: [*Saraïa.*]) A priest, the son of Hilkiah (Neh. xi. 11), who was ruler of the house of God after the return from Babylon. In 1 Chr. ix. 11 he is called AZARIAH.

10. (Σαραΐα.) The head of a priestly house which went up from Babylon with Zerubbabel. His representative in the days of Joiakim the high-priest was Meraiah (Neh. xii. 1, 12).

11. (Σαραΐας; [FA. in ver. 59, Σαρεας.]) The son of Neriah, and brother of Baruch (Jer. li. 59, 61). He went with Zedekiah to Babylon in the 4th year of his reign, or, as the Targum has it, "in the mission of Zedekiah," and is described as שַׂר מְנֻחָה, *sar mənúchâh* (lit. "prince of rest;" A. V. "a quiet prince;" marg. "or, princes of Menucha, or, chief chamberlain"), a title which is interpreted by Kimchi as that of the office of chamberlain, "for he was a friend of the king, and was with the king at the time of his rest, to talk and to delight himself with him." The LXX. and Targum read מַנְחָה, *minchâh*, "an offering," and so Rashi, who says, "under his hand were those who saw the king's face, who brought him a present." The Peshito-Syriac renders "chief of the camp," apparently reading מַחֲנֶה, *machâneh*, unless the translator understood *mənúchâh* of the halting-place of an army, in which sense it occurs in Num. x. 33. Gesenius adopts the latter view, and makes Seraiah hold an office similar to that of "quartermaster-general" in the Babylonian army. It is perfectly clear, however, that he was in attendance upon Zedekiah, and an officer of the Jewish court. The suggestion of Maurer, adopted by Hitzig, has more to commend it, that he was an officer who took charge of the royal caravan on its march, and fixed the place where it should halt. Hiller (*Onom.*) says Seraiah was prince of Menuchah, a place on the borders of Judah and Dan, elsewhere called Manahath. The rendering of the Vulgate is unaccountable, *princeps prophetiæ.*

Seraiah was commissioned by the prophet Jeremiah to take with him on his journey the roll in which he had written the doom of Babylon, and sink it in the midst of the Euphrates, as a token that Babylon should sink, never to rise again (Jer. li. 60–64). W. A. W.

**SER'APHIM** (שְׂרָפִים [see below]: Σεραφίμ: *Seraphim*). An order of celestial beings, whom Isaiah beheld in vision standing above Jehovah (not as in A. V., "above *it*," *i. e.* the throne) as He sat upon his throne (Is. vi. 2). They are described as having each of them three pairs of wings, with one of which they covered their faces (a token of humility; comp. Ex. iii. 6; 1 K. xix. 13; Plutarch, *Quæst. Rom.* 10); with the second they covered their feet (a token of respect; see Lowth on Is. vi. who quotes Chardin in illustration); while with the third they flew. They seem to have borne a general resemblance to the human figure, for they are represented as having a face, a voice, feet, and hands (ver. 6). Their occupation was twofold — to celebrate the praises of Jehovah's holiness and power (ver. 3), and to act as the medium of communication between heaven and earth (ver. 6). From their antiphonal chant ("one cried unto another") we may conceive them to have been ranged in opposite rows on each side of

Digitized by Google

the throne. As the Seraphim are nowhere else mentioned in the Bible, our conceptions of their appearance must be restricted to the above particulars, aided by such uncertain light as etymology and analogy will supply. We may observe that the idea of a winged human figure was not peculiar to the Hebrews: among the sculptures found at *Mourghaub* in Persia, we meet with a representation of a man with two pairs of wings, springing from the shoulders, and extending, the one pair upwards, the other downwards, so as to admit of covering the head and the feet (Vaux's *Nin. and Persep.* p. 322). The wings in this instance imply deification; for speed and ease of motion stand, in man's imagination, among the most prominent tokens of Divinity. The meaning of the word "seraph" is extremely doubtful; the only word which resembles it in the current Hebrew is *sdraph*,[a] "to burn," whence the idea of *brilliancy* has been extracted. Such a sense would harmonize with other descriptions of celestial beings (*e. g.* Ex. i. 13; Matt. xxviii. 3); but it is objected that the Hebrew term never bears this secondary sense. Gesenius (*Thes.* p. 1341) connects it with an Arabic term signifying *high* or *exalted;* and this may be regarded as the generally received etymology; but the absence of any cognate Hebrew term is certainly worthy of remark. The similarity between the names Seraphim and Sarapis, led Hitzig (in *Is.* vi. 2) to identify the two, and to give to the former the figure of a winged serpent. But Sarapis was unknown in the Egyptian Pantheon until the time of Ptolemy Soter (Wilkinson's *Anc. Eg.* iv. 360 ff.); and, even had it been otherwise, we can hardly conceive that the Hebrews would have borrowed their imagery from such a source. Knobel's conjecture that Seraphim is merely a false reading for *shârâthim*,[b] "ministers," is ingenious, but the latter word is not Hebrew. The relation subsisting between the Cherubim and Seraphim presents another difficulty: the "living creatures" described in Rev. iv. 8 resemble the Seraphim in their occupation and the number of the wings; and the Cherubim in their general appearance and number, as described in Ez. i. 5 ff., x. 12. The difference between the two may not, therefore, be great, but we cannot believe them to be identical so long as the distinction of name holds good. W. L. B.

**SE'RED** (סֶרֶד [*fear*]: Σαρέδ in Gen., Ζαρέδ in Num.: *Sared*). The firstborn of Zebulon, and ancestor of the family of the SARDITES (Gen. xlvi. 14; Num. xxvi. 26).

• **SERGEANTS** occurs only in Acts xvi. 35, 38, answering to ῥαβδοῦχοι, properly "rod-bearers" (in Latin, *lictores*). They were the official attendants of the higher Roman magistrates, and executed their orders, especially for the arrest and punishment of criminals. Their duties were civil rather than military, and "sergeants," in its older English sense, was less inappropriate than it is at present. In the colonies the lictors carried staves, not *fasces*, as at Rome. It was to them that the rulers at Philippi gave the command to beat Paul and Silas (ἐκέλευον ῥαβδίζειν). Luke speaks of the presence of "rod-bearers" only in his account of what took place at Philippi; and it is almost the only place in his narrative where he could slightly introduce them. Philippi being a Roman colony, unlike other Grecian cities, was governed after the Roman mode; its chief officers, though properly called according to their number *duumviri* or *quatuorviri*, assumed the more honorary title of *prætors* (στρατηγοί, five times here in Acts), and in token of the Roman sovereignty, had rod-bearers or lictors as at Rome [COLONY, Amer. ed.] The lictors exercised their highest functions during the time of the republic, but still existed under the emperors. (See Pauly's *Real. Encykl.* iv. 1062 f.) Paul was at Philippi in the time of Claudius, about A. D. 52. H.

**SER'GIUS PAU'LUS** (Σέργιος Παῦλος: *Sergius Paulus*) was the name of the proconsul of Cyprus when the Apostle Paul visited that island with Barnabas on his first missionary tour (Acts xiii. 7 ff.). He is described as an intelligent man (συνετός), truth-seeking, eager for information from all sources within his reach. It was this trait of his character which led him in the first instance to admit to his society Elymas the Magian, and afterwards to seek out the missionary strangers and learn from them the nature of the Christian doctrine. The strongest minds at that period were drawn with a singular fascination to the occult studies of the East; and the ascendancy which Luke represents the "sorcerer" as having gained over Sergius illustrates a characteristic feature of the times. For other examples of a similar character, see Howson's *Life and Epistles of Paul*, vol. i. p. 177 f. But Sergius was not effectually or long deceived by the arts of the impostor; for on becoming acquainted with the Apostle he examined at once the claims of the Gospel, and yielded his mind to the evidence of its truth.

It is unfortunate that this officer is styled "deputy" in the Common Version, and not "proconsul," according to the import of the Greek term (ἀνθύπατος). Though Cyprus was originally an imperial province (Dion Cassius, liii. 12), and as such governed by proprætors or legates (ἀντιστράτηγοι, πρεσβευταί), it was afterwards transferred to the Roman senate, and henceforth governed by proconsuls (καὶ οὗτοι ἀνθύπατοι καὶ ἐς ἐκεῖνα τὰ ἤθη πέμπεσθαι ἤρξαντο, Dion Cassius, liv. 4). For the value of this attestation of Luke's accuracy, see Lardner's *Credibility of the Gospel History*, vol. i. p. 32 ff. Coins too are still extant, on which this very title, ascribed in the Acts to Sergius Paulus, occurs as the title of the Roman governors of Cyprus. (See Akerman's *Numismatic Illustrations*, p. 41; and Howson's *Life and Epistles of Paul*, vol. i. pp. 176, 187.) H. B. H.

**SE'RON** (Σήρων: in Syr. and one Gk. MS. Ἥρων: *Seron*), a general of Antiochus Epiph., in chief command of the Syrian army (1 Macc. iii. 13, ὁ ἄρχων τ. δυν. Σ.), who was defeated at Bethhoron by Judas Maccabæus (B. C. 166), as in the day when Joshua pursued the five kings "in the going down of Beth-horon" (1 Macc. iii. 24; Josh. x. 11). According to Josephus, he was the governor of Cœle-Syria and fell in the battle (Josh. *Ant.* xii. 7, § 1), nor is there any reason to suppose that his statements are mere deductions from the language of 1 Macc. B. F. W.

**SERPENT.** The following Hebrew words denote serpents of some kind or other. *'Acshûb*, *pethen*, *tsephâ'* or *tsiph'ônî*, *shephiphôn*, *nâchâsh*, and *eph'eh*. There is great uncertainty with respect to the identification of some of these terms, the first four of which are noticed under the arti-

sles ADDER and ASP: the two remaining names we proceed to discuss.

.. *Nâchâsh* (נָחָשׁ: ὄφις, δράκων: *serpens, coluber*), the generic name of any serpent, occurs frequently in the O. T. The following are the principal Biblical allusions to this animal: its subtilty is mentioned in Gen. iii. 1; its wisdom is alluded to by our Lord in Matt. x. 16; the poisonous properties of some species are often mentioned (see Ps. lviii. 4; Prov. xxiii. 32); the sharp tongue of the serpent, which it would appear some of the ancient Hebrews believed to be the instrument of poison, is mentioned in Ps. cxl. 3; Job xx. 16, "the viper's tongue shall slay him;" although in other places, as in Prov. xxiii. 32; Eccl. x. 8, 11; Num. xxi. 9, the venom is correctly ascribed to the bite, while in Job xx. 14 the gall is said to be the poison; the habit serpents have of lying concealed in hedges is alluded to in Eccl. x. 8, and in holes of walls, in Am. v. 19; their dwelling in dry sandy places, in Deut. viii. 15; their wonderful mode of progression did not escape the observation of the author of Prov. xxx. who expressly mentions it as "one of the three things which were too wonderful for him" (ver. 19); the oviparous nature of most of the order is alluded to in Is. lix. 5, where the A. V., however, has the unfortunate rendering of "cockatrice." The art of taming and charming serpents is of great antiquity, and is alluded to in Ps. lviii. 5; Eccl. x. 11; Jer. viii. 17, and doubtless intimated by St. James (iii. 7), who particularizes serpents among all other animals that "have been tamed by man." [SERPENT-CHARMING.]

It was under the form of a serpent that the devil seduced Eve; hence in Scripture Satan is called "the old serpent" (Rev. xii. 9, and comp. 2 Cor. xi. 3).

The part which the serpent played in the transaction of the Fall must not be passed over without some brief comment, being full of deep and curious interest. First of all, then, we have to note the subtilty ascribed to this reptile, which was the reason for its having been selected as the instrument of Satan's wiles, and to compare with it the quality of wisdom mentioned by our Lord as belonging to it, "Be ye wise as serpents," Matt. x. 16. It was an ancient belief, both amongst Orientals and the people of the western world, that the serpent was endued with a large share of sagacity. The Hebrew word translated "subtle," though frequently used in a good sense, implies, it is probable, in this passage, "mischievous and malignant craftiness," and is well rendered by Aquila and Theodotion by πανοῦργος, and thus commented upon by Jerome, "magis itaque hoc verbo calliditas et versutia quam sapientia demonstratur" (see Rosenmüller, *Schol. l. c.*). The ancients give various reasons for regarding serpents as being endued with wisdom, as that one species, the *Cerastes*, hides itself in the sand, and bites the heels of animals as they pass, or that, as the head was considered the only vulnerable part, the serpent takes care to conceal it under the folds of the body. Serpents have in all ages been regarded as emblems of cunning craftiness. The particular wisdom alluded to by our Lord refers, it is probable, to the sagacity displayed by serpents in avoiding danger. The disciples were warned to be as prudent in not incurring unnecessary persecution.

It has been supposed by many commentators that the serpent, prior to the Fall, moved along in an erect attitude, as Milton (*Par. Lost*, ix. 496 says, —

> "Not with indented wave
> Prone on the ground, as since, but on his rear,
> Circular base of rising folds that tower'd
> Fold above fold, a surging mass."

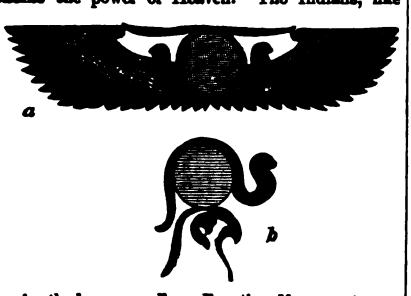
Compare also Josephus, *Antiq.* i. 1, § 4, who believed that God now for the first time inserted poison under the serpent's tongue, and deprived him of the use of feet, causing him to crawl low on the ground by the undulating inflexions of the body (κατὰ τῆς γῆς ἑλισσόμενον). Patrick (*Comment. l. c.*) entertained the extraordinary notion that the serpent of the Fall was a winged kind (*Saraph*).

It is quite clear that an erect mode of progression is utterly incompatible with the structure of a serpent, whose motion on the ground is so beautifully effected by the mechanism of the vertebral column and the multitudinous ribs which, forming as it were so many pairs of levers, enable the animal to move its body from place to place; consequently, had the snakes before the Fall moved in an erect attitude, they must have been formed on a different plan altogether. It is true that there are saurian reptiles, such as the *Saurophis tetradactylus* and the *Chamæsaura anguina* of S. Africa, which in external form are very like serpents, but with quasi-feet; indeed, even in the boa-constrictor, underneath the skin near the extremity, there exist rudimentary legs; some have been disposed to believe that the snakes before the Fall were similar to the *Saurophis*. Such an hypothesis, however, is untenable, for all the fossil ophidia that have hitherto been found differ in no essential respects from modern representatives of that order: it is, moreover, beside the mark, for the words of the curse, "upon thy belly shalt thou go," are as characteristic of the progression of a saurophoid serpent before the Fall as of a true ophidian after it. There is no reason whatever to conclude from the language of Scripture that the serpent underwent any change of form on account of the part it played in the history of the Fall. The sun and the moon were in the heavens long before they were appointed "for signs and for seasons, and for days and for years." The typical form of the serpent and its mode of progression were in all probability the same before the Fall as after it; but subsequent to the Fall its form and progression were to be regarded with hatred and disgust by all mankind, and thus the animal was cursed "above all cattle," and a mark of condemnation was forever stamped upon it. There can be no necessity to show how that part of the curse is literally fulfilled which speaks of the "enmity" that was henceforth to exist between the serpent and mankind; and though, of course, this has more especial allusion to the devil, whose instrument the serpent was in his deceit, yet it is perfectly true of the serpent. Few will be inclined to differ with Theocritus (*Id.* xv. 58): —

> Τὸν ψυχρὸν ὄφιν τανύλλοτα δεδοίκω
> Ἐκ ταὐδός.

Serpents are said in Scripture to "eat dust" (see Gen. iii. 14; Is. lxv. 25; Mic. vii. 17); these animals, which for the most part take their food on the ground, do consequently swallow with it large portions of sand and dust.

"Almost throughout the East," writes Dr. Kalisch (*Hist. and Crit. Comment.* Gen. iii. 1), "the



Digitized by Google

serpent was used as an emblem of the evil principle, of the spirit of disobedience and contumacy. A few exceptions only can be discovered. The Phœnicians adored that animal as a beneficent genius; and the Chinese consider it as a symbol of superior wisdom and power, and ascribe to the kings of heaven (*fien-hoangs*) bodies of serpents.

Cneph Agathodæmon, denoting Immortality (see Horapollo, i. 1).

Some other nations fluctuated in their conceptions regarding the serpent. The Egyptians represented the eternal spirit Knepb, the author of all good, under the mythic form of that reptile; they understood the art of taming it, and embalmed it after death; but they applied the same symbol for the god of revenge and punishment (Tithrambo), and for Typhon, the author of all moral and physical evil; and in the Egyptian symbolical alphabet the serpent represents subtlety and cunning, lust and sensual pleasure. In Greek mythology it is certainly, on the one hand, the attribute of Ceres, of Mercury, and of Æsculapius, in their most beneficent qualities; but it forms, on the other hand, a part of the terrible Furies or Eumenides: it appears in the form of a Python as a fearful monster, which the arrows of a god only were able to destroy; and it is the most hideous and most formidable part of the impious giants who despise and blaspheme the power of Heaven. The Indians, like

b. Head of hawk surmounted by globe and serpent.

the savage tribes of Africa and America, suffer and nourish, indeed, serpents in their temples, and even in their houses; they believe that they bring happiness to the places which they inhabit; they worship them as the symbols of eternity; but they regard them also as evil genii, or as the inimical powers of nature which is gradually depraved by them, and as the enemies of the gods, who either tear them in pieces or tread their venomous head under their all-conquering feet. So contradictory is all animal worship. Its principle is, in some instances, gratitude, and in others fear; but if a noxious animal is very dangerous the fear may manifest itself in two ways, either by the resolute desire of extirpating the beast, or by the wish of averting the conflict with its superior power; thus the same fear may, on the one hand, cause fierce enmity, and on the other submission and worship." (See on the subject of serpent worship, Vossius, *de Orig. Idol.* i. 5; Bryant's *Mythology*, i. 420–490; it is well illustrated in the apocryphal story of "Bel and the Dragon:" comp. Steindorff, *de* Ὀφιολατρείᾳ; Winer's *Bib. Realwört.* ii. 488.) The subjoined wood-cut represents the horned *cerastes*, as very frequently depicted on the Egyptian monuments.

Horned Cerastes. From Egyptian Monuments

The evil spirit in the form of a serpent appears in the Ahriman, or lord of evil, who, according to the doctrine of Zoroaster, first taught men to sin under the guise of this reptile (*Zendavesta*, ed. Kleuk. i. 25, iii. 84; see J. Reinh. Rus *de serpente seductore non naturali sed diabolo*, Jen. 1712, and Z. Grapius, *de tentatione Evæ et Christi a diabolo in assumpto corpore facta*, Rostoch. 1712). But compare the opinion of Dr. Kalisch, who (*Comment.* on Gen. iii. 14, 15) says "the serpent is the reptile, not an evil demon that had assumed its shape . . . . If the serpent represented Satan, it would be extremely surprising that the former only was cursed; and that the latter is not even mentioned . . . . it would be entirely at variance with the Divine justice forever to curse the animal whose shape it had pleased the evil one to assume." According to the Talmudists, the name of the evil spirit that beguiled Eve was Sammâel (סַמָּאֵל); "R. Moses ben Majemon scribit in More lib. 2, cap. 30, Sammaelem inquitasse serpenti antiquo et seduxisse Evam. Dicit etiam nomen hoc absolute usurpari de Satana, et *Sammaelem nihil aliud* esse quam ipsum Satanam" (Buxtorf, *Lex. Talm.* 1495).

Much has been written on the question of the "fiery serpents" (הַנְּחָשִׁים הַשְּׂרָפִים) of Num. xxi. 6, 8, with which it is usual erroneously to identify the "fiery flying serpent" of Is. xxx. 6, and xiv. 29. In the transaction recorded (Num. *l. c.*; Deut. viii. 15) as having occurred at the time of the Exodus, when the rebellious Israelites were visited with a plague of serpents, there is not a word about their having been "flying" creatures; there is therefore no occasion to refer the venomous snakes in question to the kind of which Niebuhr (*Descript. de l'Arab.* p. 156) speaks, and which the Arabs at Basra denominate *Heie surzurle*, or *Heie thidre*, "flying serpents," which obtained that name from their habit of "springing" from branch to branch of the date-trees they inhabit. Besides these are tree-serpents (*Dendrophidæ*), a harmless family of the Colubrine snakes, and therefore quite out of the question. The Heb. term rendered "fiery" by the A. V. is by the Alexandrine edition of the LXX. represented by θανατοῦντα

Digitized by Google

"deadly;" Onkelos, the Arabic version of Saadias, and the Vulg. translate the word "burning," in allusion to the sensation produced by the bite; other authorities understand a reference to the bright color of the serpents. It is impossible to point out the species of poisonous snake which destroyed the people in the Arabian desert. Niebuhr says that the only truly formidable kind is that called *Bætan*, a small slender creature spotted black and white, whose bite is instant death, and whose poison causes the dead body to swell in an extraordinary manner (see Forskål, *Descript. Animal.* p. 16). What the modern name of this serpent is we have been unable to ascertain; it is obvious, however, that either the *Cerastes*, or the *Naia haje*, or any other venomous species frequenting Arabia, may denote the "serpent of the burning bite" which destroyed the children of Israel. The "fiery flying serpent" of Isaiah (*l. c.*) can have no existence in nature, though it is curious to notice that Herodotus (ii. 75, iii. 108) speaks of serpents with wings whose bones he imagined he had himself seen near Buto in Arabia. Monstrous forms of snakes with birds' wings occur on the Egyptian sculptures; it is probable that some kind of flying lizard (*Draco*, *Dracocella*, or *Dracunculus*) may have been the "flying serpent" of which Herodotus speaks; and perhaps, as this animal, though harmless, is yet calculated to inspire horror by its appearance, it may denote the flying serpent of the prophet, and have been regarded by the ancient Hebrews as an animal as terrible as a venomous snake.

2. *Eph'eh* (אֶפְעֶה: ὄφις, ἀσπίς, βασίλισκος: *vipera*, *regulus*) occurs in Job xx. 16, Is. xxx. 6, and lix. 5, in all of which passages the A. V. has "viper." There is no Scriptural allusion by means of which it is possible to determine the species of serpent indicated by the Heb. term, which is derived from a root which signifies "to hiss." Shaw

Common Viper. (*Vipera berus.*)

(*Trav.* p. 251) speaks of some poisonous snake which the Arabs call Leffah (*El-effah*): "it is the most malignant of the tribe, and rarely above a foot long." Jackson also (*Morocco*, p. 110) mentions this serpent; from his description it would seem to be the Algerine adder (*Echidna arietans* or *Mauritanica*). The snake (ἔχιδνα) that fastened on St. Paul's hand when he was at Melita (Acts xxviii. 3) was probably the common viper of this country (*Pelias berus*), which is widely distributed throughout Europe and the islands of the Mediterranean, or else the *Vipera aspis*, a not uncommon species on the coasts of the same sea.

W. H.

**SERPENT, BRAZEN.** The familiar history of the brazen serpent need not be repeated here. The nature of the fiery snakes by which the Israelites were attacked has been discussed under SERPENT. The scene of the history, determined by a comparison of Num. xxi. 3 and xxxiii. 42, must have been either Zalmonah or Punon. The names of both places probably connect themselves with it, Zalmonah as meaning "the place of the image," Punon as probably identical with the Φαινοί mentioned by Greek writers as famous for its copper-mines, and therefore possibly supplying the materials (Bochart, *Hieroz.* ii. 3, 13). [PUNON; ZALMONAH.] The chief interest of the narrative lies in the thoughts which have at different times gathered round it. We meet with these in three distinct stages. We have to ask by what associations each was connected with the others.

I. The truth of the history will, in this place, be taken for granted. Those who prefer it may choose among the hypotheses by which men halting between two opinions have endeavored to retain the historical and to eliminate the supernatural element.[a] They may look on the cures as having been effected by the force of imagination, which the visible symbol served to heighten, or by the rapid rushing of the serpent-bitten from all parts of the camp to the standard thus erected, curing them, as men are said to be cured by dancing of the bite of the tarantula (Bauer, *Heb. Gesch.* ii. 320; Paulus, *Comm. IV.* i. 198, in Winer, *Realwb.*). They may see in the serpent the emblematic signpost, as it were, of the camp hospital to which the sufferers were brought for special treatment, the form in this instance, as in that of the rod of Æsculapius, being a symbol of the art of healing (Hoffmann, in Scherer's *Schriftforsch.* i. 576; Winer, *Realwb.*). Leaving these conjectures on one side, it remains for us to inquire into the fitness of the symbol thus employed as the instrument of healing. To most of the Israelites it must have seemed as strange then as it did afterwards to the later Rabbis,[b] that any such symbol should be employed. The Second Commandment appeared to forbid the likeness of any living thing. The golden calf had been destroyed as an abomination. Now the colossal serpent (the narrative implies that it was visible from all parts of the encampment), made, we may conjecture, by the hands of Bezaleel or Aholiab, was exposed to their gaze, and they were told to look to it as gifted with a supernatural power. What reason was there for the difference? In part, of course, the answer may be, that the Second Commandment forbade, not all symbolic forms as such, but those that men made for themselves to worship; but the question still remains, why was *this* form chosen? It is hardly enough to say, with Jewish commentators, that *any* outward means

[a] The theory which ascribes the healing to mysterious powers known to the astrologers or alchemists of Egypt may be mentioned, but hardly calls for examination (Marsham, *Can. Chron.* pp. 148, 149; R. Tirsa, in Deyling, *Exercit. Sacr.* ii. 210).

[b] One of the Jewish interlocutors in the dialogue of Justin Martyr with Trypho (p. 322) declares that he had often asked his teachers to solve the difficulty and had never found one who explained it satisfactorily. Justin himself, of course, explains it as a type of Christ.

Digitized by Google

might have been chosen, like the lump of figs in Hezekiah's sickness, the salt which healed the bitter waters, and that the brazen serpent made the miracle yet more miraculous, inasmuch as the gaze of burnished brass, the gaze upon the serpent form, were, of all things, most likely to be fatal to those who had been bitten (Gem. Bab. *Joma;* Aben Ezra and others in Buxtorf, *Hist. Æn. Serp.* c. 5). The fact is doubtful, the reason inadequate. It is hardly enough again to say, with most Christian interpreters, that it was intended to be a type of Christ. Some meaning it must have had for those to whom it was actually presented, and we have no grounds for assuming, even in Moses himself, still less in the multitude of Israelites slowly rising out of sensuality, unbelief, rebellion, a knowledge of the far-off mystery of redemption. If the words of our Lord in John iii. 14, 15 point to the fulfillment of the type, there must yet have been another meaning for the symbol. Taking its part in the education of the Israelites, it must have had its starting-point in the associations previously connected with it. Two views, very different from each other, have been held as to the nature of those associations. On the one side it has been maintained that, either from its simply physical effects or from the mysterious history of the temptation in Gen. iii., the serpent was the representative of evil. To present the serpent-form as deprived of its power to hurt, impaled as the trophy of a conqueror, was to assert that evil, physical and spiritual, had been overcome, and thus help to strengthen the weak faith of the Israelites in a victory over both. The serpent, on this view, expressed the same idea as the dragon in the popular representations of the Archangel Michael and St. George (Ewald, *Geschichte*, ii. 228).[a] To some writers, as to Ewald, this has commended itself as the simplest and most obvious view. It has been adopted by some orthodox divines who have been unable to convince themselves that the same form could ever really have been at once a type of Satan and of Christ (Jackson, *Humiliation of the Son of God*, c. 31; Patrick, *Comm. in loc.;* Espagnæus, Burmann, Vitringa, in Deyling, *Observatt. Sac.* ii. 15). Others, again, have started from a different ground. They raise the question whether Gen. iii. was then written, or if written, known to the great body of the Israelites. They look to Egypt as the starting-point for all the thoughts which the serpent could suggest, and they find there that it was worshipped as an *agathodæmon*, the symbol of health and life.[b] This, for them, explains the mystery. It was as the known emblem of a power to heal that it served as the sign and sacrament on which the faith of the people might fasten and sustain itself.

Contrasted as these views appear, they have, it is believed, a point of contact. The idea primarily connected with the serpent in the history of the Fall, as throughout the proverbial language of Scripture, is that of wisdom (Gen. iii. 1; Matt. x. 6; 2 Cor. xi. 3). Wisdom, apart from obedience to a divine order, allying itself to man's lower nature, passes into cunning. Man's nature is envenomed and degraded by it. But wisdom, the self-same power of understanding, yielding to the divine law, is the source of all healing and restoring influences, and the serpent-form thus becomes a symbol of deliverance and health. The Israelites were taught that it would be so to them in proportion as they ceased to be sensual and rebellious. There were facts in the life of Moses himself which must have connected themselves with this twofold symbolism. When he was to be taught that the Divine Wisdom could work with any instruments, his rod became a serpent (Ex. iv. 1–5). (Comp. Cyril. Alex. *Schol.* 15. *Glaphyra* in Ex. ii.)[c] When he and Aaron were called to their great conflict with the perverted wisdom of Egypt, the many serpents of the magicians were overcome by the one serpent of the future high-priest. The conqueror and the conquered were alike in outward form (Ex. vii. 10–12).

II. The next stage in the history of the brazen serpent shows how easily even a legitimate symbol, retained beyond its time, after it had done its work, might become the occasion of idolatry. It appears in the reign of Hezekiah as having been for some undefined period, an object of worship The zeal of that king leads him to destroy it. It receives from him, or had borne before, the name Nehushtan. [Comp. NEHUSHTAN.] We are left to conjecture when the worship began, or what was its locality. It is hardly likely that it should have been tolerated by the reforming zeal of kings like Asa and Jehoshaphat. It must, we may believe, have received a fresh character and become more conspicuous in the period which preceded its destruction. All that we know of the reign of Ahaz makes it probable that it was under his auspices that it received a new development,[d] that it thus became the object of a marked aversion to the iconoclastic party who were prominent among the counsellors of Hezekiah. Intercourse with countries in which Ophiolatry prevailed — Syria, Assyria, possibly Egypt also — acting on the feeling which led him to bring together the idolatries of all neighboring nations, might easily bring about this perversion of the reverence felt for the time honored relic.

Here we might expect the history of the material object would cease, but the passion for relics has prevailed even against the history of the Bible. The Church of St. Ambrose, at Milan, has boasted, for centuries, of possessing the brazen serpent which Moses set up in the wilderness. The earlier history of the relic, so called, is matter for conjecture. Our knowledge of it begins in the year A. D. 971, when an envoy was sent by the Milanese to the court of the Emperor John Zimisces, at Constantinople. He was taken through the imperial cabinet of treasures and invited to make his choice, and he chose this, which, the Greeks assured him, was made of the same metal as the

---

[a] Another view, verging almost on the ludicrous, has been maintained by some Jewish writers. The serpent was set up *in terrorem*, as a man who has chastised his son hangs up the rod against the wall as a warning (Otho, *Lexic. Rabbin.* s. v. *Serpens*,.

[b] Comp. SERPENT, and, in addition to the authorities there referred to, Wilkinson's *Anc. Egyptians*, ii. 324, iv. 395, v. 64, 238; Kurtz, *History of the Old Covenant*, iii. 348, Eng. transl.; Witsius, *Ægyptiaca*, in Ugolini, i. 852.

[c] The explanation given by Cyril is, as might be expected, more mystical than that in the text. The rod transformed into a serpent represents the Divine Word taking on Himself the likeness of sinful flesh.

[d] Ewald's conjecture (*Gesch.* iv. 622) that, till then, the serpent may have remained at Zalmonah, the object of occasional pilgrimages, is probable enough

Digitized by Google

original serpent (Sigonius, *Hist. Regn. Ital.* b. vii.). On his return it was placed in the Church of St. Ambrose, and popularly identified with that which it professed to represent. It is, at least, a possible hypothesis that the Western Church has in this way been led to venerate what was originally the object of the worship of some Ophite sect.

III. When the material symbol had perished, its history began to suggest deeper thoughts to the minds of men. The writer of the Book of Wisdom, in the elaborate contrast which he draws between true and false religions in their use of outward signs, sees in it a *σύμβολον σωτηρίας, εἰς ἀνάμνησιν ἐντολῆς νόμου σου*: "he that turned himself was not saved by the thing that he saw (*διὰ τὸ θεωρούμενον*), but by Thee that art the Saviour of all" (Wisd. xvi. 6, 7). The Targum of Jonathan paraphrases Num. xxi. 8, "He shall be healed if he direct his heart unto the Name of the Word of the Lord." Philo, with his characteristic taste for an ethical, mystical interpretation, represents the history as a parable of man's victory over his lower sensuous nature. The metal, the symbol of permanence and strength, has changed the meaning of the symbol, and that which had before been the emblem of the will, yielding to and poisoned by the serpent pleasure, now represents *σωφροσύνη*, the *ἀντιταθὲς ἀκολαστίας φάρμακον* (*De Agricult.*). The facts just stated may help us to enter into the bearing of the words of John iii. 14, 15. If the paraphrase of Jonathan represents, as it does, the current interpretation of the schools of Jerusalem, the devout Rabbi to whom the words were spoken could not have been ignorant of it. The new teacher carried the lesson a step further. He led him to identify the "Name of the Word of the Lord" with that of the Son of Man. He prepared him to see in the lifting-up of the Crucifixion that which should answer, in its power to heal and save, to the serpent in the wilderness.

IV. A full discussion of the typical meaning here unfolded belongs to Exegesis rather than to a Dictionary. It will be enough to note here that which connects itself with facts or theories already mentioned. On the one side the typical interpretation has been extended to all the details. The pole on which the serpent was placed was not only a type of the cross, but was itself crucial in form (Just. Mart. *Dial. c. Tryph.* p. 322). The serpent was nailed to it as Christ was nailed. As the symbol of sin it represented his being made sin for us. The very metal, like the fine brass of Rev. i. 15, was an emblem of the might and glory of the Son of Man (comp. Lampe, *in loc.*). On the other it has been maintained (Patrick and Jackson, *ut supra*) that the serpent was from the beginning, and remains still, exclusively the symbol of evil, that the lifting-up of the Son of Man answered to that of the serpent because on the cross the victory over the serpent was accomplished. The point of comparison lay not between the serpent and Christ, but between the look of the Israelite to the outward sign, the look of a justifying faith to the cross of Christ. It will not surprise us to find that, in the spiritual, as in the historical interpretation, both theories have an element of truth. The serpent here also is primarily the emblem of the "knowledge of good and evil." To man, as having obtained that knowledge by doing evil, it has been as a venomous serpent, poisoning and corrupting. In the nature of the Son of Man it is once more in harmony with the Divine will, and leaves the humanity pure and untainted. The Crucifixion is the witness that the evil has been overcome by the good. Those who are bitten by the serpent find their deliverance in looking to Him who knew evil only by subduing it, and who is therefore mighty to save. Well would it have been for the Church of Christ if it had been content to rest in this truth. Its history shows how easy it was for the old perversion to reproduce itself. The highest of all symbols might share the fate of the lower. It was possible even for the cross of Christ to pass into a Nehushtan. (Comp. Stier, *Words of the Lord Jesus*, on John iii., and Kurtz, *Hist. of the Old Covenant*, iii. 344–358 Eng. transl.) E. H. P.

**SERPENT-CHARMING.** Some few remarks on this subject are made under ASP (vol. i. p. 180 *b*), where it is shown that the *pethen* (פֶּתֶן) probably denotes the Egyptian cobra. There can be no question at all of the remarkable power which, from time immemorial, has been exercised by certain people in the East over poisonous serpents. The art is most distinctly mentioned in the Bible, and probably alluded to by St. James (iii. 7). The usual species operated upon both in Africa and India, are the hooded snakes (*Naia tripudians*, and *Naia haje*) and the horned *Cerastes*. The skill of the Italian Marsi and the Libyan Psylli in taming serpents was celebrated throughout the world; and to this day, as we are told by Sir G. Wilkinson (Rawlinson's *Herodotus*, iii. 124, *note*, ed. 1862), the snake-players of the coast of Barbary are worthy successors of the Psylli (see Pliny, viii. 25, xi. 25, and especially Lucan's account of the Psylli, *Pharsal.* ix. 892). See numerous references cited by Bochart (*Hieroz.* iii. 164, &c.) on the subject of serpent-taming.

That the charmers frequently, and perhaps generally, take the precaution of extracting the poison fangs before the snakes are subjected to their skill, there is much probability for believing, but that this operation is not always attended to is clear from the testimony of Bruce and numerous other writers. "Some people," says the traveller just mentioned, "have doubted that it was a trick, and that the animals so handled had been first trained and then disarmed of their power of hurting, and, fond of the discovery, they have rested themselves upon it without experiment, in the face of all antiquity. But I will not hesitate to aver that I have seen at Cairo a man . . . who has taken a *cerastes* with his naked hand from a number of others lying at the bottom of the tub, has put it upon his bare head, covered it with the common red cap he wears, then taken it out, put it in his breast and tied it about his neck like a necklace, after which it has been applied to a hen and bit it, which has died in a few minutes." Dr. Davy, in his *Interior of Ceylon*, speaking of the snake-charmers, says on this subject: "The ignorant vulgar believe that these men really possess a charm by which they thus play without dread, and with impunity from danger. The more enlightened, laughing at this idea, consider the men impostors, and that in playing their tricks there is no danger to be avoided, it being removed by the abstraction of the poison fangs. The enlightened in this instance are mistaken, and the vulgar are nearer the truth in their opinion. I have examined the snakes I have seen exhibited, and have found

Digitized by Google

their poison fangs in and uninjured. These men do possess a charm, though not a supernatural one — namely, that of confidence and courage. . . . They will play their tricks with any hooded snakes (*Naja tripudians*), whether just taken or long in confinement, but with no other kind of poisonous snake." See also Tennent, *Ceylon*, i. 199, 3d ed. Some have supposed that the practice of taking out or breaking off the poison fangs is alluded to in Ps. lviii. 6, "Break their teeth, O God, in their mouth."

Serpent-charming.

The serpent-charmer's usual instrument is a flute. Shrill sounds, it would appear, are those which serpents, with their imperfect sense of hearing, are able most easily to discern; hence it is that the Chinese summon their tame fish by whistling or by ringing a bell.

The reader will find much interesting matter on the art of serpent-charming, as practiced by the ancients, in Bochart (*Hieroz.* iii. 161) in the dissertation by Böhmer entitled *De Psyllorum, Marsorum, et Ophiogenum adversus serpentes virtute*, Lips. 1745; and in Kæmpfer's *Amœnitates Exoticæ*, iii. ix. 565; see also Broderip's *Note Book of a Naturalist*, and *Anecdotes of Serpents*, published by Chambers; Lane's *Modern Egyptians*, ii. 106. Those who professed the art of taming serpents were called by the Hebrews *mĕnachashîm* (מְנַחֲשִׁים), while the art itself was called *lachash* (לָחַשׁ), Jer. viii. 17; Eccl. x. 11; but these terms were not always used in this restricted sense. [DIVINATION; ENCHANTMENT.] W. H.

**SERUG** (שְׂרוּג [*shoot, tendril*]: Σερούχ: *Sarug*, [*Serug*]). [Gen. xi. 20–23; 1 Chr. i. 26; in Luke iii. 35, SARUCH.] Son of Reu, and great-grandfather of Abraham. His age is given in the Hebrew Bible as 230 years — 30 years before he begat Nahor, and 200 years afterwards. But in the LXX. 130 years are assigned to him before he begat Nahor (making his total age 330), being one of those systematic variations in the ages of the patriarchs between Shem and Terah, as given by the LXX., by which the interval between the Flood and Abraham is lengthened from 292 (as in the Heb. B.) to 1172 (or Alex. 1072) years. [CHRONOLOGY, vol. i. p 440.] Bochart (*Phal.* ii. cxiv.) conjectures that the town of *Seruj*, a day's journey from Charræ in Mesopotamia, was named from this patriarch. Suidas and others ascribe to him the deification of dead benefactors of mankind. Epiphanius (*Adv. Hæres.* i. 6, 8), who says that his name signifies "provocation," states that, though in his time idolatry took its rise, yet it was confined to pictures; and that the deification of dead men, as well as the making of idols, was subsequent. He characterizes the religion of mankind up to Serug's days as Scythic; after Serug and the building of the Tower of Babel, the Hellenic or Greek form of religion was introduced, and continued to the writer's time (see Petavius, *Anim. adv. Epiph. Oper.* ii. 13). The account given by John of Antioch, is as follows: Serug, of the race of Japhet, taught the duty of honoring eminent deceased men, either by images or statues,[a] of worshipping them on certain anniversaries as if still living, of preserving a record of their actions in the sacred books of the priests, and of calling them *gods*, as being benefactors of mankind. Hence arose Polytheism and idolatry (see *Fragm. Historic. Græc.* iv. 345, and the note). It is in accordance with his being called of the race of Japhet that Epiphanius sends Phaleg and Reu to Thrace (*Epist. ad Descr. Paul.* § ii.). There is, of course, little or no historical value in any of these statements.

A. C. H.

**SERVANT** (נַעַר; מְשָׁרֵת). The Hebrew terms *na'ar* and *meshârêth*, which alone answer to our "servant," in as far as this implies the notions of liberty and voluntariness, are of comparatively rare occurrence. On the other hand, *'ebed*, which is common and is equally rendered "servant" in the A. V., properly means a *slave*.[b] Slavery was in point of fact the normal condition of the underling in the Hebrew commonwealth [SLAVE], while the terms above given refer to the exceptional cases of young or confidential attendants. Joshua, for instance, is described as at once the *na'ar* and *meshârêth* of Moses (Ex. xxxiii. 11); Elisha's servant sometimes as the former (2 K. iv. 12, v. 20), sometimes as the latter (2 K. iv. 43, vi. 15). Amnon's servant was a *meshârêth* (2 Sam. xiii. 17, 18), while young Joseph was a *na'ar* to the sons of Bilhah (Gen. xxxvii. 2, where instead of "the lad was with," we should read, "he was the *servant-boy* to" the sons of Bilhah). The confidential designation *meshârêth* is applied to the priests and Levites, in their relation to Jehovah (Ezr. viii. 17; Is. lxi. 6; Ex. xliv. 11), and the cognate verb to Joseph after he found favor with Potiphar (Gen. xxxix. 4), and to the nephews of Ahaziah (2 Chr xxii. 8). In 1 K. xx. 14, 15, we should substitute "servants" (*na'ar*) for "young men."

W. L. B.

* **SERVITOR** only in 2 K. iv. 43, used of Elisha's personal attendant or servant. The He

[a] But perhaps εἰκόνες and ἀνδριάντες may here be used of pictures.

[b] In many passages the correct reading would add considerable force to the meaning, *e. g.* in Gen. ix. 25. "Cursed be Canaan; a slave of slaves shall he be unto his brethren;" in Deut. v 15, "Remember that thou wast a slave in the land of Egypt;" in Job iii. 19, "The slave is free from his master;" and particularly in passages where the speaker uses the term of himself, as in Gen. xviii. 3, "Pass not away, I pray thee, from thy slave."

Digitized by Google

brew term, which is מְשָׁרֵת, the A. V. commonly renders "servant" or "minister." H.

**SE'SIS** (Σεσίς; [Vat. Σεσεις;] Alex. Σεσσεις: om. in Vulg.). SHASHAI (1 Esdr. ix. 34; comp. Ezr. x. 40).

**SESTHEL** (Σεσθήλ: *Beseel*). BEZALEEL of the sons of Pahath-Moab (1 Esdr. ix. 31; Ezr. x. 30).

**SETH** (שֵׁת, *i. e.* Sheth [see below]: Σήθ: *Seth*), Gen. iv. 25, v. 3; 1 Chr. i. 1. The third son of Adam, and father of Enos. The signification of his name (given in Gen. iv. 25) is "appointed" or "put" in the place of the murdered Abel, and Delitzsch speaks of him as the second Abel; but Ewald (*Gesch.* i. 353) thinks that another signification, which he prefers, is indicated in the text, namely, "seedling," or "germ." The phrase, "children of Sheth" (Num. xxiv. 17) has been understood as equivalent to all mankind, or as denoting the tribe of some unknown Moabitish chieftain; but later critics, among whom are Rosenmüller and Gesenius (*Thes.* i. 346), bearing in mind the parallel passage (Jer. xlviii. 45), render the phrase, "children of noise, tumultuous ones," *i. e.* hostile armies. [SHETH.]

In the 4th century there existed in Egypt a sect calling themselves Sethians, who are classed by Neander (*Ch. Hist.* ii. 115, ed. Bohn) among those Gnostic sects which, in opposing Judaism, approximated to paganism. (See also Tillemont, *Mémoires*, ii. 318.) Irenæus (i. 30; comp. Massuet, *Dissert.* i. 3, § 14) and Theodoret (*Hæret. Fab.* xiv. 306), without distinguishing between them and the Ophites, or worshippers of the serpent, say that in their system Seth was regarded as a divine effluence or virtue. Epiphanius, who devotes a chapter to them (*Adv. Hær.* i. 3, § 39), says that they identified Seth with our Lord. W. T. B.

**SETHUR** (סְתוּר [*hidden*]: Σαθούρ: *Sthur*). The Asherite spy, son of Michael (Num. xiii. 13).

**SEVEN.** The frequent recurrence of certain numbers in the sacred literature of the Hebrews is obvious to the most superficial reader; and it is almost equally obvious that these numbers are associated with certain ideas, so as in some instances to lose their numerical force, and to pass over into the province of symbolic signs. This is more or less true of the numbers three, four, seven, twelve, and forty; but seven so far surpasses the rest, both in the frequency with which it recurs, and in the importance of the objects with which it is associated, that it may fairly be termed the *representative* symbolic number. It has hence attracted considerable attention, and may be said to be the keystone on which the symbolism of numbers depends. The origin of this symbolism is a question that meets us at the threshold of any discussion as to the number seven. Our limits will not permit us to follow out this question to its legitimate extent, but we may briefly state that the views of Biblical critics may be ranged under two heads, according as the symbolism is attributed to theoretical speculations as to the internal properties of the number itself, or to external associations of a physical or historical character. According to the former of these views, the symbolism of the number seven would be traced back to the symbolism of its component elements three and four, the first of which = Divinity, and the second = Humanity, whence seven = Divinity + Humanity, or, in other words, the union between God and Man, as effected by the manifestations of the Divinity in creation and revelation. So again the symbolism of twelve is explained as the symbolism of 3 × 4, i. e. or a second combination of the same two elements, though in different proportions, the representative number of Humanity, as a multiplier, assuming a more prominent position (Bähr's *Symbolik*, i. 187, 201, 224). This theory is seductive from its ingenuity, and its appeal to the imagination, but there appears to be little foundation for it. For (1) we do not find any indication, in early times at all events, that the number seven was resolved into three and four, rather than into any other arithmetical elements, such as two and five. Bengel notes such a division as running through the heptads of the Apocalypse (*Gnomon, in Rev.* xvi. 1), and the remark undoubtedly holds good in certain instances, *e. g.* the trumpets, the three latter being distinguished from the four former by the triple "woe" (Rev. viii. 13), but in other instances, *e. g.* in reference to the promises (*Gnomon, in Rev.* ii. 7), the distinction is not so well established, and even if it were, an explanation might be found in the adaptation of such a division to the subject in hand. The attempt to discover such a distinction in the Mosaic writings — as, for instance, where an act is to be done on the third day out of seven (Num. xix. 12) — appears to be a failure. (2.) It would be difficult to show that any associations of a sacred nature were assigned to three and four previously to the sanctity of seven. This latter number is so far the sacred number κατ' ἐξοχήν that we should be less surprised if, by a process the reverse of the one assumed, sanctity had been subsequently attached to three and four as the supposed elements of seven. But (3) all such speculations on mere numbers are alien to the spirit of Hebrew thought; they belong to a different stage of society, in which speculation is rife, and is systematized by the existence of schools of philosophy.

We turn to the second class of opinions which attribute the symbolism of the number seven to external associations. This class may be again subdivided into two, according as the symbolism is supposed to have originated in the observation of purely physical phenomena, or, on the other hand, in the peculiar religious enactments of Mosaism. The influence of the number seven was not restricted to the Hebrews; it prevailed among the Persians (Esth. i. 10, 14), among the ancient Indians (Von Bohlen's *Alt. Indien*, ii. 224 ff.), among the Greeks and Romans to a certain extent, and probably among all nations where the week of seven days was established, as in China, Egypt, Arabia, etc. (Ideler's *Chronol.* i. 88, 178, ii. 473). The wide range of the word *seven* is in this respect an interesting and significant fact: with the exception of "six," it is the only numeral which the Semitic languages have in common with the Indo-European; for the Hebrew *sheba*[a] is essentially the same as ἑπτά, *septem*, *seven*, and the Sanskrit, Persian, and Gothic names for this number (Pott's *Etym. Forsch.* i. 129). In the countries above enumerated, the institution of seven as a cyclical number is attributed to the observation of the changes of the moon, or to the supposed number of

---

[a] שֶׁבַע.

Digitized by Google

the planets. The Hebrews are held by some writers to have borrowed their notions of the sanctity of seven from their heathen neighbors, either wholly or partially (Von Bohlen's *Introd. to Gen.* i. 216 ff.; Hengstenberg's *Balaam*, p. 393, Clark's ed.); but the peculiarity of the Hebrew view consists in the special dignity of the *seventh*, and not simply in that of *seven*. Whatever influence, therefore, may be assigned to astronomical observation or to prescriptive usage, in regard to the original institution of the week, we cannot trace back the peculiar associations of the Hebrews farther than to the point when the seventh day was consecrated to the purposes of religious rest.

Assuming this, therefore, as our starting-point, the first idea associated with seven would be that of *religious periodicity*. The Sabbath, being the seventh day, suggested the adoption of seven as the *coefficient*, so to say, for the appointment of all sacred periods; and we thus find the 7th month ushered in by the Feast of Trumpets, and signalized by the celebration of the Feast of Tabernacles and the great Day of Atonement; 7 weeks as the interval between the Passover and the Pentecost; the 7th year as the Sabbatical year; and the year succeeding $7 \times 7$ years as the Jubilee year. From the idea of periodicity, it passed by an easy transition to the *duration* or *repetition* of religious proceedings; and thus 7 days were appointed as the length of the Feasts of Passover and Tabernacles; 7 days for the ceremonies of the consecration of priests; 7 days for the interval to elapse between the occasion and the removal of various kinds of legal uncleanness, as after childbirth, after contact with a corpse, etc.; 7 times appointed for aspersion either of the blood of the victim (*e. g.* Lev. iv. 6, xvi. 14), or of the water of purification (Lev. xiv. 51; comp. 2 K. v. 10, 14); 7 things to be offered in sacrifice (oxen, sheep, goats, pigeons, wheat, oil, wine); 7 victims to be offered on any special occasion, as in Balaam's sacrifice (Num. xxiii. 1), and especially at the ratification of a treaty, the notion of seven being embodied in the very term[a] signifying to swear, literally meaning to *do seven times* (Gen. xxi. 28; comp. Herod. iii. 8, for a similar custom among the Arabians). The same idea is further carried out in the vessels and arrangements of the Tabernacle — in the 7 arms of the golden candlestick, and the 7 chief utensils (altar of burnt-offerings, laver, shewbread table, altar of incense, candlestick, ark, mercy-seat).

The number seven, having thus been impressed with the seal of sanctity as the symbol of all connected with the Divinity, was adopted generally as a *cyclical* number, with the subordinate notions of perfection or completeness. It hence appears in cases where the notion of satisfaction is required, as in reference to punishment for wrongs (Gen. iv. 15; Lev. xxvi. 18, 28; Ps. lxxix. 12; Prov. vi. 31), or to forgiveness of them (Matt. xviii. 21). It is again mentioned in a variety of passages too numerous for quotation (*e. g.* Job v. 19; Jer. xv. 9; Matt. xii. 45) in a sense analogous to that of a "round number," but with the additional idea of sufficiency and completeness. To the same head we may refer the numerous instances in which persons or things are mentioned by sevens in the historical portions of the Bible — *e. g.* the 7 kine and the 7 ears of corn in Pharaoh's dream, the 7 daughters of the priest of Midian, the 7 sons of Jesse, the 7 deacons, the 7 sons of Sceva, the twice 7 generations in the pedigree of Jesus (Matt. i. 17), and again the still more numerous instances in which periods of seven days or seven years, occasionally combined with the repetition of an act seven times; as, in the taking of Jericho, the town was surrounded for 7 days, and on the 7th day it fell at the blast of 7 trumpets borne round the town 7 times by 7 priests; or again at the Flood, an interval of 7 days elapsed between the notice to enter the ark and the coming of the Flood, the beasts entered by sevens, 7 days elapsed between the two missions of the dove, etc. So again in private life, 7 years appear to have been the usual period of a hiring (Gen. xxix. 18), 7 days for a marriage-festival (Gen. xxix. 27; Judg. xiv. 12), and the same, or in some cases 70 days, for mourning for the dead (Gen. l. 3, 10; 1 Sam. xxxi. 13).

The foregoing applications of the number seven become of great practical importance in connection with the interpretation of some of the prophetical portions of the Bible, and particularly of the Apocalypse. For in this latter book the ever-recurring number seven both serves as the mould which has decided the external form of the work, and also to a certain degree penetrates into the essence of it. We have but to run over the chief subjects of that book — the 7 churches, the 7 seals, the 7 trumpets, the 7 vials, the 7 angels, the 7 spirits before the throne, the 7 horns and 7 eyes of the Lamb, etc. — in order to see the necessity of deciding whether the number is to be accepted in a literal or a metaphorical sense — in other words, whether it represents a number or a quality. The decision of this question affects not only the number seven, but also the number which stands in a relation of antagonism to seven, namely, the half of seven, which appears under the form of forty-two months, $= 3\frac{1}{2}$ years (Rev. xiii. 5), twelve hundred and sixty days, also $= 3\frac{1}{2}$ years (xi. 3, xii. 6), and again a time, times, and half a time $= 3\frac{1}{2}$ years (xii. 14). We find this number frequently recurring in the Old Testament, as in the forty-two stations of the wilderness (Num. xxxiii.), the three and a half years of the famine in Elijah's time (Luke iv. 25), the "time, times, and the dividing of time," during which the persecution of Antiochus Epiphanes was to last (Dan. vii. 25), the same period being again described as "the midst of the week," *i. e.* the half of seven years (Dan. ix. 27). "a time, times, and a half" (Dan. xii. 7), and again probably in the number of days specified in Dan. viii. 14, xii. 11, 12. If the number seven express the notion of completeness, then the number half-seven = incompleteness and the secondary ideas of suffering and disaster: if the one represent Divine agency, the other we may expect to represent human agency. Mere numerical calculations would thus, in regard to unfulfilled prophecy, be either wholly superseded, or at all events take a subordinate position to the general idea conveyed. W. L. B.

[a] שָׁבַע.

*** SEVENTY DISCIPLES.** A body of disciples whom Christ appointed for the immediate purpose of going "two and two before his face into every city and place, whither He himself would come" (Luke x. 1). They are only mentioned by St. Luke, and nothing further is said of them by him than is contained in the first half of the tenth chapter of his Gospel. Neither the whole body nor

Digitized by Google

any members of it are ever mentioned, as such, in the Acts of the Apostles, nor in any of the Epistles.

The time of their appointment appears to have been near the close of our Lord's ministry, just as He was taking his final departure from Galilee (Luke ix. 51–x. 1). Different chronological arrangements of the life of our Lord would, of course, lead to a difference of opinion here also; but the most probable supposition seems to be that Jesus himself, on finally leaving Galilee, made a rapid and somewhat private journey to Jerusalem to attend the Feast of Tabernacles (John vii. 2–10), sending forth the seventy just as He set out, probably into Perea, where they were to prepare the way for his own coming to teach during the greater part of the interval before his last Passover.

However this may be, after the fulfillment of this their immediate mission the seventy returned again rejoicing in their possession of miraculous powers (Luke x. 17). From our Lord's answer, "Behold I give unto you power to tread on serpents and scorpions, and over all the power of the enemy: and nothing shall by any means hurt you" (ver. 19), it is manifest that their office did not cease with the fulfillment of their immediate and temporary mission, but was to continue, as indeed was already probable from the use of the technical ἀνέδειξεν in ver. 1. Yet we hear nothing further of them in the books of the N. T.

In the writings of Christian antiquity there is frequent mention of them, sometimes as seventy, sometimes as seventy-two in number (*Recog. Clem.* i. 40), and comparison is very naturally made to the seventy elders of Israel (Num. xi. 16) appointed to assist Moses (*e. g.* Euseb. *De Evang.* iii. c. 2); but there is very little to throw light upon their history or their names. The earliest notice of this kind is by Clement of Alexandria, who incidentally mentions that Barnabas was one of them (*Strom.* ii. c. 20), and is also quoted by Eusebius (*H. E.* i. c. 12) as saying the same thing of Sosthenes, and also of a certain Cephas whom Paul "withstood to his face," whom he, curiously enough, supposes to have been not the Apostle, but one of the seventy of the same name. Eusebius gives a variety of reports without himself apparently attaching any weight to them. In addition to those already mentioned, he says (*H. E.* i. c. 12): "And that Matthias, who was numbered with the Apostles in place of Judas, and he who had been honored to be a candidate with him, is also said to have been deemed worthy of the same calling with the seventy. They also say that Thaddeus was one of them." In the following chapter he speaks of Thaddeus positively as one of their number. Half a century later Epiphanius (*Hæres.* li.) speaks of their number as seventy-two, and of Mark and Luke as among them. Also (*Hæres.* xx.), he says that our Lord "sent forth also seventy-two others to preach, of whose number were the seven appointed over the widows, Stephen, Philip, Prochorus, Nicanor, Timon, Parmenas, and Nicolaus: before these also Matthias, who was numbered among the Apostles in the place of Judas; but after these seven and Matthias before them, Mark, Luke, Justus, Barnabas and Apelles, Rufus, Niger, and the remainder of the seventy-two."

It does not appear what authority Epiphanius had for these statements. He seems to be quite alone in this supposition as to the seven deacons. The names of the seven indicate that they were Hellenists, and as such were not likely to have been of the seventy. In regard to some of the others, Matthias and Justus, it is certain that they were personal companions of our Lord during his ministry (Acts i. 21–23), and therefore probable that they were selected from among the seventy. Barnabas also rests on the much earlier authority of Clement of Alexandria, and according to Eusebius, Sosthenes also, but the original work of Clement in this case is lost. In regard to the others Epiphanius must be considered to have simply gathered up the current traditions of his time; these are not quite the same with those mentioned earlier by Eusebius, but even those he does not appear to have considered as of much authority. F. G.

**SHAALABBIN** (שַׁעַלַבִּין, but in many MSS. שעלבים [*city of foxes* or *jackals*]: [Rom. Σαλαμίν; Vat.] Σαλαβειν; Alex. Σαλαμειν:[a] *Selebin*). A town in the allotment of Dan, named between IR-SHEMESH and AJALON (Josh. xix. 42). There is some uncertainty about the form of the name. The MSS. preponderate in favor of SHAALBIM, in which form it is found in two other passages. But there is also some ground for suspecting that it was Shaalbon. [See SHAALBIM and SHAALBONITE.]

**SHAALBIM** (שַׁעַלְבִים [*place of foxes* or *jackals*]: Θαλαβειν,[b] Alex. *as* αλωπεκες; in 1 K. [Rom. Σαλαβίν, Vat.] Βηθαλαμει, Alex Σαλαβειμ: *Salabim, Salebim*). The commoner form of the name of a town of Dan which in one passage is found as Shaalabbin. It occurs in an ancient fragment of history inserted in Judg. i. enumerating the towns of which the original inhabitants of Canaan succeeded in keeping possession after the general conquest. Mount Heres,[c] Aijalon, and Shaalbim were held against the Danites by the Amorites (ver. 35) till, the help of the great tribe of Ephraim being called in, they were at last compelled to succumb. It is mentioned with Aijalon again in Josh. xix. 42 (Shaalabbin) and with Beth-shemesh both there and in 1 K. iv. 9, in the last passage as making up one of Solomon's commissariat districts. By Eusebius and Jerome it is mentioned in the *Onomasticon* ("Selab") as a large village in the district of Sebaste (*i. e.* Samaria), and as then called Selaba. But this is not

[a] A city called Σαλαμίν, or Σαλαμίς, formerly lay at the east end of the island of Cyprus, between which and Phœnicia, or Canaan, there was a constant intercourse and close connection. Perhaps this also was Shaalabbin.

[b] This passage in the Vatican Codex (Mai's ed.) contains a curious specimen of a double reading, each of the two being a translation of the Hebrew proper names: ἐν τῷ ὄρει τῷ ὀστρακώδει ἐν ᾧ αἱ ἄρκοι καὶ ἐν ᾧ αἱ ἀλώπεκες ἐν τῷ Μυρσινῶνι, καὶ ἐν Θαλαβίν. [So Rom., exc. Θαλαβίν.] Here ὀστρακώδης and Μυρσινών are both attempts to render חֶרֶס, reading it חַרְשׁ and חֲדַס respectively. The ἀλώπεκες is due to the שעל in Shaalbin; αἱ ἄρκοι, "the she-bears," is for Ajalon, though that signifies deer or gazelles.

[c] * The A. V. represents Heres as situated in Aijalon, whereas a comma should separate Heres (more correctly *Har-heres*) from Aijalon as well as from the other names which follow. This confusion is as old at least as the Bishop's Bible. H.

Digitized by Google

very intelligible, for except in the statement of Josephus (*Ant.* v. 1, § 22), that the allotment of the Danites extended as far north as Dor (*Tantura*), there is nothing to lead to the belief that any of their towns were at all near Samaria, while the persistent enumeration of Shaalbim with Aijalon and Beth-shemesh, the sites of both which are known with tolerable certainty as within a radius of 15 miles west of Jerusalem, is strongly against it. It is also at variance with another notice of Jerome, in his commentary on Es. xlviii. 22, where he mentions the "towers of Ailon and Selebi and Emmaus-Nicopolis," in connection with Joppa, as three landmarks of the tribe of Dan. No trace appears to have been yet discovered of any name resembling Shaalbim, in the neighborhood of *Yalo* or *Ain-shems*, or indeed anywhere else, unless it be a place called '*Esalin*, عسلين, mentioned in the lists of Eli Smith and Robinson (*Bibl. Res.* 1st ed. iii. App. 120 *b*) as lying next to *Sûrâh*, the ancient Zorah, a position which is very suitable.

The *Shala'bûn*, discovered by M. Renan's expedition about 4 miles N. W. of *Bint-Jebeil*, in the *Belad Besharrah* (see the *Carte dressée par la brigade topographique*, etc., 1862), may be an ancient Shaalbim, possibly so named by the northern colony of Danites after the town of their original dwelling-place. But it is obvious from the foregoing description that it cannot be identical with it. G.

**SHAAL'BONITE, THE** (הַשַּׁעַלְבֹנִי) [see below]: [In 2 Sam., Rom.] ὁ Σαλαβωνίτης [Vat. Alex. -νει-; in 1 Chr., Rom. Alex. ὁ Σαλαβωνί, Vat. ο Ομει, FA. ο Σωμει]: *de Salboni*, [*Salabonites*]). Eliahba the Shaalbonite was one of David's thirty-seven heroes (2 Sam. xxiii. 32; 1 Chr. xi. 33). He was the native of a place named Shaalbon, which is unmentioned elsewhere, unless it is identical with SHAALBIM or SHAALABBIN of the tribe of Dan. In this case it becomes difficult to decide which of the three is the original form of the name. G.

**SHA'APH** (שַׁעַף) [*division*]: Σαγαφ; Alex. Σαγαφ; [Comp. Σαδφ:] *Saaph*). 1. The son of Jahdai (1 Chr. ii. 47).

2. The son of Caleb the brother of Jerahmeel by his concubine Maachah. He is called the father, that is, the founder, of the town Madmannah (1 Chr. ii. 49).

**SHAARA'IM** (שַׁעֲרַיִם) [*two gates*]: [in 1 Sam.] τῶν πυλῶν in both MSS.; [in Chr., Vat. Alex.] Σεσρεμ; [Rom., joined with preceding word, Βαρουσεωρίμ; Comp. Σαρείμ:] *Saraim*, *Sarim*). A city in the territory allotted to Judah (Josh. xv. 36; in A. V. incorrectly SHARAIM). It is one of the first group of the towns of the *Shefelah*, or lowland district, which contains also Zoreah, Jarmuth, Socoh, besides others not yet recognized. It is mentioned again in the account of the rout which followed the fall of Goliath, where the wounded fell down on the road to Shaaraim and as far as Gath and Ekron (1 Sam. xvii. 52). These two notices are consistent with each other. Goliath probably fell in the *Wady es-Sumt*, on opposite sides of which stand the representatives of Socoh and Jarmuth; Gath was at or near *Tell es-Safieh*, a few miles west of Socoh at the mouth of the same Wady; whilst Ekron (if '*Akir* be Ekron) lies farther north. Shaaraim is therefore probably to be looked for somewhere west of *Shuweikeh*, on the lower slopes of the hills, where they subside into the great plain.[a]

We find the name mentioned once more in a list of the towns of Simeon (1 Chr. iv. 31),[b] occupying the same place with Sharuchen and Sansannah, in the corresponding lists of Joshua. Lying as the allotment of Simeon did in the lowest part of Judah, many miles south of the region indicated above, it is impossible that the same Shaaraim can be intended, and indeed it is quite doubtful whether it be not a mere corruption of one of the other two names.

Taken as Hebrew, the word is a dual, and means "two gateways," as the LXX. have rendered it in 1 Sam. xvii. It is remarkable that the group in which Shaaraim is included in Josh. xv. should contain more names in dual form than all the rest of the list put together; namely, besides itself, Adithaim, and Gederothaim, and probably also Enam and Adullam. For the possible mention of Shaaraim in 1 Macc. v. 66, see SAMARIA, p. 2798. G.

**SHAASH'GAZ** (שַׁעַשְׁגַז [Pers. *servant of the beautiful*, Ges.]: not found in the LXX., who substitute Ιαΐ, Hegai, as in vv. 8, 15: *Susangazus*). The eunuch in the palace of Xerxes who had the custody of the women in the second house, *i. e.* of those who had been in to the king (Esth. ii. 14). [HEGAI.] A. C. H.

**SHAB'BETHAI** [3 syl.] (שַׁבְּתַי) [*sabbathborn*]: [in Ezr.] Σαββαθαΐ; Alex. Καββαθαΐ; [Vat. FA. Σαβαθαι; in Neh., Rom. Vat. Alex. FA. omit; Comp. Σαβαθθαΐος, Ald. Σαβαθαΐος:] *Sebethaï* in Ezr., *Septhaï* in Neh.). 1. A Levite in the time of Ezra, who assisted him in investigating the marriages with foreigners which had taken place among the people (Ezr. x. 15). It is apparently the same who with Jeshua and others instructed the people in the knowledge of the Law (Neh. viii. 7). He is called SABBATHEUS (1 Esdr. ix. 14) and SABATEAS (1 Esdr. ix. 48).

2. (Om. in LXX. [*i. e.* Rom. Vat. FA.[1] Alex.; but Comp. Σαβαθθαΐος, Ald. Σαβαθαΐος, FA.[2] Σοββαθαθαιος]: *Sabbathaï*.) Shabbethai and Jozabad, of the chief of the Levites, were over the outward business of the house of God after the return from Babylon (Neh. xi. 16). Possibly 1 and 2 are identical, although Burrington (*General* i. 167) regards Shabbethai, who is mentioned in Neh. viii. 7, as a priest.

* **SHABI'AH.** [SHACHIA.]

**SHACHI'A** (שָׁכְיָה [*fame of Jah*, Fürst]. Ζαβία: [Vat. Ζαβια; Alex. Ζεβια:] *Sechiæ*). Properly "Shabiah," a son of Shaharaim by his wife Hodesh (1 Chr. viii. 10). This form of the name is retained from the Geneva Version. The translators have followed the Vulgate in reading

[a] The word *shaarim* means "two gateways"; and but for the mention of the town in Joshua, and the consistency of its position with 1 Sam. xvii. 52, it would be perhaps more natural in that passage to take it as meaning the gates of Gath and Ekron, as the LXX. have done. In that case, however, it ought to have the article, which it has not.

[b] Here there is a slight difference in the vowels, due to the pause — שַׁעֲרִים — which is reflected in both LXX. and Vulgate (see above, at head of article).

Digitized by Google

כ for ב. Seven of Kennicott's MSS. read שכיא, and fifteen שכיות [= *announcement*, Fürst].

**SHADDAI** [2 syl.] (שַׁדַּי, in pause, שַׁדָּי). An ancient name of God, rendered "Almighty" everywhere in the A. V. In all passages of Genesis, except one (xlix. 25 [a]), in Ex. vi. 3, and in Ez. x. 5, it is found in connection with אֵל, *él*, "God," El Shaddai being there rendered "God Almighty," or "the Almighty God." It occurs six times in Genesis, once in Exodus (vi. 3), twice in Numbers (xxiv. 4, 16), twice in Ruth (i. 20, 21), thirty-one times in Job, twice in the Psalms (lxviii. 14 [15], xci. 1), once in Isaiah (xiii. 6), twice in Ezekiel (i. 24, x. 5), and once in Joel (i. 15). In Genesis and Exodus it is found in what are called the Elohistic portions of those books, in Numbers in the Jehovistic portion, and throughout Job the name Shaddai stands in parallelism with Elohim, and never with Jehovah. By the name or in the character of El Shaddai, God was known to the patriarchs — to Abraham (Gen. xvii. 1), to Isaac (Gen. xxviii. 3), and to Jacob (Gen. xliii. 14, xlviii. 3, xlix. 25), before the name Jehovah, in its full significance, was revealed (Ex. vi. 3). By this title He was known to the Midianite Balaam (Num. xxiv. 4, 16), as God the Giver of Visions, the Most High (comp. Ps. xci. 1); and the identity of Jehovah and Shaddai, who dealt bitterly with her, was recognized by Naomi in her sorrow (Ruth i. 20, 21). Shaddai, the Almighty, is the God who chastens men (Job v. 17, vi. 4, xxiii. 16, xxvii. 2); the just God (Job viii. 3, xxxiv. 10) who hears prayer (Job viii. 5, xxii. 26, xxvii. 10); the God of power who cannot be resisted (Job xv. 25), who punishes the wicked (Job xxi. 20, xxvii. 13), and rewards and protects those who trust in Him (Job xxii. 23, 25, xxix. 5); the God of providence (Job xxii. 17, 23, xxvii. 11) and of fore-knowledge (Job xxiv. 1), who gives to men understanding (Job xxxii. 8) and life (Job xxxiii. 4): "excellent in power, and in judgment, and in plenty of justice," whom none can perfectly know (Job xi. 7, xxxvii. 23). The prevalent idea attaching to the name in all these passages is that of strength and power, and our translators have probably given to "Shaddai" its true meaning when they rendered it "Almighty."

In the Targum throughout, the Hebrew word is retained, as in the Peshito-Syriac of Genesis and Exodus and of Ruth i. 20. The LXX. gives *ἀνδς, ἰσχυρός, θεός, κύριος, παντοκράτωρ, κύριος παντοκράτωρ, ὁ τὰ πάντα ποιήσας* (Job viii. 3), *ἐπουράνιος* (Ps. lxviii. 14 [15]), *ὁ θεὸς τοῦ οὐρανοῦ* (Ps. xci. i.), *σαδδαΐ* (Ez. x. 5), and *παναιτωρία* (Joel i. 15). In Job xxix. 5, we find the strange rendering *ὑλώδης*. In Gen. and Ex. "El Shaddai" is translated *ὁ θεός μου*, or *σου*, or *αὐτῶν*, as the case may be. The Vulgate has *omnipotens* in all cases, except *Dominus* (Job v. 17, vi. 4, 14; Is. xiii. 6), *Deus* (Job xxii. 3, xl. 2), *Deus cœli* (Ps. xci. 1), *sublimis Deus* (Ez. i. 24), *cœlestis* (Ps. lxviii. 14 [15]), *potens* (Joel i. 15), and *digne* (Job xxxvii. 23). The Veneto-Greek has *κραταιός*. The Peshito-Syriac, in many passages, renders "Shaddai" simply "God," in others ܚܝܠܐ, *chainá*, "strong, powerful" (Job v. 17, vi. 4, &c.), and once ܥܠܝܐ, *'elyó*, "Most High" (Job vi 14). The Samaritan Version of Gen. xvii. 1 has for "El Shaddai," "powerful, sufficient," though in the other passages of Genesis and Exodus it simply retains the Hebrew word; while in Num. xxiv. 4, 16, the translator must have read שָׂדֶה, *sâdeh*, "a field," for he renders "the vision of Shaddai," the "vision of the field," *i. e.* the vision seen in the open plain. Aben Ezra and Kimchi render it "powerful."

The derivations assigned to Shaddai are various. We may mention, only to reject, the Rabbinical etymology which connects it with דַּי, *dai*, "sufficiency," given by Rashi (on Gen. xvii. 1), "I am He in whose Godhead there is sufficiency for the whole creation;" and in the Talmud (*Chagiga* fol. 12, col. 1), "I am He who said to the world, Enough!" According to this, אֲשֶׁר דַּי = שַׁדַּי, "He who is sufficient," "the all-sufficient One;" and so "He who is sufficient in himself," and therefore self-existent. This is the origin of the *ἱκανός* of the LXX., Theodoret, and Hesychius, and of the Arabic الكافي, *alkáf'i*, of Saadias, which has the same meaning. Gesenius (*Gram.* § 86, and *Jesaia*, xiii. 6) regards שַׁדַּי, *shaddai*, as the plural of majesty, from a singular noun, שַׁד, *shad*, root שָׁדַד, *shâdad*, of which the primary notion seems to be, "to be strong" (Fürst, *Handwb.*). It is evident that this derivation was present to the mind of the prophet from the play of words in Is. xiii. 6. Ewald (*Lehrb.* § 155 e. 5*te Ausg.*) takes it from a root שָׁדַד = שָׁדַד, and compares it with דָּוִי, *dawdi*, from דָּוִד, *dâwâh*, the older termination ־ֶ being retained. He also refers to the proper names יִשַׁי, *Yishai* (Jesse), and בַּוַּי, *Bavvai* (Neh. iii. 18). Roediger (Ges. *Thes.* s. v.) disputes Ewald's explanation, and proposes, as one less open to objection, that *Shaddai* originally signified "my powerful ones," and afterwards became the name of God Almighty, like the analogous form *Adonai*. In favor of this is the fact that it is never found with the definite article, but such would be equally the case if Shaddai were regarded as a proper name. On the whole there seems no reasonable objection to the view taken by Gesenius, which Lee also adopts (*Gram.* 139, 6).

Shaddai is found as an element in the proper names Ammishaddai, Zurishaddai, and possibly also in Shedeur there may be a trace of it.

W. A. W.

**SHADRACH** (שַׁדְרַךְ) [*circuit of the sun-god*, or *royal one* (?) Fürst]: [LXX.] Σεδρὰχ; [in Dan. iii. (Theodot.) Alex. Σεδρὰκ:] *Sidrac*. of uncertain etymology). The Chaldee name of Hananiah [HANANIAH 7; SHESHBAZZAR], the chief of the "three children," whose song, as given in the apocryphal Daniel, forms part of the service of the Church of England, under the name of "Benedicite, omnia opera." A long prayer in the furnace is also ascribed to him in the LXX. and Vulgate, but this is thought to be by a different hand from that which added the song. The his-

[a] Even here some MSS. and the Samaritan Text read אֵל, *él*, for אֵת, *eth*.

Digitized by Google

tory of Shadrach, or Hananiah, is briefly this. He was taken captive with Daniel, Mishael, and Azariah, at the first invasion of Judah by Nebuchadnezzar, in the fourth, or, as Daniel (i. 1) reckons, in the third[a] year of Jehoiakim, at the time when the Jewish king himself was bound in fetters to be carried off to Babylon. [JEHOIAKIM.] Being, with his three companions, apparently of royal birth (Dan. i. 3), of superior understanding, and of goodly person, he was selected, with them, for the king's immediate service, and was for this end instructed in the language and in all the learning and wisdom of the Chaldæans, as taught in the college of the magicians. Like Daniel, he avoided the pollution of the meat and wine which formed their daily provision at the king's cost, and obtained permission to live on pulse and water. When the time of his probation was over, he and his three companions, being found superior to all the other magicians, were advanced to stand before the king. When the decree for the slaughter of all the magicians went forth from Nebuchadnezzar, we find Shadrach uniting with his companions in prayer to God to reveal the dream to Daniel; and when, in answer to that prayer, Daniel had successfully interpreted the dream, and been made ruler of the province of Babylon, and head of the college of magicians, Shadrach was promoted to a high civil office. But the penalty of oriental greatness, especially when combined with honesty and uprightness, soon had to be paid by him, on the accusation of certain envious Chaldæans. For refusing to worship the golden image he was cast with Meshach and Abed-nego, into the burning furnace. But his faith stood firm; and his victory was complete when he came out of the furnace, with his two companions, unhurt, heard the king's testimony to the glory of God, and was "promoted in the province of Babylon." We hear no more of Shadrach, Meshach, and Abed-nego in the O. T. after this; neither are they spoken of in the N. T., except in the pointed allusion to them in the Epistle to the Hebrews, as having "through faith quenched the violence of fire" (Heb. xi. 33, 34). But there are repeated allusions to them in the later apocryphal books, and the martyrs of the Maccabæan period seem to have been much encouraged by their example. See 1 Macc. ii. 59, 60; 3 Macc. vi. 6; 4 Macc. xiii. 9, xvi. 3, 21, xviii. 12. Ewald (*Geschichte*, iv. 557) observes, indeed, that next to the Pentateuch no book is so often referred to in these times, in proportion, as the book of Daniel. The apocryphal additions to Daniel contain, as usual, many supplementary particulars about the furnace, the angel, and Nebuchadnezzar, besides the introduction of the prayer of Shadrach, and the hymn. Theodore Parker observes with truth, in opposition to Bertholdt, that these additions of the Alexandrine prove that the Hebrew was the original text, because they are obviously inserted to introduce a better connection to the narrative (Joseph. *Ant.* x. 10; Prideaux, *Connect.* i. 59, 60; Parker's De Wette, *Introd.* ii. 483–510; Grimm, on 1 Macc. ii. 60; Hitzig (who takes a thoroughly skeptical view), *on Dan.* iii.; Ewald, iv. 106, 107, 557–559; Keil. *Einleit. Daniel*).

A. C. H.

[a] Keil explains the discrepancy by supposing that Nebuchadnezzar may have set off from Babylon towards the end of the third year, but not have reached Judæa till the fourth (*Einleit.* p. 367).

**SHA'GE** (שָׁגֵא [*erring*]: Σωλά; Alex. Σαγη: *Sage*). Father of Jonathan the Hararite, one of David's guard (1 Chr. xi. 34). In the parallel list of 2 Sam. xxiii. 33, he is called Shammah: unless, as seems probable, there is a confusion between Jonathan the son of "Shage the Hararite," Jonathan the son of Shammah, David's brother, and "Shammah, the son of Agee the Hararite." [See SHAMMAH, 5.]

**SHAHARA'IM** (שַׁחֲרַיִם [*two dawns*] Σααρὶν; [Vat. Σααρηλ;] Alex. Σααρημ: *Saharaim*). A Benjamite whose history and descent are alike obscure in the present text (1 Chr. viii. 8). It is more intelligible if we remove the full stop from the end of ver. 7, and read on thus: "and begat Uzza and Ahihud, and Shaharaim he begat in the field of Moab," etc. This would make Shaharaim the son of Gera. He had three wives and nine children.

**SHAHAZ'IMAH** (שַׁחֲצִימָה [*height*, Ges.]; but in the orig. text (*Cethib*) שחרצומה, *i. e.* Shahatsûmah: Σαλίμ [Vat. Σαλειμ] κατὰ[b] θάλασσαν; Alex. Σασειμαθ; [Comp. Ald. Σασιμά:] *Sehesima*). One of the towns of the allotment of Issachar, apparently between Tabor and the Jordan (Josh. xix. 22 only). The name is accurately Shahatsim, the termination *ah* being the particle of motion — "to Shahatsim." G.

**SHA'LEM** (שָׁלֵם [*safe, whole*]: Samar שלום: εἰς Σαλήμ: *in Salem*), Gen. xxxiii. 18. It seems more than probable that this word should not here be taken as a proper name, but that the sentence should be rendered, "Jacob came safe to the city of Shechem." Our translators have followed the LXX., Peshito-Syriac, and Vulgate, among ancient, and Luther's among modern versions, in all of which Shalem is treated as a proper name, and considered as a town dependent on or related to Shechem. And it is certainly remarkable that there should be a modern village bearing the name of *Salim* in a position to a certain degree consistent with the requirements of the narrative when so interpreted: namely, three miles east of *Nâblus* (the ancient Shechem), and therefore between it and the Jordan Valley, where the preceding verse (ver. 17) leaves Jacob settled (Rob. *Bibl. Res* ii. 279; Wilson, *Lands*, ii. 72; Van de Velde. *Syr. and Pal.* ii. 302, 334).

But there are several considerations which weigh very much against this being more than a fortuitous coincidence.

1. If Shalem was the city in front of which Jacob pitched his tent, then it certainly was the scene of the events of chap. xxxiv.; and the well of Jacob and the tomb of Joseph must be removed from the situation in which tradition has so appropriately placed them to some spot further eastward and nearer to *Salim*. Eusebius and Jerome felt this, and they accordingly make Sychem and Salem one and the same (*Onom.*, under both these heads).

2. Though east of *Nâblus*, *Salim* does not appear to lie near any actual line of communication between it and the Jordan Valley. The road from *Sahûl* to *Nâblus* would be either by *Wady Maiah*,

[b] Reading the final syllable as יָמָּה, "to the sea."

Digitized by Google

through *Teyasir*, *Tubas*, and the *Wady Biddn*, or by *Kerawa*, *Yanún*, and *Beit-Furik*. The former passes two miles to the north, the latter two miles to the south of *Salim*, but neither approach it in the direct way which the narrative of Gen. xxxiii. 18 seems to denote that Jacob's route did.

3. With the exceptions already named, the unanimous voice of translators and scholars is in favor of treating *shalem* as a mere appellative. Among the ancients, Josephus (by his silence, *Ant.* i. 21, § 1), the Targums of Onkelos and Pseudojonathan, the Samaritan Codex, the Arabic Version Among the moderns, the Veneto-Greek Version, Rashi,[a] Junius, and Tremellius, Meyer (*Annot.* on Seder Olam), Ainsworth, Reland (*Pal.* and *Dissert. Misc.*), Schumann, Rosenmüller, J. D. Michaelis (*Bibel für Ungelehrt.*), and the great Hebrew scholars of our own day, Gesenius (*Thes.* p. 1422), Zunz (24 *Bücher*, and *Handwb.*), De Wette, Luzzatto, Knobel, and Kalisch — all these take *shalem* to mean "safe and sound," and the city before which Jacob pitched to be the city of Shechem.

*Salim* does not appear to have been visited by any traveller.[b] It could be done without difficulty from *Nâblus*, and the investigation might be of importance. The springs which are reported to be there should not be overlooked, for their bearing on its possible identity with the SALIM of St. John the Baptist. G.

**SHA'LIM, THE LAND OF** (אֶרֶץ שַׁעֲלִים, *i. e.* Shaalim [*land of foxes*]: [Vat.] τῆς γῆς Εασακεμ [Rom. Σεγαλίμ];[c] Alex. τ. γ. Σααλειμ; [Comp. τ. γ. Σααγίμ:] *terra Salim*). A district through which Saul passed on his journey in quest of his father's asses (1 Sam. ix. 4 only). It appears to have lain between the "land of Shalisha' and the "land of Yemini" (probably, but by no means certainly, that of Benjamin).

In the complete uncertainty which attends the route — its starting-point and termination, no less than its whole course — it is very difficult to hazard any conjecture on the position of Shalim. The spelling of the name in the original shows that it had no connection with Shalem, or with the modern *Salim* east of *Nâblus* (though between these two there is probably nothing in common except the name). It is more possibly identical with the "land of Shual,"[d] the situation of which appears, from some circumstances attending its mention, to be almost necessarily fixed in the neighborhood of *Taiyibeh*, *i. e.* nearly six miles north of Michmash, and about nine from Gibeah of Saul. But this can only be taken as a conjecture. [RAMAH.] G.

**SHAL'ISHA, THE LAND OF** (אֶרֶץ שָׁלִשָׁה, *i. e.* Shalishah [*third-land*, Fürst]: ἡ γῆ Σελχά; Alex. η γ. Σαλισσα; [Comp. Σαλισά:] *terra Salisa*). One of the districts traversed by Saul when in search of the asses of Kish (1 Sam ix. 4, only). It apparently lay between "Mount Ephraim" and the "land of Shaalim," a specification which with all its evident preciseness is irrecognizable, because the extent of Mount Ephraim is so uncertain; and Shaalim, though probably near *Taiyibeh*, is not yet definitely fixed there The difficulty is increased by locating Shalisha at *Sûris* or *Khirbet Sârîs*, a village a few miles west of Jerusalem, south of *Abu Gosh* (Tobler, *Dritte Wand.* p. 178), which some have proposed. If the land of Shalisha contained, as it not impossibly did, the place called BAAL-SHALISHA (2 K. iv. 42), which, according to the testimony of Eusebius and Jerome (*Onom.* "Beth Salisha"), lay fifteen Roman (or twelve English) miles north of *Lydd*, then the whole disposition of Saul's route would be changed.

The words *Eglath Shalishiyah* in Jer. xlviii. 34 (A. V. "a heifer of three years old") are by some translators rendered as if denoting a place named Shalisha. But even if this be correct, it is obvious that the Shalisha of the prophet was on the coast of the Dead Sea, and therefore by no means appropriate for that of Saul. G.

**SHALLE'CHETH, THE GATE** (שַׁעַר שַׁלֶּכֶת [see below]: ἡ πύλη παστοφορίου: *porta quæ ducit*). One of the gates of the "house of Jehovah," whether by that expression be intended the sacred tent of David or the Temple of Solomon. It is mentioned only in 1 Chr. xxvi. 16, in what purports to be a list of the staff of the sacred establishment as settled by David (xxiii. 6, 25, xxiv. 31, xxv. 1, xxvi. 31, 32). It was the gate "to the causeway of the ascent," that is, to the long embankment which led up from the central valley of the town to the sacred inclosure. As the causeway is actually in existence, though very much concealed under the mass of houses which fill the valley, the gate Shallecheth can hardly fail to be identical with the *Bab Silsileh*, or *Sinsleh*, which enters the west wall of the Haram area opposite the south end of the platform of the Dome of the Rock, about 600 feet from the southwest corner of the Haram wall. For the bearing of this position on the topography of the Temple, see that article.

The signification of *shalleceth* is "falling or casting down." The LXX., however, appear to have read לְשִׁפָּה,[e] the word which they usually render by παστοφόριον. This would point to the "chambers" of the Temple. G.

**SHAL'LUM** (שַׁלּוּם [*retribution*]: Σελλούμ: *Sellum*).

1. The fifteenth king of Israel, son of Jabesh, conspired against Zechariah, son of Jeroboam II., killed him, and brought the dynasty of Jehu to a close. B. C. 770, according to the prophecy in 2 K.

---

[a] The traditional explanation of the word among the Jews, as stated by Rashi, is that Jacob arrived before Shechem sound from his lameness (incurred at Peniel), and with his wealth and his faith alike uninjured.

[b] * Tristram visited this village, which he represents as "modern and insignificant," but, as he says, "took only a hasty glance at it." He thinks that Jacob may have crossed the Jabbok at one point whence his route would have brought him to the vicinity of *Salim* (*Land of Israel*, p. 146). This possibility, however, is not sufficient to outweigh the opposing considerations stated in the text above. H.

[c] Many MSS. have Σεγαλιμ or Σεγαλειμ (see Holmes and Parsons), the reading followed by Tischendorf in his text (1856). The reading of the Alex. is remarkable for its suppression of the presence of the ע in the Hebrew word, usually rendered in Greek by γ.

[d] It will be seen that Shalim contains the *Ain* which is absent from Shalem. It is, however, present in Shual.

[e] At the same time omitting מִסְלָּה, "the causeway," or confounding it with the word before it.

2. 30, where it is promised that Jehu's children should occupy the throne of Israel to the fourth generation. In the English version of 2 K. xv. 10, we read, "And Shallum the son of Jabesh conspired against him, and smote him *before the people*, and slew him, and reigned in his stead." And so the Vulg. *percussitque eum palam et interfecit*. But in the LXX. we find Κεβλαάμ instead of *before the people*, i. e. Shallum and Keblaam killed Zechariah. The common editions read ἐν Κεβλαάμ, meaning that Shallum killed Zechariah in Keblaam; but no place of such a name is known, and there is nothing in the Hebrew to answer to ἐν. The words translated *before the people*, *palam*, Κεβλαάμ, are קֳבֵל עָם. Ewald (*Geschichte*, iii. 598) maintains that קֳבֵל never occurs in prose,[a] and that עַם would be הָעָם if the Latin and English translations were correct. He also observes that in vv. 14, 25, 30, where almost the same expression is used of the deaths of Shallum, Pekahiah, and Pekah, the words *before the people* are omitted. Hence he accepts the translation in the Vatican MS. of the LXX., and considers that Qobolam[b] or Κεβλαάμ was a fellow-conspirator or rival of Shallum, of whose subsequent fate we have no information. On the death of Zechariah, Shallum was made king, but, after reigning in Samaria for a month only, was in his turn dethroned and killed by Menahem. To these events Ewald refers the obscure passage in Zech. xi. 8: *Three shepherds also I cut off in one month, and my soul abhorred them* — the three shepherds being Zechariah, Qobolam, and Shallum. This is very ingenious: we must remember, however, that Ewald, like certain English divines (Mede, Hammond, Newcome, Secker, Pye Smith), thinks that the latter chapters of the prophecies of Zechariah belong to an earlier date than the rest of the book. G. E. L. C.

2. (Σελλήμ; Alex. Σελλουμ in 2 K.) The husband (or son, according to the LXX. in 2 K.) of Huldah the prophetess (2 K. xxii. 14; 2 Chr. xxxiv. 22) in the reign of Josiah. He appears to have been keeper of the priestly vestments in the Temple, though in the LXX. of 2 Chr. this office is wrongly assigned to his wife.

3. (Σαλούμ; Alex. Σαλλουμ.) A descendant of Sheshan (1 Chr. ii. 40, 41).

4. ([Rom. Σαλούμ,] Alex. Σαλλουμ in 1 Chr., [both] Σελλημ in Jer.) The third son of Josiah king of Judah, known in the books of Kings and Chronicles as Jehoahaz (1 Chr. iii. 15; Jer. xxii. 11). Hengstenberg (*Christology of the O. T.* ii. 200, Eng. transl.) regards the name as symbolical, "the recompensed one," and given to Jehoahaz in token of his fate, as one whom God recompensed according to his deserts. This would be plausible enough if it were only found in the prophecy; but a genealogical table is the last place where we should expect to find a symbolical name, and Shallum is more probably the original name of the king, which was changed to Jehoahaz when he came to the crown. Upon a comparison of the ages of Jehoiakim, Jehoahaz or Shallum, and Zedekiah, it is evident that of the two last Zedekiah must have been the younger, and therefore that Shallum was the *third*, not the *fourth*, son of Josiah, as stated in 1 Chr. iii. 15.

5. (Σαλέμ.) Son of Shaul the son of Simeon (1 Chr. iv. 25).

6. (Σαλώμ in Chr., Σελούμ [Vat. Σαλουμ] in Ezr.; Alex. Σελλουμ.) A high-priest, son of Zadok and ancestor of Ezra (1 Chr. vi. 12, 13 Ezr. vii. 2). Called also SALUM (1 Esdr. viii. 1), and SADAMIAS (2 Esdr. i. 1).

7. (Σελλούμ; [Vat. Σαλωμων.]) A son of Naphthali (1 Chr. vii. 13). He and his brethren are called "sons of Bilhah," but in the Vat. MS. of the LXX., Shallum and the rest are the sons of Naphthali, and Balam (not Bilhah) is the son of Shallum. Called also SHILLEM.

8. (Σαλώμ, Alex. Σαλλωμ in 1 Chr. ix. 17 Σελλούμ [Vat. Σαλουμ] in Ezr. ii. 42; Σαλούμ, Alex. Σελλουμ in Neh. vii. 45.) The chief of a family of porters or gatekeepers of the east gate of the Temple, for the camps of the sons of Levi. His descendants were among those who returned with Zerubbabel. In 1 Esdr. v. 28 he is called SALUM, and in Neh. xii. 25 MESHULLAM.

9. (Σελλούμ [Vat. Σαλωμων], Σαλώμ; Alex. Σαλωμ.) Son of Kore, a Korahite, who with his brethren was keeper of the thresholds of the Tabernacle (1 Chr. ix. 19, 31), "and their fathers (were) over the camp of Jehovah, keepers of the entry." On comparing this with the expression in ver. 18, it would appear that Shallum the son of Kore and his brethren were gatekeepers of a higher rank than Shallum, Akkub, Talmon, and Ahiman, who were only "for the camp of the sons of Levi." With this Shallum we may identify Meshelemiah and Shelemiah (1 Chr. xxvi. 1, 2, 9, 14), but he seems to be different from the last-mentioned Shallum.

10. (Σελλήμ.) Father of Jehizkiah, one of the heads of the children of Ephraim (2 Chr. xxviii. 12).

11. (Σολμήν; [Vat. Γελλημ; FA. Γαλλειμ;] Alex. Σολλημ.) One of the porters of the Temple who had married a foreign wife (Ezr. x. 24).

12. (Σελλούμ; [Vat. FA. Σαλουμ.]) Son of Bani, who put away his foreign wife at the command of Ezra (Ezr. x. 42).

13. (Σαλλούμ; [Vat.] FA. Σαλουμ.) The son of Haloheah and ruler of a district of Jerusalem. With his daughters he assisted Nehemiah in rebuilding the wall of the city (Neh. iii. 12).

14. (Σαλώμ; [FA. Σαλμων.]) The uncle of Jeremiah (Jer. xxxii. 7); perhaps the same as Shallum the husband of Huldah the prophetess. [JEREMIAH, vol. ii. p. 1254 *a*.]

15. (Σελώμ; [FA.[1] Αιλωμ, FA.[2] Σαιλωμ.]) Father or ancestor of Maaseiah, "keeper of the threshold" of the Temple in the time of Jeremiah (Jer. xxxv. 4); perhaps the same as 9.

SHAL'LUN (שַׁלּוּן [perh. *retribution*]: [Rom.] Σαλωμών; [Vat. Alex. FA. omit:] *Sellum*. The son of Col-hozeh, and ruler of a district of the Mizpah. He assisted Nehemiah in repairing the spring gate, and "the wall of the pool of Hashshelach" (A. V. "Siloah") belonging to the king's garden, "even up to the stairs that go down from the city of David" (Neh. iii. 15).

SHAL'MAI [2 syl.] (שַׁלְמַי, *Keri*; שַׁלְמַי

[a] Is not the objection rather that the word is Chaldee? It occurs repeatedly in Daniel (ii. 31; iii. 3; iv. 1, 5, 10), and also in the Chaldee portions of Ezra (v. 15; vi. 12).

[b] Q is the best representative of the Hebrew ק.

Digitized by Google

in Ezr., שַׁלְמַי in Neh. [*my thanks*]: Σελαμί, Σελμεΐ; [Vat. Σαμααν, Σαλαμει:] Alex. Σελαμει, Σελμει [FA. Σαμαει]: *Semlai, Selmai*). The children of Shalmai (or SHAMLAI, as in the margin of Ezr. ii. 46) were among the Nethinim who returned with Zerubbabel (Ezr. ii. 46; Neh. vii. 48). In Neh. the name is properly SALMAI. In 1 Esdr. v. 30 it is written SUBAI.

**SHALMAN** (שַׁלְמָן [as below]: Σαλαμάν: *Salmana*). Shalmaneser, king of Assyria (Hos. x. 14). The versions differ in a remarkable manner in their rendering of this verse. The LXX. read שַׂר, *sar* (ἄρχων), for שַׁד, *shód* (in which they are followed by the Arabic of the Polyglot), and "Jeroboam" (Alex. "Jerubbaal") for "Arbel." The Vulgate, reading "Jerubbaal," appears to have confounded Shalman with Zalmunna, and renders the clause, *sicut vastatus est Salmana a domo ejus qui judicavit Baal in die prælii*. The Targum of Jonathan and Peshito-Syriac both give "Shalmai;" the former for בֵּית אַרְבָּאֵל, reading כְּמִאֲרַב, "by an ambush," the latter, בֵּית אֵל, "Beth-el." The Chaldee translator seems to have caught only the first letters of the word "Arbel," while the Syrian only saw the last two. The Targum possibly regards "Shalman" as an appellative, "the peaceable," following in this the traditional interpretation of the verse recorded by Rashi, whose note is as follows: "As spoilers that come upon a people dwelling in peace, suddenly by means of an ambush, who have not been warned against them to flee before them, and destroy all."

**SHALMANE'SER** (שַׁלְמַנְאֶסֶר [perh. *fire-worshipper*; see Gen. *s. v.*]: Σαλαμανασσάρ; [Vat. 2 K. xvii., Σαμεννασσαρ; Alex. Σαλαμανασαρ, Σαμανασσαρ;] Joseph. Σαλμανασσάρης: *Salmanasar*) was the Assyrian king who reigned immediately before Sargon, and probably immediately after Tiglath-pileser. Very little is known of him, since Sargon, his successor, who was of a different family, and most likely a rebel against his authority [SARGON], seems to have destroyed his monuments. He can scarcely have ascended the throne earlier than B. C. 730, and may possibly not have done so till a few years later. [TIGLATH PILESER.] It must have been soon after his accession that he led the forces of Assyria into Palestine, where Hoshea, the last king of Israel, had revolted against his authority (2 K. xvii. 3). No sooner was he come than Hoshea submitted, acknowledged himself a "servant" of the Great King, and consented to pay him a fixed tribute annually. Shalmaneser upon this returned home; but soon afterwards he "found conspiracy in Hoshea," who had concluded an alliance with the king of Egypt, and withheld his tribute in consequence. In B. C. 723 Shalmaneser invaded Palestine for the second time, and, as Hoshea refused to submit, laid siege to Samaria. The siege lasted to the third year (B. C. 721), when the Assyrian arms prevailed; Samaria fell; Hoshea was taken captive and shut up in prison, and the bulk of the Samaritans were transported from their own country to Upper Mesopotamia (2 K. xvii. 4–6, xviii. 9–11). It is uncertain whether Shalmaneser conducted the siege to its close, or whether he did not lose his crown to Sargon before the city was taken. Sargon claims the capture as his own exploit in his first year; and Scripture, it will be found, avoids saying that Shalmaneser took the place.[a] Perhaps Shalmaneser died before Samaria, or perhaps, hearing of Sargon's revolt, he left his troops, or a part of them, to continue the siege, and returned to Assyria, where he was defeated and deposed (or murdered) by his enemy.

According to Josephus, who professes to follow the Phœnician history of Menander of Ephesus Shalmaneser engaged in an important war with Phœnicia in defense of Cyprus (*Ant.* ix. 14, § 2) It is possible that he may have done so, though we have no other evidence of the fact; but it is perhaps more probable that Josephus, or Menander, made some confusion between him and Sargon, who certainly warred with Phœnicia, and set up a memorial in Cyprus. [SARGON.] G. R.

**SHA'MA** (שָׁמָע [*hearing, obedient*]: Σαμαΐά; Alex. Σαμμα: *Samma*). One of David's guard, son of Hothan of Aroer (1 Chr. xi. 44), and brother of Jehiel. Probably a Reubenite (see 1 Chr. v. 8).

**SHAMARI'AH** (שְׁמַרְיָה [*whom Jehovah protects*]: Σαμορία; [Vat.] Alex. Σαμαρια: *Somoria*). Son of Rehoboam by Abihail the daughter of Eliab (2 Chr. xi. 19).

* **SHAMBLES**, 1 Cor. x. 25 (μάκελλον from the Latin *macellum* = κρεοπώλιον as explained by Plutarch), *flesh-market*. Meat which had been offered in sacrifice to idols was often brought to such places for sale. Some of the first Christians doubted whether they could lawfully eat such meat. Paul decides that the scruple was unnecessary; but if any one entertained it he was bound by it, and even if free from it should forego his own liberty out of regard to the weak consciences of others. "Shambles" is from the Anglo-Saxon *scamel, scamul*, which meant a bench or stool. H.

**SHA'MED** (שָׁמֶד [perh. *watch, keeper*]: Σεμήρ; [Vat. Σημης; Comp. Σάμηδ:] *Samad*). Properly SHAMER, or Shemer; one of the sons of Elpaal the Benjamite, who built Ono and Lod, with the towns thereof (1 Chr. viii. 12). The A V has followed the Vulg., as in the case of Shachia, and retains the reading of the Geneva Version. Thirteen of Kennicott's MSS. have שמר.

* **SHAMEFACEDNESS** is a current misprint or corruption in 1 Tim. ii. 9, for "Shamefastness," in the sense of being fast or established in modesty and decorum. The old English versions (Wickliffe, Tyndale, Cranmer, Geneva), as well as the original ed. of 1611, have "shamefastness." The word is formed from shamefast, like steadfastness from steadfast, rootfastness from rootfast, etc. (See Trench *On the Authorized Version*, p. 66.) The Greek word is αἰδώς, which the A. V. renders "reverence" in Heb. xii. 28. H.

* **SHAMEFASTNESS.** [SHAMEFACEDNESS.]

**SHA'MER** (שֹׁמֵר [*keeper*, or *lees of wine*?]: Σεμήρ; [Vat.] Alex. Σεμηρ: *Somer*

[a] In 2 K. xvii. 6, the expression is simply "the king of Assyria took it." In 2 K. xviii. 9, 10, we find, still more remarkably, "Shalmaneser, king of Assyria, came up against Samaria, and besieged it; and at the end of three years *they* took it."

Digitized by Google

1. A Merarite Levite, ancestor of Ethan (1 Chr. vi. 46).

2. (Σεμμήρ; Alex. Σομηρ.) SHOMER the son of Heber an Asherite (1 Chr. vii. 34). His four sons are mentioned by name. W. A. W.

**SHAM'GAR** (שַׁמְגַּר [possibly, *cup-bearer*]: Σαμεγάρ; [Vat. in Judg. iii. 31, Σαμαγαρ:] *Samgar:* of uncertain etymology; compare Samgar-nebo). Son of Anath, judge of Israel after Ehud, and before Barak, though possibly contemporary with the latter, since he seems to be spoken of in Judg. v. 6 as a contemporary of Jael, if the reading is correct.[a] It is not improbable from his patronymic that Shamgar may have been of the tribe of Naphtali, since Beth-anath is in that tribe (Judg. i. 33). Ewald conjectures that he was of Dan — an opinion in which Bertheau (*On Judg.* iii. 31) does not coincide. And since the tribe of Naphtali bore a chief part in the war against Jabin and Sisera (Judg. iv. 6, 10, v. 18), we seem to have a point of contact between Shamgar and Barak. Anyhow, in the days of Shamgar, Israel was in a most depressed condition; the tributary Canaanites (Judg. i. 33), in league apparently with their independent kinsmen, the Philistines, rose against their Israelite masters, and the country became so unsafe, that the highways were deserted, and Hebrew travellers were obliged to creep unobserved by cross-roads and by-ways. The open villages were deserted, the wells were inaccessible, and the people hid themselves in the mountains. Their arms were apparently taken from them, by the same policy as was adopted later by the same people (Judg. iii. 31, v. 8; comp. with 1 Sam. xiii. 19–22), and the whole nation was cowed. At this conjuncture Shamgar was raised up to be a deliverer. With no arms in his hand but an ox-goad (Judg. iii. 31; comp. 1 Sam. xiii. 21), he made a desperate assault upon the Philistines, and slew 600 of them; an act of valor by which he procured a temporary respite for his people, and struck terror into the hearts of the Canaanites and their Philistine allies. But it was reserved for Deborah and Barak to complete the deliverance; and whether Shamgar lived to witness or participate in it we have no certain information. From the position of "the Philistines" in 1 Sam. xii. 9, between "Moab" and "Hazor," the allusion seems to be to the time of Shamgar. Ewald observes with truth that the way in which Shamgar is mentioned in Deborah's song indicates that his career was very recent. The resemblance to Samson, pointed out by him, does not seem to lead to anything. A. C. H.

[a] It may have been as leader and not by his own single hand that Shamgar slew the 600 Philistines. The subjugated Hebrews being disarmed (comp. Judg. v. 8), he may have put himself at the head of a band of peasants armed with ox-goads, the only weapons left to them, and with such warriors may have achieved the victory. In common speech we ascribe to the leader what is done under his leadership. [SHECHEM.] One of Homer's heroes put to flight Dionysius and the Bacchantes with his βουπλήξ (*Il.* vi. 135). Mr. Porter states (Kitto's *Daily Bible Illustr.* ii. 340) that he "once saw a goad of a Druse ploughman, on the mountains of Bashan — of which the shaft was ten feet long and made of an oak sapling; the goad appeared to be an old spear-head, very sharp and firmly fastened. The Druse remarked that it was for the Arabs as well as the oxen." Thomson describes this formidable weapon in his *Land and Book*, i. 500. [See also OX-GOAD.] H.

**SHAM'HUTH** (שַׁמְהוּת [perh. *desolation, waste*]: Σαμαώθ; [Vat. Σαλαωθ:] *Samaoth*). The fifth captain for the fifth month in David's arrangement of his army (1 Chr. xxvii. 8). His designation חַיִּזְרָחִי, *hayyizrâch*, i. e. the Yizrâch, is probably for חַזַּרְחִי, *hazzarchi*, the Zarhite, or descendant of Zerah the son of Judah. From a comparison of the lists in 1 Chr. xi., xxvii., it would seem that Shamhuth is the same as SHAMMOTH the Harorite. W. A. W.

**SHA'MIR** (שָׁמִיר [*thorn-hedge*]: [Rom. Σαμιρ; Vat.] Σαμειρ; Alex. in Josh. Σαφειρ, in Judg. Σαμαρεια: *Samir*). The name of two places in the Holy Land.

1. A town in the mountain district of Judah (Josh. xv. 48, only). It is the first in this division of the catalogue, and occurs in company with JATTIR in the group containing SOCHO and ESHTEMOH. It therefore probably lay some eight or ten miles south of Hebron, in the neighborhood of the three places just named, all of which have been identified with tolerable certainty. But it has not itself been yet discovered.

2. A place in Mount Ephraim, the residence and burial-place of Tola the Judge (Judg. x. 1, 2). It is singular that this judge, a man of Issachar, should have taken up his official residence out of his own tribe. We may account for it by supposing that the plain of Esdraelon, which formed the greater part of the territory of Issachar, was overrun, as in Gideon's time, by the Canaanites or other marauders, of whose incursions nothing whatever is told us — though their existence is certain — driving Tola to the more secure mountains of Ephraim. Or, as Manasseh had certain cities out of Issachar allotted to him, so Issachar on the other hand may have possessed some towns in the mountains of Ephraim. Both these suppositions, however, are but conjecture, and have no corroboration in any statement of the records.

Shamir is not mentioned by the ancient topographers. Schwarz (p. 151) proposes to identify it with *Samûr*, a place of great natural strength (which has some claims to be Bethulia), situated in the mountains, half-way between Samaria and *Jenin*, about eight miles from each. Van de Velde (*Mem.* p. 348) proposes *Khirbet Sammer*, a ruined site in the mountains overlooking the Jordan valley, ten miles E. S. E. of *Nâblus*. There is no connection between the names Shamir and Samaria, as proposed in the Alex. LXX. (see above), beyond the accidental one which arises from the inaccurate form of the latter in that Version, and in our own, it being correctly *Shomron*. G.

**SHA'MIR** (שָׁמוּר [*tried, proved*, Fürst]; *Keri*, שֹׁמִיר: Σαμήρ: *Samir*). A Kohathite, son of Micah, or Michah, the firstborn of Uzziel (1 Chr. xxiv. 24).

**SHAM'MA** (שַׁמָּא [*desolation*]: Σαμά; [Vat.

[a] The mention of Jael seems scarcely natural. It has occurred to the writer to conjecture for בִּימֵי, בִּישְׂרָאֵל, יָעֵל, as in ver. 7. Dr. Donaldson (*Jashar*, pp. 271, 272) conjectures בְּמַעֲלֵה, "and peer ounty"

Σερα; Alex. Σαμμα: *Samma*). One of the sons of Zophar, an Asherite (1 Chr. vii. 37).

**SHAM'MAH** (שַׁמָּה [*desolation*]: Σομέ; Alex. Σομμε in 1 Chr. i. 37: *Samma*). 1. The son of Reuel the son of Esau, and one of the chieftains of his tribe (Gen. xxxvi. 13, 17; 1 Chr. i. 37).

2. (Σαμά; Alex. Σαμμα: *Samma*.) The third son of Jesse, and brother of David (1 Sam. xvi. 9, xvii. 13). Called also SHIMEA, SHIMEAH, and SHIMMA. He was present when Samuel anointed David, and with his two elder brothers joined the Hebrew army in the valley of Elah to fight with the Philistines.

3. (Σαμαΐα; Alex. Σαμμεας: *Semma*.) One of the three greatest of David's mighty men. He was with him during his outlaw life in the cave of Adullam, and signalized himself by defending a piece of ground full of lentiles against the Philistines on one of their marauding incursions. This achievement gave him a place among the first three heroes, who on another occasion cut their way through the Philistine garrison, and brought David water from the well of Bethlehem (2 Sam. xxiii. 11–17). The text of Chronicles at this part is clearly very fragmentary, and what is there attributed to Eleazar the son of Dodo properly belongs to Shammah. There is still, however, a discrepancy in the two narratives. The scene of Shammah's exploit is said in Samuel to be a field of lentiles (עֲדָשִׁים), and in 1 Chr. a field of barley (שְׂעֹרִים). Kennicott proposes in both cases to read "barley," the words being in Hebrew so similar that one is produced from the other by a very slight change and transposition of the letters (*Diss.* p. 141). It is more likely, too, that the Philistines should attack and the Israelites defend a field of barley than a field of lentiles. In the Peshito-Syriac, instead of being called "the Hararite," he is said to be "from the king's mountain" (ܡܢ ܛܘܪܐ ܕܡܠܟܐ), and the same is repeated at ver. 25. The Vat. MS. of the LXX. makes him the son of Asa (*υἱὸς Ἀσὰ ὁ Ἀρουχαῖος*, where Ἀρουδαῖος was perhaps the original reading). Josephus (*Ant.* vii. 12, § 4) calls him Cesabæus the son of Ilus (*Ἰλοῦ μὲν υἱὸς Κησαβαῖος δὲ ὄνομα*).

4. (Σαμά; Alex. Σαμμαι: *Semma*.) The Harodite, one of David's mighties (2 Sam. xxiii. 25). He is called "SHAMMOTH the Harorite" in 1 Chr. xi. 27, and in 1 Chr. xxvii. 8 "SHAMHUTH the Izrahite." Kennicott maintained the true reading in both to be "Shamhoth the Harodite" (*Diss.* p. 181).

5. (Σαμνάν; Alex. Σαμνας, [and so Vat.$^2$; Comp. Ald. Σαμά: *Semma*.]) In the list of David's mighty men in 2 Sam. xxiii. 32, 33, we find "Jonathan. Shammah the Hararite;" while in the corresponding verse of 1 Chr. xi. 34, it is "Jonathan, the son of Shage the Hararite." Combining the two, Kennicott proposes to read "Jonathan, the son of Shamha, the Hararite," David's nephew who slew the giant in Gath (2 Sam. xxi. 21). Instead of "the Hararite," the Peshito-Syriac has "of the mount of Olives" (ܕܛܘܪ ܙܝܬܐ), in 2 Sam. xxiii. 33, and in 1 Chr. xi. 34, "of Mount Carmel" (ܕܛܘܪ ܟܪܡܠ); but the origin of both these interpretations is obscure.

W. A. W.

**SHAM'MAI** [2 syl.] (שַׁמַּי [*desolated*] Σαμαΐ; Alex. Σαμμαΐ: *Semei*). 1. The son of Onam, and brother of Jada (1 Chr. ii. 28, 32) In the last-quoted verse the LXX. give 'Αχισαμάς for "the brother of Shammai."

2. (*Sammaï*.) Son of Rekem, and father or founder of Maon (1 Chr. ii. 44, 45).

3. (Σεμεΐ; [Vat. Σεμερ:] Alex. Σαμμαΐ: [*Sammai*.]) The brother of Miriam and Ishbah the founder of Eshtemoa, in an obscure genealogy of the descendants of Judah (1 Chr. iv. 17). Rabbi D Kimchi conjectures that these were the children of Mered by his Egyptian wife Bithiah, the daughter of Pharaoh. [MERED.] The LXX. makes Jether the father of all three. The tradition in the *Quæst. in Libr. Paral.* identifies Shammai with Moses, and Ishbah with Aaron.

**SHAM'MOTH** (שַׁמּוֹת [*desolations*, Ges.]: Σαμαώθ; Alex. Σαμωθ; [Comp. Σαμμώθ:] *Sammoth*). The Harorite, one of David's guard (1 Chr. xi. 27). He is apparently the same with "Shammah the Harodite" (2 Sam. xxiii. 25), and with "Shamhuth" (1 Chr. xxvii. 8).

**SHAMMU'A** (שַׁמּוּעַ [*renowned*] : Σαμουήλ; Alex. Σαμαλιηλ: *Sammua*). 1. The son of Zaccur (Num. xiii. 4) and the spy selected from the tribe of Reuben.

2. (Σαμαά; Alex. Σαμμαον; [FA. Σαμμαιαι:] *Samua*.) Son of David by his wife Bathsheba, born to him in Jerusalem (1 Chr. xiv. 4). In the A. V. of 2 Sam. v. 14 he is called SHAMMUAH, and in 1 Chr. iii. 5 SHIMEA.

3. (Σαμουί: [Vat.] FA. Σαμουει: [*Samua*.]) A Levite, the father of Abda (Neh. xi. 17). He is the same as SHEMAIAH the father of Obadiah (1 Chr. ix. 16).

4. (Σαμουέ; [Vat. Alex. FA.$^1$ omit:] *Sammua*.) The representative of the priestly family of Bilgah, or Bilgai, in the days of the high-priest Joiakim (Neh. xii. 18).

**SHAMMU'AH** (שַׁמּוּעַ [*renowned*]: Σαμμούς; Alex. Σαμμουε: *Samua*). Son of David (2 Sam. v. 14); elsewhere called SHAMMUA, and SHIMEA.

**SHAMSHERAI** [3 syl.] (שַׁמְשְׁרַי [*heroic*, Fürst]: Σαμσαρί; [Vat. Ισμασαρια;] Alex. Σαμσαρια: *Samsari*). One of the sons of Jeroham, a Benjamite, whose family lived in Jerusalem (1 Chr. viii. 26).

**SHAPHAM** (שָׁפָם [perh. *bald, bare*]: Σαφαμ; [Vat. Σαβατ:] *Saphan*). A Gadite who dwelt in Bashan (1 Chr. v. 12). He was second in authority in his tribe.

**SHAPHAN** (שָׁפָן [*coney*]: Σαφάν; [Vat.] Alex. Σαφφαν in 2 K. xxii. [exc. ver. 3, Alex. Σεφφαν, and 14, Vat. Σεφφαθα, Alex. Σαφαν]. but elsewhere both MSS. have Σαφάν [exc. 2 Chr. xxxiv. 15, Alex. Ασαφ]: *Saphan*). The scribe or secretary of king Josiah. He was the son of Azaliah (2 K. xxii. 3; 2 Chr. xxxiv. 8), father of Ahikam (2 K. xxii. 12; 2 Chr. xxxiv. 20), Elasah (Jer. xxix. 3), and Gemariah (Jer. xxxvi. 10, 11, 12), and grandfather of Gedaliah (Jer. xxxix. 14, xl. 5, 9, 11, xli. 2, xliii. 6), Michaiah (Jer. xxxvi. 11), and probably of Jaazaniah (Ez. viii. 11). There seems to be no sufficient reason for supposing that Shaphan the father of Ahikam and Shaphan the scribe, were different persons. The his

Digitized by Google

story of Shaphan brings out some points with regard to the office of scribe which he held. He appears on an equality with the governor of the city and the royal recorder, with whom he was sent by the king to Hilkiah to take an account of the money which had been collected by the Levites for the repair of the Temple and to pay the workmen (2 K. xxii. 4; 2 Chr. xxxiv. 9; comp. 2 K. xii. 10). Ewald calls him Minister of Finance (*Gesch.* iii. 697). It was on this occasion that Hilkiah communicated his discovery of a copy of the Law, which he had probably found while making preparations for the repair of the Temple. [HILKIAH, vol. ii. p. 1075 f.] Shaphan was entrusted to deliver it to the king. Whatever may have been the portion of the Pentateuch thus discovered, the manner of its discovery, and the conduct of the king upon hearing it read by Shaphan, prove that for many years it must have been lost and its contents forgotten. The part read was apparently from Deuteronomy, and when Shaphan ended, the king sent him with the high-priest Hilkiah, and other men of high rank, to consult Huldah the prophetess. Her answer moved Josiah deeply, and the work which began with the restoration of the decayed fabric of the Temple, quickly took the form of a thorough reformation of religion and revival of the Levitical services, while all traces of idolatry were for a time swept away. Shaphan was then probably an old man, for his son Ahikam must have been in a position of importance, and his grandson Gedaliah was already born, as we may infer from the fact that thirty-five years afterwards he is made governor of the country by the Chaldæans, an office which would hardly be given to a very young man. Be this as it may, Shaphan disappears from the scene, and probably died before the fifth year of Jehoiakim, eighteen years later, when we find Elishama was scribe (Jer. xxxvi. 12). There is just one point in the narrative of the burning of the roll of Jeremiah's prophecies by the order of the king, which seems to identify Shaphan the father of Ahikam with Shaphan the scribe. It is well known that Ahikam was Jeremiah's great friend and protector at court, and it was therefore consistent with this friendship of his brother for the prophet that Gemariah the son of Shaphan should warn Jeremiah and Baruch to hide themselves, and should intercede with the king for the preservation of the roll (Jer. xxxvi. 12, 19, 25).

W. A. W.

**SHA'PHAT** (שָׁפָט [*judge*]: Σαφάτ: *Saphat*). 1. The son of Hori, selected from the tribe of Simeon to spy out the land of Canaan (Num. xiii. 5).

2. [Vat. 1 K. xix. 16, Σαφάθ; 2 K. iii. 11, Ισαφάθ, see *Errata* in Mai.] The father of the prophet Elisha (1 K. xix. 16, 19; 2 K. iii. 11, vi. 31).

3. (Σαφάθ; Alex. Σαφατ.) One of the six sons of Shemaiah in the royal line of Judah (1 Chr. iii. 22).

4. (ὁ γραμματεύς; [Comp. Σαφάν.]) One of the chiefs of the Gadites in Bashan (1 Chr. v. 12).

5. (Σαφάτ; [Vat. Σαφαν.]) The son of Adlai, who was over David's oxen in the valleys (1 Chr. xxvii. 29).

**SHA'PHER, MOUNT** (הַר־שָׁפֶר [see below]: Σαφάρ; [Alex. Ασαφαρ, Σαρσαφαρ: *mons Sepher*,] Num. xxxiii. 23, 24). The name of a desert station where the Israelites encamped, of which no other mention occurs. The name probably means "mount of pleasantness," but no site has been suggested for it. H. H.

**SHA'RAI** [2 syl.] (שָׁרַי [*beginning*, or *release*?]: Σαριού; [Alex. Αρου;] FA. Σαρουε. *Sarai*). One of the sons of Bani who put away his foreign wife at the command of Ezra (Ezr. x. 40). He is called ESRIL in 1 Esdr. ix. 34.

**SHARA'IM** (שַׁעֲרַיִם, *i. e.* Shaaraim [*two gates*]: [Rom. Σακαρίν; Vat.] Σακαρειμ; Alex. [a] Σαργαρειμ; [Ald. Σαραειμ:] *Sarim* and *Saraim*). An imperfect version (Josh. xv. 36 only) of the name which is elsewhere more accurately given SHAARAIM. The discrepancy does not exist in the original, and doubtless arose in the A. V. from adherence to the Vulgate. G.

**SHA'RAR** (שָׁרָר [*cord*, Ges.]: Ἀρατ; Alex. Αραβ: *Sarar*). The father of Ahiam the Hararite, one of David's guard (2 Sam. xxiii. 33). In 1 Chr. xi. 35 he is called SACAR, which Kennicott (*Diss.* p. 203) thinks the true reading.

**SHARE'ZER** (שַׂרְאֶצֶר [Pers. *prince of fire*]: Σαρασάρ; [in Is. xxxvii. 38, Sin. Alex. Σαρασα:] *Sarasar*) was a son of Sennacherib, whom, in conjunction with his brother Adrammelech, he murdered (2 K. xix. 37). Moses of Chorene calls him Sanasar, and says that he was favorably received by the Armenian king to whom he fled, and given a tract of country on the Assyrian frontier, where his descendants became very numerous (*Hist. Armen.* i. 22). He is not mentioned as engaged in the murder, either by Polyhistor or Abydenus, who both speak of Adrammelech.

G. R.

**SHA'RON** (הַשָּׁרוֹן, with the def. article [*the plain*]: ὁ Σαρών; [b] ὁ δρυμός; τὸ πεδίον: *Saron*, *campestria*, *campus*). A district of the Holy Land occasionally referred to in the Bible [c] (1 Chr. v. 16, xxvii. 29; Is. xxxiii. 9, xxxv. 2, lxv. 10; Cant. ii. 1; Acts ix. 35, A. V. SARON). The name has on each occurrence, with one exception only, the definite article — *has-Shārón* — as is the case also with other districts — the Arabah, the Shefelah, the Ciccar; and on that single occasion (1 Chr. v. 16), it is obvious that a different spot must be intended to that referred to in the other passages. This will be noticed further on. It would therefore appear that "the Sharon" was some well-defined region familiar to the Israelites, though its omission in the formal topographical documents of the nation shows that it was not a recognized division of the country, as the Shefelah for example. [SEPHELA.] From the passages above

---

[a] Codex A here retains the γ as the equivalent for the ע, which has disappeared from the name in Codex B. The first ρ, however, is unusual. [Comp. TIDAL.]

[b] Two singular variations of this are found in the Vat. MS. (Mai's ed.), namely, 1 Chr. v. 16, Γαριάμ; and xxvii. 29, Ἀσειδών [Rom. Σερων], where the A is a remnant of the Hebrew def. article. It is worthy of remark that a more decided trace of the Heb. article appears in Acts ix. 35, where some MSS. have ασσαρωνα.

[c] The Lasharon of Josh. xii. 18, which some scholars consider to be Sharon with a preposition prefixed, appears to the writer more probably correctly given in the A. V. [LASHARON.]

Digitized by Google

cited we gather that it was a place of pasture for cattle, where the royal herds of David grazed (1 Chr xxvii. 29); the beauty of which was as generally recognized as that of Carmel itself (Is. xxxv. 2); and the desolation of which would be indeed a calamity (xxxiii. 9), and its reëstablishment a symbol of the highest prosperity (lxv. 10). The rose of Sharon (possibly the tall, graceful, and striking squill) was a simile for all that a lover would express (Cant. ii. 1). [ROSE, *note*, Amer. ed.] Add to these slight traits the indications contained in the renderings of the LXX. τὸ πεδίον, "the plain," and ὁ δρυμός, "the wood," and we have exhausted all that we can gather from the Bible of the characteristics of Sharon.

The only guide to its locality furnished by Scripture is its mention with Lydda in Acts ix. 35. There is, however, no doubt of the identification of Sharon. It is that broad rich tract of land which lies between the mountains of the central part of the Holy Land and the Mediterranean — the northern continuation of the SHEFELAH. Josephus but rarely alludes to it, and then so obscurely that it is impossible to pronounce with certainty, from his words alone, that he does refer to it. He employs the same term as the LXX., "woodland." Δρυμοὶ τὸ χωρίον καλεῖται, says he (*Ant.* xiv. 13, § 3; and comp. *B. J.* i. 13, § 2), but beyond its connection with Carmel there is no clew to be gained from either passage. The same may be said of Strabo (xvi. 28), who applies the same name, and at the same time mentions Carmel.

*Sharon* is derived by Gesenius (*Thes.* p. 642) from יָשַׁר, to be straight or even — the root also of *Mishor*, the name of a district east of Jordan. The application to it, however, by the LXX., by Josephus, and by Strabo, of the name Δρυμός or Δρυμοί — "woodland," is singular. It does not seem certain that that term implies the existence of wood on the plain of Sharon. Reland has pointed out (*Pal.* p. 190) that the Saronicus Sinus, or Bay of Saron, in Greece, was so called (Pliny, *H. N.* iv. 5) because of its woods, σάρωνις meaning an oak. Thus it is not impossible that Δρυμός was used as an equivalent of the name Sharon, and was not intended to denote the presence of oaks or woods on the spot. May it not be a token that the original meaning of Saron, or Sharon, is not that which its received Hebrew root would imply, and that it has periahed except in this one instance? The Alexandrine Jews who translated the LXX. are not likely to have known much either of the Saronic gulf, or of its connection with a rare Greek word. Eusebius and Jerome (*Onomast.* "Saron"), under the name of Saronas, specify it as the region extending from Cæsarea to Joppa. And this is corroborated by Jerome in his comments on the three passages in Isaiah, in one of which (on lxv. 10) he appears to extend it as far south as Jamnia. There are occasional allusions to wood in the description of the events which occurred in this district in later times. Thus, in the Chronicles of the Crusades, the "Forest of Saron" was the scene of one of the most romantic adventures of Richard (Michaud, *Histoire* viii.), the "forest of Assur" (*i. e.* Arsuf) is mentioned by Vinisauf (iv. 16). To the S. E. of *Kaisariyeh* there is still "a dreary wood of (natural) dwarf pines and entangled bushes" (Thomson, *Land and Book*, ch. 33). The orchards and palm-groves round *Jimzu*, *Lydd*, and *Ramleh*, and the dense thickets of *dûm* in the neighborhood of the two last — as well as the mulberry plantations in the Valley of the *Aujeh* a few miles from Jaffa — an industry happily increasing every day — show how easily wood might be maintained by care and cultivation (see Stanley, *S. & P.* p. 260 *note*).

A general sketch of the district is given under the head of PALESTINE (vol. iii. p. 2296 f.). Jerome (*Comm.* on Is. xxxv. 2) characterizes it in words which admirably portray its aspects even at the present: "Omnis igitur candor (the white sand-hills of the coast), cultus Dei (the wide crops of the finest corn), et circumcisionis scientia (the well trimmed plantations) et loca uberrima et campestria (the long, gentle swells of rich red and black earth) quæ appellantur Saron."

**2.** (שָׁרוֹן: [Vat.] Γεριαμ; [Rom.] Alex. Σαρων: *Saron.*) The SHARON of 1 Chr. v. 16, to which allusion has already been made, is distinguished from the western plain by not having the article attached to its name as the other invariably has. It is also apparent from the passage itself that it was some district on the east of Jordan in the neighborhood of Gilead and Bashan. The expression "suburbs" (מִגְרְשֵׁי) is in itself remarkable. The name has not been met with in that direction, and the only approach to an explanation of it is that of Prof. Stanley (*S. & P.* App. § 7), that Sharon may here be a synonym for the *Mishor* — a word probably derived from the same root, describing a region with some of the same characteristics, and attached to the pastoral plains east of the Jordan. G.

**SHARONITE, THE** (הַשָּׁרֹנִי [see above]: [Vat.] ὁ Χαρωνειτης; [Rom.] Alex. Σαρωνιτης: *Saronites*). Shitrai, who had charge of the royal herds pastured in Sharon (1 Chr. xxvii. 29), is the only Sharonite mentioned in the Bible. G.

**SHARUHEN** (שָׁרוּחֶן [*pleasant lodging*, Ges.]: οἱ ἀγροὶ [a] αὐτῶν, in both MSS.: *Sareon* [*?Sarchen*]). A town named in Josh. xix. 6 only amongst those which were allotted within Judah to Simeon. Sharuhen does not appear in the catalogue of the cities of Judah; but instead of it, and occupying the same position with regard to the other names, we find SHILHIM (xv. 32). In the list of 1 Chr. on the other hand, the same position is occupied by SHAARAIM (iv. 31). Whether these are different places, or different names of the same place, or mere variations of careless copyists; and, in the last case, which is the original form, it is perhaps impossible now to determine. Of the three, Shaaraim would seem to have the strongest claim, since we know that it was the name of a place in another direction, while Shilhim and Sharuhen are found once only. If so, then the *Ain* which exists in Shaaraim has disappeared in the others.

Knobel (*Exeg. Handb.* on Josh. xv. 32) calls attention to *Tell Sheri'ah*, about 10 miles west of *Bir es-Seba*, at the head of *Wady Sheri'ah* (the "watering-place"). The position is not unsuitable, but as to its identity with Shaaraim or Sharuhen we can say nothing. G.

[a] Probably reading שְׁדִירֹן, as Reland conjectures.

Digitized by Google

**SHA'SHAI** [2 syl.] (שָׁשַׁי [perh. *whitish*]: Σεσαΐ; [Vat. FA. with preceding word, Ναβουσεσαΐ:] *Sisai*). One of the sons of Bani who had married a foreign wife and put her away in the time of Ezra (Ezr. x. 40).

**SHA'SHAK** (שָׁשָׁק: Σασάκ; [Vat. Σασηλ, Σασηκ:] *Sesac*). A Benjamite, one of the sons of Beriah (1 Chr. viii. 14, 25).

**SHA'UL** (שָׁאוּל [*longing*, Sim. Ges.]: Σαούλ; Alex. Σαμουηλ in Gen.: *Saül*). 1. The son of Simeon by a Canaanitish woman (Gen. xlvi. 10; Ex. vi. 15; Num. xxvi. 13; 1 Chr. iv. 24), and founder of the family of the SHAULITES. The Jewish traditions identify him with Zimri, "who did the work of the Canaanites in Shittim" (Targ. Pseudojon. on Gen. xlvi.).

2. Shaul of Rehoboth by the river was one of the kings of Edom, and successor of Samlah (1 Chr. i. 48, 49). In the A. V. of Gen. xxxvi. 37, he is less accurately called SAUL.

3. A Kohathite, son of Uzziah (1 Chr. vi. 24).

* **SHA'ULITES, THE** (הַשָּׁאוּלִי, patronym.: ὁ Σαουλί; Vat. Alex. -λει: *Saulites*), descendants of SHAUL, 1 (Num. xxvi. 13). A.

**SHA'VEH, THE VALLEY OF** (עֵמֶק שָׁוֵה [see note *c* below]; the Samar. Cod. adds the article, עֵ֫מֶק הַשָּׁוֵה, Sam. Vers. מפנח: [a] τὴν κοιλάδα τὴν Σαυῆ [b]; Alex. τ. κ. τ. Σαυην: *vallis Save quæ est vallis regis*). A name found only in Gen. xiv. It is one of those archaic names with which this venerable chapter abounds — such as Bela, En-Mishpat, Ham, Hazezon-tamar — so archaic, that many of them have been elucidated by the insertion of their more modern [c] equivalents in the body of the document, by a later but still very ancient hand. In the present case the explanation does not throw any light upon the locality of Shaveh: "The valley of Shaveh, that is the Valley of the King" (ver. 17). True, the "Valley of the King" is mentioned again in 2 Sam. xxiii. 18, as the site of a pillar set up by Absalom; but this passage again conveys no indication of its position, and it is by no means certain that the two passages refer to the same spot. The extreme obscurity in which the whole account of Abram's route from Damascus is involved, has been already noticed under SALEM. A notion has been long [d] prevalent that the pillar of Absalom is the well-known pyramidal structure which forms the northern member of the group of monuments at the western foot of Olivet. This is perhaps originally founded on the statement of Josephus (*Ant.* vii. 10, § 3) that Absalom erected (ἔστησε) a column (στήλη) of marble (λίθου μαρμαρίνου) at a distance of two stadia from Jerusalem. But neither the spot nor the structure of the so-called "Absalom's tomb" agree either with this description, or with the terms of 2 Sam. xviii. 18. The "Valley of the King" was an *Emek*, that is, a broad, open valley, having few or no features in common with the deep, rugged ravine of the Kedron. [VALLEY.] The pillar of Absalom — which went by the name of "Absalom's hand" — was set up, erected (יַצֵּב), according to Josephus in marble — while the lower existing part of the monument (which alone has any pretension to great antiquity) is a monolith not erected, but excavated out of the ordinary limestone of the hill, and almost exactly similar to the so-called "tomb of Zechariah," the second from it on the south. And even this cannot claim any very great age since its Ionic capitals and the ornaments of the frieze speak with unfaltering voice of Roman art.

Shaveh occurs also in conjunction with another ancient word in the name

**SHA'VEH KIRIATHA'IM** (שָׁוֵה קִרְיָתַיִם [*plain of the double city*]: ἐν Σαυῆ τῇ πόλει: *Save Cariathaim*), mentioned in the same early document (Gen. xiv. 5) as the residence of the Emim at the time of Chedorlaomer's incursion. Kiriathaim is named in the later history, and, though it has not been identified, is known to have been a town on the east of the Jordan; and Shaveh Kiriathaim, which was also in the same region, was (if Shaveh mean "valley") probably the valley in or by which the town lay. G.

**SHAV'SHA** (שַׁוְשָׁא [*warrior of Jehovah*]: Σουσά; [Vat. Ιησους:] FA. Σους: *Susa*). The royal secretary in the reign of David (1 Chr. xviii. 16). He is apparently the same with SERAIAH (2 Sam. viii. 17), who is called Σεισά by Josephus (*Ant.* vii. 5, § 4), and Σασά in the Vat. MS. of the LXX. [Σασά in the Roman ed., but Ασα in the Vat. MS. (Mai). — A.] SHISHA is the reading of two MSS. and of the Targum in 1 Chr. xviii. 16. In 2 Sam. xx. 25 he is called SHEVA, and in 1 K. iv. 3, SHISHA.

**SHAWM.** In the Prayer-book version of Ps. xcviii. 6, "with trumpets also and *shawms*" is the rendering of what stands in the A. V. "with trumpets and sound of *cornet*." The Hebrew word translated "cornet" will be found treated under that head. The "shawm" was a musical instrument resembling the clarionet. The word occurs in the forms *shalm*, *shalmie*, and is connected with the Germ. *scalameie*, a reed-pipe.

"With *shawmes* and trompets and with clarions sweet"
SPENSER, *F. Q.* i. 12, § 12.

"Even from the shrillest *shawm* unto the cornamute"
DRAYTON, *Polyolb.* iv. 366.

[a] The Targum of Onkelos gives the same equivalent, but with a curious addition, "the plain of Mesha, which is the king's place of racing;" recalling the ἱππόδρομος so strangely inserted by the LXX. in Gen. xlviii. 7.

[b] This is one of the numerous instances in which the Vatican Cod. (Mai) agrees with the Alex., and disagrees with the ordinary text, which in this case has τῷ Σαβέ. [This part of Genesis is *wanting* in the Vatican MS. (see art. SEPTUAGINT, p. 2912 [b]), and is printed in Mai's ed. from a comparatively modern MS. No. 55, Holmes). — A.]

[c] If the signification of *Shaveh* be "valley," as Gesenius and Fürst assert, then its extreme antiquity is involved in the very expression "the Emek-Shaveh," which shows that the word had ceased to be intelligible to the writer, who added to it a modern word of the same meaning with itself. It is equivalent to such names as "Puente d'Alcantara," "the Grecian Steps," etc., where the one part of the name is a mere repetition or translation of the other, and which cannot exist till the meaning of the older term is obsolete.

[d] Both Gesenius and Fürst define שָׁוֵה as "plain" (*planities* Ebene) H.

[d] Perhaps first mentioned by Benjamin of Tudela (A. D. 1160), and next by Maundeville (1322).

Digitized by Google

Mr. Chappell says (*Pop. Mus.* i. 35, note *b*), "The modern clarionet is an improvement upon the shawm, which was played with a reed like the wayte, or hautboy, but being a bass instrument, with about the compass of an octave, had probably more the tone of a bassoon." In the same note he quotes one of the "proverbis" written about the time of Henry VII. on the walls of the Manor House at Leckingfield, near Beverley, Yorkshire: —

"A shawme maketh a swete sounde, for he tunythe the basse;
It mountithe not to hye, but kepith rule and space.
Yet yf it be blowne with to vehement a wynde,
It makithe it to mysgoverne out of his kinde."

From a passage quoted by Nares (*Glossary*) it appears that the shawm had a mournful sound: —

"He —
That never wants a Gilead full of balm
For his elect, shall turn thy woful *shalm*
Into the merry pipe."

G. Tooke, *Beliefs*, p. 18.

W. A. W.

* **SHEAF.** [Passover, vol. iii. p. 2346.]

**SHE'AL** (שְׁאָל [*asking*]: Σαλουλ; Alex. Σαλ: *Saul*). One of the sons of Bani who had married a foreign wife (Ezr. x. 29). In 1 Esdr. ix. 30 he is called Jasael.

**SHEAL'TIEL** (שְׁאַלְתִּיאֵל, but three times in Haggai זְרֻבָּבֶל [*whom I asked of God*]: Σαλαθιήλ: *Salathiel*). Father of Zerubbabel, the leader of the Return from Captivity (Ezr. iii. 2, 8, v. 2; Neh. xii. 1; Hag. i. 1, 12, 14, ii. 2, 23). The name occurs also in the original of 1 Chr. iii. 17, though there rendered in the A. V. Salathiel. That is its equivalent in the books of the Apocrypha and the N. T.; and under that head the curious questions connected with his person are examined.

**SHEARI'AH** (שְׁעַרְיָה [*whom Jehovah estimates*]: Σαρεα; [Vat. Sin.] Alex. Σαρια in 1 Chr. ix. 44: *Saria*). One of the six sons of Azel, a descendant of Saul (1 Chr. viii. 38, ix. 44).

**SHEARING-HOUSE, THE** (בֵּית עֵקֶד הָרֹעִים: [a] Βαθαχαδ τῶν ποιμένων; Alex. Βαθαχαδ τ. π.: *camera pastorum*). A place on the road between Jezreel and Samaria, at which Jehu, on his way to the latter, encountered forty-two members of the royal family of Judah, whom he slaughtered at the well or pit attached to the place (2 K. x. 12, 14). The translators of our version have given in the margin the literal meaning of the name — "house of binding of the shepherds," and in the text an interpretation perhaps adopted from Jos. Kimchi. Binding, however, is but a subordinate part of the operation of shearing, and the word *eked* is not anywhere used in the Bible in connection therewith. The interpretation of the Targum and Arabic version, adopted by Rashi, namely, "house of the meeting of shepherds," is accepted by Simonis (*Onom.* p. 186) and Gesenius (*Thes.* p. 195 *b*). Other renderings are given by Aquila and Symmachus. None of them, however, seem satisfactory, and it is probable that the original meaning has escaped. By the LXX., Eusebius, and Jerome, it is treated as a proper name as they also treat the "garden-house" of ix. 27. Eusebius (*Onom.*) mentions it as a village of Samaria "in the great plain [of Esdraelon] 15 miles from Legeon." It is remarkable, that at a distance of precisely 15 Roman miles from *Lejjûn* the name of *Beth-had* appears in Van de Velde's map (see also Rob. *Bibl. Res.* ii. 316); but this place, though coincident in point of distance, is not on the plain, nor can it either belong to Samaria, or be on the road from Jezreel thither, being behind (south of) Mount Gilboa. The slaughter at the well recalls the massacre of the pilgrims by Ishmael ben-Nethaniah at Mizpah, and the recent tragedy at Cawnpore.

G.

[a] The last word of the three is omitted in ver. 14 in the original, and in both the Versions.

**SHE'AR-JA'SHUB** (שְׁאָר יָשׁוּב [*a remnant shall return*]: ὁ καταλειφθεὶς Ἰασούβ: *qui derelictus est Jasub*). The son of Isaiah the prophet, who accompanied him when he went to meet Ahaz in the causeway of the fuller's field (Is. vii. 3). The name, like that of the prophet's other son, Maher-shalal-hash-baz, had a mystical significance, and appears to have been given with mixed feelings of sorrow and hope — sorrow for the captivity of the people, and hope that in the end a remnant should return to the land of their fathers (comp. Is. x. 20-22).

**SHE'BA** (שֶׁבַע [*seven, an oath*]: Σαβεέ, [Alex. 2 Sam. xx. 1, 7, Αβεε;] Joseph. Σαβαῖος. *Seba*). The son of Bichri, a Benjamite from the mountains of Ephraim (2 Sam. xx. 1-22), the last chief of the Absalom insurrection. He is described as a "man of Belial," which seems [comp. Shimei] to have been the usual term of invective cast to and fro between the two parties. But he must have been a person of some consequence, from the immense effect produced by his appearance. It was in fact all but an anticipation of the revolt of Jeroboam. It was not, as in the case of Absalom, a mere conflict between two factions in the court of Judah, but a struggle, arising out of that conflict, on the part of the tribe of Benjamin to recover its lost ascendancy; a struggle of which some indications had been already manifested in the excessive bitterness of the Benjamite Shimei. The occasion seized by Sheba was the emulation, as if from loyalty, between the northern and southern tribes on David's return. Through the ancient custom, he summoned all the tribes "to their tents;" and then, and afterwards, Judah alone remained faithful to the house of David (2 Sam. xx. 1, 2). The king might well say, "Sheba the son of Bichri shall do us more harm than did Absalom" (*ibid.* 6). What he feared was Sheba's occupation of the fortified cities. This fear was justified by the result. Sheba traversed the whole of Palestine, apparently rousing the population, Joab following him in full pursuit, and so deeply impressed with the gravity of the occasion, that the murder even of the great Amasa was but a passing incident in the campaign. He stayed but for the moment of the deed, and "pursued after Sheba the son of Bichri." The mass of the army halted for an instant by the bloody corpse, and then they also "went on after Joab to pursue after Sheba the son of Bichri." It seems to have been his intention to establish himself in the fortress of Abel-Beth-maacah, in the northmost extremity of Palestine, possibly allied to the cause of Absalom through his mother Maacah and famous for the prudence of its inhabitants (2

Digitized by Google

Sam. xx. 18). That prudence was put to the test on the present occasion. Joab's terms were — the head of the insurgent chief. A woman of the place undertook the mission to her city, and proposed the execution to her fellow-citizens. The head of Sheba was thrown over the wall, and the insurrection ended.

2. (Σεβεέ; Alex. Σοβαβε: *Sebe.*) A Gadite, one of the chiefs of his tribe who dwelt in Bashan (1 Chr. v. 13). A. P. S.

SHEBA (שְׁבָא [see below]). The name of three fathers of tribes in the early genealogies of Genesis, often referred to in the sacred books. They are: —

1. (Σαβά; [Vat. in 1 Chr. Σαβαρ:] *Saba.*) A son of Raamah, son of Cush (Gen. x. 7; 1 Chr. i. 9).

2. (Alex. Σαβεν, Σαβαν.) A son of Joktan (Gen. x. 28; 1 Chr. i. 22); the tenth in order of his sons.

3. (Σαβά, Σαβαΐ; Alex. Σαβαν, Σαβα.) A son of Jokshan, son of Keturah (Gen. xxv. 3; 1 Chr. i. 32).

We shall consider, first, the history of the Joktanite Sheba; and, secondly, the Cushite Sheba and the Keturahite Sheba together.

I. It has been shown, in ARABIA and other articles, that the Joktanites were among the early colonists of southern Arabia, and that the kingdom which they there founded was, for many centuries, called the kingdom of Sheba, after one of the sons of Joktan. They appear to have been preceded by an aboriginal race, which the Arabian historians describe as a people of gigantic stature, who cultivated the land and peopled the deserts alike, living with the Jinn in the "deserted quarter," or, like the tribe of Thamood, dwelling in caves. This people correspond, in their traditions, to the aboriginal races of whom remains are found wherever a civilized nation has supplanted and dispossessed the ruder race. But besides these extinct tribes, there are the evidences of Cushite settlers, who appear to have passed along the south coast from west to east, and who probably preceded the Joktanites, and mixed with them when they arrived in the country.

Sheba seems to have been the name of the great south Arabian kingdom and the peoples which composed it, until that of Himyer took its place in later times. On this point much obscurity remains; but the Sabæans are mentioned by Diod. Sic., who refers to the historical books of the kings of Egypt in the Alexandrian Library, and by Eratosthenes, as well as Artemidorus, or Agatharchides (iii. 38, 46), who is Strabo's chief authority; and the Homerites or Himyerites are first mentioned by Strabo, in the expedition of Ælius Gallus (B. C. 24). Nowhere earlier, in sacred or profane records, are the latter people mentioned, except by the Arabian historians themselves, who place Himyer very high in their list, and ascribe importance to his family from that early date. We have endeavored, in other articles, to show reasons for supposing that in this very name of Himyer we have the Red Man, and the origin of Erythrus, Erythræan Sea, Phœnicians, etc. [See ARABIA; RED SEA.] The apparent difficulties of the case are reconciled by supposing, as M. Caussin de Perceval (*Essai*, i. 54, 55) has done, that the kingdom and its people received the name of Sheba (*Arabic*, Sebà), but that its chief and sometimes reigning family or tribe was that *of* Himyer; and that an old name was thus preserved until the foundation of the modern kingdom of Himyer or the Tubbaas, which M. Caussin is inclined to place (but there is much uncertainty about this date) about a century before our era, when the two great rival families of Himyer and Kahlan, together with smaller tribes, were united under the former. In support of the view that the name of Sheba applied to the kingdom and its people as a generic or national name, we find in the *Kámoos* "the name of Sebà comprises the tribes of the Yemen in common" (*s. v.* Sebà); and this was written long after the later kingdom of Himyer had flourished and fallen. And further, as Himyer meant the "Red Man," so probably did Sebà. In Arabic, the verb *sebà*, سبا, said of the sun, or of a journey, or of a fever, means "it altered" a man, *i. e.* by turning him red; the noun *sebà*, as well as *sibá* and *sebee-ah*, signifies "wine" (*Táj el-'Aroos* MS.). The Arabian wine was red; for we read "kumeyt is a name of wine, because there is in it blackness and redness" (*Sihàh* MS.). It appears, then, that in Sebà we very possibly have the oldest name of the Red Man, whence came φοῖνιξ, Himyer, and Erythrus.

We have assumed the identity of the Arabic Sebà, سبا, with Sheba (שְׁבָא). The pl. form שְׁבָאִים corresponds with the Greek Σαβαῖοι and the Latin Sabæi. Gesenius compares the Heb. with Eth. ሰብእ "man." The Hebrew *shin* is, in by far the greater number of instances, *sin* in Arabic (see Gesenius); and the historical, ethnological, and geographical circumstances of the case, all require the identification.

In the Bible, the Joktanite Sheba, mentioned genealogically in Gen. x. 28, recurs, as a kingdom in the account of the visit of the queen of Sheba to king Solomon, when she heard of his fame concerning the name of the Lord, and came to prove him with hard questions (1 K. x. 1); "and she came to Jerusalem with a very great train, with camels that bare spices, and very much gold, and precious stones" (ver. 2). And, again, "she gave the king an hundred and twenty talents of gold, and of spices very great store, and precious stones: there came no more such abundance of spices as these which the queen of Sheba gave to king Solomon" (ver. 10). She was attracted by the fame of Solomon's wisdom, which she had heard in her own land; but the dedication of the Temple had recently been solemnized, and, no doubt, the people of Arabia were desirous to see this famous house. That the queen was of Sheba in Arabia, and not of Seba the Cushite kingdom of Ethiopia, is unquestionable; Josephus and some of the Rabbinical writers[a] perversely, as usual, refer her to the latter; and the Ethiopian (or Abyssinian) Church has a convenient tradition to the same effect (comp. Joseph. *Ant.* viii. 6, § 5; Ludolf, *Hist. Æthiop.* ii. 3; Harris's *Abyssinia*, ii. 105). The Arabs call her Bilkees (or Yelkamah or Balkamah; Ibn Khaldoon), a queen of the later Himyerites, who, if M. Caussin's

[a] Aben-Ezra (on Dan. xi. 6), however, remarks that the queen of Sheba came from the Yemen, for she spoke an Ishmaelite (or rather a Shemitic) language.

Digitized by Google

chronological adjustments of the early history of the Yemen be correct, reigned in the first century of our era (*Essai*, i. 75, &c.); and an edifice at Ma-rib (Mariaba) still bears her name, while M. Fresnel read the name of "Almacah" or "Balmacah" in many of the Himyeritic inscriptions. The Arab story of this queen is, in the present state of our knowledge, altogether unhistorical and unworthy of credit; but the attempt to make her Solomon's queen of Sheba probably arose (as M. Caussin conjectures) from the latter being mentioned in the Kur-án without any name, and the commentators adopting Bilkees as the most ancient queen of Sheba in the lists of the Yemen. The Kur-án, as usual, contains a very poor version of the Biblical narrative, diluted with nonsense and encumbered with fables (cl.. xxvii. ver. 24, &c.).

The other passages in the Bible which seem to refer to the Joktanite Sheba occur in Is. lx. 6, where we read, "all they from Sheba shall come: they shall bring gold and incense," in conjunction with Midian, Ephah, Kedar, and Nebaioth. Here reference is made to the commerce that took the road from Sheba along the western borders of Arabia (unless, as is possible, the Cushite or Keturahite Sheba be meant); and again in Jer. vi. 20, it is written, "To what purpose cometh there to me incense from Sheba, and the sweet cane from a far country?" (but compare Ex. xxvii. 22, 23, and see below). On the other hand, in Ps. lxxii. 10, the Joktanite Sheba is undoubtedly meant; for the kingdoms of Sheba and Seba are named together, and in ver. 15 the gold of Sheba is mentioned.

The kingdom of Sheba embraced the greater part of the Yemen, or Arabia Felix. Its chief cities, and probably successive capitals, were Sebà, San'à (Uzal), and Zafár (Sephar). Sebà was probably the name of the city, and generally of the country and nation; but the statements of the Arabian writers are conflicting on this point, and they are not made clearer by the accounts of the classical geographers. Ma-rib was another name of the city, or of the fortress or royal palace in it: "Sebà is a city known by the name of Ma-rib, three nights' journey from San'à" (Ez-Zejjáj, in the *Táj-el-'Aroos* MS.). Again, "Sebà was the city of Ma-rib (*Mushtarak*, s. v.), or the country in the Yemen, of which the city was Ma-rib" (*Marásid*, in voc ). Near Sebà was the famous Dyke of El-'Arim, said by tradition to have been built by Lukmán the 'Adite, to store water for the inhabitants of the place, and to avert the descent of the mountain torrents. The catastrophe of the rupture of this dyke is an important point in Arab history, and marks the dispersion in the 2d century of the Joktanite tribes. This, like all we know of Sebà, points irresistibly to the great importance of the city as the ancient centre of Joktanite power. Although Uzal (which is said to be the existing San'à) has been supposed to be of earlier foundation, and Zafár (Sephar) was a royal residence, we cannot doubt that Sebà was the most important of these chief towns of the Yemen. Its value in the eyes of the old dynasties is shown by their struggles to obtain and hold it; and it is narrated that it passed several times into the hands alternately of the so-called Himyerites and the people of Hadramäwt (Hazar-maveth). Eratosthenes, Artemidorus, Strabo, and Pliny, speak of *Mariaba;* Diodorus, Agatharchides, Steph. Byzant., of *Saba.* Σαβαί (Steph. Byzant.). Σαβᾶς (Agath.). Ptol. (vi. 7, §§ 30, 42), and Plin. (vi. 23, § 34) mention Μάριβη. But the former all say that Mariaba was the metropolis of the Sabæi; and we may conclude that both names applied to the same place, one the city, the other its palace or fortress (though probably these writers were not aware of this fact): unless indeed the form Sabota (with the variants Sabatha, Sobatale, etc.) of Pliny (*H. N.* vi. 28, § 32), have reference to Shibám, capital of Hadramäwt, and the name also of another celebrated city, of which the Arabian writers (*Marásid*, s. v.) give curious accounts. The classics are generally agreed in ascribing to the Sabæi the chief riches, the best territory, and the greatest numbers of the four principal peoples of the Arabs which they name: the Sabæi, Atramitæ (= Hadramäwt), Katabeni (= Kahtan = Joktan), and Minæi (for which see Diklah). See Bochart (*Phaleg*, xxvi.), and Müller's *Geog. Min.* p. 186 ff.

The history of the Sabæans has been examined by M. Caussin de Perceval (*Essai sur l'Hist. des Arabes*), but much remains to be adjusted before its details can be received as trustworthy, the earliest safe chronological point being about the commencement of our era. An examination of the existing remains of Sabæan and Himyerite cities and buildings will, it cannot be doubted, add more facts to our present knowledge; and a further acquaintance with the language, from inscriptions, aided, as M. Fresnel believes, by an existing dialect, will probably give us some safe grounds for placing the building, or era, of the dyke. In the art. Arabia (vol. i. p. 142 *b*), it is stated that there are dates on the ruins of the dyke, and the conclusions which De Sacy and Caussin have drawn from those dates and other indications respecting the date of the rupture of the dyke, which forms then an important point in Arabian history; but it must be placed in the 2d century of our era, and the older era of the building is altogether unfixed, or indeed any date before the expedition of Ælius Gallus. The ancient buildings are of massive masonry, and evidently of Cushite workmanship, or origin. Later temples, and palace-temples, of which the Arabs give us descriptions, were probably of less massive character; but Sabæan art is an almost unknown and interesting subject of inquiry. The religion celebrated in those temples was cosmic; but this subject is too obscure and too little known to admit of discussion in this place. It may be necessary to observe that whatever connection there was in *religion* between the Sabæans and the Sabians, there was none in name or in race. Respecting the latter, the reader may consult Chwolson's *Sabier*, a work that may be recommended with more confidence than the same author's *Nabathæan Agriculture*. [See Nebaioth.] Some curious papers have also appeared in the Journal of the German Oriental Society of Leipsic, by Dr. Osiander. [Arabia, i. 142, note c, Amer. ed.]

II. Sheba, son of Ramah son of Cush, settled somewhere on the shores of the Persian Gulf. In the *Marásid* (s. v.) the writer has found an identification which appears to be satisfactory — that on the island of Awál (one of the "Bahreyn Islands") are the ruins of an ancient city called Sebà. Viewed in connection with Raamah, and the other facts which we know respecting Sheba, traces of his settlements ought to be found on or near the shores of the gulf. It was this Sheba that carried on the great Indian traffic with Palestine, in con-

Digitized by Google

junction with, as we hold, the other Sheba, son of Jokshan son of Keturah, who, like DEDAN, appears to have formed with the Cushite of the same name, one tribe: the Cushites dwelling on the shores of the Persian Gulf, and carrying on the desert trade thence to Palestine in conjunction with the nomade Keturahite tribes, whose pasturages were mostly on the western frontier. The trade is mentioned by Ez. xxvii. 22, 23, in an unmistakable manner; and possibly by Is. lx. 6, and Jer. vi. 20, but these latter, we think, rather refer to the Joktanite Sheba. The predatory bands of the Keturahites are mentioned in Job i. 15, and vi. 19, in a manner that recalls the forays of modern Bedawees. [Comp. ARABIA, DEDAN, TEMAN, etc.] E. S. P.

**SHE'BA** (שֶׁבַע [*seven, an oath*]: Σαμαα; Alex. Σαβεε: *Sabee*). One of the towns of the allotment of Simeon (Josh. xix. 2). It occurs between Beer-sheba and Moladah. In the list of the cities of the south of Judah, out of which those of Simeon were selected, no Sheba appears apart from Beer-sheba; but there is a Shema (xv. 26) which stands next to Moladah, and which is probably the Sheba in question. This suggestion is supported by the reading of the Vatican LXX. The change from *b* to *m* is an easy one both in speaking and in writing, and in their other letters the words are identical. Some have supposed that the name Sheba is a mere repetition of the latter portion of the preceding name, Beer-sheba, — by the common error called *homoioteleuton*, — and this is supported by the facts that the number of names given in xix. 2–6 is, including Sheba, fourteen, though the number stated is thirteen, and that in the list of Simeon of 1 Chr. (iv. 28) Sheba is entirely omitted. Gesenius suggests that the words in xix. 2 may be rendered "Beer-sheba, the town, with Sheba, the well;" but this seems forced, and is besides inconsistent with the fact that the list is a list of "cities" (*Thes.* p. 1355 *a*, where other suggestions are cited). G.

**SHE'BAH** (שִׁבְעָה, *i. e.* Shib'ăh [fem. *seven* or *an oath*]: ὅρκος: *Abundantiae*). The famous well which gave its name to the city of Beer-sheba (Gen. xxvi. 33). According to this version of the occurrence, Shebah, or more accurately, Shibeah, was the fourth of the series of wells dug by Isaac's people, and received its name from him, apparently in allusion to the oaths (31, יִשְׁבְּעוּ, *yishbĕ'ū*) which had passed between himself and the Philistine chieftains the day before. It should not be overlooked that according to the narrative of an earlier chapter the well owed its existence and its name to Isaac's father (xxi. 32). Indeed, its previous existence may be said to be implied in the narrative now directly under consideration (xxvi. 28). The two transactions are curiously identical in many of their circumstances — the rank and names of the Philistine chieftains, the strife between the subordinates on either side, the covenant, the adjurations, the city that took its name from the well. They differ alone in the fact that the chief figure in the one case is Abraham, in the other Isaac. Some commentators, as Kalisch (*Gen.* p. 500), looking to the fact that there are two large wells at *Bir es-Seba*, propose to consider the two transactions as distinct, and as belonging the one to the one well, the other to the other. Others see in the two narratives merely two versions of the circumstances under which this renowned well was first dug. And certainly in the analogy of the early history of other nations, and in the very close correspondence between the details of the two accounts, there is much to support this.[a] The various plays on the meaning of the name שֶׁבַע, interpreting it as "seven" — as an "oath" — as "abundance"[a] — as "a lion"[b] — are all so many direct testimonies to the remote date and archaic form of this most venerable of names, and to the fact that the narratives of the early history of the Hebrews are under the control of the same laws which regulate the early history of other nations. G.

**SHE'BAM** (שֶׁבָם, *i. e. Sebăm*: Σεβαμά: *Saban*). One of the towns in the pastoral district on the east of Jordan — the "land of Jazer and the land of Gilead" — demanded and finally ceded to the tribes of Reuben and Gad (Num. xxxii. 3, only). It is named between Elealeh and Nebo, and is probably the same which in a subsequent verse of the chapter, and on later occasions, appears in the altered forms of SHIBMAH and SIBMAH. The change from Sebam to Sibmah is perhaps due to the difference between the Amorite and Moabite and Hebrew languages. G.

**SHEBANI'AH** (שְׁבַנְיָה [*whom Jehovah built up*]: in Neh. ix., Σεχενία, [Vat. Χαραβια, FA. Χαραδια,] Alex. Σαχανια; in Neh. x., Σαβανία, [Alex. FA. Σεβανια:] *Sabania, Sebnia* in Neh. ix., *Sebenia* in Neh. x.).

1. A Levite in the time of Ezra, one of those who stood upon the steps of the Levites and sang the psalm of thanksgiving and confession which is one of the last efforts of Hebrew psalmody (Neh. ix. 4, 5). He sealed the covenant with Nehemiah (Neh. x. 10). In the LXX. of Neh. ix. 4 he is made the son of Shereb'iah.

2. (Σεβανί [Vat. -νει, FA. with preced. word Γουσαβανει] in Neh. x., Σεχενία [Rom., but Vat Alex. FA.[1] omit] in Neh. xii. 14: *Sebenia.*) A priest, or priestly family, who sealed the covenant with Nehemiah (Neh. x. 4, xii. 14). Called SHECHANIAH in Neh. xii. 3.

3. (Σεβανία: *Sabania.*) Another Levite who sealed the covenant with Nehemiah (Neh. x. 12).

4. (שְׁבַנְיָהוּ: Σομνία; Alex. Σεβενια; [FA Σοβνεια:] *Sebenias.*) One of the priests appointed by David to blow with the trumpets before the ark of God (1 Chr. xv. 24). W. A. W.

**SHEB'ARIM** (הַשִּׁבְרִים, with the def. article [*breaches, ruins*]: συντρῖψαν: *Sabarim*). A place named in Josh. vii. 5 only, as one of the points in the flight from Ai. The root of the word has the force of "dividing" or "breaking," and it is therefore suggested that the name was attached to a spot where there were fissures or rents in the soil, gradually deepening till they ended in a sheer descent or precipice to the ravine by which the Israelites had come from Gilgal — "the going down" (הַמּוֹרָד; see verse 5 and the margin of the A. V.). The ground around the site of Ai, on any hypothesis of its locality, was very much of this character. No trace of the name has, however, been yet remarked.

Keil (*Josua*, ad loc.) interprets Sheb'arim by

---

[a] This is Jerome's (*Quaest. in Genesim* and *Vulgate*) as if the word was שִׁבְעָה, as in Ex. xvi. 49.

[b] The modern Arabic *Bir es-Seba'*.

Digitized by Google

"stone quarries;" but this does not appear to be supported by other commentators or by lexicographers. The ancient interpreters usually discard it as a proper name, and render it "till they were broken up," etc. G.

**SHE'BER** (שֶׁבֶר [*breaking, ruin*]: Σαβέρ; Alex. Σεβερ: *Saber*). Son of Caleb ben-Hezron by his concubine Maachah (1 Chr. ii. 48).

**SHEBNA** (שְׁבְנָא [*youth*, Ges.]: Σομνάς, [exc. 2 K., Rom. Σωμνάς; Is. xxxvi. 3, Vat. Σοβνας:] *Sobnas*). A person of high position in Hezekiah's court, holding at one time the office of prefect of the palace (Is. xxii. 15), but subsequently the subordinate office of secretary (Is. xxxvi. 3; 2 K. xviii. 37, xix. 2). This change appears to have been effected by Isaiah's interposition; for Shebna had incurred the prophet's extreme displeasure, partly on account of his pride (Is. xxii. 16), his luxury (ver. 18), and his tyranny (as implied in the title of "father" bestowed on his successor, ver. 21), and partly (as appears from his successor being termed a "servant of Jehovah" ver. 20), on account of his belonging to the political party which was opposed to the theocracy, and in favor of the Egyptian alliance. From the omission of the usual notice of his father's name, it has been conjectured that he was a *novus homo*. W. L. B.

**SHEBU'EL** (שְׁבוּאֵל [*captive of God*]). 1. (Σουβαήλ; [1 Chr. xxvi. 24, Vat. Ιωηλ:] *Subuel, Subaël.*) A descendant of Gershom (1 Chr. xxiii. 16, xxvi. 24), who was ruler of the treasures of the house of God; called also SHUBAEL (1 Chr. xxiv. 20). The Targum of 1 Chr. xxvi. 24 has a strange piece of confusion: "And Shebuel, that is, Jonathan the son of Gershom the son of Moses, returned to the fear of Jehovah, and when David saw that he was skillful in money matters he appointed him chief over the treasures." He is the last descendant of Moses of whom there is any trace.

2. [Σουβαήλ: *Subuel.*] One of the fourteen sons of Heman the minstrel (1 Chr. xxv. 4); called also SHUBAEL (1 Chr. xxv. 20), which was the reading of the LXX. and Vulgate. He was chief of the thirteenth band of twelve in the Temple choir.

**SHECANI'AH** (שְׁכַנְיָהוּ [*familiar with Jehovah*]: Σεχενίας; [Vat. Ισχανια:] *Sechenia*). 1. The tenth in order of the priests who were appointed by lot in the reign of David (1 Chr. xxiv. 11).

2. (Σεχονίας: *Sechenias.*) A priest in the reign of Hezekiah, one of those appointed in the cities of the priests to distribute to their brethren their daily portion for their service (2 Chr. xxxi. 15).

**SHECHANI'AH** (שְׁכַנְיָה [*see above*]: Σεχενίας [Vat. -νια]: *Sechenias*). 1. A descendant of Zerubbabel of the line royal of Judah (1 Chr. iii. 21, 22).

2. (Ζαχαρίας [or -ρία; Vat. Ζαναχιας or -χια.]) Some descendants of Shechaniah appear to have returned with Ezra (Esr. viii. 3). He is called SECHENIAS in 1 Esdr. viii. 29.

3. (Σεχενίας: [Vat. omits.]) The sons of Shemaiah were another family who returned with Ezra, three hundred strong, with the son of Jahaziel at their head (Esr. viii. 5). In this verse some name appears to have been omitted. The LXX. has "of the sons of Zathoe, Sechenias the son of Aziel," and in this it is followed by 1 Esdr. viii. 32 "of the sons of Zathoe, Sechenias the son of Jezelus." Perhaps the reading should be: "of the sons of Zattu, Shechaniah, the son of Jahaziel."

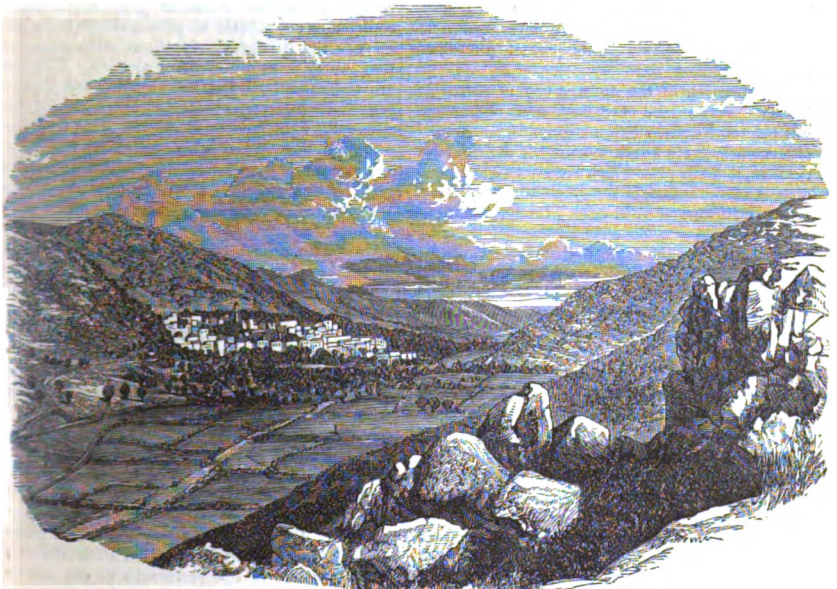
4. The son of Jehiel of the sons of Elam, who proposed to Ezra to put an end to the foreign marriages which had been contracted after the return from Babylon (Ezr. x. 2).

5. The father of Shemaiah the keeper of the east gate of Jerusalem (Neh. iii. 29).

6. The son of Arah, and father-in-law to Tobiah the Ammonite (Neh. vi. 18).

7. (Σεχενία: *Sebenias.*) The head of a priestly family who returned with Zerubbabel (Neh. xii. 3). He is also called SHEBANIAH, and SHECANIAH, and was tenth in order of the priests in the reign of David.

**SHE'CHEM** (שְׁכֶם, *shoulder, ridge*, like *dorsum* in Latin: Συχέμ in most passages, but also ἡ Συκιμα in 1 K. xii. 25, and τὰ Συκιμα, as in Josh. xxiv. 32, the form used by Josephus and Eusebius, with still other variations [as Σήκιμα, and in Josh. xxiv. 1, 25, Σηλώ]: *Sichem*, [*Sichima* (both sing. and pl.)]). There may be some doubt respecting the origin of the name. It has been made a question whether the place was so called from Shechem the son of Hamor, head of their tribe in the time of Jacob (Gen. xxxiii. 18 ff.), or whether he received his name from the city. The import of the name favors certainly the latter supposition, since the position of the place on the "saddle" or "shoulder" of the heights which divide the waters there that flow to the Mediterranean on the west and the Jordan on the east,[a] would naturally originate such a name; and the name, having been thus introduced, would be likely to appear again and again in the family of the hereditary rulers of the city or region. The name, too, if first given to the city in the time of Hamor, would have been taken, according to historical analogy, from the father rather than the son. Some interpret Gen. xxxiii. 18, 19 as showing that Shechem in that passage may have been called also Shalem. But this opinion has no support except from that passage; and the meaning even there more naturally is, that Jacob came *in safety* to Shechem (שָׁלֵם, as an adjective, *safe*; comp. Gen. xviii. 21); or (as recognized in the Eng. Bible) that Shalem belonged to Shechem as a dependent tributary village. [SHALEM.] The name is also given in the Auth. Version in the form of SICHEM, and SYCHEM, to which, as well as SYCHAR, the reader is referred.



The etymology of the Hebrew word *Shecém* indicates, at the outset, that the place was situated on some mountain or hill-side; and that presumption agrees with Josh. xx. 7, which places it in Mount Ephraim (see, also, 1 K. xii. 25), and with Judg. ix. 7, which represents it as under the summit of Gerizim, which belonged to the Ephraim range. The other Biblical intimations in regard to its situation are only indirect. They are worth noticing, though no great stress is to be laid on them. Thus, for example, Shechem must have been not far from Shiloh, since Shiloh is said (Judg. xxi. 19) to be a little to the east of "the highway" which led from Beth-el to Shechem. Again, if Shalem

a From the foot of the mountains on either side of the town can be discerned on the one hand the range beyond Jordan Valley, and on the other the blue waters of the Mediterranean. The latter appears in the illustration to this article.

as Gen. xxxiii. 18 be a proper name, as our version assumes, and identical with the present *Salim* on the left of the plain of the *Mukhna*, then Shechem, which is said to be east of *Shalim*, must have been among the hills on the opposite side. Further, Shechem, as we learn from Joseph's history (Gen. xxxvii. 12, &c.), must have been near Dothan; and, assuming Dothan to be the place of that name a few miles northeast of *Nâbulus*, Shechem must have been among the same mountains, not far distant. So, too, as the Sychar in John iv. 5 was probably the ancient Shechem, that town must have been near Mount Gerizim, to which the Samaritan woman pointed or glanced as she stood by the well at its foot.

But the historical and traditional data which exist outside of the Bible are abundant and decisive. Josephus (*Ant.* iv. 8, § 44) describes Shechem as between Gerizim and Ebal: τῆς Σικίμων πόλεως μεταξὺ δυοῖν ὀροῖν, Γαριζαίου μὲν τοῦ ἐκ δεξιῶν κειμένου, τοῦ δ' ἐξ ἀριστερῶν Γιβάλου προσαγορευομένου. The present *Nâbulus* is a corruption merely of Neapolis; and Neapolis succeeded the more ancient Shechem. All the early writers who touch on the topography of Palestine, testify to this identity of the two. Josephus usually retains the old name, but has Neapolis in *B. J.* iv. 8, § 1. Epiphanius says (*Adv. Hær.* iii. 1055): ἐν Σικίμοις, τοῦτ' ἔστιν, ἐν τῇ νυνὶ Νεαπολει. Jerome says in the *Epit. Paulæ*: "Transivit Sichem, quæ nunc Neapolis appellatur." The city received its new name (Νεάπολις = *Nâbulus*) from Vespasian, and on coins still extant (Eckhel, *Doctr. Numm.* iii. 433) is called Flavia Neapolis. It had been laid waste, in all probability, during the Jewish war; and the overthrow had been so complete that, contrary to what is generally true in such instances of the substitution of a foreign name for the native

The Valley and Town of *Nâblus*, the ancient Shechem, from the southwestern flank of Mount Ebal, looking westward. The mountain on the left is Gerizim. The Mediterranean is discernible in the distance. From a sketch by W. Tipping, Esq.

one, the original appellation of Shechem never regained its currency among the people of the country. Its situation accounts for another name which it bore among the natives, while it was known chiefly as Neapolis to foreigners. It is nearly midway between Judæa and Galilee; and, it being customary to make four stages of the journey between those provinces, the second day's halt occurs most conveniently at this place. Being thus a "thoroughfare" (= מַעֲבְרֵיתָא) on this important route, it was called[a] also Μαβορθά or Μαβορθά, as Josephus states (*B. J.* iv. 8, § 1). He says there that Vespasian marched from Ammaus, διὰ τῆς Σαμαρείτιδος καὶ παρὰ τὴν Νεάπολιν καλουμένην, Μαβορθὰ δὲ ὑπὸ τῶν ἐπιχωρίων. Pliny (*H. N.* v. 13) writes the same name "Mamortha." Others would restrict the term somewhat, and understand it rather of the "pass" or "gorge" through the mountains where the town was situated (Ritter's *Erdkunde*, *Pal.* p. 646).

The ancient town, in its most flourishing age, may have filled a wider circuit than its modern representative. It could easily have extended further up the side of Gerizim, and eastward nearer to the opening into the valley from the plain. But any great change in this respect, certainly the idea of an altogether different position, the natural conditions of the locality render doubtful. That the suburbs of the town, in the age of Christ, approached nearer than at present to the entrance into the valley between Gerizim and Ebal, may be inferred from the implied vicinity of Jacob's well to Sychar, in John's narrative (iv. 1 ff.). The impression made there on the reader is, that the people could be readily seen as they came forth

[a] This happy conjecture, in explanation of a name which baffled even the ingenious Reland, is due to Oishausen (Ritter, as above).

Digitized by Google

from the town to repair to Jesus at the well, whereas *Nâbulus* is more than a mile distant, and not visible from that point. The present inhabitants have a belief or tradition that Shechem occupied a portion of the valley on the east beyond the limits of the modern town; and certain travellers speak of ruins there, which they regard as evidence of the same fact. The statement of Eusebius that Sychar lay east of Neapolis, may be explained by the circumstance, that the part of Neapolis in that quarter had fallen into such a state of ruin when he lived, as to be mistaken for the site of a separate town (see Reland's *Palest.* p. 1004). The portion on the town on the edge of the plain was more exposed than that in the recess of the valley, and, in the natural course of things, would be destroyed first, or be left to desertion and decay. Josephus says that more than ten thousand Samaritans (inhabitants of Shechem are meant) were destroyed by the Romans on one occasion (*B. J.* iii. 7, § 32). The population, therefore, must have been much greater than *Nâbulus* with its present dimensions would contain.

The situation of the town is one of surpassing beauty. "The land of Syria," said Mohammed, "is beloved by Allah beyond all lands, and the part of Syria which He loveth most is the district of Jerusalem, and the place which He loveth most in the district of Jerusalem is the mountain of Nâblus" (*Fundgr. des Orients*, ii. 139). Its appearance has called forth the admiration of all travellers who have any sensibility to the charms of nature. It lies in a sheltered valley, protected by Gerizim on the south, and Ebal on the north. The feet of these mountains, where they rise from the town, are not more than five hundred yards apart. The bottom of the valley is about 1800 feet above the level of the sea, and the top of Gerizim 800 feet higher still. Those who have been at Heidelberg will assent to O. von Richter's remark, that the scenery, as viewed from the foot of the hills, is not unlike that of the beautiful German town. The site of the present city, which we believe to have been also that of the Hebrew city, occurs exactly on the water-summit; and streams issuing from the numerous springs there, flow down the opposite slopes of the valley, spreading verdure and fertility in every direction. Travellers vie with each other in the language which they employ to describe the scene that bursts here so suddenly upon them on arriving in spring or early summer at this paradise of the Holy Land. The somewhat sterile aspect of the adjacent mountains becomes itself a foil, as it were, to set off the effect of the verdant fields and orchards which fill up the valley. "There is nothing finer in all Palestine," says Dr. Clarke, "than a view of *Nâbulus* from the heights around it. As the traveller descends towards it from the hills, it appears luxuriantly embosomed in the most delightful and fragrant bowers, half concealed by rich gardens and by stately trees collected into groves, all around the bold and beautiful valley in which it stands." "The whole valley," says Dr. Robinson, "was filled with gardens of vegetables, and orchards of all kinds of fruits, watered by fountains, which burst forth in various parts and flow westwards in refreshing streams. It came upon us suddenly like a scene of fairy enchantment. We saw nothing to compare with it in all Palestine. Here, beneath the shadow of an immense mulberry-tree, by the side of a purling rill, we pitched our tent for the remainder of the day and the night. . . . We rose early, awakened by the songs of nightingales and other birds, of which the gardens around us were full." "There is no wilderness here," says Van de Velde (i. 386), "there are no wild thickets, yet there is always verdure, always shade, not of the oak, the terebinth, and the carob-tree, but of the olive-grove, so soft in color, so picturesque in form, that, for its sake, we can willingly dispense with all other wood. There is a singularity about the vale of Shechem, and that is the peculiar coloring which objects assume in it. You know that wherever there is water the air becomes charged with watery particles, and that distant objects beheld through that medium seem to be enveloped in a pale blue or gray mist, such as contributes not a little to give a charm to the landscape. But it is precisely those atmospheric tints that we miss so much in Palestine. Fiery tints are to be seen both in the morning and the evening, and glittering violet or purple colored hues where the light falls next to the long, deep shadows; but there is an absence of coloring, and of that charming dusky hue in which objects assume such softly blended forms, and in which also the transition in color from the foreground to the furthest distance loses the hardness of outline peculiar to the perfect transparency of an eastern sky. It is otherwise in the vale of Shechem, at least in the morning and the evening. Here the exhalations remain hovering among the branches and leaves of the olive-trees, and hence that lovely bluish haze. The valley is far from broad, not exceeding in some places a few hundred feet. This you find generally inclosed on all sides; here, likewise, the vapors are condensed. And so you advance under the shade of the foliage, along the living waters, and charmed by the melody of a host of singing birds — for they, too, know where to find their best quarters — while the perspective fades away and is lost in the damp, vapory atmosphere." Apart entirely from the historic interest of the place, such are the natural attractions of this favorite resort of the patriarchs of old, such the beauty of the scenery, and the indescribable air of tranquillity and repose which hangs over the scene, that the traveller, anxious as he may be to hasten forward in his journey, feels that he would gladly linger, and could pass here days and weeks without impatience.

The allusions to Shechem in the Bible are numerous, and show how important the place was in Jewish history. Abraham, on his first migration to the Land of Promise, pitched his tent and built an altar under the Oak [a] (or Terebinth) of Moreh at Shechem. "The Canaanite was then in the land;" and it is evident that the region, if not the city, was already in possession of the aboriginal race (see Gen. xii. 6). Some have inferred from the expression, "place of Shechem," (מְקוֹם שְׁכֶם), that it was not inhabited as a city in the

[a] The rendering "plains of Moreh" in the Auth. Vers is incorrect. The Samaritan Pentateuch translates אֵלוֹן in Gen. xxxv. 4 "bow" or "arch;" and on the basis of that error the Samaritans at *Nâbulus* show a structure of that sort under an acclivity of Gerizim, which they say was the spot where Jacob buried the Mesopotamian idols.

Digitized by Google

tune of Abraham. But we have the same expression used of cities or towns in other instances (Gen. xviii. 24, xix. 12, xxix. 22); and it may have been interchanged here, without any difference of meaning, with the phrase, "city of Shechem," which occurs in xxxiii. 18. A position affording such natural advantages would hardly fail to be occupied, as soon as any population existed in the country. The narrative shows incontestably that at the time of Jacob's arrival here, after his sojourn in Mesopotamia (Gen. xxxiii. 18, xxxiv.), Shechem was a Hivite city, of which Hamor, the father of Shechem, was the head-man. It was at this time that the patriarch purchased from that chieftain "the parcel of the field," which he subsequently bequeathed, as a special patrimony, to his son Joseph (Gen. xlii. 22; Josh. xxiv. 32; John iv. 5). The field lay undoubtedly on the rich plain of the *Mukhna*, and its value was the greater on account of the well which Jacob had dug there, so as not to be dependent on his neighbors for a supply of water. The defilement of Dinah, Jacob's daughter, and the capture of Shechem and massacre of all the male inhabitants by Simeon and Levi, are events that belong to this period (Gen. xxxiv. 1. f.). As this bloody act, which Jacob so entirely condemned (Gen. xxxiv. 30) and reprobated with his dying breath (Gen. xlix. 5–7), is ascribed to two persons, some urge that as evidence of the very insignificant character of the town at the time of that transaction. But the argument is by no means decisive. Those sons of Jacob were already at the head of households of their own, and may have had the support, in that achievement, of their numerous slaves and retainers. We speak, in like manner, of a commander as taking this or that city, when we mean that it was done under his leadership. The oak under which Abraham had worshipped, survived to Jacob's time; and the latter, as he was about to remove to Beth-el, collected the images and amulets which some of his family had brought with them from Padan-aram, and buried them "under the oak which was by Shechem" (Gen. xxxv. 1–4). The "oak of the monument" (if we adopt that rendering of אֵלוֹן מֵצֵּבָה in Judg. ix. 6), where the Shechemites made Abimelech king, marked, perhaps, the veneration with which the Hebrews looked back to these earliest footsteps (the *incunabula gentis*) of the patriarchs in the Holy Land.[a] During Jacob's sojourn at Hebron, his sons, in the course of their pastoral wanderings, drove their flocks to Shechem, and at Dothan, in that neighborhood, Joseph, who had been sent to look after their welfare, was seized and sold to the Ishmaelites (Gen. xxxvii. 12, 28). In the distribution of the land after its conquest by the Hebrews, Shechem fell to the lot of Ephraim (Josh. xx. 7), but was assigned to the Levites, and became a city of refuge (Josh. xxi. 20, 21). It acquired new importance as the scene of the renewed promulgation of the Law, when its blessings were heard from Gerizim and its curses from Ebal, and the people bowed their heads and acknowledged Jehovah as their king and ruler (Deut. xxvii. 11; and Josh viii. 33–35).[b] It was here Joshua assembled the people, shortly before his death, and delivered to them his last counsels (Josh. xxiv. 1, 25). After the death of Gideon, Abimelech, his bastard son, induced the Shechemites to revolt from the Hebrew commonwealth and elect him as king (Judg. ix.) It was to denounce this act of usurpation and treason that Jotham delivered his parable of the trees to the men of Shechem from the top of Gerizim, as recorded at length in Judg. ix. 22 f. The picturesque traits of the allegory, as Prof. Stanley suggests (*S. & P.* p. 236; *Jewish Church*, p. 348), are strikingly appropriate to the diversified foliage of the region.[c] In revenge for his expulsion, after a reign of three years, Abimelech destroyed the city, and, as an emblem of the fate to which he would consign it, sowed the ground with salt (Judg. ix. 34–45). It was soon restored, however, for we are told in 1 K. xii. that all Israel assembled at Shechem, and Rehoboam, Solomon's successor went thither to be inaugurated as king. Its central position made it convenient for such assemblies; its history was fraught with recollections which would give the sanctions of religion as well as of patriotism to the vows of sovereign and people. The new king's obstinacy made him insensible to such influences. Here, at this same place, the ten tribes renounced the house of David, and transferred their allegiance to Jeroboam (1 K. xii. 16), under whom Shechem became for a time the capital of his kingdom. We come next to the epoch of the exile. The people of Shechem doubtless shared the fate of the other inhabitants, and were, most of them at least, carried into captivity (2 K. xvii. 5, 6, xviii. 9 f.). But Shalmaneser, the conqueror, sent colonies from Babylonia to occupy the place of the exiles (2 K. xvii. 24). It would seem that there was another influx of strangers, at a later period, under Esar-haddon (Ezr. iv. 2). The "certain men from Shechem," mentioned in Jer. xli. 5, who were slain on their way to Jerusalem, were possibly Cuthites, *i. e.* Babylonian immigrants who had become proselytes or worshippers of Jehovah (see Hitzig, *der Proph. Jer.* p. 331). These Babylonian settlers in the land, intermixed no doubt to some extent with the old inhabitants, were the Samaritans, who erected at length a rival temple on Gerizim (B. C. 300), and between whom and the Jews a bitter hostility existed for so many ages (Joseph. *Ant.* xii. 1, § 1, xiii. 3, § 4). The son of Sirach (l. 26) says, that "a foolish people," *i. e.* the Samaritans, "dwell at Shechem" (τὰ Σίκιμα). From its vicinity to their place of worship, it became the principal city of the Samaritans, a rank which it maintained at least till the destruction of

---

[a] Here again the Auth. Vers., which renders "the plain of the pillar," is certainly wrong. It will not answer to *insist* on the explanation suggested in the text of the article. The Hebrew expression may refer to "the stone" which Joshua erected at Shechem as a witness of the covenant between God and his people (Josh. xxiv. 26); or may mean "the oak of the garrison," *i. e.* the one where a military post was established. (See Gesen. *Heb. Lex.* s. v.) [PILLAR, PLAIN OF THE, vol. iii. p. 2582.]

[b] The possibility of hearing such responsive tones has been questioned; but travellers have now frequently made the experiment and find they can hear others with perfect distinctness from the opposite heights. See Sepp's *Jerus. u. das heil. Land*, ii. 29; and Tobler's *Dritte Wanderung*, p. 164 f. H.

[c] Dr. Rosen points out a huge projecting crag of Gerizim which overlooks Shechem and the entire valley, as in all probability the rock-pulpit from which Jotham addressed the Shechemites (Judg. ix. 7 ff.). From that position as "he lifted up his voice" he could easily be heard by the dwellers in the city The same thing occurred in a recent attempt there to instigate a revolt. H.

their temple, about B. C. 129, a period of nearly two hundred years (Joseph. *Ant.* xiii. 9, § 1; *B. J.* i. 2, 6). It is unnecessary to pursue this sketch further. From the time of the origin of the Samaritans, the history of Shechem blends itself with that of this people and of their sacred mount, Gerizim; and the reader will find the proper information on this part of the subject under those heads (see Herzog, *Real-Encyk.* xiii. 362). [SAMARIA; SAMARITAN PENT.]

As intimated already, Shechem reappears in the New Testament. It is the Sychar of John iv. 5, near which the Saviour conversed with the Samaritan woman at Jacob's Well.[a] Συχάρ, as the place is termed there (Συχάρ in *Rec. Text* is incorrect), found only in that passage, was no doubt current among the Jews in the age of Christ, and was either a term of reproach (שֶׁקֶר, "a lie,") with reference to the Samaritan faith and worship, or, possibly, a provincial mispronunciation of that period (see Lücke's *Comm. üb. Johan.* i. 577). The Saviour, with his disciples, remained two days at Sychar on his journey from Judæa to Galilee. He preached the Word there, and many of the people believed on Him (John iv. 39, 40). In Acts vii. 16, Stephen reminds his hearers that certain of the patriarchs (meaning Joseph, as we see in Josh. xxiv. 32, and following, perhaps, some tradition as to Jacob's other sons) were buried at Sychem. Jerome, who lived so long hardly more than a day's journey from Shechem, says that the tombs of the twelve patriarchs were to be seen[b] there in his day. The anonymous[c] city in Acts viii. 5, where Philip preached with such effect, may have been Sychem, though many would refer that narrative to Samaria, the capital of the province. It is interesting to remember that Justin Martyr, who follows so soon after the age of the apostles, was born at Shechem.

It only remains to add a few words relating more especially to *Nâbulus*, the heir, under a different name, of the site and honors of the ancient Shechem. It would be inexcusable not to avail ourselves here of some recent observations of Dr. Rosen, in the *Zeitschr. der D. M. Gesellschaft*, for 1860 (pp. 622–639). He has inserted in that journal a careful plan of *Nâbulus* and the environs, with various accompanying remarks. The population consists of about five thousand, among whom are five hundred Greek Christians, one hundred and fifty Samaritans, and a few Jews. The enmity between the Samaritans and Jews is as inveterate still as it was in the days of Christ. The Mohammedans, of course, make up the bulk of the population. The main street follows the line of the valley from east to west, and contains a well-stocked bazaar. Most of the other streets cross this: here are the smaller shops and the workstands of the artisans. Most of the streets are narrow and dark, as the houses hang over them on arches, very much as in the closest parts of Cairo. The houses are of stone, and of the most ordinary style, with the exception of those of the wealthy sheikhs of Samaria who live here. There are no public buildings of any note. The *Kenîseh* or synagogue of the Samaritans is a small edifice, in the interior of which there is nothing remarkable, unless it be an alcove, screened by a curtain, in which their sacred writings are kept. The structure may be three or four centuries old. A description and sketch plan of it is given in Mr. Grove's paper "On the Modern Samaritans" in *Vacation Tourists* for 1861. *Nâbulus* has five mosques, two of which, according to a tradition in which Mohammedans, Christians, and Samaritans agree, were originally churches. One of them, it is said, was dedicated to John the Baptist; its eastern portal, still well preserved, shows the European taste of its founders. The domes of the houses and the minarets, as they show themselves above the sea of luxuriant vegetation which surrounds them, present a striking view to the traveller approaching from the east or the west.

Dr. Rosen says that the inhabitants boast of the existence of not less than eighty springs of water within and around the city. He gives the names of twenty-seven of the principal of them. One of the most remarkable among them is *'Ain el-Kerum*, which rises in the town under a vaulted dome, to which a long flight of steps leads down, from which the abundant water is conveyed by canals to two of the mosques and many of the private houses, and after that serves to water the gardens on the north side of the city. The various streams derived from this and other fountains, after being distributed thus among the gardens, fall at length into a single channel and turn a mill, kept going summer and winter. Of the fountains out of the city, three only belong to the eastern water-shed. One of them, *'Ain Balâta*, close to the hamlet of that name, rises in a partly subterranean chamber supported by three pillars, hardly a stone's throw from Jacob's Well, and is so large that Dr. Rosen observed small fish in it. Another, *'Ain 'Askar*, issues from an arched passage which leads into the base of Ebal, and flows thence into a tank inclosed by hewn stone, the workmanship of which, as well as the archway, indicates an ancient origin. The third, *'Ain Defna*, which comes from the same mountains, reminds us, by its name (Δάφνη), of the time when Shechem was called Neapolis Some of the gardens are watered from the fountains, while others have a soil so moist as not to need such irrigation. The olive, as in the days when Jotham delivered his famous parable, is still the principal tree. Figs, almonds, walnuts, mulberries, grapes, oranges, apricots, promegranates, are abundant. The valley of the Nile itself hardly surpasses *Nâbulus* in the production of vegetables of every sort.

Being, as it is, the gateway of the trade between

---

[a] * Some suppose Shechem and Sychar to be different places. See the arguments for that view under SYCHAR. Dr. Robinson reaffirms his belief that they are identical (*Later Res.* iii. 131; see also ii. 290–292). And Mr. Tristram says: "Jacob's well is only half an hour from the modern city" (*Nâbulus*, SHECHEM), while "it is evident that the ancient town lay more to the east, among the rough rocks and stone that strew the uninclosed and scattered olive yards for a mile and a half" (*Land of Israel*, 2d ed. p. 146).

H.

[b] Probably at the *Rejel el-Amûd*, a *wely* at the foot of Gerizim, east of the city, which is still believed to contain the remains of forty eminent Jewish saints (Rosen, as above). Dr. Stanley appears to have been the first to notice the possible connection between the name *Amûd*, "pillar," attached to this *wely*, as well as to one on the west end of Ebal, and the old Hebrew locality the "oak of the Pillar."

[c] The Auth. Vers. inaccurately adds the article. It is simply "a city of Samaria."

Digitized by Google

. ...ifa and *Beirût* on the one side, and the trans-Jordanic districts on the other, and the centre also of a province so rich in wool, grain, and oil, *Nâblus* becomes, necessarily, the seat of an active commerce, and of a comparative luxury to be found in very few of the inland oriental cities. It produces, in its own manufactories, many of the coarser woolen fabrics, delicate silk goods, cloth of camel's hair, and especially soap, of which last commodity large quantities, after supplying the immediate country, are sent to Egypt and other parts of the East. The ashes and other sediments thrown out of the city, as the result of the soap manufacture, have grown to the size of hills, and give to the environs of the town a peculiar aspect. [ASHES, Amer. ed.]

Dr. Rosen, during his stay at *Nâbulus*, examined anew the Samaritan inscriptions found there, supposed to be among the oldest written monuments in Palestine. He has furnished, as Professor Rödiger admits, the best copy of them that has been taken (see a fac-simile in *Zeitschrift*, as above, p. 621). The inscriptions on stone-tablets, distinguished in his account as No. 1 and No. 2, belonged originally to a Samaritan synagogue which stood just out of the city, near the Samaritan quarter, of which synagogue a few remains only are now left. They are thought to be as old at least as the age of Justinian, who (A. D. 529) destroyed so many of the Samaritan places of worship. Some, with less reason, think they may have been saved from the temple on Gerizim, having been transferred afterwards to a later synagogue. One of the tablets is now inserted in the wall of a minaret;[a] the other was discovered not long ago in a heap of rubbish not far from it. The inscriptions consist of brief extracts from the Samaritan Pentateuch, probably valuable as palæographic documents.

Similar slabs are to be found built into the walls of several of the sanctuaries in the neighborhood of *Nâbulus;* as at the tombs of Eleazar, Phinehas, and Ithamar at *Awertah*. H. B. H.

To the preceding account some notice should be appended of the two spots in the neighborhood of *Nâbulus* which bear the names of the Well of Jacob and the Tomb of Joseph. Of these the former is the more remarkable. It lies about a mile and a half east of the city, close to the lower road, and just beyond the wretched hamlet of *Balâta*. Among the Mahommedans and Samaritans it is known as *Bîr el-Yakûb*, or *'Ain Yakûb;* the Christians sometimes call it *Bîr es-Samariyeh* — "the well of the Samaritan woman." "A low spur projects from the base of Gerizim in a northeastern direction, between the plain and the opening of the valley. On the point of this spur is a little mound of shapeless ruins, with several fragments of granite columns. Beside these is the well. Formerly there was a square hole, opening into a carefully-built vaulted chamber, about 10 feet square, in the floor of which was the true mouth of the well. Now a portion of the vault has fallen in and completely covered up the mouth, so that nothing can be seen above but a shallow pit half filled with stones and rubbish. The well is deep — 75 feet[b] when last measured — and there was probably a considerable accumulation of rubbish at the bottom. Sometimes it contains a few feet of water, but at others it is quite dry. It is entirely excavated in the solid rock, perfectly round, 9 feet in diameter, with the sides hewn smooth and regular" (Porter, *Handbook*, p. 340). "It has every claim to be considered the original well, sunk deep into the rocky ground by 'our father Jacob.'" This at least was the tradition of the place in the last days of the Jewish people (John iv. 6, 12). And its position adds probability to the conclusion, indicating, as has been well observed, that it was there dug by one who could not trust to the springs so near in the adjacent vale — the springs of *'Ain Balâta* and *'Ain Defneh* — which still belonged to the Canaanites. Of all the special localities of our Lord's life, this is almost the only one absolutely undisputed. "The tradition, in which by a singular coincidence Jews and Samaritans, Christians and Mohammedans, all agree, goes back," says Dr. Robinson (*Bibl. Res.* ii. 284), "at least to the time of Eusebius, in the early part of the 4th century. That writer indeed speaks only of the sepulchre; but the Bordeaux Pilgrim in A. D. 333, mentions also the well; and neither of these writers has any allusion to a church. But Jerome in *Epitaphium Paulæ*, which is referred to A. D. 404, makes her visit the church erected at the side of Mount Gerizim around the well of Jacob, where our Lord met the Samaritan woman. The church would seem therefore to have been built during the 4th century; though not by Helena, as is reported in modern times. It was visited and is mentioned, as around the well, by Antoninus Martyr near the close of the 6th century; by Arculfus a century later, who describes it as built in the form of a cross; and again by St. Willibald in the 8th century. Yet Sæwulf about A. D. 1103, and Phocas in 1185, who speak of the well, make no mention of the church; whence we may conclude that the latter had been destroyed before the period of the crusades. Brocardus speaks of ruins around the well, blocks of marble and columns, which he held to be the ruins of a town, the ancient Thebez; they were probably those of

---

a * A more perfect copy of this tablet "immured (upside down) in the southern wall of the minaret" has been lately taken (1866) by the explorers of the Palestine Exploration Fund. Dr. Rosen's copy left three of its ten lines incomplete, with some of the characters in other parts very indistinct. Mr. Deutsch of the British Museum, to whom the photograph was submitted, has favored us with a report of the contents of the stone. These are, first, an abbreviated form of the Ten Commandments as found in the Samaritan Recension (8 lines); secondly, a sentence taken from the interpolated passage following these commandments in the Samaritan Codex (line 9); and finally line 10), the formula, "Arise, O Lo-i! Return, O Lord!" which is of frequent occurrence in Samaritan worship. It is probably the oldest Samaritan epigraph in existence. (See *Athenæum*, June 30, 1866.) H.

b The well is fast filling up with the stones thrown in by travellers and others. At Maundrell's visit (1697) it was 105 feet deep, and the same measurement is given by Dr. Robinson as having been taken in May, 1838. But, five years later, when Dr. Wilson recovered Mr. A. Bonar's Bible from it, the depth had decreased to "exactly 75" (Wilson's *Lands*, ii. 57). Maundrell (March 24) found 15 feet of water standing in the well. It appears now to be always dry. [The water varies from time to time, but appears to be rarely if ever entirely gone. Near the end of December, says Mr. Tristram, "there was no water but broken stones and some wet mud, showing that it had recently contained water, which indeed was found there afterwards in the month of March" (*Land of Israel*, 2d ed., p. 147). — H.]

the church, to which he makes no allusion. Other travellers, both of that age and later, speak of the church only as destroyed, and the well as already deserted. Before the days of Eusebius, there seems to be no historical testimony to show the identity of this well with that which our Saviour visited; and the proof must therefore rest, so far as it can be made out at all, on circumstantial evidence. I am not aware of anything, in the nature of the case, that goes to contradict the common tradition; but, on the other hand, I see much in the circumstances, tending to confirm the supposition that this is actually the spot where our Lord held his conversation with the Samaritan woman. Jesus was journeying from Jerusalem to Galilee, and rested at the well, while 'his disciples were gone away into the city to buy meat.' The well therefore lay apparently before the city, and at some distance from it. In passing along the eastern plain, Jesus had halted at the well, and sent his disciples to the city situated in the narrow valley, intending on their return to proceed along the plain on his way to Galilee, without himself visiting the city. All this corresponds exactly to the present character of the ground. The well too was Jacob's well, of high antiquity, a known and venerated spot; which, after having already lived for so many ages in tradition, would not be likely to be forgotten in the two and a half centuries intervening between St. John and Eusebius." [a]

It is understood that the well, and the site around it, have been lately purchased by the Russian Church, not, it is to be hoped, with the intention of erecting a church over it, and thus forever destroying the reality and the sentiment of the place.[b]

The second of the spots alluded to is the Tomb of Joseph. It lies about a quarter of a mile north of the well, exactly in the centre of the opening of the valley between Gerizim and Ebal. It is a small square inclosure of high whitewashed walls, surrounding a tomb of the ordinary kind, but with the peculiarity that it is placed diagonally to the walls, instead of parallel, as usual. A rough pillar used as an altar, and black with the traces of fire, is at the head, and another at the foot of the tomb. In the left-hand corner as you enter is a vine, whose branches "run over the wall," recalling exactly the metaphor of Jacob's blessing (Gen. xlix. 22). In the walls are two slabs with Hebrew inscriptions,[c] and the interior is almost covered with the names of Pilgrims in Hebrew, Arabic, and Samaritan. Beyond this there is nothing to remark in the structure itself. It purports to cover the tomb of Joseph, buried there in the "parcel of ground" which his father bequeathed especially to him his favorite son, and in which his bones were deposited after the conquest of the country was completed (Josh. xxiv. 32).

The local tradition of the Tomb, like that of the well, is as old as the beginning of the 4th century Both Eusebius (*Onomast.* Συχέμ) and the Bordeaux Pilgrim mention its existence. So do Benjamin of Tudela (1160–79), and Maundeville (1322), and so — to pass over intermediate travellers — does Maundrell (1697). All that is wanting in these accounts is to fix the tomb which they mention to the present spot. But this is difficult — Maundrell describes it as on his right hand, in leaving Nâblus for Jerusalem; "just without the city" — a small mosque, "built over the sepulchre of Joseph" (March 25). Some time after passing it he arrives at the well. This description is quite inapplicable to the tomb just described, but perfectly suits the Wely at the northeast foot of Gerizim, which also bears (among the Moslems) the name of Joseph. And when the expressions of the two oldest authorities [d] cited above are examined, it will be seen that they are quite as suitable, if not more so, to this latter spot as to the tomb on the open plain. On the other hand, the Jewish travellers,[e] from hap-Parchi (cir. 1320) downwards, specify the tomb as in the immediate neighborhood of the village *el-Balâta*.[f]

In this conflict of testimony, and in the absence of any information on the date and nature of the Moslem [g] tomb, it is impossible to come to a definite conclusion. There is some force, and that in favor of the received site, in the remarks of a learned and intelligent Jewish traveller (Loewe, in *Allg. Zeitung des Judenthums*, Leipzig, 1839, No. 50) on the peculiar form and nature of the ground surrounding the tomb near the well: the more so because they are suggested by the natural features of the spot, as reflected in the curiously minute, the almost technical language, of the ancient record, and not based on any mere traditional or artificial considerations. "The thought," says he, "forced itself upon me, how impossible it is to understand the details of the Bible without examining them on the spot. This place is called in the Scripture, neither *emek* ('valley') nor *shefela* ('plain'), but by the individual name of *Chelkat has-Sade*; and in the whole of Palestine there is not such another plot to be found, — a dead level, without the least hollow or swelling in a circuit of two hours. In addition to this it is the loveliest and most fertile spot I have ever seen."

**SHE'CHEM.** The names of three persons in the annals of Israel.

1. (שְׁכֶם [*shoulder, ridge*]: Συχέμ; [in Josh.,

---

[a] * Among the proofs of this identity one should not overlook the striking incidental connection between John's narrative and the locality (iv. 20). Gerizim is not named by the Evangelist; but as we read the words "our fathers worshipped in this mountain," how readily do we think of the woman's glance of the eye or outstretched hand in that direction, which made the expression definite on the spot though infinite to us. Gerizim stood at that moment within full sight only a short distance from the scene of the conversation. H.

[b] * No church or chapel has yet been erected there (1870), as was feared might be done at the time of writing the above article. H.

[c] One of these is given by Dr. Wilson (*Lands*, etc., ii. 61).

[d] Eusebius: ἐν προαστείοις Νέας πόλεως, ἔνθα καὶ ὁ τάφος δείκνυται τοῦ Ἰωσήφ.

Bordeaux Pilgrim: "Ad pedem montis locus est cui nomen est Sechim: ibi positum est monumentum ubi positus est Joseph. Inde passus mille . . . . ubi puteum," etc.

[e] Benjamin of Tudela (cir. 1165) says, "The Samaritans are in possession of the tomb of Joseph the righteous;" but does not define its position.

[f] See the Itineraries entitled *Jichus hat-tzadikim* (A. D. 1561), and *Jichus ha-Aboth* (1587), in Carmoly's *Itinéraires de la Terre Sainte*.

[g] It appears from a note in Prof. Stanley's *Sinai & Pal.* p. 241, that a later Joseph is also commemorated in this sanctuary.

Σίκιμα, pl.:] *Sichem.*) The son of Hamor the chieftain of the Hivite settlement of Shechem at the time of Jacob's arrival (Gen. xxxiii. 19, xxxiv. 2-26; Josh. xxiv. 32; Judg. ix. 28).

2. (Συχέμ: *Sechem.*) A man of Manasseh, of the clan of Gilead, and head of the family of the Shechemites (Num. xxvi. 31). His family are again mentioned as the Bene-Shechem [sons of S.] (Josh. xvii. 2).

3. (Συχέμ: *Sechem.*) In the lists of 1 Chr. another Shechem is named amongst the Gileadites as a son of Shemida, the younger brother of the foregoing (vii. 19). It must have been the recollection of one of these two Gileadites which led Cyril of Alexandria into his strange fancy (quoted by Reland, *Pal.* p. 1007, from his Comm. on Hosea) of placing the city of Shechem on the eastern side of the Jordan. G.

**SHE'CHEMITES, THE** (הַשִּׁכְמִי [patr., see above]: ὁ Συχεμί; [Vat. M. -μει, 1.m. -μεει:] *Sechemite*). The family of Sechem, son of Gilead: one of the minor clans of the Eastern Manasseh (Num. xxvi. 31; comp. Josh. xvii. 2).

**SHECHI'NAH** (in Chaldee and neo-Hebrew, שְׁכִינָה, *majestas Dei, præsentia Dei, Spiritus Sanctus*, Buxtorf, from שָׁכַן and שְׁכַן, "to rest," "settle," "dwell," whence מִשְׁכָּן "a tent," the tabernacle; comp. σκηνή). This term is not found in the Bible. It was used by the later Jews, and borrowed by Christians from them, to express the visible majesty of the Divine Presence, especially when resting, or dwelling, between the cherubim on the mercy-seat in the Tabernacle, and in the Temple of Solomon; but not in Zerubbabel's temple, for it was one of the five particulars which the Jews reckon to have been wanting in the second temple[a] (Castell, *Lexic.* s. v.; Prideaux, *Connect.* i. 138). The use of the term is first found in the Targums, where it forms a frequent periphrasis for God, considered as *dwelling* amongst the children of Israel, and is thus used, especially by Onkelos, to avoid ascribing corporeity[b] to God himself, as Castell tells us, and may be compared to the analogous periphrasis so frequent in the Targum of Jonathan, "the Word of the Lord." Many Christian writers have thought that this threefold expression for the Deity — the Lord, the word of the Lord, and the Shechinah — indicates the knowledge of a Trinity of Persons in the Godhead, and accordingly, following some Rabbinical writers, identify the Shechinah with the Holy Spirit. Others, however, deny this (Calmet's *Dict. of the Bib.*; Joh. Saubert, *On the Logos*, § xix. in *Critic. Sacr.*; Glass. *Philolog. Sacr.* lib. v. 1, vii. etc.).

Without stopping to discuss this question, it will most conduce to give an accurate knowledge of the use of the term Shechinah by the Jews themselves, if we produce a few of the most striking passages in the Targums where it occurs. In Ex. xxv. 8, where the Hebrew has "Let them make me a sanctuary that I may *dwell* (וְשָׁכַנְתִּי) among them," Onkelos has, "I will make my Shechinah to dwell among them." In xxix. 45, 46, for the Hebrew "I will *dwell* among the children of Israel," Onkelos has, "I will make my Shechinah to dwell," etc. In Ps. lxxiv. 2, for "this Mount Zion wherein thou hast dwelt," the Targum has "wherein thy Shechinah hath dwelt." In the description of the dedication of Solomon's Temple (1 K. viii. 12, 13), the Targum of Jonathan runs thus: "The Lord is pleased to make his Shechinah dwell in Jerusalem. I have built the house of the sanctuary for the house of thy Shechinah for ever," where it should be noticed that in ver. 13 the Hebrew שָׁכַן is not used, but זָבַל, and יָשַׁב. And in 1 K. vi. 13, for the Heb. "I will dwell among the children of Israel," Jonathan has "I will make my Shechinah dwell," etc. In Is. vi. 5 he has the combination,[c] "the glory of the Shechinah of the King of ages, the Lord of Hosts;" and in the next verse he paraphrases "from off the altar," by "from before his Shechinah on the throne of glory in the lofty heavens that are above the altar." Compare also Num. v. 3, xxxv. 34; Ps. lxviii. 17, 18, cxxxv. 21; Is. xxxiii. 5, lvii. 15; Joel iii. 17, 21, and numerous other passages. On the other hand, it should be noticed that the Targums never render "the cloud" or "the glory" by Shechinah, but by עֲנָנָא and יְקָרָא, and that even in such passages as Ex. xxiv. 16, 17; Num. ix. 17, 18, 22, x. 12, neither the mention of the cloud, nor the constant use of the verb שָׁכַן[d] in the Hebrew provoke any reference to the Shechinah. Hence, as regards the use of the word *Shechinah* in the Targums, it may be defined as a periphrasis for God whenever He is said to dwell on Zion, amongst Israel, or between the cherubim, and so on, in order, as before said, to avoid the slightest approach to materialism. Far most frequently this term is introduced when the verb שָׁכַן occurs in the Heb. text; but occasionally, as in some of the above-cited instances, where it does not, but where the Paraphrast wished to interpose an abstraction, corresponding to *Presence*, to break the bolder anthropopathy of the Hebrew writer.

Our view of the Targumistic notion of the Shechinah would not be complete if we did not add, that though, as we have seen, the Jews reckoned the Shechinah among the marks of the Divine favor which were wanting to the second temple, they manifestly expected the return of the Shechinah in the days of the Messiah. Thus Hag. i. 8, "Build the house, and I will take pleasure in it, and I will be glorified, saith the Lord," is paraphrased by Jonathan, "I will cause my Shechinah to dwell in it in glory." Zech. ii. 10, "Lo I come, and I will dwell in the midst of thee, saith the Lord," is paraphrased "I will be revealed, and will cause my Shechinah to dwell in the midst of thee;" and viii. 3, "I am returned unto Zion, and will dwell in the midst of Jerusalem," is paraphrased "I will make my Shechinah dwell in the midst of Jerusalem;" and lastly, in Ez. xliii. 7, 9, in the vision of the return of the Glory of God to the Temple, Jonathan

---

[a] Dr. Bernard, in his notes on Josephus, tries to prove that these five things were all in the second temple, because Josephus says the Urim and Thummim were. See Wotton's *Traditions*, etc., p. xl.

[b] See, *e. g.*, Ps. lxix. 17, and Kalisch on Ex. xxiv. 10.

In Ps lxviii. 17 (16, A. V.), the Targum has "the Word of the Lord has desired to place his Shechinah upon Zion."

[d] Always (as far as I have observed) rendered by the Chaldee שְׁרָא.

paraphrases thus, "Son of man, this is the place of the house of the throne of my glory, and this is the place of the house of the dwelling of my Shechinah, where I will make my Shechinah dwell in the midst of the children of Israel for ever. . . . Now let them cast away their idols . . . and I will make my Shechinah dwell in the midst of them for ever." Compare Is. iv. 5, where the return of the pillar of cloud by day and fire by night is foretold as to take place in the days of the Messiah.

As regards the visible manifestation of the Divine Presence dwelling amongst the Israelites, to which the term Shechinah has attached itself, the idea which the different accounts in Scripture convey is that of a most brilliant and glorious light,[a] enveloped in a cloud, and usually concealed by the cloud, so that the cloud itself was for the most part alone visible; but on particular occasions the glory[b] appeared. Thus at the Exodus, "the Lord went before" the Israelites "by day in a pillar of cloud . . . . and by night in a pillar of fire to give them light." And again we read, that this pillar "was a cloud and darkness" to the Egyptians, "but it gave light by night" to the Israelites. But in the morning watch "the Lord looked unto the host of the Egyptians through the pillar of fire and of the cloud, and troubled the host of the Egyptians:" *i. e.* as Philo (quoted by Patrick) explains it, "the fiery appearance of the Deity shone forth from the cloud," and by its amazing brightness confounded them. So too in the Pirke Eliezer it is said, "The Blessed God appeared in his glory upon the sea, and it fled back;" with which Patrick compares Ps. lxxvii. 16, "The waters saw thee, O God, the waters saw thee; they were afraid:" where the Targum has, "They saw thy Shechinah in the midst of the waters." In Ex. xix. 9, "the Lord said to Moses, Lo, I come unto thee in a thick cloud," and accordingly in ver. 16 we read that "a thick cloud" rested "upon the mount," and in ver. 18, that "Mount Sinai was altogether on a smoke, because the Lord descended upon it in fire." And this is further explained, Ex. xxiv. 16, where we read that "the glory of the Lord abode upon Mount Sinai, and the cloud covered it (*i. e.* as Aben Ezra explains it, the glory) six days." But upon the seventh day, when the Lord called "unto Moses out of the midst of the cloud," there was a breaking forth of the glory through the cloud, for "the sight of the glory of the Lord was like devouring fire on the top of the mount in the eyes of the children of Israel," ver. 17. So again when God as it were took possession of the Tabernacle at its first completion (Ex. xl. 34, 35), "the cloud covered the tent of the congregation (externally), and the glory of the Lord filled the Tabernacle (within), and Moses was not able to enter into the tent of the congregation" (rather, of *meeting*); just as at the dedication of Solomon's Temple (1 K. viii. 10, 11), "the cloud filled the house of the Lord, so that the priests could not stand to minister because of the cloud, for the glory of the Lord had filled the house of the Lord." In the Tabernacle, however, as in the Temple, this was only a temporary state of things; for throughout the books of Leviticus and Numbers we find Moses constantly entering into the Tabernacle. And when he did so, the cloud which rested over it externally, dark by day, and luminous at night (Num. ix. 15, 16), came down and stood at the door of the Tabernacle, and the Lord talked with Moses inside, "face to face, as a man talketh with his friend" (Ex. xxxiii. 7–11). It was on such occasions that Moses "heard the voice of one speaking unto him from off the mercy-seat that was upon the ark of testimony, from between the two cherubims" (Num. vii. 89), in accordance with Ex. xxv. 22; Lev. xvi 2. But it does not appear that the glory was habitually seen either by Moses or the people. Occasionally, however, it flashed forth from the cloud which concealed it; as Ex. xvi. 7, 10; Lev. ix. 6, 23, when "the glory of the Lord appeared unto all the people," according to a previous promise; or as Num. xiv. 10, xvi. 19, 42, xx. 6, suddenly, to strike terror in the people in their rebellion. The last occasion on which the glory of the Lord appeared was that mentioned in Num. xx. 6, when they were in Kadesh in the 40th year of the Exodus, and murmured for want of water; and the last express mention of the cloud as visibly present over the Tabernacle is in Deut. xxxi. 15, just before the death of Moses. The cloud had not been mentioned before since the second year of the Exodus (Num. x. 11, 34, xii. 5, 10); but as the description in Num. ix. 15–23; Ex. xl. 38, relates to the whole time of their wanderings in the wilderness, we may conclude that at all events the cloud visibly accompanied them through all the migrations mentioned in Num. xxxiii., till they reached the plains of Moab, and till Moses died. From this time we have no mention whatever in the history either of the cloud, or of the glory, or of the voice from between the cherubim, till the dedication of Solomon's Temple. But since it is certain that the Ark was still the special symbol of God's presence and power (Josh. iii., iv., vi., 1 Sam. iv.; Ps. lxviii. 1 ff.; compared with Num. x. 35; Ps. cxxxii. 8, lxxx. 1, xcix. 1), and since such passages as 1 Sam. iv. 4, 21, 22; 2 Sam. vi. 2; Ps. xcix. 7; 2 K. xix. 15, seem to imply the continued manifestation of God's Presence in the cloud between the cherubim, and that Lev. xvi. 2 seemed to promise so much, and that more general expressions, such as Ps. ix. 11, cxxxii. 7, 8, 13, 14, lxxvi. 2; Is. viii. 18, &c., thus acquire much more point, we may perhaps conclude that the cloud did continue, though with shorter or longer interruptions, to dwell between "the cherubims of glory shadowing the mercy-seat," until the destruction of the Temple by Nebuchadnezzar. [OLIVES, MOUNT OF, iii. 2249 *a*.]

The allusions in the N. T. to the Shechinah are not unfrequent. Thus in the account of the Nativity, the words, "Lo, the angel of the Lord came upon them, and the glory of the Lord shone round about them" (Luke ii. 9), followed by the apparition of "the multitude of the heavenly host," recall the appearance of the Divine glory on Sinai, when "He shined forth from Paran, and came with ten thousands of saints" (Deut. xxxiii. 2; comp. Ps. lxviii. 17; Acts vii. 53; Heb. ii. 2; Ex. xliii 2). The "God of glory" (Acts vii. 2, 55), "the cherubims of glory" (Heb. ix. 5), "the glory" (Rom. ix. 4), and other like passages, are distinct references to the manifestations of the glory in the O. T. When we read in John i. 14, that "the Word was made flesh, and dwelt among us (ἐσκήνωσεν ἐν ἡμῖν), and we beheld his glory;" or in 2 Cor xii. 9, "that the power of Christ may rest upon

[a] The Arabic expression, corresponding to the Shechinah of the Targums, is a word signifying *light*.

[b] In Hebrew כָּבוֹד; in Chaldee יְקָר.

as"[a] (ἐπισκηνώσῃ ἐν' ἐμέ); or in Rev. xxi. 3, 'Behold the tabernacle of God is with men, and He will dwell with them" (ἡ σκηνὴ τοῦ Θεοῦ . . . . καὶ σκηνώσει μετ' αὐτῶν), we have not only references to the Shechinah, but are distinctly taught to connect it with the incarnation and future coming of Messiah, as type with antitype. Nor can it be doubted that the constant connection of the second advent with a cloud, or clouds, and attendant angels, points in the same direction (Matt. xxvi. 64; Luke xxi. 27; Acts i. 9, 11; 2 Thess. i. 7, 8; Rev. i. 7).

It should also be specially noticed that the attendance of angels is usually associated with the Shechinah. These are most frequently called (Ez. x., xi.) cherubim; but sometimes, as in Is. vi., seraphim (comp. Rev. iv. 7, 8). In Ex. xiv. 19, "the angel of God" is spoken of in connection with the cloud, and in Deut. xxxiii. 2, the descent upon Sinai is described as being "with ten thousands of saints" (comp. Ps. lxviii. 17; Zech. xiv. 5). The predominant association, however, is with the cherubim, of which the golden cherubim on the mercy-seat were the representation. And this gives force to the interpretation that has been put upon Gen. iii. 24,[b] as being the earliest notice of the Shechinah, under the symbol of a pointed flame, dwelling between the cherubim, and constituting that local Presence of the Lord from which Cain went forth, and before which the worship of Adam and succeeding patriarchs was performed (see Hale's *Chronol.* ii. 94; Smith's *Sacr. Annal.* i. 173, 176, 177). Parkhurst went so far as to imagine a tabernacle containing the cherubim and the glory all the time from Adam to Moses (Heb. *Lex.* p. 623). It is, however, pretty certain that the various appearances to Abraham, and that to Moses in the bush, were manifestations of the Divine Majesty similar to those later ones to which the term Shechinah is applied (see especially Acts vii. 2). For further information the reader is referred, besides the works quoted above, to the articles CLOUD, ARK, CHERUB, to Winer, *Realwb.* art. *Cherubim*; to Bishop Patrick's *Commentary*; to Buxtorf, *Hist. Arc. Fœd.* c. xi.; and to Lowman, *On the Shechinah*. A. C. H.

**SHEDEUR** (שְׁדֵיאוּר [*darting of fire*, Ges.; *sender of a revelation*, Fürst]: Σεδιούρ; [Vat. Σεδισουρ in Num. vii. 30;] Alex. Εδιουρ in Num. i. 5, ii. 10: *Sedeür*). The father of Elizur, chief of the tribe of Reuben at the time of the Exodus (Num. i. 5, ii. 10, vii. 30, 35, x. 18). It has been conjectured (*Zeitschr. d. Deut. Morg. Ges.* xv. 909) that the name is compounded of Shaddai.

**SHEEP**. The well-known domestic animal which from the earliest period has contributed to the wants of mankind. Sheep were an important part of the possessions of the ancient Hebrews and of eastern nations generally. The first mention of sheep occurs in Gen. iv. 2. The following are the principal Biblical allusions to these animals. They were used in the sacrificial offerings, both the adult animal (Ex. xx. 24; 1 K. viii. 63; 2 Chr. xxix. 33) and the lamb, כֶּבֶשׂ, i. e. "a male from one to three years old," but young lambs of the first year were more generally used in the offerings (see Ex. xxix. 38; Lev. ix. 3, xii. 6; Num xxviii. 9, &c.). No lamb under eight days old was allowed to be killed (Lev. xxii. 27). A very young lamb was called טָלֶה *tâleh* (see 1 Sam. vii. 9, Is. lxv. 25). Sheep and lambs formed an important article of food (1 Sam. xxv. 18; 1 K. i. 19, iv. 23; Ps. xliv. 11, &c.). The wool was used as clothing (Lev. xiii. 47; Deut. xxii. 11; Prov. xxxi. 13; Job xxxi. 20, &c.). [WOOL.] Trumpets may have been made of the horns of rams (Josh. vi. 4), though the rendering of the A. V. in this passage is generally thought to be incorrect. "Rams' skins dyed red" were used as a covering for the Tabernacle (Ex. xxv. 5). Sheep and lambs were sometimes paid as tribute (2 K. iii. 4). It is very striking to notice the immense numbers of sheep that were reared in Palestine in Biblical times: see for instance 1 Chr. v. 21; 2 Chr. xv. 11, xxx. 24; 2 K. iii. 4; Job xlii. 12. Especial mention is made of the sheep of Bozrah (Mic. ii. 12; Is. xxxiv. 6) in the land of Edom, a district well suited for pasturing sheep. "Bashan and Gilead" are also mentioned as pastures (Mic. vii. 14). "Large parts of Carmel, Bashan, and Gilead," says Thomson (*Land and Book*, p. 205), "are at their proper seasons alive with countless flocks" (see also p. 331). "The flocks of Kedar" and "the rams of Nebaioth," two sons of Ishmael (Gen. xxv. 13) that settled in Arabia, are referred to in Is. lx. 7. Sheep-shearing is alluded to Gen. xxxi. 19, xxxviii. 13; Deut. xv. 19; 1 Sam. xxv. 4; Is. liii. 7, &c. Sheep-dogs were employed in Biblical times, as is evident from Job xxx. 1, "the dogs of my flock." From the manner in which they are spoken of by the patriarch it is clear, as Thomson (*Land and Book*, p. 202) well observes, that the oriental shepherd-dogs were very different animals from the sheep-dogs of our own land. The existing breed are described as being "a mean, sinister, ill-conditioned generation, which are kept at a distance, kicked about, and half-starved, with nothing noble or attractive about them." They were, however, without doubt, useful to the shepherds, more especially at night, in keeping off the wild beasts that prowled about the hills and valleys (comp. Theoc. *Id.* v. 106). Shepherds in Palestine and the East generally go before their flocks, which they induce to follow by calling to them (comp. John x. 4; Ps. lxxvii. 20, lxxx. 1), though they also drove them (Gen. xxxiii. 13). [SHEPHERD.] It was usual amongst the ancient Jews to give names to sheep and goats, as in England we do to our dairy cattle (see John x. 3). This practice prevailed amongst the ancient Greeks (see Theoc. *Id.* v. 103): —

Οὐκ ἀπὸ τᾶς ἁρνὸς οὗτος ὁ Κώναρος, ἃ τε Κυναῖθα;

The following quotation from Hartley's *Researches in Greece and the Levant*, p. 321, is so strikingly illustrative of the allusions in John x. 1–16, that we cannot do better than quote it: "Having had my attention directed last night to the words in John x. 3, I asked my man if it was usual in Greece to give names to the sheep. He informed me that it

[a] This expression of St. Paul's has a singular resemblance to the Rabbinical saying, that of eighty pupils of Hillel the elder, thirty were worthy that *the Shechinah should rest upon them*; and of these Jonathan (author of the Targum) was the first (Wolf. *Bib.* Heb. ii. 1169).

[b] "He drove out the man, and stationed his Shechinah of old between the two cherubim" (Jerusal Targum); וַיַּשְׁכֵּן אֶת־דִּוקְרָבִים (Heb. Bib See Patrick *On Gen.* iii. 24.

Digitized by Google

was, and that the sheep obeyed the shepherd when he called them by their names. This morning I had an opportunity of verifying the truth of this remark. Passing by a flock of sheep, I asked the shepherd the same question which I had put to the servant, and he gave me the same answer. I then bade him call one of his sheep. He did so, and it instantly left its pasturage and its companions and ran up to the hands of the shepherd with signs of pleasure and with a prompt obedience which I had never before observed in any other animal. It is also true in this country that 'a stranger will they not follow, but will flee from him.' The shepherd told me that many of his sheep were still wild, that they had not yet learned their names, but that by teaching them they would all learn them." See also Thomson (p. 203): "The shepherd calls sharply from time to time to remind the sheep of his presence; they know his voice and follow on; but if a stranger call they stop short, lift up their heads in alarm, and if it is repeated they turn and flee, because they know not the voice of a stranger." [a]

Broad-tailed Sheep.

The common sheep of Syria and Palestine are the broad-tail (*Ovis laticaudatus*), and a variety of the common sheep of this country (*Ovis aries*) called the *Bidoween* according to Russell (*Aleppo*, ii. 147). The broad-tailed kind has long been reared in Syria. Aristotle, who lived more than 2,000 years ago, expressly mentions Syrian sheep with tails a cubit wide. This or another variety of the species is also noticed by Herodotus (iii. 113) as occurring in Arabia. The fat tail of the sheep is probably alluded to in Lev. iii. 9, vii. 3, etc., as the fat and the whole rump that was to be taken off hard by the back-bone, and was to be consumed on the altar. The cooks in Syria use this mass of fat instead of Arab butter, which is often rancid (see Thomson, *Land and Book*, p. 97). [BUTTER, Amer. ed.]

The whole passage in Gen. xxx. which bears on the subject of Jacob's stratagem with Laban's sheep is involved in considerable perplexity, and Jacob's conduct in this matter has been severely and uncompromisingly condemned by some writers. We touch upon the question briefly in its zoölogical bearing. It is altogether impossible to account for the complete success which attended Jacob's device of setting peeled rods before the ewes and she-goats as they came to drink in the watering troughs, on *natural grounds*. The Greek fathers for the most part ascribe the result to the direct operation of the Deity, whereas Jerome and the Latin fathers regard it as a mere natural operation of the imagination, adducing as illustrations in point various devices that have been resorted to by the ancients in the cases of mares, asses, etc. (see Oppian, *Cyneg.* i. 327, 357; Pliny, *H. N.* vii. 10, and the passages from Quintilian, Hippocrates, and Galen, as cited by Jerome, Grotius, and Bochart). Even granting the general truth of these instances, and acknowledging the curious effect which peculiar sights by the power of the imagination do occasionally produce in the fetus of many animals, yet we must agree with the Greek fathers and ascribe the production of Jacob's spotted sheep and goats to Divine agency. The whole question has been carefully considered by Nitschmann (*De Corylo Jacobi*, in *Thes. Nov. Theol. Phil.* i. 202–206), from whom we quote the following passage: "Fatemur itaque, cum Vossio aliisque piis viris, *illam pecudum imaginationem tantum fuisse causam adjuvantem*, ac plus in hoc negotio divinæ tribuendum esse virtuti, quæ suo concursu sic debilem causæ secundæ vim adauxit ut quod ea sola secundum naturam præstare non valeret id divina benedictione supra naturam præstaret;" and then Nitschmann cites the passage in Gen. xxxi. 5–13, where Jacob expressly states that his success was due to Divine interference; for it is hard to believe that Jacob is here uttering nothing but a tissue of falsehoods, which appears to be the opinion of Kalisch (*Hist. and Crit. Comment.* Gen. xxx. and xxxi.), who represents the patriarch as "unblushingly executing frauds suggested by his fertile invention, and then abusing the authority of God in covering or justifying them." We are aware that a still graver difficulty in the minds of some persons remains, if the above explanation be adopted; but we have no other alternative, for, as Patrick has observed, "let any shepherd now try this device, and he will not find it do what it did then by a Divine operation." [b] The greater difficulty alluded to is the supposing that God would have directly interfered to help Jacob to act fraudulently towards his uncle. But are we quite sure that there was any *fraud*, fairly called such, in the matter? Had Jacob not been thus aided, he might have remained the dupe of Laban's niggardly conduct all his days. He had served his money-loving uncle faithfully for fourteen years; Laban confesses his cattle had increased considerably under Jacob's management; but all the return he got was unfair treatment and a constant desire

a * Dr. Thomson's remarks in illustration of these traits of pastoral life in the East are very interesting (*Land and Book*, i. 303, 304). H.

b None of the instances cited by Jerome and others are exact parallels with that in question. The quotations adduced, with the exception of those which speak of painted images set before Spartan women *inter concumbendum*, refer to cases in which *living* animals themselves, and not reflections of inanimate objects, were the cause of some marked peculiarity in the fetus. Rosenmüller, however (*Schol. in loc.*), cites Hasthor (*De Re ovinaria*, German version, pp. 17, 30, 43, 46, 47 as a writer by whom the contrary opinion is confirmed. We have been unable to gain access to this work.

as the part of Laban to strike a hard bargain with him (Gen. xxxi. 7). God vouchsafed to deliver Jacob out of the hands of his hard master, and to punish Laban for his cruelty, which He did by pointing out to Jacob how he could secure to himself large flocks and abundant cattle. God was only helping Jacob to obtain that which justly belonged to him, but which Laban's rapacity refused to grant. "Were it lawful," says Stackhouse, "for any private person to make reprisals, the injurious treatment Jacob had received from Laban, both in imposing a wife upon him and prolonging his servitude without wages, was enough to give him both the provocation and the privilege to do so. God Almighty, however, was pleased to take the determination of the whole matter into his own hands." This seems to us the best way of understanding this disputed subject.*

The following Hebrew words occur as the names of sheep: צֹאן, יָעִיר, צֶאֱנָה, or צֵאָה, a collective noun to denote "a flock of sheep or goats," to which is opposed the noun of unity, שֶׂה, "a sheep" or "a goat," joined to a masc. where "rams" or "he-goats" are signified, and with a fem. when "ewes" or "she-goats" are meant, though even in this case sometimes to a masc. (as in Gen. xxxi. 10): אַיִל, "a ram;" רָחֵל, "a ewe;" כֶּבֶשׂ or כֶּשֶׂב, "a lamb," or rather "a sheep of a year old or above," opposed to עֵלָה, "a sucking or very young lamb;" גֵּר is another term applied to a lamb as it *skips* (גָּרַר) in the pastures.

As the sheep is an emblem of meekness, patience, and submission, it is expressly mentioned as typifying these qualities in the person of our blessed Lord (Is. liii. 7; Acts viii. 32, &c.). The relation that exists between Christ, "the chief Shepherd," and his members, is beautifully compared to that which in the East is so strikingly exhibited by the shepherds to their flocks (see Thomson, *Land and Book*, p. 203). W. H

• **SHEEPCOTE.** [SHEEPFOLD.]

• **SHEEPFOLD.** The original words for this expression in the Old Testament are גְּדֵרָה, מִשְׁפְּתַיִם, מִכְלָה (dual, with reference to the troughs which divided them), and גְּדֵרוֹת צֹאן, and in the N. T., αὐλὴ τῶν προβάτων (John xi. 1) and αὐλή and ποίμνη (the latter erroneously) (John x. 16). Sheepfolds as usually constructed in the East, according to Thomson (*Land and Book*, i. 299), are "low, flat buildings, erected on the sheltered side of the valleys, and, when the nights are cold, the flocks are shut up in them, but in ordinary weather they are merely kept within the yard." During the day of course they are led forth to pasture by the shepherds. The folds "are defended by a wide stone wall, crowned by sharp thorns which the wolf will rarely attempt to scale. The leopard and panther, however, when pressed with hunger, will overleap the thorny hedge," and make havoc of the flock. Many little villages in Syria, especially in the *Buka'a* between Lebanon and Anti-Lebanon, consist of sheepcotes or have sprung from them, and have the syllable *Haush* (herd-fold) prefixed to their names. In Greece the writer has seen folds built merely of a

Sheepfold.

parapet of bushes or branches, placed at the entrance of caves, natural, or made for the purpose in the side of hills or rocky ledges. A porter kept the door of the larger sheepfolds. [PORTER, Amer. ed.]

A mistranslation in John x. 16, or at least ambiguity ("fold" being susceptible of a twofold sense), mars the exquisite beauty of the passage. Instead of "there shall be one fold *and* one shepherd," it should read: "and there shall be one flock, one shepherd." The A. V. confuses αὐλή and ποίμνη, and we necessarily lose in any rendering the alliterative succession of ποίμνη and ποιμήν. The Saviour no doubt refers more immediately in the figure to the union of Jews and Gentiles in the faith and blessings of the gospel. "Sheepcote" occurs in the A. V. three times interchangeably with "sheepfold." H.

* We have considered this perplexing question in accordance with the *generally* received opinion that the whole account is the work of one and the same writer: at the same time, we must allow that there is strong probability that those portions of the narrative which relate to Jacob's stratagem with the "peeled rods, are attributable, not to the *Elohistic* or ancient source, but to the supplementary *Jehovistic* writer.

• **SHEEP-MASTER** (2 K. iii. 4). [SHEPHERD.]

**SHEEP GATE, THE** (שַׁעַר הַצֹּאן: ἡ πυλη ἡ προβατική: *porta gregis*). One of the gates of Jerusalem as rebuilt by Nehemiah (Neh. iii. 1, 32; xii. 39). It stood between the tower of Meah and the chamber of the corner (iii. 32, 1) or gate of the guard-house (xii. 39, A. V. "prison-gate"). The latter seems to have been at the angle formed by the junction of the wall of the city of David with that of the city of Jerusalem proper, having the Sheep Gate on the north of it. (See the diagram in p. 1322, vol. ii.) According to the view taken in the article JERUSALEM,[a] the city of David occupied a space on the mount Moriah about coinciding with that between the south wall of the platform of the Dome of the Rock and the south wall of the *Haram es-Sherif*. The position of the Sheep Gate may therefore have been on or near that of the *Bab el-Kattânin*. Bertheau (*Exeg. Handbuch*, on Nehemiah, p. 144) is right in placing it on the east side of the city and on the north of the corner; but is wrong in placing it at the present St. Stephen's Gate, since no wall existed nearly so far to the east as that, till after the death of Christ. [JERUSALEM.]

The pool which was near the Sheep Gate (John v. 2; A. V. inaccurately "*market*") was probably the present *Hammâm esh-Shefa*. G.

**SHEEP-MARKET, THE** (John v. 2). The word "market" is an interpolation of our translators, possibly after Luther, who has *Schafhaus*. The words of the original are ἐπὶ τῇ προβατικῇ, to which should probably be supplied not market but gate, πύλῃ, as in the LXX. version of the passages in Nehemiah quoted in the foregoing article. The Vulgate connects the προβατικὴ with the κολυμβήθρα, and reads *Probatica piscina*; while the Syriac omits all mention of the sheep, and names only "a place of baptism." G.

• **SHEETS**, only in Judg. xiv. 12, 13, and there "shirts" in the margin. The Hebrew is סָדִין, elsewhere only in Prov. xxxi. 24 and Is. iii. 23, where the A. V. renders "fine linen." The LXX. has in the different places σινδόνες or βύσσινα, and the Vulg. *sindones*. It was something worn by men and women, as the above passages show, and must have been an article of dress. It may have been a thin covering of linen worn next to the body as a shirt (Fürst, Keil), or a loose night-wrapper thrown around one on taking off his other garments (Saalschutz). In the latter case it corresponds nearly to the Greek σινδών (comp. Mark's σινδόνα ἐπὶ γυμνοῦ, xiv. 51). It formed part of the raiment which Samson was to give to the Philistines if they should discover his riddle within the appointed time (Judg. xiv. 12 ff.). It was evidently at that period an article of value or luxury among the Philistines, as it was still later among the Hebrews (Is. iii. 23; Prov. xxxi. 24). Fürst calls in question the commonly assumed affinity between σινδών and סָדִין (*Lex.* s. v.). H.

• **SHEFE'LAH.** [SEPHELA.]

**SHEHARI'AH** (שְׁחַרְיָה [*Jehovah seeks*]: Σααρίας; [Vat. Σαραια;] Alex. Σααρια: *Soboria*). A Benjamite, son of Jeroham (1 Chr. viii. 26).

**SHEKEL.** In a former article [MONEY] a full account has been given of the coins called shekels, which are found with inscriptions in the Samaritan[b] character; so that the present article will only contain notices of a few particulars relating to the Jewish coinage which did not fall within the plan of the former.

It may, in the first place, be desirable to mention, that although some shekels are found with Hebrew letters instead of Samaritan, these are undoubtedly all forgeries. It is the more needful to make this statement, as in some books of high reputation, *e. g.* Walton's *Polyglott*, these shekels are engraved as if they were genuine. It is hardly necessary to suggest the reasons which may have led to this series of forgeries. But the difference between the two is not confined to the letters only; the Hebrew shekels are much larger and thinner than the Samaritan, so that a person might distinguish them merely by the touch, even under a covering.

Our attention is, in the next place, directed to the early notices of these shekels in Rabbinical writers. It might be supposed that in the Mishna, where one of the treatises bears the title of "*Shekalim*," or *Shekels*, we should find some information on the subject. But this treatise, being devoted to the consideration of the laws relating to the payment of the half-shekel for the Temple, is of course useless for our purpose.

Some references are given to the works of Raabi and Maimonides (contemporary writers of the 12th century) for information relative to shekels and the forms of Hebrew letters in ancient times; but the most important Rabbinical quotation given by Bayer is that from *Ramban*, i. e. *Rabbi-Moses Bar-Nachman*, who lived about the commencement of the 13th century. He describes a shekel which he had seen, and of which the *Cuthæans* read the inscription with ease. The explanation which they gave of the inscription was, on one side: *Shekel hu-Shekalim*, "the shekel of shekels," and on the other "Jerusalem the Holy." The former was doubtless a misinterpretation of the usual inscription "the shekel of Israel;" but the latter corresponds with the inscription on our shekels (Bayer, *De Numis.* p. 11). In the 16th century R. Azarias de Rossi states that R. Moses Basula had arranged a Cuthæan, i. e. Samaritan, alphabet from coins, and R. Moses Alaskar (of whom little is known) is quoted by Bayer as having read in some Samaritan coins, "in such a year of the consolation of Israel, in such a year of such a king." And the same R. Azarias de Rossi (or de Aduminu, as he is called by Bartolocci, *Bibl. Rabb.* vol. iv. p.

---

a • Against this theory respecting the site of "the city of David," see under JERUSALEM, § iv., near the end (Amer. ed.). S. W.

b The character nearly resembles that of Samaritan MSS., although it is not quite identical with it. The Hebrew and Samaritan alphabets appear to be divergent representatives of some older form, as may be inferred from several of the letters. Thus the *Beth* and several other letters are evidently identical in their origin. And the ש (*Shin*) of the Hebrew alphabet is the same as that of the Samaritan; for if we make the two middle strokes of the Samaritan letter coalesce, it takes the Hebrew form.

Digitized by Google

58), in his מאור עינים, "The Light of the Eyes," (not *Fons Oculorum*, as Bayer translates it, which would require מעין, not מאור), discusses the Transfluvial or Samaritan letters, and describes *a shekel of Israel* which he had seen. But the most important passage of all is that in which this writer quotes the description of a shekel seen by Ramban at St. Jean d'Acre, A. D. 1210. He gives inscriptions as above, "the Shekel of Shekels," and "Jerusalem the Holy;" but he also determines the weight, which he makes about *half an ounce*.

We find, therefore, that in early times shekels were known to the Jewish Rabbis with Samaritan inscriptions, corresponding with those now found (except in one point, which is probably an error), and corresponding with them in weight. These are important considerations in tracing the history of this coinage, and we pass on now to the earliest mention of these shekels by Christian writers. We believe that W. Postell is the first Christian writer who saw and described a shekel. He was a Parisian traveller who visited Jerusalem early in the 16th century. In a curious work published by him in 1538, entitled *Alphabetum Duodecim Linguarum*, the following passage occurs. After stating that the Samaritan alphabet was the original form of the Hebrew, he proceeds thus: —

"I draw this inference from silver coins of great antiquity, which I found among the Jews. They set such store by them that I could not get one of them (not otherwise worth a quincunx) for two gold pieces. The Jews say they are of the *time of Solomon*, and they added that, hating the Samaritans as they do, worse than dogs, and never speaking to them, nothing endears these coins so much to them as the consideration that these characters were once in their common usage, nature, as it were, yearning after the things of old. They say that at Jerusalem, now called *Chus* or *Chussembarich*, in the masonry and in the deepest part of the ruins, these coins are dug up daily." [a]

Postell gives a very bad wood-cut of one of these shekels, but the inscription is correct. He was unable to explain the letters over the vase, which soon became the subject of a discussion among the learned men of Europe, which lasted for nearly two centuries. Their attempts to explain them are enumerated by Bayer in his Treatise *De Numis Hebræo-Samaritanis*, which may be considered as the first work which placed the explanation of these coins on a satisfactory basis. But it would obviously be useless here to record so many unsuccessful guesses as Bayer enumerates. The work of Bayer, although some of the authors nearly solved the problem, called forth an antagonist in Professor Tychsen of Rostock, a learned Orientalist of that period. Several publications passed between them which it is unnecessary to enumerate, as Tychsen gave a summary of his objections, in a small pamphlet, entitled O. G. Tychsen, *De Numis Hebraicis Diatribe, qua simul ad Nuperas ill. F. P. Bayerii Objectiones respondetur* (Rostochii, 1791). His first position is — That either (1) all the coins, whether with Hebrew or Samaritan inscriptions, are false, or (2) if any are genuine, they belong to Barcoceba — p. 6. This he modifies slightly in a subsequent part of the treatise, pp. 52, 53, where he states it to be his conclusion (1) that the Jews had no coined money before the time of our Saviour; (2) that during the rebellion of *Barcoceba* (or *Barcoziba*), Samaritan money was coined either by the Samaritans to please the Jews, or by the Jews to please the Samaritans, and that the Samaritan letters were used in order to make the coins desirable as amulets! and (3) that the coins attributed to Simon Maccabæus belong to this period. Tychsen has quoted some curious passages,[b] but his arguments are wholly untenable. In the first place, no *numismatist* can doubt the genuineness of the shekels attributed to Simon Maccabæus, or believe that they belong to the same epoch as the coins of Barcoceba. But as Tychsen never saw a shekel, he was not a competent judge. There is another consideration, which, if further demonstration were needed, would supply a very strong argument. These coins were first made known to Europe through Postell, who does not appear to have been aware of the description given of them in Rabbinical writers. The correspondence of the newly-found coins with the earlier description is almost demonstrative. But they bear such undoubted marks of genuineness, that no judge of ancient coins could doubt them for a moment. On the contrary, to a practical eye, those with *Hebrew* inscriptions bear undoubted marks of spuriousness.[c]

Among the symbols found on this series of coins is one which is considered to represent that which was called *Lulab* by the Jews. This term was applied (see Maimon. on the section of the Mishna called *Rosh Hashanah*, or *Commencement of the Year*, ch. vii. 1, and the Mishna itself in *Succah*, סוכה, or *Booths*, ch. ii. 1, both of which passages are quoted by Bayer, *De Num.* p. 129) to the branches of the three trees mentioned in Lev. xxiii. 40, which are thought to be the Palm, the Myrtle, and the Willow. These, which were to be carried by the Israelites at the Feast of Tabernacles, were usually accompanied by the fruit of the Citron, which is also found in this representation. Sometimes two of these *Lulabs* are found together. At least such is the explanation given by some authorities of the symbols called in the article MONEY by

---

[a] Postell appears to have arranged his Samaritan alphabet from these coins.

[b] He quotes, *e. g.*, the following passage from the Jerusalem Talmud: כנון (שמרי) מטבע שמרד בן כוזיבא אינו מחלך (מדלל); "Revolution (Samaritan) money, like that of Ben Cosiba, does not defile." The meaning of this is not very obvious, nor does Tychsen's explanation appear quite satisfactory. He adds, "does not defile, if used as an amulet." We should rather inquire whether the expression may not have some relation to that of "defiling the hands," as applied to the canonical books of the O. T. See Ginsburg, *Commentary on the Song of Songs*, p. 8. The word for polluting is different, but the expressions may be analogous. But, on the other hand, these coins are often perforated, which gives countenance to the notion that they were used as amulets. The passage is from the division of the Jerusalem Talmud entitled מעשר שני, *Maaser Sheni*, or "The Second Tithe."

[c] The statement here made will not be disputed by any practical numismatist. It is made on the authority of the late Mr. T. Burgon, of the British Museum, whose knowledge and skill in these questions was known throughout Europe.

Digitized by Google

the name of *Sheaves*. The subject is involved in much difficulty and obscurity, and we speak therefore with some hesitation and diffidence, especially as experienced numismatists differ in their explanations. This explanation is, however, adopted by Bayer (*De Num.* pp. 128, 219, &c.), and by Cavedoni (*Bibl. Num.* pp. 31, 32 of the German translation, who adds references to 1 Macc. iv. 59; John x. 22), as he considers that the *Lulab* was in use at the Feast of the Dedication on the 25th day of the 9th month as well as at that of Tabernacles. He also refers to 2 Macc. i. 18, x. 6, 7, where the celebration of the Feast of Tabernacles is described, and the branches carried by the worshippers are specified.

The symbol on the reverse of the shekels, representing a twig with three buds, appears to bear more resemblance to the buds of the pomegranate than to any other plant.

The following list is given by Cavedoni (p. 11 of the German translation) as an enumeration of *all* the coins which can be attributed with any certainty to Simon Maccabæus.

I. Shekels of three years, with the inscription *Shekel Israel* on the obverse with a vase, over which appears (1) an *Aleph*; (2) the letter *Shin* with a *Beth*; (3) the letter *Shin* with a *Gimel*.

R. On the reverse is the twig with three buds, and the inscription *Jerusalem Kedushah* or *Hakkedushah*.[a]

II. The same as the above, only half the weight, which is indicated by the word חצי, *chátsi*, "a half." These occur only in the first and *second* years.

The above are silver.

III. שנת ארבע חצי, *Shénath Arb'a Châtsi*. The fourth year — a half. A Citron between two *Lulabs*.

R. לגאלת ציון, *Legeullath Tsion*, "Of the Liberation of Zion." A palm-tree between two baskets of fruit.

IV. שנת ארבע רביע, *Shénath Arb'a, Rebi'a*. The fourth year — a fourth. Two *Lulabs*.

R. לגאלת ציון — as before. Citron-fruit.

V. שנת ארבע, *Shénath Arb'a*. The fourth year. *Lulab* between two citrons.

R. לגאלת ציון, *Legeullath Tsion*, as before.

The vase as on the shekel and half-shekel.

These are of copper.

The other coins which belong to this series have been sufficiently illustrated in the article MONEY.

In the course of 1862 a work of considerable importance was published at Breslau by Dr. M. A. Levy, entitled *Geschichte der Jüdischen Münzen*.[b] It appears likely to be useful in the elucidation of the questions relating to the Jewish coinage which have been touched upon in the present volume. There are one or two points on which it is desirable to state the views of the author, especially as he quotes coins which have only become known lately Some coins have been described in the *Revue Numismatique* (1860, p. 260 *seq.*), to which the name of Eleazar coins has been given. A coin was published some time ago by De Saulcy which is supposed by that author to be a counterfeit coin. It is scarcely legible, but it appears to contain the name Eleazar on one side, and that of Simon on the other. During the troubles which preceded the final destruction of Jerusalem, Eleazar (the son of Simon), who was a priest, and Simon Ben Giora, were at the head of large factions. It is suggested by Dr. Levy that money may have been struck which bore the names of both these leaders; but it seems scarcely probable, as they do not appear to have acted in concert. But a copper coin has been published in the *Revue Numismatique* which undoubtedly bears the inscription of "Eleazar the priest." Its types are —

I. A vase with one handle and the inscription אלעזר הכוהן, "Eleazer the priest," in Samaritan letters.

R. A bunch of grapes with the inscription שנרא דת לגאלת יש[ראל], "year one of the redemption of Israel."

Some silver coins also, first published by Reichardt, bear the same inscription on the obverse, under a palm-tree, but the letters run from left to right. The reverse bears the same type and inscription as the copper coins.

These coins are attributed, as well as some that bear the name of Simon or Simeon, to the period of this first rebellion, by Dr. Levy. It is, however, quite clear that *some* of the coins bearing similar inscriptions belong to the period of Bar-cocab's rebellion (or *Barcoceba's* as the name is often spelt) under Hadrian, because they are stamped upon denarii of Trajan, his predecessor. The work of Dr. Levy will be found very useful as collecting together notices of all these coins, and throwing out very useful suggestions as to their attribution; but we must still look to further researches and fresh collections of these coins for full satisfaction on many points.[c] The attribution of the shekels and half-shekels to Simon Maccabæus may be considered as well established, and several of the other coins described in the article MONEY offer no grounds for hesitation or doubt. But still this series is very much isolated from other classes of coins, and the nature of the work hardly corresponds in some cases with the periods to which we are constrained from the existing evidence to attribute the coins. We must therefore still look for further light from future inquiries. Drawings of shekels are given in the article MONEY. H. J. R.

• SHE'LACH. [SILOAH, THE POOL OF.]

SHE'LAH (שֶׁלַח [*petition*]: Σηλάμ, [Ση]λαν, Vat. Alex. in Num., Vat. 1 Chr. ii. 3; Comp.

[a] The spelling varies with the year. The shekel of the *first* year has only ירושלם קדושה; while those of the *second* and *third* years have the fuller form, ירושלים הקדושה. The ' of the Jerusalem is important as showing that both modes of spelling were in use at the same time.

[b] From the time of it's publication, it was not available for the article MONEY: but I am indebted to the author of that article for calling my attention to this book. I was, however, unable to procure it until the article SHEKEL was in type. H. J. R.

[c] The passage from the Jerusalem Talmud, quoted in a former note, is considered by Dr. Levy (p. 127) and a different explanation given. The word translated by Tychsen "to pollute," is translated by him "*to pay*" or "*redeem* the tithe," which seems better

in Chr., Σηλώ:] *Sela*). 1. The youngest son of Judah by the daughter of Shuah the Canaanite, and ancestor of the family of the SHELANITES (Gen. xxxviii. 5, 11, 14, 26, xlvi. 12; Num. xxvi. 20; 1 Chr. ii. 3, iv. 21). Some of his descendants are enumerated in a remarkable passage, 1 Chr. iv. 21–23.

2. (שֵׁלָח: Σαλά: *Sala*.) The proper form of the name of SALAH the son of Arphaxad (1 Chr. i. 18, 24).

**SHE'LANITES, THE** (הַשֵּׁלָנִי [patr., see above]: ὁ Σηλωνί [Vat. -νε]: *Selanita*). The descendants of SHELAH 1 (Num. xxvi. 20).

**SHELEMI'AH** (שֶׁלֶמְיָה [*whom Jehovah repays*]: Σελεμία; Alex. Σελεμιας; [FA. Σελεμεια:] *Salmias*). 1. One of the sons of Bani who had married a foreign wife in the time of Ezra (Ezr. x. 39). Called SELEMIAS in 1 Esdr. ix. 34.

2. ([Gen.] Σελεμία; Alex. Σεεμια; [Vat. Τελεμια; FA. Τελεμιας:] *Selemia*.) The father of Hananiah (Neh. iii. 30), who assisted in restoring the wall of Jerusalem. If this Hananiah be the same as is mentioned in Neh. iii. 8, Shelemiah was one of the priests who made the sacred perfumes and incense.

3. [Gen. Σελεμία; Vat. Βλεμια; FA. Ιελεμια: Acc. *Selemiam*.] A priest in the time of Nehemiah, who was made one of the treasurers over the treasuries of the Levitical tithes (Neh. xiii. 13).

4. [Σελεμίας.] The father of Jehucal, or Jucal, in the time of Zedekiah (Jer. xxxvii. 3).

5. The father of Irijah, the captain of the ward who arrested Jeremiah (Jer. xxxvii. 13). In Jer. xxxviii. 1, his name appears in the lengthened form, like the following.

6. (שֶׁלֶמְיָהוּ: Σελεμία; [Vat. Σαλαμεια.]) The same as MESHELEMIAH and SHALLUM 8 (1 Chr. xxvi. 14).

7. ([Σελεμία, Alex. -μιας, FA. -μεια:] *Selemiâ*.) Another of the sons of Bani who had married a foreign wife in the time of Ezra (Ezr. x. 41).

8. (Σελεμίας; Alex. Σαλαμιας: *Selemia* [or -*as*].) Ancestor of Jehudi in the time of Jehoiakim (Jer. xxxvi. 14).

9. (Om. in LXX.) Son of Abdeel; one of those who received the orders of Jehoiakim to take Baruch and Jeremiah (Jer. xxxvi. 26).

**SHE'LEPH** (שֶׁלֶף [*drawing out, plucking*]: [In Gen., Rom. Σαλέθ, in Chr., omits, with Vat.;] Alex. Σαλεφ [in both]: *Saleph*), Gen. x. 26; 1 Chr. i. 20. The second in order of the sons of Joktan. The tribe which sprang from him has been satisfactorily identified, both in modern and classical times; as well as the district of the Yemen named after him. It has been shown in other articles [ARABIA; JOKTAN, etc.] that the evidence of Joktan's colonization of Southern Arabia is indisputably proved, and that it has received the assent of critics. Sheleph is found where we should expect to meet with him, in the district (*Mikláf*, as the ancient divisions of the Yemen are called by the Arabs) of *Sulaf* (سلف, *Marásid*, s. v.), which appears to be the same as Niebuhr's Sälfie (*Descr.* p. 215), written in his map Selfia. He gives the Arabic سلفية, with the vowels probably Sulafeeyah. Niebuhr says of it, "grande étendue de pays gouvernée par sept *Schechs*:" it is situate in N. lat. 14° 30′, and about 60 miles nearly south of San'à.

Besides this geographical trace of Sheleph, we have the tribe of Shelif or Shulaf, of which the first notice appeared in the *Zeitschrift d. Deutschen Morgenländischen Gesellschaft*, xi. 153, by Dr. Osiander, and to which we are indebted for the following information. Yákoot in the *Moojam*, s. v., says, "Es-Selif or Es-Sulaf they are two ancient tribes of the tribes of Yemen; Hishám Ibn-Mohammed says they are the children of Yuktán (Joktan); and Yuktán was the son of Eber the son of Salah the son of Arphaxad the son of Shem the son of Noah . . . . And a district in El-Yemen is named after the Sulaf." El-Kalkasander (in the British Museum library) says, "El-Sulaf, called also Beni-s-Silfán, a tribe of the descendants of Kahtán (Joktan). . . . The name of their father has remained with them, and they are called Es-Sulaf: they are children of Es-Sulaf son of Yuktán who is Kahtán. . . . Es-Sulaf originally signifies one of the little ones of the partridge, and Es-Silfan is its plural: the tribe was named after that on account of translation." Yákoot also says (s. v. *Muntábik*) that El-Muntabik was an idol belonging to Es-Sulaf. Finally, according to the *Kámoos* (and the *Lubb-el-Lubab*, cited in the *Marásid*, s. v.), Sulaf was a branch-tribe of Dhu-l-Kiláa: [a Himyerite family or tribe (Caussin, *Essai* i. 113), not to be confounded with the later king or Tubba of that name.]

This identification is conclusively satisfactory, especially when we recollect that Hazarmaveth (Hadramawt), Sheba (Seba), and other Joktanite names are in the immediate neighborhood. It is strengthened, if further evidence were required, by the classical mention of the Σαλαηνοί, Salapeni, also written Ἀλαηνοί, Alapeni (Ptol. vi. 7). Bochart puts forward this people, with rare brevity. The more recent researches in Arabic MSS. have, as we have shown, confirmed in this instance his theory; for we do not lay much stress on the point that Ptolemy's Salapeni are placed by him in N. lat. 22°. E. S. P.

**SHE'LESH** (שֶׁלֶשׁ [*triad*, Ges.]: Σελλής [Vat. Ζεμη:] *Selles*). One of the sons of Helem the brother of Shamer (1 Chr. vii. 35).

**SHEL'OMI** (שְׁלֹמִי [*pacific*]: Σελεμί [Vat. -μει]: *Salomi*). Father of Ahihud, the prince of the tribe of Asher (Num. xxxiv. 27).

**SHEL'OMITH** (שְׁלוֹמִית [*love of peace*]: Σαλωμεlθ: *Salomith*). 1. The daughter of Dibri of the tribe of Dan (Lev. xxiv. 11). She had married an Egyptian, and their son was stoned for blasphemy.

2. (Σαλωμεθ, [Vat. -θε; Comp. Σαλωμιθ:] *Salomith*.) The daughter of Zerubbabel (1 Chr. iii. 19).

3. (Σαλωμώθ; Alex. Σαλουμωθ.) Chief of the Izharites, one of the four families of the sons of Kohath (1 Chr. xxiii. 18). He is called SHELOMOTH in 1 Chr. xxiv. 22.

4. (שְׁלֹמוֹת; *Keri* שְׁלֹמִית in 1 Chr. xxvi. 25; שְׁלֹמוֹת in 1 Chr. xxvi. 26; שְׁלֹמִית in 1 Chr. xxvi. 28: [Σαλωμώθ:] *Selemith*.) A descendant of Eliezer the son of Moses, who with his

Digitized by Google

brethren had charge of the treasures dedicated for the Temple in the reign of David.

5. (שְׁלֹמוֹת; *Keri* שְׁלֹמִית: Σαλωμίθ; [Vat. Αλωθειμ;] Alex. Σαλωμειθ: *Salomith*.) A Gershonite, son of Shimei (1 Chr. xxiii. 9). "Shimei" is probably a mistake, as Shelomith and his brothers are afterwards described as chief of the fathers of Laadan, who was the brother of Shimei, and the sons of Shimei are then enumerated.

6. (שְׁלֹמִית: Σελιμούθ [Vat. -λει]; Alex. Σαλειμουθ: *Selomith*.) According to the present text, the sons of Shelomith, with the son of Josiphiah at their head, returned from Babylon with Ezra (Ezr. viii. 10). There appears, however, to be an omission, which may be supplied from the LXX., and the true reading is probably, "Of the sons of Bani, Shelomith the son of Josiphiah." See also 1 Esdr. viii. 36, where he is called "ASSALIMOTH son of Josaphias."

**SHEL'OMOTH** (שְׁלֹמוֹת [*love of peace*]: Σαλωμώθ: *Salemoth*). The same as SHELOMITH 3 (1 Chr. xxiv. 22).

**SHELU'MIEL** (שְׁלֻמִיאֵל [*friend of God*]: Σαλαμιήλ: *Salamiel*). The son of Zurishaddai, and prince of the tribe of Simeon at the time of the Exodus. He had 59,300 men under him (Num. i. 6, ii. 12, vii. 36, 41, x. 19). In Judith (viii. 1) he is called SAMAEL.

**SHEM** (שֵׁם [*name, sign*]: Σήμ: *Sem*). The eldest son of Noah, born (Gen. v. 32) when his father had attained the age of 500 years. He was 98 years old, married, and childless, at the time of the Flood. After it, he, with his father, brothers, sisters-in-law, and wife, received the blessing of God (ix. 1), and entered into the covenant. Two years afterwards he became the father of Arphaxad (xi. 10), and other children were born to him subsequently. With the help of his brother Japheth, he covered the nakedness of their father, which Canaan and Ham did not care to hide. In the prophecy of Noah which is connected with this incident (ix. 25–27), the first blessing falls on Shem. He died at the age of 600 years.

Assuming that the years ascribed to the patriarchs in the present copies of the Hebrew Bible are correct, it appears that Methuselah, who in his first 243 years was contemporary with Adam, had still nearly 100 years of his long life to run after Shem was born. And when Shem died, Abraham was 148 years old, and Isaac had been 9 years married. There are, therefore, but two links — Methuselah and Shem — between Adam and Isaac. So that the early records of the Creation and the Fall of Man, which came down to Isaac, would challenge (apart from their inspiration) the same confidence which is readily yielded to a tale that reaches the hearer through two well-known persons between himself and the original chief actor in the events related.

There is no chronological improbability in that ancient Jewish tradition which brings Shem and Abraham into personal conference. [MELCHIZEDEK.]

A mistake in translating x. 21, which is admitted into the Septuagint, and is followed by the A. V. and Luther, has suggested the supposition that Shem was younger than Japheth (see A. Pfeifferi *Opera*, p. 30). There can be, however, no doubt (see Rosenmüller, *in loc.*, with whom Gesenius, *Thesaurus*, p. 1433, seems to agree) that the translation ought to be, according to grammatical rule "the elder brother of Japheth." In the six places (v. 32, vi. 10, vii. 13, ix. 18, x. 1; 1 Chr. i. 4, where the three sons of Noah are named together, precedence is uniformly assigned to Shem. In ch. x. the descendants of Ham and Japheth are enumerated first, possibly because the sacred historian, regarding the Shemitic people as his proper subject, took the earliest opportunity to disencumber his narrative of a digression. The verse v. 32 compared with xi. 10 may be fairly understood to mean that the three sons of Noah were born after their father had attained the age of 500 years; but it cannot be reasonably inferred from thence either that Shem was the second son, or that they were all born in one year.

The portion of the earth occupied by the descendants of Shem (x. 21–31) intersects the portions of Japheth and Ham, and stretches in an uninterrupted line from the Mediterranean Sea to the Indian Ocean. Beginning at its northwestern extremity with Lydia (according to all ancient authorities, though doubted by Michaelis; see Gesen. *Thes.* p. 745), it includes Syria (Aram), Chaldæa (Arphaxad), parts of Assyria (Asshur), of Persia (Elam), and of the Arabian Peninsula (Joktan). The various questions connected with the dispersion of the Shemitic people are discussed in the article SHEMITIC LANGUAGES.

The servitude of Canaan under Shem, predicted by Noah (ix. 26), was fulfilled primarily in the subjugation of the people of Palestine (Josh. xxiii. 4, and 2 Chr. viii. 7, 8). It is doubtful whether in verse 27 God or Japheth is mentioned as the dweller in the tents of Shem: in the former sense the verse may refer to the special presence of God with the Jews, and to the descent of Christ from them; or, in the latter sense, to the occupation of Palestine and adjacent countries by the Romans, and (spiritually understood) to the accession of the Gentiles to the Church of God (Eph. iii. 6). See A. Pfeifferi *Opera*, p. 40; Newton, *On the Prophecies*, Diss. i. W. T. B.

**SHE'MA** (שְׁמַע [*hearing, rumor*]: [in Josh.] Σαλμάα; Alex. Σαμαα; [in 1 Chr., Rom. Σαμαά, Vat. Alex. Σεμαα:] *Same*). One of the towns of Judah. It lay in the region of the south, and is named between AMAM and MOLADAH (Josh. xv. 26). In the list of the towns of Simeon selected from those in the south of Judah, Sheba takes the place of Shema, probably by an error of transcription or a change of pronunciation. The genealogical lists of 1 Chr. (ii. 43, 44) inform us that Shema originally proceeded from Hebron, and in its turn colonized Maon. G.

**SHE'MA** (שְׁמַע [*rumor*]: Σαμά: *Samma*).

1. A Reubenite, ancestor of Bela (1 Chr. v. 8).

2. (*Sama.*) Son of Elpaal, and one of the heads of the fathers of the inhabitants of Ajalon who drove out the inhabitants of Gath (1 Chr. viii. 13). Probably the same as SHIMHI.

3. (Σαμαΐας: *Semeia.*) One of those who stood at Ezra's right hand when he read the Law to the people (Neh. viii. 4). Called SAMMUS, 1 Esdr. ix. 43.

**SHEM'AAH** (שְׁמַעָה [fem., see above]: Ἀσμά: [Vat.] FA. Αμα; [Alex. Σαμαα:] *Samaa*). A Benjamite of Gibeah, and father of Ahiezer and Joash, two warriors of their tribe who joined David at Ziklag (1 Chr. xii. 3). His name is written

Digitized by Google

with the article, and is properly "Hasshemaah." The margin of A. V. gives "Hasmaah"

**SHEMAʿIAH** [3 syl.] (שְׁמַעְיָה [*Jehovah hears*]: Σαμαΐας; [Vat. in 1 Chr. xii., Σαμμαιας:] *Semeïas*). 1. A prophet in the reign of Rehoboam. When the king had assembled 180,000 men of Benjamin and Judah to reconquer the northern kingdom after its revolt, Shemaiah was commissioned to charge them to return to their homes, and not to war against their brethren (1 K. xii. 22; 2 Chr. xi. 2). His second and last appearance upon the stage was upon the occasion of the invasion of Judah and siege of Jerusalem by Shishak king of Egypt. His message was then one of comfort, to assure the princes of Judah that the punishment of their idolatry should not come by the hand of Shishak (2 Chr. xii. 5, 7). This event is in the order of narrative subsequent to the first, but from some circumstances it would seem to have occurred before the disruption of the two kingdoms. Compare xii. 1, where the people of Rehoboam are called "Israel," and xii. 5, 6, where the princes are called indifferently "of Judah" and "of Israel." He wrote a chronicle containing the events of Rehoboam's reign (2 Chr. xii. 15). In 2 Chr. xi. 2 his name is given in the lengthened form שְׁמַעְיָהוּ.

2. (Σαμαΐα; [in Neh., FA. Σεμεια:] *Semeïa, Semaia.*) The son of Shechaniah, among the descendants of Zerubbabel (1 Chr. iii. 22). He was keeper of the east gate of the city, and assisted Nehemiah in restoring the wall (Neh. iii. 29). Lord A. Hervey (*Geneal.* p. 107) proposes to omit the words at the beginning of 1 Chr. iii. 22 as spurious, and to consider Shemaiah identical with SHIMEI 5, the brother of Zerubbabel.

3. (Σαμαΐας; [Vat. Συμεων:] *Samaïa.*) Ancestor of Ziza, a prince of the tribe of Simeon (1 Chr. iv. 37). Perhaps the same as SHIMEI 6.

4. (Σεμεΐ; [Vat. Σεμεει; Alex. Σεμειν:] *Samia.*) Son of Joel a Reubenite; perhaps the same as SHEMA (1 Chr. v. 4). See JOEL 5.

5. (Σαμαΐα; *Semeïa.*) Son of Hasshub, a Merarite Levite who lived in Jerusalem after the Captivity (1 Chr. ix. 14; Neh. xi. 15), and had oversight of the outward business of the house of God.

6. (Σαμία; [Vat. Σαμεια; Alex. Σαμιας: *Semeia.*]) Father of Obadiah, or Abda, a Levite who returned to Jerusalem after the Captivity (1 Chr. x. 16). He is elsewhere called SHAMMUA (Neh. xi. 17).

7. (Σεμεΐ, Σεμαία; [Vat. Σαμαιας; FA. Σαμεας, Σαμαιας;] Alex. Ομαΐα, Σεμεια: *Semeïas.*) Son of Elizaphan, and chief of his house in the reign of David (1 Chr. xv. 8, 11). He took part in the ceremonial with which the king brought the Ark from the house of Obed-edom.

8. (Σαμαΐας; Alex. Σαμμαιας: [*Semeïas.*]) A Levite, son of Nethaneel, and also a scribe in the time of David. He registered the divisions of the priests by lot into twenty-four orders (1 Chr. xxiv. 6).

9. (Σαμαΐας; [Rom. Vat. ver. 7, Σαμαΐ;] Alex. Σαμεΐας: [*Semeïas, Semei.*]) The eldest son of Obed-edom the Gittite. He and his brethren and his sons were gate-keepers of the Temple (1 Chr. xxvi. 4, 6, 7).

10. ([Σαμαΐας;] Alex. Σαμεΐας: [*Semeïas.*]) A descendant of Jeduthun the singer who lived in the reign of Hezekiah (2 Chr. xxix. 14). He assisted in the purification of the Temple and the reformation of the service, and with Uzziel represented his family on that occasion.

11. (Σαμαΐα; Alex. Σαμαεια: *Samaïas.*) One of the sons of Adonikam who returned in the second caravan with Ezra (Ezr. viii. 13). Called SAMAIAS in 1 Esdr. viii. 39.

12. (Σεμεΐας; [Vat. Σαμαιας:] *Semeïas.*) One of the "heads" whom Ezra sent for to his camp by the river of Ahava, for the purpose of obtaining Levites and ministers for the Temple from "the place Casiphia" (Ezr. viii. 16). Called MASMAN in 1 Esdr. viii. 43.

13. (Σαμαΐα: *Semeïa.*) A priest of the family of Harim, who put away his foreign wife at Ezra's bidding (Ezr. x. 21). He is called SAMEIUS in 1 Esdr. ix. 21.

14. (Σαμαΐας; [Vat. Σαμαια; FA. Σεμεα:] *Semeïas.*) A layman of Israel, son of another Harim, who also had married a foreigner (Ezr. x 31). Called SABBEUS in 1 Esdr. ix. 32.

15. (Σεμεΐ: [Vat. FA. Σεμεει: *Semeïus.*]) Son of Delaiah the son of Mehetabeel, a prophet in the time of Nehemiah, who was bribed by Sanballat and his confederates to frighten the Jews from the r task of rebuilding the wall, and to put Nehemiah in fear (Neh. vi. 10). In his assumed terror he appears to have shut up his house and to have proposed that all should retire into the Temple and close the doors.

16. (Σαμαΐα, Σεμΐας; Alex. [rather FA.$^3$] Σεμεΐας in Neh. xii. [6, 18; Vat. Alex. FA.$^1$ omit, and so Rom. ver. 6; in Neh. xii. 35, Σαμαΐα:] *Semeïa*, [*Samaia* or *-as.*]) The head of a priestly house who signed the covenant with Nehemiah (Neh. x. 8). His family went up with Zerubbabel, and were represented in the time of Joiakim by Jehonathan (Neh. xii. 6, 18). Probably the same who is mentioned again in Neh. xii. 35.

17. (Σαμαΐας; [Vat. Alex. Σαραια;] Alex. Σαμμαΐας: [*Semeïa.*]) One of the princes of Judah who went in procession with Ezra, in the right hand of the two thanksgiving companies who celebrated the solemn dedication of the wall of Jerusalem (Neh. xii. 34).

18. (Σαμαΐα: [*Semeïa.*]) One of the choir who took part in the procession with which the dedication of the new wall of Jerusalem by Ezra was accompanied (Neh. xii. 36). He appears to have been a Gershonite Levite, and descendant of Asaph, for reasons which are given under MATTANIAH 2.

19. (Om. in Vat. MS. [also Rom. Alex. FA.$^1$]; Alex. [rather FA.$^3$] Σεμεΐας.) A priest who blew a trumpet on the same occasion (Neh. xii. 42).

20. (Σαμαΐας; [FA. Σαμεας:] *Semeïas.*) Shemaiah the Nehelamite, a false prophet in the time of Jeremiah. He prophesied to the people of the Captivity in the name of Jehovah, and attempted to counteract the influence of Jeremiah's advice that they should settle quietly in the land of their exile, build houses, plant vineyards, and wait patiently for the period of their return at the end of seventy years. His animosity to Jeremiah exhibited itself in the more active form of a letter to the high-priest Zephaniah, urging him to exercise the functions of his office, and lay the prophet in prison and in the stocks. The letter was read by Zephaniah to Jeremiah, who instantly pronounced the message of doom against Shemaiah for his presumption, that he should have none of his family to dwell among the people, and that himself should not live to see their return from captivity (Jer. xxix. 24–32). His

Digitized by Google

name is written in ver. 24 in the lengthened form שְׁמַעְיָהוּ.

21. (Σαμαίας; [Vat. Σαμοναs; Alex. Σαμουίας.]) A Levite in the third year of Jehoshaphat, who was sent with other Levites, accompanied by two priests and some of the princes of Judah, to teach the people the book of the Law (2 Chr. xvii. 8).

22. (Σεμεΐ; [Vat. Σεμειν:] *Semeias.*) One of the Levites in the reign of Hezekiah, who were placed in the cities of the priests to distribute the tithes among their brethren (2 Chr. xxxi. 15).

23. (Σαμαίας.) A Levite in the reign of Josiah, who assisted at the solemn passover (2 Chr. xxxv. 9). He is called the brother of Conaniah, and in 2 Chr. xxxi. 12 we find Cononiah and Shimei his brother mentioned in the reign of Hezekiah as chief Levites; but if Cononiah and Conaniah are the names of persons and not of families, they cannot be identical, nor can Shemaiah be the same as Shimei, who lived at least eighty-five years before him.

24. ([FA. Μασεας:] *Semei.*) The father of Urijah of Kirjath-jearim (Jer. xxvi. 20).

25. (Σελεμίας; FA. Σεδεκιας; [Comp. Σεμεΐας:] *Semeias.*) The father of Delaiah (Jer. xxxvi. 12). W. A. W.

**SHEMARI'AH** (שְׁמַרְיָהוּ [*whom Jehovah keeps*]: Σαμαρία; Alex. [FA.] Σαμαρια: *Samaria*). 1. One of the Benjamite warriors, "helpers of the battle," who came to David at Ziklag (1 Chr. xii. 5).

2. (שְׁמַרְיָה: Σαμαρία [Vat. -ρεια]: *Samaria.*) One of the family of Harim, a layman of Israel, who put away his foreign wife in the time of Ezra (Ezr. x. 32).

3. ([Vat. FA. Σαμαρεια; Alex. Σαμαρειας:] *Semerin.*) One of the family of Bani, under the same circumstances as the preceding (Ezr. x. 41).

**SHEME'BER** (שְׁמֵאֶבֶר [*lofty flight*, Ges.]: Σεμεβήρ: *Semeber*). King of Zeboïm, and ally of the king of Sodom when he was attacked by the northeastern invaders under Chedorlaomer (Gen. xiv. 2) The Sam. Text and Version give "Shemebel."

**SHE'MER** (שֶׁמֶר [*kept*, thence *lees of wine*]: Σεμήρ; [Vat. once Σαμηρ:] *Somer*). The owner of the hill on which the city of Samaria was built (1 K. xvi. 24), and after whom it was called *Shomeron* by its founder Omri, who bought the site for two silver talents. We should rather have expected that the name of the city would have been *Shimron*, from *Shemer*; for *Shomeron* would have been the name given after an owner *Shomer*. This latter form, which occurs 1 Chr. vii. 32, appears to be that adopted by the Vulgate and Syriac, who read *Somer* and *Shomir* respectively; but the Vat. MS. of the LXX. retains the present form "Shemer," and changes the name of the city to Σεμερών or Σεμηρών [so Rom., but Vat. Σαμηρων]. W. A. W.

**SHEMI'DA** (שְׁמִידָע [*fame of knowledge*]: Σεμιδά, Σεμιδιμ [Vat. -ρειμ]; Alex. Σεμιρας in Josh.: *Semida*). A son of Gilead, and ancestor of the family of the Shemidaites (Num. xxvi. 32; Josh. xvii. 2). Called SHEMIDAH in the [later editions of the] A. V. of 1 Chr. vii. 19.

**SHEMI'DAH** (שְׁמִידָע [see above]: Σεμιρά; [Vat. Σεμειρα:] *Semida*). The same as Shemida the son of Gilead (1 Chr. vii. 19). [The name is here spelled Shemida in A. V. ed. 1611. — A.]

**SHEMI'DAITES, THE** (הַשְּׁמִידָעִי [patr., above]: ὁ Σεμαερί [Vat. -ρει]: *Semidaïtæ*) The descendants of Shemida the son of Gilead (Num. xxvi. 32). They obtained their lot among the male children of Manasseh (Josh. xvii. 2).

**SHEMI'NITH** (הַשְּׁמִינִית [*the eighth*, see below]). The title of Ps. vi. contains a direction to the leader of the stringed instruments of the Temple choir concerning the manner in which the Psalm was to be sung. "To the chief Musician on Neginoth upon Sheminith," or "the eighth," as the margin of the A. V. has it. A similar direction is found in the title of Ps. xii. The LXX. in both passages renders ὑπὲρ τῆς ὀγδόης, and the Vulgate *pro octavâ*. The Geneva Version gives "upon the eighth tune." Referring to 1 Chr. xv. 21, we find certain Levites were appointed by David to play "with harps on the Sheminith," which the Vulgate renders as above, and the LXX. by ἀμασενίθ, which is merely a corruption of the Hebrew. The Geneva Version explains in the margin, "which was the eighth tune, over the which he that was the most excellent had charge." As we know nothing whatever of the music of the Hebrews, all conjectures as to the meaning of their musical terms are necessarily vague and contradictory. With respect to Sheminith, most Rabbinical writers, as Rashi and Aben Ezra, follow the Targum on the Psalms in regarding it as a harp with eight strings; but this has no foundation, and depends upon a misconstruction of 1 Chr. xv. 21. Gesenius (*Thes.* s. v. בצדר) says it denotes the *bass*, in opposition to Alamoth (1 Chr. xv. 20), which signifies the *treble*. But as the meaning of Alamoth itself is very obscure, we cannot make use of it for determining the meaning of a term which, though distinct from, is not necessarily contrasted with it. Others, with the author of *Shilte Haggibborim*, interpret "the *sheminith*" as the *octave*; but there is no evidence that the ancient Hebrews were acquainted with the octave as understood by ourselves. On comparing the manner in which the word occurs in the titles of the two psalms already mentioned, with the position of the terms Aijeleth Shahar, Gittith, Jonath-elem-rechokim, etc., in other psalms, which are generally regarded as indicating the melody to be employed by the singers, it seems most probable that Sheminith is of the same kind, and denotes a certain air known as the eighth, or a certain key in which the psalm was to be sung. Maurer (*Comm. in Ps.* vi.) regards Sheminith as an instrument of deep tone like the violoncello, while Alamoth he compares with the violin; and such also appears to be the view taken by Junius and Tremellius. It is impossible in such a case to do more than point to the most probable conjecture. W. A. W.

**SHEMIR'AMOTH** (שְׁמִירָמוֹת [*name most high*, Ges., *name of the height* = Jehovah, Fürst]: Σεμιραμώθ; Alex. Σιμιραμωθ, 1 Chr. xv. 18; [Vat.] FA. Σεμειραμωθ, 1 Chr. xv. 18; [Vat. Σαμειραμωθειθ, FA. Σεμιραμωθειθ, 1 Chr. xv.] 20; [Vat. Σαμαρειμωθ, FA.] Σαμαριμωθ, 1 Chr. xvi. 5: *Semiramoth*). 1. A Levite of the second degree, appointed to play with a psaltery "on Alamoth," in the choir formed by David. He was in the division which Asaph led with cymbals (1 Chr. xv. 18, 20, xvi. 5).

2. (Σεμιραμώθ; [Vat. Σαμειραμωθ.]) A Le

tte in the reign of Jehoshaphat, who was sent with others through the cities of Judah to teach the book of the Law to the people (2 Chr. xvii. 8).

SHEMITIC LANGUAGES and WRITING. INTRODUCTION, §§ 1–5. — 1. The expressions, "Shemitic family," and "Shemitic languages," are based, as is well known, on a reference to Gen. x. 21 ff [See SHEM.] Subsequently, the obvious inaccuracy of the expression has led to an attempt to substitute others, such as Western Asiatic, or Syro-Arabic — this last a happily chosen designation, as bringing at once before us the two geographical extremes of this family of languages. But the earlier, though incorrect one, has maintained its ground: and for purposes of convenience we shall continue to use it.[a]

2. It is impossible to lay down with accuracy the boundaries of the area occupied by the tribes employing so-called Shemitic dialects. Various disturbing causes led to fluctuations, especially (as on the northern side) in the neighborhood of restless *Aryan* tribes. For general purposes, the highlands of Armenia may be taken as the northern boundary — the river Tigris and the ranges beyond it as the eastern — and the Red Sea, the Levant, and certain portions of Asia Minor as the western. Within these limits lies the proper home of the Shemitic family, which has exercised so mighty an influence on the history of the world. The area named may seem small, in comparison with the wider regions occupied by the Aryan stock. But its geographical position in respect of so much of the old world — its two noble rivers, alike facilitating foreign and internal intercourse — the extent of seaboard and desert, presenting long lines of protection against foreign invasion — have proved eminently favorable to the undisturbed growth and development of this family of languages, as well as investing some branches (at certain periods of their history) with very considerable influence abroad.[b]

3. Varieties of the great Shemitic language-family are to be found in use in the following localities within the area named. In those ordinarily known as Syria, Mesopotamia, Babylonia, and Assyria, there prevailed Aramaic dialects of different kinds, *e. g.* Biblical Chaldaic — that of the Targums and of the Syriac versions of Scripture — to which may be added other varieties of the same stock — such as that of the Palmyrene inscriptions — and of different Sabian fragments. Along the Mediterranean seaboard, and among the tribes settled in Canaan, must be placed the home of the language of the canonical books of the Old Testament, among which were interspersed some relics of that of the Phœnicians. In the south, amid the seclusion of Arabia, was preserved the dialect destined at a subsequent period so widely to surpass its sisters in the extent of territory over which it is spoken. A variety, allied to this last, is found to have been domiciliated for a long time in Abyssinia.

In addition to the singular tenacity and exclusiveness of the Shemitic character, as tending to preserve unaltered the main features of their language, we may allow a good deal for the tolerably uniform climate of their geographical locations. But (as compared with variations from the parent stock in the Japhetian family), in the case of the Shemitic, the adherence to the original type is very remarkable. Turn where we will, from whatever causes springing, the same tenacity is discernible — whether we look to the simple pastoral tribes of the wilderness — the fierce and rapacious inhabitants of mountain regions — the craftsmen of cities, the tillers of the soil, or the traffickers in distant marts and havens.[c]

The following table is taken from Professor M. Müller's late volume *On the Science of Language* (p. 381) — a volume equally remarkable for research, fidelity, and graphic description: -

GENEALOGICAL TABLE OF THE SHEMITIC FAMILY OF LANGUAGES.

| *Living Languages.* | *Dead Languages.* | *Classics.* | |
|---|---|---|---|
| Dialects of Arabic | Ethiopic | Arabic, or Southern. | Shemitic Family. |
| Amharic | Himyaritic Inscriptions | | |
| The Jews | Biblical Hebrew | Hebraic, or Middle. | |
| | Samaritan Pentateuch | | |
| | Carthaginian-Phœnician Inscriptions | | |
| Neo-Syriac | Chaldee, Masora, Talmud, Targum, Biblical Chaldee | Aramaic, or Northern. | |
| | Syriac (Peshito, 2d cent. A. D.) | | |
| | Cuneiform Inscriptions of Babylon and Nineveh | | |

Few inquiries would be more interesting, were sufficiently trustworthy means at hand, than that into the *original* Shemitic dialect, and as to whether or not the Aramaic was — not only in the first instance, but more long and widely than we ordinarily suppose — the principal means of intercommunication among all tribes of Shemitic origin, with the exception perhaps of those of the Arabian peninsula. The historical books of the Old Testament show plainly, that between the occupation of Canaan and the victories of Nebuchadnezzar, many causes led to the extension of the Aramaic, to the restriction of pure Hebrew. But there is much that is probable in the notion held by more than one scholar, that the spoken dialect of the Shemitic tribes external to Arabia (in the earliest periods of their history) closely resembled, or was in fact a better variety of Aramaic. This notion is corroborated by the traces still discernible in the Scriptures of Aramaisms, where the language (as in poetical fragments) would seem to have been preserved in a form most nearly resembling its

[a] "La dénomination de sémitiques ne peut avoir l'inconvénient, du moment qu'on la prend comme une simple appellation conventionnelle et que l'on s'est expliqué sur ce qu'elle renferme de profondément exact" (Renan, *Hist. Gén. des Langues Sémitiques*, p. 2). English scholars have lately adopted, from the French, the form "Semitic;" but there is no reason why *we* should abandon the Hebrew sound because the French find the pronunciation difficult.

original one:[a] and also from the resemblances which may be detected between the Aramaic and the earliest monument of Arabic speech — the Himyaritic fragments.[b]

4. The history of the Shemitic people tells us of various movements undertaken by them, but supplies no remarkable instances of their *assimilating*. Though carrying with them their language, institutions, and habits, they are not found to have struck root, but remained strangers and exotics in several instances, passing away without traces of their occupancy. So late as the times of Augustine, a dialect, derived from the old Phœnician settlers, was spoken in some of the more remote districts of Roman Africa. But no traces remained of the power, or arts of the former lords of sea and land, from whom these fragments were inherited. Equally striking is the absence of results, from the occupation of a vast aggregate of countries by the victorious armies of Islam. The centuries since elapsed prove in the clearest manner, that the vocation of the Arab branch of the Shemitic family was not to leaven the nations whom their first onset laid prostrate. They brought nothing with them but their own stern, subjective, unsocial religion. They borrowed many intellectual treasures from the conquered nations, yet were these never fully engrafted upon the alien Shemitic nature, but remained, under the most favorable circumstances, only external adjuncts and ornaments. And the same inveterate isolation still characterizes tribes of the race, when on new soil.

5. The peculiar elements of the Shemitic character will be found to have exercised considerable influence on their literature. Indeed, accordance is seldom more close, than in the case of the Shemitic race (where not checked by external causes) between the generic type of thought, and its outward expression. Like other languages, this one is mainly resolvable into monosyllabic primitives. These, as far as they may be traced by research and analysis, carry us back to the early times, when the broad line of separation, to which we have been so long accustomed, was not yet drawn between the Japhetian and the Shemitic languages. Instances of this will be brought forward in the sequel, but subsequent researches have amply confirmed the substance of Halhed's prediction of the ultimate recognition of the affinities between Sanskrit (= the Indo-Germanic family) and Arabic (= the Shemitic) "in the main groundwork of language, in monosyllables, in the names of numbers, and the appellations of such things, as would be first discriminated on the immediate dawn of civilization."[c]

These monosyllabic primitives may still be traced in particles, and words least exposed to the ordinary causes of variation. But differences are observable in the principal parts of speech — the verb and the noun. Secondary notions, and those of relation, are grouped round the primary ones of meaning in a single word, susceptible of various internal changes according to the particular requirement. Hence, in the Shemitic family, the prominence of *formation*, and that mainly internal (or contained *within* the root form). By such instrumentality are expressed the differences between noun and verb, adjective and substantive. This mechanism, within certain limits, invests the Shemitic languages with considerable freshness and sharpness; but, as will be seen in the sequel, this language-family does not (for higher purposes) possess distinct powers of expression equal to those possessed by the Japhetian family. Another leading peculiarity of this branch of languages is the absence (save in the case of proper names) of compound words — to which the sister family is indebted for so much life and variety. In the Shemitic family — agglutination, not logical sequence — independent roots, not compound appropriate derivations from the same root, are used to express respectively a train of thought, or different modifications of a particular notion. Logical sequence is replaced by simple material sequence.

Both language-families are full of life; but the life of the Japhetian is organic — of the Shemitic, an aggregate of units. The one looks around to be taught, and pauses to gather up its lessons into form and shape: the other contains a lore within itself, and pours out its thoughts and fancies as they arise.[d]

### §§ 6–13. — Hebrew Language. — Period of Growth.

6. The Hebrew language is a branch of the so-called Shemitic family, extending over a large portion of Southwestern Asia. The development and culture of this latter will be found to have been considerably influenced by the situation or fortunes of its different districts. In the north (or Aram, under which designation are comprehended Syria, Mesopotamia, Babylonia), and under a climate partially cold and ungenial — in the close proximity of tribes of a different origin, not unfrequently masters by conquest — the Shemitic dialect became in places harsher, and its general character less pure and distinct. Towards the south, opposite causes contributed to maintain the language in its purity. In Arabia, preserved by many causes from foreign invasion, the language maintained more euphony and delicacy, and exhibited greater variety of words and construction. A reference to the map will serve to explain this — lying as did Judæa between Aram and Arabia, and chiefly inhabited by the Hebrew race, with the exception of Canaanite and Phœnician tribes. Of the language of these last few distinctive remains have hitherto been brought to light.[e] But its

a "Un autre fait, non moins digne de remarque, est l'analogie frappante qu'ont toutes ces irrégularités provinciales avec l'Araméen. Il semble que, même avant la captivité, le patois populaire se rapprochait beaucoup de cette langue, en sorte qu'il nous est maintenant impossible de séparer bien nettement, dans le style de certains écrits, ce qui appartient au dialecte populaire, ou au patois du royaume d'Israël, ou à l'influence des temps de la captivité." "Il est à remarquer, du reste, que les langues sémitiques diffèrent moins dans la bouche du peuple que dans les livres" (Renan, i. 141, 142, and also Fürst, *Lehrgeb.* §§ 3, 4, 8, 11).

e "The name of their country, עִבְרִית — the land of immigration, — points to the fact that the

general resemblance to that of the Terachite settlers is beyond all doubt, both in the case of the Hamite tribes, and of the Philistine tribes, another branch of the same stock.

Originally, the language of the Hebrews presented more affinities with the Aramaic, in accordance with their own family accounts, which bring the Patriarchs from the N. E., — more directly from northern Mesopotamia. In consequence of vicinity, as was to be anticipated, many features of resemblance to the Arabic may be traced; but subsequently, the Hebrew language will be found to have followed an independent course of growth and development.

7. Two questions, in direct connection with the early movements of the ancestors of the subsequent Hebrew nation, have been discussed with great earnestness by many writers — the first bearing on the causes which set the Terachite family in motion towards the south and west; the second, on the origin and language of the tribes in possession of Canaan at the arrival of Abraham.

In Gen. x. and xi. we are told of five sons of Shem — Elam, Asshur, Arphaxad, Lud, and Aram. The last of these (or rather the peoples descended from him) will be considered subsequently. The fourth has been supposed to be either the progenitor (or the collective appellation) of the tribes which originally occupied Canaan and the so-called Shemitic regions to the south. Of the remaining three, the tribes descended from Elam and called by his name were probably subjugated at an early period, for in Gen. xiv. mention is made of the headship of an anti-Terachite league being vested in the king of Elam, Chedorlaomer, whose name points to a Cushite origin. Whether Shemitic occupation was succeeded at once (in the case of Elam [a]) by Aryan, or whether a Cushite (Hamite) domination intervened, cannot now be decided. But in the case of the second, Asshur, there can be little doubt, on the showing of Scripture (Gen. x. 11), that his descendants were disturbed in their home by the advance of the clearly traceable Cushite stream of population, flowing upwards on a return course through Arabia, where plain marks are to be found of its presence.[b] When we bear in mind the strongly marked differences existing between the Shemitic and Cushite (= Hamite) races in habits and thought,[c] and the manifestation of God's wrath left on record, we can well understand an uneasiness and a desire of removal among the Shemitic population of the plains by the river. Scripture only tells us that, led in a way which they knew not, chosen Shemitic wanderers of the lineage of Arphaxad set forth on the journey fraught with such enduring consequences to the history of the world, as recorded in Scripture, in its second stage of progress. There is at least nothing unreasonable in the thought, that the movement of Terah from Ur of the Chaldees (if modern scholarship is right in the locality selected) was caused by Divine suggestion, acting on a mind ill at ease in the neighborhood of Cushite thought and habits. It may be that the active cause of the movement recorded in Gen. xi. 31 was a renewed manifestation of the One True God, the influences of which were to be stamped on all that was of Israel, and not least palpably on its language in its purity and proper development. The leading particulars of that memorable journey are preserved to us in Scripture, which is also distinct upon the fact, that the new comers and the earlier settlers in Canaan found no difficulty in conversing. Indeed, neither at the first entrance of Terachites, nor at the return of their descendants after their long sojourn in Egypt, does there appear to have been any difficulty in this respect in the case of any of the numerous tribes of either Shemitic or Hamitic origin of which mention is made in Scripture. But, as was to be expected, very great difference of opinion is to be found, and very much learned discussion has taken place, as to whether the Terachites adopted the language of the earlier settlers, or established their own in its place. The latter alternative is hardly probable, although for a long time, and among the earlier writers on Biblical subjects, it was maintained with great earnestness — Walton, for example, holding the advanced knowledge and civilization of the Terachite immigration in all important particulars. It may be doubted, with a writer of the present day,[d] whether this is a sound line of reasoning, and whether "this contrast between the inferiority of the chosen people in all secular advantages, and their preëminence in religious privileges," is not "an argument which cannot be too strongly insisted on by a Christian advocate." The whole history of the Jewish people anterior to the advent of Christ would seem to indicate that any great early amount of civilization, being built necessarily on closer intercourse with the surrounding peoples, would have tended to retard rather than promote the object for which that people was chosen. The probability is, that a great original similarity existing between the dialects of the actual possessors of the country in their various localities, and that of the immigrants, the latter were less likely to impart than to borrow from their more advanced neighbors.

On what grounds is the undoubted similarity of the dialect of the Terachites to that of the occupants at the time of their immigration, to be explained? Of the origin of its earliest occupants, known to us in the sacred records by the mysterious and boding names of Nephilim, Zamzummim, and the like, and of whose probable Titanic size traces have been brought to light by recent travellers, history records nothing certain. Some assert that no reliable traces of Shemitic language are to be found north of Mount Taurus, and claim for the early inhabitants of Asia Minor a Japhetian origin. Others affirm the descent of these early tribes from Lud, the fourth son of Shem, and their migration from "Lydia to Arabia Petræa and the southern borders of Palestine." [e] But these must

[1] Philistines did not reach the line of coast from the interior at all events" (*Quart. Rev.* lxxviii. 172).

[a] The word Elam is simply the pronunciation, according to the organs of Western Asia, of Iran = Airyana = Airjana. Renan, i. 41, on the authority of Burnouf and M. Müller; J. G. Müller, *R. E.* xiv. 223; Rawlinson, *Journal of Asiatic Society*, xv. 222.

have disappeared at an early period, no mention being made of them in Gen. x., and their remains being only alluded to in references to the tribes which, under a well-known designation, we find in occupation of Palestine on the return from Egypt.

8. Another view is that put forward by our countryman Rawlinson, and shared by other scholars. "Either from ancient monuments, or from tradition, or from the dialects now spoken by their descendants, we are authorized to infer that at some very remote period, before the rise of the Shemitic or Aryan nations, a great Scythic" (= Hamitic) "population must have overspread Europe, Asia, and Africa, speaking languages all more or less dissimilar in their vocabulary, but possessing in common certain organic characteristics of grammar and construction."[a]

And this statement would appear, in its leading features, to be historically sound. As was to be anticipated, both from its importance and from its extreme obscurity, few subjects connected with Biblical antiquities have been more warmly discussed than the origin of the Canaanitish occupants of Palestine. Looking to the authoritative records (Gen. ix. 18, x. 6, 15–20) there would seem to be no reason for doubt as to the Hamitic origin of these tribes.[b] Nor can the singular accordances discernible between the language of these Canaanitish (= Hamitic) occupants, and the Shemitic family be justly pleaded in bar of this view of the origin of the former. "If we examine the invaluable ethnography of the book of Genesis we shall find that, while Ham is the brother of Shem, and therefore a relationship between his descendants and the Shemitic nations fully recognized, the Hamites are described as those who previously occupied the different countries into which the Aramæan race afterwards forced their way. Thus Scripture (Gen. x. ff.) attributes to the race of Ham not only the aboriginal population of Canaan, with its wealthy and civilized communities on the coast, but also the mighty empires of Babylon and Nineveh, the rich kingdoms of Sheba and Havilah in Arabia Felix, and the wonderful realm of Egypt. There is every reason to believe — indeed in some cases the proof amounts to demonstration — that all these Hamitic nations spoke languages which differed only dialectically from those of the Syro-Arabic family."[c]

9. Connected with this subject of the relationship discernible among the early Noachidæ is that of the origin and extension of the art of writing among the Shemites, the branch with which we are at present concerned. Our limits preclude a discussion upon the many theories by which the student is still bewildered: the question would seem to be, in the case of the Terachite branch of the Shemitic stock, did they acquire the art of writing from the Phœnicians, or Egyptians, or Assyrians — or was it evolved from given elements among themselves?

But while the truth with respect to the origin of Shemitic writing is as yet involved in obscurity, there can be no doubt that an indelible influence was exercised by Egypt upon the Terachite branch in this particular. The language of Egypt cannot be considered as a bar to this theory, for, in the opinion of most who have studied the subject, the Egyptian language may claim an Asiatic, and indeed a Shemitic origin. Nor can the changes wrought be justly attributed to the Hyksos, instead of the Egyptians. These people, when scattered after their long sojourn, doubtless carried with them many traces and results of the superior culture of Egypt; but there is no evidence to show that they can be considered in any way as instructors of the Terachites. The claim, so long acquiesced in, of the Phœnicians in this respect, has been set aside on distinct grounds. What was the precise amount of cultivation, in respect of the art of writing, possessed by the Terachites at the immigration or at their removal to Egypt, we cannot now tell, — probably but limited, when estimated by their social position. But the Exodus found them possessed of that priceless treasure, the germ of the alphabet of the civilized world, built on a pure Shemitic basis, but modified by Egyptian culture. "There can be no doubt that the phonetic signs are subsequent to the objective and determinative hieroglyphics, and showing as they do a much higher power of abstraction, they must be considered as infinitely more valuable contributions to the art of writing. But the Egyptians have conferred a still greater boon on the world, if their hieroglyphics were to any extent the origin of the Shemitic, which has formed the basis of almost every known system of letters. The long continuance of a pictorial and figurative system of writing among the Egyptians, and their low, and after all, imperfect syllabarium, must be referred to the same source as their pictorial and figurative representation of their idea of the Deity; just as, on the contrary, the early adoption by the people of Israel of an alphabet properly so called, must be regarded as one among many proofs which they gave of their powers of abstraction, and consequently of their fitness for a more spiritual worship."[d]

10. Between the dialects of Aram and Arabia, that of the Terachites occupied a middle place — superior to the first, as being the language in which are preserved to us the inspired outpourings of so many great prophets and poets — wise, learned, and eloquent — and different from the second (which does not appear in history until a comparatively recent period) in its antique simplicity and majesty.

The dialect which we are now considering has been ordinarily designated as that of the Hebrews, rather than of the Israelites, apparently for the following reasons. The appellation Hebrew is of old standing, but has no reference to the history of the people, as connected with its glories or eminence, while that of Israel is bound up with its historical grandeur. The people is addressed as *Israel* by their

priests and prophets, on solemn occasions, while by foreigners they are designated as Hebrews (Gen. xl. 15), and indeed by some of their own early writers, where no point is raised in connection with their religion (Gen. xliii. 32; Ex. xxi. 2; 1 Sam. xiii. 3, 7, xiv. 21). It was long assumed that their designation (עִבְרִים = *oi περάται*) had reference to Eber, the ancestor of Abraham. More probably it should be regarded as designating all the Shemitic-speaking tribes, which had migrated to the south from the other side of the Euphrates; and in that case, might have been applied by the earlier inhabitants of Canaan. But in either case, the term "Hebrews" would comprise all the descendants of Abraham, and their language therefore should be designated as the Hebrew, in accordance with the more usual name of the people. "The language of Canaan" is used instead (Is. xix. 18), but in this passage the country of Canaan is contrasted with that of Egypt. The expression "the Jews' language" (Is. xxxvi. 11, 13) applies merely to the dialect of the kingdom of Judah, in all probability, more widely used after the fall of Samaria.

11. Many causes, all obvious and intelligible, combine to make difficult, if not impossible, any formal or detached account of the Hebrew language anterior to its assuming a written shape. But various reasons occur to render difficult, even within this latter period, such a reliable history of the Hebrew language as befits the exceeding interest of the subject. In the first place, very little has come down to us, of what appears to have been an extensive and diversified literature. Where the facts requisite for a judgment are so limited, any attempt of the kind is likely to mislead, as being built on speculations, erecting into characteristics of an entire period what may be simply the peculiarities of the author, or incidental to his subject or style. Again, attempts at a philological history of the Hebrew language will be much impeded by the fact — that the chronological order of the extant Scriptures is not in all instances clear — and that the history of the Hebrew nation from its settlement to the seventh century B. C. is without changes or progress of the marked and prominent nature required for a satisfactory critical judgment. Unlike languages of the Japhetian stock, such as the Greek or German, the Hebrew language, like all her Shemitic sisters, is firm and hard as from a mould — not susceptible of change. In addition to these characteristics of their language, the people by whom it was spoken were of a retired and exclusive cast, and, for a long time, exempt from foreign sway. The dialects also of the few conterminous tribes with whom they had any intercourse were allied closely with their own.

The extant remains of Hebrew literature are destitute of any important changes in language, during the period from Moses to the Captivity. A certain and intelligible amount of progress, but no considerable or remarkable difference (according to one school), is really observable in the language of the Pentateuch, the books of Joshua, Judges, Ruth, Samuel, the Kings, the Psalms, or the prophecies of Isaiah, Hosea, Amos, Joel, Micah, Nahum, Habakkuk, and Jeremiah — widely separated from each other by time as are many of these writings Grammars and lexicons are confidently referred to as supplying abundant evidence of unchanged materials and fashioning; and foreign words, when occurring, are easily to be recognized under their Shemitic dress, or their introduction as easily to be explained.

At the first sight, and to modern judgment, much of this appears strange, and possibly untenable. But an explanation of the difficulty is sought in the unbroken residence of the Hebrew people, without removal or molestation — a feature of history not unexpected or surprising in the case of a people preserved by Providence simply as the guardians of a sacred deposit of truth, not yet ripe for publication. An additional illustration of the immunity from change, is to be drawn from the history of the other branches of the Shemitic stock. The Aramaic dialect, as used by various writers for eleven hundred years, although inferior to the Hebrew in many respects, is almost without change, and not essentially different from the language of Daniel and Ezra. And the Arabic language, subsequently to its second birth, in connection with Mohammedanism, will be found to present the same phenomena.

12. Moreover, is it altogether a wild conjecture to assume as not impossible, the formation of a sacred language among the chosen people, at so marked a period of their history as that of Moses? Every argument leads to a belief, that the popular dialect of the Hebrews from a very early period was deeply tinged with Aramaic, and that it continued so. But there is surely nothing unlikely or inconsistent in the notion that he who was "learned in all the wisdom of the Egyptians" should have been taught to introduce a sacred language, akin, but superior to the every-day dialect of his people — the property of the rulers, and which subsequent writers should be guided to copy. Such a language would be the sacred and learned one, — that of the few, — and no clearer proof of the limited hold exercised by this classical Hebrew on the ordinary language of the people can be required than its rapid withdrawal, after the Captivity, before a language composed of dialects hitherto disregarded, but still living in popular use. It has been well said that "literary dialects, or what are commonly called classical languages, pay for their temporary greatness by inevitable decay." "If later in history we meet with a new body of stationary language forming or formed, we may be sure that its tributaries were those rivulets which for a time were almost lost to our sight." [a]

13. A few remarks may not be out of place here with reference to some leading linguistic peculiarities in different books of the O. T. For ordinary purposes the old division into the golden and silver ages is sufficient. A detailed list of peculiarities observable in the Pentateuch (without, however, destroying its close similarity to other O. T. writings) is given by Scholz, divided under lexical, grammatical, and syntactical heads. With the style of the Pentateuch (as might be expected) that of Joshua very closely corresponds. The feel-

ing of hostility to the neighboring peoples of mixed descent, so prevalent at the time of the restoration, makes strongly against the asserted late origin of the book of Ruth, in which it cannot be traced. But (with which we are at present concerned) the style points to an earlier date, the asserted Aramaisms being probably relics of the popular dialect.[a] The same linguistic peculiarities are observable (among other merits of style) in the books of Samuel.[b]

The books of Job and Ecclesiastes contain many asserted Aramaisms, which have been pleaded in support of a late origin of these two poems. In the case of the first, it is argued (on the other side) that these peculiarities are not to be considered so much poetical ornaments as ordinary expressions and usages of the early Hebrew language, affected necessarily to a certain extent by intercourse with neighboring tribes. And the asserted want of study and polish in the diction of this book leads to the same conclusion. As respects the book of Ecclesiastes the case is more obscure, as in many instances the peculiarities of style seem rather referable to the secondary Hebrew of a late period of Hebrew history, than to an Aramaic origin. But our acquaintance with Hebrew literature is too limited to allow the formation of a positive opinion on the subject, in opposition to that of ecclesiastical antiquity.[c] In addition to roughness of diction, growing probably out of the same cause — close intercourse with the people — so-called Aramaisms are to be found in the remains of Jonah and Hosea, and expressions closely allied in those of Amos.[d] This is not the case in the writings of Nahum, Zephaniah, and Habakkuk, and in the still later ones of the minor prophets; the treasures of past times, which filled their hearts, served as models of style.[e]

As with respect to the book of Ecclesiastes (at the hands of modern critics), so, in the case of Ezekiel, Jewish critics have sought to assign its peculiarities of style and expression to a secondary Hebrew origin.[f] But the references above given may serve to aid the consideration of a most interesting question, as to the extent to which Aramaic elements entered into the ordinary dialect of the Hebrew people, from early times to the Captivity.

The peculiarities of language in Daniel belong to another field of inquiry; and under impartial consideration more difficulties may be found to disappear, as in the case of those with regard to the asserted Greek words. The language and subject-matter of Daniel (especially the latter), in the opinion of scholars, led Ezra and Nehemiah to place this book elsewhere than among the prophetical writings. To their minds, the apocalyptic character of the book might seem to assign it rather to the Hagiographa than the roll of prophecy, properly so called. Inquiries, with respect to the closing of the canon, tend to shake the comparatively recent date which it has been so customary to assign to this book.[g]

With these exceptions (if so to be considered) few traces of dialects are discernible in the small remains still extant, for the most part composed in Judah and Jerusalem. The dialects of the northern districts probably were influenced by their Aramaic neighbors; and local expressions are to be detected in Judg. v. and xii. 6. At a later period Philistine dialects are alluded to (Neh. xiii. 23, 24), and that of Galilee (Matt. xxvi. 73).

As has been remarked, the Aramaic elements above alluded to, are most plainly observable in the remains of some of the less educated writers. The general style of Hebrew prose literature is plain and simple, but lively and pictorial, and rising with the subject, at times, to considerable elevation. But the strength of the Hebrew language lies in its poetical and prophetical remains. For simple and historical narrative, ordinary words and formations sufficed. But the requisite elevation of poetical composition, and the necessity (growing out of the general use of parallelism) for enlarging the supply of striking words and expressions at command, led to the introduction of many expressions which we do not commonly find in Hebrew prose literature.[h] For the origin[i] and existence of these we must look especially to the Aramaic, from which expressions were borrowed, whose force and peculiarities might give an additional ornament and point not otherwise attainable. Closely resembling that of the poetical books, in its general character, is the style of the prophetical writings, but, as might be anticipated, more oratorical, and running into longer sentences. Nor should it be forgotten, by the side of so much that is uniform in language and construction throughout so long a period, that diversities of individual dispositions and standing are strongly marked, in the instances of several writers. But from the earliest period of the existence of a literature among the Hebrew people to B. C. 600, the Hebrew language continued singularly exempt from change, in all leading and general features, and in the general laws of its expression, forms, and combinations.

From that period the Hebrew dialect will be found to give way before the Aramaic, in what has been preserved to us of its literature, although, as is not unfrequently the case, some later writers copy, with almost regretful accuracy, the classical and consecrated language of a brighter period.

### §§ 14–19. Aramaic Language. — Scholastic Period.

14. The language ordinarily called Aramaic is a dialect of the great Shemitic family, deriving its name from the district over which it was spoken, Aram = the high or hill country (as Canaan = the low country). But the name is applied, both by

Biblical and other writers, in a wider and a more restricted sense. The designation — Aram — was imperfectly known to the Greeks and Romans, by whom the country was called Syria, an abbreviation of Assyria, according to Herodotus (vii. 63).[a] In general practice Aram was divided into Eastern and Western. The dialects of these two districts were severally called Chaldaic and Syriac — designations not happily chosen, but, as in the case of Shemitic, of too long currency to be changed without great inconvenience. No traces remain of the numerous dialects which must have existed in so large an aggregate of many very populous districts. Nothing can be more erroneous than the application of the word "Chaldaic" to the East Aramaic dialect. It seems probable that the Chaldæans were a people of Japhetian extraction, who probably took the name of the Shemitic tribe whom they dislodged before their connection with Babylon, so long, so varied, and so full of interest. But it would be an error to attribute to these conquerors any great or early amount of cultivation. The origin of the peculiar and advanced civilization to be traced in the basin of Mesopotamia must be assigned to another cause — the influences of Cushite immigration. The colossal scientific and industrial characteristics of Assyrian civilization are not reasonably deducible from Japhetian influences, that race, in those early times, having evinced no remarkable tendency for construction or the study of the applied sciences. Accordingly, it would seem not unreasonable to place on the two rivers a population of Cushite (Hamite) accomplishments, if not origin, subsequent to the Shemitic occupation, which established its own language as the ordinary one of these districts; and thirdly a body of warriors and influential men of Japhetian origin, the true Chaldæans, whose name has been applied to a Shemitic district and dialect.[b]

The eastern boundary of the Shemitic languages is obscure; but this much may be safely assumed, that this family had its earliest settlement on the upper basin of the Tigris, from which extensions were doubtless made to the south. And (as has been before said) history points to another stream, flowing northward (at a subsequent but equally ante-historic period), of Cushite population, with its distinctive accomplishments. These settlements would seem to comprise the wide extent of country extending from the ranges bounding the watershed of the Tigris to the N. and E., to the plains in the S. and W. towards the lower course of the "great river," = Assyria (to a great extent), Mesopotamia and Babylonia, with its southern district, Chaldæa. There are few more interesting linguistic questions than the nature of the vernacular language of this last-named region, at the period of the Jewish deportation by Nebuchadnezzar. It was, mainly and incontestably, Shemitic; but by the side of it an Aryan one, chiefly official, is said to be discernible. [CHALDEA; CHALDEANS.] The passages ordinarily relied on (Dan. i. 4, ii. 4) are not very conclusive in support of this latter theory, which derives more aid from the fact, that many proper names of ordinary occurrence (Belshazzar, Merodach-Baladan, Nabonassar, Nabopolassar, Nebo, Nebuchadnezzar) are certainly not Shemitic. As little, perhaps, are they Aryan — but in any case they may be naturalized relics of the Assyrian supremacy.

The same question has been raised as to the Shemitic or Aryan origin of the vernacular language of Assyria — i. e. the country to the E. of the Euphrates. As in the case of Babylonia, the language appears to have been, ordinarily, that of a blended Shemitic and Cushite population, and a similar difficulty to be connected with the ordinary proper names — Nibchaz, Pul, Salmanassar, Sardanapalus, Sennacherib, Tartak, and Tiglath-Pileser. Is. xxxiii. 19, and Jer. v. 15, have been referred to as establishing the difference of the vernacular language of Assyria from the Shemitic. Our knowledge of the so-called Cushite stock in the basins of the two rivers is but limited; but in any case a strong Shemitic if not Cushite element is so clearly discernible in many old local and proper names, as to make an Aryan or other vernacular language unlikely, although incorporations may be found to have taken place, from some other language, probably that of a conquering race.

Until recently, the literature of these wide districts was a blank. Yet "there must have been a Babylonian literature, as the wisdom of the Chaldæans had acquired a reputation, which could hardly have been sustained without a literature. If we are ever to recover a knowledge of that ancient Babylonian literature, it must be from the cuneiform inscriptions lately brought home from Babylon and Nineveh. They are clearly written in a Shemitic langu ge" (M. Müller, *S. of L.* p. 263). As has been before remarked [BABYLONIA, § 16], the civilization of Assyria was derived from Babylonia in its leading features — Assyrian art, however, being progressive, and marked by local features, such as the substitution of alabaster for bricks as a material for sculpture. With regard to the dialects used for the class of inscriptions with which we are concerned, namely, the Assyrian, as distinguished from the Zend (or Persian) and Tartar (?) families of cuneiform memorials, the opinion of scholars is all but unanimous — Lassen, Burnouf (as far as he pronounces an opinion), Layard, Spiegel, all agree with the great authority above cited. Renan differs, unwillingly, from them.

From what source, then, does it seem most probable that future scholars will find this peculiar form of writing deducible? One of the latest writers on the subject, Oppert, divides the family, instead of three, into two large classes — the Aryan or Old Persian, and another large class containing various subdivisions of which the Assyrian forms one. The character itself he asserts to be neither Aryan nor Shemitic in its origin, but ancient Central Asiatic, and applied with difficulty, as extraneous and exotic, to the languages of totally different races. But it is quite as likely that the true origin may be found in an exactly different direction — the S. W. — for this peculiar system of characters, which, besides occupying the great river basins of which we have spoken, may be traced westward as far as Beyrout and Cyprus, and eastward, although less plainly, to Bactra. Scholars, including Oppert, incline to the judgment, that (as Hebrew, Greek, and Arabic writers all show) from a Cushite stock (Gen. x. 8–12) there grew up Babylon and Nineveh, and other great homes of civilization, extend-

ing from the level plains of Chaldæa far away to the N. and E. of Assyria. In these districts, far anterior to the deportation of the Jews, but down to that period, flourished the schools of learning that gave birth to results, material and intellectual, stamped with affinity to those of Egypt. It may well be, that in the progress of discovery, from Shemitic-Cushite records — akin to the Himyaritic and Ethiopic — scholars may carry back these researches to Shemitic-Cushite imitations of kindred writing from southern lands. Already the notion has obtained currency that the so-called primitive Shemitic alphabet, of Assyrian or Babylonian origin, is transitional, built on the older formal and syllabic one, preserved in cuneiform remains. To this fact we shall in the sequel recur — passing now to the condition of the Aramaic language at the time of the Captivity. Little weight can be attributed to the argument that the ancient literature of the district being called "Chaldæan," an Aryan origin is implied. The word "Chaldæan" naturally drove out "Babylonian," after the establishment of Chaldæan ascendency, in the latter country; but as in the case of Greece and Rome, intellectual ascendency held its ground after the loss of material power and rule.[a]

15. Without entering into the discussions respecting the exact propriety of the expressions, it will be sufficient to follow the ordinary division of the Aramaic into the Chaldaic or Eastern, and the Western or Syriac dialects.

The term "Chaldaic" is now (like "Shemitic") firmly established, but "Babylonian" would appear more suitable. We know that it was a spoken language at the time of the Captivity.

A valuable outline of the different ages and styles observable in the Aramaic branch of the Shemitic family has been given by both Delitzsch and Fürst, which (with some additions) is here reproduced for the reader.[b]

(1.) The earliest extant fragments are the well-known ones to be found at Dan. ii. 4–vii. 28; Ezr. iv. 8–vi. 18, vii. 12–26. Affinities are to be traced, without difficulty, between these fragments, which differ again in some very marked particulars from the earliest Targums.[c]

To those who in the course of travel have observed the ease, almost the unconsciousness, with which persons, living on the confines of cognate dialects, pass from the use of one to another, or who are aware how close is the connection and how very slight the difference between conterminous dialectical varieties of one common stock, there can be nothing strange in this juxtaposition of Hebrew and Aramaic portions. The prophet Daniel, we may be sure, cherished with true Israelite affection the holy language of his early home, while his high official position must have involved a thorough acquaintance not only with the ordinary Babylonish-Aramaic, but with the Chaldaic (properly so called). Accordingly, we may understand how the prophet might pass without remark from the use of one dialect to the other. Again, in the case of Ezra, although writing at a later period, when the holy language had again been adopted as a standard of style and means of expression by Jewish writers, there is nothing difficult to be understood in his incorporating with his own composition accounts, written by an eye-witness in Aramaic, of events which took place before his own arrival.[d]

(2.) The Syro-Chaldaic originals of several of the Apocryphal books are lost; many Hebraisms were engrafted on the Aramaic as spoken by the Jews, but the dialect of the earlier Targums contains a perceptibly smaller amount of such admixture than later compilations.

(3.) The language of the Gemaras is extremely composite — that of the Jerusalem Gemara being less pure than that of Babylon. Still lower in the scale, according to the same authority, are those of the fast-expiring Samaritan dialect, and that of Galilee.

(4.) The curious book Zohar — an adaptation of Aramaic expressions to Judaizing Gnosticism — among its foreign additions contains very many from the Arabic, indicative (according to Delitzsch) of a Spanish origin.[e]

(5.) The Masora, brief and symbolical, is chiefly remarkable for what may be called vernacular peculiarities.

(6.) The Christian or ecclesiastical Aramaic is that ordinarily known as Syriac — the language of early Christianity, as Hebrew and Arabic, respectively, of the Jewish religion and Mohammedanism.

The above classification may be useful as a guide to the two great divisions of the Aramaic dialect with which a Biblical student is directly concerned. For that ordinarily called the Samaritan contains very little calculated to afford illustration among its scanty remains; and future discoveries in that branch of pagan Aramaic known as the dialect of the Nabathæans, Mendaites, or Zabians of Mesopotamia (not the Sabeans of Southern Arabia), can only exercise a remote or secondary influence on the study of Aramaic as connected with the Scriptures.

The following sketch of the three leading varieties of the West-Aramaic dialect, is built on the account given by Fürst.[f]

(*a*.) What is known of the condition of Galilee corroborates the disparaging statements given by the Talmudists of the sub-dialect (for it is no more) of this district. Close and constant communication with the tribes to the north, and a large admixture of heathens among the inhabitants, would necessarily contribute to this. The dialect of Galilee appears to have been marked by confu-

tion of letters — פ and ב, כ with ף (as in various European dialects) — and aphæresis of the guttural — a habit of connecting words otherwise separate (also not uncommon in rude dialects); carelessness about vowel-sounds, and the substitution of ה final for הָ.

(b.) The Samaritan dialect appears to have been a compound of the vulgar Hebrew with Aramaic, as might have been anticipated from the elements of which the population was composed, remains of the "Ephraimite" occupiers, and Aramaic immigrants. A confusion of the mute letters and also of the gutturals, with a predilection for the letter ו, has been noticed.

(c.) The dialect called that of Jerusalem or Judæa, between which and the purer one of the Babylonish Jews so many invidious distinctions have been drawn, seems to have been variable, from frequent changes among the inhabitants, and also to have contained a large amount of words different from those in use in Babylonia, besides being somewhat incorrect in its orthography.

Each dialect, it will be seen, was directly influenced by the circumstances — physical or social — of its locality. For instance, in the remote and unlettered Galilee, peculiarities and words could not fail to be engrafted from the neighboring tribes. The bitter hatred which existed between the Samaritans and the Jews effectually precluded the admission of any leavening influences from the latter source. A dialect originally impure — the Samaritan became in course of time largely interspersed with Aramaic words. That of Judæa, alone being spoken by Jews to whom nationality was most precious, was preserved in tolerable immunity from corresponding degradation, until overpowered by Greek and Roman heathenism.

The small amount of real difference between the two branches of Aramaic has been often urged as an argument for making any division superfluous. But it has been well observed by Fürst,[a] that each is animated by a very different spirit. The chief relics of Chaldaic, or Eastern Aramaic — the Targums — are filled with traditional faith in the varied pages of Jewish history: they combine much of the better Pharisaism — nourished as it was on lively conceptions of hallowed, national lore, with warm, earnest longings for the kingdom of the Messiah. Western Aramaic, or Syriac literature, on the other hand, is essentially Christian, with a new terminology especially framed for its necessities. Accordingly, the tendency and linguistic character of the first is essentially Hebrew, that of the second Hellenic. One is full of Hebraisms, the other of Hellenisms.

16. Perhaps few lines of demarcation are traced with greater difficulty, than those by which one age of a language is separated from another. This is remarkably the case in respect of the cessation of the Hebrew, and the ascendency of the Aramaic, or, as it may be put, in respect of the date at which the period of growth terminates, and that of exposition and scholasticism begins, in the literature of the chosen people.

Much unnecessary discussion has been roused with respect to the introduction of interpretation. Not only in any missionary station among the heathen, but in Europe at the Reformation, we can find substantially the germ of Targums. During the 16th century, in the eastern districts of the present kingdom of Prussia, the desire to bring the Gospel home to the humbler classes, hitherto but little touched by its doctrines, opened a new field of activity among the non-German inhabitants of those provinces, at that time a very numerous body. Assistants were appointed, under the name of Tolken (interpreters), who rendered the sermon, sentence by sentence, into the vernacular old Prussian dialect.[b] Just so in Palestine, on the return, an eager desire to bring their own Scriptures within the reach of the people led to measures such as that described in Nehemiah viii. 8, a passage of difficult interpretation. It is possible, that the apparent vagueness of this passage may represent the two methods, which would be naturally adopted for such different purposes as rendering Biblical Hebrew intelligible to the common people, who only spoke a dialect of Aramaic — and supplying a commentary after such deliberate reading.

Of the several Targums which are preserved, the dates, style, character, and value are exceedingly different. An account of them is given under VERSIONS, ANCIENT (TARGUM).

17. In the scholastic period, of which we now treat, the schools of the prophets were succeeded by "houses of inquiry," — בָּתֵּי מִדְרָשׁ. For with Vitringa, in preference to Rabbinical writers, we prefer considering the first named institutions as pastoral and devotional seminaries, if not monastic retreats — rather than schools of law and dialectics, as some would explain them. It was not until the scholastic period that all Jewish studies were so employed. Two ways only of extending the blessings hence derivable seem to have presented themselves to the national mind, by commentary — תַּרְגּוּם, and inquiry — דְּרָשׁ. In the first of these, Targumic literature, but limited openings occurred for critical studies; in the second still fewer.[c] The vast storehouse of Hebrew thought reaching through so many centuries — known by the name of the Talmud — and the collections of a similar nature called the Midrashim, extending in the case of the first, dimly but tangibly, from the period of the Captivity to the times of Rabbi Asher — the closer of the Talmud (A. D. 426), contain comparatively few accessions to linguistic knowledge. The terms by which serious or philosophical inquiry is described, with the names of its subordinate branches — Halacha (rule) — Hagada (what is said or preached) — Tosiphta (addition) — Boraitha (statements not in the Mishna) — Mechilta

(measure, form); the successive designations of learned dignitaries — Sopherim (scribes) — Chacamim (sages) — Tannaim (= Shonim, teachers) — Amoraim (speakers) — Seburaim (disputants) — Geonim (eminences) — all bear reference to the study and exposition of the rules and bearing of the Mosaic law, with none, or very little to the critical study of their own prized language — the vehicle of the law. The two component parts of the Talmud, the Mishna and Gemara — republication and final explanation — are conceived in the same spirit. The style and composite nature of these works belong to the history of Rabbinical literature.

18. Of the other main division of the Aramaic language — the Western or Syriac dialect — the earliest existing document is the Peshito version of the Scriptures, which not improbably belongs to the middle of the second century. Various subdialects probably existed within the wide area over which this Western one was current: but there are no means now attainable for pursuing the inquiry — what we know of the Palmyrene being only derivable from inscriptions ranging from A. D. 49 to the middle of the third century. The Syriac dialect is thickly studded with foreign words, Arabic, Persian, Greek, and Latin, especially with the third. A comparison of this dialect with the Eastern branch will show that they are closely allied in all the most important peculiarities of grammar and syntax, as well as in their store of original words — the true standard in linguistic researches.

A few lines may be here allowable on the fortunes of a dialect which (as will be shown hereafter) has been so conspicuous an instrument in extending a knowledge of the truths originally given, and so long preserved in the sacred language of the Hebrews. Subsequently to the fall of Jerusalem its chief seat of learning and literature was at Edessa — from A. D. 440, at Nisibis. Before the 8th and 9th centuries its decline had commenced, in spite of the protests made by James of Edessa in favor of its own classical writers. But, as of old the Hebrew language had given way to the Aramaic, so in her turn, the Western Aramaic was driven out by the advances of the Arabic during the 10th and 11th centuries. Somewhat later it may be said to have died out — its last writer of mark, Barhebræus (or Abulpharagius) composing in Arabic as well as Syriac.[a]

19. The Chaldaic paraphrases of Scripture are exceedingly valuable for the light which they throw on Jewish manners and customs, and the meaning of passages otherwise obscure, as likewise for many happy renderings of the original text. But they are valuable also on higher reasons — the Christian interpretation put by their authors on controverted passages. Their testimony is of the greatest value, as showing that Messianic interpretations of many important passages must have been current among the Jews of the period. Walton, alluding to Jewish attempts to evade their own orthodox traditions, says that "many such passages," *i. e.* of the later and evasive kind, "might be produced which find no sanction among the Jews. Those very passages, which were applied by their own teachers to the Messiah, and are incapable of any other fair application save to Him in whom they all centre, are not unfrequently warped into meanings irreconcilable alike with the truth, and the judgment of their own most valued writers."[b]

A comparative estimate is not yet attainable, as to what in Targumic literature is the pure expression and development of the Jewish mind, and what is of foreign growth. But, as has been said, the Targums and kindred writings are of considerable dogmatical and exegetical value; and a similar good work has been effected by means of the cognate dialect, Western Aramaic or Syriac. From the 3d to the 9th century, Syriac was to a great part of Asia — what in their spheres Hellenic Greek and mediæval Latin have respectively been — the one ecclesiastical language of the district named. Between the literally preserved records of Holy Scripture, as delivered to the Terachites in the infancy of the world, and the understandings and hearts of Aryan peoples, who were intended to share in those treasures fully and to their latest posterity, some connecting medium was necessary. This was supplied by the dialect in question — neither so specific nor so clear, nor so sharply subjective as the pure Hebrew, but for those very reasons (while in itself essentially Shemitic) open to impressions and thoughts as well as words from without, and therefore well calculated to act as the pioneer and introducer of Biblical thoughts and Biblical truths among minds, to whom these treasures would otherwise long have remained obscure and unintelligible.

### §§ 20–24. Arabic Language. — Period of Revival.

20. The early population of Arabia, its antiquities and peculiarities, have been described under Arabia.[c] We find Arabia occupied by a confluence of tribes, the leading one of undoubted Ishmaelitish descent — the others of the seed or lineage of Abraham, and blended by alliance, language neighborhood, and habits. Before these any aboriginal inhabitants must have disappeared, as the Canaanitish nations before their brethren, the children of the greater promise — as the Edomites and Ishmaelites were of a lesser, but equally certain one.

We have seen [Arabia] that the peninsula of Arabia lay in the track of Cushite civilization, in its supposed return-course towards the northeast. As in the basin of Mesopotamia, so in Arabia it has left traces of its constructive tendencies, and predilections for grand and colossal undertakings. Modern research has brought to light in addition many valuable remains, full of philological interest. There may now be found abundant illustration of the relationship of the Himyaritic with the early Shemitic before adverted to; and the language of the Ehkili (or Mahrah), on which so much light has recently been thrown, presents us with the singular phenomenon, not merely of a specimen of what the Himyaritic (or language of Yemen) must

were been before its expulsion by the Koreishite, but of a dialect less Arabic than Hebrew, and possessing close affinity with the Ghez, or Ethiopian.[a]

21. The affinity of the Ghez (Cush? the sacred language of Ethiopia) with the Shemitic has been long remarked. Walton supposes its introduction to have been consequent on that of Christianity. But the tradition is probably correct, according to which Ethiopia was colonized from S. W. Arabia, and according to which this language should be considered a relic of the Himyaritic. In the O. T., Cush, in addition to Ethiopia in Africa, comprises S. Arabia (Gen. x. 7, 8; 2 Chr. xiv. 9, xxi. 16; Hab. iii. 7), and by many the stream of Hamite civilization is supposed to have flowed in a northerly course from that point into Egypt. In its lexical peculiarities, the Ghez is said to resemble the Aramaic, in its grammatical the Arabic. The alphabet is very curious, differing from Shemitic alphabets in the number, order, and name and form of the letters, by the direction of the writing, and especially by the form of vowel notation. This is extremely singular. Each consonant contains a short *a* — the vowels are expressed by additions to the consonants. The alphabet is, by this means, converted into a "syllabarium" of 202 signs. Various points of resemblance have been traced between this alphabet and the Samaritan; but recent discoveries establish its kindred (almost its identity) with that of the Himyaritic inscriptions. The language and character of which we have spoken briefly, have now been succeeded for general purposes by the Amharic — probably in the first instance a kindred dialect with the Ghez, but now altered by subsequent extraneous additions.[b]

22. Internal evidence demonstrates that the Arabic language, at the time when it first appears on the field of history, was being gradually developed in its remote and barren peninsular home. Not to dwell on its broken (or internal) plurals, and its system of cases, there are peculiarities in the earliest extant remains, which evince progress made in the cultivation of the language, at a date long anterior to the period of which we speak.

A well-known legend speaks of the present Arabic language as being a fusion of different dialects, effected by the tribe of Koreish settled round Mecca, and the reputed wardens of the Caaba. In any case, the paramount purity of the Koreishite dialect is asserted by Arabic writers on grammar, in whose judgment the quality of the spoken dialects appears to have declined, in proportion to their distance from Mecca. It is also asserted, that the stores of the Koreishite dialect were increased by a sort of philological eclecticism — all striking elegancies of construction or expression, observable in the dialects of the many different tribes visiting Mecca, being engrafted upon the one in question.[c] But the recognition of the Koran, as the ultimate standard in linguistic as in religious matters, established in Arabic judgment the superior purity of the Koreishite dialect.

That the Arabs possessed a literature anterior to the birth of Mohammed, and expressed in a language marked with many grammatical peculiarities is beyond doubt. There is no satisfactory proof of the assertion, that all early Arabic literature was destroyed by the jealous disciples of Islam. "Of old, the Arab gloried in nothing but his sword, his hospitality, and his fluent speech."[d] The last gift, if we may judge from what has been preserved to us of the history of those early times, seems to have been held in especial honor. A zealous purism, strange as it sounds amid the rude and uneducated children of the desert, seems, as in later times, to have kept almost Masoretic watch over the exactitude of the transmission of these early outpourings.[e]

Even in our own times, scholars have seemed unwilling altogether to abandon the legend — how at the fair of Oc̆âdh ("the mart of proud rivalry"[f]) goods and traffic — wants and profit — were alike neglected, while bards contended amid their listening countrymen, anxious for such a verdict as should entitle their lays to a place among the Moallakat, the *ἀναθήματα* of the Caaba, or national temple at Mecca. But the appearance of Mohammed put an end for a season to commerce and bardic contests; nor was it until the work of conquest was done, that the faithful resumed the pursuits of peace. And enough remains to show that poetry was not alone cultivated among the ante-Mohammedan Arabians. "Seeds of moral truth appear to have been embodied in sentences and aphorisms, a form of instruction peculiarly congenial to the temper of Orientals, and proverbially cultivated by the inhabitants of the Arabian peninsula."[g] Poetry and romance, as might be expected from the degree of Arab civilization, would seem to have been the chief objects of attention.

Against these views it has been urged, that although of such compositions as the Moallakat, and others less generally known, the substance may be considered as undoubtedly very ancient, and illustrative accordingly of manners and customs — yet the same antiquity, according to competent judges, cannot reasonably be assigned to their present form. Granting (what is borne out from analogy and from references in the Hebrew Scriptures) the existence of philosophical compositions among the Arabs at an early period, still no traces of these remain. The earliest reliable relics of Arabic literature are only fragments, to be found in what has come down to us of pre-Islamite compositions. And, as has been said already, various arguments have been put forward against the probability of the present form of these remains being their original one. Their obscurities, it is contended, are less those of age than of individual style, while their uniformity of language is at variance with the demonstrably late cultivation and ascendency of the Koreishite dialect. Another, and not a feeble argument, is the utter absence of allusion to the early religion of the Arabs. Most just is Renan's remark that, skeptical or voluptuaries as were most of their poets, still such a silence would be inexplicable, but on the supposition of a systematic removal of all traces of former paganism. No great *critical* value, accordingly,

san fairly be assigned to any Arabic remains anterior to the publication of the Koran.[a]

It is not within the scope of this sketch to touch upon the theological teaching of the Koran, its objects, sources, merits, or deficiencies. But its style is very peculiar. Assuming that it represents the best forms of the Koreishite dialect about the middle of the 7th century, we may say of the Koran, that its linguistic approached its religious supremacy. The Koran may be characterized as marking the transition from versification to prose, from poetry to eloquence. Mohammed himself has adverted to his want of poetical skill — a blemish which required explanation in the judgment of his countrymen — but of the effect of his forcible language and powers of address (we can hardly call it oratory) there can be no doubt. The Koran itself contains distinct traces of the change (to which allusion has been made) then in progress in Arabic literature. The balance of proof inclines to the conclusion, that the Suras of the Koran, which are placed last in order, are earliest in point of composition — outpourings bearing some faint resemblance to those of Hebrew prophecy.[b]

23. It would lead to discussions foreign to the present subject, were we to attempt to follow the thoughts respecting the future, suggested by the almost universal prevalence of the Arabic idiom over so wide a portion of the globe. A comparison of some leading features of the Arabic language, with its two sisters, is reserved for the next division of this sketch. With regard to its value in illustration two different judgments obtain. According to one, all the lexical riches and grammatical varieties of the Shemitic family are to be found combined in the Arabic. What elsewhere is imperfect or exceptional is here said to be fully developed — forms elsewhere rare or anomalous are here found in regular use. Great faults of style cannot be denied, but its superiority in lexical riches and grammatical precision and variety is incontestable. Without this means of illustration, the position of the Hebrew student may be likened to that of the geologist, who should have nothing whereon to found a judgment, beyond the scattered and imperfect remains of some few primeval creatures. But the Arabic, it is maintained, for purposes of illustration, is to the Hebrew precisely what, to such an inquirer, would be the discovery of an imbedded multitude of kindred creatures in all their fullness and completeness — even more, for the Arabic (it is urged) — as a means of comparison and illustration — is a living, breathing reality.

24. Another school maintains very different opinions with respect to the value of Arabic in illustration. The comparatively recent date (in their present form at least) and limited amount of Arabic remains are pleaded against its claims, as a standard of reference in respect of the Hebrew. Its verbal copiousness, elaborate mechanism, subtlety of thought, wide and diversified fields of literature, cannot be called in question. But it is urged (and colorably) that its riches are not all pure metal, and that no great attention to etymology has been evinced by native writers on the language. Nor should the follies and perversions of scholasticism (in the case of Rabbinical writers) blind us to the superior purity of the spirit by which the Hebrew language is animated, and the reflected influences, for elevation of tone and character, from the subjects on which it was so long exclusively employed "My doctrine shall drop as the rain, my speech shall distil as the dew, as the small rain upon the tender herb, and as the showers upon the grass." No more fitting description of the spirit and power of the holy language can be found than these words of the Lawgiver's last address to his people. The Arabic language, on the other hand, is first, that of wandering robbers and herdsmen, destitute of religion, or filled with second-hand superstitions, in its more cultivated state, that of a self-satisfied, luxurious, licentious people, the vehicle of a borrowed philosophy, and a dogmatism of the most wearisome and captious kind.[c]

Undoubtedly schools such as that of Albert Schultens (d. 1730) have unduly exalted the value of Arabic in illustration; but in what may be designated as the field of lower criticism its importance cannot be disputed. The total extent of the canonical writings of the Old Testament is so very limited as in this respect to make the assistance of the Arabic at once welcome, trustworthy, and copious. Nor can the proposed substitute be accepted without demur — the later Hebrew, which has found an advocate so learned and able as Delitzsch.[d] That its claims and usefulness have been undeservedly overlooked few will dispute or deny; but it would seem to be recent, uncertain, and heterogeneous, to a degree which lays it open to many objections taken by the admirers of the Arabic, as a trustworthy means of illustration.

### §§ 25–33. Structure of the Shemitic Languages.

25. The question, as to whether any large amount of primitives in the Shemitic languages is fairly deducible from imitation of sounds, has been answered very differently by high authorities. Gesenius thought instances of onomatopœia very rare in extant remains, although probably more numerous at an early period. Hoffmann's judgment is the same, in respect of Western Aramaic. On the other hand, Renan qualifies his admission of the identity of numerous Shemitic and Japhetian primitives by a suggestion, that these, for the most part, may be assigned to biliteral words, originating in the imitation of the simplest and most obvious sounds. Scholz also has an interesting passage in which he maintains the same proposition with considerable force, and attempts to follow, in some particular cases, the analogy between the simple original sign and its distant derivatives. But on a careful examination, it is not unlikely that, although many are lost, or overlaid, or no longer as appreciable by our organs as by the keener ones of earlier races, yet the truth is, as the case has been put by a great living comparative philologist — "The 400 or 500 roots which remain as the constituent elements in different families of languages are not interjections, nor are they imitations. They are *phonetic* types, produced by a power inherent in human nature."[e]

26. The deeply curious inquiry, as to the extent of affinity still discernible between Shemitic and Japhetian roots, belongs to another article. [TONGUES.] Nothing in the Scripture which bears upon the subject, can be fairly pleaded against such an affinity being possible. A literal belief of Biblical records does not at all call upon us to suppose an entire abrogation, by Divine interference, of all existing elements of what must have been the common language of the early Noachidæ.[a] That such resemblance is not dimly to be traced cannot be denied — although the means used for establishing instances, by Delitzsch and the analytical school, cannot be admitted without great reserve.[b] But in treating the Shemitic languages in connection with Scripture, it is most prudent to turn away from this tempting field of inquiry to the consideration of the simple elements — the primitives — the true base of every language, in that these, rather than the mechanism of grammar, are to be regarded as exponents of internal spirit and character. It is not denied, that these apparently inorganic bodies may very frequently be found resolvable into constituent parts, and that kindred instances may be easily found in conterminous Japhetian dialects.[c]

27. Humboldt has named two very remarkable points of difference between the Japhetian and Shemitic language-families — the latter of which he also, for the second reason about to be named, assigns to the number of those which have deviated from the regular course of development. The first peculiarity is the triliteral root (as the language is at present known) — the second the expression of significations by consonants, and *relations* by vowels — both forming part of the flexions within words, so remarkable in the Shemitic family. Widely different from the Japhetian primitive, a fully formed and independent word — the Shemitic one (even in its present triliteral state) appears to have consisted of three separate articulations, aided by an indefinite sound like the Shĕva of the Hebrews, and to have varied in the shades of its meaning according to the vowels assigned to it. In the opinion of the same scholar, the prevalent triliteral root was substituted for an earlier or biliteral, as being found impracticable and obscure in use.[d]

Traces of this survive in the rudest, or Aramaic, branch, where what is pronounced as one syllable, in the Hebrew forms two, and in the more elaborate Arabic three — *e. g.* ktal, katal, katala. It is needless to say, that much has been written on the question of this peculiarity being original or secondary. A writer among ourselves has thus stated the case: "An uniform root-formation by three letters or two syllables developed itself out of the original monosyllabic state by the addition of a third letter. This tendency to enlargement presents itself in the Indo-Germanic also; but there is this difference, that in the latter monosyllabic roots remain besides those that have been enlarged, while in the other they have almost disappeared."[e] In this judgment most will agree. Many now triliteral root-words (especially those expressive of the primary relations of life) were at first biliteral only. Thus אב is not really from אבה, nor אם from אמם. In many cases a third (assumed) root-letter has been obviously added by repetition, or by the use of a weak or movable letter, or by prefixing the letter Nun. Additional instances may be found in connection with the biliterals טב, דך, and בד, and many others. Illustrations may also be drawn from another quarter nearer home — in the Japhetian languages of Europe. Fear is variously expressed by φ ρ έ ω or φ ρ ί σ σ ω, *pavere, peur, paura, pavor* (Span.), *fear, furcht, frykt* (Scandin.), and *braw* (Old Celtic). In all these cognate words, the common rudimentary idea is expressed by the same two sounds, the third corresponding with the various non-essential additions, by which apparent triliteral uniformity is secured in Shemitic dialects. Again, in the Shemitic family many primitives may be found, having the same two letters in common in the first and second places, with a different one in the third, yet all expressive of different modifications of the same idea, as 1. כר and its family; 2. דחה = دحض, etc.; 3. פר = ثر, etc.; 4. קץ = قطّ, etc. — each with a similar train of cognate words, containing the same two consonants of the biliteral form, but with a third active consonant added.[f]

28. We now approach a question of great interest. Was the art of writing invented by Moses and his contemporaries, or from what source did the Hebrew nation acquire it? It can hardly be doubted, that the art of writing was known to the Israelites in the time of Moses. An art, such as that of writing, is neither acquired nor invented at once. No trustworthy evidence can be alleged of such an exception to the ordinary course. The writing on the two tables of the law (Ex. xxiv. 4) — the list of stations attributed to the hand of Moses himself (Num. xxxiii. 2) — the prohibition of printing on the body (Lev. xix. 28) — the writing of "the curses in a book" by the priest, in the trial of jealousy (Num. v. 23) — the description of the land (literally, the writing) required by Joshua (Josh. xviii. 6) — all point to the probability of the art of writing being an accomplishment already possessed by the Hebrews at that period. So complex a system as alphabetic writing could hardly have been invented in the haste and excitement of the desert pilgrimage.

Great difference of opinion has prevailed as to which of the Shemitic peoples may justly claim the invention of letters. As has been said, the award to the Phœnicians, so long unchallenged, is now practically set aside. The so-called Phœnician alphabet bears no distinctive traces of a Phœnician origin. None of the selected objects, whose initial letters were to rule the sounds of the several phonetic characters, are in keeping with the habits and

[a] Walton, *Prol.* (ed. Wrangham), i. 121. "Hoc ætioni minime consentaneum est, ut Deus in illo loco linguam primam servaret, ubi linguarum diversitatem immiserat, ne cœpto opere progrederentur. Probabilius itaque est, linguas alias in eos Deum infudisse, quas sibi commorati sunt, ne se mutuo intelligerent, et ob insanæ structuræ desisterent." M. Müller, *Sc. of Lang.* p. 209.

occupations of the Phœnicians. On the contrary, while no references to the sea and commerce are to be found, the majority of the objects selected are such as would suggest themselves to an inland and nomadic people, *e. g.* Aleph = an ox, Gimel = a camel, Teth = a snake, Lamed = an ox-goad.

A more probable theory would seem that which represents letters as having passed from the Egyptians to the Phœnicians and Hebrews. Either people may have acquired this accomplishment from the same source, at the same time and independently — or one may have preceded the other, and subsequently imparted the acquisition. Either case is quite possible, on the assumption that the Egyptian alphabet consisted of only such characters as were equivalent to those used by the Hebrews and Phœnicians — that is, that the multiplicity of signs, which is found to exist in the Egyptian alphabet, was only introduced at a later period. But the contrary would seem to be the case — namely, that the Egyptian alphabet existed at a very early period in its present form. And it is hardly likely that two tribes would separately have made the same selection from a larger amount of signs than they required. But as the Hebrew and Phœnician alphabets do correspond, and (as has been said) the character is less Phœnician than Hebrew — the latter people would seem to have been the first possessors of this accomplishment, and to have imparted it subsequently to the Phœnicians.

The theory (now almost passed into a general belief) of an early uniform language overspreading the range of countries comprehended in Gen. x. serves to illustrate this question. There can be no doubt as to the fact of the Hamite occupants of Egypt having migrated thither from Asia; nor (on this hypothesis) can there be any difficulty in admitting, in a certain degree, the correspondence of their written character with the Hebrew. That changes should subsequently have been introduced in the Egyptian characters, is perfectly intelligible, when their advances in civilization are considered — so different from the nomadic, unlettered condition of the Hebrew people. On such a primary, generic agreement as this between the advanced language of Egypt, and that of the Hebrews — inferior from necessary causes at the time, the mighty intellect of Moses, divinely guided for such a task (as has been before suggested), would find little difficulty in grafting improvements. The theory that the Hyksos built a syllabic alphabet on the Egyptian, is full of difficulties.[a]

According to the elaborate analysis of Lepsius, the original alphabet of the language-family, of which the Shemitic formed a part, stood as follows: —

| *Weak Gutturals.* | *Labials.* | *Gutturals.* | *Dentals.* |
|---|---|---|---|
| Aleph = A . | Beth + | Gimel + | Daleth = Media |
| He = E + i . | Vav + | Heth + | Teth = Aspirates |
| Ghain = O + u | Pe + | Kuph + | Tau = Tenues |

As the processes of enunciation became more delicate, the liquids Lamed, Mem, Nun, were apparently interposed as the *third* row, with the original S, Samech, from which were derived Zain, Tsaddi, and Shin — Caph (*soft k*), from its limited functions, is apparently of later growth: and the separate existence of Resh, in many languages, is demonstrably of comparatively recent date, as distinguished from the kindred sound Lamed. In this manner (according to Lepsius), and by such Shemite equivalents, may be traced the progress of the parent alphabet. In the one letter yet to be mentioned — Yod — as in Kuph and Lamed, the same scholar finds remains of the ancient vowel strokes, which carry us back to the early syllabaria, whose existence he maintains, with great force and learning.

Apparently, in the case of all Indo-Germanic and Shemitic alphabets, a parent alphabet may be traced, in which each letter possessed a combined vowel and consonant sound — each in fact forming a distinct, well understood syllable. It is curious to mark the different processes, by which (in the instances given by Lepsius) these early syllabaria have been affected by the course of enunciation in different families. What has been said above (§ 21), may serve to show how far the system is still in force in the Ethiopic. In the Indo-Germanic languages of Europe, where a strong tendency existed to draw a line of demarcation between vowels and consonants, the primary syllables aleph, he, gho = *a*, *i*, *u*, were soon stripped of their weak guttural (or consonant) element, to be treated simply as the vowel sounds named, in combination with the more obvious consonant sounds. A very similar course was followed by the Shemitic family, the vowel element being in most letters disregarded; but the guttural one in the breath-syllables was apparently too congenial, and too firmly fixed to allow of these being converted (as in the case of the Indo-Germanic family) into simple vowels. Aleph, the weakest, for that reason forms the exception. As apparently containing (like the Dêvanâgari) traces of its people's syllabarium, as well for its majestic forms, befitting Babylonian learning, Lepsius with others attributes a very high antiquity to the square Hebrew character. But this is difficult to be maintained.[b]

29. Passing from the growth of the alphabet, to the history of the formation of their written characters among the three leading branches of the Shemitic family, that of the Hebrews has been thus sketched. "In its oldest, though not its original state, it exists in Phœnician monuments, both stones and coins. It consists of 22 letters, written from right to left, and is characterized generally by stiff straight down strokes, without regularity and beauty, and by closed heads round or pointed. We have also a twofold memorial of it, namely, the inscriptions on Jewish coins, struck under the Maccabean princes, where it is evident that its characters resemble the Phœnician, and the Samaritan character, in which the Pentateuch of the Samaritans is written.[c] This latter differs from the first named, merely by a few freer and finer strokes. The development of the written character in the Aramaic branch of the Shemitic family illustrates the passage from the stiff early character, spoken of above, to the more fully formed angular one of later times in the case of the Hebrew family, and in that of the Arabic, to the Cufic and Neshki

Aramaic writing may be divided into two principal families — (1.) ancient Aramaic, and (2.) Syriac, more properly so called. Of the first, the most early specimen extant is the well-known Carpentras stone, preserved at that place in France, since the end of the 17th century.[a] Its date is very doubtful, but anterior to those of the inscriptions from Palmyra, which extend from A. D. 49, to the 3d century. The first very closely resembles the Phœnician character — the tops of the letters being but slightly opened; in the second, these are more fully opened, and many horizontal strokes of union added, showing its cursive character. From these remains may be fairly deduced the transitional nature of the written character of the period preceding the invention (or according to others the revival) of the square character.

Hupfeld, Fürst, and all leading writers on the subject, concur in designating this last as a gradual development from the sources mentioned above. A reference to these authors will show how confused were even Jewish notions at an early period as to its origin, from the different explanations of the word אַשּׁוּרִית (Assyriaca), substituted by the Rabbins for מְרֻבָּע ("square"), by which this character was distinguished from their own — כְּתָב עָגֻל — "round writing," as it was called. But assuming with Hupfeld and Fürst, the presence of two active principles — a wish to write quickly, and to write pictorially — the growth of the square Hebrew character from the old Phœnician is easily discernible through the Carpentras and Palmyrene relics. "Thus we find in it the points of the letters blunted off, the horizontal union-strokes enlarged, figures that had been divided rounded and closed, the position and length of many cross lines altered, and final letters introduced agreeably to tachygraphy. On the other hand, the caligraphical principle is seen in the extraordinary uniformity and symmetry of the letters, their separation from one another, and in the peculiar taste which adorns them with a stiff and angular form."[b]

Few important changes are to be found from the period of Ezra, until the close of the 5th century of our era. During this period, the written character of the text (as well as the text itself) was settled as at present, and likewise, to a great extent, the reading and divisions of the text. During this period, the groundwork of very much contained in the subsequent Masora was laid, but as yet only in an unwritten, traditional shape. The old character gave way to the square, or Assyrian character — not at once and by the authority of Ezra, but (as has been proved with much clearness) by gradual transitions.[c] The square character is, demonstrably, not an exact copy of any existing Aramaic style, but grew by degrees out of the earlier one, although greatly modified by Aramaic influence. No exact date can be assigned to the actual change, which probably was very gradual; but that the new character had become generally adopted by the first century of our era, may be inferred from the Gospels (Matt. v. 18). It is, moreover, alluded to in the Mishna as the Assyrian character, and by Origen as settled by long usage, and was obviously well-known to Jerome and the Talmudists. The latter writers, aided powerfully by the ceremonious (not to say superstitious) tone engendered among the Jews by the fall of Jerusalem, secured the exclusive use of its square character for sacred purposes. All that external care and scrupulous veneration could accomplish for the exact transmission of the received text, in the consecrated character, was secured. It is true that much of a secondary, much of an erroneous kind was included among the objects of this devout veneration; but in the absence of sound principles of criticism, not only in those early, but many subsequent generations, this is the less to be deplored. The character called Rabbinic is best described as an attempt at Hebrew cursive writing.

The history of the characters ordinarily used in the Syriac (or Western) branch of the Aramaic family, is blended with that of those used in Judæa. Like the square characters, they were derived from the old Phœnician, but passed through some intermediate stages. The first variety is that known by the name of Estrangelo — a heavy, cumbrous character, said to be derived from the Greek adj. στρογγύλος, but more probably from two Arabic words signifying the writing of the Gospel. It is to be found in use in the very oldest documents. Concurrently with this, are traces of the existence of a smaller and more cursive character, very much resembling it. The character called the "double" (a large, hollow variety), is almost identical. There are also other varieties, slightly differing — the Nestorian for example — but that in ordinary use is the Peshito = simple (or lineal according to some). Its origin is somewhat uncertain, but probably may be assigned to the 7th century of our era. It is a modification of the Estrangelo, sloped for writing, and in some measure altered by use. This variety of written characters in the Aramaic family is probably attributable to the fact, that literature was more extensively cultivated among them than among kindred tribes. Although not spared to us, an extensive literature probably existed among them anterior to the Christian era; and subsequently for a long period they were the sole imparters of knowledge and learning to Western Asia.

The history of the Arabic language has another peculiar feature, beyond its excessive purism, which has been alluded to, at first sight, so singular among the dwellers in the desert. Until a comparatively short time before the days of Mohammed, the art of writing appears to have been practically unknown. For the Himyarites guarded with jealous care their own peculiar character — the "musnad," or elevated;[d] in itself unfitted for general use. Possibly different tribes might have possessed approaches to written characters; but about the beginning of the 7th century, the heavy, cumbrous Cufic character (so called from Cufa, the city where it was most early used) appears to have been generally adopted. It was said to have been invented by Muramar Ibn-Murrat, a native of Babylonian Irak. But the shapes and arrangement of the letters indicate their derivation from the Estrangelo; and the name assigned to their introducer — containing the title ordinarily borne by

Syrian ecclesiastics — is also indicative of their real origin. But it is now only to be found in the documents of the early ages of Islamism.

The well-known division of "the people of the book" = Christians, who were educated, and "the common people" who could not read = the tribes round Mecca, and the summary way in which an authoritative text of the Koran was established (in the Caliphate of Othman), alike indicate a very rude state of society. It is generally asserted that Mohammed was unable to write: and this would at first sight appear to be borne out by his description of himself as an illiterate prophet. Modern writers, however, generally are averse to a literal interpretation of these and kindred statements. In any case, about the 10th century (the fourth of the Hegira), a smaller and more flowing character, the Naskhi, was introduced by Ibn Moklah, which, with considerable alterations and improvements, is that ordinarily in present use.[a]

30. As in the Hebrew and Aramaic branches, so in the Arab branch of the Shemitic family, various causes rendered desirable the introduction of discritical signs and vowel points, which took place toward the close of the 7th century of our era — not however without considerable opposition at the outset, from Shemitic dislike of innovation, and addition to the roll of instruction already complete in itself. But the system obtained general recognition after some modifications in deference to popular opinion, though not carried out with the fullness of the Masoretes.[b]

Ewald, with great probability, assumes the existence and adoption of certain attempts at vowel marks at a very early period, and is inclined to divide their history into three stages.

At first a simple mark or stroke, like the discritical line in the Samaritan MSS., was adopted to mark unusual significations, as דבר, a "pestilence," as distinguished from דבר, "to speak," or "a word." A further and more advanced stage, like the discritical points of the Aramaic, was the employment (in order to express generally the difference of sounds) of a point *above* the line to express sounds of a high kind, like *a* and *o* — one *below* for feebler and lower ones like *i* and *e* — and a third in the centre of the letters for those of a harsher kind, as distinguished from the other two.[c]

Originally, the number of *vowel sounds* among the Shemitic races (as distinguished from *vowel points*) was only three, and apparently used in combination with the consonants. Origen and Jerome were alike ignorant of vowel points, in the ordinary acceptation. Many readings in the LXX. indicate the want of some such system — a want to which some directions in the Talmud are said to refer. But until a later period, a regular system of punctuation remained unknown; and the number of vowel sounds limited. The case is thus put by Walton. "The modern points were not either from Adam, or affixed by Moses, or the Prophets that were before the Captivity, nor after the Captivity, devised either by Ezra, or by any other before the completing of the Talmud, but after five hundred years after Christ, invented by some learned Jews for the help of those who were ignorant of the Hebrew tongue." "We neither affirm that the vowels and accents were invented by the Masoretes, but that the Hebrew tongue did always consist of vowels and consonants. Aleph, Vau, and Yod were the vowels before the points were invented, as they were also in the Syriac, Arabic, and other Eastern tongues."[d]

We will add one more quotation from the same author with reference to the alleged uncertainty introduced into the rendering of the text, by any doubts on the antiquity of the system of vowel-points, a question which divided the scholars of his day. "The Samaritan Pentateuch, Chaldean Paraphrase of the Pentateuch and Prophets, and the Syriac translation of the Bible, continued above a thousand years before they were pointed." "That the true reading might be preserved above a thousand years, is not against all reason, since we see the same done in the Samaritan, Syriac, and Chaldee, for a longer time; and the same may be said of the Arabic, though not for so long a time after the Alcoran was written."[e]

31. The reverence of the Jews for their sacred writings would have been outraged by any attempts to introduce an authoritative system of interpretation at variance with existing ones. To reduce the reading of the Scriptures to authoritative and intelligible uniformity was the object of the Masoretes, by means of a system of vowels and accents.

What would have suggested itself to scholars, not of Shemitic origin, was at utter variance with Hebrew notions, which looked upon the established written characters as sacred. No other plan was possible than the addition of different external marks. And, in fact, this plan was adopted by the three great divisions of the Shemitic family; probably being copied to a certain extent by the Hebrew and Arabic branches from the Syriac, among whom there existed schools of some repute during the first centuries of our era. Of the names of the inventors, or the exact time of their introduction, nothing can be stated with certainty. Their use probably began about the sixth century, and appears to have been completed about the tenth. The system has been carried out with far greater minuteness in the Hebrew, than in the two sister dialects. The Arabic grammarians did not proceed beyond three signs for *a*, *i*, *u*; the Syriac added *e* and *o*, which they represented by figures borrowed from the Greek alphabet, not very much altered. In both these cases all the vowels are, strictly speaking, to be considered as short; while the Hebrew has five long as well as five short, and a half-vowel, and other auxiliary signs. Connected with this is the system of accents, which is involved in the same obscurity of origin. But it bears rather on the relation of words and the members of sentences, than on the construction of individual words.

The chief agents in this laborious and peculiar undertaking were the compilers of the Masora, as it is called = "tradition," as distinguished from the word to be read. As the Talmud has its province of interpreting legal distinctions and regulations, under the sanction of the sacred text, and

the Kabbala its peculiar function of dealing with theological and esoteric tradition, so the object of the Masora (מָסוֹרָה, "tradition") and its compilers the Masoretes (or בַּעֲלֵי מָסוֹרָה, "masters of tradition") was to deal critically, grammatically, and lexically with a vast amount of tradition bearing on the text of Scripture, and to reduce this to a consistent form. Little is known with accuracy of the authors, or the growth of this remarkable collection. Tradition assigns the commencement (as usual) to Ezra and the great synagogue; but other authorities, Jewish and Christian, to the learned members of the school of Tiberias, about the beginning of the sixth century. These learned collections, comprising some very early fragments, were probably in progress until the eleventh century, and are divided into a greater and less Masora, the second a compendium of the former. "The masters of the Masora," in the well-known quotation of Elias Levita, "were innumerable, and followed each other in successive generations for many years; nor is the beginning of them known to us, nor the end thereof." Walton, who was by no means blind to its deficiencies, has left on record a very just judgment on the real merits of the Masora.[a] It is in truth a very striking and meritorious instance of the devotion of the Jewish mind to the text of Scripture — of the earnestness of its authors to add the only proof in their power of their zeal for its preservation and elucidation.[b]

**32.** A comparison of the Shemitic languages, as known to us, presents them as very unevenly developed. In their present form the Arabic is undoubtedly the richest: but it would have been rivaled by the Hebrew had a career been vouchsafed equally long and favorable to this latter. The cramping and perverting conditions of its labors depressed the Rabbinic dialect (child of the old age of the Hebrew) into bewildering confusion in many instances, but there are many valuable signs of life about it. Ancient Hebrew, as has been truly said, possesses in the bud almost all the mechanisms which constitute the riches of the Arabic. In the preface to his great work (*Lehrgebäude*, p. vii.) Gesenius has pointed out various instances, which will repay the labor of comparison. It is true that to the Aramaic has been extended a longer duration than to the Hebrew; but for various causes its inferiority is remarkable, as regards its poverty — lexical and grammatical — its want of harmony and flexibility, and the consequent necessary frequency of periphrases and particles in aid.

A brief comparison of some leading grammatical and syntactical peculiarities, in the three main dialects of the Shemitic family, will not be out of place at the end of this sketch. To scholars it will necessarily appear meagre: but, brief as it is, it may not be without interest to the general reader. The root-forms with the consonants and vowels have been already considered.

*Conjugations or their Equivalent Verb-forms.* — The following is the tabulated form given by Ewald for the ordinary Hebrew verb: —

In the Aramaic the first, third, and fourth of these appear, with another (= Hithpael), all with passives, marked by a syllable prefixed. In the Arabic the verb-forms, at the lowest computation, are nine, but are ordinarily reckoned at thirteen, and sometimes fifteen. Of these, the ninth and eleventh forms are comparatively rare, and serve to express colors and defects. As may be seen from the table given, the third and fourth forms in Hebrew alone have passives.

*Equivalents to Conjunctive Moods, etc.* — One of the most remarkable features of the Arabic language is what is ordinarily described as the "futurum figuratum." As in almost all Shemitic grammars *imperfect* is now substituted for *future*, this may be explained by stating that in Arabic there are four forms of the imperfect, strongly marked, by which the absence of moods is almost compensated. The germs of this mechanism are to be found in the common imperfect, the jussive, and the cohortative of the Hebrew, but not in the Aramaic. Again, a curious conditional and subjunctive usage (at first sight almost amounting to an inversion) applied to the perfect and imperfect tenses by the addition of a portion, or the whole, of the substantive verb is to be found in both Hebrew and Arabic, although very differently developed.

*Nouns.* — The dual number, very uncommon in the Syriac, is less so in Hebrew, chiefly limited, however, to really *dual* nouns, while in the Arabic its usage may be described as general. What is called the "status emphaticus," *i. e.* the rendering a word definite by appending the article, is found constantly recurring in the Aramaic (at some loss to clearness in the singular). This usage brings to mind the addition of the definite article as a postpositive in Swedish — *skib*, ship; *skibet*, the ship. In the Arabic it is lost in the inflections of cases, while in the Hebrew it may be considered as unimportant. As regards nouns of abstraction, also, the Aramaic is fuller than the Hebrew; but in this last particular, as in the whole family of nouns, the Arabic is rich to excess. It is in this last only that we find not only a regular system of cases, and of comparison, but especially the numerous plural formations called broken or internal, which form so singular a part of the language. As regards their meaning, the broken plurals are totally different from the regular (or, as they are technol-

Digitized by Google

sally called, sound) plurals — the latter denoting several individuals of a genus, the former a number of individuals viewed collectively, the idea of individuality being wholly suppressed. Broken plurals accordingly are singulars with a collective meaning, and are closely akin to abstract nouns.[a]

33. To the scholar, as before remarked, this recapitulation of some leading peculiarities may appear unnecessary, while to those unacquainted with the Shemitic languages, it is feared, these instances must unavoidably appear like fragments or specimens, possibly new and peculiar, but conveying no very definite instruction. But in any case some of the chief grammatical features of the family have been enumerated — all, moreover, illustrative of the internal, self-contained type so peculiarly Shemitic. In this respect, as with its formal, so with its syntactical peculiarities. Of one fertile parent of new words in the Japhetian language-family, — the power of creating compound words, — the Shemitic is destitute. Different meanings are, it is true, expressed by different primitives, but these stand necessarily divided by impassable barriers from each other; and we look in vain for the shades and gradations of meaning in a word in the Shemitic languages which gives such copiousness and charm to the sister-family. It is so with regard to the whole range of privative and negative words. The prefixes of the other family, in conjunction with nouns, give far more life and clearness than do the collective verbals of the Shemitic. Even the pregnant and curiously jointed verb-forms, spreading out from the sharply defined root, with pronominal adjuncts of obvious meaning, and the aid of a delicate vowel-system, have an artificial appearance. The Japhetian, whose spiritual fullness would probably never have reached him, but that its substance was long preserved in these very forms, will gratefully acknowledge the wisdom of that Almighty Being who framed for the preservation of the knowledge of Himself — the One True God — so fitting a cradle as the language of the Old Testament. Of other families, the Japhetian was not ripe for such a trust. Of those allied with the Shemitic, the Aramaic was too coarse and indefinite, however widely and early spread, or useful at a later period as a means of extension and explanation, and (as has been before observed) the Arabic in its origin was essentially of the earth, earthy. The Japhetian cannot then but recognize the wisdom, cannot but thank the goodness of God, in thus giving and preserving his lessons concerning Himself in a form so fitting and so removed from treachery. He will do all this, but he will see at the same time in his own languages, so flexible, so varied, so logical, drawing man out of himself to bind him to his neighbor, means far more likely to spread the treasures of the holy language than even its general adoption. It is Humboldt who has said, in reference to the wonderful mechanism discernible in the consonant and vowel systems of the Shemitic languages — that, admitting all this, there is more energy and weight, more truth to nature, when the elements of language can be recognized independently and in order, than when fused in such a combination, however remarkable.

And from this rigid, self-contained character the Shemitic language-family finds difficulty in departing. The more recent Syriac has added various auxiliary forms, and repeated pronouns, to the characteristic words by which the meaning is chiefly conveyed. But the general effect is cumbrous and confused, and brings to mind some features of the ordinary Welsh version of the Epistles. In Arabic, again, certain prefixes are found to be added for the sake of giving definiteness to portions of the verb, and prepositions more frequently employed. But the character of the language remains unaltered — the additions stand out as something distinct from the original elements of the sentence.

In what consists the most marked point of difference between the Indo-European family of languages and the Shemitic family as known to us? The first has lived two lives, as it were: in its case a period of synthesis and complexity has been succeeded by another of analysis and decomposition. The second family has been developed (if the word may be used) in one way only. No other instance of a language-family can probably be found cast in a mould equally unalterable. Compared with the living branches of the Indo-European family, those of the Shemitic may be almost designated as inorganic: they have not vegetated, have not grown; they have simply existed.[b] T. J. O.

**SHEMU'EL** (שְׁמוּאֵל [= SAMUEL, which see]: Σαλαμιήλ: *Samuel*). 1. Son of Ammihud, appointed from the tribe of Simeon to divide the land of Canaan among the tribes (Num. xxxiv. 20).

2. (Σαμουήλ.) SAMUEL the prophet (1 Chr. vi. 33).

3. [Vat. Ισαμουηλ.] Son of Tola, and one of the chiefs of the tribe of Issachar (1 Chr. vii. 2).

**SHEN** (הַשֵּׁן, with the def. article [*the tooth*]: τῆς παλαιᾶς: *Sen*). A place mentioned only in 1 Sam. vii. 12, defining the spot at which Samuel set up the stone Eben-ezer to commemorate the rout of the Philistines. The pursuit had extended to "below Beth-car," and the stone was erected "between the Mispah and between the Shen." Nothing is known of it. The Targum has *Shinna*. The Peshito-Syriac and Arabic Versions render both Beth-car and Shen by *Beit-Jasan*, but the writer has not succeeded in identifying the name with any place in the lists of Dr. Robinson (1st ed. App. to vol. iii.). The LXX. read יָשָׁן, *yâshân*, old. G.

**SHENA'ZAR** (שְׁנְאַצַּר [*fiery tooth*, Ges.]: Σανεσάρ; [Comp. Σαναζάρ:] *Senneser*). Son of Salathiel, or Shealtiel (1 Chr. iii. 18). According to the Vulgate he is reckoned as a son of Jechoniah.

**SHE'NIR** (שְׂנִיר, *i. e.* Senîr [*coat of mail*]: Sam. Vers. משעבדן: [Rom. Σανίρ; Vat. Alex.] Σανειρ; [Sin. in Cant., Σανιειρ:] *Sanir*). This name occurs in Deut. iii. 9, Cant. iv. 8. It is an inaccurate equivalent for the Hebrew *Senîr*, the Amorite name for Mount Hermon, and, like Shibmah (for Sibmah), has found its way into the Au

[a] Wright's *Arabic Grammar*, part i. p. 189. "Cette partie de la grammaire Arabe est celle où il règne le plus d'arbitraire, et où les règles générales sont sujettes à un plus grand nombre d'exceptions." De Sacy i. 279 (ed. 1810).

[b] Renan, i. 423, 424.

thorised Version without any apparent authority. The correct form is found in 1 Chr. v. 23 and Ez. xxvii. 5. [SENIR.] G.

• **SHE'OL.** [DEAD, THE· HELL; PIT.]

• **SHEOL, BANDS OF** [SNARES OF DEATH, Amer. ed.]

**SHE'PHAM** (שְׁפָם: Σεφαμάρ;[a] [Comp. Aid. Σεφαμά:] *Sephama*). A place mentioned only in the specification by Moses of the eastern boundary of the Promised Land (Num. xxxiv. 10, 11), the first landmark from Hatser-enan, at which the northern boundary terminated, and lying between it and Riblah. The ancient interpreters (Targ. Pseudojon.; Saadiah) render the name by Apamea;[b] but it seems uncertain whether by this they intend the Greek city of that name on the Orontes, 50 miles below Antioch, or whether they use it as a synonym of Banias or Dan, as Schwarz affirms (*Descr. Geogr.* p. 27). No trace of the name appears, however, in that direction. Mr. Porter would fix Hatser-enan at *Kuryetein*, 70 miles E. N. E. of Damascus, which would remove Shepham into a totally different region, in which there is equally little trace of it. The writer ventures to disagree with this and similar attempts to enlarge the bounds of the Holy Land to an extent for which, in his opinion, there is no warrant in Scripture. G.

**SHEPHATHI'AH** (שְׁפַטְיָה [*Jehovah judges*, or *is judge*]: Σαφατία: *Saphatia*). A Benjamite, father of MESHULLAM 6 (1 Chr. ix. 8). The name is properly SHEPHATIAH [as in A. V. ed. 1611].

**SHEPHATI'AH** (שְׁפַטְיָה [as above]: Σαφατία; [Vat. Σαβατεια:] Alex. Σαφαθια, Σαφατας: *Saphathia, Saphatius*). 1. The fifth son of David by his wife Abital (2 Sam. iii. 4; 1 Chr. iii. 3).

2. (Σαφατία; [in Ezr. ii. 4, Vat. Ασαφ; viii. 8, Σαφατεια:] *Sephatia, Saphatia.*) The family of Shephatiah, 372 in number, returned with Zerubbabel (Ezr. ii. 4; Neh. vii. 9). A second detachment of eighty, with Zebadiah at their head, came up with Ezra (Ezr. viii. 8). The name is written SAPHAT (1 Esdr. v. 9), and SAPHATIAS (1 Esdr. viii. 34).

3. ([In Ezr. ii. 57, Vat. Σαφατεια:] *Saphatia.*) The family of another Shephatiah were among the children of Solomon's servants, who came up with Zerubbabel (Ezr. ii. 57; Neh. vii. 59).

4. A descendant of Perez, or Pharez, the son of Judah, and ancestor of Athaiah (Neh. xi. 4).

5. (Σαφατίας: *Saphatias.*) The son of Mattan; one of the princes of Judah who counselled Zedekiah to put Jeremiah in the dungeon (Jer. xxxviii. 1).

6. (שְׁפַטְיָהוּ: Σαφατίας; [Vat.] Alex. Σαφατα; FA. Σαφατεια: *Saphatia.*) The Haruphite, or Hariphite, one of the Benjamite warriors who joined David in his retreat at Ziklag (1 Chr. xii. 5).

7. (Σαφατίας: *Saphatias.*) Son of Maachah, and chief of the Simeonites in the reign of David (1 Chr. xxvii. 16).

8. (Σαφατίας; [Vat. Σαφατειας.] Alex. Σαφατιας.) Son of Jehoshaphat (2 Chr. xxi. 2).

**SHEPHERD** (רֹעֶה; בּוֹקֵר, Am. vii. 14 נֹקֵד, Am. i. 1). In a nomadic state of society every man, from the sheikh down to the slave, is more or less a shepherd. As many regions in the East are adapted solely to pastoral pursuits, the institution of the nomad life, with its appliances of tents and camp equipage, was regarded as one of the most memorable inventions (Gen. iv. 20). The progenitors of the Jews in the patriarchal age were nomads, and their history is rich in scenes of pastoral life. The occupation of tending the flocks was undertaken, not only by the sons of wealthy chiefs (Gen. xxx. 29 ff., xxxvii. 12 ff.), but even by their daughters (Gen. xxix. 6 ff.; Ex. ii. 19). The Egyptian captivity did much to implant a love of settled abode, and consequently we find the tribes which still retained a taste for shepherd life selecting their own quarters apart from their brethren in the Transjordanic district (Num. xxxii. 1 ff.). Henceforward in Palestine Proper the shepherd held a subordinate position; the increase of agriculture involved the decrease of pasturage; and though large flocks were still maintained in certain parts, particularly on the borders of the wilderness of Judah, as about Carmel (1 Sam. xxv. 2), Bethlehem (1 Sam. xvi. 11; Luke ii. 8), Tekoah (Am. i. 1), and more to the south, at Gedor (1 Chr. iv. 39), the nomad life was practically extinct, and the shepherd became one out of many classes of the laboring population. The completeness of the transition from the pastoral to the agricultural state is strongly exhibited in those passages which allude to the presence of the shepherd's tent as a token of desolation (*e. g.* Ez. xxv. 4; Zeph. ii. 6). The humble position of the shepherd at the same period is implied in the notices of David's wondrous elevation (2 Sam. vii. 8; Ps. lxxviii. 70), and again in the self-depreciating confession of Amos (vii. 14). The frequent and beautiful allusions to the shepherd's office in the poetical portions of the Bible (*e. g.* Ps. xxiii.; Is. xl. 11, xlix. 9, 10; Jer. xxiii. 3, 4; Ez. xxxiv. 11, 12, 23) rather bespeak a period when the shepherd had become an ideal character, such as the Roman poets painted the pastors of Arcadia.

The office of the eastern shepherd, as described in the Bible, was attended with much hardship, and even danger. He was exposed to the extremes of heat and cold (Gen. xxxi. 40); his food frequently consisted of the precarious supplies afforded by nature, such as the fruit of the "sycomore," or Egyptian fig (Am. vii. 14), the "husks" of the carob-tree (Luke xv. 16), and perchance the locusts and wild honey which supported the Baptist (Matt. iii. 4); he had to encounter the attacks of wild beasts, occasionally of the larger species, such as lions, wolves, panthers, and bears (1 Sam. xvii. 34; Is. xxxi. 4; Jer. v. 6; Am. iii. 12); nor was he free from the risk of robbers or predatory hordes (Gen. xxxi. 39). To meet these various foes the shepherd's equipment consisted of the following articles: a mantle, made probably of sheep's-skin with the fleece on, which he turned inside out in cold weather, as implied in the comparison in Jer.

[a] The *ar* at the end of the LXX. version of the name is partly due to the *ah* (particle of motion) which is affixed to it in the original of ver. 10, and partly derived from the commencement of Riblah, which follows it in ver. 11 and which they have given without its *r*, as Βηλα.

[b] אַפְמִיאָה: فامية: Sam. Vers עפמיה.

Digitized by Google

xliii. 12 (*cf.* Juv. xiv. 187); a scrip or wallet, containing a small amount of food (1 Sam. xvii. 40; Porter's *Damascus*, ii. 100); a sling, which is still the favorite weapon of the Bedouin shepherd (1 Sam. xvii. 40; Burckhardt's *Notes*, i. 57); and, lastly, a staff, which served the double purpose of a weapon against foes, and a crook for the management of the flock (1 Sam. xvii. 40; Ps. xxiii. 4; Zech. xi. 7). If the shepherd was at a distance from his home, he was provided with a light tent (Cant. i. 8; Jer. xxxv. 7), the removal of which was easily effected (Is. xxxviii. 12). In certain localities, moreover, towers were erected for the double purpose of spying an enemy at a distance, and protecting the flock: such towers were erected by Uzziah and Jotham (2 Chr. xxvi. 10, xxvii. 4), while their existence in earlier times is testified by the name Migdal-Eder (Gen. xxxv. 21, A. V. "tower of Edar;" Mic. iv. 8, A. V. "tower of the flock").

The routine of the shepherd's duties appears to have been as follows: in the morning he led forth his flock from the fold (John x. 4), which he did by going before them and calling to them, as is still usual in the East; arrived at the pasturage, he watched the flock with the assistance of dogs (Job xxx. 1), and, should any sheep stray, he had to search for it until he found it (Ez. xxxiv. 12; Luke xv. 4); he supplied them with water, either at a running stream or at troughs attached to wells (Gen. xxix. 7, xxx. 38; Ex. ii. 16; Ps. xxiii. 2); at evening he brought them back to the fold, and reckoned them to see that none were missing, by passing them "under the rod" as they entered the door of the inclosure (Lev. xxvii. 32; Ez. xx. 37), checking each sheep as it passed, by a motion of the hand (Jer. xxxiii. 13); and, finally, he watched the entrance of the fold throughout the night, acting as porter (John x. 3). We need not assume that the same person was on duty both by night and by day; Jacob, indeed, asserts this of himself (Gen. xxxi. 40), but it would be more probable that the shepherds took it by turns, or that they kept watch for a portion only of the night, as may possibly be implied in the expression in Luke ii. 8, rendered in the A. V. "keeping watch," rather "keeping the watches" (φυλάσσοντες φυλακάς). The shepherd's office thus required great watchfulness, particularly by night (Luke ii. 8; *cf.* Nah. iii. 18). It also required tenderness towards the young and feeble (Is. xl. 11), particularly in driving them to and from the pasturage (Gen. xxxiii. 13). In large establishments there were various grades of shepherds, the highest being styled "rulers" (Gen. xlvii. 6), or "chief shepherds" (1 Pet. v. 4): in a royal household the title of *abbir*,[a] "mighty," was bestowed on the person who held the post (1 Sam. xxi. 7). Great responsibility attached to the office; for the chief shepherd had to make good all losses (Gen. xxxi. 39); at the same time he had a personal interest in the flock, inasmuch as he was not paid in money, but received a certain amount of the produce (Gen. xxx. 32; 1 Cor. ix. 7). The life of the shepherd was a monotonous one; he may perhaps have wiled away an hour in playing on some instrument (1 Sam. xvi. 18; Job xxi. 12, xxx. 31), as his modern representative still occasionally does (Wortabet's *Syria*, . 234). He also had his periodical entertainments at the shearing-time, which was celebrated by a general gathering of the neighborhood for festivities (Gen. xxxi. 19, xxxviii. 12; 2 Sam. xiii. 23) but, generally speaking, the life must have been but dull. Nor did it conduce to gentleness of manners; rival shepherds contended for the possession or the use of water with great acrimony (Gen. xxi. 25, xxvi. 20 ff.; Ex. ii. 17); nor perhaps is this a matter of surprise, as those who come late to a well frequently have to wait a long time until their turn comes (Burckhardt's *Syria*, p. 63).

The hatred of the Egyptians towards shepherds (Gen. xlvi. 34) may have been mainly due to their contempt for the sheep itself, which appears to have been valued neither for food (Plutarch, *De Is.* 72), nor generally for sacrifice (Herod. ii. 42), the only district where they were offered being about the Natron lakes (Strab. xvii. p. 803). It may have been increased by the memory of the Shepherd invasion (Herod. ii. 128). Abundant confirmation of the fact of this hatred is supplied by the low position which all herdsmen held in the castes of Egypt, and by the caricatures of them in Egyptian paintings (Wilkinson, ii. 169).

The term "shepherd" is applied in a metaphorical sense to princes (Is. xliv. 28; Jer. ii. 8, iii. 15, xxii. 22; Ez. xxxiv. 2, &c.), prophets (Zech. xi. 5, 8, 16), teachers (Eccl. xii. 11), and to Jehovah himself (Gen. xlix. 24; Ps. xxiii. 1, lxxx. 1): to the same effect are the references to "feeding" in Gen. xlviii. 15; Ps. xxviii. 9; Hos. iv. 16.

W. L. B.

* **SHEPHERDS, TOWER OF** (Gen. xxxv. 21). [DAVID, vol. i. p. 553 *a*.]

**SHE'PHI** (שֵׁפִי [*a naked hill*, Ges.]: Σωφί, Alex. Σωφαρ: *Sephi*). Son of Shobal, of the sons of Seir (1 Chr. i. 40). Called also SHEPHO (Gen. xxxvi. 23); which Burrington concludes to be the true reading (*Geneal.* i. 49).

**SHE'PHO** (שֵׁפוֹ [*smoothness*]: Σωφώ: *Sepho*). The same as SHEPHI (Gen. xxxvi. 23).

**SHEPHU'PHAN** (שְׁפוּפָן [*serpent*]: Σεφουφάμ; Alex. Σωφαν: *Sephuphan*). One of the sons of Bela the firstborn of Benjamin (1 Chr. viii. 5). His name is also written SHEPHUPHAM (A. V. "Shuphan," Num. xxvi. 39), SHUPPIM (1 Chr. vii. 12, 15), and MUPPIM (Gen. xlvi. 21). Lord A. Hervey conjectures that Shephuphan may have been a son of Benjamin, whose family was reckoned with those of Iri the son of Bela. [MUPPIM.]

**SHE'RAH** (שֵׁאֵרָה, i. e. *Shekhâh* [*kinswoman*]: Σαρά: Alex. Σααρα: *Sara*). Daughter of Ephraim (1 Chr. vii. 24), and foundress of the two Beth-horons, and of a town which was called after her UZZEN-SHERAH.

* **SHERD.** [POTSHERD; POTTERY.]

**SHEREBI'AH** (שֵׁרֵבְיָה [*heat of Jehovah*, Ges.]: Σαραΐα, Ezr. viii. 24; Σαραβίας, Neh. viii. 7, ix. 4; Σαραβία, Neh. x. 12, xii. 8, 24; Alex. Σαραβια, Neh. viii. 7; Σαραβαΐα, Neh. ix. 4: *Sarabias*, Ezr.; *Serebia*, Neh. viii. 7, x. 12, xii. 24; *Sarebias*, Neh. ix. 4; *Sarebia*, Neh. xii. 8). A Levite in the time of Ezra, of the family of Mahli the son of Merari (Ezr. viii. 18, 24). He was one of the first of the ministers of the Temple to join Ezra at the river of Ahava, and with Hashabiah and ten of their brethren [b] had the charge of the

[a] אַבִּיר.

[b] They are called "priests;" but the term is used loosely, as in Josh. iii. 3.

Digitized by Google

vessels and gifts which the king and his court, and the people of Israel had contributed for the service of the Temple. When Ezra read the Law to the people, Sherebiah was among the Levites who assisted him (Neh. viii. 7). He took part in the psalm of confession and thanksgiving which was sung at the solemn fast after the Feast of Tabernacles (Neh. ix. 4, 5), and signed the covenant with Nehemiah (Neh. x. 12). He is again mentioned as among the chief of the Levites who belonged to the choir (Neh. xii. 8, 24). In 1 Esdr. viii. 54 he is called ESEBRIAS.

**SHE'RESH** (שֶׁרֶשׁ in pause [*root*]: Σοῦρος; Alex. Σορος: *Sares*). Son of Machir the son of Manasseh by his wife Maachah (1 Chr. vii. 16).

**SHERE'ZER** (שַׂרְאֶצֶר [=SHAREZER]: Σαρασδο: *Sarasar*). Properly "Sharezer;" one of the messengers sent in the fourth year of Darius by the people who had returned from the Captivity to inquire concerning fasting in the fifth month (Zech. vii. 2). [See REGEMMELECH.]

* **SHERIFFS** (תִּרְתַּי) only in Dan. iii. 2, 3, enumerated among the high officers of state at Babylon. Their exact province is unknown. The etymology (see Fürst, *s. v.*) is too obscure to decide their position or duties. According to the English designation they may have been an order of judges, as "sheriff" has sometimes that meaning. They are more commonly supposed to have been lawyers or jurists who acted as the king's advisers, or the state councillors, and as such held a high position under the government. Gesenius (*Hebr. u. Chald. Lex.* s. v.) compares them with the Mufti, the head doctors of the law in the Turkish empire. De Wette translates the title *Rechtsgelehrten*, and H. A. Perret-Gentil *les jurisconsultes*. H.

**SHE'SHACH** (שֵׁשַׁךְ [see below]: [Comp. Σησάχ, Ἰεσδὰχ:] *Sesach*) is a term which occurs only in Jeremiah (xxv. 26, li. 41), who evidently uses it as a synonym either for Babylon or for Babylonia. According to some commentators, it represents "Babel" on a principle well known to the later Jews — the substitution of letters according to their position in the alphabet, counting *backwards* from the last letter, for those which hold the same numerical position, counting in the ordinary way. Thus ת represents א, ש represents ב, ר represents ב, and so on. It is the fact that in this way שֵׁשַׁךְ would represent בבל. It may well be doubted, however, if this fanciful practice is as old as Jeremiah. At any rate, this explanation does not seem to be so satisfactory as to make any other superfluous. Now Sir H. Rawlinson has observed that the name of the moon-god, which was identical, or nearly so, with that of the city of Abraham, Ur (or Hur), "might have been read in one of the ancient dialects of Babylon as *Shishaki*," and that consequently "a possible explanation is thus obtained of the Sheshach of Scripture" (Rawlinson's *Herodotus*, vol. i. p. 616). Sheshach may stand for Ur, Ur itself, the old capital, being taken (as Babel, the new capital, was constantly) to represent the country. G. R.

**SHE'SHAI** [2 syl.] (שֵׁשַׁי [*whitish*, Ges.]: Σεσσί [Vat. -σει], Num. and Judg.; Σουσί [Vat. σει], Josh.; Alex. Σεμει, Σουσαι, Γεθθι: *Sisai*, Num.; *Sesai*). One of the three sons of Anak who dwelt in Hebron (Num. xiii. 22) and were driven thence and slain by Caleb at the head of the children of Judah (Josh. xv. 14; Judg. i. 10).

**SHE'SHAN** (שֵׁשָׁן [perh. *city*]: Σωσάν; [Vat. twice Σοσαμ:] *Sesan*). A descendant of Jerahmeel the son of Hezron, and representative of one of the chief families of Judah. In consequence of the failure of male issue, he gave his daughter in marriage to Jarha, his Egyptian slave, and through this union the line was perpetuated (1 Chr. ii. 31, 34, 35).

**SHESHBAZ'ZAR** (שֵׁשְׁבַּצַּר [Pers., *fire-worshipper*, Ges.]: Σασαβασσάρ; [Σαβανασσάρ: Vat. Σαβανασαρ, Βαγασαρ, Σαρβαγαρ:] Alex. Σασαβασσαρ, [Σασαβασσαρος:] *Sassabasar*: of uncertain meaning and etymology). The Chaldæan or Persian name given to Zerubbabel, in Ezr. i. 8, 11, v. 14, 16; 1 Esdr. ii. 12, 15, after the analogy of Shadrach, Meshach, Abednego, Belteshazzar, and Esther. In like manner also Joseph received the name of Zaphnath-Paneah, and we learn from Manetho, as quoted by Josephus (*c. Apion.* i. 28), that Moses' Egyptian name was Osarsiph. The change of name in the case of Jehoiakim and Zedekiah (2 K. xxiii. 34, xxiv. 17) may also be compared. That Sheshbazzar means Zerubbabel is proved by his being called the prince of Judah (הַנָּשִׂיא), and governor (פֶּחָה), the former term marking him as the head of the tribe in the Jewish sense (Num. vii. 2, 10, 11, &c.), and the latter as the Persian governor appointed by Cyrus, both which Zerubbabel was; and yet more distinctly, by the assertion (Ezr. v. 16) that "Sheshbazzar laid the foundation of the House of God which is in Jerusalem," compared with the promise to Zerubbabel (Zech. iv. 9), "The hands of Zeruboabel have laid the foundation of this house, his hands shall also finish it." It is also apparent, from the mere comparison of Ezr. i. 11 with ii. 1, 2, and the whole history of the returned exiles. The Jewish tradition that Sheshbazzar is Daniel, is utterly without weight. [ZERUBBABEL.] A. C. H.

**SHETH** (שֵׁת [see below]: Σήθ: *Seth*). 1. The patriarch SETH (1 Chr. i. 1).

2. In the A. V. of Num. xxiv. 17, שֵׁת is rendered as a proper name, but there is reason to regard it as an appellative, and to translate, instead of "the sons of Sheth," "the sons of tumult," the wild warriors of Moab, for in the parallel passage, Jer. xlviii. 45, שָׁאוֹן, *shâôn*, "tumult," occupies the place of *shêth*. שֵׁת, *shêth*, is thus equivalent to שְׁאֵת, *shêth*, as in Lam. iii. 47. Ewald proposes, very unnecessarily, to read שֵׁת, *sêth* = שְׁאֵת, and to translate "the sons of haughtiness" (*Hochmuthssöhne*). Rashi takes the word as a proper name, and refers it to Seth the son of Adam, and this seems to have been the view taken by Onkelos, who renders, "he shall rule all the sons of men." The Jerusalem Targum gives, "all the sons of the East;" the Targum of Jonathan ben-Uzziel retains the Hebrew word Sheth, and explains it of the armies of Gog who were to set themselves in battle array against Israel.

**SHE'THAR** (שֵׁתָר [Pers. *a star*]: Σαρσα

Digitized by Google

Σαῖος; Alex. Σαρεσθεος; [FA.[1] Αρκεσαος:] *Sethar*: "a star," Pers.). One of the seven princes of Persia and Media, who had access to the king's presence, and were the first men in the kingdom, in the third year of Xerxes (Esth. i. 14). Compare Ezr. vii. 14 and the ἑπτὰ τῶν Περσῶν ἐπίσημοι of Ctesias (14), and the statement of Herodotus with regard to the seven noble Persians who slew Smerdis, that it was granted to them as a privilege to have access to the king's presence at all times, without being sent for, except when he was with the women; and that the king might only take a wife from one of these seven families, iii. 84, and Gesen. s. v. [CARSHENA; ESTHER.]

A. C. H.

**SHETHAR-BOZNAI** (שְׁתַר בּוֹזְנַי: Σαθαρ-βουζαναΐ [Vat. -ανα, -αν]; Alex. -ανης, [ανε, -ανα:] *Sitharbuzni*: "star of splendor"). A Persian officer of rank, having a command in the province "on this side the river" under Tatnai the satrap (פַּחַת), in the reign of Darius Hystaspis (Ezr. v. 3, 6, vi. 6, 13). He joined with Tatnai and the Apharsachites in trying to obstruct the progress of the Temple in the time of Zerubbabel, and in writing a letter to Darius, of which a copy is preserved in Ezr. v., in which they reported that "the house of the great God" in Judæa was being builded with great stones, and that the work was going on fast, on the alleged authority of a decree from Cyrus. They requested that search might be made in the rolls court whether such a decree was ever given, and asked for the king's pleasure in the matter. The decree was found at Egbatana, and a letter was sent to Tatnai and Shethar-boznai from Darius, ordering them no more to obstruct, but, on the contrary, to aid the elders of the Jews in rebuilding the Temple, by supplying them both with money and with beasts, corn, salt, wine, and oil, for the sacrifices. Shethar-boznai after the receipt of this decree offered no further obstruction to the Jews. The account of the Jewish prosperity in Ezr. vi. 14–22, would indicate that the Persian governors acted fully up to the spirit of their instructions from the king.

As regards the name Shethar-boznai, it seems to be certainly Persian. The first element of it appears as the name Shethar, one of the seven Persian princes in Esth. i. 14. It is perhaps also contained in the name Pharna-zathres (Herod. vii. 65); and the whole name is not unlike Sati-barzanes, a Persian in the time of Artaxerxes Mnemon (Ctesias, 57). If the names of the Persian officers mentioned in the Book of Ezra could be identified in any inscriptions or other records of the reigns of Darius, Xerxes, and Artaxerxes, it would be of immense value in clearing up the difficulties of that book. A. C. H.

**SHE'VA** (שְׁוָא, *Keri*; שְׁוָא, 2 Sam. [SERAIAH]: Σουσά; [Vat. Ιησους:] Alex. Ισους: *Siva*). 1. The scribe or royal secretary of David (2 Sam. xx. 25). He is called elsewhere SERAIAH (2 Sam. viii. 17), SHISHA (1 K. iv. 3), and SHAVSHA (1 Chr. xviii. 16).

2. (Σαού; Alex. Σαουλ: *Sue.*) Son of Caleb ben-Hezron by his concubine Maachah, and founder or chief of Machbena and Gibea (1 Chr. ii. 49).

**SHEW BREAD.** (לֶחֶם פָּנִים, or לֶ֫ חֲפָנִים (Ex. xxv. 30, xxxv. 13, xxxix. 36, &c.) literally "bread of the face" or "faces." Onk. לְחֵם אַפַּיִם, לֶ֫ הַמְעָרְכֹת, "bread set in order." 1 Chr. ix. 32, xxiii. 29, 2 Chr. xxix. 18 Neh. x. 34, מַעֲרָכוֹת. In Num. iv. 7, we find לֶ֫ תָּמִיד, "the perpetual bread." In 1 Sam. xxi. 4–6, it is called לֶ֫ קֹדֶשׁ, "holy bread." Syr. ܟܣܦܐ ܕܦܪܘܬܐ, "bread of the Table of the Lord." The LXX. give us ἄρτοι ἐνώπιοι, Ex. xxv. 30; ἄρτοι τῆς προσφορᾶς, 1 K. vii. 48. N. T.: ἄρτοι τῆς προθέσεως, Matt. xii. 4, Luke vi. 4; ἡ προθέσις τῶν ἄρτων, Heb. ix. 2. The Vulg. *panes propositionis*. Wicliffe, "loaves of proposition." Luther, *Schaubrode*; from which our subsequent English versions have adopted the title SHEW-BREAD.)

Within the Ark it was directed that there should be a table of shittim-wood, *i. e.* acacia, two cubits in length, a cubit in breadth, and a cubit and a half in height, overlaid with pure gold, and having "a golden crown to the border thereof round about," *i. e.* a border, or list, in order, as we may suppose, to hinder that which was placed on it from by any accident falling off. The further description of this table will be found in Ex. xxv. 23–30, and a representation of it as it existed in

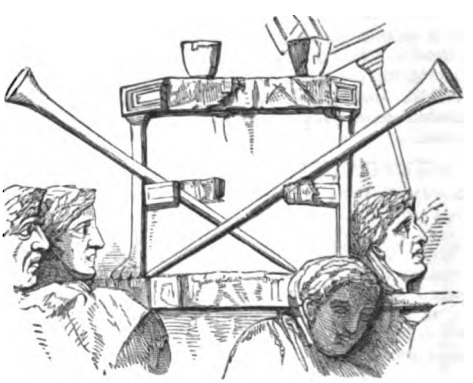

Table of Shew Bread (from relief on an Arch of Titus)

the Herodian Temple forms an interesting feature in the bas-reliefs within the Arch of Titus. The accuracy of this may, as is obvious, be trusted. It exhibits one striking correspondence with the prescriptions in Exodus. We there find the following words: "and thou shalt make unto it a border of a handbreadth round about." In the sculpture of the Arch the hand of one of the slaves who is carrying the Table, and the border, are of about equal breadth.[a] This Table is itself called שֻׁלְחַן הַפָּנִים, "the Table of the Faces," in Num. iv. 7, and שֻׁלְחַן הַטָּהוֹר, "the pure table," in Lev. xxiv. 6; and 2 Chr. xiii. 11. This latter epithet is generally referred by commentators to the unalloyed gold with which so much of it was covered. It may, however mean somewhat

[a] Taking, *i. e.* the four fingers, when closed together, as the measure of a handbreadth, as we are instructed to do by a comparison (cf. 1 K. vii. 26 and Jer. lii. 21.

Digitized by Google

more than this, and bear something of the force which it has in Malachi i. 11.

It was thought by Philo and Clement of Alexandria that the table was a symbol of the world, its four sides or legs typifying the four seasons. In the utter absence of any argument in their support, we may feel warranted in neglecting such fanciful conjectures, without calling in the aid of Bähr's arguments against them.

In 2 Chr. iv. 19, we have mention of "the tables whereon the shew bread was set," and at ver. 8 we read of Solomon making ten tables. This is probably explained by the statement of Josephus (*Ant.* viii. 3, § 7), that the king made a number of tables, and one great golden one on which they placed the loaves of God. [See TEMPLE.]

The table of the second temple was carried away by Antiochus Epiphanes (1 Macc. i. 22), and a new one made at the refurnishing of the sanctuary under Judas Maccabæus (1 Macc. iv. 49). Afterwards Ptolemy Philadelphus presented a magnificent table (Joseph. *Ant.* xii. 2, §§ 8, 9).

The table stood in the sanctuary together with the seven-branched candlestick and the altar of incense. Every Sabbath twelve newly-baked loaves were put on it in two rows, six in each, and sprinkled with incense (the LXX. add *salt*), where they remained till the following Sabbath. Then they were replaced by twelve new ones, the incense was burned, and they were eaten by the priests in the Holy Place, out of which they might not be removed. Besides these, the Shew-bread Table was adorned with dishes, spoons, bowls, etc., which were of pure gold (Ex. xxv. 29). These, however, were manifestly subsidiary to the loaves, the preparation, presentation, and subsequent treatment of which manifestly constituted the *ordinance* of the shew bread, whose probable purport and significance must now be considered.

The number of the loaves (twelve) is considered by Philo and Josephus to represent the twelve months. If there was such a reference, it must surely have been quite subordinate to that which is obvious at once. The twelve loaves plainly answer to the twelve tribes (compare Rev. xxii. 2). But, taking this for granted, we have still to ascertain the meaning of the rite, and there is none which is left in Scripture so wholly unexplained. Though it is mentioned, as we have seen, in other parts of the O. T. besides the Pentateuch, it is never more than mentioned. The narrative of David and his companions being permitted to eat the shew bread, does but illustrate the sanctity which was ascribed to it; and besides our Saviour's appeal to that narrative, the ordinance is only once referred to in the N. T. (Heb. ix. 2), and there it is merely named among the other appurtenances of the first sanctuary.

But, although unexplained, it is referred to as one of the leading and most solemn appointments of the sanctuary. For example, the appeal of Abijam to the revolted tribes (2 Chr. xiii. 10, 11) runs thus — "but as for us, the Lord is our God, and we have not forsaken Him; and the priests, which minister unto the Lord, are the sons of Aaron, and the Levites wait upon their business; and they burn unto the Lord every morning and every evening burnt-sacrifices and sweet incense; the shew bread also set they in order upon the pure table," etc., etc.

In this absence of explanation of that which is yet regarded as so solemn, we have but to seek whether the names bestowed on and the rites connected with the shew bread will lead us to some apprehension of its meaning.

The first name we find given it is obviously the dominant one, לחם פנים, "bread of the face, or faces." This is explained by some of the Rabbis, even by Maimonides, as referring to the four sides of each loaf. It is difficult to believe that the title was given on a ground which in no way distinguished them from other loaves. Besides, it is applied in Num. iv. 7, simply to the table, שלחן הפנים, not, as in the English version, the "table of shew bread," but the "shew table," the "table of the face, or faces."

We have used the words *face* or *faces*, for פנים, it needs scarcely be said, exists only in the plural, and is therefore applied equally to the face of one person and of many. In connection with this meaning, it continually bears the secondary one of *presence*. It would be superfluous to cite any of the countless passages in which it does so. But whose face or presence is denoted? That of the people? The rite of the shew bread, according to some, was performed in acknowledgment of God's being the giver of all our bread and sustenance, and the loaves lay always on the table as a memorial and monitor of this. But against this, besides other reasons, there is the powerful objection that the shew bread was unseen by the people; it lay in the sanctuary, and was eaten there by the priests alone. So that the first condition of symbolic instruction was wanting to the rite, had this been its meaning.

The פנים, therefore, or Presence, is that not of the people but of God. The ἄρτοι ἐνάντιοι and the ἄρτοι τῆς προσφορᾶς of the LXX. seem to indicate as much. To say nothing of 1 Sam. xxi. 6, where the words ל״ חפנים המוסרים מלפני יהוה seem decisive of the whole question. But in what sense? Spencer and others consider it bread offered to God as was the Minchah, a symbolical meal for God somewhat answering to a heathen *Lectisternium*. But it is not easy to find this meaning in the recorded appointments. The incense is no doubt to be burnt on the appointed altar, but the bread, on the Sabbath following that of its presentation, is to be eaten in the Holy Place by the priests. There remains, then, the view which has been brought out with such singular force and beauty by Bähr — a view broad and clear in itself, and not disturbed by those fanciful theories of numbers which tend to abate confidence in some parts of his admirable *Symbolik*.

He remarks, and justly, that the phrase פנים is applied solely to the table and the bread, not to the other furniture of the sanctuary, the altar of incense, or the golden candlestick. There is something therefore peculiar to the former which is denoted by the title. Taking הפנים as equivalent to the *Presence* (*of God* subaud.), he views the application of it to the table and the bread as analogous to its application to the angel, מלאך פנים (Is. lxiii. 9, compared with Ex. xxxiii. 14, 15; Deut. iv. 37). Of the Angel of God's Presence it is said that God's "Name is in Him" (Ex. xxiii. 20). The Presence and the Name may therefore be taken as equivalent. Both

Digitized by Google

in reference to their context, indicate the manifestation of God to his creatures. "The Name of God," he remarks, "is Himself, but that, in so far as He reveals Himself, the face is that wherein the being of a man proclaims itself, and makes known its individual personality. Hence, as Name stands for He or Himself, so Face for *Person: to* see the Face, for, to see the Person. The Bread of the Face is therefore that bread through which God is seen, that is, with the participation of which the seeing of God is bound up, or through the participation of which man attains the sight of God. Whence it follows that we have not to think of bread merely as such, as the means of nourishing the bodily life, but as spiritual food, as a means of appropriating and retaining that life which consists in seeing the face of God. Bread is therefore here a symbol, and stands, as it so generally does in all languages, both for life and life's nourishment; but by being entitled *the Bread of the Face* it becomes a symbol of a life higher than the physical; it is, since it lies on the table placed in the symbolic heaven, heavenly bread; they who eat of it, and satisfy themselves with it see the face of God" (Bähr, *Symbolik*, book i. c. 6, § 2). It is to be remembered that the shew bread was "taken from the children of Israel by an everlasting covenant" (Lev. xxiv. 8), and may therefore be well expected to bear the most solemn meaning. Bähr proceeds to show very beautifully the connection in Scripture between seeing God and being nourished by God, and points, as the coping-stone of his argument, to Christ being at once the perfect Image of God and the Bread of Life. The references to a table prepared for the righteous man, such as Ps. xxiii. 5, Luke xxii. 30, should also be considered.

F. G.

**SHIBBOLETH** (שִׁבֹּלֶת: *Scibboleth*), Judg. xii. 6. The Hebrew word which the Gileadites under Jephthah made use of at the passages of the Jordan, after a victory over the Ephraimites, to test the pronunciation of the sound *sh* by those who wished to cross over the river. The Ephraimites, it would appear, in their dialect substituted for *sh* the simple sound *s*; and the Gileadites, regarding every one who failed to pronounce *sh* as an Ephraimite and therefore an enemy, put him to death accordingly.

The word "Shibboleth," which has now a second life in the English language in a new signification, has two meanings in Hebrew: 1st, an ear of corn; 2dly, a stream or flood: and it was, perhaps, in the latter sense that this particular word suggested itself to the Gileadites, the Jordan being a rapid river. The word, in the latter sense, is used twice in the 69th Psalm, in verses 2 and 15, where the translation of the A. V. is "the *floods* overflow me," and "let not the water-*flood* overflow me." If in English the word retained its original meaning, the latter passage might be translated "Let not a shibboleth of waters drown me." There is no mystery in this particular word. Any word beginning with the sound *sh* would have answered equally well as a test.

Before the introduction of vowel-points (which took place not earlier than the 6th century A. D.) there was nothing in Hebrew to distinguish the letters Shin and Sin, so it could not be known by the eye in reading when *h* was to be sounded after *s*, just as now in English there is nothing to show that it should be sounded in the words *sugar*, *Asia*, *Persia*; or in German, according to the most common pronunciation, after *s* in the words *Sprache*, *Spiel*, *Sturm*, *Stiefel*, and a large class of similar words. It is to be noted that the sound *sh* is unknown to the Greek language, as the English *th* is unknown to so many modern languages. Hence in the Septuagint proper names commence simply with *s*, which in Hebrew commence with *sh*; and one result has been that, through the Septuagint and the Vulgate, some of these names, such as Samuel, Samson, Simeon, and Solomon, having become[a] naturalized in the Greek form in the English language, have been retained in this form in the English version of the O. T. Hence, likewise, it is a singularity of the Septuagint version that, in the passage in Judg. xii. 6, the translator could not introduce the word "Shibboleth," and has substituted one of its translations, στάχυς, "an ear of corn," which tells the original story by analogy. It is not impossible that this word may have been ingeniously preferred to any Greek word signifying "stream," or "flood," from its first letters being rather harsh-sounding, independently of its containing a guttural.

E. T.

**SHIB'MAH** (שִׂבְמָה, *i. e.* Sibmah [*coolness* or *fragrance*]: Σεβαμά: *Sabama*). One of the places on the east of Jordan which were taken possession of and rebuilt by the tribe of Reuben (Num. xxxii. 38). It is probably the same with Shebam (*i. e.* Sebam) named in the list at the beginning of the chapter, and is certainly identical with Sibmah, so celebrated at a later date for its vines. Indeed, the two names are precisely the same in Hebrew, though our translators have chosen to introduce a difference. SEBMAH, and not Shibmah, is the accurate representative of the Hebrew original.

G.

**SHIC'RON** (שִׁכְרוֹן [*drunkenness*]: Σοκχόθ; Alex. Ακκαφωνα: *Sechrona*). One of the landmarks at the western end of the north boundary of Judah (Josh. xv. 11, only). It lay between Ekron (*Akir*) and Jabneel (*Yebna*), the port at which the boundary ran to the sea. No trace of the name has been discovered between these two places, which are barely four miles apart. The Alex. LXX. (with an unusual independence of the Hebrew text) has evidently taken Shicron as a repetition of Ekron, but the two names are too essentially different to allow of this, which is not supported by any other version.[b] The Targum gives it Shicaron, and with this agrees Eusebius (*Onom.* Δαχωραν), though no knowledge of the locality of the place is to be gained from his notice.

G.

**SHIELD** (סֹחֵרָה; שֶׁלֶט; מָגֵן; צִנָּה).

---

[a] In proper names not naturalised in English through the LXX., the Hebrew form is retained, as in Mephibosheth, Ishbosheth. The latter name is melted down in the LXX. to Ἰεβοσθέ; as, with the *é fermé* the French have softened many Latin words beginning with *st*, such as Studium = Étude, Strena = Étrennes etc., etc.

[b] More probably the initial Σ was omitted accidentally in the Alex. MS. on account of the ΕΙΣ preceding. The reading of Comp. and Alc. is εις Σακχαρωνα. A.

The three first of the Hebrew terms quoted have been already noticed under the head of ARMS, where it is stated that the *tzinnâh* was a large oblong shield or target, covering the whole body; that the *mâgên* was a small, round or oval shield; and that the term *shelet* is of doubtful import, applying to some ornamental piece of armor. To these we may add *sochêrâh*, a poetical term occurring only in Ps. xci. 4. The ordinary shield consisted of a framework of wood covered with leather; it thus admitted of being burnt (Ez. xxxix. 9). The *mâgên* was frequently cased with metal, either brass or copper; its appearance in this case resembled gold,[a] when the sun shone on it (1 Macc. vi. 39), and to this, rather than to the practice of smearing blood on the shield, we may refer the redness noticed by Nahum (ii. 3). The surface of the shield was kept bright by the application of oil, as implied in Is. xxi. 5; hence Saul's shield is described as "not anointed with oil," *i. e.* dusty and gory (2 Sam. i. 21). Oil would be as useful for the metal as for the leather shield. In order to preserve it from the effects of weather, the shield was kept covered, except in actual conflict (Is. xxii. 6; comp. Cæs. *B. G.* ii. 21; Cic. *Nat. Deor.* ii. 14). The shield was worn on the left arm, to which it was attached by a strap. It was used not only in the field, but also in besieging towns, when it served for the protection of the head, the combined shields of the besiegers forming a kind of *testudo* (Ez. xxvi. 8). Shields of state were covered with beaten gold. Solomon made such for use in religious processions (1 K. x. 16, 17); when these were carried off they were replaced by shields of brass, which, as being less valuable, were kept in the guard-room (1 K. xiv. 27), while the former had been suspended in the palace for ornament. A large golden shield was sent as a present to the Romans, when the treaty with them was renewed by Simon Maccabæus (1 Macc. xiv. 24, xv. 18); it was intended as a token of alliance (*σύμβολον τῆς συμμαχίας*, Joseph. *Ant.* xiv. 8, § 5), but whether any symbolic significance was attached to the shield in particular as being the weapon of protection, is uncertain. Other instances of a similar present occur (Suet. *Calig.* 16), as well as of complimentary presents of a different kind on the part of allies (Cic. *Verr.* 2 Act. iv. 29, § 67). Shields were suspended about public buildings for ornamental purposes (1 K. x. 17; 1 Macc. iv. 57, vi. 2); this was particularly the case with the shields (assuming *shelet* to have this meaning) which David took from Hadadezer (2 Sam. viii. 7; Cant. iv. 4), and which were afterwards turned to practical account (2 K. xi. 10; 2 Chr. xxiii. 9); the Gammadim similarly suspended theirs about their towers (Ez. xxvii. 11; see GAMMADIMS). In the metaphorical language of the Bible the shield generally represents the protection of God (*e. g.* Ps. iii. 3, xxviii. 7); but in Ps. xlvii. 9 it is applied to earthly rulers, and in Eph. vi. 16, to faith. W. L. B.

**SHIGGAION** [3 syl.] (שִׁגָּיוֹן: ψαλμός: *Psalmus*), Ps. vii. 1. A particular kind of psalm, the specific character of which is now not known.

In the singular number the word occurs nowhere in Hebrew, except in the inscription of the 7th Psalm, and there seems to be nothing peculiar in that psalm to distinguish it from numerous others, in which the author gives utterance to his feelings against his enemies, and implores the assistance of Jehovah against them; so that the contents of the psalm justify no conclusive inference as to the meaning of the word. In the inscription to the Ode of the Prophet Habakkuk (iii. 1), the word occurs in the plural number; but the phrase in which it stands "*'al shigyónôth*" is deemed almost unanimously, as it would seem, by modern Hebrew scholars to mean "after the manner of the Shiggaion," and to be merely a direction as to the kind of musical measures by which the ode was to be accompanied. This being so, the ode is no real help in ascertaining the meaning of Shiggaion; for the ode itself is not so called, though it is directed to be sung according to the measures of the shiggaion. And, indeed, if it were called a shiggaion, the difficulty would not be diminished; for, independently of the inscription, no one would have ever thought that the ode and the psalm belonged to the same species of sacred poem; and even since their possible similarity has been suggested, no one has definitely pointed out in what that similarity consists, so as to justify a distinct classification. In this state of uncertainty it is natural to endeavor to form a conjecture as to the meaning of shiggaion from its etymology; but unfortunately there are no less than three rival etymologies, each with plausible claims to attention. Gesenius and Fürst, *s. v.*, concur in deriving it from שָׁגָה (the Piel of שָׁגַג), in the sense of magnifying or extolling with praises; and they justify this derivation by kindred Syriac words. Shiggaion would thus mean a hymn or psalm: but its specific meaning, if it has any, as applicable to the 7th Psalm, would continue unknown. Ewald, *Die Poetischen Bücher des Alten Bundes*, i. 29; Rödiger, *s. v.* in his continuation of Gesenius' *Thesaurus*; and Delitzsch, *Commentar über den Psalter*, i. 51, derive it from שָׁגַע, in the sense of reeling, as from wine, and consider the word to be somewhat equivalent to a dithyrambus; while De Wette, *Die Psalmen*, p. 34, Lee, *s. v.*, and Hitzig, *Die Zwölf kleinen Propheten*, p. 26, interpret the word as a psalm of lamentation, or a psalm in distress, as derived from Arabic. Hupfeld, on the other hand, *Die Psalmen*, i. 109, 199, conjectures that shiggaion is identical with higgaion, Ps. ix. 16, in the sense of poem or song, from הָגָה, to meditate or compose; but even so, no information would be conveyed as to the specific nature of the poem.

As to the inscription of Habakkuk's ode, "*'al shigyónôth*," the translation of the LXX. is *μετὰ ᾠδῆς*, which conveys no definite meaning. The Vulgate translates "pro ignorantiis," as if the word had been *shegâgóth*, transgressions through ignorance (Lev. iv. 2, 27; Num. xv. 27; Eccl. v. 6), or *shegîôth* (Ps. xix. 13), which seems to have nearly the same meaning. Perhaps the Vulgate was influenced by the Targum of Jonathan, where *shigyónôth* seems to be translated בשלוהא. In the A. V. of Hab. iii. 1, the rendering is 'upon shigionoth,' as if shigionoth were some musical instrumen.. But under any circumstances 'a

[a] In the passage quoted, the shields carried by the citizens of Antiochus are said to have been actually of gold. This, however, must have been a mistake, as even silver shields were very rare (Diod. Sic. xvii 57).

Digitized by Google

(עַל) must not be translated "upon," in the sense of playing upon an instrument. Of this use there is not a single undoubted example in prose, although playing on musical instruments is frequently referred to; and in poetry, although there is one passage, Ps. xcii. 3, where the word *might* be so translated, it might equally well be rendered there "to the accompaniment of" the musical instruments therein specified — and this translation is preferable. It seems likewise a mistake that *'al* is translated "upon" when preceding the supposed musical instruments, Gittith, Machalath, Neginath, Nechiloth, Shûshan, Shôshannîm (Ps. viii. 1, lxxxi. 1, lxxxiv. 1, liii. 1, lxxxviii. 1, lxi. 1, v. 1, lx. 1, xlv. 1, lxix. 1, lxxx. 1). Indeed, all these words are regarded by Ewald (*Poet. Büch.* i. 177) as meaning musical keys, and by Fürst (*s. vv.*) as meaning musical bands. Whatever may be thought of the proposed substitutes, it is very singular, if those six words signify musical instruments, that not one of them should be mentioned elsewhere in the whole Bible. E. T.

**SHI'HON** (שִׁיחוֹן, *i. e.* Shion: Σιωνά; [Alex. Σειαν:] *Seon*). A town of Issachar, named only in Josh. xix. 19. It occurs between Haphraim and Anaharath. Eusebius and Jerome (*Onomast.*) mention it as then existing "near Mount Tabor." The only name at all resembling it at present in that neighborhood is the *Chirbet Schi'in* of Dr. Schulz (Zimmermann's *Map of Galilee*, 1861) 1½ mile N. W. of *Deburieh*. This is probably the place mentioned by Schwarz (p. 166) as "*Sain* between *Duberieh* and *Jafa*." The identification is, however, very uncertain, since *Schi'in* appears to contain the *Ain*, while the Hebrew name does not.

The redundant *h* in the A. V. is an error of the recent editions. In that of 1611 the name is Shion. G.

**SHI'HOR OF EGYPT** (שִׁיחוֹר מִצְרַיִם: ὕδια Αἰγύπτου: *Sihor Ægypti*, 1 Chr. xiii. 5) is spoken of as one limit of the kingdom of Israel in David's time, the entering in of Hamath being the other. It must correspond to "Shihor," "the Shihor which [is] before Egypt" (Josh. xiii. 2, 3), A. V. "Sihor," sometimes, at least, a name of the Nile, occurring in other passages, one of which (where it has the article) is parallel to this. The use of the article indicates that the word is or has been an appellative, rather the former if we judge only from the complete phrase. It must also be remembered that Shihor Mizraim is used interchangeably with Nahal Mizraim, and that the name SHIHOR-LIBNATH, in the north of Palestine, unless derived from the Egyptians or the Phœnician colonists of Egypt, as we are disposed to think possible, from the connection of that country with the ancient manufacture of glass, shows that the word Shihor is not restricted to a great river. It would appear therefore that Shihor of Egypt and "the Shihor which [is] before Egypt" might designate the stream of the *Wâdi-l-'Areesh:* Shihor alone would still be the Nile. On the other hand, both Shihor, and even Nahal, alone, are names of the Nile, while Nahal Mizraim is used interchangeably with the river (נְהַר, not יְאֹר) of Mizraim. We therefore are disposed to hold that all the names designate the Nile. The fitness of the name Shihor to the Nile must be remembered [NILE; RIVER OF EGYPT; SIHOR.] R. S. P.

* It is difficult to adjust all the Biblical references to Shihor, to the river Nile. In Isaiah xxiii. 3, the exports of Egypt, especially in grain, are spoken of as contributing to swell the commerce of Tyre: "By great waters the seed of *Shihor*, the harvest of *Yeor*, is her revenue." This must refer to the Nile as the cause of the fertility of Egypt. Again, in Jeremiah ii. 18, where the Lord is expostulating with Israel for seeking help from Egypt and Assyria, the Nile is evidently referred to as the water of which the Egyptians drink, and as answering to the Euphrates: "What hast thou to do in the way of Egypt, to drink the waters of *Shihor*, or what hast thou to do in the way of Assyria, to drink the waters of the river?"

But the meaning is less clear where *Shihor* is spoken of as the boundary between Egypt and Canaan. Just before his death Joshua described the land on the south that remained to be possessed, as "all the borders of the Philistines, and all Geshuri, from Sihor which is before Egypt" (Josh. xiii. 3); and David, when taking the ark up to Jerusalem, is said to have "gathered all Israel together, from *Shihor* of Egypt even unto the entering of Hamath" (1 Chr. xiii. 5). Joshua may have had in view the breadth of dominion promised to Abraham; but certainly in his day the Egyptians themselves did not limit their territory eastward at the Nile; and there is no evidence that the kingdom of David in its highest prosperity, ever extended literally to the bank of the Nile. Hence, if the description in these passages is taken with geographical accuracy, the Shihor *before Egypt* must denote the *Wâdi-l-'Areesh;* but if taken with the latitude of prophetic or poetic description it may also denote the Nile, and so be brought into harmony with the passages cited above. Only in this way can the name be relieved of its apparent ambiguity. J. P. T.

**SHI'HOR-LIB'NATH** (שִׁיחוֹר לִבְנָת [see below]: τῷ Σιὼν [Vat. Σειων] καὶ Λαβανάθ; Alex. Σειωρ κ. Λ.: *Sihor et Labanath*). Named only in Josh. xix. 26 as one of the landmarks of the boundary of Asher. Nothing is known of it. By the ancient translators and commentators (as Peshito-Syriac, and Eusebius and Jerome in the *Onomasticon*) the names are taken as belonging to two distinct places. But modern commentators, beginning perhaps with Masius, have inclined to consider Shihor as identical with the name of the Nile, and Shihor-Libnath to be a river. Led by the meaning of Libnath as "white," they interpret the Shihor-Libnath as the glass river, which they then naturally identify with the Belus[a] of Pliny (*H. N.* v. 19), the present *Nahr Naman*, which drains part of the plain of *Akka*, and enters the Mediterranean a short distance below that city. It is a pity to disturb a theory at once so ingenious and so consistent, and supported by the great name of Michaelis (*Suppl.* No. 2462), but it is surely very far-fetched. There is nothing to indicate that Shihor-Libnath is a stream at all, except the agreement of the first portion of the name with a rare word used for the Nile — a river which can have nothing in common with an insignificant streamlet like the *Naman*. And even if it be a river, the position of the *Na-*

[a] It is singular, too, that Josephus should state that there was a monument of *Memnon* standing close to the Belus (*B. J.* ii. 10, § 2).

Digitized by Google

name is unsuitable, since, as far as can be gathered from the very obscure list in which the name occurs, Shihor-Libnath was the south pivot of the territory of Asher, below Mount Carmel. Reland's conjecture of the Crocodeilon river, probably the *Moieh el-Temseh*, close to *Kaisariyeh*, is too far south. G.

**SHIL'HI** (שִׁלְחִי [perh. *armed*]: Σαλαΐ, Σαλί; [Vat. Σεμεει, Σαλει;] Alex. Σαλαλα, Σαλει: *Salai, Selahi*). The father of Azubah, Jehoshaphat's mother (1 K. xxii. 42; 2 Chr. xx. 31).

**SHIL'HIM** (שִׁלְחִים [*armed men*, Ges.; *fountains*, Fürst]: Σαλή; Alex. Σελεειμ: *Selim*). One of the cities in the southern portion of the tribe of Judah. Its place in the list is between Lebaoth and Ain, or Ain-Rimmon (Josh. xv. 32), and it is not elsewhere mentioned. It is not even named by Eusebius and Jerome. No trace of it has yet been discovered. In the list of Simeon's cities in Josh. xix., SHARUHEN (ver. 6) occupies the place of Shilhim, and in 1 Chr. iv. 31 this is still further changed to SHAARAIM. It is difficult to say if these are mere corruptions, or denote any actual variations of name.

The juxtaposition of Shilhim and Ain has led to the conjecture that they are identical with the Salim and Ænon of St. John the Baptist: but their position in the south of Judah, so remote from the scene of St. John's labors and the other events of the Gospel history, seems to forbid this. G.

**SHIL'LEM** (שַׁלֻּם [*requital*]: Σολλήμ, Σελλήμ [Vat. -λη]; Alex. Συλλημ in Gen.: *Sallem, Sellem*). Son of Naphtali, and ancestor of the family of the Shillemites (Gen. xlvi. 24; Num. xxvi. 49). The same as SHALLUM 7.

**SHIL'LEMITES, THE** (הַשַּׁלֻּמִי [patr., as above]: ὁ Σελλημί [Vat. -μει]: *Sellemitæ*). The descendants of Shillem the son of Naphtali (Num. xxvi. 49).

**SHILO'AH, THE WATERS OF** (מֵי הַשִּׁלֹחַ [*sending forth*]: τὸ ὕδωρ τοῦ Σειλωάμ; Alex. Σιλωαμ: Saad. عين سلوان[a] *Ain Selwân*: *aquæ Siloe*). A certain soft-flowing stream employed by the prophet Isaiah (viii. 6) to point his comparison between the quiet confidence in Jehovah which he was urging on the people, and the overwhelming violence of the king of Assyria, for whose alliance they were clamoring.

There is no reason to doubt that the waters in question were the same which are better known under their later name of SILOAM — the only perennial spring of Jerusalem. Objection has been taken to the fact that the "waters of Siloam" run with an irregular intermittent action, and therefore could hardly be appealed to as flowing "softly." But the testimony of careful investigators (Rob. *Bibl. Res.* i. 341, 342; Barclay, *City*, p. 516) establishes the fact that the disturbance only takes place, at the utmost, two or three times a day, say three to four hours out of the twenty-four, the flow being "perfectly quiescent" during the rest of the time. In summer the disturbance only occurs once in two or three days. Such interruptions to the quiet flow of the stream would therefore not interfere with the contrast enforced in the prophet's metaphor.

The form of the name employed by Isaiah is midway between the *has-Shelach* of Nehemiah (A. V. SILOAH) and the Siloam of the N. T. A similar change is noticed under SHILONI.

The spring and pool of SILOAM are treated of under that head. G.

**SHI'LOH** (שִׁילֹה: τὰ ἀποκείμενα αὐτῷ: *qui mittendus est*). In the A. V. of the Bible, Shiloh is once used as the name of a person, in a very difficult passage, in the 10th verse of the 49th chapter of Genesis. Supposing that the translation is correct, the meaning of the word is Peaceable, or Pacific, and the allusion is either to Solomon, whose name has a similar signification, or to the expected Messiah, who in Is. ix. 6 is expressly called the Prince of Peace. This was once the translation of Gesenius, though he afterwards saw reason to abandon it (see his *Lexicon*, s. v.), and it is at present the translation of Hengstenberg in his *Christologie des Alten Testaments*, p. 69, and of the Grand Rabbin Wogue, in his Translation of Genesis, a work which is approved and recommended by the Grand Rabbins of France (*Le Pentateuque, ou les Cinq Livres de Moise*, Paris, 1860). Both these writers regard the passage as a Messianic prophecy, and it is so accepted by the writer of the article MESSIAH in this work (vol. iii. p. 1906).

But, on the other hand, if the original Hebrew text is correct as it stands, there are three objections to this translation, which, taken collectively, seem fatal to it. 1st. The word Shiloh occurs nowhere else in Hebrew as the name or appellation of a person. 2dly. The only other Hebrew word, apparently, of the same form, is Giloh (Josh. xv. 51; 2 Sam. xv. 12); and this is the name of a city, and not of a person. 3dly. By translating the word as it is translated everywhere else in the Bible, namely, as the name of the city in Ephraim where the Ark of the Covenant remained during such a long period, a sufficiently good meaning is given to the passage without any violence to the Hebrew language, and, indeed, with a precise grammatical parallel elsewhere (compare וַיָּבֹא שִׁלֹה, 1 Sam. iv. 12). The simple translation is, "The sceptre shall not depart from Judah, nor the ruler's staff from between his feet, till he shall go to Shiloh." And, in this case, the allusion would be to the primacy of Judah in war (Judg. i. 1, 2, xx. 18; Num. ii. 3, x. 14), which was to continue until the Promised Land was conquered, and the Ark of the Covenant was solemnly deposited at Shiloh. Some Jewish writers had previously maintained that Shiloh, the city of Ephraim, was referred to in this passage; and Servetus had propounded the same opinion in a fanciful dissertation, in which he attributed a double meaning to the words (*De Trinitate*, lib. ii. p. 61, ed. of 1553 A. D.). But the above translation and explanation, as proposed and defended on critical grounds of reasonable validity, was first suggested in modern days by Teller (*Notæ Criticæ et Exegeticæ in Gen.* xlix., *Deut.*, xxxiii. *Ex.* xv., *Judg.* v., Halæ et Helmstadii, 1766), and it has since, with modifications, found favor with numerous learned men belonging to various schools of theology, such as Eichhorn, Hitzig, Tuch, Bleek, Ewald, Delitzsch, Rödiger, Kalisch, Luzzatto, and Davidson.

The objections to this interpretation are set forth

[a] The Targum Jonathan, Peshito, and Arabic Versions of 1 K. i. 33, read Shiloah for the Gihon of the Hebrew.

Digitized by Google

at length by Hengstenberg (*l. c.*), and the reasons in its favor, with an account of the various interpretations which have been suggested by others, are well given by Davidson (*Introduction to the Old Testament*, i. 199-210). Supposing always that the existing text is correct, the reasons in favor of Teller's interpretation seem much to preponderate. It may be observed that the main obstacle to interpreting the word Shiloh in its simple and obvious meaning seems to arise from an imaginative view of the prophecy respecting the Twelve Tribes, which finds in it more than is justified by a sober examination of it. Thus Hengstenberg says: "The temporal limit which is here placed to the preëminence of Judah would be in glaring contradiction to verses 8 and 9, in which Judah, without any temporal limitation, is raised to be the Lion of God." But the allusion to a lion is simply the following: "Judah is a lion's whelp: from the prey, my son, thou art gone up: he stooped down, he couched as a lion, and as an old lion; who shall rouse him up?" Now, bearing in mind the general coloring of oriental imagery, there is nothing in this passage which makes a reference to the city Shiloh improbable. Again, Hengstenberg says that the visions of Jacob never go into what is special, but always have regard to the future as a whole and on a great scale (*im ganzen und grossen*). If this is so, it is nevertheless compatible with the following geographical statement respecting Zebulun: "Zebulun shall dwell at the haven of the sea, and he shall be for an haven of ships, and his border shall be unto Zidon." It is likewise compatible with prophecies respecting some of the other tribes, which, to any one who examined Jacob's blessing minutely with lofty expectations would be disappointing. Thus of Benjamin, within whose territory the glorious Temple of Solomon was afterwards built, it is merely said, "Benjamin shall ravin as a wolf; in the morning he shall devour the prey, and at night he shall divide the spoil." Of Gad it is said, "A troop shall overcome him, but he shall overcome at the last." Of Asher, "Out of Asher his bread shall be fat, and he shall yield royal dainties." And of Naphtali, "Naphtali is a hind let loose; he giveth goodly words" (Gen. xlix. 19, 20, 21, 27). Indeed the difference (except in the blessing of Joseph, in whose territory Shiloh was situated) between the reality of the prophecies and the demands of an imaginative mind, explains, perhaps, the strange statement of St. Isidore of Pelusium, quoted by Teller, that, when Jacob was about to announce to his sons the future mystery of the Incarnation, he was restrained by the finger of God; silence was enjoined him: and he was seized with loss of memory. See the letter of St. Isidore, Lib. i. Epist. 365, in *Bibliotheca Maxima Patrum*, vii. 570.

2. The next best translation of Shiloh is perhaps that of "Rest." The passage would then run thus: "The sceptre shall not depart from Judah . . . . till rest come, and the nations obey him" — and the reference would be to the Messiah, who was to spring from the tribe of Judah. This translation deserves respectful consideration, as having been ultimately adopted by Gesenius. It was preferred by Vater, and is defended by Knobel in the *Exegetisches Handbuch*, Gen. xlix. 10. There is one objection less to it than to the use of Shiloh as a person, and it is not without some probability Still it remains subject to the objection that Shiloh occurs nowhere else in the Bible except as the name of a city, and that by translating the word here as the name of a city a reasonably good meaning may be given to the passage.

3. A third explanation of Shiloh, on the assumption that it is not the name of a person, is a translation by various learned Jews, apparently countenanced by the Targum of Jonathan, that *Shiloh* merely means "his son," *i. e.* the son of Judah (in the sense of the Messiah), from a supposed word *Shil*, "a son." There is, however, no such word in known Hebrew, and as a plea for its possible existence reference is made to an Arabic word, *shalil*, with the same signification. This meaning of "his son" owes, perhaps, its principal interest to its having been substantially adopted by two such theologians as Luther and Calvin. (See the Commentaries of each on Gen. xlix. 10.) Luther connected the word with Schilyah in Deut. xxviii. 57, but this would not now be deemed permissible.

The translation, then, of Shiloh as the name of a city is to be regarded as the soundest, if the present Hebrew text is correct. It is proper, however, to bear in mind the possibility of there being some error in that text. When Jerome translated the word "qui missus est," we may be certain that he did not read it as Shiloh, but as some form of שלח, "to send," as if the word *ὁ ἀπεσταλμένος* might have been used in Greek. We may likewise be certain that the translator in the Septuagint did not read the word as it stands in our Bibles. He read it as שִׁלֹּ֫ה = שִׁלֹה, precisely corresponding to אֲשֶׁר לוֹ, and translated it well by the phrase *τὰ ἀποκείμενα αὐτῷ*; so that the meaning would be, "The sceptre shall not depart from Judah . . . . till the things reserved for him come." It is most probable that Ezekiel read the word in the same way when he wrote the words עַד־בָּא אֲשֶׁר־לוֹ הַמִּשְׁפָּט (Ez. xxi. 32, in the A. V. verse 27); and it seems likely, though not certain, that the author[a] of the Paraphrase of Jacob's last words in the Targum of Onkelos followed the reading of Ezekiel and the Septuagint, substituting the word מַלְכוּתָא for the מִשְׁפָּט of Ezekiel. It is not meant by these remarks that שִׁלֹה is more likely to have been correct than Shiloh, though one main argument against שִׁלֹה, that שְׁ occurs nowhere else in the Pentateuch as an equivalent to אשר, is inconclusive, as it occurs in the song of Deborah, which, on any hypothesis, must be regarded as a poem of great antiquity. But the fact that there were different readings, in former times, of this very difficult passage, necessarily tends to suggest the possibility that the correct reading may have been lost.

[a] This writer, however, was so fanciful, that no reliance can be placed on his judgment on any point where it was possible for him to go wrong. Thus his paraphrase of the prophecy respecting Benjamin is: "The shechinah shall abide in the land of Benjamin; and in his possession a sanctuary shall be built Morning and evening the priests shall offer oblations and in the evening they shall divide the residue of their portion."

Whatever interpretation of the present reading may be adopted, the one which must be pronounced entitled to the least consideration is that which supposes the prophecy relates to the birth of Christ as occurring in the reign of Herod just before Judæa became a Roman province. There is no such interpretation in the Bible, and however ancient this mode of regarding the passage may be, it must submit to the ordeal of a dispassionate scrutiny. In the first place, it is impossible reasonably to regard the dependent rule of King Herod the Idumæan as an instance of the sceptre being still borne by Judah. In order to appreciate the precise position of Herod, it may be enough to quote the unsuspicious testimony of Jerome, who, in his Commentaries on Matthew, lib. iii. c. 22, writes as follows: "Cæsar Augustus Herodem filium Antipatris alienigenam et proselytum regem Judæis constituerat, *qui tributis præesset, et Romano pareret imperio.*" Secondly, it must be remembered that about 588 years before Christ, Jerusalem had been taken, its Temple destroyed, and its inhabitants led away into Captivity by Nebuchadnezzar, king of the Chaldees, and during the next fifty years the Jews were subjects of the Chaldæan Empire. Afterwards, during a period of somewhat above 200 years, from the taking of Babylon by Cyrus to the defeat of Darius by Alexander the Great at Arbela, Judæa was a province of the Persian empire. Subsequently, during a period of 163 years, from the death of Alexander to the rising of the Maccabees, the Jews were ruled by the successors of Alexander. Hence for a period of more than 400 years from the destruction of the Temple by Nebuchadnezzar the Jews were deprived of their independence; and, as a plain, undeniable matter of fact, the sceptre had already departed from Judah. Without pursuing this subject farther through the rule of the Maccabees (a family of the tribe of Levi, and not of the tribe of Judah) down to the capture of Jerusalem and the conquest of Palestine by Pompey (B. C. 63), it is sufficient to observe that a supposed fulfillment of a prophecy which ignores the dependent state of Judæa during 400 years after the destruction of the first Temple, cannot be regarded as based upon sound principles of interpretation. E. T.

**SHI'LOH**, as the name of a place, stands in Hebrew as שִׁלֹה (Josh. xviii. 1–10), שִׁלוֹ (1 Sam. i. 24, iii. 21; Judg. xxi. 19), שִׁילֹה (1 K. ii. 27), שִׁילוֹ (Judg. xxi. 21; Jer. vii. 12), and perhaps also שִׁילֹנִי, whence the gentile שִׁילֹנִי (1 K. xi. 29, xii. 15): in the LXX. generally as Σηλώ, Σηλώμ; in Judg. xxi. Vat. Σηλωϋ; in Jer. xli. 5 Σαλήμ, Alex. Σαλωμ; in Joseph. *Ant.* viii. 7, § 7; 11, § 1, etc. Σιλώ; v. 1, § 19; 2, § 9, Σιλῶνι; 2, § 12, Σηλώ: and in the Vulg. as *Silo*, and more rarely *Selo*. The name was derived probably from שָׁלָה, שָׁלַו, "to rest," and represented the idea that the nation attained at this place to a state of rest, or that the Lord himself would here rest among his people. TAANATH-SHILOH may be another name of the same place, or of a different place near it, through which it was customary to pass on the way to Shiloh (as the obscure etymology may indicate). [TAANATH-SHILOH.] (See also Kurtz's *Gesch. des A. Bund.* ii. 369.)

The principal conditions for identifying with confidence the site of a place mentioned in the Bible, are: (1) that the modern name should bear a proper resemblance to the ancient one; (2) that its situation accord with the geographical notices of the Scriptures; and (3) that the statements of early writers and travellers point to a coincident conclusion. Shiloh affords a striking instance of the combination of these testimonies. The description in Judg. xxi. 19 is singularly explicit. Shiloh, it is said there, is "on the north side of Beth-el, on the east side of the highway that goeth up from Beth-el to Shechem, and on the south of Lebonah." In agreement with this the traveller at the present day (the writer quotes here his own note-book), going north from Jerusalem, lodges the first night at *Beitîn*, the ancient Beth-el; the next day, at the distance of a few hours, turns aside to the right, in order to visit *Seilûn*, the Arabic for Shiloh; and then passing through the narrow Wady, which brings him to the main road, leaves *el-Lebbân*, the Lebonah of Scripture, on the left as he pursues "the highway" to *Nâblus*, the ancient Shechem. [SHECHEM.] It was by searching for these sites, under guidance of the clew thus given in Scripture that Dr. Robinson rediscovered two of them (Shiloh and Lebonah) in 1838. Its present name is sufficiently like the more familiar Hebrew name, while it is identical with *Shilon* (see above), on which it is evidently founded. Again, Jerome (*ad Zeph.* i. 14), and Eusebius (*Onomast.* art. "Silo") certainly have *Seilûn* in view when they speak of the situation of Shiloh with reference to Neapolis or *Nâblus*. It discovers a strange oversight of the data which control the question, that some of the older travellers placed Shiloh at *Neby Samwîl*, about two hours northwest of Jerusalem.
